In the 1930's when the D.C. Board of Parole was established, this divided jurisdictional scheme may have met correctional needs. The Comprehensive Crime Control Act of 1983 abolishes the United States Parole Commission in 1991, however, and legislative attention must clearly be given to the questions of future parole responsibility for D.C. Code offenders designated to Federal institutions. At the same time every effort must be made to insure that the District of Columbia will provide adequate prison space to house its sentenced criminals.

A larger question is what role should parole serve as a correctional tool in the District of Columbia? The legislative history of the Comprehensive Crime Control Act of 1984, P.L. 98-473, clearly reflects the Congressional determination that the "rehabilitation model" upon which the Federal sentencing and parole system was based is no longer valid. S. Rep. No. 225, 98th Congress, 1st Sess. 38 (1983). Based upon a study spanning a decade conducted by the National Commission on Reform of Federal Criminal Law, it was concluded that the Federal sentencing and parole system resulted in significant disparities in criminal sentences. As stated in the Senate Report:

"The shameful disparity in criminal sentences is a major flaw in the existing criminal justice system, and makes it clear that the system is ripe for reform. Correcting our arbitrary and capricious method of sentencing will not be a panacea for all of the problems which confront the administration of criminal justice, but it will constitute a significant step forward.

"The [Comprehensive Crime Control Act of 1984 (CCCA)] meets the critical challenges of sentencing reform. The [CCCA's] sweeping provisions are designed to structure judicial sentencing discretion, eliminate indeterminate sentencing, phase out parole release, and make criminal sentencing fairer and more certain. The current effort constitutes an important attempt to reform the manner in which we sentence convicted offenders. The Committee believes that the [CCCA] represents a major breakthrough in this area." *Id.* at 65.

The current D.C. sentencing and parole system does not reflect this new understanding of the limitations of the "rehabilitation model" as described above.

In addition, the District of Columbia parole system has other demonstrated problems. When we reviewed similar legislation two years ago [H.R. 3369], this matter was discussed in detail in our letter dated July 25, 1983 from Assistant Attorney General Robert A. McConnell to you. The Department noted at that time that the D.C. Board of Parole, according to its 1982 annual report, granted parole at initial hearings to 61 percent of the adult offenders and that 73 percent of the remainder were granted parole upon a rehearing. The Board also reported however, that based upon a study of a selected sample of 322 parolees released on parole between 1977 and 1979, 52 percent were re-arrested during the first two years of parole supervision. Of the parolees who were re-arrested, 77 percent were convicted for crimes committed while on parole. Given the very high percentage of parolees released at the time of initial parole consideration and the very high rate of recidivist criminal activity among those released, the policies and procedures of the D.C. Board of Parole were called into serious question.

We also pointed out that despite the large number of D.C. parolees who commit crimes following parole release, parole apparently was revoked in a relatively small percentage of the cases. In that regard, the D.C. Board of Parole reported that of those parolees in its 1977-1979 sample who were convicted of crimes while on parole, parole was revoked because of the new offense in less than one half of the cases. Although the reason for this statistic was not explained, it appears that it may be attributed to the D.C. Parole Board policy of not issuing parole violator warrants for certain offenses. In this regard, the Board listed in its 1982 Annual Report

the types of offenses it terms "Eligible Offenses" for purposes of issuance of parole violator warrants. It appears that as a matter of policy, the Board will not issue parole violator warrants for burglary of commercial establishments, possession of firearms (unless the defendant is arrested with the weapon in his hand or on his person), grand larceny, embezzlement, fraud, forgery and uttering and for a host of other violations of the District of Columbia Code or the United States Code.

This apparent policy which allows substantial numbers of parolees to continue on parole even after arrest and conviction of serious crimes was of significant concern to us in the past. If these matters have not yet been completely remedied, and it may be too early to conclude that they have, then similar concern is presently warranted. Under H.R. 2050, the jurisdiction of the D.C. Board of Parole would be substantially expanded to include those D.C. Code offenders presently under the jurisdiction of the U.S. Parole Commission. These offenders, however, include some of the most dangerous and violent criminals convicted in the District of Columbia. Premature release of such individuals pursuant to existing parole policies would pose a real and direct threat to law enforcement interests in the District of Columbia.

We believe it is time for a thorough legislative review of District of Columbia sentencing and correctional practices. A major expansion of the capacity of D.C. correctional facilities is essential. The Federal Bureau of Prisons is seriously overcrowded and can no longer accept the overload of the District of Columbia system. This is especially true in light of the increased D.C. prison population that would result, at least temporarily, from a more responsibly run parole system. Replacement of the parole system in the District of Columbia by a sentencing guideline system similar to that adopted by Congress in the Comprehensive Crime Control Act of 1984 should be considered. While expansion of the D.C. inmate capacity must begin at once, other changes can be more thoroughly considered than is done in H.R. 2050.

The Office of Management and Budget has advised this Department that there is no objection to the submission of this report from the standpoint of the Administration's program.

Sincerely,

PHILLIP D. BRADY,
Acting Assistant Attorney General.

U.S. DEPARTMENT OF JUSTICE,
OFFICE OF LEGISLATIVE AND INTERGOVERNMENTAL AFFAIRS,
Washington, DC, July 31, 1985.

Hon. RONALD V. DELLUMS,
Chairman, Committee on District of Columbia, U.S. House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: This is to proffer the views of the Department of Justice on H.R. 2946, a bill that would establish an independent jury selection system for the Superior Court of the District of Columbia. While we believe that some of the changes from current law contained in H.R. 2946 would constitute significant improvements over the jury selection system now in effect in the federal courts, we oppose the bill for the reasons set forth below.

Jury selection for both the Superior Court of the District of Columbia and the United States District Court for the District of Columbia is now governed by a single process established by the Jury Selection and Service Act (28 U.S.C. 1861, *et seq.*) and administered by the United States District Court for the District of Columbia. If H.R. 2946 were enacted, there would exist within the District of Columbia two separate jury selection systems—one for the local trial court and one for the federal trial court. Inevitably, such a bifurcated approach would entail administrative difficulties, duplication of effort, and additional cost to the federal government, notwithstanding the provision of the bill that encourages the federal and local courts to share resources and facilities to the extent feasible.

H.R. 2946 would improve the current jury selection system by broadening the base of persons who can be summoned for jury duty, by narrowing the number of automatic exclusions from jury service, and by increasing the penalties for certain fraudulent conduct in the jury selection process. However, we are not persuaded that the prospect of such advances warrants the establishment of another jury selection system in the District of Columbia, with all of the drawbacks that such a course would entail. Rather, we think the better course would be to consider amending the Jury Selection and Service Act to incorporate the improvements contained in H.R. 2946. Such an approach would improve the jury selection process not only in the Superior Court but in all federal courts. Equally important, it would preserve the unified selection system currently in effect in the District of Columbia, thereby avoiding the administrative and financial costs of a bifurcated system.

The Office of Management and Budget has advised that there is no objection to the submission of this report from the standpoint of the Administration's program.

Sincerely,

PHILLIP D. BRADY,
Acting Assistant Attorney General.

Mr. DELLUMS. Mr. Speaker, I move the previous question on the bill.

The previous question was ordered.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

DISTRICT OF COLUMBIA JUDICIAL EFFICIENCY AND IMPROVEMENT ACT OF 1985

Mr. DELLUMS. Mr. Speaker, by direction of the Committee on the District of Columbia, I call up the bill (H.R. 3578) to provide permanent authority for hearing commissioners in the District of Columbia courts, to modify certain procedures of the District of Columbia Judicial Nomination Commission and the District of Columbia Commission on Judicial Disabilities and Tenure, and for other purposes, and ask unanimous consent that the bill be considered in the House as in the Committee of the Whole.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the bill, as follows:

H.R. 3578

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "District of Columbia Prosecutorial and Judicial Efficiency Act of 1985".

SEC. 2. ANNUAL REPORT ON PROSECUTIONS.

Not later than March 1 of each year, the United States attorney for the District of Columbia shall compile and make available an annual report concerning prosecutions, under the laws of the District of Columbia and the laws of the United States applicable exclusively to the District of Columbia, conducted by the Office of the United States attorney for the District of Columbia in the previous calendar year. Such report shall include the number of prosecutions and convictions by category and nature of offense, and shall include any recommendations concerning the criminal justice system in the District of Columbia.

SEC. 3. HEARING COMMISSIONERS.

Section 11-1732 of title 11 of the District of Columbia Code is amended to read as follows:

"§ 11-1732. Hearing commissioners.

"(a) The chief judge of the Superior Court may appoint and remove hearing commissioners who shall serve in the Superior Court and perform the duties enumerated in subsection (c) of this section and such other duties as are consistent with the Constitution and laws of the United States and of the District of Columbia and are assigned by rule of the Superior Court.

"(b) No individual may be appointed or serve as a hearing commissioner under this section unless such individual has been a member of the bar of the District of Columbia for at least three years.

"(c) A hearing commissioner, when specifically designated by the chief judge of the Superior Court, may perform the following functions:

"(1) Administer oaths and affirmations and take acknowledgments.

"(2) Determine conditions of release and pretrial detention pursuant to the provisions of title 23 of the District of Columbia Code (relating to criminal procedures).

"(3) Conduct preliminary examinations in all criminal cases to determine if there is probable cause to believe that an offense has been committed and that the accused committed it.

"(4) Subject to the provisions of subsection (d), with the consent of the parties involved, make findings in uncontested proceedings, and in contested hearings in the civil, criminal, and family divisions of the Superior Court.

"(d)(1) With respect to proceedings and hearings under subsection (c)(4), a rehearing of the case, or a review of the hearing commissioner's findings, may be made by a judge of the appropriate division sua sponte and shall be made upon a motion of one of the parties, which motion shall be filed

within ten days after the judgment. An appeal to the District of Columbia Court of Appeals may be made only after a review hearing is held in the Superior Court.

"(2)(A) In any case brought under sections 11-1101 (1), (3), (10), or (11) involving the establishment or enforcement of child support, or in any case seeking to modify an existing child support order, where a hearing commissioner in the Family Division of the Superior Court finds that there is an existing duty of support, the hearing commissioner shall conduct a hearing on support, make findings, and enter judgment.

"(B) If in a case under subparagraph (A), the hearing commissioner finds that a duty of support exists and makes a finding that the case involves complex issues requiring judicial resolution, the hearing commissioner shall establish a temporary support obligation and refer unresolved issues to a judge.

"(C) In the cases under subparagraphs (A) and (B) in which the hearing commissioner finds that there is a duty of support and the individual owing that duty has been served or given notice of the proceedings under any application statute or court rule, if that individual fails to appear or otherwise respond, the hearing commissioner shall enter a default order.

"(D) A rehearing or review of the hearing commissioner's findings in a case under subparagraphs (A) and (B) may be made by a judge of the Family Division sua sponte. The findings of the hearing commissioner shall constitute a final order of the Superior Court.".

SEC. 4. APPOINTMENT OF EXECUTIVE OFFICER OF THE DISTRICT OF COLUMBIA COURTS.

Section 11-1703 of title 11 of the District of Columbia Code is amended—

(1) by striking out subsection (b);

(2) by redesignating subsection (c) as subsection (d); and

(3) by inserting after subsection (a) the following new subsection:

"(b) The Executive Officer shall be appointed, and subject to removal, by the Joint Committee on Judicial Administration with the approval of the chief judges of the District of Columbia courts. In making such appointment the Joint Committee shall consider experience and special training in administrative and executive positions and familiarity with court procedures.

"(c) The Executive Officer shall be a bona fide resident of the District of Columbia or become a resident not more than 180 days after the date of appointment.".

SEC. 5. MANDATORY RETIREMENT AGE OF JUDGES.

Section 431(c) of the District of Columbia Self-Government and Governmental Reorganization Act is amended by striking out "Seventy" and inserting in lieu thereof "seventy-four".

SEC. 6. APPOINTMENT PANEL FOR THE BOARD OF TRUSTEES OF THE PUBLIC DEFENDER SERVICE.

(a) COMPOSITION OF APPOINTMENT PANEL.—Section 303 of the District of Columbia Court Reform and Criminal Procedure Act of 1970 (D.C. Code, 1-2703) is amended in subsection (b)(1)—

(1) by striking out subparagraph (A); and

(2) by redesignating subparagraphs (B), (C), (D), and (E) as subparagraphs (A), (B), (C), and (D), respectively.

(b) PRESIDING OFFICER.—Section 303 of such Act (D.C. Code, 1-2703) is further amended in subsection (b)(2) by striking out "Chief Judge of the United States Court of Appeals for the District of Columbia Circuit" and inserting in lieu thereof "Chief Judge of the District of Columbia Court of Appeals".

SEC. 7. REORGANIZATION OF AUDIT RESPONSIBILITY.

(a) AUDITOR-MASTER.—Section 11-1724 of title 11 of the District of Columbia Code is amended—

(1) by striking out "(1) audit and state fiduciary accounts,"; and

(2) by respectively designating clauses (2) and (3) as clauses "(1)" and "(2)".

(b) REGISTER OF WILLS.—Section 11-2104(a) of title 11 of the District of Columbia Code is amended—

(1) in paragraph (2) by striking out "and" after the semicolon;

(2) in paragraph (3) by striking out the period and inserting in lieu thereof "; and"; and

(3) by inserting at the end thereof the following new paragraph:

"(4) audit and state fiduciary accounts.".

SEC. 8. ELIMINATION OF DUPLICATE JUDICIAL FINANCIAL REPORTING REQUIREMENT.

(a) TERMINATION OF FEDERAL DISCLOSURE REQUIREMENTS.—Section 303 of the Ethics in Government Act of 1978 (28 U.S.C. App. 301) is amended by inserting at the end thereof the following new subsection:

"(h) The provisions of this Act shall not apply to any judicial officer or employee of the Superior Court of the District of Columbia or the District of Columbia Court of Appeals.".

(b) TECHNICAL AND CONFORMING AMENDMENT.—Section 308(9) of such Act (28 U.S.C. App. 308(9)) is amended by striking out "courts of the District of Columbia".

SEC. 9. CERTIFICATION OF QUESTIONS OF LAW.

Subchapter II of Chapter 7, title 11, District of Columbia Code, is amended by inserting after section 11-722 the following new section:

"§ Sec. 11-723. Certification of Questions of Law.

"(a) The District of Columbia Court of Appeals may answer questions of law certified to it by the Supreme Court of the United States, a Court of Appeals of the United States, or the highest appellate court of any State, if there are involved in any proceeding before any such certifying court questions of law of the District of Columbia which may be determinative of the cause pending in such certifying court and as to which it appears to the certifying court there is no controlling precedent in the decisions of the District of Columbia Court of Appeals.

"(b) This section may be invoked by an order of any of the courts referred to in subsection (a) upon the court's motion or upon motion of any party to the cause.

"(c) A certification order shall set forth (1) the question of law to be answered; and (2) a statement of all facts relevant to the questions certified and the nature of the controversy in which the questions arose.

"(d) A certification order shall be prepared by the certifying court and forwarded to the District of Columbia Court of Appeals. The District of Columbia Court of Appeals may require the original or copies of all or such portion of the record before the certifying court as are considered necessary to a determination of the questions certified to it.

"(e) Fees and costs shall be the same as in appeals docketed before the District of Columbia Court of Appeals and shall be equally divided between the parties unless precluded by statute or by order of the certifying court.

"(f) The District of Columbia Court of Appeals may prescribe the rules of procedure concerning the answering and certification of questions of law under this section.

"(g) The written opinion of the District of Columbia Court of Appeals stating the law governing any questions certified under subsection (a) shall be sent by the clerk to the certifying court and to the parties.

"(h)(1) The District of Columbia Court of Appeals, on its own motion or the motion of any party, may order certification of questions of law to the highest court of any State under the conditions described in subsection (a).

"(2) The procedures for certification from the District of Columbia to a State shall be those provided in the laws of that State.".

SEC. 10. PUBLIC ACCESS TO MATERIALS OF JUDICIAL NOMINATION COMMISSION.

Section 434(c)(3) of the District of Columbia Self-Government and Governmental Reorganization Act is amended by striking out the last sentence and inserting in lieu thereof: "Information, records, and other materials furnished to or developed by the Commission in the performance of its duties under this section shall be privileged and confidential. Section 552 of title 5, United States Code, (known as the Freedom of Information Act) shall not apply to any such materials.".

SEC. 11. MEETINGS OF THE JUDICIAL NOMINATION COMMISSION.

Section 434(c)(1) of the District of Columbia Self-Government and Governmental Reorganization Act is amended by inserting at the end thereof "Meetings of the Commission may be closed to the public. Section 742 of this Act shall not apply to meetings of the Commission.".

SEC. 12. PUBLIC ANNOUNCEMENT OF JUDICIAL RECOMMENDATIONS.

Section 434(d) of the District of Columbia Self-Government and Governmental Reorganization Act is amended by inserting at the end thereof the following new paragraph:

"(4) Upon submission to the President, the name of any individual recommended under this subsection shall be made public by the Judicial Nomination Commission.".

SEC. 13. DISCLOSURE OF CERTAIN INFORMATION TO THE JUDICIAL NOMINATION COMMISSION.

Section 11-1528 of title 11, District of Columbia Code, is amended by striking out all of subsection (a) and inserting in lieu thereof the following:

"(a)(1) Subject to paragraph (2), the filing of papers with, and the giving of testimony before, the Commission shall be privileged. Subject to paragraph (2), hearings before the Commission, the record thereof, and materials and papers filed in connection with such hearings shall be confidential.

"(2)(A) The judge whose conduct or health is the subject of any proceedings under this subchapter may disclose or authorize the disclosure of any information under paragraph (1).

"(B) With respect to a prosecution of a witness for perjury or on review of a decision of the Commission, the record of hearings before the Commission and all papers filed in connection with such hearing shall be disclosed to the extent required for such prosecution or review.

"(C) Upon request, the Commission shall disclose, on a privileged and confidential basis, to the District of Columbia Judicial Nomination Commission any information under paragraph (1) concerning any judge being considered by such nomination commission for elevation to the District of Co-

lumbia Court of Appeals or for chief judge of a District of Columbia court.".

SEC. 14. REAPPOINTMENT TO JUDICIAL OFFICE.

Section 433(c) of the District of Columbia Self-Government and Governmental Reorganization Act is amended—

(1) in the first sentence by striking out "three months" and inserting in lieu thereof "six months"; and

(2) in the second sentence, by striking out "thirty" and inserting in lieu thereof "sixty".

SEC. 15. MODIFICATION OF JUDICIAL REAPPOINTMENT EVALUATION CATEGORIES.

Section 433(c) of the District of Columbia Self-Government and Governmental Reorganization Act is amended in the third sentence by striking out "exceptionally well-qualified or".

SEC. 16. SERVICES OF RETIRED JUDGES.

Section 11-1504(a) of title 11, District of Columbia Code, is amended by striking out paragraphs (2) and (3) and inserting after paragraph (1) the following new paragraph:

"(2) At any time prior to or after retirement, a judge may request recommendation from the District of Columbia Commission on Judicial Disabilities and Tenure (hereinafter in this section referred to as the "Commission") to be appointed as a senior judge in accordance with this section.".

SEC. 17. EXTENSION OF PERIOD FOR SUBMITTING JUDICIAL NOMINATIONS.

Section 434(d)(1) of the District of Columbia Self-Government and Governmental Reorganization Act is amended by striking out "thirty days" each place it appears and inserting in lieu thereof "sixty days".

SEC. 18. EFFECTIVE DATE.

This Act shall take effect on the date of the enactment of this Act.

COMMITTEE AMENDMENTS

The SPEAKER pro tempore. The Clerk will report the first committee amendment.

The Clerk read as follows:

Committee amendment: Page 2, strike out line 3 and insert in lieu thereof "Judicial Efficiency and Improvement Act of 1985'."

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent that the committee amendments be considered en bloc, considered as read, and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The remaining committee amendments are as follows:

Committee amendments: Page 7, line 6, strike out "subsection (b)(2)" and insert in lieu thereof "subsection (b)(1)".

Page 7, line 7, strike out "Chief Judge" and insert in lieu thereof "chief judge".

Page 8, line 5, strike out "Section 303" and insert in lieu thereof "Section 301".

Page 8, line 16, insert "(a) IN GENERAL.—" before "Subchapter II".

Page 10, after line 11, insert the following new subsection:

(b) TECHNICAL AMENDMENT.—The table of sections for such subchapter is amended by adding at the end thereof the following new item:

"11-723. Certification of questions of law."

Page 12, line 22, strike out "second" and insert in lieu thereof "third".

Page 13, line 5, strike out "third" and insert in lieu thereof "fourth".

Page 13, line 14, strike out "'Commission'" and insert in lieu thereof "'Commission'".

Page 5, strike out line 4 and all that follows through line 8 on page 5 and insert in lieu thereof the following:

"(D)(1) Subject to paragraph (2), the findings of the hearing commissioner shall constitute a final order of the Superior Court.

"(2) A rehearing or review of the hearing commissioner's findings in a case under subparagraphs (A) and (B) may be made by a judge of the Family Division sua sponte and shall be made upon a motion of one of the parties, which motion shall be filed within ten days after the judgment. An appeal to the District of Columbia Court of Appeals may be made only after a hearing is held in the Superior Court."

Mr. DELLUMS. Mr. Speaker, I simply wish to explain briefly that the committee amendments presented to the body are perfecting amendments, and I ask that they be approved.

The SPEAKER pro tempore. The question is on the committee amendments.

The committee amendments were agreed to.

Mr. DELLUMS. Mr. Speaker, I move to strike the last word.

Mr. Speaker, this bill makes certain changes in the local courts in Washington, DC, suggested by local practitioners, officials, and the courts, and makes permanent authority for hearing commissioners, authority which Congress has granted from year to year in appropriation bills.

Hearings were held before our Subcommittee on the Judiciary and Education chaired by the gentleman from California [Mr. DYMALLY], with the ranking minority member being the distinguished gentleman from Virginia [Mr. BLILEY], each of whom will give a further explanation of the bill at the appropriate time.

With the brief introductory set of remarks, Mr. Speaker, I yield back the balance of my time.

Mr. DYMALLY. Mr. Speaker, I move to strike the last word.

Mr. Speaker, since the 98th Congress, the Subcommittee on Judiciary and Education has focused its attention on improving the administration of Justice in the District of Columbia, and at the same time transferring to the District authority over its agencies, consistent with the legislative intent underlying the District of Columbia Court Reform and Criminal Procedure Act of 1970 and the District of Columbia Self-Government Act and Government Reorganization Act of 1973, as amended.

This legislation emanates from these significant legislative developments. It reflects both self-government considerations and the improvement and efficiency of the local judicial system. The bill itself evolves from recommendations of the District of Columbia Court Study Committee and the District of Columbia courts.

A brief history of its development are in order. In 1978, the District of Columbia Bar Association formed the District of Columbia Court Study Committee. This committee (commonly known as the Horsky Committee) was charged with evaluating the District of Columbia Court Reform and Criminal Procedure Act of 1970 and making appropriate recommendations for improving the judicial system. Over a 4-year period, the court study committee conducted its mission. Certain provisions in this bill represent the committee's work product.

In sum, H.R. 3578 would create permanent authority for District of Columbia hearing commissioners, eliminate duplicate judicial financial reporting, provide authority for the District of Columbia Court of Appeals to answer certain undecided questions of District of Columbia law pending in other courts and amend a panoply of provisions involving judicial nomination, reappointment, and tenure processes.

It would also require the U.S. attorney to publish an annual report regarding its District of Columbia criminal justice activity. Further, it would modify the appointment panel for the Board of Trustees of the Public Defender Service.

These noncontroversial provisions would further improve local judicial nomination and tenure processes and at the same time move the local government one step further toward self-government. Most important, it is estimated that the bill would save the local government over $600,000 a year at no cost to the Federal Government.

Mr. BLILEY. Mr. Speaker, I move to strike the last word.

Mr. Speaker, I rise to support the passage of H.R. 3578. This bill makes a number of minor, but important and needed corrections in the procedures and efficiency of the District of Columbia courts.

Mr. DYMALLY, the chairman of the Judiciary and Education Subcommittee, was diligent in his efforts to craft a piece of valuable legislation that all parties could agree to. I am pleased to be able to lend my support to his efforts and to thank him for his bipartisan spirit.

Mr. Speaker, the minority members of the District of Columbia committee support passage of H.R. 3578.

□ 1235

Mr. DELLUMS. Mr. Speaker, I move the previous question on the bill.

The previous question was ordered.

The bill was ordered to be engrossed and read a third time, and was read the third time, and passed and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent that all members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objecton to the request of the gentleman from California?

There was no objection.

H.R. 2965

(Mr. SMITH of Iowa asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of Iowa. Mr. Speaker, I would like to make the Members of the House aware of an unfortunate set of circumstances in the other body concerning H.R. 2965, the fiscal year 1986 appropriations bill for the Departments of Commerce, Justice and State, the Judiciary and Related Agencies. The House passed this bill July 17, leaving the other body ample time to act and for the two Houses to go to conference and send the bill to the President prior to the beginning of the fiscal year. The bill was reported out of the Senate committee on October 4, 4 days into the new fiscal year. The bill is now bogged down on an extraneous issue that has nothing to do with the provision of funds for law enforcement, drug enforcement, dealing with terrorist activities, and numerous important programs in the Commerce and State Departments and other agencies. I understand that the bill may not come up again in the other body unless this matter can be resolved.

The bill the Senate committee reported not only provides for programs in the House bill, but also other items and projects added that Members of the Senate are interested in. In addition, I also understand that the bill is undergoing a number of floor amendments, as many as 37, that should be resolved in a conference on this bill.

If this bill does not go to conference because of this totally extraneous item, these matters will have to be worked out with all the others in the context of the continuing resolution.

If this bill is conferenced in the continuing resolution, I can assure the Members of the other body that it will be very difficult for the individual projects put into such legislation by amendment or referenced in the Senate-reported bill to receive a favorable consideration that they might otherwise receive if we had an opportunity to go to conference on the individual bill. That is not a threat. It is just a plain fact that Members of the House and Members of the other body, the departments and agencies involved and the American taxpayers are all much better served if this bill is passed separately in conference, instead of being incorporated into a continuing resolution.

GREAT FINISH OF 1985 WORLD SERIES

(Mrs. MEYERS of Kansas asked and was given permission to address the House for 1 minute.)

Mrs. MEYERS of Kansas. Mr. Speaker on behalf of the Kansas City Royals, and the people of the Third District of Kansas, I am here to gloat—respectfully, of course.

The headline in this morning's Kansas City Times says it all—You Gotta Love It!

Now, you are looking at George Brett's Congresswoman. And also I have some other Royal constituents who are now household names. Buddy Biancalana, Bret Saberhagen, Dane Iorg, Danny Jackson, Bud Black, Charlie Liebrandt, Darrell Motley, Jim Sundberg, and Dan Quisenberry.

After losing the first two games at home, and down 3 to 1 in the series, the Royals became the first team in history to bounce back from such a deficit and win the World Series. Obviously, the Kansas City Royals can teach us a thing or two about overcoming deficits.

It's a great day for Kansas City, for the State of Missouri, and for many of us in Kansas and for the entire Nation as the curtain finally comes down on what has been a truly great finish of the 1985 World Series.

FAIR LABOR STANDARDS AMENDMENTS OF 1985

Mr. MURPHY. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3530) to amend the Fair Labor Standards Act of 1938 to authorize the provision of compensatory time in lieu of overtime compensation for employees of States, political subdivisions of States, and interstate governmental agencies, to clarify the application of the act to volunteers, and for other purposes, as amended.

The Clerk read as follows:

H.R. 3530

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE; REFERENCE TO ACT

SECTION 1. (a) SHORT TITLE.—This Act may be cited as the "Fair Labor Standards Amendments of 1985".

(b) REFERENCE TO ACT.—Whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be a reference to a section or other provision of the Fair Labor Standards Act of 1938.

COMPENSATORY TIME

SEC. 2. (a) COMPENSATORY TIME.—Section 7 (29 U.S.C. 207) is amended by adding at the end the following:

"(o)(1) Employees of a public agency which is a State, a political subdivision of a State, or an interstate governmental agency may receive, in accordance with this subsection and in lieu of overtime compensation, compensatory time off at a rate not less than one and one-half hours for each hour of employment for which overtime compensation is required by this section.

"(2) A public agency may provide compensatory time under paragraph (1) only—

"(A) pursuant to—

"(i) applicable provisions of a collective bargaining agreement between the public agency and representatives of such employees; or

"(ii) in the case of employees not covered by subclause (i), an agreement or understanding arrived at between the employer and employee before the performance of the work; and

"(B) if the employee has not accrued compensatory time in excess of the limit applicable to the employee prescribed by paragraph (3).

In the case of employees described in clause (A)(ii) hired prior to April 15, 1986 the regular practice in effect on April 15, 1986, with respect to compensatory time off for such employees in lieu of the receipt of overtime compensation, shall constitute an agreement or understanding under such clause (A)(ii). Except as provided in the previous sentence, the provision of compensatory time off to such employees for hours worked after April 14, 1986, shall be in accordance with this subsection.

"(3)(A) If the work of an employee for which compensatory time may be provided included work in a public safety activity, an emergency response activity, or a seasonal activity, the employee engaged in such work may accrue not more than 480 hours of compensatory time for hours worked after April 15, 1986. If such work was any other work, the employee engaged in such work may accrue not more than 180 hours of compensatory time for hours worked after April 15, 1986. Any such employee who, after April 15, 1986, has accrued 480 or 180 hours, as the case may be, of compensatory time off shall, for additional overtime hours of work, be paid overtime compensation.

"(B) If compensation is paid to an employee for accrued compensatory time off, such compensation shall be paid at the regular rate earned by the employee at the time the employee receives such payment.

"(4) An employee who has accrued compensatory time off authorized to be provided under paragraph (1) shall, upon termination of employment, be paid for the unused compensatory time at a rate not less than the average regular rate received by such employee during the last 3 years of the employee's employment.

"(5) An employee of a public agency which is a State, political subdivision of a State, or an interstate governmental agency—

"(A) who has accrued compensatory time off authorized to be provided under paragraph (1), and

"(B) who has requested the use of such compensatory time, shall be permitted by the employee's employer to use such time within a reasonable period after making the request if the use of the compensatory time does not unduly disrupt the operations of the public agency.

"(6) For purposes of this subsection—

"(A) the term 'overtime compensation' means the compensation required by subsection (a), and

"(B) the terms 'compensatory time' and 'compensatory time off' means hours during which an employee is not working, which are not counted as hours worked during the applicable workweek or other work period for purposes of overtime compensation, and for which the employee is compensated at the employee's regular rate.".

(b) EXISTING COLLECTIVE BARGAINING AGREEMENTS.—A collective bargaining agreement which is in effect on April 15, 1986, and which permits compensatory time off in lieu of overtime compensation shall remain in effect until its expiration date unless otherwise modified, except that compensatory time shall be provided after April 14, 1986, in accordance with section 7(o) of the Fair Labor Standards Act of 1938 (as added by subsection (a)).

(c) LIABILITY AND DEFERRED PAYMENT.—(1) No State, political subdivision of a State, or interstate governmental agency shall be liable under section 16 of the Fair Labor Standards Act of 1938 for a violation of section 7 or 11(c) (as it relates to section 7) of such Act occurring before April 15, 1986, with respect to any employee of the State, political subdivision, or agency who would not have been covered by such Act under the Secretary of Labor's special enforcement policy on January 1, 1985, and published in sections 775.2 and 775.4 of title 29 of the Code of Federal Regulations.

(2) A State, political subdivision of a State, or interstate governmental agency may defer until August 1, 1986, the payment of monetary overtime compensation under section 7 of the Fair Labor Standards Act of 1938 for hours worked after April 14, 1986.

SPECIAL DETAILS, OCCASIONAL OR SPORADIC EMPLOYMENT, AND SUBSTITUTION

SEC. 3. (a) SPECIAL DETAIL WORK FOR FIRE PROTECTION AND LAW ENFORCEMENT EMPLOYEES.—Section 7 (29 U.S.C. 207) is amended by adding after subsection (o) (added by section 2) the following:

"(p)(1) If an individual who is employed by a State, political subdivision of a State, or an interstate governmental agency in fire protection or law enforcement activities (including activities of security personnel in correctional institutions) and who, solely at such individual's option, agrees to be employed on a special detail by a separate or independent employer in fire protection, law enforcement, or related activities, the hours such individual was employed by such separate and independent employer shall be excluded by the public agency employing such individual in the calculation of the hours for which the employee is entitled to overtime compensation under this section if the public agency—

"(A) requires that its employees engaged in fire protection, law enforcement, or security activities be hired by a separate and independent employer to perform the special detail,

"(B) facilitates the employment of such employees by a separate and independent employer, or

"(C) otherwise affects the condition of employment of such employees by a separate and independent employer.".

(b) OCCASIONAL OR SPORADIC EMPLOYMENT.—Section 7(p) (20 U.S.C. 207), as added by subsection (a), is amended by adding at the end the following:

"(2) If an employee of a public agency which is a State, political subdivision of a State, or an interstate governmental agency undertakes, on an occasional or sporadic basis and solely at the employee's option, part-time employment for the public agency which is in a different capacity from any capacity in which the employee is regularly employed with the public agency, the hours such employee was employed in performing the different employment shall be excluded by the public agency in the calculation of the hours for which the employee is entitled to overtime compensation under this section.".

(c) SUBSTITUTION.—(1) Section 7(p) (29 U.S.C. 207), as amended by subsection (b), is amended by adding at the end of following:

"(3) If an individual who—

"(A) is employed by a public agency which is a State, political subdivision of a State, or an interstate governmental agency, and

"(B) is employed in fire protection or law enforcement activities (including activities of security personnel in correctional institutions), agrees, with the approval of the public agency and solely at the option of such individual, to substitute during scheduled work hours for another individual who is employed by such agency in such activities, the hours such employee worked as a substitute shall be excluded by the public agency in the calculation of the hours for which the employee is entitled to overtime compensation under this section.".

(2) Section 11(c) (29 U.S.C. 211(c)) is amended by adding at the end the following: "The employer of an employee who performs substitute work described in section 7(p)(3) may not be required under this subsection to keep a record of the hours of the substitute work.".

VOLUNTEERS

SEC. 4. (a) DEFINITION.—Section 3(e) (29 U.S.C. 203(e)) is amended—

(1) by striking out "paragraphs (2) and (3)" in paragraph (1) and inserting in lieu thereof "paragraphs (2), (3), and (4)", and

(2) by adding at the end the following:

"(4)(A) The term 'employee' does not include any individual who volunteers to perform services for a public agency which is a State, a political subdivision of a State, or an interstate governmental agency, if—

"(i) the individual receives no compensation or is paid expenses, reasonable benefits, or a nominal fee to perform the services for which the individual volunteered; and

"(ii) such services are not the same type of services which the individual is employed to perform for such public agency.

"(B) An employee of a public agency which is a State, political subdivision of a State, or an interstate governmental agency may volunteer to perform services for any other State, political subdivision, or interstate governmental agency, including a State, political subdivision or agency with which the employing State, political subdivision, or agency has a mutual aid agreement.".

(b) REGULATIONS.—Not later than March 15, 1986, the Secretary of Labor shall issue regulations to carry out paragraph (4) of section 3(e) (as amended by subsection (a) of this section).

(c) CURRENT PRACTICE.—If, before April 15, 1986, the practice of a public agency was to treat certain individuals as volunteers, such individuals shall until April 15, 1986, be considered, for purposes of the Fair Labor Standards Act of 1938, as volunteers and not as employees. No public agency which is a State, or political subdivision of a State, or an interstate governmental agency shall be liable for a violation of section 6 occurring before April 15, 1986, with respect to services deemed by that agency to have been performed for it by an individual on a voluntary basis.

STATE AND LOCAL LEGISLATIVE EMPLOYEES

SEC. 5. Clause (ii) of section 3(e)(2)(C) (29 U.S.C. 203(e)(2)(C)) is amended—

(1) by striking out "or" at the end of subclause (III),

(2) by striking out "who" in subclause (IV),

(3) by striking out the period at the end of subclause (IV) and inserting in lieu thereof ", or", and

(4) by adding after subclause (IV) the following:

"(V) is an employee in the legislative branch or legislative body of that State, political subdivision, or agency and is not employed by the legislative library of such State, political subdivision, or agency.".

EFFECTIVE DATE

SEC. 6. The amendment made by this Act shall take effect April 15, 1986. The Secretary of labor shall before such date promulgate such regulations as may be required to implement such amendments.

EFFECT OF AMENDMENTS

SEC. 7. The amendments made by this Act shall not affect whether a public agency which is a State, political subdivision of a State, or an interstate governmental agency is liable under section 16 of the Fair Labor Standards Act of 1938 for a violation of section 6, 7, or 11 of such Act occurring before April 15, 1986, with respect to any employee of such public agency who would have been covered by such Act under the Secretary of Labor's special enforcement policy on January 1, 1985, and published in section 775.3 of title 29 of the Code of Federal Regulations.

DISCRIMINATION

SEC. 8. A public agency which is a State, political subdivision of a State, or an interstate governmental agency and which discriminates or has discriminated against an employee with respect to the employee's wages or other terms or conditions of employment because on or after February 19, 1985, the employee asserted coverage under section 7 of the Fair Labor Standards Act of 1938 shall be held to have violated section 15(a)(3) of such Act.

The SPEAKER pro tempore. Is a second demanded?

Mr. JEFFORDS. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Pennsylvania [Mr. MURPHY] will be recognized for 20 minutes and the gentleman from Vermont [Mr. JEFFORDS] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Pennsylvania [Mr. MURPHY].

Mr. MURPHY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, since the Supreme Court's decision earlier this year in Garcia versus San Antonio Metropolitan Transit Authority, which held that the Congress had the authority in a 1974 act to extend the Fair Labor Standards Act to State and local government employees, there has been a great deal of concern, uncertainty, and confusion on this part of State and local government officials and their

employees as to how this act would affect their ability to provide essential services to the public.

Initial concerns focused mainly on the possible budgetary impact of compliance with the act and the potential loss of flexibility necessary to effectively deal with the various needs of the public. The Committee on Education and Labor, as well as many Members of the House, shared this concern, and our subcommittee sought to establish a clear understanding of the magnitude of the costs involved. We sought to ensure that those State and local officials understood the substance of the act and how much flexibility it allows in administering local government activities.

I would like to thank all of the members of the Committee on Education and Labor, and of the Subcommittee on Labor Standards, which I chair, for their involvement in reaching this compromise.

I want to thank the members of organized labor representing the municipal employees. I would like to thank the representatives of all the local government associations and the State legislative bodies for working and toiling so many hours among themselves, together with Members of Congress, to frame this compromise. I would also like to thank the many Members of this House who took such an active interest in this issue and greatly assisted the committee through the legislative suggestions that they made. This legislation is the result of all of the bills introduced in the wake of the Garcia decision, and I believe is the consensus of what those bills sought to achieve.

The members of the Subcommittee on Labor Standards became convinced that although the costs of compliance were unlikely to be as high as some of the early estimates, some increased costs were sure to occur. More importantly, the unique responsibilities of public agencies required special consideration. The measure before this House reflects that belief, and correctly addresses the concerns of the local officials while also ensuring that their public employees continue to enjoy the basic protections of the act.

In considering this issue, it was essential that the particular needs and circumstances of the States and their political subdivisions be carefully weighed and fairly accommodated. As the Supreme Court stated in Garcia, "the States occupy a special position in our constitutional system." The committee recognized that State and local governments, unlike other employers, have special responsibilities in promoting the public good. In reporting this bill, the committee has sought to discharge that responsibility and to further the principles of cooperative federalism.

This measure will permit State and local governments to continue to use what we refer to as comp-time as payment for overtime hours worked, but provides that comp-time must be awarded at time and one-half, in keeping with the act's requirements for cash overtime. This measure recognizes the joint employment and occasional employment situations which currently exist in many municipalities to the satisfaction of both the public agency and the employees, and permits them to continue within the framework of the act. Also, this measure clarifies the definition of volunteers under the act, and I believe greatly eliminates the concerns of many parties.

In addition, this measure will eliminate the liability which many municipalities have incurred since the Court's decision. The subcommittee recognized that the sudden change in employment requirements placed the municipalities in a difficult economic situation. The phase-in provision is consistent with previous congressional action that has expanded the act's coverage since 1938. Therefore, this measure would eliminate liability for violations of sections 7 and 11 of the act prior to April 15, 1986, next April.

I believe that this measure correctly responds to the concerns of the Members of the House, and the thousands of State and local government officials nationwide and their employees. I urge the Members of this House to support this measure ensuring that the protections of the act can be extended to municipal workers without unduly threatening municipal services.

Mr. JEFFORDS. Mr. Speaker, I yield myself such time as I may consume.

□ 1250

Mr. JEFFORDS. Mr. Speaker, the bill before us is the product of cooperation and compromise; compromise on the part of the public employer and employee interests, and cooperation on the part of many Members who hold strong and sincere beliefs on how, and even whether, we should respond to the Supreme Court's Garcia decision. I hope this spirit of cooperation and compromise continues.

The provisions of this bill bring much needed flexibility to the application of the Fair Labor Standards Act to State and local employees and employers. In my State, as in many others, employers and employees have found many practices, notably the use of compensatory time, to be mutually beneficial. In fact, the Vermont State Employees Association elicited tremendous support for a petition seeking the continued availability of compensatory time in lieu of overtime wages.

At the same time, towns and taxpayers alike have been concerned that the Garcia decision will imposed substantial, unexpected labor costs on them. The provisions of this bill ensure that governments will be able both to gauge their overtime costs and budget for them. Fortunately, the April 1986 effective date of the bill will give Vermont's towns and communities across the State the opportunity to debate and decide these issues during their town meetings in March.

While large cities or States with extensive personnel departments may find it easy to administer the act—and I'm not sure even they will—the towns and cities in my State have had and continue to have difficulty in complying with its provisions. I hope this bill will make that task somewhat easier.

Under the legislation before us, employers and employees would be able to agree to use compensatory time, either in lieu of or in conjunction with the overtime pay now required by the Fair Labor Standards. Act. This agreement could be as formal as a collective bargaining agreement, or as informal as a past, unwritten practice of providing compensatory time. Where no mutual agreement exists, an employer could decide to offer compensatory time and would be required to notify employees prior to their performance of overtime work.

Accrued compensatory time would be limited, largely as a protection for employees. Unlike many current arrangements, compensatory time would not have to be cashed out on an annual or biannual basis, but would be in an ongoing bank. This bank would be subject to caps, of 480 and 180 hours, depending on the type of employee. Unlike H.R. 3530, the bill passed by the other body contains a single 480-hour cap. Overtime in excess of the caps would be permitted, but would have to be paid in cash rather than compensatory time. Within the limits set by the bill, employers and employees would be free to design or maintain their own compensatory time systems.

In this bill we have tried to accommodate the needs of local government, its citizens and its employees. We recognize and sanction voluntarism, which is obviously much more prevalent and vital to the public sector than the private. And we recognize special detail, occasional, and substitute employment—all common practices in the public sector.

At the same time, we have been careful to maintain the employee protections that are a fundamental part of the Fair Labor Standards Act. Compensatory time must be paid at a premium rate. Liability for violations affecting nontraditional employees, who have been covered by the Fair Labor Standards Act since the Supreme Court's National League of Cities against Usery decision, continues. And the status of some workers under that

decision, which is being litigated in our courts, remains unaffected.

The bill prohibits an employer from discriminating against an individual simply because an individual asserted coverage under the Fair Labor Standards Act in the wake of the Garcia decision. For example, if an employee or several employees stepped forward and asked for overtime pay, and their employer responded by demoting, discharging, or otherwise discriminating against them, and not their colleagues, the aggrieved individuals could seek relief. Although initially troubled by the language of section 8, it was with this understanding that the public employer representatives who were party to the negotiations leading to this legislation agreed to support the language. It was not intended, and must not be construed, as some sort of elliptical hold harmless formula for employees' wage rates.

It is my understanding that several public employers have chosen to reduce their employees' wages across the board in response to the Garcia decision. The reasons for such a choice may be several, but clearly one of them is economic. If a city or State is operating with limited resources and is suddenly faced with new, unexpected overtime costs and requirements, it may reasonably come to the conclusion that it must reduce its regular rate of pay so as to maintain the level of its payroll when overtime costs are added into that payroll. Obviously this is a drastic step. It is one that I would hope no employer would have to undertake. However, I do not believe that anything within this bill precludes this response to the Garcia decision. I would be happy to yield to any Member who has a different view.

Mr. Speaker, let me conclude by saying that this legislation represents Congress at just about its best. The basic rationale for overruling the National League of Cities against Usery decision was the fact that the distinction between traditional and nontraditional is unworkable and that limitations on the Congress' commerce power with respect to State and local governments lay not in the 10th amendment but in the workings of the Federal Government, and particularly the Congress. This latter aspect of the decision was not very comforting to those people who take a dim view of Congress. However, in this instance, at least, we may prove the doubters wrong. We have met a real problem with a real solution, and will do so in a timely fashion. We have listened to a broad range of interests, and have adopted the best suggestions of each.

On a personal note, I am very grateful to the dozens and dozens of State and local employees and officials from Vermont who have taken the time to give me their views on this issue. The same, of course, holds for their representatives, particularly the Vermont League of Cities and Towns, the Vermont State Employees Association, the State Officer of Personnel, and the American Federation of State, County and Municipal Employees.

I also want to thank Secretary of Labor Bill Brock who, with his staff, has greatly assisted us. Finally, I want to thank my colleagues. Although this bill differs from the dozen or so bills that were introduced in the House on ths subject, it owes its inception in large part to the efforts of those Members who have been actively working to solve this issue for the past 8 months. My colleagues on the Labor Standards Subcommittee, Mr. PETRI and Mr. BARTLETT, have likewise been vital to this process. Subcommittee Chairman MURPHY has shown solid leadership. And Chairman HAWKINS has shown solid leadership. And Chairman HAWKINS has been typically fair and thoughtful.

Mr. Speaker, I urge my colleagues to give this bill their resounding support.

Mr. MURPHY. Mr. Speaker, I yield 2 minutes to the chairman of the full Committee on Education and Labor, the gentleman from California [Mr. HAWKINS], who was extremely helpful in guiding the first major bill through my subcommittee since I became one of his subcommittee chairmen.

Mr. HAWKINS. I thank the gentleman for yielding this time to me.

Mr. Speaker, today we bring to the House a bill which will remove a potential financial burden from States and localities, yet preserve labor standards protections for the employees of those entities. The bill, H.R. 3530, has the bipartisan support of the members of the Committee on Education and Labor, having been ordered reported by a unanimous voice vote. The legislation amends the Fair Labor Standards Act [FLSA] by modifying the overtime provisions of the act to give public employers, in agreement with their employees, a choice of either granting compensatory time or paying monetary compensation for overtime worked. The bill provides flexibility in other areas such as joint employment and the use of volunteer services. In addition, the bill removes potential retroactive liability for the payment of overtime compensation as required under existing provisions of the FLSA. This is most important to the fiscal concerns of States and localities.

H.R. 3530 is nearly identical to a measure approved in the other body by voice vote on Thursday, October 24. The close similarity of the bills is due to the bipartisan cooperation of Members in both Houses of the Congress. The Members who were involved in the legislative process, particularly those in leadership roles, deserve the thanks and appreciation of all the parties who will be affected by these amendments. I want to congratulate and commend the chairman of our Subcommittee on Labor Standards, Mr. MURPHY, for his leadership in proceeding expeditiously with this legislation. I want to express special appreciation to the ranking subcommittee member, Mr. PETRI, and the ranking member of the full committee, Mr. JEFFORDS, who, throughout consideration of this legislation, have been most helpful and supportive. Also, mention should be made of the assistance Mr. BARTLETT rendered in the negotiations which produced this excellent compromise.

The bill also has been endorsed by the National Association of Counties, the National Conference of State Legislators, the National League of Cities, and the U.S. Conference of Mayors. These associations have said that the bill "maintains the principles of the Fair Labor Standards Act and at the same time recognizes the special circumstances faced by public employers and public employees." The AFL-CIO supports the bill, saying that "it preserves the integrity of the Fair Labor Standards Act which is so vital to the interests of employees while addressing the concerns of public employers."

H.R. 3530 is a direct legislative response to the issues raised in the Supreme Court decision in Garcia versus San Antonio Metropolitan Transit Authority. Had the decision been implemented, State and local governments would have had to make drastic changes in employment policies and practices, as well as the utilization of volunteer services. In addition, many States and localities would have had to assume a retroactive financial liability, because they engaged in an employment practice—generally preferred by employees in certain highly stressful jobs—of granting compensatory time in lieu of monetary compensation for overtime hours worked. This certainly would have been the case in the Los Angeles area where, as my colleagues know, we have a somewhat unique situation of recurring seasonal disasters, such as fires, which take their toll on our emergency response personnel, not to mention the pocketbooks of our taxpayers.

Shortly after the Garcia decision, I received numerous calls and communications from civic leaders in Los Angeles seeking relief from the potential burden of FLSA overtime coverage, and asking for a legislative remedy which would recognize their special problems and customary employment practices.

I am pleased that today I can recommend to the House a measure which accommodates not only the particular circumstances in my home area, but the operations of States and localities throughout the Nation.

The bill accommodates States and localities by allowing the continuation of a widespread practice of granting compensatory time off for overtime hours worked, yet protects the preferences of employees regarding the utilization of the compensatory time. After the effective date of the amendments, employees may receive, in lieu of overtime compensation, compensatory time at the rate of not less than 1.5 hours of compensatory time for each hour of overtime worked. The offering of compensatory time must be governed by a collective bargaining agreement or some other agreement or understanding between the employer and the employees, or the employees' selected representative, before the performance of the overtime work, or with prior notice to the employees. No more than 480 hours of compensatory time may be accrued by employees engaged in public safety, emergency response, or seasonal work. For all other employees, the limit is 180 hours. An employee must be permitted to use requested compensatory time within a reasonable time after making a request unless use of the compensatory time would unduly disrupt the operations of the employer.

The bill also accommodates several customary employment practices which have proved beneficial to both employers and employees, and relieves employers from the overtime penalty that would otherwise be applicable. Among these are special detail work and other occasional or sporadic work by public employees.

Another matter which governmental entities wanted clarified and which the bill accommodates, is the widespread use of volunteers. The bill expands and codifies existing regulations by providing that even if an individual receives reasonable benefits or a nominal fee, or a combination of both, for services performed, the individual will still be considered a volunteer. Also, a public employee may provide volunteer services for a different public employer, or for the employee's own employing agency but in a different job capacity.

Finally, the bill removes a liability that could have been imposed pursuant to the Garcia decision because employers relied on a previous Supreme Court ruling—National League of Cities versus Usery—which exempted them from FLSA coverage. States and localities engaged in traditional governmental functions such as schools, hospitals, fire prevention, police protection, sanitation, public health, parks and recreation, libraries, museums, and so forth, are relieved of overtime liability until April 15, 1986. This gives those entities 5½ months to adjust to the requirements of the FLSA, as modified by this legislation, and to make any necessary management decisions as to future personnel allocations, particularly as they relate to police and fire personnel. Furthermore, actual payment of monetary overtime may be delayed until August 1, 1986, in recognition of the fact that the fiscal years of State and local governments are not uniform. Also, in recognition of pending litigation, the bill does not affect whether employees of State and local governments who are engaged in nontraditional functions, as defined by the Secretary of Labor, are covered prior to April 15, 1986.

Mr. Speaker, overall, this legislation represents a reasonable resolution to some difficult and complex employment problems that were raised by the Garcia decision. It will give States and localities the flexibility they need to operate, and provide public employees with meaningful FLSA protection. It also provides flexibility in other areas such as volunteer services and the ancillary activities and work of public employees. More importantly, it will prevent any undue hardships being placed upon State and local governments. Yet it will maintain wage and hour standards for the employees who perform the necessary, and often life-threatening, services for those jurisdictions. I wholeheartedly recommend this legislation to the House, and urge its unanimous adoption.

Mr. JEFFORDS. Mr. Speaker, I yield 8 minutes to the gentleman from Texas [Mr. BARTLETT].

Mr. ROTH. Mr. Speaker, will the gentleman yield?

Mr. BARTLETT. I yield to the gentleman from Wisconsin.

Mr. ROTH. Mr. Speaker, I want to compliment all the Members who have worked so hard on this particular piece of legislation on both sides of the aisle.

Ever since February 19 when the Supreme Court ruled in Garcia versus San Antonio Metropolitan Transit Authority, we have known action must be taken by Congress. It is our duty to act responsibly and quickly to ensure continued flexibility in State and local employment practices. I strongly support H.R. 3530, which would rectify the current situation.

This legislation is a fair compromise that recognizes the unique role of State and local governments in providing services and the need for flexibility in compensating employees. Congress has the opportunity today to take a meaningful stance, not just a symbolic gesture, to stop the encroachment of Federal regulations where they serve no useful purpose.

Without this legislation, the Department of Labor will shortly start enforcing compliance to the Supreme Court ruling. I have heard from a number of towns and cities throughout my district in Northeast Wisconsin. I strongly sympathize with their plight. As they try to balance their own budgets, the Federal Government, which can't even balance its budget, steps in and orders them to abrogate standing contracts in favor of more costly alternatives.

If I might quote from a recent letter I received from the village president of Black Creek, WI:

> It would greatly increase costs for Wisconsin's already tax-burdened urban communities. In Black Creek alone, population 1,097, this provision could amount to well over a $5,000-a-year increase in costs or a severe cutback in services.

This has become a pressing fiscal issue for subunits of government. State and local entities across the United States, big and small alike, will face an exorbitant increase in costs. Services will have to be cut. Taxpayers will suffer unnecessarily.

I represent a rural district and I am particularly concerned that the "redefinition" of volunteers will make them too costly to use. We would be forced to neglect a vital resource at a time when we need it most.

It comes down to Federal Government interference in a State and local matter. State and local governments long ago came up with a unique method to suit their peculiar needs and to fill the services required of them. We should allow them to continue this role unhindered. This legislation represents a commitment to federalism because it returns to State and local governments responsibilities which are rightfully theirs.

Congress must stand tall on this matter. I commend the members of the Education and Labor Committee for putting this bill on a fast track. I urge my colleagues to follow the bipartisan lead of the committee and support H.R. 3530.

Mr. BARTLETT. I thank the gentleman for his kind words, and perhaps we will start a new trend with this legislation in Congress for the rest of the session.

Mr. Speaker, I rise in strong support of H.R. 3530. Let me begin by commending the extraordinary efforts that have been made in a bipartisan way on this bill by members of the Committee on Education and Labor and, indeed, by a large number of Members of Congress on both sides of the aisle. In particular, the chairman of the Committee on Education and Labor, the gentleman from California [Mr. HAWKINS] has been extraordinary in his fairness and his evenhandedness in his efforts to bring this bill to the floor, and the subcommittee chairman, the gentleman from Pennsylvania [Mr. MURPHY], for whom I have a great deal of respect, who was instrumental in the success of the passage of this legislation, together with the ranking Republican on the Committee on Education and Labor, the gentleman from Vermont [Mr. JEFFORDS], and the ranking Republican on

the subcommittee, the gentleman from Wisconsin [Mr. PETRI].

It has been through that good will we have arrived at a reasonable and equitable solution today that is equitable for all persons involved. There was potential on this issue all along for resulting in a great deal of disruption and a lack of agreement, and there was the potential always that Congress would choose to do nothing, and choosing to do nothing would have been very disruptive to the lives of public employees and taxpayers around this country.

It is to the credit of the gentleman on both sides of the aisle that Congress has chosen to take reasonable steps forward.

I also would take a minute to commend the various people who have been involved in this legislation from around the country and from Texas: The Texas Municipal League, the National League of Cities, various employee groups, both union and nonunion, around this country who have contributed to the action we take today.

It seems to me that today's bill in H.R. 3530 provides for the rights of two groups of people. No. 1, it provides for a restoration of the rights of public employees who have been accustomed to traditional rights as public employees that would have been denied to them by Garcia, and it also is combined with the rights of taxpayers to municipal services and to being able to set their own priorities.

Public employees have had the traditional rights of compensatory time, volunteer time, and trading shifts. I have heard, as every Member has, I think, from public employees from around this country, from police officers and firefighters, who would say, "We very much want to retain that right to be compensated with compensatory time off later in exchange for overtime work that we do today." I heard from State workers in a mental health hospital who have gotten accustomed to and who want to continue to provide volunteer work on the weekends for the benefit of their clients and the patients at that State hospital, and this bill provides for those rights to continue.

We also, I think, are all familiar with the rights of taxpayers. Had this bill not been passed, the taxpayers for State and municipal governments around this country would have been socked with bigger bills, with lowered services, and no one would have won. It is estimated that some $2 to $3 billion in budget adjustments would have been made total around this country. In the city of Dallas, alone, the tab would have been $1.6 million in additional costs, with no additional services; in fact, with reduced services. Some cities were required to institute layoffs and others are considering similar action.

Mr. Speaker, the city of Fort Worth estimated that their cost would be $980,000, and in Garland, TX, $200,000 to $400,000, in Irving, $746,000, in Amarillo, $790,000, and that is after a reduction of personnel hours.

So this bill provides for the rights both of public employees and of taxpayers who pay the tab.

Mr. Speaker, it might be helpful just to detail a few of the major provisions of this bill. First, it provides that compensatory in lieu of overtime wages for State and local employees would be permitted under the FLSA. That would be authorized either by collective bargaining agreement or by any sort of memorandum of understanding, including simply an employee notification at the time of hiring. It is provided at the rate of 1½ hours for each hour worked.

□ 1300

It provides for an effective date which would allow employers time to develop adequate procedures and realistic budgets so the liability would not begin until April 15, 1986.

The bill would specify that a public employer may not discriminate against an employee who has asserted the right to coverage under the Fair Labor Standards Act, but the bill does not address at all those actions taken to comply with Garcia which do not relate to discrimination, and I think that is an important point.

The bill provides for exemptions from overtime provisions under certain precise details for volunteers, whether it is within the same agency or in a different agency so long as the service is not the same as the regular work performed in their regular job.

It provides that law enforcement personnel and firefighters who voluntarily agree to special detail assignments, or who wish to trade shifts would be permitted to do that.

It provides that public employees who voluntarily agree to work in a different capacity from their regular jobs be permitted to do that.

This in so many ways adds to the rights of public employees.

Mr. Speaker, in conclusion, I would relate a story. There was a tragic airline accident in the city of Dallas at DFW Airport this summer right in the middle of the Garcia controversy in Dallas County. There were over 100 fatalities involved. The sheriff of Dallas County tells me he went out to the airline tragedy and found his deputies, who had at that point voluntarily arrived on the scene to help take care of some 34 seriously injured personnel, and to help with that tragedy. And he had the unfortunate job of telling his deputies, face to face, one to one, that they could not continue to help the people that needed help in this airline tragedy.

His deputies looked at the sheriff and said: "Sheriff, if the Garcia decision, whatever that is, if the Federal Government says that as a deputy sheriff, and as a human being, I cannot come to this airport and help people who need my help, then you can take my badge and my resignation right now." As one deputy put it, "People need help, and I am here to help them."

I took that mandate to heart, as I think many Members of Congress did. Public employees are in public service because they want to help people.

Congress, by the enactment of H.R. 3530, will allow that service to continue to happen.

I thank the gentleman for yielding.

Mr. MURPHY. Mr. Speaker, during the days of pressure in September and October when so many Congressmen from around the country were being pressured on this issue, we reached out to many Members of Congress, and the Appropriations Committee and its chairman were so helpful, we reached out to many other Members of Congress to ask us to preserve the jurisdiction of the Education and Labor Committee. This was our problem, we were wrestling with it.

We did come up with a solution, and I want to say that one of the gentlemen we reached out to, and he assisted us in his efforts with other members of the committee so that our committee could complete its work, was the gentleman from Oklahoma [Mr. JONES].

Mr. Speaker, I yield 3 minutes to the gentleman from Oklahoma [Mr. JONES].

Mr. JONES of Oklahoma. Mr. Speaker, action today on H.R. 3530 marks an historic achievement by State and local governments, labor organizations, other non-Federal public agencies, and Congress.

The very fact that we have a bill before us today defies the wisdom of pundits who just a month ago saw insurmountable rifts between public agencies and their employees, between ideologues on the two extremes of the political spectrum, between the rights of the American taxpayer and the rights of the public employee.

Through the determined leadership of employee organizations and the State and local government associations, and through the laudable flexibility exhibited by Labor Secretary Bill Brock, who worked very closely with the States to reach today's result, the apparently insurmountable obstacles were overcome.

Finally, I want to thank the chairman of the subcommittee, the gentleman from Pennsylvania [Mr. MURPHY] for all the assistance he afforded me

after I drafted the Oklahoma delegation's Garcia bill.

We introduced the bill on October 2, and within a week the chairman's staff had worked with the principal participants to come up with this approach. Because of his leadership, the anticipated congressional fight was resolved through patient negotiation. This is particularly important to my State of Oklahoma. Our State's economy is depressed and that has had a depressing effect on commerce all over Oklahoma. The Garcia decision would have been devastating to local government in Oklahoma.

Passage of this legislation provides security for State and local governments and American taxpayers, and fairness for their employees. I urge its adoption.

Mr. JEFFORDS. Mr. Speaker, I yield 2 minutes to the gentlewoman from Nebraska [Mrs. SMITH].

Mrs. SMITH of Nebraska. Mr. Speaker, I am glad that this body has so quickly and effectively addressed the problems caused by the Supreme Court's February 19 Garcia decision by bringing forth H.R. 3530, the Fair Labor Standards Amendments of 1985.

The Court's ruling, which rendered compensatory time off for State and local public employees nearly useless, has been nothing but a disaster in my home State of Nebraska.

Workers have been layed off, county and city budgets have been strained, and my constitutents have been staring at the prospects of higher local taxes or reduced public services.

I introduced legislation, H.R. 3237, to mitigate these harmful effects of Garcia, and many of my colleagues helped to force action in this Chamber by cosponsoring H.R. 3237.

The bill before us now reflects a good, workable, compromise solution to this problem. H.R. 3530 would give employers the option of granting employees time-and-a-half overtime pay or compensatory time off at this same rate. Seasonal, emergency, and public safety employees could bank up to 480 hours of "comp time" before cash overtime pay would be required, all other employees could bank up to 180 hours.

I don't like H.R. 3530 quite as much as a bill passed by the other Chamber last week which lets all workers bank up to 480 hours of "comp time," but all in all H.R. 3530 is a good bill and I urge its support.

Mr. MURPHY. Mr. Speaker, at this time I submit for the RECORD two letters in support of this compromise, one from the American Federation of Labor, which speaks for the labor delegates who met with the municipal bodies, and the other addressed from the various representatives of the League of Cities National Legislative Association.

OCTOBER 17, 1985.

Mr. AUSTIN J. MURPHY,
Chairman, Subcommittee on Labor Standards, Rayburn House Office Building, Washington, DC.

DEAR MR. MURPHY: The National Association of Counties, National Conference of State Legislators, National League of Cities and U.S. Conference of Mayors commend you for the leadership you have shown in resolving the difficulties faced by state and local governments across the nation as a result of the Supreme Court's decision in the Garcia v. the San Antonio Mass Transit Authority case.

The legislation you have introduced, H.R. 3530 provides a solution to the problems created by Garcia which is balanced and equitable for all parties. It maintains the principles of the Fair Labor Standards Act and at the same time recognizes the special circumstances faced by public employers and public employees.

Be assured that you have the strong support of all of our organizations for your bill and that we will provide whatever assistance is needed to achieve its passage in its current form.

Sincerely,

John J. Gunther, executive director, U.S. Conference of Mayors; Matt Coffey, executive director, National Association of Counties; Alan Beals, executive director, National League of Cities; Earl Mackey, executive director, National Conference of State Legislators.

AMERICAN FEDERATION OF LABOR AND CONGRESS OF INDUSTRIAL ORGANIZATIONS,
Washington, DC, October 18, 1985.

DEAR REPRESENTATIVE: On behalf of the AFL-CIO, I urge your support for H.R. 3530, the Fair Labor Standards Amendments of 1985. The bill has received the bipartisan and unanimous support of the Labor Standards Subcommittee of the Committee on Education and Labor, and it is scheduled for markup in the full Committee next Wednesday, October 23. It is our hope that this legislation will now obtain the approval of the full committee, without substantive change. Floor action is anticipated before the end of the month.

In the AFL-CIO's judgment, H.R. 3530 reflects a carefully balanced approach that resolves the questions raised by the U.S. Supreme Court's decision in Garcia v. San Antonio Metropolitan Transit Authority. The bill preserves the integrity of the Fair Labor Standards Act which is so vital to the interests of employees while addressing the concerns of public employers.

The AFL-CIO, therefore, encourages you to cosponsor the bill and to suppport passage of the bill in its present form.

Sincerely,

RAY DENISON,
Director, Department of Legislation.

Mr. Speaker, with regard to the concern stated by the ranking member of the Education and Labor Committee to section 8, I agree that it does pose some bit of a problem. However, we felt that that section was rather necessary in that since the Garcia decision, until now, that we are relieving the municipalities of total responsibility for liability, financial responsibility up until next April, and we felt that if any employee happened to mention to his supervisor or someone else in the course of his daily employment inquiring about his rights, that no retaliatory action should be taken. And we think now with the delay in the effective date there would be plenty of time for municipalities to fully adjust.

I also in closing would like to mention that we appreciate the real efforts on behalf of the gentleman from Vermont [Mr. JEFFORDS], the gentleman from Wisconsin [Mr. PETRI], and the gentleman from Texas [Mr. BARTLETT], and the constant attention they showed to this problem over the past 3 months. And I thank Secretary Brock for meeting with us. The Members will recall that he relieved us of the pressure of the Department of Labor in forcing the particular aspects of the Garcia case until November 1 of this year.

I might say that today we officially asked the Secretary to give us a few more days. We may not be able to get the President to sign this bill by November 1, and if Secretary Brock will grant us another week or so, I am sure that we can send down to his Department a measure that he has certainly been helpful in passing.

With that, Mr. Speaker, I yield back the balance of my time.

Mr. JEFFORDS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, first I would agree with the statements made by the gentleman from Pennsylvania. But I would like to amplify to ensure that we understand each other with respect not to individuals, but as to a general application.

Mr. Speaker, as I mentioned in my statement, some jurisdictions have responded to the Garcia decision by reducing wage rates across the board. I inquired of the Solicitor of Labor as to whether this would constitute discrimination under section 8 of the bill before us.

The Solicitor responded, in pertinent part, and I will include the whole letter in the RECORD:

At some time after the effective date of the amendments effected by H.R. 3530, the employer decides to reduce its total cost of compensation for labor to an amount approximately equal to the amount which would have been expended had the employer never commenced making cash overtime payments. Under the circumstances of this employer's wage structure, it could achieve this objective by reducing the base wage rate of employees, while continuing to comply with the provisions of section 6 (relating to the minimum wage) and the provision of section 7 as that section existed prior to the currently contemplated amendments. The contemplated rate reduction would be made systematically in the wages of all employees, and would constitute a reduction for all purposes of the wage rate previously in effect. You question whether such a reduction would, under the provisions of section 8, be held to constitute a violation of section 15(a)(3) of the act.

Based on the facts set forth above, and in the absence of other significant facts, it is my opinion that the wage reduction described would not, in and of itself, involve the application of Section 8, and would thus not be held to constitute a violation of Section 15(a)(3) of the Act.

U.S. DEPARTMENT OF LABOR,
SOLICITOR OF LABOR,
Washington, DC, October 28, 1985.

Hon. JAMES M. JEFFORDS,
U.S. House of Representatives, Washington, DC.

DEAR CONGRESSMAN JEFFORDS: I am writing in reply to your request for an opinion concerning the possible application of Section 8 of H.R. 3530, by which it is proposed to amend the Fair Labor Standards Act, to a particular factual situation more fully described below.

Section 8, relating to discrimination, provides:

"A public agency which is a State, political subdivision of a State, or an interstate governmental agency and which discriminates or has discriminated against an employee with respect to the employee's wages or other terms or conditions of employment because on or after February 19, 1985, the employee asserted coverage under section 7 of the Fair Labor Standards Act of 1938 shall be held to have violated section 15(a)(3) of such Act."

As I understand the situation which is of concern to you in this connection, the question arises with respect to a public employer to which, prior to February 19, 1985, the provisions of the Fair Labor Standards Act were inapplicable by virtue of the doctrine of *National League of Cities*, and which has, during some portion or all of the period since February 19, 1985, been paying overtime compensation, in cash, to employees, in compliance with the requirements of Section 7 of the Fair Labor Standards Act of 1938. The employer has done so without being bound by the terms of a collective bargaining agreement to do so, and without other legal compulsion beyond the requirements of the Act. At some time after the effective date of the amendments effected by H.R. 3530, the employer decides to reduce its total cost of compensation for labor to an amount approximately equal to the amount which would have been expended had the employer never commenced making cash overtime payments. Under the circumstances of this employer's wage structure, it could achieve this objective by reducing the base wage rate of employees, while continuing to comply with the provisions of Section 6 (relating to the minimum wage) and the provisions of Section 7 as that section existed prior to the currently contemplated amendments. The contemplated rate reduction would be made systematically in the wages of all employees, and would constitute a reduction for all purposes of the wage rate previously in effect. You question whether such a reduction would, under the provisions of Section 8, be held to constitute a violation of Section 15(a)(3) of the Act.

Based on the facts set forth above, and in the absence of other significant facts, it is my opinion that the wage reduction described would not, in and of itself, involve the application of Section 8, and would thus not be held to constitute a violation of Section 15(a)(3) of the Act.

I trust this is responsive to your inquiry. If I can be of further assistance, please feel free to call upon me.

Sincerely,

FRANCIS X. LILLY.

Again, I want to commend all of the people involved with this for bringing forth a speedy and equitable reconciliation of these very difficult problems.

Mr. DAUB. Mr. Speaker, I rise in support of H.R. 3530, a bill that will ease the effects of the Supreme Court's decision in Garcia versus San Antonio Metropolitan Transit Authority that requires State and local governments to comply with the overtime provisions of the Fair Labor Standards Act. I am a cosponsor of this important legislation and, in fact, introduced a similar measure on September 4, 1985.

The National League of Cities and the International Cities Managers Association have estimated that compliance with Garcia would cost $1 billion for the coming year. For fire protection service alone, the city of Omaha, NE, predicts the additional cost of overtime would be $370,000 for the coming year.

Without this legislation, flexible and innovative employment practices—many of which are negotiated between local governments and municipal workers' unions—will no longer be possible. Additionally, H.R. 3530 will resolve the problems that the Garcia decision created for individuals who volunteer their time to State and local governments.

I urge expedited action on H.R. 3530 and companion legislation in the other body (S. 1570) to resolve confusion that the Supreme Court's decision has created for State and local governments.

Mr. FRENZEL. Mr. Speaker, H.R. 3530 is a bill which must be promptly passed to negate some of the worst effects of the Garcia case.

The bill is not the best solution. The committee could have done a better job by adopting any one of several proposals to reverse the Garcia decision. H.R. 3530 gives only partial refief.

Nevertheless, the Garcia problem is so severe for our local governments that we must pass this partial solution. H.R. 3530 is the only relief the committee will give us. We have no choice but to accept it.

Perhaps the Senate will do better. I hope so. Our local governments deserve the maximum flexibility so that they can give maximum service for a minimum tax cost.

For now, we must pass H.R. 3530.

Mr. FUQUA. Mr. Speaker, I rise in support of H.R. 3530, the Fair Labor Standards Amendments, of which I am a cosponsor. This measure is of critical importance to the communities in the Second Congressional District of Florida, which I am privileged to represent.

The Garcia ruling may place a burden on New York and Los Angeles. For the cities and towns in my district, it is catastrophic in its implications. These communities simply cannot afford to pay time-and-a-half for overtime work, particularly for the police and fire personnel. It could lead to serious financial burdens and inadequate protection for the people.

H.R. 3530 gives communities a choice of either cash or compensatory time off. This is fair and equitable to all. Police officers and firefighters deserve recognition for the extra hours their particular jobs require. They should receive some form of compensation. It will now be up to each community to decide whether or not they can afford a cash outlay or permit these people additional time off.

I believe H.R. 3530 is good legislation and I commend the Education and Labor Committee for bringing the bill to the House floor in a timely manner. This legislation deserves our support and our vote today to end the confusion and disarray caused by Garcia. I urge my colleagues to join me in support of H.R. 3530.

Mr. MARTINEZ. Mr. Speaker, I rise in strong support of H.R. 3530, the Fair Labor Standards Amendments of 1985.

I would like to offer a perspective I am sure is shared by those of us who have served our communities on a local level, regarding the Garcia decision. Local governments have always been limited in their abilities to provide services to their communities. They are dependent upon both their tax base and their share of funds that come from State and local taxes, and these moneys collected directly determine the level of services provided to their communities. Local governments have to be very frugal in both their outlays for salaries and administrative costs and in the services they provide such as police and fire protection, street and sewer maintenance, recreation and parks, library services, and the many other services that make a community liveable. Often forgotten is the difference between companies engaged in private enterprise and local governments. Businesses can always add on the extra administrative costs incurred into the price of product and still maintain a profit margin, but cities don't have this luxury. They are always limited by the revenues collected, and are hard pressed to maintain adequate levels of service to their community in the best of times. When extra expenses are added on to their budgets, services are often cut, and, in the end, the community which the local government serves loses.

This necessity for local governments to be good money managers has restricted the amount of overtime that cities could pay its workers. Most employee groups, to their credit, have recognized the special circumstances which local governments face, and have agreed to take comp time in lieu of pay for extra hours worked in order to keep community services at an adequate level. In fact, many employees such as police and firefighters in my home State of California have actually come to prefer having comp time instead of overtime pay for those extra hours worked. To them, the extra time to spend on projects that benefit themselves, their homes, their future and their families, are more important than the cash they could earn.

These employee groups and local governments have negotiated comp time provisions into their contracts to the benefit of the employee, the local government, and ultimately, the community in general. These agreements for comp time have worked

well, and I am pleased to see that H.R. 3530 will allow this practice to continue.

Another related aspect which I am pleased to see included in H.R. 3530 is the allowed deferment until August 1, 1986 for local governments to pay employees for the overtime pay earned as a result of the Garcia decision after April 15, 1986. Again, local governments are limited in the amounts of revenue it can raise, and the overtime pay owed after April 15, the effective date of H.R. 3530, would saddle local governments with an extra burden in the middle of fiscal year. This delay will allow local governments to adequately figure in the extra costs of the Garcia decision into its 1987 budgets without unfairly having the extra cost placed on its 1986 budgets which have already been allocated and have little flexibility for new costs. This delay until August 1 will not allow local governments to back away from their obligations to employees, but rather ensure the local governments will continue to maintain those necessary city services, budgeted on July 1, 1985, throughout the 1986 fiscal year. Local governments make a commitment every year on July 1 to provide services at certain levels for 12 months, and I am glad to see, with this deferment, that local governments will be able to honor this commitment without an extra burden in the middle of the year.

In conclusion, I am pleased that the compromise between local governments and organized labor has been worked out, and I urge my colleagues to vote for H.R. 3530.

Mr. GILMAN. Mr. Speaker, I rise in strong support of H.R. 3530, legislation that would change overtime benefits for State and local government employees. I commend the gentleman from Pennsylvania [Mr. MURPHY], for introducing this bill which will provide an equitable and reasonable solution to the problem of how best to comply with the recent Supreme Court decision, Garcia versus San Antonio Metropolitan Transit Authority (February 1985).

In the Garcia case, the Supreme Court ruled that overtime pay requirements of the Fair Labor Standards Act apply to State and local employees. Interpretations of previous decisions affirming State authority over functions not specifically reserved for Congress had exempted State and local public employers from the act's purview. State and local government officials estimate the compliance cost of the Garcia decision at over $1 billion.

H.R. 3530 would ease the impact of the Court ruling by deferring public employer liability for overtime and related paperwork violations of the Fair Labor Standards Act until April 15, 1986, for those public employees affected by the Garcia decision, and by permitting employees to substitute compensatory time for overtime payment at a rate of 1½ hours per hour worked. Certain limits shall be placed on accrued compensatory hours, with cash compensation for overtime after those limits are reached.

This bill is the result of negotiations conducted in September between labor unions representing public employees, and public employer organizations, including the U.S. Conference of Mayors, the National League of Cities, and the National Association of Counties. The Congressional Budget Office estimates that no costs would be associated with enactment of H.R. 3530. This bill enjoys wide bipartisan support, as well as the support of the administration. Indeed, the Labor Department had intended to start implementing the decision on October 15, but Labor Secretary William E. Brock III has postponed the enforcement date to November 1 to give us in Congress time to enact legislation which will comply with the Garcia decision.

I am confident that this bill will be mutually beneficial to the employees and employers affected, for it allows workers the freedom to receive deserved compensation in the manner they prefer while reducing the compliance cost of the Supreme Court ruling for public employers. Many of the hard-working people employed by our State and local governments value their private time more than the overtime pay they could earn. For example, I was recently contacted by a policewoman in my district who urged me to support H.R. 3530. She told me that she would much rather give back to her twin babies the time she spent away from them than to receive any extra pay. I believe that the countless other public workers who feel as this employee does should have the option of taking compensatory time, in lieu of overtime pay. Accordingly, I urge my colleagues to join me in supporting H.R. 3530, to allow public employees to substitute compensatory time for overtime pay and to defer public employer liability for overtime until April 15, 1986.

Mr. BONKER. Mr. Speaker, last February's Supreme Court decision in Garcia against San Antonio, while addressing a serious labor concern, created a potentially devastating financial situation for State and local governments around the country. The decision that employees of State and local governments were not only entitled to overtime wages, but were entitled to these wages effective the date of the court's decision, February 16, 1985, would have created a situation of serious economic distress for municipalities nationwide.

Congress has acted swiftly to develop a compromise solution to this problem that balances the economic concerns of the governments with the need for fairness and adequate compensation for our public employees. Congressman MURPHY's bill, H.R. 3530, which I strongly support, provides State and local governments with an alternative to strict cash compensation for overtime work. Up to a certain point, they may offer compensatory time at the rate of time-and-a-half for overtime hours worked. This will become effective April 15, 1986, to allow local government units to make necessary adjustments.

I believe all sides can be pleased by this compromise solution, which provides local public employees with the financial flexibility necessary to adequately provide the services unique to local governments. It also responds to the compensation needs of public employees like police and firemen whose jobs require demanding, unpredictable hours.

It is not often in Congress that we are able to reach a compromise that truly represents a good solution for all sides. This is one of those rare instances, and I commend all the members of the committee, affected labor groups, and local government units who worked so hard to make this compromise a reality.

Finally, I would like to commend the Department of Labor their willingness to postpone enforcement of the Supreme Court Garcia decision until Congress had an opportunity to develop a solution, and I urge the President to sign this legislation into law without delay.

Mr. ECKART of Ohio. Mr. Speaker, I support H.R. 3530, the Fair Labor Standards Amendments of 1985, and commend my colleagues on the Education and Labor Committee for their excellent work on this matter.

Following the Supreme Court's February decision in the Garcia versus Samta case, I received many calls and letters from municipal governments throughout the State of Ohio that this ruling would have an extremely adverse impact on their budgets. The Court's decision overruled its 1976 opinion that congressional inclusion of State and local employees under the requirements of the Fair Labor Standards Act was unconstitutional. In its February decision in Garcia, the Court found that the 1974 FSLA amendments passed by the Congress were indeed not unconstitutional and ruled that all State and local governments must pay their workers overtime for the extra hours of overtime they worked.

The Department of Labor, shortly following this decision, announced that it would begin enforcing the Court's decision by October 15th of this year and would determine these governments liable for overtime pay as far back as April 15th of this year. Given that the Court's decision was only handed down in February, this action by the administration was unduly harsh. Even in 1974, when Congress first brought State and local employees under the FSLA, it granted the governments 2½ years to come under compliance with the new law. This swift action by the Reagan administration, following the Garcia decision, only served to increase alarm among the municipal governments that their budgets would be severely damaged by this ruling.

But, thanks to the members of the Education and Labor Committee, who worked closely with our colleagues across the Hill, this impending crisis has been averted. H.R. 3530 properly addresses the concerns of these State and local governments while ensuring that their employees are properly compensated for the extra hours they put into their work. In addition, the legislation gives these governments sufficient time to reallocate their resources to comply with this new requirement.

I urge my colleagues to swiftly approve this legislation, which both protects the rights of our State and local workers while

addressing the concern of these governments.

Mr. AUCOIN. Mr. Speaker, I rise in strong support of H.R. 3530, amending the Fair Labor Standards Act. I want to commend the members and staff of the House Labor Standards Subcommittee, and in particular my friends Congressman MURPHY, the subcommittee chairman, Congressman HAWKINS, chairman of the Education and Labor Committee, and Congressmen BARTLETT and JEFFORDS for their hard work and their willingness to listen to all sides in this complex issue.

I believe Congress has tackled a complex and controversial issue and come up with a workable compromise. That doesn't seem to happen often enough in Washington.

Mr. Speaker, last spring when the Supreme Court made its now famous Garcia ruling, the local government employees must be covered by the Fair Labor Standards Act, it was hailed by those who felt local government employees deserved the same rights and protections that both Federal workers and those in the private sector enjoy. However, local governments began assessing the costs of these new statutes, which denied the use of compensatory time for payment of overtime hours worked, and realized that they would either have to cut services or raise taxes in order to meet these new labor costs for which no money had been budgeted.

In Oregon this decision was met with almost universal opposition. Although most Oregonians agreed that local government employees throughout the country deserved the protections of the Fair Labor Standards Act, these protections were redundant and unnecessary in Oregon, which has very strict State labor laws. Local government employees in Oregon felt that this decision denied them the benefits which they had agreed to in collective bargaining negotiations, including the right to be "paid" in comp-time, rather than in cash, for overtime hours worked. This is an arrangement which can be very beneficial to some employees, and they wanted to continue to have this option available. Local governments agreed that because the pay and overtime contracts with employees had been agreed to under collective bargaining arrangements, there was no need for the Federal Government to intercede in these mutually agree upon contracts.

With the tremendous Federal deficit now crippling our economy, the Federal Government is being forced to cut back on programs that assist State and local governments. This is hard enough on local governments without the added expense which the Garcia decision created. It is no wonder that many of the cities and counties in my congressional district felt frustration over this situation. I heard from the mayors of Tigard, Newberg, Astoria, North Plains, Portland, Sherwood, Columbia City, and Hillsboro. I also heard from county commissioners in Yamhill, Clatsop, and Tillamook Counties. The Garcia decision also offended fire fighters, both paid and volunteers. I was informed of the adverse effects of this decision on fire departments by the Tualatin Rural Fire Protection District and the Washington County Fire District No. 1.

The Garcia decision denied workers in Oregon some of their collective bargaining rights, and substantially increased the cost to local governments.

Although this legislation before us does not rescind the Garcia decision, it does address the major concerns raised by these local government officials and their employees. The issue of "comp time" has been resolved, as has the controversial aspect of retroactive liability. The confusion over what constitutes a "volunteer" has also been cleared up. These were the major stumbling blocks which Chairmen MURPHY and HAWKINS had to contend with, and 6 months ago it looked as though a consensus would never be reached. However, it is a tribute to their hard work, and to the hard work of the representatives of both the local governments and the employee unions that we have before us a bill which both sides have unanimously endorsed. Although neither side is completely satisfied with this legislation, the fact that it is endorsed by the National League of Cities, the National Association of Counties, and the American Federation of State, County, and Municipal Employees of the AFL–CIO shows that it is a genuine compromise in the truest sense of the word.

It is now up to the Department of Labor to assist the local governments with the technical questions which will invariably arise once this legislation becomes law. It is essential that we avoid the confusion, delay, and uncertainty which arose over the Supreme Court's original decision last February. With the implementation of this legislation on April 15, 1986, the Department of Labor has a responsibility to see that local governments have all the necessary information available to them in order to carry out these new statutes. I know the local offices of Federal Wage and Hour are willing to assist local governments with their questions regarding the Fair Labor Standards Act, and am pleased that the Department of Labor has initiated a toll-free number to assist in this process. That number is 1–800–233–3572.

Mr. DASCHLE. Mr. Speaker, I rise today in strong support of H.R. 3530, legislation which would amend the Fair Labor Standards Act and applaud my colleagues on the committee for offering this compromise solution addressing the problems of the Supreme Court decision in the recent Garcia case.

The House of Representatives took an early initiative by approving an amendment on the 1986 Labor Department appropriations bill calling on the Department to suspend enforcement of the Garcia decision pending further congressional action. The Labor Department followed suit by voluntarily agreeing to delay implementation of these standards until we had the opportunity to consider a comprehensive legislative solution. The legislation before us today represents that solution.

H.R. 3530, of which I am pleased to cosponsor, allows for either monetary compensation or compensatory time off for public employees working overtime. It also gives State and local governments until April 15, 1986, to revise personnel practices and exempts volunteers from coverage.

Let me emphasize that this represents a major compromise effort. The bill is the culmination of the efforts of local governmental associations and representatives of public employee unions, among them the National League of Cities, the National Association of Governmental Employees, National Governors' Association, AFSCME, and the Amalgamated Transit Workers, and their willingness to reach an acceptable solution. Because all parties were able to resolve this issue through compromise, it clearly demonstrates the willingness of all sides to avoid what could have resulted in an unnecessary stalemate.

I would ask that a summary of the bill be printed in the RECORD.

I. COMPENSATORY TIME

Public safety, emergency service or seasonal workers may not accumulate more than 480 hours of compensatory time, while other state and local workers may not accumulate more than 180 hours. After these hours have been reached, employees must be paid overtime pay equivalent at least to time-and-a-half. Also, the bill provides for employees to be paid for accrued compensatory time at the time of termination, based on average pay over the past three year time period.

II. SPECIAL DETAIL, OCCASIONAL WORK AND SUBSTITUTION

Special detail, occasional and mutual aid employment for a second employer or in a second capacity will not be considered in calculating overtime pay.

In addition, public employees may substitute for one another without the substitution affecting overtime pay.

III. VOLUNTEER WORK

The bill exempts volunteers from coverage of the Fair Labor Standards Act. Also, it exempts public agencies from violations of minimum wage laws for services performed by volunteers before April 15, 1986.

IV. LEGISLATIVE EMPLOYEES EXEMPTIONS

State and local legislative employees, except library employees, are exempt from coverage.

OTHER PROVISIONS

The bill allows public employers to defer monetary overtime compensation for hours worked after April 15, 1986, until August 1, 1986.

It also bars discrimination against any employees who may have asserted coverage under the FLSA overtime provisions.

I would urge this body to approve this vitally important legislation and end the uncertainty which has resulted from the Garcia decision.

Mr. JEFFORDS. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Pennsylvania [Mr. Murphy] that the House suspend the rules and pass the bill, H.R. 3530, as amended.

The question was taken; and (two-thirds having voted in favor thereof)

the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

Mr. MURPHY. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 1570) to amend the Fair Labor Standards Act of 1938 to provide rules for overtime compensatory time off for certain public agency employees, to clarify the application of that act to volunteers and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1570

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE; REFERENCE TO ACT

SECTION 1. (a) SHORT TITLE.—This Act may be cited as the "Fair Labor Standards Amendments of 1985".

(b) REFERENCE TO ACT.—Whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be a reference to a section or other provision of the Fair Labor Standards Act of 1938.

COMPENSATORY TIME

SEC. 2. (a) COMPENSATORY TIME.—Section 7 (29 U.S.C. 207) is amended by adding at the end the following:

"(o)(1) Employees of a public agency which is a State, a political subdivision of a State, or an interstate governmental agency may receive, in accordance with this subsection and in lieu of overtime compensation, compensatory time off at a rate not less than one and one-half hours for each hour of employment for which overtime compensation is required by this section.

"(2) A public agency may provide compensatory time under paragraph (1) only—

"(A) pursuant to—

"(i) applicable provisions of a collective bargaining agreement, memorandum of understanding, or any other agreement between the public agency and representative of such employees; or

"(ii) in the case of employees not covered by subclause (i), an agreement or understanding arrived at between the employer and employee before the performance of the work; and

"(B) if the employee has not accrued compensatory time in excess of the limit applicable to the employee prescribed by paragraph (3).

In the case of employees described in clause (A)(ii) hired prior to April 15, 1986, the regular practice in effect on April 15, 1986, with respect to compensatory time off for such employees in lieu of the receipt of overtime compensation, shall constitute an agreement or understanding under such clause (A)(ii). Except as provided in the previous sentence, the provision of compensatory time off to such employees for hours worked after April 14, 1986, shall be in accordance with this subsection.

"(3)(A) No overtime compensation in the form of compensatory time off may be accrued by any employee of a public agency which is a State, a political subdivision of a State, or an interstate governmental agency, in excess of 480 hours for hours worked after April 15, 1986. Any such employee who, after April 15, 1986, has accrued 480 hours of compensatory time off shall, for additional overtime hours of work, be paid overtime compensation.

"(B) If compensation is paid to an employee for accrued compensatory time off, such compensation shall be paid at the regular rate of compensation earned by the employee at the time the employee receives such payment.

"(4) An employee who has accrued compensatory time off authorized to be provided under paragraph (1) shall, upon termination of employment, be paid for the unused compensatory time at the regular rate of compensation earned by the employee at the time the employee receives compensation for overtime.

"(5) An employee of a public agency which is a State, political subdivision of a State, or an interstate governmental agency—

"(A) who has accrued compensatory time off authorized to be provided under paragraph (1), and

"(B) who has requested the use of such compensatory time,

shall be permitted by the employee's employer to use such time within a reasonable period after making the request if the use of the compensatory time does not unduly disrupt the operations of the public agency.

"(6) For purposes of this subsection—

"(A) the term 'overtime compensation' means the compensation required by subsection (a), and

"(B) the term 'compensatory time' or 'compensatory time off' means hours during which an employee is not working and which are not counted as hours worked during the applicable workweek or other work period for purposes of overtime compensation, and for which the employee is compensated at the employee's regular rate.".

(b) EXISTING COLLECTIVE BARGAINING AGREEMENTS.—A collective bargaining agreement which is in effect on April 15, 1986, and which permits compensatory time off in lieu of overtime compensation shall remain in effect until its expiration date unless otherwise modified, except that compensatory time shall be provided after April 14, 1986, in accordance with section 7(o) of the Fair Labor Standards Act of 1938 (as added by subsection (a)).

(c) LIABILITY AND DEFERRED PAYMENT.—(1) No State, political subdivision of a State, or interstate governmental agency shall be liable under section 16 of the Fair Labor Standards Act of 1938 for a violation of section 7 or 11(c) (as it relates to section 7) of such Act occurring before April 15, 1986, with respect to any employee of the State, political subdivision, or agency who would not have been covered by such Act under the Secretary of Labor's special enforcement policy on January 1, 1985, and published in sections 775.2 and 775.4 of title 29 of the Code of Federal Regulations.

(2) A State, political subdivision of State, or interstate governmental agency may defer unti August 1, 1986, the payment of overtime compensation under section 7 of the Fair Labor Standards Act of 1938 for hours worked after April 14, 1986.

SPECIAL DETAILS, OCCASIONAL OR SPORADIC EMPLOYMENT, AND SUBSTITUTION

SEC. 3. (a) SPECIAL DETAIL WORK FOR FIRE PROTECTION AND LAW ENFORCEMENT EMPLOYEES.—Section 7 (29 U.S.C. 207) is amended by adding after subsection (o) (added by section 2) the following:

"(p)(1) If an individual who is employed by a State, political subdivision of a State, or an interstate governmental agency in fire protection or law enforcement activities (including activities of security personnel in correctional institutions) and who, solely at such individual's option, agrees to be employed on a special detail by a separate or independent employer in fire protection, law enforcement, or related activities, the hours such individual was employed by such separate and independent employer may be excluded by the public agency employing such individual in the calculation of the hours for which the employee is entitled to overtime compensation under this section if the public agency—

"(A) requires that its employees engaged in fire protection, law enforcement, or security activities be hired by a separate and independent employer to perform the special detail,

"(B) facilitates the employment of such employees by a separate and independent employer, or

"(C) otherwise affects the condition of employment of such employees by a separate and independent employer.".

(b) OCCASIONAL OR SPORADIC EMPLOYMENT.—Section 7(p) (29 U.S.C. 207), as added by subsection (a), is amended by adding at the end the following:

"(2) If an employee of a public agency which is a State, political subdivision of a State, or an interstate governmental agency undertakes, on an occasional or sporadic basis and solely at the employee's option, part-time employment for the public agency which is in a different capacity from any capacity in which the employee is regularly employed, the hours such employee was employed in performing the different employment may be excluded by the public agency in the calculation of the hours for which the employee is entitled to overtime compensation under this section.".

(c) SUBSTITUTION.—(1) Section 7(p) (29 U.S.C. 207), as amended by subsection (b), is amended by adding at the end the following:

"(3) If an individual who—

is employed by a public agency which is a State, political subdivision of a State, or an interstate governmental agency,

agrees, with the approval of the public agency and solely at the option of such individual, to substitute during scheduled work hours for another individual who is employed by such agency in the same activities, the hours such employee worked as a substitute may be excluded by the public agency in the calculation of the hours for which the employee is entitled to overtime compensation under this section.".

(2) Section 11(c) (29 U.S.C. 211(c)) is amended by adding at the end the following: "The employer of an employee who performs substitute work described in section 7(p)(4) may not be required under this subsection to keep a record of the hours of the substitute work.".

VOLUNTEERS

SEC. 4. (a) DEFINITION.—Section 3(e) (29 U.S.C. 203(e)) is amended—

(1) by striking out "paragraphs (2) and (3)" in paragraph (1) and inserting in lieu thereof "paragraphs (2), (3), and (4)", and

(2) by adding at the end the following:

"(4)(A) The term 'employee' does not include any individual who is a volunteer for a public agency which is a State, a political subdivision of a State, or an interstate governmental agency, if (i) the individual receives no compensation or is paid expenses, reasonable benefits, or a nominal fee to perform the services for which the individual volunteered and (ii) such services are not the same type of services which the individual is employed to perform for such public agency.

"(B) An employee of a public agency which is a State, political subdivision of a State, or an interstate governmental agency may volunteer to perform services for any other State, political subdivision, or interstate governmental agency, including a State, political subdivision or agency with which the employing State, political subdivision, or agency has a mutual aid agreement.".

(b) REGULATIONS.—Not later than March 15, 1986, the Secretary of Labor shall issue regulations to carry out paragraph (4) of section 3(e) (as added by subsection (a) of this section).

(c) CURRENT PRACTICE.—If before April 15, 1986, the practice of a public agency was to treat certain individuals as volunteers, such individuals shall until April 15, 1986, be considered, for purposes of the Fair Labor Standards Act of 1938, as volunteers and not as employees. No public agency which is a State, a political subdivision of a State, or an interstate governmental agency shall be liable for a violation of section 6 occurring before April 15, 1986, with respect to services deemed by that agency to have been performed for it by an individual on a voluntary basis.

STATE AND LOCAL LEGISLATIVE EMPLOYEES

SEC. 5. Clause (ii) of section 3(e)(2)(C) (29 U.S.C. 203(e)(2)(C)) is amended—

(1) by striking out "or" at the end of subclause (III),

(2) by striking out "who" in subclause (IV),

(3) by striking out the period at the end of subclause (IV) and inserting in lieu thereof ", or", and

(4) by adding after subclause (IV) the following:

(V) is an employee in the legislative branch or legislative body of that State, political subdivision, or agency and is not employed by the legislative library of such State, political subdivision, or agency.".

EFFECTIVE DATE

SEC. 6. The amendments made by this Act shall take effect April 15, 1986. The Secretary of Labor shall before such date promulgate such regulations as may be required to implement such amendments.

EFFECT OF AMENDMENTS

SEC. 7. The amendments made by this Act shall not affect whether a public agency which is a State, political subdivision of a State, or an interstate governmental agency is liable under section 16 of the Fair Labor Standards Act of 1938 for a violation of section 6, 7, or 11 of such Act occurring before April 15, 1986, with respect to any employee of such public agency who would have been covered by such Act under the Secretary of Labor's special enforcement policy on January 1, 1985, and published in section 775.3 of title 29 of the Code of Federal Regulations.

DISCRIMINATION

SEC. 8. An employee of a public agency who asserts coverage under the Fair Labor Standards Act of 1938 between February 19, 1985, and April 14, 1986, shall be accorded the same protection against discharge or discrimination as is available under section 15(a)(3) of the Fair Labor Standards Act of 1938.

MOTION OFFERED BY MR. MURPHY

Mr. MURPHY. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MURPHY moves to strike all after the enacting clause of the Senate bill, S. 1570, and to insert in lieu thereof the text of the bill, H.R. 3530, as passed by the House.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title was amended so as to read: "a bill to amend the Fair Labor Standards Act of 1938 to authorize the provision of compensatory time in lieu of overtime compensation for employees of States, political subdivisions of States, and interstate governmental agencies, to clarify the application of the Act to volunteers, and for other purposes."

A motion to reconsider was laid on the table.

A similar House bill (H.R. 3530) was laid on the table.

GENERAL LEAVE

Mr. MURPHY. Mr. Speaker, I ask unanimous consent that all members may have 5 legislative days in which to revise and extend their remarks on H.R. 3530, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

CLARIFYING APPLICATION OF SECTION 2406 OF TITLE 10, UNITED STATES CODE

Mr. ASPIN. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3606) to clarify the application of section 2406 of title 10, United States Code, relating to cost and price management, and to delay the effective date of such provision.

The Clerk read as follows:

H.R. 3606

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. AMENDMENT TO SECTION 2406 OF TITLE 10, UNITED STATES CODE, RELATING TO COST AND PRICE MANAGEMENT

Section 2506(c) of title 10, United States Code, as added by section 917 of the Department of Defense Authorization Act of 1986, is amended by adding at the end thereof the following new paragraph:

"(3) Nothing in this section shall require a defense agency to record, in connection with any covered contract, any information referred to in this section if the contractor under such contract does not maintain such information on the effective date of this section.".

SEC. 2. EFFECTIVE DATE.

(a) IN GENERAL.—Section 2406 of title 10, United States Code (as added by section 917 of the Department of Defense Authorization Act, 1986) and the amendment made by section 1 of this Act shall become effective 180 days after the date of enactment of the Department of Defense Authorization Act, 1986.

(b) CONTRACTS TO WHICH APPLICABLE.—Section 2406 of title 10, United States Code, shall be effective with respect to covered contracts (as defined in subsection (a)(1) of such section) entered into by a defense agency (as defined in subsection (a)(2) of such section) on or after the date of the enactment of such section and shall be effective with respect to covered contracts entered into by a defense agency before such date if such contracts have not been completed or otherwise terminated before such date.

The SPEAKER pro tempore. Is a second demanded?

Mr. DICKINSON. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Wisconsin [Mr. ASPIN] will be recognized for 20 minutes and the gentleman from Alabama [Mr. DICKINSON] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Wisconsin [Mr. ASPIN].

□ 1315

Mr. ASPIN. Mr. Speaker, I would like to explain a little bit about this bill to my colleagues. The bill here before you is the bill to clarify something that will be in the authorization bill before the House tomorrow afternoon. This is a bill that is a freestanding piece of legislation, but what it does is deals with some ambiguities in the legislation which will be before the House tomorrow afternoon, the authorization bill.

That authorization bill contains a section having to do with labor costs. It is a way, to put it in the best language I can, it is getting information from companies to determine whether in fact defense contractors are as efficient as they should be.

The provision in the bill tomorrow afternoon is a provision which was dictated by action on the House and on the Senate floor. The exact same piece of language legislation passed both Houses. It was therefore not subject to any amendment in conference.

We, because of the constraints of the legislation, had to accept exactly the same language in the House; the same language passed the House that passed the Senate; we had to put that language into the conference.

It does contain a number of ambiguities as drawn. It does have a few things that are not exactly clear as to

what was intended. In the report of the managers on the bill, an interpretation was put in that said that this provision shall apply only to future contractors; that was not in the language of the bill; it was in the statement of managers.

The statement of managers' language was, from the point of view of a number of us on this side of the aisle, incorrect. That was not the intent, we thought, of the language as it passed the House; we don't know what happened in the Senate, but it was not the intent of the language.

So there was a statement in the language of the statement of managers which in fact does not correspond to what we thought the bill meant when it passed the House.

To clear up that particular misunderstanding and to clarify two or three other misunderstandings or ambiguities in the bill because we couldn't deal with it in conference in any substantive way, the bill before you is a bill that has come from the House Armed Services Committee, sponsored by me and the gentlewoman from California [Mrs. BOXER] to try and clarify the language in the authorization bill.

It does three things: First, it says that the information required in the authorization bill shall be required 6 months after the date of enactment of the authorization bill. So it establishes the exact date upon which this provision of the bill will take place.

Second, it says that as of that date, all information; existing contracts as well as prospective contracts, that that information is required under the language of the bill.

Third, it clarifies a point by saying, unambiguously, that this information is not required of any corporation doing business with Defense which does not already keep that information now in its records. That was the intention of the authors; it was not quite clear in the language that passed the House and the Senate in the authorization bill.

So it does clarify the language in the authorization bill on three very, very important matters. I, therefore, think it is an important piece of legislation; I think it clarifies the language in the House bill, the authorization bill; it is, I think, going to be beneficial to the people who want this information to have this information clarified.

Yet importantly, I think it is also important to the defense contractors to have this issue clarified. It clearly delineates now who is and who is not required to do what under this provision of the law. Without that, the authorization bill, which comes before the House tomorrow will not be clear on these issues.

Mr. Speaker, I reserve the balance of my time.

Mr. DICKINSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. DICKINSON. Mr. Speaker, as has been pointed out today, we are considering H.R. 3606, a bill to clarify an ambiguity in section 917 of the conference report, S. 1160, the Department of Defense authorization bill for fiscal year 1986.

This provision which relates to the imposition of standard labor hour reporting for defense contractors was one of the amendments offered to the authorization bill which had never been subject to hearings or committee review. I opposed it at the time for that reason, because we did not know what the effect was; we did not know who it would affect; we did not know when the effective date would be; and we were writing new legislation on the floor without really having a feel for the import.

Now, I think it is bad legislation, as I have referred to it before. Since the chairman is still here, let me see if I can clear up something else that is still an ambiguity even in the proposed legislation, and I would like to propound a question to him.

We wrote in the authorization language, after it passed, what I thought was common sense. That is, we are not going to pass legislation that is retroactive in effect, going back to say that over 100,000 contracts now in existence would automatically be subjected to this provision, and which, in effect, would say that each of the contracts would have to be renegotiated with the Defense Department.

This bill that we are considering today says that we are trying to clear this up. So, we are going to wait 6 months, 180 days, and that will be the effective date. Now, we have agreed that that is the impact and the purpose.

My question is, when that 6 months runs, and the effective date is triggered, what does that cover? Does that cover the contracts 6 months back of that time that were in effect when the authorization bill was passed, or does it take effect that date? I would like to establish this for legislative history.

Mr. ASPIN. If the gentleman will yield, my interpretation is that it would cover the contracts in effect as of the date that the provision passes.

Mr. DICKINSON. Six months hence.

Mr. ASPIN. Correct.

Mr. DICKINSON. And not go back 6 months and capture all of those contracts that might have since expired.

Well, I would hope that would be the case, because to do otherwise would certainly be unfair, to make it retroactive in nature; and that is the reason I oppose this.

I would also like to point out, Mr. Speaker, and register a complaint as to how this particular armed services bill, the defense authorization bill, is being handled; which as far as I know is unique. We are told that we have got to come in now and correct an oversight of an amendment that was offered during the floor debate of the authorization bill before we can bring the conference report back and even consider it; we have got to correct what should have been done, and if this does not pass, I gather that we cannot even get the conference report on the authorization bill up tomorrow.

Would the chairman clarify that point? If this should not pass, we will still have the conference report brought up tomorrow, anyway?

Mr. ASPIN. If the gentleman will yield, I believe the answer is "yes," we would have the authorization brought up before. It is important, though, that this matter be clarified before we vote on the authorization bill, because clearly the issues in the authorization bill need to be clarified before they are on the floor; and I think it would not be fair to the Congress to say, "Well, you pass the authorization bill and then we will clarify it in subsequent language." We ought to have the subsequent language and the clarification point out there so that everybody understands what they will be voting on tomorrow.

Mr. DICKINSON. I will say I think it is a very unusual procedure, and I think that the Committee on Armed Services has been the recipient in the last few years of several unique procedures that the other committees have not been subjected to.

I can recall one occasion when we had an authorization bill complete, asking for a rule; they put it on a sidetrack and brought out the appropriations bill to the floor and passed it while we were still waiting to bring our authorization to the floor. That was before the present chairman of the Rules Committee was the chairman.

□ 1325

But we have been in a number of unusual situations here. For instance, I cannot think of any other committee of the Congress that has had more special conferees upon it to a conference than there were members of the Committee on Armed Services in that conference. We pass a bill, we go to conference with the Senate, and for the past 2 years we have had more, a total of more special conferees than there were members of our committee there. So I really think that we on the Committee on Armed Services have not been in recent times treated fairly in some instances. We certainly have been treated differently from other committees of the Congress.

I would like to see this come to a halt. I do not know how we are going to bring it about in the near future,

but I certainly will work toward that end.

I think the legislation before us should not have been here in the first place. I understand the need to clarify it. Because I opposed it on the floor initially, I do not think we should have fashioned it in the way that we did. This is playing catchup ball, trying to correct it.

Mr. Speaker, I am going to vote against it, but I recognize the fact that it is needed just to clarify what should have been done in the initial instance.

Mr. Speaker, I yield back the balance of my time.

Mr. ASPIN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wisconsin [Mr. ASPIN] that the House suspend the rules and pass the bill, H.R. 3606.

The question was taken.

Mr. ASPIN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

GENERAL LEAVE

Mr. ASPIN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 3606.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

THE MISSISSIPPI TECHNOLOGY TRANSFER CENTER ACT OF 1985

Mr. FUQUA. Mr. Speaker, I move to suspend the rules and pass the bill, H.R. 3235, to authorize the Administrator of the National Aeronautics and Space Administration to accept title to the Mississippi Technology Transfer Center to be constructed by the State of Mississippi at the National Space Technologies Laboratories in Hancock County, MS; as amended.

The Clerk read as follows:

H.R. 3235

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. AUTHORIZATION FOR ADMINISTRATOR OF NATIONAL AERONAUTICS AND SPACE ADMINISTRATION TO ACCEPT TITLE TO MISSISSIPPI TECHNOLOGY TRANSFER CENTER.

The Administrator of the National Aeronautics and Space Administration—

(1) may accept title to the Mississippi Technology Transfer Center on behalf of the United States; and

(2) may, subject to the availability of appropriations therefor, enter into an agreement with the Governor of Mississippi with respect to the Center in accordance with the provisions of section 9 of Chapter 170 of the Mississippi General Laws of 1985 (as enacted on April 19, 1985).

SEC. 2 LIMITATION ON APPROPRIATIONS.

This Act does not authorize the enactment of new budget authority for a fiscal year before fiscal year 1987.

SEC. 3. DEFINITION OF MISSISSIPPI TECHNOLOGY TRANSFER CENTER.

For purposes of this Act, the term "Mississippi Technology Transfer Center" means any building and related facilities constructed by the State of Mississippi at the National Space Technologies Laboratories in Hancock County, Mississippi, under section 9 of chapter 170 of the Mississippi General Laws of 1985 (as enacted on April 19, 1985) and designated in accordance with such section as the Mississippi Technology Transfer Center.

The SPEAKER pro tempore. Is a second demanded?

Mr. LUJAN. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Florida [Mr. FUQUA] will be recognized for 20 minutes and the gentleman from New Mexico [Mr. LUJAN] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Florida [Mr. FUQUA].

GENERAL LEAVE

Mr. FUQUA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 3235, the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. FUQUA. Mr. Speaker, I yield myself 5 minutes.

Mr. Speaker, I rise in support of the bill H.R. 3235, to authorize the Administrator of the National Aeronautics and Space Administration to accept title to the Mississippi Technology Transfer Center to be constructed by the State of Mississippi at the National Space Technologies Laboratories in Hancock County, MS.

The bill, H.R. 3235, would authorize the Administrator of NASA to accept title to the Mississippi Technology Transfer Center which will be constructed by the State of Mississippi at the National Space Technology Laboratories in Mississippi.

The State of Mississippi has appropriated $4 million for the building at NSTL with the goal of enhancing economic development, improving the transfer of technology, and generating high technology jobs in the area.

There are no costs to NASA involved in either the construction or operation of the building, because the State has appropriated the funds for the construction and because rents from tenants will cover the expenses of operating and maintaining the building.

The bill was drafted in consultation with the NASA Office of General Counsel and NASA does not oppose it. They have suggested a minor amendment which the committee adopted and which I will discuss in a moment.

We need to pass this bill because there are conditions in the Mississippi appropriations bill, and under existing authority, NASA can only accept unconditional gifts. There is a need to move expeditiously in passing this legislation in order to start construction before the appropriated Mississippi funds expire.

The conditions in the Mississippi legislation pose no problem. They are:

First, NASA will be responsible for the building throughout its life.

Second, there will be space in the building for new agencies and contractors including the new Center for Commercialization of Space which will work in remote sensing, and for research projects conducted by institutions of higher learning.

Third, the facility will be named the "Mississippi Technology Transfer Center."

There is no negative impact on NASA programs and some positive impact because NASA researchers and State users of remote sensing data will be located together. In addition, NASA will benefit from the development of more high technology activities in the area, because this will provide a better base of suppliers and employees on which NASA can draw.

NASA has given us assurance that there are no agreements which would force NASA programs to support tenants of the building. That is, there are no hidden rent subsidies.

The committee adopted one small amendment which would protect the Federal Government from various contingencies by making it clear that in agreeing with the Governor of Mississippi to accept and to operate this building, NASA cannot do anything that would obligate us to spend additional money. I believe that this amendment will further improve the bill and protect the Federal Government's interest.

I believe that the bill is worthwhile and I urge all Members to support it.

Mr. LUJAN. Mr. Speaker, I yield 3 minutes to the sponsor of the legislation, the gentleman from Mississippi [Mr. LOTT].

Mr. LOTT. First, Mr. Speaker, I would like to thank the distinguished chairman of the Committee on Science and Technology, the gentleman from Florida [Mr. FUQUA], and the distinguished ranking member of the committee, the gentleman from New Mexico [Mr. LUJAN].

As a matter of fact, there was cooperation of all the members of the committee.

There was a need for this legislation to be handled expeditiously because the State of Mississippi had appropriated and authorized the $4 million in funds to make the Mississippi Technology Transfer Center possible. And of course, at the end of the fiscal year or the beginning of the new legislative session, there could be some questions about whether or not those funds would still be available.

So the committee did cooperate, and we really appreciate that cooperation.

This is an innovative and unique opportunity we have. I am very proud of my State of Mississippi, that our State legislature and the Governor took this action to provide this facility so that the State of Mississippi could cooperate with and transfer information and technology with the various Federal agencies we have there at the National Space Technology Laboratory in Hancock County.

This is not just a facility for NASA, even though NASA is the parent organization that maintains the NSTL. But we have a number of other Federal agencies and programs there that are really very forward looking in what they do and that make use of the information and the technology that we get from NASA. The State of Mississippi wanted to be a part of that effort and be on the center.

There are no hidden rents, there is no obligation on the part of the Federal Government. The State just wanted to have a presence and make sure that they can communicate what is being received from NASA and the other Federal agencies so that the State can make suggestions and work with them.

So it is innovative, it is forward looking, and I think it provides a great opportunity for our State of Mississippi and for the Federal agencies that are there at the NSTL. So I thank the gentleman again at the committee level for making this possible. I am convinced it will be a very good program for the State and also for the Federal agencies we have there at NSTL.

Mr. Speaker, I yield back the balance of my time.

Mr. LUJAN. Mr. Speaker, I yield myself 3 minutes.

Mr. Speaker, I rise in support of H.R. 3235, "the Mississippi Techonology Transfer Act of 1985."

Passage of this legislation is necessary to permit the Administrator of NASA to accept this gift of a $4 million building from the State of Mississippi. Passage of this bill is also a good deal for the taxpayers of our Nation.

This bill does not authorize a single Federal dollar for construction of the center. The entire $4 million has already been appropriated by the State of Mississippi. What the taxpayers get, then, is a $4 million facility for NASA at no cost. In return, NASA will manage and operate the center, allocating a relatively small amount of space to the State of Mississippi for its space-related activities. The rents and fees NASA will collect from the tenants in the building will offset the costs of operating and maintaining the building.

Mr. Speaker, when our Nation is facing one of the worst deficit crises in recorded history, this is exactly the way we should be doing business—at no additional cost to the Federal Government. In fact, in the months and years ahead, we should try to come up with more ways of using unusual and mutually beneficial mechanisms like this one to reduce our Federal deficit.

I urge my colleagues to suport passage of this simple, yet important legislation.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. LUJAN. I am happy to yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

Mr. Speaker, I want to join with the gentleman in congratulating the gentleman from Mississippi who first offered the bill. I was pleased to cosponsor the bill when it arrived at our committee. It is innovative; it is a cooperative approach that can serve as a model for other movements into the high-technology area in the future. I am pleased that we got it to the floor.

Mr. Speaker, I urge the House to pass the bill.

Mr. LUJAN. I thank the gentleman for his comments.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. FUQUA. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. MONTGOMERY. Mr. Speaker, I rise in support of H.R. 3235, legislation introduced by my colleague, Congressman LOTT, which authorizes the National Aeronautics and Space Administration to accept title to a building to be constructed at NASA laboratories in Hancock County, MS, with funds appropriated by the State. The Mississippi Technology Transfer Center will provide space for the expansion of the operations of the National Space Technologies Laboratories, State university research projects, and a center of excellence for remote sensing operated by Mississippi Institute for Technology Development.

This legislation is simple and noncontroversial. It would permit NASA to accept the gift of a facility constructed and furnished entirely by the State of Mississippi. In return, NASA would oversee the maintenance of the building and set aside 20 percent of office space for free occupancy by the State. Since the costs of operating the center would be largely offset by lease payments from the tenants, there is no cost whatsoever to the Federal Government.

The enactment of this agreement between NASA and the State of Mississippi would have long-term, widespread benefits. Construction of the center would boost economic development and generate jobs, while promoting high-technology industry in Mississippi. The building would allow the location of more onsite support contractors and add to the local specialized services and personnel resources available to the NASA laboratories in Hancock County. Additionally, the facility will house newly funded NASA operations in remote sensing from space, which will be conveniently brought together with an ongoing research and development program at the Hancock County laboratories.

The Mississippi Technology Transfer Center represents a significant contribution to NASA's technology transfer program—which is doing work that impacts the entire country. I hope my colleagues will join me in supporting the donation of this property—the proposal holds enormous potential for the State of Mississippi and has been enthusiastically welcomed by NASA.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida [Mr. FUQUA] that the House suspend the rules and pass the bill, H.R. 3235, as amended.

The question was taken; and (two-thirds having voted in favor thereof), the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

CONGRESSIONAL AWARD AMENDMENTS OF 1985

Mr. WILLIAMS. Mr. Speaker, I move to suspend the rules and pass the bill, H.R. 3447, to amend and contend the Congressional Award Act, as amended.

The Clerk read as follows:

H.R. 3447

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Congressional Award Amendments of 1985".

SEC. 2. MEMBERSHIP OF THE BOARD.

Section 4 of the Congressional Award Act (2 U.S.C. 803), hereafter in this Act referred to as "the Act", is amended—

(1) in subsection (a)(2), by adding at the end thereof the following: "One of the members appointed under each of subparagraphs (A) through (d) of paragraph (1) shall be a member of the Congress.";

(2) by striking out subsection (b) and inserting in lieu thereof the following:

"(b) Appointed members of the Board shall continue to serve at the pleasure of the officer by whom they are appointed, but (unless reappointed) shall not serve for more than four years."; and

(3) by striking out paragraph (2) of subsection (c) and redesignating paragraphs (3) and (4) as paragraphs (2) and (3), respectively.

SEC. 3. EXTENSION OF AUTHORITY.

Section 9 of the Act (2 U.S.C. 808) is amended by striking out "six years after the date of the enactment of this Act" and inserting in lieu thereof "on November 16, 1988".

SEC. 4. ADMINISTRATIVE PROVISIONS.

(a) SALARY LIMITATION.—Section 3(b) of the Act (2 U.S.C. 802(b)) is amended by adding at the end thereof the following new sentence:

"No salary established by the Board under paragraph (3) shall exceed $75,000 per annum, exept that for calendar years after 1986, such limit shall be increased in proportion to increases in the Consumer Price Index.".

(b) SCHOLARSHIPS.—Section 3(d) is amended by striking out "Gold Medal" and inserting in lieu thereof "Gold, Silver, and Bronze Medals".

(c) REPORT OF ADMINISTRATIVE EXPENDITURES.—Section 3(e)(4) of the Act is amended by inserting before the period at the end thereof the following: "for each member, officer, employee, and consutant of the Board (or of the Corporation established pursuant to section 7(g)(1))".

(d) ANNUAL MEETINGS.—Section 4(f) of the Act is amended by striking out "meet annually at the call of the Chairman" and inserting in lieu thereof "meet at least twice a year at the call of the Chairman (with at least one meeting in the District of Columbia)".

(e) BYLAWS.—Section 4(i) of the Act is amended by adding at the end thereof the following: "Such bylaws and other regulations shall include provisions to prevent any conflict of interest, or the appearance of any conflict of interest, in the procurement and employment actions taken by the Board or by any officer or employee of the Board. Such bylaws shall include appropriate fiscal control, funds accountability, and operating principles to ensure compliance with the provisions of section 7 of this Act. A copy of such bylaws shall be transmitted to each House of Congress not later than 90 days after the date of enactment of the Congressional Award Amendments of 1985 and not later than 10 days after any subsequent amendment or revision of such bylaws.".

(f) RESTRICTION OF SPONSORSHIP ADVERTISING.—Section 7(c) of the Act (2 U.S.C. 806(c)) is amended by adding at the end thereof the following:

"The Board may permit donors to use the name of the Board or the name 'Congressional Award Program' in advertising.".

(g) POWERS AND RESTRICTIONS.—Section 7(a)(1) of the Act (2 U.S.C. 806(a)(1)) is amended by striking out "from sources other than the Federal Government".

(h) EVALUATION BY GAO.—Section 8 of the Act (2 U.S.C. 807) is amended—

(1) by inserting "AND EVALUATION" after "AUDITS" in the heading of such section;

(2) by inserting "(a)" after "SEC. 8"; and

(3) by striking "may be audited" and inserting in lieu thereof "shall be audited at least biennially";

(4) by striking out "at such times as the Comptroller General may determine to be appropriate";

(5) by adding at the end thereof the following:

"(b) The audit performed pursuant to subsection (a) shall at a minimum—

"(1) assess the adequacy of fiscal control and funds accountability procedures of the Board and such corporation; and

"(2) assess the reasonableness of expenses allowed to the Director and other employees of the Board and such corporation.

"(c) In the report of the first audit performed under subsection (a) after the date of enactment of this subsection, the Comptroller General shall include an evaluation of the programs and activities under this Act. Such evaluation shall include an examination of—

"(1) the extent to which the Congressional Award Program and activities under this Act are achieving the purposes stated in section 3(a);

"(2) the adequacy and appropriateness of the standards of achievement and procedures for verifying that individuals satisfy such standards established by the Board;

"(3) the efficacy and adequacy of the Board's fundraising efforts under this Act;

"(4) the organizational structure of the Board, particularly the use of Regional Directors; and

"(5) such additional areas as the Comptroller General determines deserve or require evaluation.

"(d) The report on the second audit performed under subsection (a) after the date of enactment of this subsection shall be submitted on or before May 15, 1988.".

SEC. 5. CONFORMING AMENDMENT.

Section 2 of Public Law 98-33 (2 U.S.C. 803, note) is repealed.

The SPEAKER pro tempore. Is a second demanded?

Mr. BARTLETT. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Montana [Mr. WILLIAMS] will be recognized for 20 minutes and the gentleman from Texas [Mr. BARTLETT] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Montana [Mr. WILLIAMS].

Mr. WILLIAMS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, today I bring before the House H.R. 3447, the Congressional Award Amendments of 1985.

This bill was considered by the House Committee on Education and Labor and approved, as amended, on October 23.

On November 16, 1979, the Congressional Awards Act was signed into law. The act establishes the Congressional Award Program under which young people, those between the ages of 14 and 23, become eligible for a bronze, silver, or gold congressional medal after successfully completing requirements in such areas as public service, physical development, personal development, or demonstrated fitness at expeditions.

The program is established and administered by a Congressional Award Board. The board is not an agency or instrumentality of the Federal Government. No Federal funds are appropriated to the board under the act for administering the program.

The goal of the program is to encourage in young people a sense of voluntarism, citizenship, and leadership by giving of themselves to help their community and to reinforce development of their personal and work skills.

The positive qualities that stem from physical fitness or expedition activity are fully recognized.

This legislation before us extends the Congressional Award Program for 3 additional years. The act is due to expire on November 16, 1985.

The act before us improves the management and administration of the program and increases congressional oversight over the program.

□ 1340

Mr. Speaker, I reserve the balance of my time.

Mr. BARTLETT. Mr. Speaker, I yield myself such time as I may consume.

Mr. BARTLETT. Mr. Speaker, I rise in support of H.R. 3447, the Congressional Award Amendments of 1985.

The Congressional Award Amendments of 1985 represents a solid piece of legislation for a well-intended program that has experienced what most observers consider to be serious management problems in recent years. The Congressional Award Program seeks to encourage young people who provide services to their community and exhibit a dedication to the merits of personal development and physical fitness. The program is financed solely through funds raised in the private sector with Congress allowing its two nationally recognized symbols of government—the American eagle and the Capitol dome to be used on the award and in select publications and advertisements.

The young people who have received bronze, silver, or gold Congressional Awards have exhibited personal qualities that we can all be proud of. Allowing the limited use of the congressional imprimatur toward their recognition is worthwhile.

The bill we are considering, H.R. 3447, improves the Congressional Award Program in a number of key areas. In the course of the Select Education Subcommittee's hearings on the program, it became evident that the program's management practices were seriously wanting. H.R. 3447 addresses these deficiencies directly: It requires that the bylaws and other regulations of the Board contain language to prevent a conflict of interest or the appearance of such conflict by employees or board members and requires that the bylaws include appropriate fiscal control, fund accountability, and operating principles to ensure that the prohibitions against deficit spending in the act are satisfied. The need for this latter provision stems from the fact that at the end of the calendar

years 1983 and 1984, the program, in violation of the act, was operating at budget deficits of approximately $236,000 and $114,000 respectively.

A program that serves the useful purpose of the Congressional Award Program should be protected from the risk associated with deficit spending.

I am confident that the amendments made to the Congressional Award Program will improve its management practices significantly and contribute to its very worthwhile purpose. Those in the private sector who contribute to the program deserve a commitment to proper fiscal accountability by those who administer it.

Mr. Speaker, I reserve the balance of my time.

Mr. WILLIAMS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I appreciate the assistance in this legislation from the gentleman from Texas, the ranking minority member of our Select Education Subcommittee. I want to recognize his statement that the Congressional Award Program has had some management difficulties in the past, and I want to tell my colleagues that this legislation increases congressional oversight of the Congressional Award Program. It does it in three primary ways. It adds four Members of Congress to the executive board of the program; it requires at least one meeting annually here in the District of Columbia; and it requires two General Accounting Office studies during this authorization period of the activities of the Congressional Award Program.

We do not expect that there will be any illegal activities, nor have we found any in the past; but inasmuch as this program bears the name of the public's body, the House of Representatives, we simply want to be sure that the management of the program is conducted in the highest capacity.

I also want to remind my colleague, the gentleman from Texas, that the act authorizes the board to permit donors to use only the name of the board or the name "Congressional Award Program" in advertising. It does not permit the Congressional Award Program to use the congressional symbol or seal in advertising by the donors.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. BARTLETT. Mr. Speaker, I yield such time as he may consume to the ranking minority member of the Committee on Education and Labor, the gentleman from Vermont [Mr. JEFFORDS].

Mr. JEFFORDS. Mr. Speaker, the Congressional Award Program represents a partnership between the private sector and Congress toward the goal of recognizing young Americans who exhibit qualities of leadership, community service, and a dedication to physical fitness. Funded solely by privately raised funds, the program awards medals to young people between the ages of 14 and 23 in those congressional districts which have operating awards councils. Currently these councils exist in select districts in California, Florida, Illinois, Minnesota, Missouri, New Jersey, Ohio, Texas, Virginia, West Virginia, and Wyoming.

First authorized in 1979, the program presented a total of 255 awards in 1984 and 261 medals have been approved for 1985. The young people who have received these awards have demonstrated a commitment to their community which exemplifies qualities that we all can be proud of. I am certain that many of these award winners will go on to become tomorrow's local, State, and National leaders.

H.R. 3447 supports and improves the Congressional Award Program. It has the bipartisan support of the Education and Labor Committee and deservedly so. I congratulate the chairman and ranking member of the Subcommittee on Select Education for this fine piece of legislation.

Mr. BARTLETT. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from Florida [Mr. LEWIS].

Mr. LEWIS of Florida. Mr. Speaker, I rise in support of H.R. 3447, which extends the Congressional Awards Program through 1988.

The Congressional Awards Council, which my 12th Congressional District initiated in February, held final ceremonies earlier this month.

I was pleased that my district had the most award winners of any first-time congressional award district in the Nation.

Of the 44 medal winners of my area, two were gold medal winners. In addition, each of the nine counties in my district had representatives on the Congressional Awards Council.

Each of these business and community leaders worked diligently to ensure both the success and vitality of this program, which is essential in reinforcing young people for positive deeds.

I thank the gentleman from Montana for bringing this legislation to the floor, I urge its adoption, and I thank the gentleman for yielding to me to express my viewpoint on this great program.

I think it is time that we started showing the positive aspects of our youth rather than the negative. There are more positive aspects out there than there are negative. I certainly hope that we can continue this program throughout and that it broadens throughout this great country, because these young people should be recognized for their services to the community.

Mr. BARTLETT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise to further commend the leadership of the chairman of the subcommittee, the gentleman from Montana [Mr. WILLIAMS], in ensuring that this legislation and these Congressional Award Act amendments would provide for adequate oversight by the Congress in strict accountability of the funds that are used in this program entitled the "Congressional Award Amendments of 1985." It is true that neither the eagle nor the dome can be used in advertising, but nevertheless the eagle and the dome are included in the logo of the Congressional Award Act, and therefore there is at least the imprimatur.

Mr. Speaker, I would note that what the subcommittee has done under the very able leadership of the subcommittee chairman is to focus on correcting the accountability and the management deficiencies of the congressional award management, while at the same time continuing the real purpose of the act, which is to encourage and increase voluntarism among our young people by rewarding and recognizing that voluntarism. This is what makes this generation of Americans I think one of the most exciting generations of Americans ever.

It seems to me that those words were summed up for me in a letter I received, which I have quoted on the House floor before, from two young people who recently became Americans. They are Vietnamese-Americans. They came to my office and we had a little ceremony when they received their citizenship. These two young Americans live in Dallas, in my district, and they received their citizenship almost 5 years to the day after they arrived. They had been in Vietnam long enough to see the Communist takeover and see the other side, and upon arriving here they immediately began working for their citizenship.

One of the young men, a 14-year-old Vietnamese American, and proud of being both, sat down and wrote a letter on what his citizenship meant to him, and in doing so he talked a good bit about volunteerism and service to his country. Maybe he reminded some of us older people, some of us who are older and who have lived in America all our lives, of what we too often take for granted.

This young man wrote the words:

United States citizens are fortunate to be allowed to express their opinions freely. This is a privilege few nations have. Americans also have the freedom of movement. They can go wherever they want, inside or outside the country. Fair treatment is something that not many nations enforce. America's legal system ensures justice. This country has a democratic government which allows—

I stop on that word "allows," and I will come back to it, because he did—which allows every citizen to take part in controlling the government. America is truly a government of the people, by the people and for the people.

Mr. Speaker, I would come back to the word "allows" us to participate in the Government because this young Vietnamese American captured the essence of youthful volunteerism of this generation when he modified his word "allows" in his postscript. He said:

P.S. Congressman, I will do everything I can for my country.

The Congressional Award Act is one of those organizations through which we have the ability to recognize young people who will do and are doing everything they can for their country.

Mr. KINDNESS. I urge my colleagues' support for H.R. 3447, the Congressional Award Amendments, to reauthorize a program which has been important in recognizing the hard work, dedication, and achievement of young Americans.

Perhaps I could best summarize that importance by quoting the letter I received from a parent of one of the first awardees in my home State of Ohio. He wrote, following the ceremony, that those "who stood to be honored were not just your ordinary teenagers. These young men and women are the doers in their communities, the ones who put others before themselves, the leaders in their schools and the ones who exemplify all the things that are good about our youth."

These young people are not "ordinary" because by their action they have become something more. One of the greatest values of the problem is that it recognizes not just those youth who always are out front and who always will "shine" because of their talents and circumstances. The Congressional Award Program offers opportunities for those quiet, behind the scenes, hard-working young people to be acknowledged and commended for their contributions.

As an example of this latter group, we experienced in our Ohio awards program this year the presentation of a silver award to a young lady who was the first person in her family ever to complete high school. This probably was the only visible outside recognition this young lady ever received. The looks of pride on the faces of her family were incredible.

Our awards council has done an outstanding job. The members represent a variety of backgrounds, interests, and activities, but when they sit down to consider the direction of the program or the application of a young person their differences vanish as they pull together for one purpose—recognition of the accomplishments of an individual.

Our State officials in Ohio have been very supportive of the program, as well. Our awards ceremony was held in the State senate chamber in Columbus, at which each awardee was presented an additional certificate of commendation from each house of the State legislature.

Each of us involved in this program has experienced a tremendous sense of accomplishment and pride in what these fine young people have done. They have made themselves, their peers, their adult leaders and their communities proud of the individual's capacity to face and meet with success the challenges before us. And they inspire each of us to follow their example. That is why this program is such a success.

Mr. MOLLOHAN. Mr. Speaker, it is with great pleasure that I lend my support to H.R. 3447, the Congressional Award Act, which would reauthorize the Congressional Award Program which I sponsor in the First Congressional District of West Virginia.

I commend Mr. WILLIAMS, the distinguished chairman of the House Education and Labor Subcommittee on Select Education, for his guidance in extending this positive program for 3 additional years and for his timely action in bringing this measure to the House floor for consideration today.

Since my involvement with the Congressional Award Program, I have had the extreme pleasure to recognize 44 young people in West Virginia for their voluntary public service, personal development and physical fitness/expeditions achievements. In all, I have presented 20 bronze, 16 silver and 8 gold medals to deserving youth. There are many other young people now working toward their medal requirements and, with the enactment of H.R. 3447, I will have the opportunity to work with these and other young people on their goals and reward them for their accomplishments.

There are few programs that bring together a Congressman and his constituents in a bipartisan atmosphere for such a worthy cause. Through the Congressional Award Program in my district, I have had the opportunity to establish relationships with the members of the First District, West Virginia, Congressional Award Council, county coodinators in each of my 13 counties, county committee members, as well as young people and their parents who choose to participate in the Congressional Award Program. This program brings together young and old from all walks of life for a common positive theme: volunteering.

I encourage my colleagues to support H.R. 3447 and to become familiar with the Congressional Award Program so that you may sponsor it in your district, if you are not already a sponsor.

Mr. HOWARD. Mr. Speaker, I rise in support of the Congressional Awards Act amendments which reauthorize and make some changes in the Congressional Award Act which I sponsored in 1979.

Many of us with Congressional Award Programs operating in our districts have had the opportunity over the last few years to observe the program in action. There is no doubt in my mind that the Congressional Award has had great success in meeting the goals Congress set for it. Thousands of young people around the country have gained immeasurably from their association with the program. And we as a nation will be better off for having recognized and encouraged achievement and voluntary service among our younger generation.

The idea for the Congressional Award was first brought to me in the late 1960's by a constituent, Dr. Frank Arlinghaus of Rumson, NJ. As a Columbia University student at that time, Dr. Arlinghaus was very concerned that young people were becoming increasingly alienated from their government. He felt that this was due in part to the failure of Government and adult society to pay attention to the concerns of young Americans and to properly recognize their unique contributions.

It took a number of years for us to generate the kind of national support for the program necessary to secure its enactment, but in 1979, our bill was signed into law by President Carter.

The first Congressional Award Program on a congressional district level was established in my district in 1983. Since then, I am proud to say, we have held four award ceremonies honoring some 116 young people who have earned bronze, silver, and gold medals.

To truly appreciate the program, it is necessary to attend one of these award ceremonies. It is an inspiring and oftentimes emotional experience to see these outstanding young people honored for their personal achievements and for their volunteer work with the poor, elderly, or handicapped. Occasionally, the medal recipients are handicapped themselves and the program has provided them with the kind of incentive necessary to accomplish extraordinary tasks. Always, recognition is bestowed during these ceremonies that would have been overlooked if the Congressional Award Program were not in existence.

The Congressional Award has been an outstanding success in my district even though we have had to operate on a very small budget. Our success is due in large part to the enthusiasm of a core group of adult volunteers who give generously of their time to operate the program, raise money and reach out to young people in our local schools and in youth organizations. The community and the news media have also greeted the Congressional Award with great enthusiasm and, most important, young people are participating in the program in large numbers and spreading the word to their peers.

Still, we have recognized in the implementation of this new program the need for some changes in the original authorizing legislation. I support the changes recommended by the Subcommittee on Select Education of the Education and Labor Committee. I believe the amendments will result in an even closer relationship between the Congressional Award and the Congress and will encourage further expansion of the program.

I also want to congratulate the subcommittee chairman, the gentleman from Montana [Mr. WILLIAMS] for the fine job he has done with this legislation. Under his leadership, the Congressional Award promises to reach its fullest potential as a bridge between young people and their government.

Mr. BARTLETT. Mr. Speaker, I yield back the balance of my time.

GENERAL LEAVE

Mr. WILLIAMS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include extraneous material, on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Montana?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Montana [Mr. WILLIAMS] that the House suspend the rules and pass the bill, H.R. 3447, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

TENTH ANNIVERSARY COMMEMORATION OF EDUCATION FOR ALL HANDICAPPED CHILDREN ACT

Mr. WILLIAMS. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 201) to commemorate the accomplishments of Public Law 94-142, the Education for All Handicapped Children Act, on the 10th anniversary of its enactment, as amended.

The Clerk read as follows:

H. CON. RES. 201

Whereas part B of the Education of the Handicapped Act, commonly known as Public Law 94-142 (the Education for All Handicapped Children Act), was signed into law 10 years ago on November 29, 1975;

Whereas Public Law 94-142 established as policy for the United States of America the principle that all children, regardless of disabling condition, have the right to a free, appropriate public education in the least restrictive setting;

Whereas Public Law 94-142 currently serves over 4,000,000 handicapped children;

Whereas Public Law 94-142 ensures the full partnership between parents of children with disabilities and education professionals in design and implementation of the educational services to be provided handicapped children;

Whereas Public Law 94-142 has greatly enriched the classrooms of the Nation by allowing the potential of children with disabilities to be developed, together with the potential of nondisabled youngsters;

Whereas Public Law 94-142 has greatly enriched America's society as a whole by providing the means for disabled youngsters to contribute to the social and economic progress of the United States; and

Whereas Public Law 94-142 has succeeded even beyond the expectations of congressional supporters in marshaling the resources of the Nation to fulfill the promise of participation in society of disabled youngsters: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That the Congress—

(1) recognizes the 10th anniversary of enactment of Public Law 94-142 and the successful implementation of that law;

(2) acknowledges the many and varied contributions by disabled youngsters, parents, teachers, and administrators; and

(3) reaffirms its support for Public Law 94-142 and the primary goal of Public Law 94-142 that all children, regardless of disabling condition, have the right to a free, appropriate public education in the least restrictive setting.

The SPEAKER pro tempore. Is a second demanded?

Mr. BARTLETT. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Montana [Mr. WILLIAMS] will be recognized for 20 minutes, and the gentleman from Texas [Mr. BARTLETT] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Montana [Mr. WILLIAMS].

Mr. WILLIAMS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this House Concurrent Resolution 201 commemorates the accomplishments of Public Law 94-142, the Education for All Handicapped Children Act, on this, the 10th anniversary of the enactment of that vital piece of legislation.

On November 29, 1975, with the signing into law of Public Law 94-142, the guarantee of a free appropriate education for all handicapped children in the least restrictive setting became the law of the land.

Public Law 94-142 is a landmark piece of legislation. It ensures that all handicapped children, regardless of the nature of severity of their handicapping condition, must be appropriately educated.

The determination of what a child's special education needs are and what services will be provided must be based on the individual needs of that child and not on the services then available in the school district.

Furthermore, it ensures the full partnership between parents of children with disabilities and education professionals in the design and implementation of the education services to be provided for the child. That partnership idea now firmly established is working well.

□ 1355

The impact of this legislation is impressive. Since the 1976-77 school year, there has been an increase of 18 percent in the number of children served. During the 1983-84 school year, more than 4.3 million handicapped children were served under the program. There has also been a 19 percent increase in the number of preschool programs for handicapped children.

We are currently doing a better job of identifying and serving students. Eleven percent of all school-aged students in the 1983-84 school year were diagnosed as being handicapped compared to only 8 percent in 1977-78, the first year Public Law 94-142 became effective. There has also been an increased emphasis on serving the more severely disabled students in the school system.

Growth in serving handicapped children has been accompanied by an even greater increase in the total number of teachers and staff providing that education. There has been a 34-percent increase in the number of teachers and a 48-percent increase in the number of other school staff.

Equally impressive is the impact of this legislation on attitudes. Handicapped children are learning self-respect and working to the maximum of their potential. Parent's expectations have expanded. Administrators and teachers are treating handicapped children as individuals with unique strengths, weaknesses, and needs. Handicapped children are befriending nonhandicapped peers.

We can all be proud of what has been accomplished over the past 10 years. It is now time to reaffirm our commitment to this program and to its goals.

At the same time, we must continue our efforts to meet the challenges that lie ahead. One of these challenges is the implementation of the mandate in the legislation that handicapped children be educated in the least restrictive environment. Last week, a witness testifying before the Subcommittee on Select Education, which I chair, expressed the challenge this way:

Ten years after the passage of Public Law 94-142, school systems still construct numerous segregated special education facilities—fine new buildings where only students with severe disabilities may be found. A decade after Public Law 94-142, school systems continue to locate teenagers with disabilities in separate wings of elementary schools. Ten years after the law was passed excellent vocational/technical schools exclude students with disabilities from participating in the vocational programs. Today, the least restrictive environment is still far from being a reality for many disabled students.

I urge my colleagues to support House Concurrent Resolution 201 commemorating the 10th anniversary of the enactment of Public Law 94-142, the Education for All Handicapped Children Act.

Mr. GIBBONS. Mr. Speaker, will the gentleman yield?

Mr. WILLIAMS. I yield to the gentleman from Florida.

PERMISSION FOR COMMITTEE ON WAYS AND MEANS TO FILE REPORT ON H.R. 2817, SUPERFUND AMENDMENTS OF 1985

Mr. GIBBONS. Mr. Speaker, I ask unanimous consent that the Committee on Ways and Means have until midnight tonight to file the report on H.R. 2817, the Superfund Amendments of 1985.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida.

There was no objection.

Mr. WILLIAMS. Mr. Speaker, I reserve the balance of my time.

Mr. BARTLETT. Mr. Speaker, I yield myself such time as I may consume.

Mr. BARTLETT. Mr. Speaker, I am particularly pleased to voice my support of House Concurrent Resolution 201 commemorating the 10th anniversary of Public Law 94-142, the Education for All Handicapped Children Act. For the past 3 years I have served as the ranking Republican member of the Subcommittee on Select Education with jurisdiction over the act. In that time I have reviewed first hand the workings of the program that has turned night into day for millions of American handicapped students and their families. Prior to 1975, handicapped students could never make the primary assumption that nonhandicapped students have made, namely, that the public school system would provide them with free and appropriate education. Today, due to the existence of Public Law 94-142, handicapped students are entitled to a free and appropriate education. To the maximum extent possible, these handicapped students are schooled alongside their nonhandicapped peers.

Fortunately, it seems like another era when handicapped children were routinely denied educational services or segregated into substantial facilities. It also seems long ago that our education curriculums for persons with handicaps focused on nonfunctional, repetitive tasks intended to fill time and occupy the handicapped student rather than provide them with skills leading to independence and dignity. Today, handicapped and nonhandicapped students are educated together and not only learn from classroom instruction, but also from each other. In many ways, the most profound impact of Public Law 94-142 may well be the education that nonhandicapped students and staff learn about handicapped individuals and the challenges that they face. These nonhandicapped individuals are learning about the range of human conditions and the attitudes they manifest.

Public Law 94-142 is essentially a process for determining what constitutes an appropriate education for a handicapped student. The innovation that Public Law 94-142 brings to our educational system rests on two characteristics of that process: First, educational services are delivered to a handicapped student on an individualized basis so that every educational program provided to a student with handicaps is tailored specifically to that student's unique educational needs; and second, parents of handicapped students participate in the education decisionmaking process as full partners along with other members of a multidisciplinary educational team. The benefits of this increased decisionmaking authority on the part of parents has meant that skills taught at school are more likely to relate directly to a handicapped student's total environment.

Public Law 94-142's 10 years have been years of partnership between parents, educators, and administrators. As in all innovative endeavors, the program has not been without controversy, but that should not surprise anyone who is even the least bit familiar with the complexities of providing an appropriate education to a student with handicaps.

Public Law 94-142 has meant greater independence and opportunity for students whose handicaps range from severe to mild. It has, in the process, broadened our definition of education. We have been taught to appreciate the fact that all persons, regardless of their physical condition or mental capacities, are educable, that is capable of experiencing the change in behavior that we commonly call learning. Because of Public Law 94-142 we understand that learning to feed oneself, learning a complex vocational assembly, or learning to master a word processing system are essentially similar tasks. Each of these skills require instruction and the opportunity to learn in order to be mastered. Public Law 94-142 has given handicapped students that opportunity and thousands of dedicated special educators have provided the appropriate instruction.

I think it is only fitting at this time to recognize the Members of Congress who were instrumental in the development passage of Public Law 94-142. Public Law 94-142 has continuously generated bipartisan support which is reflected in its legislative origins. In 1975 when this act was passed, key members of the Subcommittee on Select Education as well as members of the Education and Labor Committee who played critical roles included: John Brademus and Albert Quie, the chairman and ranking member of the subcommittee, Representatives JAMES JEFFORDS, GEORGE MILLER, LARRY PRESSLER, Frank Thompson, BILL FORD, Phil Burton, PAUL SIMON, Edward Beard, and the late chairman of the Education and Labor Committee, Carl Perkins. On a day when the House is commemorating Public Law 94-142, these Members deserve special mention.

Mr. Speaker, Public Law 94-142 is truly a landmark for millions of persons with handicaps and their families. We should all be proud of its accomplishments and its promise.

Mr. Speaker, I reserve the balance of my time.

Mr. WILLIAMS. Mr. Speaker, I have no additional requests for time, and I yield back the balance of my time.

Mr. BARTLETT. Mr. Speaker, I yield such time as he may consume to the gentleman from Vermont [Mr. JEFFORDS].

□ 1405

Mr. JEFFORDS. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, I am particularly pleased to note my support for House Concurrent Resolution 201 commemorating Public Law 94-142, the Education of All Handicapped Children Act. I was fortunate enough, as a member of the Education and Labor Committee, to have participated in the consideration of the original legislation which was to become Public Law 94-142. Our efforts were to assure that handicapped children would receive a free, appropriate education in our public school systems.

Today over 4 million handicapped students receive a special education designed to meet their unique educational needs. In Vermont, State funding for special education increased by 100 percent following the enactment of Public Law 94-142. Vermont now receives $1,928,334 in Federal support for its 7,400 special education students. The unique service delivery system which has been developed in Vermont has been replicated in other small rural States to the benefit of handicapped students and their families.

Public Law 94-142 has led to increased preschool services and a recognition that handicapped adults, given the proper training in the public school system, are capable of being competitively employed. We have developed a pool of special educators whose dedication and technical expertise is unmatched.

Public Law 94-142 has transformed the educational services that we provide to students with handicaps. It has accomplished what this body hopes all of its initiatives can accomplish—it has significantly improved the lives of millions of American children and their families. There is no greater testimony to a statute than this.

In my 10 years in this body I have not been involved in any legislation which has given more self-satisfaction nor, in my mind, benefited more people than this.

Mr. DYMALLY. Mr. Speaker, on November 29, 1985, a landmark piece of social legislation was signed into law. Public Law 94-142, known as the Education for All Handicapped Children Act, has had a significant, beneficial impact on the way our Nation's schools educate the handicapped. Public Law 94-142 laid out fundamental principles that have since guided educational programs for the handicapped.

The law now requires that children with handicaps be assessed as to the nature of their handicaps and that special educational services be provided that would allow each such child to be educated in a nonsegregated, free, and appropriate manner. A key feature of the law is that determination of the handicapped child's needs must be based on the actual needs of the child and not on the availability of services in the school at the time the evaluation is made.

There is no doubt that the legislation caused a sometimes difficult reorientation in focus within schools across our Nation. That is, the law caused school officials to focus on the child's needs rather than on current institutional services availability. Difficult as that refocusing may have been in certain instances, it was a necessary refocusing. It was the right refocusing.

The most tangible indication of the good this law has worked is the fact that during the 1983-84 school year, 4.3 million handicapped children were able to receive a free and appropriate public education. The children were obvious winners here. But the whole of our society is a winner as well. The revolution in educational philosophy engendered by Public Law 94-142 has meant that millions of students have been afforded the opportunity to become productive members of our society. These are people who without this act would have been shunted to the back roads of education.

Moreover, I believe Public Law 94-142 has helped to bring about a fundamental change in public attitudes toward the handicapped. The positive public attitude that has occurred in part because of the act has shown us how debilitating had been the old isolationist attitudes toward the handicapped. We know in retrospect that in some cases public attitude was more of an obstacle to full participation of the handicapped in our society than was the physical handicap itself. The gradual removal of that obstacle has been a boon to the handicapped, certainly, but it has been an even greater blessing to the country.

Today, we are considering House Concurrent Resolution 201 to commemorate the 10th anniversary of Public Law 94-142. I wholeheartedly support the law and the resolution commemorating its passage. Public Law 94-142 is one of the most enlightened laws, the Congress has ever brought to enactment. It is richly deserving of our commemoration.

Mr. MARTINEZ. Mr. Speaker, I rise today in support of House Concurrent Resolution 201, and I would like to take this opportunity to commend my colleagues on the Education and Labor Committee, especially the gentleman from Montana, not only for their desire to commemorate the 10th anniversary of Public Law 94-142, but also for their hard work and complete dedication to the education of all handicapped children.

It is indeed an honor to be a part of the proceeding before this body today. Ten years ago, on November 29, 1975, this law was signed by President Ford. It established policy calling for a free and appropriate education for all children regardless of their disability. Today, this law serves 4 million children across this Nation and provides $1 billion in Federal aid to assist States in their efforts to comply.

Over these many years our society has come a long way in our efforts to make all levels of education available to the handicapped in the most integrated and least restrictive way possible. Studies show that the number of handicapped students on college campuses has grown from 2.7 percent in 1978 to 7.3 percent in 1984. Presently, 23 States have mandated legislation for the provision of educational services to handicapped children under the age of 5. These are but a few statistics that are indicative of our Nations continued and growing commitment to handicapped education.

Mr. Speaker, thank you for this time and again I applaud my colleagues for their efforts and interest on behalf of handicapped students.

Mr. ECKART of Ohio. Mr. Speaker, this week we are commemorating the 10th anniversary of the Education of the Handicapped Act, more commonly known as Public Law 94-142. The enactment of this important legislation has afforded millions of handicapped children in this country the chance to receive an education appropriate to their needs and abilities. Today this law, which serves 4 million disabled children, has proven extremely successful as many of them can contribute to our society rather than rely on the Government for their well-being.

The foundation of this Nation, and its laws, has been built on the belief that each man and woman should be allowed freedom and independence. Public Law 94-142 provides these to a significant segment of our population who, prior to the law's enactment a mere decade ago, found it difficult to receive a proper education. It is this education which allows these citizens to gain the confidence and knowledge to become active participants in our society.

This law, by requiring that the local education agencies, schools, parents, and children all work together to develop an individualized education program, ensures that the unique needs of each particular student will be met. In addition, the law, through mainstreaming, allows each handicapped child to receive an education in the least restrictive environment. This measure provides the child with a far greater chance to become part of our society than if they were educated in the confines of an institution.

Public Law 94-142 confirmed Congress' recognition that children who have special needs can become active members of our society if their needs are properly addressed during their school years. In a study released by the Select Committee on Children, Youth, and Families, the chairman and ranking minority member singled out Public Law 94-142 as one of the eight most effective children's programs passed by the Congress. As part of its findings, the study evaluated a survey, conducted by the Colorado Department of Education, which indicated that of the high school graduates who participated in special education programs, nearly 70 percent were working at least part time and making a significant contribution to their own support. It is findings like these which should spur both Congress and the administration into greater action to support and fund these programs.

The education of our children has been of tremendous importance to the Congress. In light of the deficit crisis, when we are all looking to programs which must be cut, I sincerely hope that programs such as providing education for the handicapped will be preserved. I firmly believe that each child, no matter what the individual needs may be, deserves the chance to participate in our society. It is laws such as Public Law 94-142 which provide them with such an opportunity and for that reason, I am pleased to lend my wholehearted support to this law.

Mr. MILLER of California. Mr. Speaker, I rise in strong support of this resolution honoring the 10th anniversary of Public Law 94-142, the Education for All Handicapped Children's Act.

I am proud to be an original cosponsor of this commemorative resolution, as I was proud to coauthor the original bill in 1975. In fact, this was one of the very first bills which I helped write when I entered Congress a decade ago.

The district which I am honored to represent has been in the vanguard of providing educational and other services to handicapped youngsters. For me, there is a very personal association, because my father, George Miller, Jr., was a vigorous proponent for the disabled during his years in the California State Legislature. In fact, there are two schools for the disabled in my district which are named after my father because of his years of commitment.

The parents of disabled youngsters in my district have long been extremely committed to the education of their children. While I cannot name them all, I want to give special recognition to several who have been most active, including: Pam Steneberg, Diane Lipton, and Jeanne King of Parents Advocates for Special Education; Madelyn Sitrin and Sunny Grammont of the Developmental Disabilities Council; Beverly Casebeer, Jean Styris of Crunch; Karen Baker of the Mount Diablo schools; Joanna Cooper of Pase and George Miller, West; La Verne Bell; Betty Hodge of Mount Diablo schools; and Judy Miller of the Harmon Parent Group.

I also want to acknowledge the outstanding contributions of some of our local school administrators, including: Pete

Gonos, the director of the special education local plan committee; Joe Ovick, the director of special education for the county office of education; Ken Butler, the director of special education for the Mount Diablo Unified School District; and Steve Cedarborg, the director of special education for the Richmond USD. These individuals, together with parents and teachers of the handicapped, have made enormous contributions to these programs, and educated me about the need for even better programs for the disabled.

It is also a special honor, on this 10th anniversary of Public Law 94-142, that a devoted educator from Contra Costa County, Michael Grimes, currently serves as president of the Council for Exceptional Children.

When we wrote this landmark law 10 years ago, we believed that all children deserve to be educated in an appropriate setting, according to their special needs, regardless of their handicap or disability.

We believed then, as we now know, that this approach is more cost-effective and more conducive to family stability than excluding children from school, consigning them to institutions, or misclassifying them as retarded.

We believed then, as we now know that parental participation in the education of disabled children is absolutely essential and that every child has a right to have their particular needs evaluated and addressed by their school.

The Select Committee on Children, Youth and Families, which I am honored to Chair, has heard testimony on the enormous impact of this outstanding program. Families have repeatedly testified that "but for this law," they would have no way to bring the fruits of education, and the possibility of participation in mainstream American life, to their children.

So today, we can say the Education for All Handicapped Act is a success. It is now a right. But we have still failed to meet one of the key mandates of the law. The title promises education to all handicapped children.

And yet, we in Congress have failed repeatedly to provide adequate support so that more disabled youngsters can enjoy an appropriate education. Today, 10 years after the commitment was made, we are still shutting the schoolhouse doors to millions of handicapped youngsters throughout this Nation who are not seeking charity or pity, but the basic right to an education.

Instead of just commemorative speeches on this anniversary of the passage of Public Law 94-142, I hope Members of this House will commit themselves to more than making a commemorative speech. I hope they will commit themselves to the law which we are honoring.

I would hope that parents and handicapped youngsters, administrators and teachers, throughout this country, will ask Members of Congress not whether they voted for the commemorative resolution honoring Public Law 94-142, but whether they voted for the legislation providing adequate support for this law so that the barriers are broken and all handicapped children have the rights this law guaranteed them a decade ago.

Mr. BARTLETT. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

GENERAL LEAVE

Mr. WILLIAMS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and include extraneous material, on the concurrent resolution presently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Montana?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Montana [Mr. WILLIAMS] that the House suspend the rules and agree to the concurrent resolution, House Concurrent Resolution 201, as amended.

The question was taken.

Mr. JEFFORDS. Mr. Speaker, on that, I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida [Mr. NELSON] is recognized for 5 minutes.

Mr. NELSON of Florida. Mr. Speaker, due to official business, I was unable to be present and voting for rollcall vote No. 371 on October 24. Had I been present, I would have voted "nay" on the Fazio amendment to the Omnibus Budget Reconciliation Act.

SUPPORT LEGISLATION TO ALLOW YOUTH EMPLOYMENT OPPORTUNITY WAGE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi [Mr. MONTGOMERY] is recognized for 5 minutes.

Mr. MONTGOMERY. Mr. Speaker, I am cosponsoring legislation introduced by my fellow colleague from Mississippi, Representative TRENT LOTT, which would allow an employer to pay a youth employment opportunity wages during the summer months. The time has come for action on this type of legislation. Although we have experienced sustained economic growth in the last few years, the unemployment rate among the youth of this Nation remains high. This legislation would allow employers to provide employment opportunities for youth during the summer, give the youth of this Nation a chance to earn some money, and allow our young people a chance to gain experience and skills for future work.

The legislation has broad-based support among a large number of organizations and interest groups—the U.S. Chamber of Commerce, the American G.I. Forum, the Business Roundtable, the National Conference of Black Mayors, the National Federation of Independent Businesses, and the list goes on and on.

Provisions in the legislation address the main concerns raised over allowing a subminimum wage for youths. The bill provides safeguards disallowing the displacement of adult workers by youth. First, the proposal is limited to the summertime; and second, the proposal contains an explicit prohibition against discharging, demoting, or transferring current employees.

Studies have shown that enactment of this proposal would create about 400,000 new summer jobs at the Federal level for youth, and this figure could increase to 640,000 jobs if those States with minimum wage laws adopt the proposal.

The time has come to see some action on this legislation which can help improve the futures of our Nation's young people. I hope all my colleagues will consider the merits of this proposal and join me in supporting this much-needed legislation.

MY ADVICE TO THE PRIVILEGED ORDERS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas [Mr. GONZALEZ] is recognized for 60 minutes.

Mr. GONZALEZ. Mr. Speaker, there is a pattern of activity throughout the country that has aroused my outrage and anger. It seems that in more than one instance during the last year, groups of junior high school and high school girls in Texas and other places were strip-searched because a sum of money or some article—in this case, $1.85—was reported missing somewhere.

Now, this action is in reaction to the Reagan administration's victory at the Supreme Court level where it was decided that students are second-class citizens when it comes to fourth amendment rights regarding search and seizure. Last January, the administration argued before the Supreme Court that in order to fight crime and drug abuse in the schools, teachers and administrators should be allowed to search students and their lockers. The Supreme Court agreed and ruled that the schools were proper places for search, although in other circumstances and conditions, it has not so ruled up until now. The Court ruled that the schools' needs were enough to justify search of students, more than anyone else.

The dissenting Justices in this case warned that this lessened the standard of justice for students, and that it

would make it just as easy for school officials to search for violations of a school dress code as to search for contraband such as drugs and guns. How right the dissenting Justices have turned out to be.

What is particularly horrifying to me is that the misapplication of this newly established Supreme Court-approved procedure in Texas is not the first such misapplication. Last March a similar event occurred in Ohio, where 20 seventh-grade girls were strip-searched while a schoolmate's watch was reported as having been lost or stolen. In neither case were the missing funds or items recovered.

School officials have been given a right to search if there are reasonable grounds for believing a wrong has been committed. But what about the reasonableness of the search itself? It might make sense to search lockers and purses for missing items, but is it reasonable to make junior high school girls strip to their bare skin? Surely this is not what the Supreme Court and the Reagan administration intended by their efforts to lessen the constitutional rights of students. But for as long as the Supreme Court has been deciding cases on search and seizure, they were very careful to make sure that no matter how noble the intent, such a thing would not happen as a direct result of their interpretation or misinterpretation in a given case.

□ 1415

Certainly these are foreseeable events. Any dictator, and we have in America reached a point where with the acquiescence of the American people ostensibly, we have eroded the basic things that we take for granted in the way of personal freedom, freedom from unreasonable search and seizure.

We have at the present moment three so-called intelligence agencies of our country spying through electronic surveillance and other means on American citizens domestically in the United States, contrary to the very purposes for which these intended jurisdictional aspects that these agencies were given at the time that Congress set them up.

The National Security Agency, NSA, we hear a lot about the CIA, we hear a lot about the FBI, but very little of the NSA, and yet it is the most vastly complicated—beyond any kind of oversight by President or Congress—agency of any government on Earth or the globe, including the Communist regimes of Russia and others.

We cry about authoritarian governments, but we have done it to ourselves in this case and we continue to do so, all with the best of intentions.

Of course, we want to catch those dastardly spies, but when they turn out to be actually long-time politically conservative American citizens who pay their taxes, who go to work every day, who do not have any foreign-sounding ethnic names or surnames, and all of a sudden the headlines blaze that they are spies.

Of course, we want to avoid that kind of activity, but in doing so is it necessary that an open society, the only reasonable last remaining bulwark of freedom in the world, should imitate those that it is the last bulwark from? I do not think so, but I think the matter has gone so far that Congress has for so many years looked the other way, it has created out of its legislative laboratory these legal Frankensteins and refuses to look them over.

I can assure you that today, right now, while I am speaking, the National Security Agency is monitoring every single international phone call that comes in to American citizens.

Is this legal? Is this supposed to be done?

Well, it depends on who you ask and who is answering. If you ask the members of the Intelligence Committee of either the House or the Senate, they will tell you they are not supposed to be doing that, but that is not the issue.

The issue is that they are, and they have and they have been doing so illicitly and in fundamental violaton of those things we have taken for granted for so long.

True, we live in an era that has forgotten the more halcyon epoch, when if we went to the airport we did not have to go through a checking point, but we take that for granted, or if you come to the Halls of Congress and you are a visitor and you want to go up to the visitors gallery, you go through the same proceeding.

Our public buildings are teeming with guards, concrete pillars, bunkers, and everything else.

Everybody has forgotten when we were not enured to that kind of existence. It is just that imperceptibly we are getting used to giving away our basic freedoms of a great heritage never before enjoyed in any land, in any clime, or under the sky on this globe, but we are almost imperceptibly taking for granted that we should condone such procedures that I am reporting, perpetrated against our young girls.

What are we to say? Are we to say that we have reached the point where without a murmur, without even a whimper, we lose these precious constitutional rights?

We live in that day and time, though, in which national leaders themselves are foisting a near hysteria and advocating remedies of this moment, but which collapse.

We have seen this happen among the issues that as legislators we have confronted through the years of a more sanguine nature, such as taxation, such as interest rates, and we have reached the point where I think, with sadness, we might ask, have we not for a mess of pottage given up our birthright?

Mr. Speaker, at this point I would like to place into the RECORD a copy of an Associated Press dispatch, dated October 28, concerning the search of junior high school girls at the Cedar Hill, TX, school, and an article by Nat Hentoff in the Washington Post of May 9, 1985.

The material is as follows:

PARENTS OF STRIP-SEARCHED GIRLS WANT TEACHERS FIRED

CEDAR HILL, TX.—The father of a junior high girl who was among 15 students strip searched for a missing $1.85 says the faculty members responsible for the search stole the children's dignity and should be fired.

"What they really did was told our children their pride and dignity wasn't worth $2. It's only worth $1.85," said Bobby Hufstetler.

Some of the parents of the Cedar Hill Middle School girls who were strip searched are enraged by the action and say they plan to ask the school board at its Monday night meeting to fire the physical education teacher and assistant principal involved.

The students were ordered to remove their clothing Thursday when a girl in a seventh-grade physical education class reported $1.85 missing.

"This is a violation of basic human rights," said Hufstetler "I feel like the school owes the girls something besides 'I'm sorry.' She (his daughter) was completely devastated," he said.

But other parents say they still support physical education teacher Janice Ellis and Jeanne Cothran, the assistant principal who authorized the search.

Mrs. Ellis acted out of frustration after several thefts occurred during the year, the parents said, and added that they plan to show support for the teacher at Monday's meeting.

On Friday, Ms. Cothran said the decision to search the students was made in haste and frustration.

"She (Mrs. Ellis) was very frustrated. It was the third day in a row that money was stolen," Ms. Cothran said. "In the back of my mind, I thought it might not be the right thing to do."

At least one girl was asked to strip completely while others were asked to strip down to their undergarments, parents said. Still others were asked to remove their bras. The missing money was not found.

Karen Kershaw, a friend of Mrs. Ellis, said the parents have overracted.

"Naturally to them the girls have been embarrassed, but someone is guilty of theft," Ms. Kershaw said. "She was doing what she though was right. In my feelings, she (Mrs. Ellis) has been treated unfairly and tried and convicted," Kershaw said.

The search was conducted in Mrs. Ellis' office, which has a window looking out into the locker room.

Last week Mrs. Ellis said the parents were "blowing it out of proportion."

"Not one of the parents asked for my story," she said. "They came up here ready for blood."

UP AGAINST THE WALL, SEVENTH GRADERS
(By Nat Hentoff)

Scholastic Action is a magazine that tries to awaken the interest of half a million junior high school students around the country in current events. Teachers have reported that its March 22 issue was particularly successful. One section began:

"Up against the wall."

"Joey stretched his arms and put both hands on the cold, gray lockers. The man felt along Joey's sleeves. Then he felt down his chest and inside the pockets of his jacket.

"Joey is not a criminal. The man frisking him is not a cop. Joey is a high school student. The man who searched him is his history teacher."

It was then explained to the students that they were reading a hypothetical, as they say in the law schools. But, they were told, this kind of classroom search could not happen as a result of a new Supreme Court decision. Said Scholastic Action: "If any school official has good reason to believe you are breaking a school rule, he or she can search your locker, your desk or you."

The section went on with a series of conflicting reactions to the court decision from various parts of the country. The kids reading the magazine were then asked what they thought.

The historic case, New Jersey v. T.L.O., had come down on Jan. 15. A majority of the court decided that students can be searched by school personnel according to a lower standard than adults. Instead of the searchers needing "probable cause" to believe that a search will reveal evidence of wrongdoing, all that is required to search a student in school is "reasonable grounds" to go through his locker or him.

At the time, a former U.S. commissioner of education, Dr. Harold Howe, did not share the general jubilation of teachers and administrators at this cut-rate constitutional standard for school kids. The justices, he said, "have asked school authorities to be reasonable in making searches and have given them a hunting license to decide what is reasonable."

Ten days after the T.L.O. decision, 20 girls, all seventh graders, all under the age of 14, felt the palpable impact of the new Supreme Court ruling. Their lesson in the Constitution as a living document took place after a first-period gym class at Westwood Junior High School, Elyria, Ohio. When the seventh graders came back to their locker room, the physcial education teacher told them a watch and ring belonging to a student were missing. First, the girls' lockers and purses were searched. The missing property was not found.

The assistant principal joined the gathering and informed the seventh graders that their persons were now going to be searched. He warned that if they did not allow female school officials to do the job, the sheriff and his men would be called in.

In the course of the strip-search of the seventh graders, they were commanded to drop their jeans to the floor and turn around as the physical education teacher, the guidance counselor and a clerk-typist visually inspected their entire bodies. A 12-year-old described this lesson in civics: "We had to take off our shirt and then we had to take off our shoes. And then they looked down our bra to see if we had it or not."

No one did have the watch or the ring—anywhere.

On Feb. 8, after due deliberation, Calvin Leader, the Elyria superintendent of schools, issued a formal statement: "The search was conducted in an orderly manner . . . it is my belief that the staff involved made the decision to conduct search activities after reasonable deliberation of the critical issues."

That's what the Supreme Court said was needed in these situations—reasonableness.

With the help of the American Civil Liberties Union of Ohio, 13 of the students are suing Leader, five members of the board of education, the principal, the assistant principal and the three women who conducted the strip search. They want an end to strip-searching of students. Also, each seventh grader is asking for $38,000 in compensatory damages and another $38,000 in punitive damages.

It is the ACLU's contention that whatever the Supreme Court meant by reasonableness in school searches, no reasonable adult would interpret that word to mean a dragnet strip search of seventh graders. After all, the majority of the justices did say that the form of the search cannot be "excessively intrusive in light of the age and sex of the student and the nature of the infraction."

However, the words "excessively" and "intrusive" may mean quite different things to eminently reasonable school officials and judges. During his dissent in *T.L.O.*, Justice William Brennan predicted that these "amorphous" new standards for searching school kids would create increased litigation as well as uncertainty among teachers and administrators. The latter, Brennan said, are going to be "hopelessly adrift" in knowing when to search and how far to go.

The kids will be adrift too. There they are, the future guarantors of freedom in the world—but standing now, legs spread, up against the wall.

ABM TREATY

(Mr. BERMAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. BERMAN. Mr. Speaker, I would like to take this opportunity to call to the attention of my colleagues the administration's dangerous reinterpretation of the ABM Treaty. The Foreign Affairs Subcommittee on Arms Control, International Security, and Science held hearings on this subject last week on October 24. From among a number of witnesses that day, the most interesting testimony came from two gentleman who were participants in the original negotiations that culminated in the Anti-Ballistic Missile Treaty: Ambassador Gerard Smith and Mr. John Rhinelander.

Their testimony makes clear the danger of this foolhardy reinterpretation. If the United States continues to treat this broader interpretation as the legally binding version, we will have invited the Soviets to start up a program of development and testing of advanced or "exotic" ABM technologies.

The President maintains that the administration will conduct its SDI program within the bounds of the stricter interpretation of the ABM Treaty. But if the administration continues to support the broader interpretation as the only legally binding one, what incentive is there for the Soviets to refrain from conducting their version of SDI under the broader interpretation?

There is no justification for a reinterpretation after 13 years of mutual understanding and adherence to the ABM Treaty. In those 13 years, we have had four separate American and Soviet administrations and neither side has ever suggested that advanced technologies were not clearly banned by the treaty.

All of the original ABM Treaty negotiators, including Ambassador Paul Nitze, have consistently made clear that their understanding of the treaty was that it banned the development and testing of future ABM technologies. Of course, as a loyal member of this administration, Ambassador Nitze has toed the line on accepting the new interpretation. But only a few months ago, Ambassador Nitze said, in a speech before the National Press Club, that the ABM Treaty "prohibits the deployment of ABM systems in space or on the Earth, except for precisely limited, fixed, land-based systems." In addition, he went on to say that "all systems—whether nuclear or otherwise—which have a capability to counter strategic ballistic missiles or their warheads at any point in their trajectory, are subject to the ABM Treaty."

I think my colleagues will find the testimony of two of the original participants of the ABM Treaty especially illuminating on this issue. I commend to my colleagues the statements, before the Arms Control Subcommittee, of Mr. John Rhinelander, former legal adviser to the ABM Treaty Negotiations, responsible for the drafting of the treaty language, and Ambassador Gerard Smith, former Chief of the U.S. Delegation to the ABM Treaty negotiations. Both of these gentleman gave statements before the Arms Control Subcommittee which make clear how very detrimental this new interpretation will be to our national security. In addition, their statements show how the administration's new treaty interpretation resoundingly fails to base its findings on the text and history of the treaty and the understandings of its negotiators.

I especially recommend sections III, IV, and V of Mr. Rhinelander's testimony for a clear explanation of the circumstances surrounding the drafting and signing of the treaty. These sections in particular reveal how misguided the administration's new interpretation is. I have also included a copy of the ABM Treaty and pertinent articles from the Washington Post and the New York Times.

If the Congress has anything to say about this—and it does—then we cannot let this haphazard reinterpretation of the treaty concocted in a matter of weeks overturn a treaty that has made a vital contribution to our national security for over 13 years.

STATEMENT OF GERARD C. SMITH

Mr. Chairman and Members of the Subcommittee: The Administration has adopted a new version of the ABM Treaty—a version which will permit the United States and the Soviet Union to engage in much more extensive work on space based defenses than

would have been permitted under the earlier version which pertained from 1972 to 1985. In fact, the new version would permit any development and testing activities short of final deployment of a full space-defense system.

I would like to consider the impact that this new version may have on Soviet-American relations, on America's relations with its allies, and on the SDI itself, I will leave to my colleague, John Rhinelander, the analysis of the thrust of the ABM Treaty on this score as it was negotiated.

The Administration now claims that for time being the new Treaty version is not intended to alter SDI programs. But it is also clear that the Administration feels free under the new version to alter the SDI program any time that would appear advantageous. So we have two possible criteria to guide the SDI. The so-called restricted policy and the new version. Although treaties are intended to produce some degree of predictibility in international relations, we have introduced a new element of uncertainty in future relations.

Although this issue is of special concern to the Senate, which consented to ratification of the ABM Treaty by a vote of 88 to 2 in its earlier version, I think the House would also have a special interest in the legal basis for programs which it is being asked to fund. The revised version of the Treaty alters it radically, and the threat of the revised version being applied at any time must have a bearing on Congress' responsibility for the defense of the United States—a responsibility which now involved large elements of arms control.

I should think the Congress would want to have firm assurances that funds appropriated for SDI work will not be spent for any new purposes permitted under the new version of the ABM Treaty as well as a clearer understanding of exactly what the so called restrictive policy encompasses. The confused and shifting status of the SDI reinforces the recent call by the Congressional Office of Technology Assessment for unusually strict congressional oversight of these programs.

The question may fairly be asked: Is this new Treaty version intended as a warning to the Soviet Union that if it does not improve its behavior, the United States will switch from a restrictive to a permissive treaty-authorized SDI program. I take it that the Administration's answer to this would be that it wouldn't mind if that was the effect.

Why did the Administration decide to float this new Treaty version just six weeks before a summit at which the ABM Treaty was expected to be an important part? Was it an exercise in playing hard ball? A gesture of machismo? Such an explanation would be consistent with the views of some officials who openly express contempt for this part of the supreme law of the land. Or was it a bargaining ploy looking to a summit accommodation somewhere between the Soviet pre-summit position of no research at all and the Reagan new version of no limits on strategic defense development?

What should be done? I trust that the Administration will take this opportunity at the summit to try to find out whether the Soviet Union accepts the previous interpretation of the Treaty—a proposition that the negotiators of the agreement believe and the Administration seems to doubt. I would think that Mr. Gorbachev would reassure the President on this point, since the Soviet Union has been pressing for a substantially more restricted position on space-based systems, rather than the less restricted position that the Administration previously advocated. I hope this committee will urge the President to do just that.

The surprising results of the recent legal research of a new generation of SALT experts may in the end prove significant if they trigger a summit clarification of the allowable limits of research looking to space-based ballistic missile defenses. But these actions could backfire. The arms control relation between the superpowers is in a fragile state. The United States has refused to ratify the last three arms control treaties, which it has negotiated with the Soviet Union. On top of this, the United States has now unilaterally revised the last arms control treaty which it has ratified—and done so in a radical fashion which goes to the heart of the bargain.

No reason has been given for the Presidential decision to hold for the time being to the traditional version of the Treaty in spite of the new legal license to operate in fundamental violation of its provisions. If our Secretary of Defense's emotional claim that SDI is our only hope for the future is true, why this self-restraint? If the President's claim is valid that SDI leads us to arms controls and total elimination of nuclear weapons, why would we want to put off that happy day by proceeding at a more leisurely pace than permitted by the new version of the Treaty?

It seems most unusual for a nation which holds itself to be a decade behind in its strategic defense preparations to favor a new version of the ABM Treaty that will free the Soviet Union to make much greater efforts to hold or even increase its alleged lead. But this outcome, according to one U.S. official, is a "realistic" view of our new Treaty revision.

The Administration bases its case on alleged ambiguities in the negotiating record. Unfortunately, under the time honored rules of diplomatic privacy, the evidence is not available. It would be a unique episode in international negotiations to have a completely unambiguous record—especially in a bargaining process requiring 2½ years. But be that as it may, the 13-year record for the parties holding to the original version should carry far greater weight than some statements reportedly inconsistent with the final language of the Treaty.

The ABM Treaty was a great policy accomplishment of President Nixon's first term. It would be of interest to ascertain if he believed that the Soviet Union has not accepted his understanding of the Treaty's ban on the development and testing of space-based systems.

Only two weeks before the White House announcement of the new Treaty version, six former Secretaries of Defense (Harold Brown, Clark Clifford, Melvin Laird, Robert McNamara, Elliot Richardson, and James Schlesinger) urged the President not to take any steps to further erode the ABM Treaty. Unfortunately, the experienced advice was quickly rejected.

The Geneva communique of last January called for negotiations to stop the erosion of the ABM Treaty. The U.S. adoption of new and radically permissive verison of the Treaty hardly reflects a deep commitment to preventing its further erosion. This development comes at a time when the Soviet Union is calling for a less permissive Treaty interpretation—one that would permit research, but no development work outside a laboratory. The Administration's justification for its complete reversal of its position appears to be that the Soviet Union did not agree to the tighter legal standard that we had accepted. This seems a very strange rationale coming at a time when the Soviet Union is pressing for a much more restrictive interpretation of the Treaty than ours.

The SDI has also become a source of considerable difficulty for important allies. They seem to be less clear than the Administration that SDI is the key to arms control which for them is perhaps more important than the United States in terms of domestic politics. It is reported that allies concerns generated by the revised version of the Treaty were a major factor in Secretary of State Shultz's efforts to blunt the impact of National Security Advisor MacFarlane's formulation of the new legal revision of the ABM Treaty. I wonder if the NATO members will be satisfied with the confusing partial withdrawal of last week's MacFarlane doctrine. The NATO allies are now on notice that the restrictive policy for the SDI program can be reversed at any time by the stroke of the pen of the Chief Executive.

For my own part I think the SDI at present is, if anything, too ambitious a program which raises serious questions under the previous restrictive version of the ABM Treaty. I do however favor a robust program of research as an insurance policy against a future Soviet breakout from the Treaty and as an aid to permit us better to understand what the Soviet Union may be up to.

In conclusion, I commend this Committee for its interests in this important issue and will urge them to seek a clarification on the true impact of the revised verison of the ABM Treaty on the SDI program.

STATEMENT OF JOHN B. RHINELANDER

Mr. Chairman and Members of the Subcommittee: My name is John B. Rhinelander. I am currently a partner in the law firm of Shaw, Pittman, Potts & Trowbridge in Washington, D.C. I am also a member of the Board of Directors of the Arms Control Association, a member of the National Advisory Board of the Lawyers Alliance for Nuclear Arms Control, and a member of the ABA's Standing Committee on Law and National Security. Previously, I have served as a law clerk to Justice John Marshall Harlan and in five departments in the Executive.

I appear today in my individual capacity. My views do not necessarily represent those of any of the organizations with which I am presently affiliated. My statement represents my best recollection, after discussions with former colleagues on the SALT I delegation who are now out of government and a review of some of the available literature, on the evolution of the ABM Treaty in 1971-72 and its meaning. The SALT I negotiating record is massive and classified. I have not had access to it since 1972 and have never seen the official ACDA history of SALT I which is also classified. I served as the legal adviser to the US SALT I delegation from 1971-72.

The primary issue before the Subcommittee today is whether Article V(1) of the ABM Treaty prohibits the development and testing of space-based and other mobile-type "exotic systems" (e.g., space-based lasers). The secondary issue is whether any of the Treaty's substantive constraints on "ABM systems or components" in Articles I(2), IV, V and IX apply to space-based "exotic systems". The answers are four-fold: (1) the prohibitions are clear from the text of the Treaty, particularly Article V(1) which

states, "Each Party undertakes not to develop, test or deploy ABM systems or components which are sea-based, air-based, space-based or mobile land-based"; (2) the negotiating history, as interpreted in 1972 by the SALT I delegation and the backstopping representatives in Washington, supports the broad ban on space-based "exotic systems" as the only permissible interpretation; (3) this has been the interpretation of the Executive, accepted and relied upon by Congress, since 1972; and (4) any other result is patently absurd and would frustrate the stated premise of this Treaty of indefinite duration—to prohibit the deployment of nationwide ABM systems or a "base" for such a system.

The Soviets accepted this interpretation during the negotiations, reflected it in their ratification proceedings, and have taken no actions and have not made any official statements inconsistent with this interpretation. This is the only conclusion one can draw from their public statements which sometimes deal with the issue implicitly and elliptically rather than explicitly. The Gorbachev interview with Time editors includes a specific statement, but without mentioning Article V, before the U.S. "reinterpretation" became known. The TASS statement of October 9, responding to the U.S. "reinterpretation", removes any ambiguity from the Soviet public position. Marshall Akhromeyev's lengthy comments on October 19, 1985, should lay to rest the Soviet public position.

The U.S. delegation in Geneva, and Members of Congress who are advisors, should know whether the Soviets have made their position explicit, and specifically tied to Article V(1), in the Geneva negotiations since 1972, since the President's Star Wars speech in March 1983, and since October 6, 1985.

I.

Based on National Security Advisor McFarlane's comments October 6 on NBC's Meet the Press, subsequent commentary on CBS, the article in the Washington Post on October 9 (attached as Exhibit A) and my telephone conversation that day with Deputy Secretary Taft at the Pentagon, the Administration had concluded that the Soviets never agreed to the U.S. position at SALT I, the Soviets cannot be held to abide to it today and, therefore, the U.S. is not legally bound. Deputy Secretary Taft told me that the General Counsel of DOD, the Legal Adviser at State, and the Department of Justice had, therefore, concluded that because the U.S. cannot legally hold the Soviets to the historic U.S. interpretation, the U.S. may take the position that the development and testing of sea-based, air-based, space-based and mobile land-based "exotic systems and components" may be developed and tested, but not deployed, consistent with the ABM Treaty.

On October 13, the President decided that he agreed "in principle, but not in practice" with this "reinterpretation". Based on a Presidential directive, Secretary Shultz announced on October 14 in a speech before the thirty-first annual meeting of the North Atlantic Assembly that "a broader interpretation of our authority is fully justified", but SDI "will be conducted in accordance with a restrictive interpretation of the treaty's obligations."

This leaves the U.S. legally free to return to the "reinterpretation" whenever the President's advisors deem advantageous and the President agrees. The story on October 17 in the Washington Post (see Exhibit B) makes this clear. DOD officials do not admit that they have yet lost the argument and stress Secretary Shultz did not state how long the Administration would continue to abide by the new "restrictive interpretation," which represents presidential policy rather than a matter of law.

The legal rationale for the "reinterpretation" revolves around Agreed Statement D. The argument is (1) that Article V(1) constrains only "traditional" ABM technology (ABM missiles, ABM launchers and ABM radars), and (2) therefore permits development, testing and deployment of "exotic systems and components", but (3) Agreed Statement D implicitly amends Article V(1) to prohibit deployment only of "exotic" systems and components.

This rationals is absurd as a matter of policy, intent and interpretation. If the Administration sticks with it as the best legal interpretation of the Treaty, then the Administration has effectively repudiated the ABM Treaty as a legal instrument. If the truncated Treaty remains in effect, then both the U.S. and Soviets can develop and test, without quantitative or geographic limits, any sea-based, air-based, space-based or mobile land-based ABM system or component provided they are based on "exotic systems and components".

But the result could be even more far reaching. Because the Administration's new interpretation is that Article V(1) and other Articles of the Treaty do not apply to "exotic systems" and Agreed Statement D blocks only their deployment, then the necessary consequences are that the limits on "ABM systems or components" throughout the Treaty do not include "exotic systems". This results in:

(1) the deployment bans on a nation-wide ABM defense, a base for such a defense, and a regional ABM defense (except as permitted by Article III) in Article I(2), which were fundamental statements of the Treaty's scope, are all limited to "traditional" ABM technology, (i.e., ABM launchers, ABM missiles and ABM radars) and do not apply to "exotic systems";

(2) the words "currently consisting of" in Article II(1), intended to make clear that the Treaty applied to all ABM technologies and not just "traditional" ones, are rendered devoid of meaning;

(3) because Article IV dealing with ABM test ranges explictly refers back to Article III (which authorizes limited deployments of fixed, land-based ABM launchers, ABM missiles and ABM radars), the geographic, quantitative and implicit qualitative limits in Article IV on ABM tests do not apply to tests of any type of mobile or space-based "exotic systems";

(4) Article V does not apply to all or almost all SDI programs, and the Homing Overlay Experiment (HOE) which was a kinetic energy test with a single intercept mechanism) could have been tested in a MIRVed configuration; and

(5) the prohibitions in Article IX against transfers of ABM systems or their components to other States, and deployment outside national territories, apply only to "traditional" technology and not to "exotic systems".

The consequences of this "reinterpretation" are dramatic when one considers that the principal U.S. concern has historically been with Soviet "breakout" capability based on "traditional" or "low tech" systems. These remain tightly constrained notwithstanding the "reinterpretation". On the other hand, most of SDI is now "legally" unconstrained by the Treaty.

With particular respect to the Soviets and their emphasis on "traditional" systems: (a) ABM deployment is limited to the one area surrounding Moscow; (b) ABM tests must be limited to their two ABM test ranges; (c) the development, testing and deployment of land-mobile "traditional" ABM systems and components is prohibited; and (d) the ban on the "upgrade" of surface-to-air (SAM) systems remains in full force. However, under the "reinterpretation" the Soviets now legally could place in the field an unlimited number of mobile land-based lasers (the Soviets have an active laser program) across the Soviet Union provided they were labeled for "test" purposes.

With particular respect to the U.S., it is now free to exploit its own, and Western technology, in the full pursuit of Star Wars. A full-scale, operational orbiting systems, with accompanying ground stations and including as many as 100 to 400 killer satellites and related sensors, could now be "legally" put in place as an extensive "test program" to prove out the new technology in a BMD system configuration. U.S. allies would be free of any Treaty restraints to participate in two-way transfers of most SDI technology, with the only "legal" constraints on "west-west" SDI technology those under the Munitions Control and Export Administration Acts.

This result is absurd. Unbeknownst to the U.S. SALT I delegation, the SALT I backstopping apparatus in Washington, the Nixon Administration and each of its successors, and Congress, the U.S. would now be in the most one-sided Treaty relationship imaginable. Ambassador Smith should be given a retrospective decoration by the Reagan Administration for one of the great feats in American diplomatic history!

Of course, it could not last for a minute. Arms control agreements are viable only as long as they are in the net interests of each party. Secretary Shultz has spoken of the need to "prevent the erosion of the ABM Treaty," but Defense Secretary Weinberger, Under Secretary Ikle, and Assistant Secretary Perle have repeatedly stated that they have no use for the ABM Treaty and the sooner the U.S. is without it the better. They momentarily prevailed in a brazen exercise well described in a New York Times editorial by Anthony Lewis (see Exhibit C). Unless the President or Congress repudiate this self-defeating legal "reinterpretation", or the U.S. and Soviets agree on specific Agreed Statements to put it to rest, DOD officials could move the issue again when the moment seems right to them.

The timing of the announcement of the initial "reinterpretation" remains obscure. DOD has known, of course, that under the historic interpretation the evolution of SDI research into development and testing would have to be stopped somewhere between 1988 (as I believe) and 1990 (as even DOD officials had privately conceded) unless either the Soviets agree to amand the Treaty or the U.S. formally withdraws. From a policy and political point of view, six weeks before the Summit, the "reinterpretation" by the U.S. with respect to a legally binding treaty could have been a disaster. The first concrete U.S. response to the Soviet proposal (admittedly lopsided) to cut offensive forces by 50% was to repudiate the ABM Treaty which, both had agreed last January, is interrelated to any offensive limitations.

One of the political reasons for the Administration's initial "reinterpretation" at this time may have been DOD's attempt to

encourage more Allies to support SDI by participating in cooperative SDI "research". (The negotiations with the U.K. on a government-to-government agreement may be completed before the Summit and an agreement with the FRG shortly thereafter). Foreign corporations, particularly in the United Kingdom and West Germany, might be encouraged by the "reinterpretation" because cooperation might be extended from ABM "research", which is all that is permitted under the historic U.S. interpretation, to include now "development and testing" with full sharing and two-way transfers.

The actual effect on U.S. Allies was the reverse because the political fallout of this full sharing in SDI technology directly associated with ABM systems or components would have been the implicit or explicit ratification by Allied governments of the repudiation of the ABM Treaty. That is a role that none is prepared to accept or condone, including the United Kingdom. Margaret Thatcher earlier had achieved at Camp David the President's agreement to four basic principles relating to SDI. Compliance with the ABM Treaty was one of them. The political cost in West Germany and the Netherlands (particularly since the latter must make its decision on cruise missile deployments by November 1) might be much higher for their governments and NATO as a whole.

The remainder of my statement sets forth my views on the negotiation and meaning of the ABM Treaty.

II

In April 1971, while I was serving in Washington as a Deputy Legal Adviser at the Department of State, Ambassador Gerard Smith asked me to come to the fourth negotiating session of SALT I in Vienna and prepare drafts of an ABM Treaty and an Interim Offensive Agreement. In March, the Soviet delegation had tabled a draft ABM Treaty. The U.S. delegation believed it was appropriate to begin to prepare formal texts of agreements on defensive and offensive strategic weapons limitations. I spent most of that session reviewing the record of the negotiations (plenary statements, memoranda of conversations, reporting cables, etc.), familiarizing myself with U.S. position papers and the technical characteristics of the weapons, and in discussions with members of the U.S. delegation. I also prepared rough first drafts of texts. The negotiating session ended in May 1971, shortly after the "May 20 understanding" between the US and Soviets was announced.

During the remainder of May and in June in Washington, I prepared successive drafts of an ABM Treaty and an Interim Agreement after input from others. I recollect that the Soviet draft of Article III was permissive—it stated both sides may deploy a single, fixed land-based ABM system with 100 ABM launchers and no limits on ABM radars within the deployment areas. This text was vague, imprecise and, among other things, an invitation to pursue and deploy both stand-alone components, such as long lead-time ABM radars, and ABM systems based on "exotic" technologies. In my drafts, I turned Article III around into the form eventually agreed upon and also tightened it.

Article III, as drafted, prohibited deployment of any ABM system or components except those in the deployment areas and as limited quantitatively, qualitatively and geographically. The text of Article III, standing alone, prohibited the deployment of fixed land-based "exotic" ABM systems and components because only systems utilizing ABM launchers, ABM missile and ABM radars could be deployed. This raised the "exotic system" question directly for inter-agency consideration.

The other substantive Articles always referred to "ABM systems" and to "components" to make clear the U.S. position that components were limited and not just entire systems.

The Soviet draft of March 1971 contained prohibitions on testing and deployment of "space-based" in what is now Article V(1), as did my drafts of May-June 1971 which, I believe, added "develop." The gist of this article was derived from the August 4, 1970 proposal by the U.S. for bans on production, testing and deployment of all mobile-type ABM systems.

The drafts of May-June 1971 were reviewed by members of the SALT delegation while in Washington. Some of them had sharply differing views on "exotic systems" and other questions.

III

The fifth negotiating session began in Helsinki in early July 1971. After taking into account the President's written instructions, the delegation revised my drafts, cabled texts of an ABM Treaty and an in trim Agreement to Washington, and sought authorization to table them in a plenary session. On the "exotic systems" questions, the delegation was split. Gerard Smith wrote in Doubletalk: The Story of SALT I (Doubleday, 1980), that he and Harold Brown supported a broad ban; Paul Nitze concurred except for sensors; but General Allison and Ambassador Parsons favored no restraints at all on "exotic systems" (pp. 263-65).

The delegation was subsequently authorized to table the text of both agreements, which it did on July 27, but with the article in the ABM Treaty covering space-based systems omitted. The Verification Panel in Washington was still analyzing the "exotic systems" question. Eventually, the President rejected an ABM ban which Ambassador Smith had urged, but about the same time he approved a White House staff compromise to the basic Smith-Brown position on "exotic systems" which would prohibit (1) the deployment of fixed land-based and (2) the development, testing and deployment of all other basing modes. The Joint Chiefs of Staffs were particularly interested in preserving the option to develop and test fixed-land-based lasers. The President's decision preserved this option, as does the ABM Treaty itself. See John Newhouse, Cold Dawn: The Story of SALT (Holt, Reinhart, 1973), pp. 230-31, 237; Raymond L. Garthoff, Detente and Confrontation: American-Soviet Relations from Nixon to Reagan (Brookings Institution, 1985) ch. 5.

The U.S. delegation filled in the blank Article in its ABM Treaty in mid-August 1971. The Soviets initially balked at discussing, let alone agreeing to any limitations on, "exotic systems". They were probably without any instructions on this issue and may have felt the U.S. was on an intelligence-fishing expedition. Progress was soon made nevertheless. Various working groups and a drafting group were set up to seek agreement issue by issue. Joint Draft Texts of the Soviet and U.S. drafts of the Treaty were prepared with disagreed language, which at first was extensive, in brackets.

The Graybeal-Karpov Working Group focused on Article V. (Sid Graybeal was later the US Commissioner to the Standing Consultative Commission. Victor Karpov is currently the head of the Soviet delegation in Geneva.) Before the conclusion of the fifth negotiating session in September 1971, the Graybeal-Karpov working group agreed, ad referendum to the two delegations, that current Article V(1) covered "current" as well as "exotic" technologies. The U.S. delegates agreed that the Americans on this working group (which included Albert Carnesale, now at the Kennedy School at Harvard) had carried out the President's instructions. The brackets around "develop" in that paragraph in Article V in the Joint Draft Text were subsequently removed in the drafting group during the sixth negotiating session after both delegations had noted their approval. The Administration now contends that either the Soviets never agreed with the U.S. interpretation or that the Soviets later modified their agreement or changed their interpretation during negotiations over Agreed Statement D. The U.S. members on this Working Group would sharply differ with this view.

The major sticking point then, and through late into the sixth negotiating session, was on fixed land-based systems. U.S. instructions were to preserve the right to develop and test, but not to deploy, fixed land-based lasers. Accordingly, the U.S. delegation insisted that Article II should authorize deployment of only ABM systems and components which are based on "current" technology. Further, development and testing, whatever the technology, of fixed land-based systems and components could be carried out only at ABM test ranges. The Soviets resisted any limitations on fixed land-based "exotic systems". As John Newhouse, who many believe was given at least some access to NSC files, wrote (Cold Dawn, p. 237):

"Back in the summer, Moscow's attitude, as reflected by its delegation, had been sympathetic. Then, in the autumn, it hardened, probably under pressure from the military bureaucracy. Washington was accused of injecting an entirely new issue. Moscow would not agree to a ban on future defensive systems, except for those that might be space-based, sea-based, air-based, or mobile land-based. The U.S. delegation persisted and was rewarded. Land-based exotics would also be banned. The front channel had produced an achievement of incalculable value."

IV

The Article III issue was not resolved until late in the sixth (Vienna in November 1971-February 1972) negotiating session. It was handled principally in the Garthoff and Kishilov or Grinevsky working group and also in the Garthoff-Parsons-Kishilov/Grinevsky group (Ray Garthoff and Nicolai Kishilov were the executive secretaries of the respective delegations.) The U.S. proposed the "currently consisting of" phrase which was agreed upon for Article II to make clear that the Treaty was not limited to "traditional" technology. The U.S. proposal for the "except that" formulation for Article III was accepted which made clear that fixed land-based "exotic" systems could not be deployed. The ban against a nationwide defense or "base" for such a defense in Article I(2), which was a Soviet initiative intended in part to deal with "exotic systems", was agreed. In each case, agreement was ad referendum to the delegations. Together, these textual provisions completed all the key words in the Treaty relating to "exotic systems".

An agreed interpretation tied to Articles I and III was first proposed by Garthoff in

mid-December 1971. I distinctly recollect advising that no supplementary interpretation was technically necessary. The U.S. effort, therefore, was to reinforce the clear meaning of the specific Article III and the more general Article I(2).

The U.S. had originally proposed a paragraph for the Treaty in August 1971. It stated: "Each party undertakes not to deploy ABM systems using devices other than ABM interceptor missiles, ABM launchers or ABM radars to perform the functions of these components". Doubletalk, pp. 265, 343-44. The Soviets balked at any Treaty language and, subsequently, the initial U.S. proposal for an agreed interpretation. Eventually the Soviets proposed a counter draft. This was modified several times at U.S. insistence (including the insertion of the opening phrase "In order to insure fulfillment of the obligation not to deploy ABM systems and their components except as provided in Article III of the Treaty * * *"). The reference to Article XIV in Agreed Statement D indicated that the Treaty would have to be amended before a fixed land-based "exotic," such as a laser, could be deployed. The final compromise language was proposed by Garthoff to the Soviets in late January 1972 and early in February Kishilov informed Garthoff of Soviet agreement. This was eventually noted in an US plenary statement. Agreed Statement D and the other Agreed Statements were initialed on May 26, 1972 by Ambassadors Smith and Semenov.

Agreed Statement D refers to, and interprets, Article III only, although the reference to "other physical principles" and "components capable of substituting for" are equally applicable to Article V(1). While the language is admittedly opaque, the U.S. has always understood that Agreed Statement D reinforced Articles I(2) and III and reinforced the prohibition on deployment of fixed land-based "exotic systems" unless and until the Treaty is amended. Finally, and most importantly, Agreed Statement D certainly does not diminish or amend Article V(1) and the other substantive Articles such as I(2), IV, V(2) and IX.

V

During the seventh negotiating session, I prepared detailed memoranda on both the ABM Treaty and the Interim Agreement intended to serve four distinct purposes: (1) inform the delegation on what was agreed with the Soviets and what was not; (2) suggest whether the U.S. should consider seeking one or more Agreed Statements to provide more specific interpretations; (3) indicate what types of weapons programs, current and future, were prohibited and permitted; and (4) serve as the basis for the eventual transmittal documents to Congress and background for the Congressional hearings.

Successive drafts of my memoranda were shared within the delegation. Where there was any doubt that a matter was agreed, the proposition was enclosed in brackets. The brackets were removed only after I, and others on the U.S. delegation, were satisfied. I constantly revised the drafts as issues were reviewed. The draft memoranda were never made "final."

In certain cases the U.S. delegation sought and achieved Agreed Statements. In others it did not seek them. Some matters were judged agreed, while others were not. To the best of my recollection, the U.S. delegation never sought an Agreed Statement confirming that Article V(1) covered "exotic systems." We probably felt that seeking further specific agreement was unnecessary and would not be productive. In any event, I am absolutely certain that my contemporaneous advice to the U.S. delegation on the scope of Articles III and V(1) with respect to "exotic" systems was clear and that none of the delegates nor their advisors (State, ACDA, JCS and OSD) disagreed with that advice. I recall no indication that the Soviets thought otherwise.

During SALT I the US delegation, and particularly Washington, did not insist on the kind of precision reached in the SALT II Treaty with its 98 Agreed Statements and Common Understandings. The Soviets stubbornly resisted the level of textual detail the US had initially sought at SALT I. Neither the President nor Henry Kissinger cared much for detail. During the final three negotiating sessions, the US delegation made ad hoc decisions on how the Presidential instructions should be sought and recorded on many issues, how hard to push for additional clarity, and what sufficed, but constantly reported to Washington.

In one instance relating to the ABM Treaty ("current" Soviet ABM test ranges), the U.S. delegation identified the two US ABM test ranges and the Soviet test range at Sary Shagan. The Soviet response noted national technical means permitted the identification of test ranges. (The U.S. and Soviet statements are set forth in Common Understanding B.) The U.S. delegation noted immediately that the Soviets did not respond to the U.S. identification of Sary Shagan as their ABM test range, but the delegation believed the Soviet response reflected extreme Soviet sensitivity to any discussion of their test range. However, in the mid-1970s the Soviets claimed a second "current" ABM test range at Kamchatka based on the presence of an old rader. Paul Nitze has referred to this negotiating technique as unworthy of bazaar traders. I agree. The U.S. eventually accepted the Soviet claim in 1978 because there was a factual basis for it, but learned from this example, and particularly from the Moscow Summit negotiations on the Interim Agreement, that explicit agreement and written precision is important. The SALT II documentation reflects this learning.

SALT I, however, did not have this benefit of later-day hindsight indicating the need for precision and detailed Agreed Statements and Common Understandings reflected in the SALT II Treaty. Some of the SALT I underlying understandings are reflected in formal plenary statements, others in the less formal mini-plenary statements and some in working documents, memoranda of conversations ("memcons") and reporting cables. Agreement was reached ad referendum in one or more working groups, approved by the two delegations, referred to the drafting group, to the interpreters, etc. On many points there will not be simple, clear documentation. In addition, the U.S. government (but not the Soviets) has lost most of its SALT I historical memory.

Some interpretation matters were in 1972, and remain today, ambiguous and need clarification. The dividing line between permitted "research" and prohibited "develop" and "test" is not clear, nor is the related meaning of "component," in the broad prohibitory context of banning "exotic systems" under Article V(1). There is no Agreed Statement on either issue. The former was discussed in a formal statement delivered by Harold Brown and a general understanding, although not a fully documented record, was reached. I do not recall any discussion of the latter with the Soviets.

VII

The SALT delegation remained in Helsinki until agreement on open points, primarily the Interim Agreement, was reached at the Moscow Summit. When the delegation returned to Washington, and the transmittal documents and Congressional statements were being prepared under White House control, Henry Kissinger directed that all "understandings" be culled from the negotiating record and made public to refute criticism of secret agreements. This was the derivation of the SALT I Common Understandings. The search of the files for Common Understandings limited. It did not cover all the myriad of agreed understandings reached in less formal ways during the negotiations.

The hearings before the Senate Foreign Relations Committee, and particularly the Senate Armed Services Committee, led to a much fuller public record on many of the nuances. Some of the initial testimony of officials was not clear, but the record was frequently supplemented. This includes the statement for the record of the Senate Armed Services Committee, prepared after inter-agency review of reporting cables, on the difference between research and development for purposes of Article V. It includes explicit confirmations submitted by Secretary of Defense Melvin Laird, Under Secretary for DDR&E John Foster, and Acting Chief of Staff of the Army General Palmer, all to Senator Jackson, that development and testing, as well as deployment, of space-based "exotic systems" were prohibited. Senator Jackson (D, Wash.), who was a sharp critic of SALT I but voted in favor of the ABM Treaty, understood this point clearly. He was probably the most knowledgeable Senator on the impact of SALT I on weapons programs. Finally, Senator James Buckley (R, NY) stated on the Senate floor on August 3, 1972 that he opposed the ABM Treaty and would vote *against* it largely because of this prohibition. He said:

"Thus the agreement goes so far as to prohibit the development, test or deployment of sea, air or space based ballistic missile defense systems. This clause, in article V of the ABM treaty, would have the effect, for example, of prohibiting the development and testing of a laser type system based in space which could at least in principle provide an extremely reliable and effective system of defense against ballistic missiles. The technological possibility has been formally excluded by this agreement."

The vote in favor of advice and consent to ratification was 88-2.

VIII

I resigned from government in June 1972 after the transmittal documents had been sent to Congress and before the hearings. While I later served at HEW as General Counsel and at HUD as Under Secretary between 1973 and 1977, I have had no official role in the SALT process since June 1972. I left behind at ACDA two complete file cabinets of all my working papers which I have not seen since 1972. I understand they were later sent to a warehouse by ACDA and the files cannot now be located although copies of some documents, including at least the last two drafts of my memoranda analyzing the ABM Treaty, were preserved by the JCS and perhaps in some other files.

In 1972-73 while in private practice, I coedited a book on SALT and wrote chapter 5 on "The SALT I Agreements." I have attached to this statement the pages from

that chapter (Willrich and Rhinelander (editors), SALT: The Moscow Agreements and Beyond (Free Press, 1974)) on the ABM Treaty (Exhibit D). Pages 128-29 and 134 are directly on point with respect to "exotic systems." They summarize my immediate recollection of the advice I gave to the U.S. delegation which was the basis for the Executive position before, during and after the ratification process. Prior to publication of the book, I informally cleared my chapter with government officials to ensure both accuracy and non-disclosure of sensitive information.

Over the past eight years, I have been informally queried on various issues by officials at the JCS, OSD, State, ACDA and the CIA. One question in the late 1970s was whether there were any deployment limits on fixed land-based "exotic systems." This question had been reopened in OSD, sharply debated with JCS supporting the traditional U.S. position, and then correctly resolved. This question also involved Agreed Statement D, but in this case the OSD argument was that there were no deployment limits under Article III on fixed land-based "exotic systems" and only an obligation to discuss. This is almost the exact reverse of the Reagan Administration's "reinterpretation" which now claims the deployment limits in Agreed Statement D prohibits only deployment of systems referred to in Articles III and V(1).

To the best of my knowledge, the challenge to Article V(1) within the Executive arose only recently although the Heritage Foundation circulated a Backgrounder dated April 4, 1985 rejecting the traditional interpretation. A footnote stated it was authored by an unnamed government official.

This past spring I co-authored with Tom Longstreth and John Pike a booklet on The Impact of U.S. and Soviet Ballistic Missile Defense Programs on the ABM Treaty, National Campaign to Save the ABM Treaty (March 1985). In April, I testified before this Subcommittee and excerpts from my formal statement were reprinted in Arms Control Today (May 1985). In July I presented a paper at a SIPRI conference which sets forth my most recent analyses and recommendations. A copy of the latter, as revised in August, is attached as Exhibit E. These documents reflect my views on the correct interpretations of the ABM Treaty and basic issues raised by current U.S. and Soviet BMD programs.

In my judgment, the FY85 Arms Control Impact Statement prepared by the Reagan Administration correctly states the agreement reached with the Soviets in 1971-72 on the meaning of Article V(1). It provides (pp. 251-52):

"The ABM Treaty bans the development, teasting and deployment of *all* ABM systems and components that are sea-based, air-based, space-based or mobile land-based. . . . The ABM Treaty prohibition on development, testing and deployment of space-based ABM systems, or components for such systems, *applies to directed energy technology (or any other technology used for this purpose.)* Thus, when such directed energy programs enter the field testing phase they become constrained by these ABM Treaty obligations." [Emphasis added.]

The SDI Report to Congress (April 1985), especially Appendix B, is consistent with this statement.

IX

In the Soviet parliamentary ratification deliberations, the First Deputy Minister of Foreign Affairs, Vasily V. Kuznetsov, "on behalf of the Soviet Government," gave the Presidium of the Supreme Soviet the official Soviet position on the ABM Treaty. He said that, "The sides pledge themselves not to create or develop ABM systems or components emplaced in the sea, the air or space or of a mobile ground type. * * *" He presented this as a clear obligation of the Treaty as a whole. (See Pravda, September 30, 1972, as translated in FBIS, Oct. 3, 1972).

Based on my review of available documents, the Soviets had not explicitly tied this interpretation to "exotic systems" in public until recently although their statements implicitly supported this as the only interpretation of the entire Treaty, including Article V(1). However, general Secretary Gorbachev's written response to *TIME* states, "In our view, it [SDI] is the first stage of the project to *develop a new ABM system prohibited under the Treaty of 1972.* See *TIME* (Sept. 9, 1985), p. 24. [Emphasis added.] (See also Soviet documents printed in *Ballistic Missile Defense Technologies* (OTA, 1985) pp. 312-15.)

Specific Soviet responses to the US "reinterpretation" which was made first on television and then repeated in the press are contained in FBIS on October 9 and 10. They include the translation of a TASS commentary and an English-language TASS article. The former, as translated by FBIS, includes:

"According to the CBS television company, one of the latest administration reports contains the 'conclusion' that the antimissile defense treaty, which strictly restricts the development [sozdaniye] of antimissiles, allegedly does not restrict the development [razrabotka] and testing of "exotic" types of weapons—Laser and beam weapons—at all. It is quite clear which way such "interpreters" are taking the matter. Having just the other day tested land-based laser installations, the United States is now planning to site a laser weapon on board a space-craft and test it directly in space.

"It would evidentally not be inappropriate to remind some people in Washington yet again that the antimissile defense treaty (Article 5) prohibits both the development [sozadaniey] and testing of space-based antimissile defense systems or components. The treaty provisions relate to any systems designed, as defined by Article 2, for fighting against strategic ballistic missiles or their elements on flight trajectories. Since the antimissile defense components being created within the "star wars" program are designed for precisely this purpose, that is are intended to replace the antimissiles mentioned in the treaty (or to act together with antimissiles), all provisions of the treaty relate to these, regardless of the degree of 'exoticness' of their principles of operation. It is high time the irresponsible "interpreters" [tolkovaterli] from Washington gave up their useless and dangerous occupation, listened to the voice of the world public, which they are trying to delude, and directed their efforts to positive goals. And they do have something to think over: The set of Soviet initiatives offers broad scope for constructivism."

Finally, Marshal Sergei Akhormeyev, the Chief of the Soviet General Staff, made lengthy comments in an article in Pravda. He said the ABM Treaty "unambiguously bans" the development, testing and deployment of space-based ABM systems. See New York Times, October 19, 1985 (Exhibit F). Marshall Akhromeyev explictly confirms the historic U.S. position of the ban on space-based "exotic systems." The Subcommittee should obtain the full FBIS translation of these comments as soon as they are available and include them in the record of these hearings.

The Administration's justification for its "reinterpretation" is that the Soviets cannot be held to comply with the historic U.S. position. Instead of reinterpretating the clear text of the 1972 Treaty based on a selective review of the classified U.S. negotiating records, the better approach would have been to ask the Soviet negotiators in private in Geneva (and specifically Ambassador Karpov who had a crucial role on this issue at SALT I) whether or not the Soviet Union agrees that Article V(1) bans the developments, testing and deployment of "exotic systems." If the private Soviet response had been "no," then the Administration's "reinterpretation" would have been justified.

If the private Soviet response in Geneva were "yes," as one would expect from their public statements since 1972, then the October 6 "reinterpretation" and the October 13 recanting by the Administration would have been unnecessary. Agreed Statements on the basic points could have been quickly negotiated if deemed necessary for clarity.

If a private but positive Soviet response in Geneva were now rejected by the U.S. as "too late" because the U.S. wanted to keep open the option of reasserting its "reinterpretation," then the OSD motive behind the initial change in U.S. position—to erode immediately and eventually destroy the ABM Treaty—would be clear.

X

As I have testified, written and spoken in various forums in the past two years, the challenge now is to strengthen the ABM Treaty through specific, mutual and verifiable Agreed Statements and Common Understandings. Six former Secretaries of Defense endorsed the importance of the Treaty and the need to strengthen it before this controversy broke (see Exhibit G).

Of course the Soviets must become responsive on the Krasnoyarsk radar which appears to be a clear violation. The booklet I co-authored this spring contains a series of specific recommendations (see Exhibit H) which were intended to start a constructive process consistent with Secretary Shultz's stated goal of reversing the erosion of the ABM Treaty.

In conclusion, let me suggest approaches for three Agreed Statements based upon, and entirely consistent with, my recollection of the SALT I negotiating record which would clarify the overall scope of the ABM Treaty, particularly Article V(1):

(1) First Agreed Statement to Article II(1). As used in this Treaty, "AMB systems." "ABM systems or components," "ABM systems and components" and "ABM systems or their components" include ABM interceptor missiles, ABM launchers, and ABM radars as defined in Article II(1) and any devices based on other physical principles which are capable of substituting for or performing the functions of ABM interceptor missiles, ABM launchers, or ABM radars.

(2) First Agreed Statement to Article V(1). Article V(1) applies to ABM components and any devices based on other physical principles which are capable of substituting for or performing the functions of ABM components, any of which are sea-based, air-based, space-based or mobile land-based.

(3) Second Agreed Statement to Article V(1). As used in Article V(1), "develop"

refers to that stage of the research and development cycle at which field testing, observable by national technical means, is initiated on ABM components or on any devices which are capable of substituting for or performing the functions of ABM components.

The third suggestion is obviously incomplete. It points out the compelling need to begin the difficult process of resolving some of the ambiguities inherent in the ABM Treaty. The Standing Consultative Commission (SCC) was established with this as one of its assigned tasks. The SCC has been underutilized. The SCC could easily, and quickly, also review and revise Agreed Statement D to make its intended meaning clearer. A starter in replacing Agreed Statement D could be:

First Agreed Statement to Article III. Article III prohibits the deployment of fixed land-based devices based on other physical principles which are capable of substituting for or performing the functions of fixed land-based ABM systems or components as defined in Article II(1).

First Agreed Statement to Article IV. Fixed land-based devices based on other physical principles which are capable of substituting for or performing the functions of ABM components as defined in Article II(1) may be developed and tested at ABM test ranges described in Article IV.

First Agreed Statement to Article XIV(1). Any obligation in this Treaty may be discussed in accordance with Article XIII and an amendment adopted in accordance with Article XIV.

The six suggested Agreed Statements do not even touch on the question of distinguishing a "component," or device capable of substituting for or performing the function of a component, from a "subcomponent," assembly, adjunct, etc., or the equally difficult question of distinguishing ABM-related space-based sensors from space-based sensors for early warning or for other purposes. Counting rules, presumptions, and ad hoc approaches will all be necessary. These challenges will be truly difficult even with the best of intents.

Before constructive steps can start, however, and assuming the Soviets are prepared to negotiate and not just posture, the President should publicly repudiate the legal advice he has recently received from his advisors on a narrow scope of Article V(1) and other critical Articles of the ABM Treaty. Congress could contribute to this result by approving an amendment to the pending DOD appropriations bill which limits fund expenditures to the legal standard in the FY85 Arms Control Impact Statement. This would be a positive step as negotiations continue with the Soviets prior to the Summit.

This whole sorry business could lead to a constructive ending if the U.S. and Soviets were to agree privately in Geneva, before, at or after the Summit, on Agreed Statements along the lines that I have suggested. These should be only the first of many steps needed to avoid further erosion of the ABM Treaty of 1972.

TREATY BETWEEN THE UNITED STATES OF AMERICA AND THE UNION OF SOVIET SOCIALIST REPUBLICS ON THE LIMITATION OF ANTI-BALLISTIC MISSILE SYSTEMS

Signed at Moscow May 26, 1972
Ratification advised by U.S. Senate August 3, 1972
Ratified by U.S. President September 30, 1972
Proclaimed by U.S. President October 3, 1972
Instruments of ratification exchanged October 3, 1972
Entered into force October 3, 1972

The United States of America and the Union of Soviet Socialist Republics, hereinafter referred to as the Parties,

Proceeding from the premise that nuclear war would have devastating consequences for all mankind,

Considering that effective measures to limit anti-ballistic missile systems would be a substantial factor in curbing the race in strategic offensive arms and would lead to a decrease in the risk of outbreak of war involving nuclear weapons,

Proceeding from the premise that the limitation of anti-ballistic missiles systems, as well as certain agreed measures with respect to the limitation of strategic offensive arms, would contribute to the creation of more favorable conditions for further negotiations on limiting strategic arms,

Mindful of their obligations under Article VI of the Treaty on the Non-Proliferation of Nuclear Weapons,

Declaring their intention to achieve at the earliest possible date the cessation of the nuclear arms race and to take effective measures toward reductions in strategic arms, nuclear disarmament, and general and complete disarmament,

Desiring to contribute to the relaxation of international tension and the strengthening of trust between States,

Have agreed as follows:

ARTICLE I

1. Each party undertakes to limit anti-ballistic missile (ABM) systems and to adopt other measures in accordance with the provisions of this Treaty.

2. Each Party undertakes not to deploy ABM systems for a defense of the territory of its country and not to provide a base for such a defense, and not to deploy ABM systems for defense of an individual region except as provided for in Article III of this Treaty.

ARTICLE II

1. For the purpose of this Treaty an ABM system is a system to counter strategic ballistic missiles or their elements in flight trajectory, currently consisting of:

(a) ABM interceptor missiles, which are interceptor missiles constructed and deployed for an ABM role, or of a type tested in an ABM mode;

(b) ABM launchers, which are launchers constructed and deployed for launching ABM interceptor missiles; and

(c) ABM radars, which are radars constructed and deployed for an ABM role, or of a type tested in an ABM mode.

2. The ABM system components listed in paragraph 1 of this Article include those which are:

(a) operational;

(b) under construction;

(c) undergoing testing;

(d) undergoing overhaul, repair or conversion; or

(e) mothballed.

ARTICLE III

Each Party undertakes not to deploy ABM systems or their components except that:

(a) within one ABM system deployment area having a radius of one hundred and fifty kilometers and centered on the Party's national capital, a party may deploy: (1) no more than one hundred ABM launchers and no more than one hundred ABM interceptor missiles at launch sites, and (2) ABM radars within no more than six ABM radar complexes, the area of each complex being circular and having a diameter of no more than three kilometers; and

(b) within one ABM system deployment area having a radius of one hundred and fifty kilometers and containing ICBM silo launchers, a Party may deploy: (1) no more than one hundred ABM launchers and no more than one hundred ABM interceptor missiles at launch sites, (2) two large phased-array ABM radars comparable in potential to corresponding ABM radars operational or under construction on the date of signature of the Treaty in an ABM system deployment area containing ICBM silo launchers, and (3) no more than eighteen ABM radars each having a potential less than the potential of the smaller of the above-mentioned two large phased-array ABM radars.

ARTICLE IV

The limitations provided for in Article III shall not apply to ABM systems or their components used for development or testing, and located within current or additionally agreed test ranges. Each Party may have no more than a total of fifteen ABM launchers at test ranges.

ARTICLE V

1. Each Party undertakes not to develop, test, or deploy ABM systems or components which are sea-based, air-based, space-based, or mobile land-based.

2. Each Party undertakes not to develop, test, or deploy ABM launchers for launching more than one ABM interceptor missile at a time from each launcher, not to modify deployed launchers to provide them with such a capability, not to develop, test, or deploy automatic or semi-automatic or other similar systems for rapid reload of ABM launchers.

ARTICLE VI

To enhance assurance of the effectiveness of the limitations on ABM systems and their components provided by the Treaty, each Party undertakes:

(a) not to give missiles, launchers, or radars, other than ABM interceptor missiles, ABM launchers, or ABM radars, capabilities to counter strategic ballistic missiles or their elements in flight trajectory, and not to test them in an ABM mode, and

(b) not to deploy in the future radars for early warning of strategic ballistic missile attack except at locations along the periphery of its national territory and oriented outward.

ARTICLE VII

Subject to the provisions of this Treaty, modernization and replacement of ABM systems or their components may be carried out.

ARTICLE VIII

ABM systems or their components in excess of the numbers or outside the areas specified in this Treaty, as well as ABM systems or their components prohibited by this Treaty, shall be destroyed or dismantled under agreed procedures within the shortest possible agreed period of time.

ARTICLE IX

To assure the viability and effectiveness of this Treaty, each Party undertakes not to transfer to other States, and not to deploy outside its national territory, ABM systems or their components limited by this Treaty.

ARTICLE X

Each Party undertakes not to assume any international obligations which would conflict with this Treaty.

ARTICLE XI

The Parties undertake to continue active negotiations for limitations on strategic offensive arms.

ARTICLE XII

1. For the purpose of providing assurance of compliance with the provisions of this Treaty, each Party shall use national technical means of vertification at its disposal in a manner consistent with generally recognized principles of international law.

2. Each Party undertakes not to interfere with the national technical means of verification of the other Party operating in accordance with paragraph 1 of this Article.

3. Each Party undertakes not to use deliberate concealment measures which impede verification by national technical means of compliance with the provisions of this Treaty. This obligation shall not require changes in current construction, assembly, conversion, or overhaul practices.

ARTICLE XIII

1. To promote the objectives and implementation of the provisions of this Treaty, the Parties shall establish promptly a Standing Consultative Commission, within the framework of which they will:

(a) consider questions concerning compliance with the obligations assumed and related situations which may be considered ambiguous;

(b) provide on a voluntary basis such information as either Party considers necessary to assure confidence in compliance with the obligations assumed;

(c) consider questions involving unintended interference with national technical means of verification;

(d) consider possible changes in the strategic situation which have a bearing on the provisions of this Treaty;

(e) agree upon procedures and dates for destruction or dismantling of ABM systems or their components in cases provided for by the provisions of this Treaty;

(f) consider, as appropriate, possible proposals for further increasing the viability of this Treaty; including proposals for amendments in accordance with the provisions of this Treaty;

(g) consider, as appropriate, proposals for further measures aimed at limiting strategic arms.

2. The Parties through consultation shall establish, and may amend as appropriate, Regulations for the Standing Consultative Commission governing procedures, composition and other relevant matters.

ARTICLE XIV

1. Each Party may propose amendments to this Treaty. Agreed amendments shall enter into force in accordance with the procedures governing the entry into force of this Treaty.

2. Five years after entry into force of this Treaty, and at five-year intervals thereafter, the Parties shall together conduct a review of this Treaty.

ARTICLE XV

1. This Treaty shall be of unlimited duration.

2. Each Party shall, in exercising its national sovereignty, have the right to withdraw from this Treaty if it decides that extraordinary events related to the subject matter of this Treaty have jeopardized its supreme interests. It shall give notice of its decision to the other Party six months prior to withdrawal from the Treaty. Such notice shall include a statement of the extraordinary events the notifying Party regards as having jeopardized its supreme interests.

ARTICLE XVI

1. This Treaty shall be subject to ratification in accordance with the constitutional procedures of each Party. The Treaty shall enter into force on the day of the exchange of instruments of ratification.

2. This Treaty shall be registered pursuant to Article 102 of the Charter of the United Nations.

Done at Moscow on May 26, 1972, in two copies, each in the English and Russian languages, both texts being equally authentic.

For the United States of America: RICHARD NIXON, *President of the United States of America.*

For the Union of Soviet Socialist Republics: L.I. BREZHNEV, *General Secretary of the Central Committee of the CPSU.*

AGREED STATEMENTS, COMMON UNDERSTANDINGS, AND UNILATERAL STATEMENTS REGARDING THE TREATY BETWEEN THE UNITED STATES OF AMERICA AND THE UNION OF SOVIET SOCIALIST REPUBLICS ON THE LIMITATION OF ANTI-BALLISTIC MISSILES

1. AGREED STATEMENTS

The document set forth below was agreed upon and initiated by the Heads of the Delegations on May 26, 1972 (letter designations added):

AGREED STATEMENTS REGARDING THE TREATY BETWEEN THE UNITED STATES OF AMERICA AND THE UNION OF SOVIET SOCIALIST REPUBLICS ON THE LIMITATION OF ANTI-BALLISTIC MISSILE SYSTEMS

[A]

The Parties understand that, in addition to the ABM radars which may be deployed in accordance with subparagraph (a) of Article III of the Treaty, those non-phased-array ABM radars operational on the date of signature of the Treaty within the ABM system deployment area for defense of the national capital may be retained.

[B]

The Parties understand that the potential (the product of mean emitted power in watts and antenna area in square meters) of the smaller of the two large phased-array ABM radars referred to in subparagraph (b) of Article III of the Treaty is considered for purposes of the Treaty to three million.

[C]

The Parties understand that the center of the ABM system deployment area centered on the national capital and the center of the ABM system deployment area containing ICBM silo launchers for each Party shall be separated by no less than thirteen hundred kilometers.

[D]

In order to insure fulfillment of the obligation not to deploy ABM systems and their components except as provided in Article III of the Treaty, the Parties agree that in the event ABM systems based on other physical principles and including components capable of substituting for ABM interceptor missiles. ABM launchers, or ABM radars are created in the future, specific limitations on such systems and their components would be subject to discussion in accordance with Article XIII and agreement in accordance with Article XIV of the Treaty.

[E]

The Parties understand that Article V of the Treaty includes obligations not to develop, test or deploy ABM interceptor missiles for the delivery by each ABM interceptor missile of more than one independently guided warhead.

[F]

The Parties agree not to deploy phased-array radars having potential (the product of mean emitted power in watts and antenna area in square meters) exceeding three million, except as provided for in Articles III, IV and VI of the Treaty, or except for the purposes of tracking objects in outer space or for use as national technical means of verification.

[G]

The Parties understand that Article IX of the Treaty includes the obligation of the US and the USSR not to provide to other States technical descriptions or blue prints specially worked out for the construction of ABM systems and their components limited by the Treaty.

2. COMMON UNDERSTANDINGS

Common understanding of the Parties on the following matters was reached during the negotiations:

A. Location of ICBM defenses

The U.S. Delegation made the following statement on May 26, 1972:

Article III of the ABM Treaty provides for each side one ABM system deployment area centered on its national capital and one ABM system deployment area containing ICBM silo launchers. The two sides have registered agreement on the following statement: "The Parties understand that the center of the ABM system deployment area centered on the national capital and the center of the ABM system deployment area containing ICBM silo launchers for each Party shall be separated by no less than thirteen hundred kilometers." In this connection, the U.S. side notes that its ABM system deployment area for defense of ICBM silo launchers, located west of the Mississippi River, will be centered in the Grand Forks ICBM silo launcher deployment area. (See Agreed Statement [C].)

B. ABM test ranges

The U.S. Delegation made the following statement on April 26, 1972:

Article IV of the ABM Treaty provides that "the limitations provided for in Article III shall not apply to ABM systems or their components used for development or testing, and located within current or additionally agreed test ranges." We believe it would be useful to assure that there is no misunderstanding as to current ABM test ranges. It is our understanding that ABM test ranges encompass the area within which ABM components are located for test purposes. The current U.S. ABM test ranges are at White Sands, New Mexico, and at Kwajalein Atoll, and the current Soviet ABM test range is near Sary Shagan in Kazakhstan. We consider that non-phased array radars of types used for range safety or instrumentation purposes may be located outside of ABM test ranges. We interpret the reference in Article IV to "additionally agreed test ranges" to mean that ABM components will not be located at any other test ranges without prior agreement between our Governments that there will be such additional ABM test ranges.

On May 5, 1972, the Soviet Delegation stated that there was a common under-

standing on what ABM test ranges were, that the use of the types of non-ABM radars for range safety or instrumentation was not limited under the Treaty, that the reference in Article IV to "additionally agreed" test ranges was sufficiently clear, and that national means permitted identifying current test ranges.

C. Mobile ABM systems

On January 29, 1972, the U.S. Delegation made the following statement:

Article V(1) of the Joint Draft Text of the ABM Treaty includes an undertaking not to develop, test, or deploy mobile land-based ABM systems and their components. On May 5, 1971, the U.S. side indicated that, in its view, a prohibition on deployment of mobile ABM systems and components would rule out the deployment of ABM launchers and radars which were not permanent fixed types. At that time, we asked for the Soviet view of this interpretation. Does the Soviet side agree with the U.S. side's interpretation put forward on May 5, 1971?

On April 13, 1972, The Soviet Delegation said there is a general common understanding on this matter.

D. Standing consultative commission

Ambassador Smith made the following statement on May 22, 1972:

The United States proposes that the sides agree that, with regard to initial implementation of the ABM Treaty's Article XIII on the Standing Consultative Commission (SCC) and of the consultation Articles to the Interim Agreement on offensive arms and the Accidents Agreement,[1] agreement establishing the SCC will be worked out early in the follow-on SALT negotiations; until that is completed, the following arrangements will prevail; when SALT is in session, any consultation desired by either side under these Articles can be carried out by the two SALT Delegations; when SALT is not in session, *ad hoc* arrangements for any desired consultations under these Articles may be made through diplomatic channels.

Minister Semenov replied that, on an *ad referendum* basis, he could agree that the U.S. statement corresponded to the Soviet understanding.

E. Standstill

On May 6, 1972, Minister Semenov made the following statement:

In an effort to accommodate the wishes of the U.S. side, the Soviet Delegation is prepared to proceed on the basis that the two sides will in fact observe the obligations of both the Interim Agreement and the ABM Treaty beginning from the date of signature of these two documents.

In reply, the U.S. Delegation made the following statement on May 20, 1972:

The U.S. agrees in principle with the Soviet statement made on May 6 concerning observance of obligations beginning from date of signature but we would like to make clear our understanding that this means that, pending ratification and acceptance, neither side would take any action prohibited by the agreements after they had entered into force. This understanding would continue to apply in the absence of notification by either signatory of its intention not to proceed with ratification or approval.

The Soviet Delegation indicated agreement with the U.S. statement.

[1] See Article 7 of Agreement to Reduce the Risk of Outbreak of Nuclear War Between the United States of America and the Union of Soviet Socialist Republics, signed Sept. 30, 1971.

3. UNILATERAL STATEMENTS

The following noteworthy unilateral statements were made during the negotiations by the United States Delegation:

A. Withdrawal from the ABM Treaty

On May 9, 1972, Ambassador Smith made the following statement:

The U.S. Delegation has stressed the importance U.S. Government attaches to achieving agreement on more complete limitations on Strategic offensive arms, following agreement on an ABM Treaty and on an Interim Agreement on certain measures with respect to the limitation of strategic offensive arms. The U.S. Delegation believes that an objective of the follow-on negotiations should be to constrain and reduce on a long-term basis threats to the survivability of our respective strategic retaliatory forces. The USSR Delegation has also indicated that the objectives of SALT would remain unfulfilled without the achievement of an agreement providing for more complete limitations on strategic offensive arms. Both sides recognize that the initial agreement would be steps toward the achievement of more complete limitations on strategic arms. If an agreement providing for more complete strategic offensive arms limitations were not achieved within five years, U.S. supreme interests could be jeopardized. Should that occur, it would constitute a basis for withdrawal for the ABM Treaty. The U.S. does not wish to see such a situation occur, nor do we believe that the USSR does. It is because we wish to prevent such a situation that we emphasize the importance the U.S. Government attaches to achievement of more complete limitations on strategic offensive arms. The U.S. Executive will inform the Congress, in connection with Congressional consideration of the ABM Treaty and the Interim Agreement, of this statement of the U.S. position.

B. Tested in ABM mode

On April 7, 1972, the U.S. Delegation made the following statement:

Article II of the Joint Text Draft uses the term "tested in an ABM mode," in defining ABM components, and Article VI includes certain obligations concerning such testing. We believe that the sides should have a common understanding of this phase. First, we would note that the testing provisions of the ABM Treaty are intended to apply to testing which occurs after the date of signature of the Treaty, and not to any testing which may have occurred in the past. Next, we would amplify the remarks we have made on this subject during the previous Helsinki phase by setting forth the objectives which govern the U.S. view on the subject, namely, while prohibiting testing of non-ABM components for ABM purposes: not to prevent testing of ABM components, and not to prevent testing of non-ABM components for non-ABM purposes. To clarify our interpretation of "tested in an ABM mode," we note that we would consider a launcher, missile or radar to be "tested in an ABM mode" if, for example, any of the following events occur: (1) a launcher is used to launch an ABM interceptor missile, (2) an interceptor missile is flight tested against a target vehicle which has a flight trajectory with characteristics of a strategic ballistic missile flight trajectory, or is flight tested in conjunction with the test of an ABM interceptor missile or an ABM radar at the same test range, or is flight tested to an altitude inconsistent with interception of targets against which air defenses are deployed, (3) a radar makes measurements on a cooperative target vehicle of the kind referred to in item (2) above during the reentry portion of its trajectory or makes measurements in conjunction with the test of an ABM interceptor missile or an ABM radar at the same test range. Radars used for purposes such as range safety or instrumentation would be exempt from application of these criteria.

C. No-transfer article of ABM Treaty

On April 18, 1972, the U.S. Delegation made the following statement:

In regard to this Article [IX], I have a brief and I believe self-explanatory statement to make. The U.S. side wishes to make clear that the provisions of this Article do not set a precedent for whatever provision may be considered for a Treaty on Limiting Strategic Offensive Arms. The question of transfer of strategic offensive arms is a far more complex issue, which may require a different solution.

D. No increase in defense of early warning radars

On July 28, 1970, the U.S. Delegation made the following statement:

Since Hen House radars [Soviet Ballistic missile early warning radars] can detect and track ballistic missile warheads at great distances, they have a significant ABM potential. Accordingly, the U.S. would regard any increase in the defenses of such radars by surface-to-air missiles as inconsistent with an agreement.

WHITE HOUSE REVISES INTERPRETATION OF ABM TREATY

(By Don Oberdorfer)

The Reagan administration, reversing the legal interpretation of previous administrations and some of its own past statements, has denied that testing and development except antiballistic missile systems such as these in the "Star Wars" program are permitted under the 1972 ABM treaty.

The administration's new interpretation of the treaty was confirmed yesterday by a senior White House official who briefed reporters on U.S. objections to the recent Soviet offer of a 50 percent cut in certain offensive missiles in return for a ban on Reagan's Strategic Defense Initiative, or Star Wars. The Soviet offer was described in the briefing as "a place to start" but in its present form one-sided and threatening to U.S. security.

White House national security affairs adviser Robert C. McFarlane volunteered a new interpretation of the 13-year-old Antiballistic Missile treaty in a television program Sunday. Yesterday the senior White House official, who cannot be identified under the ground rules of the news briefing, confirmed that McFarlane's televised remarks reflected what is now the fixed policy of the administration.

Retired ambassador Gerard Smith, chief U.S. negotiator of the ABM treaty, said the administration's interpretation "makes a dead letter" of the treaty. Smith said he believes it would make possible almost unlimited testing and development under Star Wars, and probably also actual "building" of the space-based antimissile system "as long as you did not deploy."

Administration sources said a new interpretation of the treaty had been under discussion and, at times, intense debate since last summer within the administration's Senior Arms Control Group, or SAC-G.

The administration was moving in the direction indicated by McFarlane in recent

weeks—though not to the point of claiming the treaty "authorized and approved" the testing, which were the words McFarlane used Sunday. In administration discussions, sources said, the issue was whether the treaty could be interpreted as permitting such activities. A final decision was "not completely clear" even after McFarlane made his remarks on "Meet the Press," an official said.

One official said the still-secret negotiating record of the ABM treaty is "ambiguous" on the point in question and subject to "a well justified disagreement" within the government. However, this view is disputed by Smith and John Rhinelander, legal counsel to the U.S. delegation that negotiated the ABM treaty.

The nub of the issue is whether an "agreed statement D" between the U.S. and Soviet delegations at the time of the treaty signing on May 26, 1972, gives a broad exemption from the restrictions of the treaty for future types of ABM systems "based on other physical principles" such as lasers and directed-energy weapons. Many elements of the administration's Star Wars research program are based on such exotic technology.

The purpose of agreed statement D, it said, was "to insure fulfillment of the obligation not to deploy ABM systems and their components except as provided in Article III of the treaty," which originally allowed both countries to maintain two conventional ABM systems, based on antimissile missiles.

The agreed statement said that if new ABM systems "based on other physical principles" are created in the future, "specific limitations on such systems and their components would be subject to discussion . . . and agreement in accordance with Article XIV of the treaty"—the article explaining how the treaty could be formally amended.

Until the administration's recent change of mind, that had been interpreted to mean that testing and development of exotic technologies were not legal, except possibly for new versions of fixed, land-based systems that the treaty allowed. Article V of the treaty formally precluded any testing or deployment of "ABM systems or components which are sea-based, air-based, space-based or mobile land-based."

Previously the administration's plans for tests of elements of Star Wars have been justified as complying with the ABM treaty on completely different grounds: that these projects were of such low quality, power or reliability that they did not qualify as "components" of an ABM system, or that they could be modified so as not to appear to be part of an illegal system.

Smith and Rhinelander said it was wrong to interpret the "agreed statement" as sanctioning testing of ABM systems or components that are flatly ruled out elsewhere in the treaty. "It is just impossible that an agreed statement supersedes a provision of the treaty," Smith said.

The administration's 1983, 1984 and 1985 Arms Control Impact Statements submitted to Congress by the Arms Control and Disarmament Agency took the position that the ABM treaty does put restrictions on ABM programs based on "directed energy technology" or other exotic technology "when such DE programs enter the field testing stage." The 1986 Arms Control Impact Statement, submitted this April, omitted that statement. The senior official who confirmed the administration's current position said the Soviet Union had never accepted an interpretation of the treaty that banned "research, testing, development of systems based on other physical principles."

The official said there had been "unilateral statements" made that the treaty ought to limit such exotic systems but he added that "never have the Soviets bought that."

The proposed cutbacks in the new Soviet arms control offer are "inappropriately linked" to the demand that the United States stop its Star Wars program, the senior official told reporters yesterday. "It's a precondition that must be dropped," he said.

That the Soviets have made an offer of deep cuts is "a very good development," and a sign that Reagan's policies have paid off, the official said. U.S. negotiators will pursue the details in Geneva, he added.

Most of the White House presentation, though, was centered on objections to the Soviet proposal, especially inclusion of U.S. Euromissiles and "forward based systems" among the strategic weapons to be cut by half. This would produce "highly unequal" forces with great advantages to Moscow, the official said.

Those two categories described as support for U.S. allies, were said to consume 1,149 of the U.S. entitlement of 1,680 strategic nuclear delivery systems under the Soviet plan. The United States would thus have only 531 missiles or bombers left for deterrence against Soviet nuclear attack, and these would be threatened by a much larger number of Soviet weapons.

The White House also said the Soviet proposal might unfairly hamper U.S. military modernization and could have serious verification problems. These aspects of the Soviet proposal have yet to be fully presented in Geneva, it said.

[From the New York Times, Oct. 14, 1985]

SHADOW ON THE SUMMIT

(By Anthony Lewis)

BOSTON.—It is only a matter of words—a Washington word game, you might say. But the players are after very large stakes. If their gambit works, it will sabotage next month's Reagan-Gorbachev summit meeting. And they have an even more ambitious goal: to remove all constraints on the nuclear arms race.

The game, little noticed outside of Washington, is being played with the words of the 1972 Anti-Ballistic Missile Treaty between the United States and the Soviet Union. For 13 years the treaty has been universally understood to mean what it says: that any ABM system based in space is outlawed. Now the claim is that it means the opposite. Out is in. Down is up.

This amazing proposition was first publicly advanced on television last week by President Reagan's national security adviser. Robert McFarlane. He said the 1972 treaty "approved and authorized" development and testing of space-based ABM systems "involving new physical concepts" such as lasers or directed energy.

In other words, President Reagan's Star Wars program can push ahead without any concern about the ABM treaty. But just last year the Reagan Administration said in a formal statement:

"The ABM treaty prohibition on development, testing and deployment of space-based ABM systems or components for such systems applies to directed-energy technology or any other technology used for this purpose. Thus, when such directed-energy programs enter the field-testing phase, they become constrained by these ABM treaty obligations."

How can that plain meaning have been transformed? By an "interpretation" that ought to embarrass the most brazen lawyer in town.

Article 3 of the 1972 treaty allowed a limited number of fixed, land-based ABM's. Article 5 banned the development, testing and deployment of "sea-based, air-based, space-based or mobile land-based" systems. Then, in "Agreed Statement D," the parties said they would discuss "specific limitations" on exotic new ABM systems if they were "created in the future."

The claim is that statement D permits new kinds of ABM systems unless the parties now agree to limit them. But the American diplomats who negotiated it say the purpose was the opposite. And statement D itself begins by saying that its purpose is "to insure fulfillment of the obligations not to deploy ABM systems and their components except as provided in Article 3."

An old national security hand, asked about the new "interpretation" of the treaty, said: "You've got to admire their brass. They have interpreted it 180 degrees from its intent. The idea is so preposterous that it would be amusing if it were not so serious."

The serious part is the consequences. The new reading would make the ABM treaty "a dead letter," as its chief negotiator, Gerard Smith, said last week. And it will have been killed in a way that casts doubt on the point of making any arms control agreements with the United States.

Treaties are meant to be serious undertakings. This one was negotiated for a purpose that all the world understood, to limit defensive systems. The United States Senate consented to the treaty by a vote of 88 to 2. Thirteen years later America would be telling the world: "The terms are inconvenient to us now, so on second thought they mean nothing."

The summit meeting would almost certainly be doomed to failure if President Reagan now adopts the new reading of the ABM treaty. This meeting is to focus on arms control, and what would be left to say if the United States had just in effect renounced the main existing arms agreement? Mr. Gorbachev would have a propaganda field day.

For all practical purposes, the whole idea of arms control would be dead. With the restraints on defensive systems gone, the Soviet Union would hardly proceed with its recent proposal to cut back on offensive weapons. The impulse would be to an all-out arms race, offensive and defensive.

With consequences so serious, for President Reagan personally and for international security, why would anyone in the Reagan Administration be pushing to read the ABM treaty out of existence? The answer is that the man who surely started this game of words wants the summit to fail and wants all arms control to end.

Richard Perle, Assistant Secretary of Defense, is the Administration's principal thinker on these issues—and is utterly opposed to arms control. The rereading of the ABM treaty has the stamp on it of his clever mind, and his ability to get ideas through the bureaucracy. But Secretary of State Shultz has not yet approved this idea, and there is still a chance that he will try to protect the President from this self-inflicted wound.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mrs. COLLINS (at the request of Mr. WRIGHT), for today, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. BLAZ) to revise and extend their remarks and include extraneous material:)

Mr. PARRIS, for 60 minutes, October 30, 1985.

Mr. PARRIS, for 60 minutes, October 31, 1985.

Mr. PARRIS, for 60 minutes, November 1, 1985.

(The following Members (at the request of Mr. WILLIAMS) to revise and extend their remarks and include extraneous material:)

Mr. BARNES, for 5 minutes, today.

Mr. NELSON of Florida, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. MONTGOMERY, for 5 minutes, today.

Mr. GONZALEZ, for 60 minutes, today.

Mr. GAYDOS, for 30 minutes, October 29, 1985.

Mr. GAYDOS, for 30 minutes, October 30, 1985.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. JACOBS, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $2,962.

Mr. BERMAN, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $4,506.

(The following Members (at the request of Mr. BLAZ) and to include extraneous matter:)

Mr. MILLER of Washington.

Ms. SNOWE in two instances.

Mr. KINDNESS.

Mr. MOORHEAD.

Mr. GILMAN.

Mr. VANDER JAGT.

(The following Members (at the request of Mr. WILLIAMS) and to include extraneous matter:)

Mr. MONTGOMERY.

Mr. MAVROULES.

Mr. ANDERSON in 10 instances.

Mr. GONZALEZ in 10 instances.

Mr. HAMILTON.

Mr. BROWN of California in 10 instances.

Mr. ANNUNZIO in six instances.

Mr. JONES of Tennessee in 10 instances.

Mr. BONER of Tennessee in five instances.

Mr. MORRISON of Connecticut.

Mr. SAVAGE.

Mr. LANTOS.

Mr. FASCELL in two instances.

Mr. MRAZEK.

Mr. LEHMAN of California.

Mr. HOWARD.

Mr. ROYBAL.

Ms. OAKAR.

Mr. MARKEY.

Mr. KASTENMEIER.

Mr. CONYERS.

Mr. BENNETT.

Mr. DYMALLY.

Mr. KANJORSKI in four instances.

SENATE JOINT RESOLUTIONS AND CONCURRENT RESOLUTION REFERRED

Joint resolutions and a concurrent resolution of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 207. Joint resolution to designate November 1, 1985, as "National Philanthropy Day"; to the Committee on Post Office and Civil Service.

S.J. Res. 228. Joint resolution relating to the proposed sales of arms to Jordan; to the Committee on Foreign Affairs.

S. Con. Res. 76. Concurrent resolution asking that the President bring the rights of the Polish people to the attention of the Soviet Government; to the Committee on Foreign Affairs.

ENROLLED BILL SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 2409. An act to amend the Public Health Service Act to revise and extend to the authorities under that act relating to the National Institutes of Health and National Research Institutes, and for other purposes.

ADJOURNMENT

Mr. GONZALEZ. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 22 minutes p.m.), the House adjourned until tomorrow, Tuesday, October 29, 1985, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2186. A letter from the Acting Assistant Attorney General for Legislative and Intergovernmental Affairs, transmitting a draft of proposed legislation to amend title 28, and title 11 of the United States Code to provide for the appointment of United States trustees to supervise the administration of bankruptcy cases in judicial districts throughout the United States and for other purposes; to the Committee on the Judiciary.

2187. A letter from the Administrator, National Aeronautics and Space Administration, transmitting notice of proposed construction of NASA research and development facilities exceeding $500,000, pursuant to Public Law 98-361, section 101(e); to the Committee on Science and Technology.

2188. A letter from the Principal Deputy Assistant Secretary of Defense (Comptroller), transmitting notification of the transfers of authorizations and appropriations of DOD funds, pursuant to Public Law 97-252, section 1101, Public Law 97-377, section 732, Public Law 98-94, section 1201(c), Public Law 98-212, secton 729, Public Law 98-473, section 8025, and Public Law 98-525, section 1501; jointly, to the Committees on Armed Services and Appropriations.

2189. A letter from the Comptroller General, General Accounting Office, transmitting the examination of the Commodity Credit Corporation's Financial Statements for the year ended September 30, 1984, pursuant to 31 U.S.C. 9106(a). jointly, to the Committees on Government Operations, Foreign Affairs and Agriculture.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. ROSTENKOWSKI. Committee on Ways and Means. H.R. 2817. A bill to amend the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, and for other purposes; with an amendment (Rept. 99-253, Pt. 2. Ordered to be printed.

Mr. WHITTEN. Committee on Appropriations. Report pursuant to section 302 of the Congressional Budget Act of 1974 (Rept. 99-333). Referred to the Committee of the Whole House on the State of the Union.

Mr. CONYERS. Committee on the Judiciary. H.R. 2713. A bill to amend title 18, United States Code, to modify certain provisions pertaining to restitution, and for other purposes; with an amendment (Rept. 99-334). Referred to the Committee of the Whole House on the State of the Union.

Mr. CONYERS. Committee on the Judiciary. H.R. 3511. A bill to amend title 18, United States Code, with respect to certain bribery and related offenses (Rept. 99-335). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ROYBAL (for himself, Mr. BIAGGI, Mr. MICA, Mr. FRANK, Mr. TAUKE, Mr. JACOBS, Mr. BONER of Tennessee, Mr. SKELTON, Mr. HERTEL of Michigan, Mr. SMITH of Florida,

Mr. HOWARD, Mr. DICKS, Mr. WHITEHURST, Mr. MITCHELL, Mr. MARTINEZ, and Mr. OWENS):

H.R. 3630. A bill to amend part A of title XVIII of the Social Security Act to limit the rate of increase in the inpatient hospital deductible and to charge the extended care coinsurance amount and to amend the Internal Revenue Code of 1954 to increase by 8 cents per pack the excise taxes on cigarettes and to earmark revenues from the tax increase to the Federal Hospital Insurance Trust Fund; to the Committee on Ways and Means.

By Mr. BIAGGI:

H.R. 3631. A bill to amend part A of title XVIII of the Social Security Act to limit the increase in the inpatient hospital deductible and extended services coinsurance amount for 1986; to the Committee on Ways and Means.

By Mr. BROWN of Colorado:

H.R. 3632. A bill to amend the Internal Revenue Code of 1954 to simplify the issuing of tax-exempt bonds by institutions of higher education to finance scientific facilities and equipment; to the Committee on Ways and Means.

By Mr. DIOGUARDI:

H.R. 3633. A bill to require that funds which are deposited in an account at a depository institution by a check drawn on the Treasury of the United States shall be available for withrawal on the next business day after the business day on which such check is deposited, under certain circumstances; to the Committee on Banking, Finance and Urban Affairs.

By Ms. OAKAR:

H.R. 3634. A bill to require the Secretary of the Treasury to deposit in trust funds amounts equal to interest lost to such trust funds through disinvestment by the Secretary during the current fiscal year; to the Committee on Ways and Means.

By Mr. PEPPER:

H.R. 3635. A bill to amend part A of title XVIII of the Social Security Act to reduce the rate of increase of the inpatient hospital deductible and the rate of the extended care coinsurance amount; to the Committee on Ways and Means.

By Mr. SUNDQUIST (for himself, Mr. FRANKLIN and Mr. ROBERT F. SMITH):

H.R. 3636. A bill to establish a Department of Trade and for other purposes; to the Committee on Government Operations.

By Ms. SNOWE:

H. Con. Res. 221. Concurrent resolution to express the sense of the Congress that Medicare patients are entitled to accurate and timely information regarding their Medicare benefits; jointly, to the Committees on Ways and Means and Energy and Commerce.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 580: Mr. GLICKMAN.

H.R. 871: Mr. COLEMAN of Texas.

H.R. 1047: Ms. SNOWE and Mr. TRAFICANT.

H.R. 1145: Mr. AKAKA, Mr. PEASE, and Mr. CONYERS.

H.R. 1430: Mr. FORD of Tennessee, Mr. ACKERMAN, and Mr. KASTENMEIER.

H.R. 1616: Mr. WRIGHT, Mr. ALEXANDER, Mr. FOLEY, Mr. WIRTH, Mr. OBEY, Mr. RITTER, Mr. WILSON, Mr. FROST, Mr. BONKER, Mr. DORGAN of North Dakota, Mr. KASTENMEIER, and Mr. YATES.

H.R. 1715: Mr. FUQUA.

H.R. 1769: Mr. EVANS of Illinois and Mr. MITCHELL.

H.R. 2440: Mr. TORRES and Mr. DENNY SMITH.

H.R. 2684: Mr. SABO, Mr. LIVINGSTON, Mr. DIOGUARDI, Mr. TORRICELLI, MR. GUARINI, Mr. SKEEN, Mr. GUNDERSON, Mr. SMITH of New Jersey, Mr. KINDNESS, and Mr. RIDGE.

H.R. 2761: Mr. MOODY and Mr. WILLIAMS.

H.R. 2823: Mr. ANDREWS, Mr. BARTON of Texas, Mr. BOEHLERT, Mrs. BOGGS, Mr. BOUCHER, Mr. BROWN of California, Mr. BRUCE, Mr. CLINGER, Mr. CROCKETT, Mr. DARDEN, Mr. DASCHLE, Mr. DWYER of New Jersey, Mr. EDGAR, Mr. FAZIO, Mr. FLORIO, Mr. GINGRICH, Mr. GLICKMAN, Mr. HENRY, Mr. LEHMAN of California, Mr. LEVINE of California, Mr. MCGRATH, Ms. KAPTUR, Mr. CONYERS, Mr. ATKINS, Mr. BARNES, Mr. RANGEL, Mr. FOGLIETTA, Mr. LUJAN, Mr. LUNDINE, Mr. MCDADE, Mr. MARTINEZ, Mr. RALPH M. HALL, Mr. MINETA, Mr. MITCHELL, Mr. MORRISON of Washington, Mr. MRAZEK, Mr. MURPHY, Mr. MURTHA, Mr. NELSON of Florida, Mr. PANETTA, Mr. PEPPER, Mr. REID, Mr. RITTER, Mr. ROE, Mr. SLAUGHTER, Mr. TORRICELLI, Mr. TRAFICANT, Mr. VOLKMER, Mr. YOUNG of Missouri, Mrs. BURTON of California, Mr. WEISS, Mr. BEVILL, Mr. TOWNS, and Mr. KOLTER.

H.R. 2854: Mr. ROE, Mr. MORRISON of Connecticut, Mr. GEJDENSON, Mr. TORRICELLI, Mr. MOLLOHAN, and Mrs. JOHNSON.

H.R. 3018: Mr. DASCHLE, Mr. EVANS of Illinois, Mrs. BOXER, Mr. MARTINEZ, Mr. STUDDS, Mr. BEDELL, Mr. GEJDENSON, Mr. DWYER of New Jersey, Mr. SCHEUER, Mr. SEIBERLING, Mr. FRANK, Mr. HAYES, Mrs. SCHNEIDER, Mr. WEAVER, Mr. ST GERMAIN, Mrs. COLLINS, Mr. EDWARDS of California, Mr. GLICKMAN, Mr. DURBIN, and Mr. EDGAR.

H.R. 3149: Mr. THOMAS of California, Mr. WHITLEY, and Mr. RANGEL.

H.R. 3180: Mrs. BENTLEY, Mr. DYSON, Mr. HENRY, Mr. LAGOMARSINO, Mr. WORTLEY, Mrs. MARTIN of Illinois, Mr. FROST, Mr. WILLIAMS, Mr. DARDEN, Mrs. BOXER, Mr. BERMAN, Mr. NIELSON of Utah, and Mrs. JOHNSON.

H.R. 3295: Mr. ATKINS, Mr. BARNES, Mr. BENNETT, Mrs. BOXER, Mrs. BURTON of California, Mrs. COLLINS, Mr. EVANS of Illinois, Mr. FAUNTROY, Mr. FAZIO, Mr. HOWARD, Mr. KLECZKA, Mr. LEHMAN of Florida, Mr. LEVIN of Michigan, Mr. MATSUI, Mr. MRAZEK, Mr. NEAL, Mr. OBERSTAR, Mr. RODINO, Mr. ROE, Mr. SABO, Mr. SAVAGE, Mr. SCHUMER, Mr. SMITH of Florida, Mr. TORRICELLI, Mr. TOWNS, Mr. UDALL, Mr. VENTO, Mr. WALGREN, Mr. WEAVER, and Mr. KASTENMEIER.

H.R. 3404: Mr. HYDE, Mrs. COLLINS, Mrs. MARTIN of Illinois, Mr. SMITH of New Hampshire, Mr. DIOGUARDI, Mr. MINETA, and Mr. MCCOLLUM.

H.R. 3436: Mr. EVANS of Illinois, Mr. DORNAN of California, Mr. DYSON, Mr. BURTON of Indiana, Mr. BRYANT, Mr. MCGRATH, Mr. SISISKY, Mr. RANGEL, Mr. BEVILL, Mrs. COLLINS, Mr. SCHAEFER, Mr. APPLEGATE, and Mr. MARTINEZ.

H.R. 3522: Mr. ROBERT F. SMITH, Mr. HAMMERSCHMIDT, Mr. MILLER of Washington, and Mr. COATS.

H.J. Res. 122: Mr. WATKINS, Mr. GREEN, Mr. SMITH of New Jersey, Mr. TAYLOR, Mr. COELHO, Mr. HALL of Ohio, Mr. ATKINS, Mr. SMITH of New Hampshire, Mr. WHEAT, Mr. WYLIE, Mr. FOLEY, Mr. FRANK, Mr. GEJDENSON, Mr. MONTGOMERY, Mr. WEBER, Mr. SKELTON, Mr. ROBERTS, Mr. SPRATT, Mr. MURTHA, Mr. SUNDQUIST, Mrs. LLOYD, Mr. PEPPER, Mr. GEPHARDT, Mr. KEMP, Mr. MARKEY, Mr. BUSTAMANTE, and Mr. SCHEUER.

H.J. Res. 126: Mr. JACOBS, Mr. ROBERT F. SMITH, Mr. WYDEN, Mr. HAMMERSCHMIDT, Mr. ANDERSON, Mr. ANNUNZIO, Mr. BONIOR of Michigan, Ms. MIKULSKI, Mr. BLILEY, and Mr. COATS.

H.J. Res. 127: Mr. MOODY, Mr. LEVIN of Michigan, Mr. GUARINI, Mr. KOSTMAYER, Mr. FLORIO, Mr. LUNGREN, Mr. EDGAR, Mr. FOGLIETTA, Mr. RINALDO, Mr. EMERSON, Mr. CARR, Mr. BUSTAMANTE, Mr. HAMMERSCHMIDT, Mr. HANSEN, Mr. HATCHER, Mr. HUNTER, Mr. HUTTO, Mr. IRELAND, and Mr. JONES of Tennessee.

H.J. Res. 397: Mr. ENGLISH, Mr. FIELDS, Mr. FOLEY, Mr. FRANK, Mr. FRANKLIN, Mr. FRENZEL, Mr. GEJDENSON, Mr. GOODLING, Mr. GRADISON, Mr. GUNDERSON, Mr. HATCHER, Mr. HAWKINS, Mr. HENRY, Mrs. HOLT, Mr. HOPKINS, Mr. HUBBARD, Mr. HUGHES, Mr. HYDE, Mr. JEFFORDS, Mr. JONES of Tennessee, Mr. KEMP, Mr. LANTOS, Mr. LEHMAN of California, Mr. LENT, Mr. LEWIS of Florida, Mr. LIGHTFOOT, Mr. LIPINSKI, Mr. LUKEN, Mr. MCCOLLUM, Mr. MCEWEN, Mr. MCGRATH, Mr. MCMILLAN, Mr. MADIGAN, Mr. MARTIN of New York, Mr. MATSUI, Mr. MILLER of Washington, Mr. MOLINARI, Mr. MORRISON of Washington, Mr. NATCHER, Nr. NEAL, Mr. MINETA, Mr. MONSON, Mr. PACKARD, Mr. QUILLEN, Mr. ROBERTS, Mr. ROBINSON, Mr. RODINO, Mr. SAXTON, Mr. SCHUETTE, Mr. SHAW, Mr. SMITH of New Jersey, Mr. STANGELAND, Mr. STRANG, Mr. TAUKE, Mr. THOMAS of California, Mr. VANDER JAGT, Mr. WALKER, Mr. ZSCHAU, Mr. LOWERY of California, Mr. NICHOLS, Mr. ANNUNZIO, Mr. BATEMAN, Mr. BATES, Mr. BEDELL, Mr. BIAGGI, Mr. BLILEY, Mr. BOEHLERT, Mrs. BOGGS, Mr. BOSCO, Mr. BREAUX, Mr. BROOMFIELD, Mr. BROWN of Colorado, Mr. BROYHILL, Mr. BURTON of Indiana, Mr. CLINGER, Mr. COBLE, Mr. CRAIG, Mr. CRANE, Mr. DICKINSON, Mr. DYMALLY, Mr. DENNY SMITH, Mr. LUNGREN, Mr. REID, Mr. DEWINE, Mr. BARTLETT, Mrs. BENTLEY, Mr. BILIRAKIS, Mr. BROOKS, Mr. CONTE, Mr. COURTER, Mr. DANNEMEYER, Mr. DE LA GARZA, Mr. DIXON, Mr. DUNCAN, Mr. EVANS of Iowa, Mr. FASCELL, Mr. FAZIO, Ms. FIEDLER, Mr. GALLO, Mr. GILMAN, Mr. GROTBERG, Mr. HAMMERSCHMIDT, Mr. KINDNESS, Mr. LATTA, Mr. LEWIS of California, Mr. LOEFFLER, Mr. LOTT, Mr. LUJAN, Mr. MCCANDLESS, Mr. MCDADE, Mr. MACK, Mrs. MARTIN of Illinois, Mr. MARTINEZ, Mr. MICHEL, Ms. OAKAR, Mr. PANETTA, Mr. PARRIS, Mr. PETRI, Mr. RANGEL, Mr. REGULA, Mr. ROSE, Mr. ROSTENKOWSKI, Mr. ROTH, Mr. RUSSO, Mr. SMITH of New Hampshire, Ms. SNOWE, Mr. SOLOMON, Mr. STARK, Mr. STENHOLM, Mr. STUMP, Mr. SWIFT, Mr. TORRES, Mr. VOLKMER, Mrs. VUCANOVICH, Mr. WEBER, Mr. WHITLEY, Mr. WHITTAKER, Mr. WHITTEN, Mr. WOLF, Mr. WYDEN, Mr. YOUNG of Florida, and Mr. YOUNG of Alaska.

H. Con. Res. 207: Mr. TOWNS, Mr. VOLKMER, Mr. HEFTEL of Hawaii, Mr. KOSTMAYER, Mr. YATRON, Mr. HUGHES, and Mr. TRAFICANT.

H. Res. 256: Mr. PANETTA.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

240. By the SPEAKER: Petition of the city council of Anoka, MN, relative to the Baha'i community in Iran; to the Committee on Foreign Affairs.

241. Also, petition of Francisco San Marte, Philippines, relative to citizenship; to the Committee on the Judiciary.

242. Also, petition of the city council of Eureka, CA, relative to tax reform; to the Committee on Ways and Means.

SENATE—*Monday, October 28, 1985*

The Senate met at 11 a.m. and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

ANNIVERSARY OF DEDICATION OF THE STATUE OF LIBERTY

God of our fathers, on this 99th birthday of the Statue of Liberty, we remember the history of this uncommon land and the measure of its greatness as a servant to the dispossessed of the world. As the Statue of Liberty is restored, grant Mighty God, that we may be renewed in our commitment to the unprecedented invitation of the great lady in New York Harbor:

"* * * Give me your tired, your poor, your huddled masses yearning to breathe free. The wretched refuse of your teeming shore. Send these, the homeless, tempest-tost to me, I lift my lamp beside the golden door!"—Emma Lazarus.

In these crucial days, Lord of history, may the Senate as a whole and the Senators individually be true to their destiny, not forsaking their sacred trust in the interest of political advatage. Renew us, God of the nations, to the greatness to which Thou hast called this Nation. For Thy namesake and the benefit of all mankind. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished majority leader is recognized.

SCHEDULE

Mr. DOLE. Mr. President, under the standing order, the leaders have 10 minutes each, to be followed by special orders not to exceed 15 minutes each for Senator PROXMIRE and Senator HEFLIN, followed by routine morning business not to extend beyond the hour of 12 noon, with Sentors permitted to speak therein for not more than 5 minutes each.

Then we shall resume consideration of the farm bill, S. 1714, I do not believe there will be rollcall votes during the day, but there will be amendments. I understand there are a number of amendments that can be disposed of without record votes.

Also, we are attempting to resolve the controversy around the State-Justice-Commerce appropriations bill. If we could do that, we might ask permission to move to that bill today. If any votes are ordered, they would be set aside until tomorrow at 2 o'clock.

Let me indicate that we are nearing November 1, on Friday. In view of a request from a number of Members that we do all we can to move the legislation we have before us, we shall be coming in—we will not be in too late this evening, but starting tomorrow, we will probably be in at 8 or 8:30 in the morning and probably into the evening, and follow that procedure through Friday and, hopefully, complete action on the farm bill. I am not going to predict that.

Also, we have indicated to both Senators DOMENICI and CHILES that if we can work out the problems on reconciliation, we would interrupt consideration of the farm bill to complete action on reconciliation. That could take several hours because of the number of votes that could occur, even though time on the resolution, I think, is down to about 1 hour.

KANSAS CITY ROYALS, 1985 BASEBALL CHAMPIONS

Mr. DOLE. Mr. President, I send a resolution to the desk and ask for its immediate consideration. It is sponsored by myself, Senator KASSEBAUM, Senator EAGLETON, and Senator DANFORTH.

The PRESIDING OFFICER (Mr. GORTON). The clerk will state the resolution by title.

Mr. DOLE. Mr. President, I ask unanimous consent that the clerk may read the resolution, then that we delay further action until Senators EAGLETON, DANFORTH, and KASSEBAUM have an opportunity to speak on it.

The PRESIDING OFFICER. The clerk will read the resolution.

The legislative clerk read as follows:

A Senate resolution (S. Res. 246).

S. RES. 246

Whereas, on the night of October 27, 1985, the Kansas City Royals climaxed one of the great chapters in major league baseball annals with a world championship;

Whereas, the Kansas City Royals captured the hearts of baseball fans all across the country with its tenacious comebacks in both the American League playoffs and the World Series;

Whereas, the Royals made history by becoming the only team to lose the first two games of a World Series in its home park but then to fight back and win it all;

Whereas, the so-called experts gave the Royals almost no chance of winning anything in postseason play;

Whereas, the Kansas City Royals defeated an outstanding Saint. Louis Cardinals team in the World Series and a great Toronto Blue Jays squad in the playoffs;

Whereas, after 16 years of loyalty, Kansas City Royals fans in Kansas, Iowa, Arkansas, South Dakota, Missouri, and all over this great Nation have been rewarded with a much-deserved world title;

Whereas, Manager Dick Howser and his team have demonstrated they are indeed the right stuff;

Whereas, after an 11 to 0 seventh game victory last night the Royals—and Kansas City, Kansas, and Kansas City, Missouri—are on top of the baseball world: Now, therefore, be it

Resolved, That the Senate recognizes and applauds the accomplishments of the Kansas City Royals, 1985 baseball champions.

(Later the following occurred:)

Mr. DANFORTH. Mr. President, I rise to support the resolution of the distinguished majority leader congratulating and commending the Kansas City Royals on their first world championship. The accomplishments of the Royals have made this team a part of baseball legend. Down 3 to 1 in both the playoffs and the series, the Royals fought back with the kind of courage and character that earned them new fans across this country.

Having lost the first two games at home, with the second defeat coming as the result of a devastating ninth-inning rally by the Cardinals, the Royals' comeback was remarkable.

The series victory is especially heartwarming because the Royals are not a team made up of established stars. Until this series, few Americans had heard of Dane Iorg, Buddy Biancalana, and Darryl Motley—yet those players are now among the chosen few who can claim a game-winning World Series hit.

The young Kansas City pitching staff is truly the best in baseball and it certainly showed in postseason play. The country was charmed by 21-year-old Bret Saberhagen, who in the span of 2 days became a father and the most valuable player in the World Series, but appeared calm and relaxed throughout. Special praise must also go to Danny Jackson, Bud Black, Dan Quisenberry, and Charlie Leibrandt. These pitchers baffled one of the best hitting teams in baseball throughout the full seven-game series—an extraordinary accomplishment.

The Kansas City fans were justly rewarded yesterday evening with a World Series victory they had waited on for some time. Although the Royals have been a frequent fixture in postseason play, the series victory eluded them until last evening. The Royals fans are a loyal group and they deserve to be congratulated as well.

Mr. President, I would only add the sentiment that I am a person who is very proud of both teams which played for my State in the World Series. As a lifelong Cardinal fan, one who spent his youth at the Old Sportsman's Park watching the likes of Stan Musial, Enos Slaughter, and Marty Marion, I can only say on behalf of the Cardinals that spring training is only 4 months away and we shall rise to fight again.

THE ROYAL TREATMENT—HOW SWEET IT IS

(By request of Mr. DOLE, the following statement was ordered to be printed in the RECORD:)

● Mrs. KASSEBAUM. Mr. President, I proudly join my colleague from Kansas in congratulating the Kansas City Royals on their world championship. After 16 years of hard work and dedication, Royals players, fans, and owners can celebrate the greatest World Series comeback of all time. After years of challenging the best in baseball and coming oh so close, how sweet it is.

The Royals are fitting examples of Kansas City and our country's heartland. Not particularly flashy yet tantalizingly successful. They have proven the value of learning through adversity and the benefits of meshing experience with enthusiasm. Like the people of the Midwest, the Royals persevered, worked, learned, and succeeded.

Kansas City exhibited throughout the season the poise and maturity which made their victories less surprising to those fans who understood the Royals and had followed their history. Kansas City was not expected to win their division—they did. They were not expected to win their playoff series against a talented Toronto team—they did. They were not expected to win the World Series against the winningest team in baseball—they did.

How many times did sportswriters around the country—perhaps especially on the "knowledgeable" east and west coasts—write off the Kansas City Royals? How often was this team of "anemic" hitters and "too young" pitchers and a "choke-in-the-clutch" manager dismissed as a fluke? Did anyone else find it hard to confirm that the American League West did indeed exist? Oh, yes indeed, how sweet it is.

This was a special World Series. It involved two teams with special personalities. Both hailed from the Midwest and both had a claim to a season of destiny. The St. Louis Cardinals are a great team and deserve our applause. Together, the Royals and Cardinals made this a series to remember.

Kansas City fans will remember. They will remember falling behind two games to none in the playoffs and the series. They will remember rallying from a 3-to-1 deficit twice. They will remember gutty pitching performances, superb defense, and clutch hitting. These are dedicated and committed fans who drive from hundreds of miles around Kansas City to see their team. This morning, and probably for all time, their dedication and commitment seems well worth the effort.

Mr. President, it is not often a team and a city have as much cause to celebrate as the Royals and Kansas City. Against all odds, they have reached the pinnacle of success. I salute them, and I hope this becomes an annual event.●

Mr. EAGLETON. Mr. President, almost 2 weeks ago Senator DANFORTH and I introduced a resolution saluting the Kansas City Royals and the St. Louis Cardinals. At that time we called Kansas City "the Heart of the American League." Yesterday, the Royals won the hearts of America by winning that little-known, intra-Missouri contest, the World Series.

The 1985 Kansas City Royals are the stuff legends are made of, and indeed they have provided the grist for a new generation of half-time speeches, morale-boosting pep talks, and inspirational lectures. Instead of telling their players to "win one for the Gipper," when the going gets tough, tomorrow's coaches can ask their players, "Did the Royals give up in 1985?" The "Miracle Mets" of 1969 have been supplanted by the "Resurrection Royals" of 1985 as the modern-day patron saints of all underdogs.

Just as important as what the Royals have done, however, is how they did it. Rarely does one find a group with so many members possessed of talent, grace, style, and humor. The Royals didn't just win the World Series, the Royals won and won well.

Mr. President, I am most pleased and proud to join with my colleagues in saluting the 1985 Kansas City Royals for a wonderful season that gave the fans everything they could hope for. I can think of no group of individuals more worthy of the honor.

Mr. DOLE. Mr. President, earlier today, I submitted a resolution and asked that it be held until we had an opportunity to discuss its contents with Senators KASSEBAUM, DANFORTH, and EAGLETON. It is a very important resolution relating to the World Series victory by the Kansas City Royals. I am now advised by Senators that they have studied the resolution carefully, they agree with its terms, and we are prepared to pass it.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 246) was agreed to.

The preamble was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. GRASSLEY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

(Conclusion of later proceedings.)

Mr. DOLE. Mr. President, I reserve the remainder of my time.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER. Under the previous order, the minority leader is recognized.

Mr. BYRD. Mr. President, I ask unanimous consent that I may reserve the remainder of my time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, I yield the floor.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin [Mr. PROXMIRE] is recognized for 15 minutes.

ARMS CONTROL: THE ESSENTIAL ELEMENT IN CONTROLLING FEDERAL SPENDING

Mr. PROXMIRE. Mr. President, I suppose what happened last night should convince us that anything can happen. You can be a terrific underdog and still make it. As was pointed out in the resolution, the Kansas City Royals were not expected to win their division; they were not expected to win the American League pennant. They were not expected to win the World Series but they did. I suppose we have about the same prospect of balancing the budget, but I think the odds against that achievement set forth so well in the Gramm-Rudman-Hollings amendment is much dimmer. If we could achieve it, it would be a miracle. I want to speak on that in two sections, Mr. President.

What are the two biggest issues that confront the country today? The two biggest issues of our time. Issue No. 1 is how to stop the arms race and prevent the disaster of nuclear war. Issue No. 2 is how to bring our runaway Federal budget under control. Now, this Senator is astonished that almost no one seems to perceive the connection between stopping the nuclear arms race on the one hand and bringing this Nation's fiscal policy under control on the other. We have had a very considerable debate in the last few days on the nuclear arms race. A number of Senators have come to the floor to speak on that, and we have discussed the budget deficit persistently day after day for the last several years. But in all that debate and in all the comment in the media—and, of course, the editorials and columns, and so forth are full of both these issues—no

one has really seemed to stress the connection, and there it is. It is this:

A mutual, comprehensive, verifiable end to nuclear testing, production or deployment would not only provide a far safer and more secure world. It would also save hundreds of billions of dollars in Federal spending and constitute the single greatest prospect for reducing the Federal deficit. If any Senator considers that claim for the fiscal efficacy of arms control exaggerated, just consider the extraordinarily favorable effect on the budget of an arms control program that stopped SDI or star wars. That single program—and it is one program, the Department of Defense—according to former Undersecretary of Defense for Research De Lauer will deliver this country a cost that will stagger us. Now, Mr. President, when the Defense Department itself warns us that their anticipated spending for a program they approve will stagger this Congress, prepare to be staggered. In the last 4 years the stepped up arms race has cost this country more than a trillion dollars. Unfortunately, we are just beginning to get into the big bucks now. So far it has been penny-ante stuff. But no more.

The Star Wars Program will climb more than 100 percent this year and it is expected to double again next year. Research alone on SDI will skyrocket to more than $25 billion in the next few years. Ah, but Mr. President as Ronald Reagan likes to say "you ain't seen nothin yet." Then the big spending begins. And this is the truly explosive kind of spending. Here is why: the mammoth amount the Congress will be required to appropriate for star wars will certainly provoke a corresponding explosion in spending by the Soviet Union on offensive missiles and the penetration aids designed to overcome this antimissile defense. Meanwhile, the Soviets will certainly also build their own antimissile defense to match ours. What will be our response? The United States will have to pour hundreds of billions of dollars into our offensive missile system. We will research, test, produce and deploy a brand new, and immensely expensive arsenal in space. We will build a brand new immensely expensive offensive system designed to penetrate the Soviet SDI in addition.

This kind of spending, Mr. President, knows no end. The more we spend, the more our adversary, the Soviets' will spend. The more they spend, the more we spend. And then something else drives this explosive spending ever higher. It is this. As our laboratories accomplish exciting breakthroughs with lasers and antimatter bombs and other exotic defensive and offensive developments, the cost of production and then the cost of deployment grows ever greater.

Meanwhile the Senate has adopted at long last an amendment that seems to put some effective teeth in our efforts to hold down spending. No realistic Member of the Congress can expect the Gramm-Rudman-Hollings amendment to endure if we find it necessary to continue to explode military spending. We know that military spending constitutes far and away the biggest controllable element in the budget. We know that Social Security spending is off limits. We are not going to cut that. Interest on the debt cannot be cut. And in the outlay area, military personnel, readiness, maintenance—the very heart of our national defense will suffer devastating reductions unless the Congress and the President agree to either a big increase in taxes or we find a way to stop the explosion of spending called for by the full-fledged, all-out arms race.

Mr. President, in the judgment of this Senator, arms control and an end to the arms race constitutes an absolutely quintessential element in bringing our fiscal policy under control. Unless this country can agree with the Soviet Union to sharply reduce military spending, we can kiss budgetary restraint good bye. What will that take? An arms control agreement with the Soviet Union. Without arms control we can say goodbye to the work the Senate had done so recently in building the basis for bringing the Federal budget under control. Or, of course we can say hello to sharp and punishing increases in taxes.

HOW THE SENATE KICKED AWAY ITS CHANCE FOR FISCAL RESPONSIBILITY

Mr. PROXMIRE. Mr. President, the Senate needs to go back to grade school to learn a little simple arithmetic. Three-quarters of us in the Senate, including this Senator, went on record a few days ago for the Gramm-Rudman-Hollings amendment. What does that amendment do? It commits the Congress to cut the budget deficit $36 billion a year every year for 5 years beginning in fiscal 1987. The Government would, if Congress kept the schedule, end up with a balanced budget in 1991. All of us knew the achievement of that goal would be very difficult. After the Senate's performance in the past 10 days, we now know it will be impossible. The Senate blew it. Those who voted for that noble goal had a duty to take the painful steps necessary to achieve it. Many didn't. What happened? For the past week a substantial majority of Senators have voted over and over and over again against reducing spending.

What an astonishing reversal! A few days ago this body went on record in favor of a principled program of reducing the deficit by more than $200 billion by 1991. There is no way the Congress could do that without beginning to cut billions of dollars in obligational authority right now. Could Congress sharply reduce the budget deficit by simply increasing taxes? Some of us in the Senate are willing to increase taxes substantially if necessary. But every Senator knows that we cannot reduce the deficit to a reasonable level by a tax increase alone. We must achieve massive and painful reductions in spending. In the past week Senators had a full opportunity to begin to make those reductions in spending.

So what did Senators do when confronted with opportunity after opportunity to make the spending cuts that are crucial to give the Senate any chance of significantly reducing the deficit? Senators did cast one lonely significant budget reduction vote on one of the four appropriations bills before the Senate. That lone vote cut about $400 million in obligational authority. But given seven other opportunities to make substantial reductions, the Senate failed every time. It refused to adopt an amendment to the Transportation appropriation bill that would have reduced authorized spending by $616 million. It killed an amendment to the Labor, Health and Human Services appropriation that would have saved $267 million, and a second one that would have slashed $1.65 billion.

The Senate turned down an amendment that would have reduced spending appropriations in the Housing and Urban Development appropriation by $352 million, and a second amendment to that bill that would have slashed $7.2 billion. The Senate also voted against two reductions in the Agriculture appropriation. One would have cut obligational authority by $1.1 billion. The other would have slashed $1.8 billion. Every one of these amendments was in accordance with the original recommendation of the administration and the Office of Management and Budget. These were all responsible amendments which, as I say, were recommended by the experts in the administration. Those amendments totaled $13 billion and the Senate cut only $400 million. There were two other amendments this Senator was prepared to offer to the Transportation bill that would in aggregate have saved a little less than $1 billion.

These amendments would have considerably advanced the prospects for meeting the targets set in the Gramm-Rudman-Hollings road-to-fiscal-responsibility amendment. The Senate voted 3 to 1 for that fiscal responsibility amendment only about a week or so before the Senate so conspicuously turned its back on giving the amendment some genuine reality. Mr. President, simple arithmetic should con-

vince any Member of this body that there is no possible way we can have the remotest chance of meeting the requirements of our action on Gramm-Rudman-Hollings when we refuse to make spending cuts.

Some will say, now wait a minute, PROXMIRE. We can make cuts in military spending. Others say we can increase taxes. Of course we can do both those things. But there is absolutely no way this Senate will achieve the king-size budget deficit reductions required by following either of those routes. The first obvious obstacle is President Ronald Reagan. We know the President will not agree to large increases in taxes. And there is no way he would concur in any significant reductions in military spending. But we cannot blame this situation on President Reagan alone. No matter who was President of the United States, we know this Congress—House and Senate—will not actually reduce military spending. We can hold it down, as I said in my speech previously on star wars. We are not going to cut it.

But big reductions in military spending? No possible way.

The only people I know of, the only leading public figures who advocate the kind of cut we need, and I would not share their view—I oppose it—are George McGovern and Jesse Jackson.

I do not believe there is any Member of the Senate who would go along with their proposal for a 25-percent cut in military spending. We cannot do it and be responsible under present circumstances.

One more point, Mr. President, the cuts proposed in the amendments I discussed would reduce obligational authority. That means they would have cut spending over the years, and this is precisely what this Congress must do if we are to bring Federal spending under control.

I started this speech by saying that the Senate needs to go back to grade school. We need to learn our elementary addition and subtraction. The Senate voted for a framework on the debt limit bill that would mandate that Congress make sharp cuts in obligational authority in appropriations this year, so that spending can be reduced in 1987, 1988, 1989, 1990, and 1991 and thereafter. By refusing to make these reductions the Senate greatly diminished the prospect that Congress can achieve any significant improvement in the deficit over the next 5 years.

MYTH OF THE DAY—SPENDING FOR HEALTH CARE IMPROVES HEALTH

Mr. PROXMIRE. Mr. President, over the past two decades, spending for health care has skyrocketed. We spent $355 billion—11 percent of gross national product—on health care in 1983. A little less than 20 years ago—in 1965—we spent $42 billion or 6 percent of GNP. By any measure we are spending far more on what is commonly called health care.

We speak of this money as improving health care, and that is a myth. Only a small proportion of this money really goes to improve health. By far, the greater amount is spent to alleviate sickness.

Let me demonstrate what I mean, Mr. President. Heart disease is one of our leading killers. All of us know men and women who have been tragically struck down in the prime of life by this dread disease.

What are its causes? These, too, are becoming known—a genetic predisposition, obesity, lack of exercise, smoking, and high blood pressure. We can do little about genetics, but the other contributing causes can be controlled. Money spent to encourage proper eating, exercise, to detect and control high blood pressure, and to discourage smoking—this is health care.

Is that how we spend the bulk of the money? No, it goes instead for emergency care, for repairing already damaged hearts, for alleviating sickness in other words. This money must be spent for those who are afflicted. But wouldn't it be better to maintain health where we can.

Mr. President, this distinction is seldom made. What are its implications for public health policy? In a time of limits, and we certainly face limits, we can best improve public health by spending more money to encourage exercise, proper eating, and the other determinants of good health. We will never be as successful at alleviating sickness as we can be by encouraging good health in the first place. But good health is so often taken for granted, that we don't realize how valuable it is until it's gone.

As our population ages, as alleviating sickness continues to cost evermore, this distincton will become vital. As a society, we will be far better off by encouraging good health than by alleviating sickness.

BOTH THE RIGHT TO DETERMINE AND THE RIGHT TO ASK

Mr. PROXMIRE. Mr. President, the cover story in the October 4 edition of the National Review considers "The Awful Logic of Genocide." Jean-Francois Revel recounts the horrible conditions faced by the Afghan people since the barbaric Soviet invasion of their country. Reading his article, I am hard pressed to decide which are more troubling: The stories of a particular individual's hardship, or the statistics revealing the breadth of the tragedy.

There is a photograph that shows the weariness in an Afghan father's eyes as he carries his daughter the remaining distance into neighboring Pakistan. His daughter is the only other member of his family to have survived a Soviet massacre and he has already traveled for 3 weeks in search of safety and freedom.

The statistics, while colder, evoke the same horror. About 1 million Afghans have died—they were resistance fighters killed while battling the Soviets, or women and children massacred in their villages, or political opposition members executed. About 5 million Afghans have fled their country in despair.

Do these acts by the Soviets constitute genocide? We do not have enough information to know for certain. The acts certainly fall within the provisions of the Genocide Convention: "Killing members of the group, (or) causing serious bodily or mental harm to members of the group." To be considered genocide, the convention would require that the acts be committed with "intent to destroy, in whole or in part, a national, ethnical, racial, or religious group as such."

But while we do not know if the acts committed by the Soviets in Afghanistan constitute genocide, it seems particularly cruel that it is difficult for us to ask. For while the Soviet Union is a signatory of the Genocide Convention, the United States has yet to ratify the convention. Mr. President, I urge the Senate to ratify the Genocide Convention, not only so we could determine if some acts were genocide, but so that we could join 96 other countries in having the right to ask.

I yield the floor.

RECOGNITION OF SENATOR HEFLIN

The PRESIDING OFFICER. Under the previous order, the Senator from Alabama [Mr. HEFLIN] is recognized for not to exceed 15 minutes.

A FAREWELL TO ARTHUR BRISKMAN

Mr. HEFLIN. Mr. President. I rise today filled with both a sense of sorrow and a feeling of gratitude as I offer my personal thanks and sincere appreciation to my chief judiciary counsel, Arthur Briskman, who is leaving my staff to become U.S. bankruptcy judge for the southern district of Alabama. Arthur, or Judge Briskman as I guess I should begin calling him, is certainly to be congratulated upon his well-deserved selection, and I am positive that he will distinguish himself in his new post. At the same time, however, I am sorry to see him go.

Arthur Briskman and I have been together for a long time. He first came to work for me when he graduated from the Cumberland School of Law in 1972 and was hired as assistant court administrator for the State of

Alabama. At that time, as chief justice of the Alabama Supreme Court, I was interested in completely renovating the State court system. I was immediately impressed with Arthur's analytical mind, his instincts for problem solving, his overall ability.

In 1973, Arthur left the court system and became affiliated with the Mobile, AL, law firm of Perloff, Reid & Briskman. It was that law firm which I had to convince him to leave to join me here in Washington when I first came to the Senate in 1979.

Mr. President, during our many years together, I have grown to depend on Arthur Briskman in a wide variety of ways. He has been my primary judiciary counsel, and has assisted me with the full range of issues which come before the Judiciary Committee—from legislation dealing with the role of Federal courts and the impact of legislation on the judiciary, to patents and copyrights, immigration and naturalization, antitrust, criminal law, and more. In each of these areas, Arthur Briskman has become an expert, and his advice and counsel has been indispensable. It has, however, been in the area of bankruptcy reform where Arthur Briskman's greatest interest and expertise has been. In our review of the bankruptcy court system during the last several years, his familiarity with and knowledge of the issues were vital.

He has been an adviser on many other policy areas, whether it concerns budgetary matters, foreign aid, or the national defense. He has been a political adviser, and his calm, rational outlook has been more than valuable.

One of Arthur's many fine traits has been his loyalty. He has indeed been loyal to me, and has always kept my best interests in mind. His loyalty has evidenced itself in too many ways to enumerate. I hope it is sufficient to say that he has been my loyal and staunch friend.

In our office, we will miss Arthur's seemingly innate gift for analysis, his ability to cut through an apparently complex problem and quickly find a workable solution. We will miss his legislative instincts and his wide range of contacts, all of which enabled us to always have a good idea of what lay around the corner of the next legislative curve. We will miss his sense of humor, whether it was expressing itself with a funny joke or a horrible pun. We will miss his beard and his fondness for bow ties, both of which, at times, have made him subject to comments and puns from others in our office.

Still, Mr. President, more than all of this, and I am sure I speak here for the rest of my staff as well as myself, we will just miss Arthur. I will miss him as more than a staff member, but as a friend on a daily basis.

To Arthur and his wonderful wife, Jane, I am sorry to see you go, but am happy for your future. Good luck. I hope you will come back often to visit us.

SOUTHERN RESEARCH INSTITUTE

Mr. HELFIN. Mr. President, as we move closer and closer to the 21st century, one of the most critical aspects of our society is the maintenance and further development of our research base. I am both pleased and proud that one of the leading contributors to this aspect of our national well-being is Southern Research Institute, located in Birmingham, AL.

This year, Mr. President, marks the 40th year of operation of Southern Research Institute, and those four decades have been spent providing innovations, expanding opportunities, and solving problems.

Forty years ago, Thomas W. Martin, then president of Alabama Power Co., foresaw the importance the South would gain during the last half of this century, and saw the corresponding need for the South to develop a strong research base. Toward this end, he helped gather together businessmen, industrialists, and educators, all dedicated to establishing a research institute with the primary charge of promoting the development and general welfare of the southern region of the United States.

From these efforts grew Southern Research Institute. In its early years, the institute's projects reflected the area it served—research into the growing of cotton and peanuts, coal and metallurgical studies for the iron producers, studies of wood utilization for the forestry industry.

In those days, Mr. President, the entire institute—administrative offices, laboratories, and everything else—was located in an old mansion and carriage house on the southside of Birmingham. Today, four decades later, the institute occupies 19 modern buildings, totaling more than 350,000 square feet, spread over a 20-acre complex. It has grown into one of the Birmingham area's largest employers, with almost 700 employees and an annual payroll of more than $12 million.

In more recent years, the institute's emphasis has shifted a bit. No longer is there a geographically regional scope for their projects. Today, researchers at Southern Research Institute are making important progress in cancer research, antiviral and antiparasitic research, electronics, genetics, and engineering.

Mr. President, my colleagues are familiar with my repeated stand in favor of continuing our Government's emphasis on finding a cure to cancer. Southern Research Institute has developed one of our Nation's leading cancer research programs, and, in 1985, funding for these efforts will make up almost one-quarter of the institute's overall multimillion-dollar research efforts.

Today, Southern Research has gained a worldwide reputation for their efforts in the fight against cancer. A number of the drugs now in use against this dreaded disease were developed in their laboratories.

In addition to their health-related research, the staff at Southern Research Institute has been active in conducting research involving our national defense. One particular area in this regard concerns the need for further improvements in high temperature-resistant materials which are used in aircraft engines, missile, and space vehicles. Also in the defense field, Southern Research has done work on the tracking systems used in guided missiles.

Among the many other research projects on which Southern Research has worked are: Controlled release technology, resulting in the creation of items ranging from a sustained-release fluoride treatement to pesticides and antibiotics; desulfurization research, helping to answer the continued concern with air pollution; biomaterials technology, for use in absorbable surgical sutures and artificial bone joints; and many others.

Mr. President, as I said earlier in my remarks, our Nation cannot afford to neglect our research base. I am proud of the efforts which Southern Research Institute is making to provide our future with technical research of the highest quality possible.

The efforts of their highly trained and intensely dedicated staff are enabling us to prepare for the challenges of a changing world, and are helping us to find honest, workable answers to the problems of today and tomorrow.

Mr. President, I want to congratulate every person affiliated with Southern Research Institute, today or in the past, for, with their efforts, they are truly giving us all a better world to live in.

Thank you, Mr. President.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business not to extend beyond 11:45 a.m. with statements therein limited to 5 minutes each.

RED CHINA HELPS KHOMEINI WITH MISSILES

Mr. HELMS. Mr. President, I am deeply concerned about the proposed nuclear cooperation agreement with Red China which, failing congression-

51-059 O-87-25 (Pt. 21)

al action, will go into effect during the month of December.

Press reports during the past several weeks have indicated that Red China is facilitating the proliferation of nuclear weapons. Several of our distinguished colleagues have expressed grave reservations about the agreement and grave concerns about Red China's activities in the nuclear field.

Now, Mr. President, I wish to call attention to reports of Western news agencies in Peking that China is assisting Iran in developing surface-to-surface missiles of a design that is nuclear-capable.

Apart from the terms of the nuclear agreement, which I believe are seriously defective particularly in the area of verification and reprocessing, the question arises as to whether we can trust Red China to keep any agreement—no matter how is is drafted.

Mr. President, I happen to be chairman of the Senate Committee on Agriculture, and in that capacity I have gained a personal awareness of the manner in which the major United States agreement with Red China—the 1981-84 bilateral long-term grain agreement—has been implemented to date. Not only did Red China fail to fulfill its purchase obligations under the LTA before its expired in December 1984, but it has made no effort to fulfill these obligations since.

Under the terms of this agreement, Red China was to have purchased from 6 to 8 million metric tons of wheat and corn each year of the term of the agreement. Red China did not and has not fulfilled its end of the agreement even though it has bought wheat and corn from France and Argentina. The shortfall in the last 2 years of the agreement was 4.2 million tons.

Mr. President, to make matters worse, Red China used the threat of nonfulfillment of the agreement to blackmail the United States into an excessive textile import agreement. Red China then, of course, reneged on the grain agreement.

Red China's unreliability in the field of international agreements offers scant hope that Red China will be restrained by mere declarations of intent with regard to the issue of nuclear proliferation.

The fact is, Mr. President, that Red China's international activities today are already facilitating the military capabilities of several countries. It is a fact that Red China has a military relationship with the terrorist Khomeini regime in Iran. It has been reported that Iran has purchased over $1 billion of military equipment from Peking. There are reports that Red Chinese military advisers are in Iran.

Revealing reports from London, Paris, and the Middle East has reached my office in recent months. If true—and the evidence appears reliable—these reports cast a dark shadow on any type of sensitive relationship with Red China, particularly in the nuclear area.

Mr. President, it is no secret that Iran has a missile industry. The official Iranian news agency has publicly released information about this activity. For example, on April 9, 1985, Iranian news services announced that the Minister of the Revolutionary Guards, Mohsen Rafiqdust, met with the speaker of the Iranian Parliament, Ali Akbar Hashemi Rafsanjani, in order to brief him on the latest developments in the Iranian missile industry. This report was carried by our Federal Broadcast Information Service in its Daily Report for April 10, 1985.

Mr. President, I ask unanimous consent that that report be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

RAFIQDUST BRIEFS RAFSANJANI ON MISSILE INDUSTRY

[Text] TEHRAN, April 9, IRNA.—Islamic Revolution's Guards (IRGC) Minister Mohsca Rafiqdust, met with the Supreme Defence Council Spokesman, "Ali Akbar Hashemi-Rafsanjani today. In this meeting, Rafiqdust presented a report on the latest progress in the IRGC's missile industry.

Mr. HELMS. Mr. President, 3 days later, Rafsanjani was quoted by Iranian news services as stating that "the country's missile industry workers have invented a new missile." The Federal Broadcast Information Service for April 12, 1985, carried the item in its Daily Report for April 12:

Mr. President, I ask unanimous consent that the report be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

HASHEMI-RAFSANJANI ON NEW MISSILE DEVELOPMENT

[Text] TEHRAN, April 12, IRNA.—Iran's Majlis Speaker Hojjat of-Eslam Akbar Hashemi-Rafsanjani said here Thursday that the country's missile industry workers have invented a new missile which he said "we might use in the next few days."

Hashemi-Rafsanjani who is also the imam's representative to the Supreme Defence Council (SDC) further stated that the new missile was very different from those Iran had previously used (against the Iraqi capital). He described the new invention as very interesting and said it was very precise and could be launched only by pushing a button.

The Majlis speaker's remarks came in a meeting with Minister of Mines and Metals Hoscya Nili-Ahmadabadi and senior officials from the ministry.

Following the recent escalation of Iraqi atrocities against Iran's civilian areas and its attacks on neutral ships in the Persian Gulf, the Islamic Republic launched nine missiles against Baghdad causing extensive damage and casualties.

Mr. HELMS. It is interesting that it was the Minister of the Revolutionary Guards who briefed Rafsanjani. According to some reports, Khomeini has placed Rafiqdust in charge of weapons procurement rather than allowing the regular military to continue to handle this process. It is also reported that Rafiqdust is married to Rafsanjani's sister.

According to reports reaching my office, much of the Iranian missile development program is carried out at a location near the new Isfahan airport. It is said that a number of technical specialists, including North Koreans, are working at this location.

Mr. President, the Khomeini regime has been developing surface to air missiles based upon the Chinese versions of the Soviet Sam-2 and Sam-6 systems. The Iranian missile based upon the Sam-2 design is designated the Sahand I. The Iranian missile based upon the Sam-6 design is designated the Sahand II. It is said that the Red Chinese have been having problems developing certain components for these missiles and that the Iranians have been able to cooperate with Red China to obtain these components from various sources including Syria.

Reportedly, Syrian technicans are operating these systems in two locations in Iran: at the Mehrab International Airport, and at the residence of Ayatollah Khomeini at Jamaran which is near Tehran.

The Red Chinese are also cooperating with Iran in the development of a surface to surface missile. It is reported that this is based on a Red Chinese version of the Soviet SCUD-B missile. Apparently, the Red Chinese have been seeking certain components for this system and Iran has been able to obtain them from Swedish sources. This Iranian surface to surface missile is said to come in three versions which are designated the Yekan I, Yekan II, and Yekan III. The Soviet SCUD-B is nuclear capable at the fractional kiloton level.

The Swedish connection should come as no surprise. Indeed, a number of West European countries such as England, West Germany, and Switzerland, are engaged in a brisk weapons trade with Iran. It has been reported that the Swedish Bofors Co., for example, sold some 200 antiaircraft missiles to Iran in April of this year via Singapore. A central arms purchasing operation of the Iranian regime is said to be located in London and operating under the cover of the Iranian National Oil Co.

Mr. President, on October 23, the French news agency Agence France Presse carried a report by its correspondent in Peking. The report details negotiations between Khomeini's regime and the Red Chinese for the sale of Chinese-produced surface to surface missiles based on the Soviet SCUD-1A and SCUD-1B to Iran. It de-

scribes negotiations in June and July of this year in Peking and notes the discussion of the missile sale issue by Rafsanjani during his July visit to Red China. The report was carried by the Federal Broadcast Information Service in its Daily Summary for October 23 and is as follows:

IRAN, PRC NEGOTIATING MISSILE SALES IN BEIJING

(By Pierre-Antoine Donnet)

BEIJING, Oct. 23.—China has had at least two rounds of talks with Iran on the sale of Chinese surface-to-surface missiles and the negotiations are "progressing rapidly," a highly reliable source here said today.

The source said that officials from the two countries met in June and July at Tehran's embassy and the Defense Ministry here to discuss Beijing's terms for the sale of older-generation Scud 1A and 1B missiles.

The Chinese and the Iranians both expressed satisfaction after the last talks and negotiations since have been "progressing rapidly," the source said.

A spokesman for the Foreign Ministry here declined immediate comment.

Beijing says that it has maintained a strict neutrality in Iran's more than 5-year-war with neighboring Iraq and has denied reports that it had sold arms to Tehran.

The Scud 1A and 1B missiles, with a range of 130 to 270 kilometers (81 to 169 miles), are liquid-propulsion tactical missiles of Soviet design dating back to the 1960's. But China still produces them.

Western diplomats here said that although technologically outmoded they have a large destructive capacity and can carry a chemical warhead.

The source said that the first series of talks between China and Iran on the missiles began a few days before the arrival here on June 27 of Iranian Parliament Speaker Hashemi-Rafsanjani.

Mr. Rafsanjani spent 4 days in China on the first visit here by a senior leader from Tehran since the Iranian revolution in 1979.

At that time, he did not explicitly deny Iran was receiving arms from the Chinese, telling a news conference only that he was in no position to say since he was not involved in defense matters.

Before Mr. Rafsanjani's arrival, however, an Iranian source had said that the question of Chinese arms sales could be raised during the parliamentary leader's talks here.

A Western correspondent in Beijing saw an unmarked transport plane take off from the capital's old airport on July 1. Airport personnel said the aircraft was headed for Iran.

Western diplomats here also said that a former Iranian defense minister made a quick and unpublicised visit to Beijing in August.

The Iraqi military attache in Beijing left a year ago and was not replaced, while his Iranian counterpart still works at Tehran's embassy.

Mr. HELMS. Mr. President, I emphasize that the information which I have just described has not come from any U.S. sources, classified or unclassified. This information has come to my office from sources, in West Europe and in the Middle East, which have proven reliable in the past. Should these reports be accurate, the specter of Red Chinese military cooperation with the terrorist Khomeini regime is reason alone not to enter into any sensitive nuclear agreements with the dictators in Peking.

Indeed, Mr. President, there have been recent reports that Red China has admitted entering into nuclear cooperation with Pakistan and other countries, claiming, of course, that only peaceful nulcear materials are involved. Red China denies that there is a nuclear relationship with Iran. But reliable Western journalists in Peking are reporting otherwise. The potential that Red China might divert nuclear technology to the Khomeini regime is a terrifying one. The United States should not become an accomplice in this process.

ORDER FOR STAR PRINT—SENATE RESOLUTION 28

Mr. BYRD. Mr. President, earlier this year I submitted Senate Resolution 28, and other resolutions, the objective of which was to do two things: to provide for television and radio coverage of Senate proceedings, and also to provide for certain rules changes which I believe to be useful and necessary in the event debate should be televised. The Rules Committee held a hearing at my request, for which I thank the distinguished chairman, Mr. MATHIAS, and the ranking member, Mr. FORD.

I attended much of the hearing and as a result of the hearing, as result of the testimony that was given by various witnesses, I feel it incumbent upon me to submit, in some ways, a different version of Senate Resolution 28.

For one thing, I concluded from that hearing that if we are to have television and radio coverage, it should be gavel-to-gavel, coverage. Heretofore, I have not supported gavel-to-gavel coverage, but as a result of that hearing, I have changed my mind, and I now believe the Senate should have such coverage. Moreover, there are certain rules changes that I think, whether or not television and radio coverage of Senate debate becomes a reality, it nevertheless, would be well to have.

Mr. President, the able chairman of the committee has scheduled a markup for tomorrow. The markup will be on Senate Resolution 28. That will be the proposed legislation from which the committee can work as we proceed to mark up.

The legislation provides a trial period for television and radio coverage, the trial period to be for the purpose of finding the bugs, ironing out the wrinkles, and trying to resolve problems before the actual live coverage of Senate debate would begin.

In order to accommodate the committee in the markup, I shall ask for a star print of Senate Resolution 28 so to reflect changes I have made in the original Senate Resolution 28.

On Friday of last week, I introduced Senate Resolution 245, which reflected those changes, and I meant on Friday to ask for a star print of Senate Resolution 28 so that the same number would be on the resolution upon which the committee would do its work tomorrow. I inadvertently let the Senate close down before asking consent. So I am prepared to ask unanimous consent now that Senate Resolution 28 be star-printed to reflect the changes which I have referred to.

Mr. President, this request has been cleared with the distinguished majority leader and he has authorized me to make the request to the Senate. I, therefore, Mr. President, ask unanimous consent that Senate Resolution 28 be star-printed to reflect the following changes in Senate Resolution 28, which I send to the desk.

The PRESIDING OFFICER. Is there objection? Hearing no objection, it is so ordered.

Mr. BYRD. Mr. President, I thank the distinguished Presiding Officer.

Mr. President, I have been asked by Mr. GORE to add his name as a cosponsor to Senate Resolution 28, as star-printed. So I make that request.

The PRESIDING OFFICER. Without objection, it is so ordered.

THEODORE ROOSEVELT'S BIRTHDAY

Mr. ANDREWS. Mr. President, I rise today to honor a great man who served this Nation well and whose policies remain a source of guidance today.

Yesterday, October 27, 1985, marked the 127th anniversary of the birth of President Theodore Roosevelt. A man whose vision and actions represent those of the first American President of the modern age who forthrightly confronted the dilemmas of the industrial age. Remembered as a man of unwavering determination, he was also an individual of keen intelligence and sensitivity. As Robert Frost one said, "He was our kind * * * he quoted poetry to me. He knew poetry." Frost's comments are indicative of this unique American who would publish historical writings in his early twenties, master a nation in his early forties, and win lasting acclaim as the first American to win the Nobel Peace Prize.

Born in New York City, Roosevelt was an asthmatic child of slight build and poor sight. Due to this childhood condition, he was tutored privately until entering Harvard. He began writing a scholarly work as an undergraduate, "The Naval War of 1812," which would be published 2 years after receiving his B.A. degree in 1880. Incidentally, Theodore Roosevelt's birthdate also marks his marriage to Alice Hathaway Lee in 1880. Unfortunately,

on February 14, 1884, following the birth of their child, Alice, his wife died—his mother died the same day.

This tragedy led Theodore Roosevelt to withdraw from New York State's political scene and move to the Dakota territory. From 1884 to 1886, he ranched and wrote, but most importantly, he gained a unique perspective on life that would serve him and the Nation well during his Presidency. As one North Dakotan observed about Roosevelt during that Dakota winter of 1883, "clearly I recall Roosevelt's wild enthusiasm over the badlands * * * It had taken root in the congenial soil of his consciousness, like and irradicable * * * plant to thrive and permeate it thereafter, causing him more and more to think in the broad guage terms of nature—of the real Earth."

Roosevelt returned East in 1886 to run for mayor of New York City. Rising from defeat in that election, he remarried and moved to Oyster Bay, Long Island. He continued his writing there until 1889 when he received an appointment to the New York State Civil Service Commission. During his 6 years on the commission, Roosevelt championed his firmly held belief that the political spoils system was "a faithful source of corruption." He implemented his philosophy by pursuing fraud, revising entrance exams, doubling the number of positions available for competition, and opening the fields of competition to women. This straightforward approach to efficient and fair governing would become the cornerstone of the progressive movement.

Roosevelt's tenure in the civil service commission was followed by his role as chief of police of New York City and then as Assistant Secretary of the Navy. None of these offices were to catapult him into the national view as would his role in the Spanish-American War. Upon leaving the Navy in 1898, at the eruption of American and Spanish hostilities in Cuba, Teddy went to be a lieutenant colonel of the 1st U.S. Volunteer Cavalry. This division had actually been orchestrated with the help of Roosevelt and was known as the "Rough Riders."

In his service in Cuba, Teddy Roosevelt would lead the Riders up Kettle Hill and into history. This heroic charge would establish his mark in American history and begin his rise to national prominence. With strong public support, he was elected Governor of New York in 1898 and continued to carve out the principles and direction that would give national scope to the progressive movement.

As Governor, Roosevelt championed higher wages for teachers, legislation to end racial discrimination in public schools, and to tax corporate franchises. He attacked urban poverty and the slums where it was bred, and he instituted his policies to preserve the State's natural resources. Yet these were only hints of the wide-ranging, forward-looking legislative and administrative reforms that he would pursue during his Presidency.

In 1900, Theodore Roosevelt was elected Vice President of the United States. On September 14, 1901, Roosevelt, the youngest man to do so at 42, took the oath of office following the tragic assassination of President McKinley. Roosevelt moved quickly to put his own stamp on the Presidency. Theodore Roosevelt's accomplishments as President are well known. Progressive, trust buster, internationalist, conservationist, and the Nation's first modern, activist President. What is less well known about Roosevelt and why I take special pride in acknowledging the anniversary of his birth is because of the lessons he learned during his time in North Dakota and what those experiences later meant to the Nation as a result of those experiences.

His foremost biographer Edmund Morris has written of his Dakota days:

Roosevelt "had gone west sickly, foppish, and racked with personal despair; during his time there he had built a massive body, repaired his soul, and learned to live on equal terms with men poorer and rougher than himself. He had broken bones with Hashknife Simpson, joined in discordant choruses to the accompaniment of fiddlin' Joe's violin, discussed homicidal techniques with Bat Masterson, shared greasy blankets with Modest Carter, shown Bronco Charlies Miller how to "gentle" a horse, and told hell-roaring Bill Jones to shut his foul mouth. These men, in turn, had found him to be the leader they craved in that lawless land, a superior being, who paradoxically, did not make them feel inferior. They loved him so much they would follow him anywhere, to death if necessary—as some eventually did. They and their kind, multiplied seven millionfold across the country and became his natural constituency."

But to me and to all North Dakotans, Teddy Roosevelt said it best.

"If it had not been for my years in North Dakota," he said long afterward, "I never would have become President of the United States."

Therefore, Mr. President, while we cannot claim Teddy Roosevelt as our own by birthright, we feel uniquely privileged to claim his stalwart, progressive leadership of our Nation as a direct result of his experiences in our State of North Dakota.

BIRTHDAY OF THE STATUE OF LIBERTY

Mr. DOLE. Mr. President, on October 28, 1886, France presented the United States with a gift to commemorate our 100th year of independence. This gift, the Statue of Liberty, has since become one of the most distinctive symbols of what our Nation stands for. Situated in New York Harbor, the Statue of Liberty welcomes travelers to our land of freedom, democracy, and opportunity. During the surge of immigration at the turn of the century, the Statue of Liberty became the most visible image of the promise of a new world.

THE NEW COLOSSUS

In 1903, Emma Lazarus wrote a sonnet to the Statue of Liberty called "The New Colossus." Now inscribed on a plaque beside the statue, the poem beautifully depicts the grace and vision of Miss Liberty. At this time, I ask that the sonnet be inserted into the RECORD:

Not like the brazen giant of Greek fame, with conquering limbs astride from land to land; here at our sea-washed, sunset gates shall stand a mighty woman with a torch, whose flame is the imprisoned lightening, and her name mother of exiles. From her beacon-hand glows world-wide welcome; her mild eyes command the air-bridged harbor that twin cities frame, "keep ancient lands, your storied pomp!" cries she with silent lips. "Give me your tired, your poor, your huddled masses yearning to breathe free, the wretched refuse of your teeming shore. Send these, the homeless, tempest-tos to me, I lift my lamp beside the golden door!"

RESTORATION PROJECT

Although Miss Liberty's character will never weaken, her physical structure is in severe disrepair. In view of this, President Reagan created the Statue of Liberty/Ellis Island Centennial Commission, and appointed Lee Iacocca as its chairman. Along with his dedicated staff, Mr. Iacocca has managed to raise millions of dollars to restore the Statue of Liberty in time for us to celebrate her 100th birthday next year.

Mr. President, on this birthday of the Statue of Liberty, I wish to pay tribute to those who had the vision to create her, to those who had the tenacity and courage to realize her dream, and to those who have dedicated themselves to keeping her torch lit for the future.

CONGRESSIONAL CALL TO CONSCIENCE

Mr. DANFORTH. Mr. President, Americans have always been responsive to the plight of the oppressed. Nowhere is there greater need for that response to be heard than in the case of Soviet Jewry.

The emigration of Soviet Jews has slowed to a trickle. From a peak of over 50,000 in 1979, the number of Jews allowed to emigrate dropped to less than 1,000 last year, and this year's figures are little better. It is indeed a frightening turn of events when the official Soviet view refuses to acknowledge even that the issue persists—that there are Jews who wish to emigrate and join their families outside of the Soviet Union.

In addition to the reductions in emigration, the Soviet Government has

stepped up its campaign of persecution, isolation, imprisonment, and harassment of those who agitate for their rights.

It is clear that the Government of the Soviet Union has sought to crack down aggressively on the cultural life of its Jewish population. The situation has progressively worsened, and teachers of Jewish language and culture such as Yevgeni Aizenberg and Yuli Edelstein have been arrested and imprisoned for their teachings.

It is thus critical that the United States continue to focus on this problem and remain committed to its resolution. Our country is a symbol of freedom and hope for oppressed men and women everywhere. We must live up to this image. Emigration and human rights must remain a top priority among U.S. foreign policy objectives.

Our expression of concern for the Jews and other oppressed groups in the Soviet Union does have an impact in that country. Many of my colleagues have joined in efforts on behalf of individuals pressing their right to emigrate. We have encouraged President Reagan and other U.S. officials to confront Soviet leaders with this issue. And we have made public our own concerns about the denial of these rights. The victims of this repression must know that we have not forgotten them, that we will not abandon them.

Americans must be concerned about the Soviet Union's treatment of its Jewish population for another reason. Soviet adherence to existing international commitments involving human rights and freedom of emigration is a key measure of their interest in improving relations with the United States. It is not a coincidence that the recent cooling in United States-Soviet relations was paralleled by dramatically decreased emigration and increased hostility toward Jewish activities.

The plight of Jews in the Soviet Union is acute, but there is some cause for hope. President Reagan's summit meeting with Soviet Premier Gorbachev next month represents his first opportunity to press this issue with the Soviet leader face to face. It is essential that we work to eliminate the persecution of Soviet Jews and that we do it now, while there is potential for change and before their situation deteriorates further.

OPPOSITION TO ARMS SALES TO JORDAN

The PRESIDING OFFICER. The clerk will read Senate Joint Resolution 223 by title.

The bill clerk read as follows:

A joint resolution (S.J. Res. 223) to prohibit the sales of certain advanced weapons to Jordan.

Mr. HELMS. Mr. President, I object to further consideration of the joint resolution.

The PRESIDING OFFICER. Objection is heard. The joint resolution will be placed on the Calendar.

AGRICULTURE, FOOD, TRADE AND CONSERVATION ACT OF 1985

The PRESIDING OFFICER. The Senate will now resume consideration of the unfinished business which the clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 1714) to expand export markets for United States agricultural commodities, provide price and income protection for farmers, assure consumers an abundance of food and fiber at reasonable prices, continue food assistance to low-income households, and for other purposes.

The Senate resumed consideration of the bill.

Pending:

Dole Amendment No. 904, to amend the Animal Welfare Act, to ensure the proper treatment of laboratory animals.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. GOLDWATER). Without objection, it is so ordered.

Mr. HELMS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HELMS. What is the pending business?

The PRESIDING OFFICER. Amendment 904.

Mr. HELMS. I thank the Chair.

Mr. President, I ask unanimous consent that amendment 904 be laid aside temporarily so that the Senator from Texas [Mr. BENTSEN] may call up an amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BENTSEN. I thank the distinguished chairman of the committee.

AMENDMENT NO. 908

(Purpose: To improve the working of U.S. agricultural trade programs and to expand export markets for U.S. agricultural products)

Mr. BENTSEN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Texas [Mr. BENTSEN], for himself, Mr. COCHRAN, Mr. PRYOR, Mr. BURDICK, Mr. FORD, and Mr. SYMMS, proposes an amendment numbered 908.

Mr. BENTSEN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 26, between lines 15 and 16, insert a new subsection (c) as follows:

"(c) The United States Trade Representative shall—

(1) review the reports prepared under subsection (a) and any other information available to identify export subsidies or other export enhancing techniques (within the meaning of the agreement on Interpretation and Application of Article VI, XVI, and XXIII of the General Agreement on Tariffs and Trade);

(2) identify markets (in order of priority) in which United States export subsidies can be used most efficiently and will have the greatest impact in offsetting the benefits of foreign export subsidies that—

(A) harm United States exports,

(B) are inconsistent with the Agreement on Interpretation and Application of Article VI, XVI, and XXIII of the General Agreement on Tariffs and Trade,

(C) nullify or impair benefits accruing to the United States under international agreements, or

(D) cause serious prejudice to the interests of the United States and

(3) submit to the Congress and to the Secretary of Agriculture an annual report on—

(A) the existence and status of export subsidies and other export enhancing techniques that are the subject of the investigation conducted under paragraph (1), and

(B) the identification and assignment of priority to markets under paragraph (2)."

On page 26, line 16, strike out "(c)" and insert in lieu thereof "(d)".

On page 26, line 24, strike "subsection (a)" and insert in lieu thereof "subsections (a) and (c)".

On page 27, line 3, strike out "(c)" and insert in lieu thereof "(d)".

On page 27, line 9, strike "subsection (a)" and insert in lieu thereof "subsections (a) and (c)".

Mr. BENTSEN. Mr. President, this amendment will strengthen the export section of this bill by helping us to better target our responses to foreign export subsidies. I am joined in offering this amendment by the Senator from Mississippi [Mr. COCHRAN], the Senator from Arkansas [Mr. PRYOR], the Senator from North Dakota [Mr. BURDICK], the Senator from Kentucky [Mr. FORD], and the Senator from Idaho [Mr. SYMMS].

This amendment will require the U.S. Special Trade Representative to submit an annual report on the existence of export subsidies or other export enhancing techniques, as defined in the GATT Subsidies Code. This report must also identify and rank order markets in which U.S. export subsidies can be used most efficiently and will have the greatest impact in offsetting subsidies that are harming U.S. interests.

This report will give us a list, certified by STR, of export subsidies that are damaging U.S. agriculture. Anyone who doubts the existence or the status

under international trade law of these practices can remove those doubts simply by checking this report.

In addition, the recommendations of the Nation's top trade official will be available for use in guiding any U.S. export subsidy programs. We need to make the most efficient use of our resources in these export subsidy programs, just as we do in every other Government program. Having this report from the Special Trade Representative will help us to do that.

Although the executive branch of Government has awesome discretionary powers for use in dealing with trade problems, the powers have not been used wisely or well in the past. We have not had a real trade policy under Democratic or Republican administrations. Responses to trade problems have been ad hoc and uncoordinated.

Unfortunately, Mr. President, the executive branch's track record on dealing with foreign agricultural export subsidies and other trade barriers is not good. In many cases they have done nothing about barriers to U.S. agricultural exports. In other cases they have tried to do something but have accomplished nothing.

In 1983 Secretary Block announced, with great fanfare, the sale of $1.5 billion worth of wheat flour to Egypt to counter the European Community's subsidies. It really shook up the EC. They had taken that market away from us by using export subsidies, and we clearly had the clout to take it and other markets back. They were seriously considering negotiating with us about trade barriers and export subsidies on agricultural products.

But all of a sudden, what happened? The EC found that we had the clout, but not the will to use it. The State Department did not want to upset our friends. The Defense Department wanted European countries to live up to their agreements to put cruise missiles and Pershing II's in place so that we could defend them. The USDA was told to back off and the EC was told, "We're sorry we upset you, and we won't let this terrible thing happen again." A good initiative announced with great fanfare was very quietly cosigned to the trash heap after having wasted a bunch of the taxpayers' money.

What has happened since then? Nothing. The EC has cruised merrily along subsidizing their exports. They can do it a lot more cheaply now because of the high value of the dollar. They drove U.S. farmers out of our wheat markets with cash subsidies of up to $80 per ton, or $2.18 per bushel. Then the U.S. dollar got so high that the EC even tried a sale or two with no subsidies. They are back subsidizing again, but at what are to them very affordable levels.

USDA announced, again with great fanfare, a new export subsidy program last May. The results so far can charitably be described as minimal. We blew our credibility when backed down before, and now it will be twice as hard to get the EC, or anyone else, to take us seriously.

The recent announcement of the filing of a GATT complaint against EC wheat export subsidies is just more shrubbery for the administration to hide behind instead of getting into the fight. The failure to use any of the really serious options available to the President under current law clearly tells the EC that this administration is only looking for a way out of the political mess they are in on the trade issue. It says they are not serious about getting results.

But results are what the United States desperately needs, and it is not just U.S. farmers. EC sugar export subsidies are absolutely destroying the world sugar market. A French farmer is paid 27 cents per pound for his beet sugar. It is then sold, through subsidies, at the current world market price of 4.9 cents. The French farmer has seen the value of land for growing sugar beets go from $1,000 to $7,000 per acre. But the depression of the world sugar market through that dumping has cost the Caribbean basin countries billions of dollars. It has probably done just as much to destabilize Central America as the Communist guerrillas have done.

This bill contains some good export provisions that are designed to produce results, not just rhetoric. I commend the Senate Agriculture Committee for recognizing the problems and taking needed steps to deal with them.

This amendment will complement the committee's efforts. It will help see that we use our resources wisely and well, where they will get the most return on our investment. It will help make our export subsidies more effective, and it will add more and better information to the debate on our agricultural trade policy. I urge its adoption by the Senate.

Mr. President, I commend the Senate Agriculture Committee for recognizing this problem and taking the needed steps to try to deal with it. I am appreciative of that. I think this amendment is going to complement the committee's effort. It will help see that we use our resources wisely, that we do not blow them, and that we put them in those areas where we are really having to confront subsidies that are taking crop markets away from the U.S. farmers. It will make those subsidies that we finally are using for exports more effective. And, in all candor, I wish we would both do away with them. But you will never get the other side to do away with it until you take them head on and they understand that we are serious about it. This will help us be more effective in doing it.

I urge the adoption of this by the Senate. I understand that the majority has surveyed it and the minority and feel kindly toward it.

Mr. HELMS. Mr. President, this is a good amendment. If anything it is long overdue. I thank the Senator for his comments about the efforts of the Agriculture Committee. We have a good export title in this bill and this will improve it.

The problem that the Senator has discussed is not some illusory thing or speculative matter. It is real. We are losing jobs; we are losing exports; and we are increasing our deficit day after day.

A couple years ago, I went over to Geneva for the GATT ministerial conference. I was sent by the President. The message that I was to take, and I took as best I could, was that the EC's right to swing its subsidy fist ended at Uncle Sam's nose. I am afraid I overspoke a little bit because it has taken us a couple of years to wake up and smell the coffee with respect to what has gone on.

But I think that throughout this Congress, and certainly among the American people, there is an understanding that free trade is fine, so long as it is fair. But if it is not fair, it is not free.

The Senator's amendment is a good one and I commend him for it. I am delighted to commend it to the Senate and I accept the amendment.

Mr. BENTSEN. I thank the distinguished Senator, the distinguished chairman of the Agriculture Committee. I share with him the view that I am all for free trade, but you cannot be the only country in the world really trying to exercise it.

Mr. HELMS. The Senator is right.

Mr. BENTSEN. And it is time, frankly, that we have a heavy dose of pragmatism and we should quit apologizing for seeking some self-interest for the United States.

Mr. HELMS. The Senator is absolutely right.

Mr. MELCHER. Mr. President, I commend the senior Senator from Texas [Mr. BENTSEN] for presenting a solid amendment, one that we want to accept to provide specific instructions to the U.S. Trade Representative to study and identify those markets where concentrated efforts by the United States need to be taken to offset export subsidies used by foreign countries and to see that it is effective.

The amendment will attempt to expand our markets, and we certainly need to do that. Our foreign agriculture exports have dropped off terrifically, and much to our detriment, causing further surplus in the United States of these commodities, and,

therefore, further depressing the price. Like the Senator from Texas, I do not think we can sit idle and watch this export market slip away from us while we have the commodities to sell and need to sell them and have other countries subsidizing their exports.

So the study provided for in the Senator's amendment is an excellent one. On behalf of our side of the aisle, we not only accept the amendment, we are extremely pleased to support the amendment.

Mr. HELMS. Mr. President, I think at this point it might be well to say a few words about the export title in the farm bill which is now before the Senate.

In the first place, the export title expands the Intermediate Export Credit Program to authorize the guarantee of loans and to require the financing or guarantee of such loans in the amount of $1 billion annually for the next 3 years. The title also requires the Commodity Credit Corporation to make available short-term export credit guarantees in the amount of at least $5 billion annually for the next 4 years.

Specifically, to combat predatory practices of foreign competitors, such as the Senator from Texas has discussed, the bill requires the Secretary of Agriculture to use at least $325 million annually for 3 years to directly assist in the export of U.S. commodities adversely affected by the price or credit subsidies or unfair marketing arrangements used by other countries. To add to the effort, the Secretary of Agriculture is required to sell for export at least 150,000 tons of CCC-owned dairy products annually for 3 years.

Then the bill requires the Secretary to use at least $2 billion of CCC-owned commodities to enhance and encourage export sales of U.S. agriculture commodities during fiscal years 1986 through 1988.

I mention that simply to say that the Senator's amendment fits in well with what the Agriculture Committee is attempting to do, if we can ever get this bill passed and enacted into law.

Mr. President, I suggest we vote on the amendment.

Mr. PRYOR. Mr. President, I am pleased to support the amendment of the Senator from Texas [Mr. BENTSEN] and I hope it is adopted by the Senate. This amendment will set up a mechanism for identifying and targeting foreign export subsidies and other unfair trade practices. It will result in the creation of the first central listing of unfair trade practices that harm our agricultural exports. This listing will make a major contribution to the debate over agricultural policy. If we are to have an effective program to combat unfair foreign trade practices, then we must know what those practices are and how we can best use our own limited resources to combat them.

I think the time is overdue for our Government to "go to bat" for our farmers and to level the playing field of international competition. We have, for too long, allowed our farmers to have the unfair task of having to compete against foreign governments and treasuries, and not against foreign farmers.

This amendment will require the U.S. Trade Representative to report annually on the existence and status of trade barriers. This report will further identify markets in which U.S. export assistance can be used most efficiently and would have the greatest benefit in offsetting unfair foreign subsidies.

Mr. President, this is a "pro-farmer pro-American" amendment that says "enough is enough." Our farmers are the most efficient and productive producers of food and fiber in the world. It's time we allowed them to get on "equal footing" with competitors worldwide.

Mr. ABDNOR. Mr. President, before we do, I seek the floor to support the amendment of the Senator from Texas and to compliment him for his excellent amendment. I just walked into the Chamber. I would like to be listed as a cosponsor, if the Senator does not mind.

Mr. BENTSEN. Mr. President, I am flattered by the statement of the distinguished Senator from South Dakota. I would be delighted to do that. I ask unanimous consent that the Senator from South Dakota be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment of the Senator from Texas [Mr. BENTSEN].

The amendment (No. 908) was agreed to.

Mr. BENTSEN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HELMS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ABDNOR. Mr. President, I have amendment No. 901 at the desk and I would like to offer it at this time.

Mr. HELMS. Mr. President, I ask unanimous consent that the amendment of the Senator from Kansas be temporarily laid aside so that we may consider the amendment of the Senator from South Dakota.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 901

(Purpose: To revise the study of the Farm Credit System and provide for recommendation for improving such system)

Mr. ABDNOR. Mr. President, I have an amendment at the desk and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from South Dakota [Mr. ABDNOR] proposes an amendment numbered 901.

Mr. ABDNOR. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment reads as follows:

On page 376, beginning with line 19, strike out all down through line 20 on page 377 and insert in lieu thereof the following:

SEC. 1718. (a) The Governor of the Federal Reserve System, in consultation with the Secretary of Agriculture and the Governor of the Farm Credit System shall conduct a study of methods to ensure the availability of adequate credit, on reasonable terms and conditions, for farmers of the United States.

(b) In conducting such study, the Governor of the Federal Reserve System shall—

(1) evaluate the financial circumstances relative to both lenders and borrowers of farm credit; and

(2) evaluate the structure, performance, and conduct of the Farm Credit System.

(c) Not later than 180 days after the date of enactment of this Act, the Governor of the Federal Reserve System shall submit to the Committee on Agriculture, Nutrition, and Forestry of the Senate and the Committee on Agriculture of the House of Representatives a report containing the results of the study provided for in this section together with such comments and recommendations for providing a sound and reasonable credit program for farmers as the Governor considers appropriate.

Mr. ABDNOR. Mr. President, the current bill calls for a study of the farm credit system by the Governor of the Farm Credit Administration. With all due respect to the Governor, I do not believe the Agency which has the problem should investigate itself. My amendment would have the Chairman of the Board of Governors of the Federal Reserve System perform that study in consultation with the Governor of the Farm Credit Administration and the Secretary of Agriculture.

My amendment would require the Federal Reserve System to evaluate the financial condition of, and the prospects for, both lenders and borrowers of farm credit and evaluate the structure, performance and conduct of the Farm Credit System.

In addition, the Federal Reserve System would provide recommendations to the House and Senate Agriculture Committees, including recommendations of any assistance needed to stabilize the financial condition of the Farm Credit System and to protect the capital that borrowers have invested in the system.

I expect the Federal Reserve System to address the need for the establishment of a fund to be used to insure institutions of the Farm Credit System against loan losses.

The study is to be completed in 180 days.

I must admit, Mr. President, that my nomination of Paul Volcker to do this study was done with mixed feelings. I am very concerned about the degree of sensitivity that Chairman Volcker has with respect to the current economic depression in agriculture. But then I am not comfortable with the attitudes of many Washington officials regarding rural and agricultural problems. However, there is little question that the Federal Reserve System has the resources to do the job within the legislated time frame and, with proper monitoring, can do the job. The agricultural community will be watching.

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. HELMS. Mr. President, we have examined this amendment on this side. Not only do we find it acceptable, but we find it a piece of legislation for which we commend the distinguished Senator from South Dakota. We accept the amendment.

Mr. ZORINSKY. Mr. President, we have no objection to the Chairman of the Board of Governors working with the Secretary of Agriculture and the Farm Credit Administration in ensuring that there is adequate credit available for the Nation's farmers. I do think that the study provisions in the committee-reported bill are not inconsistent with the thrust of the Senator's amendment, and would want to see them retained in the legislation.

Mr. ABDNOR. I thank both the chairman and the ranking minority member for their support. Thank you very much.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from South Dakota.

The amendment (No. 901) was agreed to.

(Later the following occurred:)

AMENDMENT NO. 901 AS (MODIFIED)

The PRESIDING OFFICER (Mr. COHEN). The Senator from North Carolina.

Mr. HELMS. I thank the Chair.

Mr. President, on behalf of Senator ABDNOR, I ask unanimous consent that the amendment offered by the distinguished Senator from South Dakota earlier today, amendment No. 901, be modified, which modification I send to the desk. I might add that this has been cleared, as I understand it, on the other side.

The PRESIDING OFFICER. Without objection, the amendment is so modified.

The modified amendment is as follows:

On page 376, beginning with line 19, strike out all down through line 20 on page 377 and insert in lieu thereof the following:

SEC. 1718. (a) The Chairman of the Board of Governors of the Federal Reserve System, in consultation with the Secretary of Agriculture and the Governor of the Farm Credit System, shall conduct a study of methods to ensure the availability of adequate credit, on reasonable terms and conditions, for farmers of the United States.

(b) In conducting such study, the Chairman of the Board of Governors of the Federal Reserve System shall—

(1) evaluate the financial circumstances relative to both lenders and borrowers of farm credit; and

(2) evaluate the structure, performance, and conduct of the Farm Credit System.

(c) Not later than 180 days after the date of enactment of this Act, the Chairman of the Board of Governors of the Federal Reserve System shall submit to the Committee on Agriculture, Nutrition, and Forestry of the Senate and the Committee on Agriculture of the House of Representatives a report containing the results of the study provided for in subsection (a), together with such comments and recommendations for providing a sound and reasonable credit program for farmers as the Chairman considers appropriate.

(d) The Governor of the Farm Credit Administration shall conduct a study of the need for the establishment of a fund to be used—

(1) to insure institutions of the Farm Credit System against losses on loans made by such institutions; or

(2) for any other purpose that would—

(A) assist in stabilizing the financial condition of such System; and

(B) provide for the protection of the capital that borrowers of such loans have invested in such System.

(e) In conducting such study, the Governor shall—

(1) consider the advisability of using the revolving funds provided for under section 4.1 of the Farm Credit Act of 1971 (12 U.S.C. 2152) to provide initial capital for the fund referred to in subsection (d); and

(2) estimate the amount and level of future assessments levied on institutions of the Farm Credit System that would be necessary to ensure the long-term liquidity of such fund.

(f) Not later than 180 days after the date of enactment of this Act, the Farm Credit Administration shall submit a report containing the results of the study required under subsection (d) to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate.

(Conclusion of later proceedings.)

Mr. DIXON. Mr. President, what is the order of business?

The PRESIDING OFFICER (Mr. SYMMS). The pending question is amendment 904 offered by the majority leader to S. 1714.

Mr. DIXON. Mr. President, I ask unanimous consent that that amendment be temporarily set aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 910 AND AMENDMENT NO. 911

Mr. DIXON. Mr. President, I will state for my colleagues that my purpose in making the request is to send two amendments to the desk that I contemplate offering at an appropriate time later this afternoon after the distinguished chairman of the Agriculture Committee, Senator HELMS, and the ranking minority member on our side, Senator ZORINSKY, have had an opportunity to examine the amendments.

The PRESIDING OFFICER. The amendments will be stated.

The bill clerk read as follows:

The Senator from Illinois [Mr. DIXON] proposes an amendment numbered 910 and an amendment numbered 911.

Mr. DIXON. Mr. President, I send these two amendments to the desk. I do not ask for their immediate consideration.

I ask unanimous consent that the reading of the amendments be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DIXON. Mr. President, at such appropriate time as the distinguished chairman of the Agriculture Committee and the ranking minority member have had an opportunity to examine these amendments, I wish to bring them up again.

The PRESIDING OFFICER. The amendments will be received and will lie on the table.

Mr. DIXON. I thank the Chair.

Mr. GRASSLEY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DIXON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. DANFORTH). Without objection, it is so ordered.

Mr. HELMS. Mr. President, will the Senator yield?

Mr. DIXON. Yes. Of course.

Mr. HELMS. Mr. President, I ask unanimous consent that the pending amendment by the Senator from Kansas be temporarily laid aside so that this amendment may be considered.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DIXON. I thank the distinguished chairman of the committee.

AMENDMENT NO. 911

(Purpose: to express the sense of Congress that new Federal initiatives are needed in the area of research on new or improved food processing or value-added food technologies)

Mr. DIXON. Mr. President, I understand that No. 911 is at the desk. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. DIXON. I believe I previously asked that we dispense with the reading of the amendment. I believe that was allowed.

The PRESIDING OFFICER. The clerk still needs to report the amendment.

Mr. DIXON. I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Illinois [Mr. DIXON] proposes an amendment numbered 911.

Mr. DIXON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 285, between lines 14 and 15, insert the following:

(1) in paragraph (8)—

(A) by striking out "and" at the end of subparagraph (N);

(B) by inserting "and" at the end of subparagraph (O); and

(C) by adding at the end thereof the following:

"(P) research on new or improved food processing or value-added food technologies;";

On page 285, line 15, strike out "(1)" and insert in lieu thereof "(2)".

On page 285, line 17, strike out "(2)" and insert in lieu thereof "(3)".

On page 285, line 19, strike out "(3)" and insert in lieu thereof "(4)".

Mr. DIXON. Mr. President, during this time of great crisis in the agricultural sector of our Nation, we need to focus our efforts on research and technology. Research and the development of new technologies will help us realize our greatest hopes for agriculture. We desperately need to strengthen the scientific base of America's food industry.

Mr. President, the Federal Interagency Research Subcommittee observed in its publication, "Research: Background for 1985 Farm Legislation," that there has been an increasing decline in productivity for food processing over the last 25 years. The report goes on to state that one major cause of poor productivity is the low investment in research and development in the food processing and distribution sector. The report concludes that "improved technologies are badly needed in processing."

For this reason, I am introducing amendments which would include high priority status for food processing or value-added research, and would require the Department of Agriculture to appoint food technologists from accredited or certified departments of food technology to the Joint Council on Food and Agricultural Sciences and to the National Agricultural Research and Extension Users Advisory Board.

The Department of Agriculture has not previously included food science or food processing in its list of 1986 priorities for research, extension, and higher education.

It is vital to recognize that any expansion in research will help our farmers sell their products. I urge support of these important amendments dealing with research and technology.

Mr. President, I ask unanimous consent that a paper prepared by the Institute of Food Technologists entitled, "The Needs of Food Science and Technology Research and Development," be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE NEEDS OF FOOD SCIENCE AND TECHNOLOGY R&D—FOR A HEALTHIER AMERICA

INTRODUCTION

Alarmed by inroads made by foreign food producers and manufacturers, IFT has determined the critical need for a concerted effort to improve the scientific base for America's food industry. A workshop held in November, 1984 delineated R&D requirements (summarized below). Now IFT is presenting this need to Congress and federal agencies, focusing on the 1985 Farm Bill. The major points follow.

Key points: Direct increased federal research support now to:

Broaden the basic science of food properties through fundamental research. This will enable the use of automation in food processing, and enhance food safety and the environmental compatibility of food and agricultural processes.

Develop new and better foods to further improve nutrition and increase the use of farmers' output. Value-added R&D can lead to new uses for raw ingredients—corn, wheat, soybeans, etc.

BENEFITS AND PAYOFFS

A. Greater scientific depth and sharpened technology can help U.S. food producers compete more successfully with foreign manufacturers.

B. By developing innovative food products, the output of the American farmer can be more fully utilzed.

C. Greater value-added of food products will return more tax dollars to federal and state governments.

D. More jobs can be created for American workers.

E. Increased competition and more efficient processes will tend to lower prices to consumers.

F. Enhanced nutrition, developed through research, new food items, and consumer education will tend to improve the wellness of Americans. Over the long term, this can substantially reduce the nation's health care costs.

WORKSHOP THEMES

Two hundred outstanding scientists met last fall with IFT to discern and specify the most critical food science and technology research needs into the next Century.

Their mandate: Define R&D priorities which will restore this country's competitive edge vis-a-vis foreign manufacturers. Determine the research to be done which is essential to maximize nutrition and, thereby, health, and tap the economic potential of enhanced value-added food processing. ("Value-added" is an economists' term to indicate the extent to which a product increases in economic value as it moves through the processing chain. In each step of the process, from raw material to sale to the consumer, the product attains more value. The value is reflected in its initial costs, plus the science, machinery, energy labor, etc. put into it. It is accepted that 80 percent of the value added of food products results from processing.)

MAJOR WORKSHOP FINDINGS

Forty-two program proposals from the IFT Workshop are encompassed in seven major research thrusts. They are directed as follows:

1. Develop innovative technologies to improve processing, and especially integrate value-added research with promising biotechnologies. Develop available science for badly-needed productivity gains in processing. Foster the use of robotics in food industries. (Each one percent improvement in yield—or increase in productivity—would return $1 billion to the economy).

2. Develop scientific techniques which will improve agricultural, food, dairy and meat products. Such research, including genetic engineering, promises quality improvements in both the palatability and nutritive value of foods.

3. Increase scientific understanding of food constituents—the physical, chemical and biological properties and structures of foods and related materials. Accompany this research with parallel efforts to employ the findings to improve processing, nutrition, food safety, and environmental compatibility.

4. Develop innovative analytical procedures. These must be rapid, nondestructive, simple, continuous, on-line, automated and inexpensive. These can help link advances in biotechnology to improvements in food safety, by providing quick and reliable monitoring of processes and properties of foods.

5. Develop better knowledge of mechanisms which control biological activity. To do so will help both the safety of foods and their relationship to the environment.

6. Obtain and evaluate critical data related to health and nutrition, and to chemical and mircobial safety.

7. Determine long-term needs for scientifically-trained personnel, and fund programs—including laboratory facilities—to meet these needs.

THE PRESENT SETTING

Despite deepening inroads by foreign manufacturers into U.S. markets, research programs within the U.S. Department of Agriculture remain substantially oriented to increased farm production, even in the face of growing surpluses. Currently contemplated programs largely retain this emphasis. What scant post-harvest research exists in these USDA programs (only 15 percent of all budgets) is focused largely on marketing economics, packaging and transportation—not on food characteristics useful in the marketplace. Further, this proportion has declined steadily over the past 20 years.

The USDA's "Joint Council" and "Users Advisory Board" consist mainly of agricultural production-oriented persons, and their reviews of USDA programs minimally reflect the potential contributions of post-harvest or value-added research. The same is true of the USDA Experiment Station Committee on Organization and Planning.

The 1981 National Agricultural and Food Act (the Farm and Food Act) in its R&D sections contains no mention of food processing or post-harvest technology. Value-added considerations are totally absent. In both proposed legislation (1985 Farm and Food Bill) and recommendations from established groups, emphasis largely remains on trends of the past. Some new emphasis does fall on biotechnology research, but this

lacks sufficient consideration of how this science's possible developments can be translated into useful products in the marketplace, domestic or foreign.

Food regulations created to meet old exigencies have the effect of forcing private sector R&D resources into "defensive research," to meet various labelling or safety mandates. This drains R&D resources from the creation both of new and better foods and more internationally competitive technologies.

In both the Agriculture and Health and Human Services departments' nutrition research programs, food scientists and technologists are sparsely represented. Beyond this, there is a need to broaden support for nutrition research, both on nutritives values of foods and nutrient requirements of both the general population and special subgroups for which capability beckons. Better coordination and reduced diviseness between the two agencies' programs is essential.

IFT RECOMMENDATIONS TO CONGRESS

Based on Workshop findings, IFT testimony before both the House and Senate Agriculture committees made the following recommendations:

Authorize increased R&D funding (by redirecting planned appropriations) earmarked for food science and technology—through value-added research—by $50 million for FY 1986 (and eventually $275 million per year).

Include more food technologists on the Joint Council on Food and Agricultural Sciences and the Users Advisory Board.

Encourage the USDA (ARS and CSRS) to strongly incorporate food science and technology research in their external programs.

Separate food science and technology institutionally within ARS and CSRS from marketing economics research.

Bring food regulations up to date, so research funding can be freed to advance science and technology, instead of defending against outmoded and outdated regulatory constraints.

Incorporate active roles for food scientists in DHHS and USDA nutrition programs.

Integrate value-added research into the USDA competitive grants systems.

Recognize the need for scientifically trained food scientists by providing sufficient educational funding and training grants.

NATIONAL SECURITY IMPLICATION

The benefits above speak for themselves; beyond these lies a more fundamental consideration:

The economic health of this nation already has been threatened by foreign assaults at U.S. and overseas markets in steel, autos, electronics. A similar threat now portends in agriculture and foods. If the scientific base for this country's food system is not strengthened soon, fundamental policy decisions will be abrogated to others. Foreign producers will decide what we will eat, and who will produce it. These decisions will profoundly impact our national agricultural policy, our food producers, consumer choices, and ultimately the economic and physiological health of this nation.

IFT feels such matters are too important to be decided in foreign capitals.

Mr. DIXON. Mr. President, I believe amendment No. 911 has been cleared on both sides, both by the distinguished manager of the bill, the chairman of the Agriculture Committee, Senator HELMS, and by the distinguished ranking member, the manager on our side, Senator ZORINSKY. There were some minor changes made in the amendment. I believe it is now acceptable to both sides.

This amendment expresses the sense of the Congress that new Federal initiatives are needed in the area of research on newer, improved food processing or value-added food technologies.

I believe it has been adequately discussed by the appropriate managers on both sides.

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER (Mr. COCHRAN). The Senator from North Carolina is recognized.

Mr. HELMS. Mr. President, it has indeed been discussed and considered. We find it not only acceptable but an excellent amendment. This side approves of it.

I might say, Mr. President, that research to promote value-added products will help create jobs at home and improve the problem of our agricultural surpluses. I believe our agricultural research program should give high priority to this type of reseach, and I certainly commend the Senator from Illinois for submitting this amendment.

Mr. ZORINSKY addressed the Chair.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. ZORINSKY. Mr. President, we have examined the amendment, and believe it has merit. I congratulate the distinguished Senator from Illinois for introducing the amendment, and for his excellent work in drafting the Agriculture Committee farm bill.

I urge adoption of the amendment.

Mr. HELMS. Mr. President, I ask the distinguished Senator from Illinois whether he struck the words "(such as food irradiation)" on page 1, line 10.

Mr. DIXON. The distinguished manager of the bill is correct. At the request of the distinguished Senator from North Carolina, and others, we struck the words on page 1 "(such as food irradication)."

On the second page, we corrected the page number in lines 3 and 5 from 295 to 285, so that will be accurate.

Mr. HELMS. I thank the Senator.

Mr. DIXON. I thank the manager.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Illinois.

The amendment (No. 911) was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DIXON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DIXON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 910

(Purpose: To require the Secretary of Agriculture to appoint two food technologists to the Joint Council on Food and Agricultural Sciences and two food technologists to the National Agricultural Research and Extension Users' Advisory Board)

Mr. DIXON. Mr. President, I have at the desk an amendment numbered 910, I believe. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. DIXON. I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the pending amendment is set aside for that purpose.

The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Illinois [Mr. DIXON] proposes an amendment numbered 910.

Mr. DIXON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 287, line 5, insert "(a)" after the section designation.

On page 287, between lines 8 and 9, insert the following new subsection:

(b) Section 1407(b) of such Act is amended by inserting before the last sentence the following new sentence: "To ensure that the views of food technologists are considered by the Joint Council, two of the members of the Joint Council shall, as determined to be appropriate by the Secretary, be appointed by the Secretary from among distinguished persons who are food technologists from accredited or certified departments of food technology, as determined by the Secretary.".

On page 287, between lines 14 and 15, insert the following new subsection:

(b) Section 1408(b) of such Act is amended—

(1) by striking out "twenty-five" in the matter preceding clause (1) and inserting in lieu thereof "27";

(2) by striking out "and" at the end of clause (10);

(3) by striking out the period at the end of clause (11) and inserting in lieu thereof ", and"; and

(4) by adding at the end thereof the following new clause:

"(12) two members who are food technologists from accredited or certified departments of food technology, as determined by the Secretary.".

On page 287, line 15, by striking out "(b)" and inserting in lieu thereof "(c)".

Mr. DIXON. Mr. President, may I say to my distinguished friends, the managers of the bill, that this amendment has now been cleared on both

sides—with the Department of Agriculture, and my colleagues, the distinguished chairman of the committee, and the ranking member. They should know that on the first page of this bill, in line 9, after the word "shall" and before the word "be" we have inserted, at the request of both sides and the Department of Agriculture, these words:

* * *, as determined to be appropriate by the Secretary, * * *.

May I say, Mr. President, to my distinguished colleagues, the manager and the ranking member, that this is now cleared, as I understand, on both sides.

The purpose of this amendment is to require the Secretary of Agriculture to appoint food technologists to both the Joint council on Food and Agricultural Sciences and the National Agricultural Research and Extension Users' Advisory Board.

Mr. HELMS. Mr. President, has the Senator completed his remarks?

Mr. DIXON. Yes.

Mr. HELMS. Mr. President, since this amendment has been modified, it is satisfactory to both sides. Therefore, we accept the amendment.

Mr. ZORINSKY. Mr. President, we have examined the amendment on this side. It will improve the committee reported bill. We urge its adoption.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 910) was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment, as modified, was agreed to.

Mr. DIXON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DIXON. Mr. President, I thank the chairman of the Agriculture Committee and the ranking member for their cooperation.

Mr. HELMS. Mr. President, we are awaiting the arrival of the distinguished majority leader [Mr. DOLE]. I believe at that time we will be in a position to continue consideration of the animal welfare amendment. Pending that, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. MATTINGLY). Without objection, it is so ordered.

Mr. DOLE. Mr. President, I understand we may be near a resolution of the animal welfare amendment on the farm bill. Senator MELCHER has been very helpful. We hope we can dispose of that amendment within the next 15 or 20 minutes.

I know the distinguished chairman, Senator HELMS, has been here all day, along with Senator ZORINSKY, and others, and they are prepared to take up a series of amendments. There are still, as I view it, 30 or 40 possible amendments to the farm bill.

So if Members have amendments that we can dispose of today without votes, the chairman would be pleased to have those amendments brought to the floor.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. EXON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EXON. Mr. President, I wish to take the time this afternoon to give the Senate my view of the tremendously important matter before us, known as the farm bill. I anticipate that my colleagues would suspect that the Senator from Nebraska, who has been an advocate of sound farm programs for a long, long time, would have something to say about the importance of the matter, but I cannot overemphasize the crisis situation that affects large segments of agriculture today.

I wish to take a few minutes of the Senate's time to try to put this into perspective and to place in the RECORD some information that I think will be very helpful to our colleagues who, I think, are seeking more detailed and understandable information on the seriousness of the matter before us before we proceed, later on this week or next week, on tremendously important amendments that I understand will be offered to this bill.

Mr. President, I simply cannot impress on my colleagues enough the importance of the measure that we are working on today. I only hope that we would recognize in America that the posture that we are in on the bill now is not one to my liking. I would prefer that it had not been brought up as a sort of interim thing. We got hung up on the reconciliation bill so we rushed in and brought up the farm bill to kind of fill in time when we "don't have anything else to do."

I was on the floor when this measure was brought up last week and I heard the discussion then that we may go off this bill if we can get some kind of agreement on reconciliation and this had to be pulled down. I therefore say that the critical matter of agriculture and what is going on and not going on in rural America today is something that is deserving of more and higher priority consideration by the Senate.

I do object to the fact that we are kind of filling in time between agreements being worked out on other measures that are before the Senate at this time.

This bill that we are working on may well decide the fate of a large number of our family farmers across this Nation. This is a heavy responsibility and one which I hope this body will recognize and meet as we proceed in the days ahead with debate and passage of this bill.

I hope we have all heard about how tough things are "down on the farm." I want my colleagues to know those Americans who produce our food are not "crying wolf." Farmers are not asking for a "get rich scheme," they are crying out for survival. They want to be able to pay their bankers. They want to be able to pay their suppliers. They want to be able to provide their families with necessities. The situation is that bad, and it is time we did something constructive.

Agriculture is facing depression such as it has not seen since the 1930's. That is not an overstatement; if anything, it is an understatement.

At least in the thirties, the farmers could see and understand most of their problems. They felt the scorching drought, they saw the dusty winds, and the dust piled high above the fence rows like snow, and they fought the grasshoppers that devoured anything green that dared push through the parched remaining soil. Those farming or ranching in 1985 find themselves fighting to overcome a different kind of plague. Instead of dust, we see a flood of grain weighing heavily on our markets. Instead of grasshoppers, we have excessive interest rates eating away at what little profit there is to be made. Instead of the drought of the 1930's, our farmers today are experiencing a drought in the international marketplace where the export markets of the 1970's have dried to a trickle in the 1980's. Even though the causes are different, the effects are the same. We are truly revising the depression on the farm comparable to that time some 50 years ago.

If the financial collapse facing farmers is not enough to move us to action, look at some other hard, cold facts. Reliable studies show that over the next 5 years the economywide impact of loan losses from agriculture alone could have the following impacts:

Business investment down $24 to $38 billion;

Housing starts down 115,000 to 189,000 units;

Real GNP down $31 to $49 billion;

Job losses 178,000 to 275,000.

Mr. President, the chairman of the Senate Agriculture Committee has said this farm bill has serious flaws. I agree. The flaw with this bill is that it

will not do enough. I think it is our responsibility to do more, certainly not less.

Mr. President, I also noted this morning that the Secretary of Agriculture is at it again. It seems to this Senator that virtually every time the Senate is about to take up a matter affecting the farmers of this country, the Secretary goes to the public and indicates that the matter in question is veto bait because it is too costly. Of course, he then pulls out his new cost analysis, conveniently revised by his own subordinates, to prove his already dubious argument.

Well, I can say flatly that this Senator is growing increasingly weary with this negative approach. Furthermore, I do not think the Secretary's credibility is enhanced by the continued jockeying of numbers to support his basic premise. As a member of the Senate Budget Committee, I can say that USDA cost analyses for programs have been wrong more times than right. Given this fact, how can the Secretary keep coming back asking us to believe his prediction about the cost of the Senate farm bill.

I also remember, Mr. President, that the Secretary of Agriculture has been wrong, wrong, wrong several times when he testified before the Senate Budget Committee about the projected farm income for the year to come.

Mr. President, we have heard time and time again that this administration has spent billions on agriculture in an effort to improve the overall farm economy only to see it continue to decline. This admission of failure has caused the administration to once again change their philosophy on farm policy. Now they tell us that the real solution to the current depression in rural America is eliminating commodity price supports and turning the family farmers loose on the free market in order that they can export their way out of their financial problems.

I suggest, Mr. President, that instead of turning the farmers loose on the "free market," as Secretary Block recommends, such a policy at this time would be more like turning Faye Ray loose on King Kong. Our farmers would be swept up by the highly controlled international marketplace and would almost assuredly meet certain demise.

Not only has the Secretary of Agriculture trotted out on his veto horse in full gladiator armor over the cost issue, he has also unsheathed his gold-plated veto sword on the subject of farmer referendums.

Last week the President of the United States gave a ringing defense of democracy at the United Nations. I applaud that speech. But what about American farmers right here at home? Why can they not vote on their economic future?

To listen to the administration's claims and threat about cost, you would think a referendum would also be a budget buster. No way, Mr. President. A successful referendum on production controls would save money, and all of the estimators of what it would do to the budget agree on that. And it would raise farm income, which is supposedly what we are trying to do with the farm bill.

That is what this farm bill should be all about, raising farm income. And that is what we must do, or rural America will never see a recovery from the depths of the agricultural depression we are now seeing.

This is the task before us. In the next few days, the Senate will be debating the issue and dealing with amendments. As we work our way through this farm bill, let us remember the goal of raising farm income and keep our eyes on the ball. We must remember that this legislation will set Federal farm policy for 4 years. We had better do the job right.

Mr. President, a tremendously informative booklet has been printed by experts on the subject that we are discussing. Mr. President, it is entitled "A Prelude to the 'Crash of '87'." A key statement in this report, which is well documented by experts in the area, says how cutting AG supports will likely increase rather than decrease the Federal budget deficit.

Mr. President, I recommend the information to my colleagues because in a rather short space of time it indicates, as best any short document can, the serious situation that we are facing.

Mr. President, I ask unanimous consent that a full copy of "A Prelude to the 'Crash of '87'" be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

A PRELUDE TO THE "CRASH OF '87"

The current "Farm Crisis" is the result of many factors, including surpluses, loss of much of our foreign trade, low prices, substantial farm debt, over production (due primarily to improved farming methods), less political "clout", an uninformed press, and a public interest in reducing the Budget Deficit.

Since 1982 bank regulators and near panic stricken bankers caused by regulators demands have been destroying farm values, farm equities, small town banks, and farm credit agencies, which will soon also decimate the reserves of the F.D.I.C. and add to the growing burdens of the Treasury and the Federal Reserve.

The "Dominoe Effect" of these conditions is spreading like wildfire throughout the "farm states" and in the agriculture dependent areas of other states and is predicted to soon have substantial impact on business, insurance, and banking throughout America.

Cutting Agriculture supports can increase (not decrease) the Federal Deficit.

Every $1.00 of Farm Foreclosures, Write-downs and Bankruptcies, can likely, eventually, cost the U.S. Treasury $2.00!!!

THE DOMINOES—FOR USE IN THE ILLUSTRATION

1. Bank regulators (adverse classifications, write downs, charge offs).
2. Lenders (foreclosures, land and equipment auctions, write downs, charge offs, et al).
3. Farm values plummet.
4. Virtually no buyers for farms and ranches: No cash—no credit.
5. Small town business in trouble.
6. Small town banks in trouble.
7. Distributors of seeds, pesticides, fertilizers, and farm equipment in trouble.
8. Property tax sources dry up.
9. Farm credit agencies in trouble.
10. FDIC pays losses on small town banks.
11. FDIC staff and travel costs accelerate.
12. Municipalities default on bonded debt and obligations.
13. Electric Power Company bonds default.
14. Land grant colleges and public school system—income drops, tax base erodes, school bonds and loans default.
15. State income and sales tax revenues decrease.
16. Trust funds in Commercial Banks lose value.
17. Investment in farm credit agency paper is lost.
18. Regional banks lose on bank stock loans, farm and commercial loans.
19. Life insurance company investments in farm land and other Ag sector investments go sour and policies lapse.
20. Manufacturers of farm equipment and producers of seeds, pesticides and fertilizers lay off workers or go out of business.
21. FDIC pays losses on regional banks.
22. Investors in bank securities lose.
23. Farmers Home Administration Loan Portfolio decimated.
24. Money center banks in trouble as Ag chemical and farm machinery manufacturers, correspondent banks, et al fail and municipal bonds default.
25. Full scale loss of confidence in U.S. banking system.
26. Full scale loss of confidence in U.S. insurance system.

"Please send money, Mr. Baker, we're running out of it here."

The U.S.A. food and agricultural system is the single most important component of the American economy.

This system—which includes the production, preparation, delivery and sale of edible crops. livestock, textiles, leather and tobacco—is responsible for about one-fifth of the United States' gross national product (GNP):

Contributors:	*In billions of dollars*
Farm producers	74
Farm input suppliers (tractors, harvesters, equipment, fertilizers, pesticides, pharmaceuticals and services)	178
Manufacturers and processors of food and fibre	135
Distribution (transportation, sales, servicing, etc.) of food and Ag products	240

It provides 21-22 percent of the employment in America:

	Number of workers
Owner-operators and farm workers	3,770,000

	Number of workers
Producers of supplies and services purchased by farmers	4,000,000
Food processing, transportation and marketing	16,000,000

It is interesting to note that in the states that have been the largest beneficiaries of "Defense Job Welfare Programs" that land values have increased or have remained resonably firm.

State	Percent change in farmland values 1981–85	Prime contract awards 1983 (defense jobs welfare) per capital
Texas	+45	$578
Washington	+3	968
New England	+29	[1] 1,102
New York	+1	548
Virginia	+14	1,322
California	0	1,114
Nebraska	−46	103
Montana	−15	148
Iowa	−49	139
Illinois	−42	134
North Dakota	−20	209
South Dakota	−33	61

[1] Mass.

It's not just the $216 billion of Farm Debt but also the other billions of dollars of municipal government, business, and industry debt related to the Ag sector that is of major concern to bankers and insurance companies.

Government programs and policies directly or indirectly affecting agriculture have a dramatic impact upon the other parts of the food and agricultural industry.

For example, when the net income of farmers drops substantially, as it did from 1979 ($32.3 billion) to 1983 ($15.7 billion), the business of input suppliers is drastically affected.

A. Sales of all types of farm machinery fell anywhere in a range of 40 percent (mower conditioners) to 77 percent (four-wheel-drive tractors) from 1979 through mid-1983.

B. Nearly 1,200 farm equipment dealerships closed their doors from 1981 through 1983, a closure rate more than twice the historical average.

C. More than 20,000 machinery manufacturing workers were laid off.

D. The real value of pesticide sales declined by one-third, from $1.5 billion in 1979 to $1 billion in 1983, with plants operating at 54 percent capacity.

E. Fertilizer use dropped 18 percent during the same period.

SOME HISTORY NOT TO FORGET

1. Domestic agriculture has always been the primary source of our food, clothing and shelter, three essentials to our continued existence.

2. Since the Continental Congress first recommended it 208 years ago, "aid to agriculture" has been a major concern of the nation's public policy.

3. This historic concern and support of the nation's food and agricultural system has been a major contributor to the fact that Americans are the best fed and best housed humans on earth—and at a more reasonable cost than anywhere else in the world. (For example, less than 13% of U.S. personal spending goes for food consumed at home. In Japan it's 21%. In Russia it's 31%).

3. In the 1970's a main concern was that world food needs would outpace production. Many believed—inside and outside of government—that the agricultural issue of the future was going to be how to produce enough for a starving world rather than surpluses.

A. Many also believed that the United States was the only country that possessed the potential to expand food production enough to meet world needs.

B. Land was (and was to be) of great value. ("They just weren't making it anymore".

C. During the decade of the 1970's the volume of U.S. exports increased by over 150 percent in response to the growing world demand. This growth in world demand is evidenced by an increase of nearly a third in world grain consumption and a rise in oilseed consumption of over 50 percent. The situation is similar for other major commodities produced in the U.S.

D. During this period colleges and the USDA and others were teaching farmers how to become more efficient; what new equipment to use; how to buy land; and how to borrow the dollars to do so.

E. Federal Agriculture Officials went up and down the land and preached "fence row to fence row farming."

F. Bankers were there to help finance this "growing world wide need". Prior to the Carter grain embargo on Russia, the U.S.A. provided 70% of Russia's needs. Now we're lucky to supply 20%–30% of their needs.

5. The current high value of the U.S. dollar in international trade (which tends to make U.S. Ag products less competitive world wide) has been influenced only very slightly by Federal Agriculture supports (because it contributes so little—1–2% to the Federal Budget Deficit.) On the other hand, the quality and quantity of our food products contribute $20 Billion to the U.S. net Balance of Trade.

6. Bankrupt farmers who are currently being forced to move off the land and into the city add to the unemployment rolls and increase social welfare costs. In past years when farmers "sold out" to their neighbors or others and moved to the city, they had money to live on, to invest in small businesses or securities, or to tide themselves over until productive employment skills could be learned and put to work. Such is no longer the case.

Families who remain on the farm are able to take care of themselves by providing much of their own food, heat and housing costs and to lead a healthy and productive life.

FARM OPERATORS HAVE SPECIFIC UNIQUE NEEDS THAT ARE NOT OFTEN FULLY UNDERSTOOD

1. *Investment Capital Requirements.*—Agriculture assets, as a whole, rival those in the manufacturing sector.

The average capital asset needs per farmer are much higher than that of the average employee in the rest of the economy.

2. Today's commercial farmer is comparable, not to the wage-earner/consumer of the city or suburbs, but to the owner of a small manufacturing operation.

3. The average farmers income is vastly more variable and insecure from year to year than the average wage earner.

4. *Working Capital Requirements.*—Extensive purchasing of supplies and services by farm operators, long before they receive the income from the sale of commodities produced, requires vast sums of operating and investment credit. Our farmers and ranchers have become, as noted, business managers and operators who are, in terms of physical capital, two-and-one-half-times as capitalized as U.S. manufacturers (on a per-worker basis) (without considering the land they own and/or rent for farming.)

BANK REGULATOR ACTIONS—A BASIC PROBLEM FACING AMERICA

1. Plummeting farm land values today are not due to the "Free Market" at work. The substantial recent drops (40–50–60%) in farm and ranch land values in the farm sector are caused primarily by the "self-destruct" actions of bank regulators and affected lenders.

These actions quickly:

Destroy many lifetimes of building up of farm assets and equity;

Destroy some of the nation's most efficient food producers;

Destroy extensive values of loan collateral;

Destroy (eventually) the actual funds of the depositors in banks that the regulators are trying to protect.

2. When bankers foreclose on commercial business organizations such foreclosures often strengthen other competitive businesses in the area and makes them more profitable.

3. However, when bankers foreclose on farms and ranches, other land and equipment values in the area nearby are rapidly driven downward; farm equities evaporate; bankers foreclose on loans, and the general business and financial structure of the entire area are threatened.

4. The current, near panic foreclosures and write downs occurring in the nation's farm sector are seriously damaging not only the approximate 3,987 farm sector banks, but are also threatening the larger banking and financial structure of the U.S.A.

THE IMPENDING BANKING DISASTER IN NEBRASKA

1. Commerical Banks in Nebraska have a combined net worth of $1,240,000,000.

2. Nebraska has 62,000 farms and ranches.

3. Their average value is $500,000.

4. Approximately ½ of them owe more than 50% of their value to banks, farm credit agencies, insurance companies and other creditors. Approximately half of this debt is held by commercial banks.

5. Bankers and economists in Nebraska are forecasting that 15–20% of these farms will be forced out of business in 1986. 62,000 farms × 15% failures = 9,300 farm failures.

6. These 9,300 farms at $500,000 average value totals $4,650,000,000 in total asset values. The debt of these failed farms is estimated at $2,500,000,000.

7. If commercial banking's share of this debt is 50%, they are facing $1,250,000,000 in charge offs, writedowns, et al. All of which, under the best conditions, will threaten much of the capital accounts of Nebraska banking, which have already been weakened.

Continued strong support of the Ag Sector by Congress and the Administration is an essential investment for America. It is a relatively small price to pay to help avoid the "Crash of '87".

A popular feeling is that the U.S.A. now has too much Agriculture production. Some believe also that the U.S. "Welfare State" has "too many" and "too much" of alot of things, i.e.—defense workers—lobbyists—hospitals—medicare and medicaid rich doctors—nurses—non profit groups and associations—space program workers—single parents—unproductive social security and other welfare recipients—all propped up by huge

Federal Government outlays. These outlays represent more than 80% of the Federal Budget—as compared with the mere 1-2% that is traditionally spent in keeping our "agriculture house" together.

HOW TO HELP AVOID THE "CRASH OF '87"

1. Bank Regulators must take a more long term and historic view of changing farm values and equities and to recognize that their current policies and practices can well trigger the "Crash of '87".

2. Congress should maintain price and other supports through a transition period as a budget saving investment for the future.

3. Remove, for the time being, some farm and ranch land currently in production. Set it aside under government control until this country needs it or until it can be determined how it can be best used to preserve world peace and to feed the 40% of the world that goes to bed hungry every night.

4. Allow banks to hold land as an asset without adverse classification if certain conditions exist (i.e. annual returns exceed cost of funds).

5. Implement aggressive, competitive, skillful foreign trade actions by the Federal Government.

The "Free Market" philosophy is a good one, but there is no such thing in International Agriculture trade. Our foreign competitors don't practice free trade. Their governments are able to meet whatever low prices our agriculture products may sell at.

6. Set up a Bi-Partisan Committee to re-examine and re-establish a "National Food Policy". Also determine what effect Russian and Cuban activities in grain futures is having on U.S. Agriculture. Develop a better way to deliver "Food for Peace" and to provide foreign aid.

7. Have regular meetings at the White House level with the FDIC, Comptroller, Treasurer, Agriculture Dept. and selected Ag Sector Senators and Congressmen. Among other things, determine the actual economic impact on U.S. Banking, Business and Finance and the Treasury of present "Free Market" and Ag Budget cutting philosophies of the Administration.

Mr. EXON. Mr. President, I simply say to the Senate that no bill is more important to not just rural America but also to all America and the continuation of the economic recovery we are seeing taking place today. Some sectors of our economy are at risk unless we can write an acceptable farm bill here in the next few days.

Mr. HELMS. Mr. President, I have listened, as always, with interest to the able Senator from Nebraska. He is my friend, and he is a valuable Member of this body.

I can assure him that the consideration of the farm bill is by no means a fill-in proposition.

I have here, if the Senator would like to see it, the schedule. It indicates that the farm bill was supposed to come up for consideration this past Thursday. We missed that by 1 day, and we are now on it; and the schedule calls for us to be on the farm bill through Wednesday, November 6. That may be a little optimistic or it may not be. We will see.

However, the point is that the distinguished colleague of the Senator from Nebraska [Mr. ZORINSKY] and I have been on this floor both Friday and today, pleading with Senators to come and offer amendments to the farm bill. As of this hour, 9 minutes to 4, we have been able to handle 4 amendments out of the 31 I have on my list, on which we had hoped Senators might come and begin earnest debate.

I will not have any comment about whether or not the Senate is a Tuesday through Thursday club. But I agree with the Senator: I think it is time we got down to brass tacks and gave full consideration to the production of a sensible farm bill.

The Senator, in a very gracious way, mentioned my interest in some aspects of the farm bill, and he is right. I believe that I see some serious flaws that simply must be remedied if we are to have legislation that will be meaningful to the farmers of America.

For example, I say to the Senator that in the bill as reported by the Agriculture Committee, the bulk of the target prices are paid to the largest and the wealthiest farmers. The largest 5 percent of the farmers of America get more than 35 percent of the total dollars paid out. That is one of the things I objected to in the consideration of the farm bill in committee. If we are really concerned about the family farmers, the small farmers, then this flaw, as I perceive it to be, must be corrected.

I say to the Senator that less than 20 percent of the $70 billion this bill will cost the taxpayers will go to farmers in financial distress, meaning that 80 percent of that $70 billion will go to those farmers that are not in trouble. The subsidies are paid on the basis of how much a farmer grows, not on how much debt or financial stress that farmer is experiencing.

All this, in my judgment, makes the bill too costly.

According to the latest estimate of CBO—and you may argue with those figures, but they are the figures we ordinarily operate on around this place—this farm bill will cost $25 billion more than the budget resolution passed by Congress a month or so ago. That resolution allocated $34.8 billion for farm commodity and related programs for 3 years, and this bill will cost more than $60 billion for those programs over the 3-year period and more than $71 billion over the 4-year period, according to the CBO.

So, these are the questions, I say to my friend from Nebraska—and he is my friend—that we must consider; and I hope we can get about it and have some debate. But ED ZORINSKY and I have sat here this morning, since the opening of the Senate, waiting for Senators to come and participate in the debate. As I say, we have handled four relatively minor amendments, and that is all. I doubt that we will do much more than call up one of the substantive amendments before we recess for the evening.

Again, I pay my respects to the distinguished Senator from Nebraska. I will close as I began, by saying that he is an able Member of the Senate, he is my friend, and he has made a valuable contribution.

Mr. EXON. Mr. President, I thank my good friend and colleague from North Carolina for those kind remarks. He is the chairman of the Agriculture Committee, and we depend on him for his understanding of the serious problems we have in agriculture today.

I say to the chairman that I share—as I know my colleague from Nebraska does—the fact that this measure is somewhat over budget. I am not sure that I can agree fully with the figures that the chairman of the Agriculture Committee cited just now, but I think any reasonable person would have to agree that this is over budget now.

We might go back, as we have from time to time, and argue whether or not that is the right amount, but suffice it to say that it is over budget. What is over budget? There are several ways that can be corrected. We do not necessarily have to correct that in the agriculture budget.

Let us assume, for the sake of discussion, that we would approve the agriculture bill as it came out of the Senate Agriculture Committee by a majority vote. If we were to do that and if CBO or any other forecasting agency said it is over budget, that, in and of itself, is not busting the budget. We would have to make reductions in other parts of the budget to make that up.

I do not mean to say that that is an easy way to dismiss it. I do not mean to say that, therefore, we should not pay any attention to the budget, because I am a member of the Budget Committee. I simply say that I tried to emphasize in my earlier remarks that what we are about here is to write a farm bill that will not cause the Federal Government and the Federal taxpayers to spend even more money because of our penny-wise and pound-foolish actions here on the floor.

My colleague from North Carolina and I have worked together on many things. I would certainly like the opportunity to try to work with him, perhaps to come up with some cost-cutting measures, to direct more of this money to what most of us consider the family-sized farmers. Maybe we can make some sort of savings there.

I believe that the Senator from North Carolina knows—and I think it was implied in his remarks—that this Senator was here on Friday all day. I have been here today. I just do not have any amendments at this time. I simply say that the quicker we can start voting on this matter, the better.

I suggest that probably the reason why there is not much more action on the floor of the Senate in this regard right now than there obviously is, to the disappointment of all of us, is the way this measure has been handled.

Certainly the Senate knows that when we went to the farm bill on Thursday night of last week, I believe it was—I stand corrected on that if that is not the right time, but I believe it was Thursday—it was clearly indicated that we hoped to get unanimous agreement that we would debate and bring up for the most part noncontroversial amendments on both Friday and again on Monday, that we would not have any votes, that if necessary we would stack these votes on Tuesday. I simply say, and I suspect that the chairman of the Agriculture Committee would agree with me, that when any time you tell the Senate that you are not going to have any votes on Friday and you are not going to have any votes on Monday next, that if we have to require any votes if we should get into anything controversial, then we will put those over and stack them on Tuesday, I suspect that that took a chance of any bite of anyone being here and getting anything done.

It is true that agreement was not entered into but that agreement was proposed.

If there is any lament about the inability to get things done on Friday last and this day, Monday, I would suggest that it was primarily because this matter I think again—in my opinion, once again I could be wrong—was one of those filler motives that I do not suspect that we are going to have very much happen on serious voting until Tuesday of next week, if not later.

I, too, wish to say that those who have amendments that are ready now have also been encouraged by this Senator to come over and offer them. At least, we can begin debate to move things forward.

What I am saying is that if we begin debate now, then we are going to save some time that we might wish that we had later on.

It is old story, as the chairman of the Agriculture Committee fully knows, and we went through it on the reconciliation bill. We get down to the last few minutes and we have 10 or 15 or 20 Senators who want to come over and offer a major amendment of some kind and there is no time left to debate it. It is not the way we should do business in the Senate and I think that probably my friend from North Carolina would agree with me at least on that statement.

Mr. President, I yield the floor.

AMENDMENT NO. 904 (AS MODIFIED)

Mr. DOLE. Mr. President, on Friday I offered an amendment dealing with animal welfare on the farm bill. I am now advised that, thanks to hard work by the staff on Friday, over the weekend, and today, and with the assistance of the able Senator from Montana [Senator MELCHER], and the concurrence by the distinguished Senator from Utah [Senator HATCH], that we now have reached an agreement which I would send to the desk on behalf of myself and the distinguished Senator from Montana [Mr. MELCHER], and Senators HEINZ, ROTH, STEVENS, LEAHY, COHEN, STAFFORD, MATSUNAGA, SIMON, BAUCUS, FORD, SPECTER, DURENBERGER, BOSCHWITZ, GOLDWATER, BINGAMAN, ZORINSKY, GORTON, BURDICK, D'AMATO, KASTEN, PROXMIRE, PELL, DOMENICI, CHAFEE, MOYNIHAN, MITCHELL, MURKOWSKI, EVANS, WILSON, STENNIS, HUMPHREY, HECHT, BUMPERS, CRANSTON, METZENBAUM, MATTINGLY, ROCKEFELLER, THURMOND, and EXON.

The PRESIDING OFFICER. The amendment is so modified.

The modified amendment is as follows:

Strike everything after the title and insert in lieu thereof the following:

SEC. . This Act may be cited as the "Improved Standards for Laboratory Animals Act".

SEC. . The Congress finds that—

(1) the use of animals is instrumental in certain research and education for advancing knowledge of cures and treatment for diseases and injuries which afflict both humans and animals;

(2) methods of testing that do not use animals are being and continue to be developed which are faster, less expensive, and more accurate than traditional animal experiments for some purposes and further opportunities exist for the development of these methods of testing;

(3) measures which eliminate or minimize the unnecessary duplication of experiments on animals can result in more productive use of Federal funds; and

(4) measures which help meet the public concern for laboratory animal care and treatment are important in assuring that research will continue t progress.

SEC. . (a) Section 13 of the Animal Welfare Act (7 U.S.C. 2143) is amended—

(1) by redesignating subsections (b) through (d) as subsections (f) through (h) respectively; and

(2) by striking out the first two sentences of subsection (a) and inserting in lieu thereof the following:

(1) The Secretary shall promulgate standards to govern the humane handling, care, treatment, and transportation of animals by dealers, research facilities, and exhibitors.

(2) The standards described in paragraph (1) shall include minimum requirements—

(A) for handling, housing, feeding, watering, sanitation, ventilation, shelter from extremes of weather and temperatures, adequate veterinary care, and separation by species where the Secretary finds necessary for human handling, care, or treatment of animals; and

(B) for exercise of dogs and for a physical environment adequate to promote the psychological well-being of primates.

(3) In addition to the requirements under paragraph (2), the standards described in paragraph (1) shall, with respect to animals in research facilities, include requirements—

(A) for animal care, treatment, and practices in experimental procedures to ensure that animal pain and distress are minimized, including adequate veterinary care with the appropriate use of anesthetic, analgesic, tranquilizing drugs, or euthanasia;

(B) that the principal investigator considers alternatives to any procedure likely to produce pain to or distress in an experimental animal;

(C) in any practice which could cause pain to animals—

(i) that a doctor of veterinary medicine is consulted in the planning of such procedures;

(ii) for the use of tranquilizers, analgesics, and anesthetics;

(iii) for pre-surgical and post-surgical care by laboratory workers in accordance with established veterinary medical and nursing procedures;

(iv) against the use of paralytics without anesthesia; and

(v) that the withholding of tranquilizers, anesthesia, analgesia, or euthanasia when scientifically necessary shall continue for only the necessary period of time;

(D) that no animal is used in more than one major operative experiment from which it is allowed to recover except in case of—

(i) scientific necessity; or

(ii) other special circumstances as determined by the Secretary; and

(E) that exceptions to such standards may be made only when specified by research protocol and that any such exception shall be detailed and justified in a report outlined under paragraph 7 and filed with the Institutional Animal Committee.

(b) Section 13(a) of such Act is further amended—

(1) by designating the third and fourth sentences as paragraph (4);

(2) by designating the fifth sentence as paragraph (5); and

(3) by striking out the last sentence and inserting in lieu thereof the following:

(6) Nothing in this Act shall be construed as authorizing the Secretary to promulgate, rules, regulations, or orders with regard to the design, outlines, or guidelines of actual research or experimentation by a research facility or Federal research facility: *Provided*, That the Secretary shall require every research facility to show that professionally acceptable standards governing the care, treatment, and practices on animals are being followed by the research facility during research and experimentation. No rule, regulation, order, or part of this Act may require a research facility to disclose publicly, or to the Institutional Animal Committee during its inspection, trade secrets or commercial or financial information which is privileged or confidential.

(7)(A) The Secretary shall require, at least annually, every research facility and Federal research facility to report that the provisions of this Act are being followed.

(B) In complying with subparagraph (A), such research facilities shall provide—

(i) information on procedures likely to produce pain or distress in animals and assurances demonstrating that the principal investigator considered alternatives to those procedures;

(ii) assurances satisfactory to the Secretary that such facility is adhering to the standards described in this section; and

(iii) an explanation for any deviation from the standards promulgated under this section.

(8) Paragraph (1) shall not prohibit any State (or a political subdivision of such

State) from promulgating standards in addition to those standards promulgated by the Secretary under paragraph (1).

(c) Section 13 of such Act is further amended by inserting after subsection (a) the following new subsections:

(b)(1) The Secretary shall require that each research facility establish at least one Institutional Animal Committee. Each Institutional Animal Committee shall be appointed by the chief executive officer of each such research facility and shall be composed of not fewer than three members. Such members shall possess sufficient ability to assess animal care, treatment, and practices in experimental research as determined by the needs of the research facility and shall represent society's concerns regarding the welfare of animal subjects used at such facility. Of the members of the Institutional Animal Committee—

(A) at least one member shall be a doctor of veterinary medicine;

(B) at least one member shall not be affiliated in any way with such facility other than as a member of the Institutional Animal Committee, shall not be a member of the immediate family of a person who is affiliated with such facility, and is intended to provide representation for general community interests in the proper care and treatment of animals; and

(C) in those cases where the Institutional Animal Committee consists of more than three members, not more than three members shall be from the same administrative unit of such facility.

(2) A quorum shall be required for all formal actions of the Institutional Animal Committee, including inspections under paragraph (3).

(3) The Institutional Animal Committee shall inspect at least semiannually all animal study areas and animal facilities of such research facility and review as part of the inspection—

(A) practices involving pain to animals, and

(B) the condition of animals, to ensure compliance with the provisions of this Act and that pain and distress to animals is minimized. Exceptions to the requirement of inspection of such study areas may be made by the Secretary if animals are studied in their natural environment and the study area is prohibitive to easy access.

(4)(A) The Institutional Animal Committee shall file an inspection certification report of each inspection at the research facility. Such report shall—

(i) be signed by a majority of the Institutional Animal Committee members involved in the inspection;

(ii) include reports of any violation of the standards promulgated, or assurances required, by the Secretary, including any deficient conditions of animal care or treatment, any deviations of research practices from originally approved proposals that adversely affect animal welfare, any notification to the facility regarding such conditions and any corrections made thereafter;

(iii) include any minority views of the Institutional Animal Committee; and

(iv) include any other information pertinent to the activities of the Institutional Animal Committee.

(B) Such report shall remain on file for at least three years at the research facility and shall be available for inspection by the Animal and Plant Health Inspection Service of the Department of Agriculture and any funding Federal agency.

(C) In order to give the research facility an opportunity to correct any deficiencies or deviation discovered by reason of paragraph (3), the Institutional Animal Committee shall notify the administrative representative of the research facility of any deficiencies or deviations from the provisions of this Act. If, after notification and an opportunity for correction, such deficiencies or deviations remain uncorrected, the Institutional Animal Committee shall notify (in writing) the Animal and Plant Health Inspection Service of the Department of Agriculture and the funding Federal agency of such deficiencies or deviations.

(5) The inspection results shall be available to Department of Agriculture inspectors for review during inspections. Department of Agriculture inspectors shall forward any Institutional Animal Committee inspection records which include reports of uncorrected deficiencies or deviations to the Animal and Plant Health Inspection Service and any funding Federal agency of the project with respect to which such uncorrected deficiencies and deviations occurred.

(c)(1) In the case of Federal research facilities, a Federal Institutional Animal Committee shall be established and shall have the same composition and responsibilities oultined in subsection (b), except that the Federal Institutional Animal Committee shall report deficiencies or deviations to the head of the Federal agency conducting the research rather than to the Animal and Plant Health Inspection Service of the Department of Agriculture. The head of the Federal agency conducting the research shall be responsible for—

(A) all corrective action to be taken at the facility; and

(B) the granting of all exceptions to inspection protocol.

(d)(1) Each research facility shall provide for annual training for scientists, animal technicians, and other personnel involved with animal care and treatment in such facility. Such training shall include instruction on—

(A) the humane practice of animal maintenance and experimentation;

(B) research or testing methods that minimize or eliminate the use of animals or limit animal pain or distress; and

(C) utilization of the information service at the National Agricultural Library, established under subsection (e).

(D) include methods whereby deficiencies in animal care and treatment should be reported.

(e)(1) The Secretary shall establish an information service at the National Agricultural Library. Such service shall, in cooperation with the National Library of Medicine, provide information—

(A) pertinent to employee training;

(B) which could prevent unintended duplication of animal experimentation as determined by the needs of the research facility; and

(C) on improved methods of animal experimentation, including methods which could—

(i) reduce or replace animal use; and

(ii) minimize pain and distress to animals, such as anesthetic and analgesic procedures.

(f) In any case in which a Federal agency funding a research project determines that conditions of animal care, treatment, or practice in a particular project have not been in compliance with standards promulgated under this Act, despite notification by the Secretary or such Federal agency to the research facility and an opportunity for correction, such agency suspend or revoke Federal support for the project. Any research facility losing Federal support as a result of actions taken under the preceding sentence shall have the right of appeal as provided in sections 701 through 706 of title 5, United States Code.

SEC. . Section 16(a) of the Animal Welfare Act (7 U.S.C. 2146(a)) is amended by inserting after the first sentence the following:

"The Secretary shall inspect each research facility at least once each year and, in the case of deficiencies or deviations from the standards promulgated under this Act, shall conduct such follow-up inspections as may be necessary until all deficiencies or deviations from such standards are corrected.".

SEC. . The Animal Welfare Act (7 U.S.C. 2131-2156) is amended by adding at the end thereof the following section:

SEC. 27. (a) It shall be unlawful for any member of the Institutional Animal Committee to release any confidential information of the research facility including any information that concerns or relates to—

(1) the trade secrets, processes, operations, style of work, or apparatus, or

(2) to the identity, confidential statistical data, amount or source of any income, profits, losses, or expenditures of the research facility.

(b) It shall be unlawful for any member of such Committee—

(1) to use or attempt to use to his advantages, or

(2) to reveal to any other person, any information which is entitled to protection as confidential information under subsection (a).

(c) A violation of subsection (a) or (b) is punishable by—

(1) removal from such Committee, and

(2)(A) a fine of not more than $1,000 and imprisonment of not more than one year, or

(B) if such violation is willful, a fine of not more than $10,000 and imprisonment of not more than three years.

(d) any person, including any research facility, injured in its business or property by reason of a violation of this section may recover all actual and consequential damages sustained by such person and the cost of the suit including a reasonable attorney's fee.

(e) Nothing in this section shall be construed to affect any other rights that any such person may have, nor shall subsection (d) be construed to limit the exercise of any such rights arising out of or relating to a violation of subsections (a) and (b).

SEC. . (a) Subsection (b) of section 19 of the Animal Welfare Act (7 U.S.C. 2149(b)) is amended—

(1) in the first sentence by striking out "$1,000 for each such violation" and inserting in lieu thereof "$2,500 for each such violation"; and

(2) in the sixth sentence by striking out "$500 for each offense" and inserting in lieu thereof "$1,500 for each offense".

(b) Subsection (d) of such section is amended by striking out "$1,000" and inserting in lieu thereof "$2,500".

SEC. . (a) Section 2 of the Animal Welfare Act (7 U.S.C. 2132) is amended by adding after subsection (j) the following new subsections:

(k) The term "Federal agency" means an Executive agency as such term is defined in section 105 of title 5, United States Code, and with respect to any research facility means the agency from which the research facility receives a Federal award for the conduct of research, experimentation, or testing, involving the use of animals;

(l) The term "quorum" means a majority of the Committee members;

(m) The term "Federal research facility" means each department, agency, or instrumentality of the United States which uses live animals for research or experimentation;

(n) For purpose of this Act, the term "animal" shall have the same meaning as defined in section 2(j) of the Animal Welfare Act (7 U.S.C. 2132(j)), as redesignated by subsection (b) of this section.

SEC. . Section 14 of the Animal Welfare Act (7 U.S.C. 2144) is amended by changing "section 13" to "section 13 (a), (f), (g), and (h)" wherever it appears.

SEC. . This Act shall take effect one year after the date of the enactment of this Act.

Mr. DOLE. Mr. President, I also have a statement in support of the modification, and I do particularly want to thank the distinguished Senator from Montana who is an expert in this area, a veterinarian himself who understands many of the practical problems involved on both sides, and he has been most helpful along with, as I have indicated, his staff, my staff, the staff of Senator HATCH, and other outside groups who have a direct interest in the legislation, some on each side. I want to also thank Christine Stevens for her tireless efforts on behalf of this legislation.

I think we have a good resolution. I would certainly hope that we could pass this amendment without extensive debate on a voice vote or rollcall vote, whichever. But if there is a rollcall, I would hope that that might be delayed until tomorrow.

ANIMAL WELFARE LEGISLATION

Mr. President, last Friday I brought up as an amendment to the farm bill, S. 1233, a bill I introduced earlier in the session which would modify the Animal Welfare Act.

Similar legislation on animal welfare was introduced during the last session of Congress and hearings were held in both the House and Senate Agriculture Committees. In addition, a great deal of time and effort has gone into drafting legislation which would represent a responsible approach toward ensuring the humane treatment of animals, while taking into consideration the needs of medical research.

FRIDAY MEETING

It was apparent last Friday that there were still a few concerns on the part of the Senator from Utah, and in an effort to accommodate his concerns I instructed staff members to try to work out an agreement on the bill. The Senator from Montana also had language he was interested in incorporating into the amendment. as a result of Friday's meetings, I believe we reached agreement on any differences which might have existed.

BASIC AGREEMENT

Mr. President, I believe we have taken care of most, if not all, of the questions raised earlier in connection with this legislation, including those that USDA and NIH may have had as well as any questions raised by the medical research community while maintaining the intent of the legislation.

We would maintain exercise for dogs and clarify in report language the intention of this provision as applying on a case-by-case basis. We would include language important to the Senator from Montana dealing with the physical environment for primates. We would clarify that all members of the institutional animal committees are responsible for representing the general community's interest in animal care and treatment; we would also indicate the outside person on the committee is intended to provide representation for the general community's interest in the care and treatment of animals.

The new language would promote uniformity by providing that Federal research facilities establish institutional animal committees with similar responsibilities as outlined previously in the amendment and would leave enforcement up to the head of the Federal facility conducting the research.

We would modify the whistleblower clause by providing for methods whereby deficiencies should be reported.

We would also add language for strengthened trade secret protections as well as other more minor changes.

BROAD SUPPORT

Mr. President, 39 of my colleagues on both sides of the aisle have joined me as cosponsors of this legislation, and I urge its adoption by the full Senate.

Mr. MELCHER. Mr. President, will the distinguished majority leader yield?

Mr. DOLE. I am happy to yield to the Senator from Montana.

Mr. MELCHER. Mr. President, I commend the Senator from Kansas, the majority leader of the Senate, for over the past 1½ or 2 years more correctly, working on the necessary amendments for the Animal Welfare Act. It is a basic act that protects laboratory animals and assures humane treatment for them while research is going on. The step that is being taken today in these amendments is indeed a very forward step in the direction of assuring that the continuation of that type of humane treatment for research animals.

I am pleased to join in with the distinguished majority leader in working out the language and I feel confident that the research community will be well-served and certainly the humaneness of the animals has taken a stride forward.

During the last Congress we held hearings on this subject in the Agriculture Committee and heard from representatives of the scientific and animal welfare communities. What we have here is, I think, a fair and reasoned approach which addresses the twin concerns of medical advancement and ensures the humane treatment of animal subjects.

The proposal which is before the Senate today accomplishes two important points. The first is the establishment of Institutional Animal Committees at Federal and private research facilities. These committees will be made up of three or more members, with one member being a doctor of veterinary medicine and one member, not affiliated with the facility in any way, and is intended to represent the general community interests. It is the responsibility of the committee to represent society's concerns regarding animal research subjects.

The second important provision of this proposal, for the first time, requires a physical environment adequate to promote the psychological well-being of primates. I have seen the types of cages used in many facilities to house primates. These cages are not much wider than the average shower stall and there is hardly enough room to allow the animal to stand erect. Under the new provisions, I think we are not only providing humane treatment of these animals, but assures more confidence in the results in the experiments they are used in. It is certainly true that the results of our research is directly affected by the physical and psychological health of the subject.

I certainly hope that my colleagues will accept this proposal and that we will be able to hold on to it intact during conference deliberations.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, the distinguished majority leader has described the process by which this compromise agreement has been reached.

This legislation amends the Animal Welfare Act over which the Agriculture Committee has jurisdiction. But most of its implications are directed toward laboratory animal testing procedures under the jurisdiction of the National Institutes of Health and the Labor and Human Resources Committee. Given this overlapping jurisdiction, I believe it was important to accommodate the concerns of Senator HATCH and others who serve on the Labor and Human Resources Committee.

The National Institutes of Health recently adopted policies and published guidelines for recommended care of laboratory animals. There was some concern at the NIH that this legislation might force them to reconsider or amend these guidelines even though they have been applauded by the animal welfare groups. This new agreement would enable the NIH to retain these newly revised and updat-

ed policies without having to make any major modifications to reflect the provisions of this amendment.

Senator MELCHER also had some justifiable concerns with the fact that this legislation would require the Animal and Plant Health Inspection Service to regulate other Federal agencies. It is my understanding that these concerns have also been resolved in a way that would not greatly affect this agencies resources.

I commend those who have put many long hours toward working out this mutual agreement. I am prepared to accept the amendment on this side of the aisle.

Mr. ZORINSKY. Mr. President, I am a cosponsor of the underlying legislation and I congratulate the distinguished Senators from Kansas and Montana on working out the accommodation, and I urge my colleagues on this side of the aisle to support the amendment and move for its approval.

Mr. HATCH. Mr. President, Senator DOLE and I and our staffs, have had many discussions, over the last several years, concerning the need for legislative action relative to the appropriate and humane use of animals in research. I am pleased to have worked with Senator DOLE in these efforts, to define new Federal protections for animals.

Research utilizing laboratory animals remains absolutely essential if we are to achieve advancements in the treatment and cure of diseases and injuries suffered by people and animals today. Nonetheless, I support the development of uniform standards in order that we might have a consistent national policy to assure the appropriate care and use of laboratory animals, while not jeopardizing research needs.

We have already made outstanding progress toward goals as well as increasing understanding and use of viable alternatives to live animal research models. The Office of Technology Assessment report of alternatives to animal use in testing and experimentation which I requested during the last Congress, will be available to us shortly. In addition, the National Academy of Sciences and the Institute of Medicine have jointly undertaken a review of the use of animals in biomedical and behavioral research. This initiative was prompted by legislation I introduced, and which the Senate endorsed and is now being supported by Federal agencies and the private sector. Both the OTA and Academy studies have brought together a wide range of opinions and further encouraged constructive dialog on animal welfare concerns.

Beyond promoting public awareness, this congressional interest has produced positive action. Concurrent with the Senate Labor and Human Resources Committee's consideration of NIH reauthorization and following a lengthy public review process, the U.S. Public Health Service strengthened its policy on the humane care and use of laboratory animals and revised the NIH guide for awardee institutions. Now, with the recent passage of the NIH reauthorization bill, H.R. 2409, Congress has given the new Public Health Service policy and procedures a statutory foundation and mandate.

To be certain that the legislation we are now considering did not operate at cross-purposes with H.R. 2409 my staff has worked with Senator DOLE's staff to develop the amendment being offered today. It represents a fair consideration of the interests of our respective committees, and I believe the amendment as revised is consistent with policy established in H.R. 2409. This will not require duplicative regulations be developed by the USDA and HHS. In fact, it requires interagency cooperating in developing new guidelines for animal welfare. Further, I believe we have produced a proposal which provides a consistent national policy in the care and treatment of laboratory animals, one which will not unduly restrict research facilities to conflicting standards and regulations.

To ensure that this is the case, the report accompanying this legislation must clarify any areas of potential confusion. Specifically, the report should reinforce:

First, the Secretaries of the Departments of Agriculture and Health and Human Services will consult with each other to promulgate conforming regulations.

Second, no resulting regulations shall be construed to prescribe methods of research.

Third, research facilities' privileged information or confidential trade secrets, commercial and financial information will be protected.

Fourth, the important role of research facilities' attending veterinarians will be retained in determining the choice and use of anesthetics, analgesics, and tranquilizing drugs and in overseeing exercise of research animals.

Fifth, that the compositions and operation of the Institutional Animal Care Committees established by the two authorities be consistent so that duplicate effort is avoided.

Mr. President, I recommend my colleagues join with Senator DOLE and myself and approve this amendment.

IMPROVED STANDARDS FOR LABORATORY ANIMALS

Mr. MOYNIHAN. Mr. President, I rise today to say a few words in support of this proposal, to improve the standards of treatment of laboratory animals, now an amendment to the farm bill. I am a cosponsor of the legislation on which this amendment is based, in this Congress as in the last.

It is time—perhaps long past time—to take steps to protect laboratory animals and to encourage the use of alternative research methods whenever possible. We know abuse exists in the laboratory, and that it can be stopped.

No one questions the need for animal research. In some cases, no alternative methods exist; without continued research, we would have little hope of conquering Parkinson's disease, or heart disease, or cancer. But I ask, When there are no substitutes for experiments on live animals, can we not be certain that the animals be treated with care and humanity? I believe we can, and at least 34 of my colleagues agree. I contend that we must.

This amendment would ensure that animals necessary for research receive fair and humane treatment, and that their discomfort is kept to an absolute minimum. It also would establish a central information center in the National Agricultural Library, where results of past animal experimentation will be available to the research community. The ready availability of this information would encourage researchers to pause before beginning new experiments, perhaps to discover that someone else has already learned what they seek to know.

Mr. President, as continued animal research is essential to the progress of efforts to protect human health, so the improved standards for laboratory animals amendment is the least we can do to ensure the animals receive humane care and treatment. I urge my colleagues to join me in support of this proposal.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 904), as modified, was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, again I thank my colleagues and chairman of the committee and the ranking Democratic Member, Senator ZORINSKY, who has been a cosponsor, an original cosponsor. There may be additional Senators who would like to be cosponsors.

Mr. President, I share the frustration I have heard by both the chairman and by both Senators from Nebraska. I think the only way we are going to complete this bill is to stay in late starting tomorrow evening.

Once Senators start to offer amendments, then I think we will have some action, and hopefully disposition of this bill very quickly. Very quickly could mean several days. It is a very important bill. There are a number of titles.

As the Senator from Nebraska pointed out, we are talking about a 4-year program, something we have to focus on.

I would be happy to discuss at some later time a little variation I have been working on. I used to call it flexible parity. It passed the Senate in 1977. We are now calling it the TOP program, target option program [TOP].

We will be discussing that with colleagues on both sides of the aisle in the next few days. It will save some money. It will protect primarily the middle-income farmers, and we would hope we might be able to stimulate some interest.

I thank the Chair.

Mr. DANFORTH. Mr. President, no one who has traveled recently through rural America, and particularly the farm communities of the Midwest, can doubt the importance of the legislation we are considering today.

Here in Washington, we see only the numbers that quantify the crisis in American agriculture. They tell us that farmers today receive 12 percent less for their products than they did 4 years ago, when Congress last debated omnibus agricultural legislation. During the same period, farm exports fell by almost one-fifth. With falling prices and declining sales, net farm income dropped by $3 billion over these years, despite unprecedented Federal outlays.

When agricultural income falls, the impact extends beyond farmers themselves. More and more rural banks are being pushed toward insolvency by debtor repayment problems and low land values. With less money for capital investments, farmers defer major purchases, spreading the agricultural recession. Farm machinery manufacturers alone have laid off 80,000 workers in the past 5 years. Across the board, statistics show that things are bad and getting worse.

But numbers cannot communicate the personal toll of this crisis. Talk with a farmer who is losing not just his business, but his family home and way of life. Walk down the main street of a town like Trenton, MO, where empty storefronts bear silent witness to economic distress. Listen to men and women who have seen the growth of stress-related family violence in their community.

The legislation we are considering today cannot solve these problems overnight, but it can be a first step toward revitalization of the agricultural economy.

The 1985 farm bill will send a message to farmers, providing a framework for their business decisions. We must be sure that the message is one of long-term recovery and not of political expediency. Again and again, farmers have told us that they do not want Federal bailout; they want a consistent, fair, and predictable agricultural policy. That is precisely what this legislation should give them.

Three elements of the committee's bill are particularly important.

First, a major step has been taken in the area of commodity loans. Under the Agricultural Act of 1949, the USDA received permanent authorization to issue nonrecourse loans, using commodities as collateral. Since then, these loans have provided a source of interim farm financing, have reduced supply and price fluctuations, and have supported commodity prices.

But the loan rates near or above market prices, forfeitures have increased dramatically, leading to high Federal expenditures and threatening to reduce the United States to a residual supplier in international markets. When the world price is below the loan rate, farmers default on their loans, abandoning the marketplace and allowing foreign suppliers to meet demand at the prevailing price. Current policies provide foreign governments and producers with precisely the certainty they need to undercut American producers and capture an increasing share of international trade.

I believe there are better ways of protecting farmers against low prices than by maintaining unreasonably high loan rates. By gradually aligning loan rates to market conditions while retaining deficiency payments and other efficiently targeted income-support programs, export competitiveness can be increased without devastating American farmers or necessitating unreasonable Federal expenditures. S. 1714 begins this process; it recognizes what commodity loans do well and what they do poorly, and takes a step forward for agricultural producers.

Second, S. 1714 announces a new determination to compete dollar for dollar, bushel for bushel, with other exporting nations. We cannot afford to allow foreign trade practices to drive our farmers out of international markets, particularly at a time of depressed global demand. One out of every three farm acres in this country is now planted for export, and this may rise to one of two by the end of this century. American farmers can compete in the world marketplace, and Government should do everything in its power to be sure that they have a fair chance.

This bill encourages agricultural exports by expanding such existing programs as intermediate credit and direct export assistance. Recognizing that inequitable trade practices have injured American farmers, it requires that the U.S. trade representative develop specific recommendations for reducing foreign trade barriers and expanding American exports. The committee's bill maintains the effectiveness of export and food assistance programs by strictly limiting the application of cargo preference requirements, which will cost the Department of Agriculture more than $100 million this year.

Third, S. 1714 includes important new conservation provisions. The welfare of American farmers is inseparable from the condition of their land. Representing a State that is particularly vulnerable to soil erosion, I am acutely aware of the need for strong conservation measures. In every State, mismanagement of fragile lands endangers agricultural productivity and environmental stability. By supporting strong "sodbuster" and "swampbuster" language, the Senate can make a lasting contribution to what must be a continuing effort.

Some lands are so prone to erosion that they need even more stringent protection. In 1982, 26 million acres, or just 6 percent of total cropland, accounted for 41 percent of all sheet and rill erosion, the most serious forms of soil loss. With the conservation reserve provisions of S. 1714, Congress has an opportunity to remove such highly erodible lands from intensive production for up to 15 years, and to encourage responsible management of these lands thereafter.

Of course, this program would entail new Federal expenditures. But the proposed conservation reserve would initiate a new era in conservation policy, one in which the risks of abusing fragile lands are given full weight in farm legislation. In addition, the costs of establishing a conservation reserve would be significantly offset by the elimination of CCC payments which would otherwise be made on reserve acreage. According to the Soil Conservation Service, a 25 million acre reserve would, given current conditions, actually save $4.6 billion over its lifetime when alternative CCC payments are considered.

The major flaw in S. 1714 is budgetary. The bill is at least $9 billion over budget for the first 3 years, and perhaps as much as $25 billion over. Those of us who have been promising farmers that we would help them by reducing the Federal deficit simply cannot vote for agricultural programs that make a mockery of those promises. Most farmers do not want a budget-busting bill, and we should not pass one.

Reducing farm outlays will not be easy, particularly at this time, but we would be doing farmers a grave disservice if we fail to exercise reasonable restraint. One thing is certain about farm programs—how we spend is just as important as how much.

Finally, Mr. President, it is important to note that no matter what form this legislation takes, it will not end our responsibility to rural America. I have already mentioned the importance of reducing the Federal deficit, which hurts farmers at every state of

production, from loans to international sales. Agricultural credit is another problem which will remain after we enact this legislation. Export issues, tax reform, rural development, and other matters will continue to affect the welfare of this Nation's farmers. It is our responsibility to give them prompt and judicious consideration. To do less would be to betray the promise offered by this bill.

Mr. DURENBERGER. Mr. President, this is the second in a series of speeches this Senator will give each day the Senate debates the 1985 farm bill. As the Senate continues the debate, I think it is important that it not lose sight of what a farm bill represents—an economic master plan for a $1 trillion industry and the rural way of life it sustains. And our primary responsibility in this debate is to keep that way of life alive.

During the course of the next 10 days, the Senate will complete action on over 100 amendments, most of which will increase or decrease loan rates, target prices, acreage reduction programs and the $50,000 payment limitation. I hope my colleagues will take the time to sift through the rhetoric which traditionally accompanies such amendments and take a look at the bottom line against which everything which we do here should be judged—will it help rural America?

It is not often, Mr. President, that I pledge my unyielding support for an industry. After all, one never likes being called a tool of industry. But agriculture is more than an industry—it is an essential part of the fabric of American life. It has produced more than just food and fiber, Mr. President; it has been the source of long enduring American values. The American farmer is the most productive, hardworking, unselfish, and compassionate worker in the world; he has made us the envy of all nations. But the American farmer is in trouble. And, if we fail to take immediate, corrective action, we will also find ourselves in trouble as well. In today's comments, I would like to focus the Senate's attention on the financial condition of the American farmer.

In a March 1985 study entitled "The Current Financial Condition of Farmer and Farm Lenders," the Department of Agriculture acknowledged the obvious—that:

The financial conditions of many farmers and farm lenders have deteriorated significantly;

Large supplies and weak demand have squeezed farm income and reduced the net worth of farmers;

Many farmers face insufficient cashflow, declining asset values, problems of access to credit, forced liquidation, foreclosure and bankruptcy;

Farm financial stress is transmitted to farm lenders through loan delinquenices and losses, inadequate security for loans, and in some cases, insolvency and failure of lending institutions.

How and why did this come about? The report went on to note that the current distress among farmers and farm lenders is rooted in the inflationary period of the 1970's and adjustments from the excesses of that period to sharply different economic circumstances in the 1980's. Throughout the 1970's farmers faced rapidly expanding exports, accelerating inflation and low to negative real interest rates. Farmers responded by borrowing heavily to invest in new capital equipment, to adopt new production technologies, and to purchase increasingly expensive farmland. Farm debt rose more than 10 percent a year. Yet, farmland values rose even faster, providing the economic rationale as well as the security for farmers and lenders to expend and roll over debt. Debt/asset ratios of farms declined over the 1970's.

By the eary 1980's, the report went on to note, the factors which had given rise to the expansion had reversed direction. A worldwide recession weakened international markets; the value of the dollar rose rapidly against major currencies, further dampening export demand; and inflation was slowed by stringent control of monetary growth. Real interest rates, which had been low or negative through the 1970's, jumped to unprecedented levels of 8 to 10 percent. Farm commodities in foreign and domestic markets were to plentiful to sustain the prices that had prevailed during the 1970's, causing commodity prices and farmers incomes to drop significantly. Land values, which depend on both current farm income and prospects for future income growth, also began to decline. The 1970's debt levels became unsustainable. Expansion minded farmers were pushed steadily and speedily toward insolvency. Cautious farmers, whose only fault was bad weather, were also subjected to financial stress.

Mr. President, after making those reflections, the report went on to make some statements of fact which are frightening in their own right, but even more so when one considers that they are based on information which dates to January 1984. The report noted that farmers' equity and lenders' security are reflected by the debt/asset ratio and net worth of farm businesses. Cash-flow indicates the amount of short run net cash income from all sources that a farm can use to service debts after meeting family living needs; that is, it indicates repayment capacity of the farm business.

Available data, now 18 months old, on the severity of farm financial problems summarized in summary table 1, suggest the following:

At current interest rates and levels of net returns in farming, farms with debt/asset ratios of over 40 percent are likely experiencing cash shortfalls. Farms with debt/asset ratios of over 70 percent are almost certain to have serious cash shortfalls.

Some 243,000 farms—11.1 percent—have debt/asset ratios from 40 to 70 percent and owe one-third of all farm debt.

As many as 143,000 farms have debt/asset ratios above 70 percent. These farms make up only 6.6 percent of all farms but owe almost one-fourth of all farm debt.

In short, Mr. President, 17 percent of farmers having debt-to-asset ratios which would result in their being classified highly leveraged or very highly leveraged, hold 56 percent of all farm debt. That adds up to $300,000 of debt for 386,000 farmers, a debt load that might not be serviceable with price supports at twice the current level.

The report further broke the debt level down to classes of farmers, placing special emphasis on farms with sales of $50,000 to $500,000 annually. These farms, totaling about 679,000, are recognized by the Department as the mainstream of fairly sized commercial agriculture. In a sobering commentary, the Department noted that:

Over one-quarter of these farms, owing 36 percent of all farm debt, face some degree of financial stress.

That 30,000 farms, owing 6.5 percent of all farm debt, had debt/asset ratios in excess of 100 percent and were insolvent.

Another 34,000 farms, holding 7.5 percent of all farm debt, had debt-to-asset ratios in excess of 70 percent and were rapidly moving toward insolvency.

An additional 114,000 farms, holding 22 percent of all farm debt, were classified as highly leveraged and faced serious financial problems.

In what must rate as the most underrated comment of the year, the authors of the report further went on to explain that if the situation in early 1984 is extended to early 1985, the available data suggest that one-third of all family size commercial farms, owing almost one-half of all farm debt will have some degree of financial difficulty.

For example: 43,000 farms owing more than their assets are worth, will be technically insolvent; 50,000 farms, owing 11 percent of all debt, will be moving rapidly toward insolvency; 136,000 farms, owing 26 percent of all debt, will have serious financial problems, but will be able to survive a few more unfavorable years.

Mr. President, what troubles this Senator is that, if anything, the situation which existed in early 1984 has deteriorated substantially. If I recall correctly, in early 1984 market prices

for wheat, corn, and soybeans were rising in the aftermath of the PIK Program and the 1984 drought. Since that time, however, prices have fallen sharply, with corn dropping from $3.40 bushel in March 1984 to $2 in October 1985, beans dropping from $8 bushel in March 1984 to $5 October 1985, feeder cattle dropping from $61 hundredweight in March 1984 to $49 hundredweight in October 1985, and hogs have gone from $49 hundredweight in March 1984 to $40 hundredweight in October 1985.

Mr. President. In conclusion, I will end my comments today with the simple statement that 240,000 struggling farmers need not go out of business. If members of the Senate are willing to do so, I am confident we can find a way to restructure the farm debt which is strangling the life out of rural America. If we give farmers a chance, they will vindicate our faith in them as they have time after time. But the key is to take steps to protect farm income and give farmers a chance to make it through this difficult period.

Mr. HELMS. Mr. President, I inquire of the distinguished majority leader as to his wishes with respect to the farm bill. I see no Senator on the floor and know of no Senators on their way to offer amendments. I wonder what his wishes would be about continuing the consideration of the farm bill today.

Mr. DOLE. As I indicated earlier, I know both managers, Senator HELMS and Senator ZORINSKY, have been urging Members to come to the floor. Apparently they are not coming.

We will be in early tomorrow morning. We will be in late tomorrow night, until 9 or 10 o'clock. I think once it starts, once Members understand that the push is on and the rollcall bells are ringing, we will have amendments, so I do not see any reason to stay on this legislation.

ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business not to exceed beyond the hour of 5 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

ENROLLED BILL SIGNED

At 12:11 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the Speaker has signed the following enrolled bill:

H.R. 2409. An act to amend the Public Health Service Act to revise and extend the authorities under that act relating to the National Institutes of Health and National Research Institutes, and for other purposes.

MEASURE PLACED ON THE CALENDAR

The following joint resolution was read the second time and placed on the calendar:

S.J. Res. 223. Joint resolution to prohibit the sales of certain advanced weapons to Jordan.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1931. A communication from the Secretary of Health and Human Services, transmitting a draft of proposed legislation to ensure the supply of childhood vaccines, and for other purposes; to the Committee on Labor and Human Resources.

EC-1932. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Strong Leadership Needed to Improve Management at the Department of Labor"; to the Committee on Labor and Human Resources.

EC-1933. A communication from the Executive Secretary, Office of the Secretary of Defense, transmitting, pursuant to law, a report on Department of Defense procurement from small and other business firms for the period October 1984 through June 1985; to the Committee on Small Business.

EC-1934. A communication from the Assistant Attorney General (Antitrust Division), transmitting, pursuant to law, a report on the Voluntary Agreement and Plan of Action to Implement the International Energy Program; to the Committee on Energy and Natural Resources.

EC-1935. A communication from the Special Counsel to the Merit Systems Protection Board, transmitting, pursuant to law, a report on an investigation of the Secretary of the Air Force relating to allegations of violations of law and regulation at Selfridge Air National Guard Base, Michigan; to the Committee on Government Affairs.

EC-1936. A communication from the Secretary of Education, transmitting, pursuant to law, a report on the program reviews of 416 projects funded under the Indian Education Act; to the Committee on Labor and Human Resources.

EC-1937. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Examination of the Federal Crop Insurance Corporation's Financial Statement for the Year Ended September 30, 1984"; to the Committee on Agriculture, Nutrition, and Forestry.

EC-1938. A communication from the Principal Deputy Assistant Secretary of Defense (Comptroller), transmitting, pursuant to law, a report on the transfer of certain funds authorized and appropriated to the Department of Defense; to the Committee on Appropriations.

EC-1939. A communication from the Acting Assistant Attorney General (Office of Legislative and Intergovernmental Affairs), transmitting a draft of proposed legislation to amend title 28, and title 11 of the United States Code to provide for the appointment of United States trustees to supervise the administration of bankruptcy cases in judicial districts throughout the United States and for other purposes; to the Committee on the Judiciary.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. THURMOND (for himself and Mr. HATCH) (by request):

S. 1794. A bill to amend Revised Statutes section 722 (42 U.S.C., sec. 1988) to exempt State judges and judicial officers from assessment of attorneys' fees in cases in which such judge or judicial officer would be immune from actions for damages arising out of the same act or omission about which complaint is made; to the Committee on the Judiciary.

By Mr. HATCH (for himself and Mr. THURMOND):

S. 1795. A bill to provide that in judicial actions against State judges, such judges shall not be held liable for attorney fees; to the Committee on the Judiciary.

By Mr. INOUYE (for himself and Mr. MATSUNAGA):

S. 1796. A bill to authorize an extension of Interstate Route H-3; to the Committee on Environment and Public Works.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. DOLE (for himself, Mrs. KASSEBAUM, Mr. EAGLETON, and Mr. DANFORTH):

S. Res. 246. Resolution recognizing baseball's new world champions, the Kansas City Royals; considered and agreed to.

STATEMENTS OF INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. THURMOND (for himself and Mr. HATCH) (by request):

S. 1794. A bill to amend Revised Statutes section 722 (42 U.S.C. 1988) to exempt State judges and judicial officers from assessment of attorneys'

fees in cases in which such judge or judicial officer would be immune from actions for damages arising out of the same act or omission about which complaint is made; to the Committee on the Judiciary.

ELIMINATION OF CERTAIN ATTORNEY FEE AWARDS AGAINST JUDGES

Mr. THURMOND. Mr. President, today, along with Senator HATCH, I am introducing legislation at the request of the Judicial Conference of the United States which would eliminate certain attorney fee awards against judges.

In 1984, in the case of *Pulliam* v. *Allen*, the Supreme Court ruled that the doctrine of judicial immunity does not prevent injunctive relief in Federal courts under 42 U.S.C. section 1983. Prospective State action may be enjoined—judges may be enjoined—under that statute, the Court ruled, and attorneys' fees may be awarded to prevailing parties under 42 U.S.C. section 1988.

Mr. President, the ruling by the Supreme Court in *Pulliam* has, understandably, caused serious concern among our Nation's judges and judicial officers. They are concerned that the threat of heavy financial burdens, which might result from awards of attorneys' fees, will have a chilling effect on judicial independence and judicial detachment. Especially disconcerting is the likelihood that such attorney fee awards would arise from a judicial decision required of a judge in the ordinary course of litigation. Additionally, judges are concerned that *Pulliam* will lead to the creation of a new class of Federal litigation against State judicial decisions.

The legislation I am introducing today would amend 42 U.S.C. section 1988 to prohibit the award of attorney fees against a judge or judicial officer who would be immune from actions for damages arising out of the same act or omission about which complaint is made.

Mr. President, earlier this year, I introduced S. 1580, the "Legal Fees Equity Act," an administration proposal which would provide a revamping of the federally mandated attorney compensation schemes. It is my belief that the legislation I am introducing today is appropriate for consideration along with S. 1580, which provides a broader, more comprehensive approach to reform in the attorney fee area.

I ask unanimous consent that the bill be printed in the RECORD along with the letter of transmittal from the Judicial Conference of the United States.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1794

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the last sentence of section 722 of the Revised Statutes, as amended (423 U.S.C. § 1988) is amended to read as follows:

"In any action or proceeding to enforce a provision of Sections 1977, 1978, 1979, 1980, and 1981 of the Revised Statutes, title IX of Public Law 92-318, or title VI of the Civil Rights Act of 1964, the court, in its discretion, may allow the prevailing party, other than the United States, a reasonable attorney's fee as part of the costs; provided that no such fees shall be awarded against a judge or judicial officer who would be immune from actions for damages arising out of the same act or omission about which complaint is made."

ADMINISTRATIVE OFFICE
OF THE U.S. COURTS,
Washington, DC, October 4, 1985.

Hon. GEORGE BUSH,
President, U.S. Senate,
Dirksen Senate Office Building,
Washington, DC.

DEAR MR. PRESIDENT: The Judicial Conference of the United States recommends the enclosed draft bill to eliminate awards of attorney fees in a suit against a judge or judicial officer who would be immune from actions for damages arising out of the same act or omission about which complaint is made.

The general outline for judicial immunity has developed over many years. Absolute judicial immunity applies to tort actions for damages, including 42 U.S.C. § 1982 civil rights actions, for a judicial decision within the court's jurisdiction, even if alleged to have been made corruptly or maliciously (*Bradley* v. *Fisher*, 80 U.S. (13 Wall.) 335 (1872); *Pierson* v. *Ray*, 386 U.S. 547 (1967)). "Jurisdiction," for these purposes, is satisfied if the decision involves a function normally performed by a judge and the parties were dealing with the judge in his judicial capacity (*Stump* v. *Sparkman*, 435 U.S. 349 (1978)). Immunity from civil actions for non-judicial official conduct by a judge is determined by reference to the rules normally applicable to that type of activity (*Virginia* v. *Consumers Union*, 446 U.S. 719 (1980)).

In May 1984, the Supreme Court held by a 5 to 4 vote that, while damages may not be awarded, judicial immunity does not bar injunctive relief in Federal courts under 42 U.S.C. § 1983 to enjoin prospective State judicial action or the award of attorneys' fees to prevailing parties under 42 U.S.C. § 1988 (*Pulliam* v. *Allen*, 104 S. Ct. 1970, —— U.S. —— (1984)). In so ruling, the Court relied upon statutory construction and the legislative history of the provisions.

In the months since the *Pulliam* decision, the State Chief Justices and other State judges and judicial officers have expressed serious concern with respect to the impact of the case on State judiciaries. These concerns include: (1) a chilling effect on judicial independence and judicial detachment; (2) the creation of a new class of Federal litigation against State judicial decisions; (3) encroachment upon the doctrines of federalism, exhaustion of State remedies, judicial restraint, and comity; and (4) the threat of heavy financial burdens, in the form of attorneys' fees, arising from a judicial decision required of the judge in the ordinary course of litigation.

In August 1984, the Conference of State Chief Justices adopted a resolution calling upon the Judicial Conference of the United States to study the issue of assessment of attorneys' fees against State judges and judicial officers under 42 U.S.C. § 1988 and to support efforts to amend the statute to exempt such individuals in suits for injunctive relief pursuant to 42 U.S.C. § 1983.

Based on review and recommendations of its Subcommittee on Federal-State Relations, as approved by the Committee on Court Administration, the Conference concluded that the concerns pressed by the State Chief Justices and others were well-founded. Accordingly, the Conference voted to recommend to the Congress that 42 U.S.C. § 1988 be amended so as not to allow attorneys' fees in cases covered by the *Pulliam* decision. The enclosed amendment would accomplish that result.

We urge the Congress to act favorably on this proposal.

Sincerely,

L. RALPH MECHAM,
Director.

By Mr. HATCH (for himself and Mr. THURMOND):

S. 1795. A bill to provide that in judicial actions against State judges, such judges shall not be held liable for attorney fees; to the Committee on the Judiciary.

STATE JUDGES' LIABILITY FOR ATTORNEY FEES

Mr. HATCH. Mr. President, in the recent case of *Pulliam* v. *Allen*, 104 S. Ct. 1970 (1984), the Supreme Court held, by the narrow margin of 5 to 4, that judicial immunity is not a bar to injunctive relief against a judge acting in his judicial capacity, nor is it a bar to the award of attorney fees against a judge against whom an injunction to request the introduction of a bill addressing the implications of Pulliam with relation to judicial independence. Accordingly, I would like to introduce at the request of the Conference of Chief Justices this legislation. It should serve as a vehicle to illuminate the critical questions posed by the Pulliam case. For the benefit of those unfamiliar with the Pulliam decision, I will recount some of the background giving rise to this opinion.

In January 1980, the respondent, Allen, was arrested for using abusive and insulting language, a class 3 misdemeanor. The petitioner, Judge Pulliam, set a bond of $250. Respondent Allen was unable to post the bond and was thus jailed until his trial day, a period of 14 days. Allen was subsequently tried, found guilty, fined, and released. The trial judge reopened the case and reversed the conviction. Allen then filed a claim in accordance to section 1983 of title 42 of the United States Code, seeking relief against the petitioner's practice of incarcerating persons waiting trial for nonincarcerable offenses. The district court found Judge Pulliam to have acted improperly and enjoined her actions. The court also found that the respondent was entitled to costs, including attorney's fees, in accordance with section 1988 of title 42 of the United States Code.

Pulliam petitioned the court to reduce the attorney's fees on the grounds of judicial immunity. The

court upheld its original decision. Pulliam then brought her case before the court of appeals arguing that as a judicial officer, she was immune from injunctive relief and attorney's fees. The court upheld the district court's decision against Pulliam. Certiorari was granted by the Supreme Court in November 1983. It marked the first time the Supreme Court ever decided a case on whether or not a judge could be held personally liable for attorney fees. In May 1984, the Court reached a 5-to-4 decision. Judicial immunity is no bar to the award of attorney's fees.

This precedent-setting decision placed limitations on the doctrine of the judiciary's common-law immunity, limitations that were for centuries unnecessary, due to the nature of common law. In 1868, one of the judges of the court of exchequer explained judicial immunity in language close to our contemporary understanding of the doctrine:

It is essential in all courts that the judges who are appointed to adminster the law should be permitted to administer it under the protection of the law, independently and freely, without favor and without fear. This provision of the law is not for the protection or benefit of a malicious or corrupt judge, but for the benefit of the public, whose interest it is that the judges should be at liberty to exercise their functions with independence, and without fear of consequences.

Hence, to protect the independence of a judge neither a suit nor damages can be brought against him.

In the Pulliam case, the Supreme Court reasoned that "for the most part, injunctive relief against a judge raises concerns different from those addressed by the protection of judges from damages awards." Yet, four of the nine Supreme Court Justices, dissenting, argued otherwise. They noted that the court, in effect, awarded a $7,691 money judgment against a State magistrate on the determination that she made erroneous judicial decisions with respect to bail and pretrial detentions. Such a judgment poses the same threat to independent judicial decisionmaking whether it be labeled "damages" of $7,691 or "attorney fees" in that amount. Moreover, as the court had stated a century and a half ago, an "action before one judge for what is done by another * * * is a case * * * against the independence of the judges." The burdens of having to defend such a suit are identical in character and degree, whether the suit be for damages or prospective relief. The dissenters maintained that the holding of the court subordinates realities to labels, that this new precedent eviscerates the doctrine of judicial immunity.

In 1895, the Supreme Court concluded:

The public are deeply interested in the rule of judicial immunity, which * * * was established in order to secure the independence of the judges, and prevent them being harassed by vexatious action; * * *

This simple statement of 90 years ago accepts as self-evident the relationship between judicial immunity and judicial independence. In that context, it is imperative that Congress examine the implications of Pulliam.

I am pleased, therefore, to introduce this bill by request of the Conference of State Chief Justices to facilitate a public discussion of the important issues at stake as judicial immunity begins to erode. I commend to my colleagues the following letter by Chief Justice Edwin J. Peterson of the State of Oregon requesting the introduction of this legislation.

Mr. President, I ask unanimous consent that a letter from the chief justice, Supreme Court of Oregon and Chairman, Committee on Judicial Immunity be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

CONFERENCE OF CHIEF JUSTICES,
October 11, 1985.

Hon. ORRIN G. HATCH,
Chairman, Subcommittee on the Constitution, Dirksen Senate Office Building, Washington, DC.

DEAR MR. CHAIRMAN: I am writing on behalf of the Conference of Chief Justices to ask your assistance in dealing with a problem that threatens the integrity of the judicial process. Our concern is directed to erosion of the common law doctrine of judicial immunity through a series of Supreme Court decisions involving 42 U.S.C. 1983 and 1988.

This erosion has been underway for some time as it involves a judge's administrative, rulemaking, and other non-judicial functions necessary to operation of an independent judicial system. But it reached a truly critical stage with the decision in *Pulliam* v. *Allen*, 104 S. Ct. 1970 (1984), which held that the doctrine of judicial immunity is not a bar to injunctive relief in federal civil rights (42 U.S.C. 1983) actions against a member of the state judiciary acting in a judicial capacity, or to the award of attorney fees against the judge under the Civil Rights Attorney's Fees Act, 42 U.S.C. 1988. This strikes at the very heart of the judicial function.

The *Pulliam* court continued to uphold the doctrine of judicial immunity as it involves direct damages against a judge. But it is our view, and that of four dissenting justices in *Pulliam*, that fee awards are as destructive to the integrity of the judicial process as direct damages would be.

Accordingly, the Conference of Chief Justices, the American Bar Association, the Judicial Conference of the United States, and many other bar and judicial organizations have passed resolutions urging Congress to remedy the problems posed for state judges by the Court's interpretation of 42 U.S.C. 1983 and 1988.

The issues are set forth in detail in the enclosed manuscript by Justice Joseph R. Weisberger of the Supreme Court of Rhode Island, prepared for publication in the Suffolk University Law Review and appropriately titled, "The Twilight of Judicial Independence".

Because you have long shown your concern for the burdens placed on state and local officials by attorney fee awards under various federal fee shifting statutes, and because you are currently addressing this problem through hearings on S. 1580, the Legal Fees Equity Act, we would appreciate it if you would sponsor legislation directed to the special problems posed for the judicial process by fee awards against judges. We enclose a draft bill for that purpose.

The suggested legislation reflects the normal policy position of the Conference of Chief Justices which proposes amendment of 42 U.S.C. 1988 to exempt judges from fee awards in actions challenging their official actions. This language offers the subcommittee and Congress the opportunity to examine the full range of decisions affecting judicial immunity and to decide on the appropriate legislative response. State judges are virtually unanimous on the view that such a response is urgently needed.

The Conference of Chief Justices would, of course, wish to testify in support of this legislation if it is introduced and hearings are scheduled.

Very truly yours,

EDWIN J. PETERSON,
Chief Justice, Supreme Court of Oregon, and Chairman, Committee on Judicial Immunity.

ADDITIONAL COSPONSORS

S. 89

At the request of Mr. INOUYE, the name of the Senator from Massachusetts [Mr. KERRY] was added as a cosponsor of S. 89, a bill to recognize the organization known as the National Academies of Practice.

S. 887

At the request of Mr. DOLE, the name of the Senator from Massachusetts [Mr. KERRY] was added as a cosponsor of S. 887, a bill to amend the Internal Revenue Code of 1954 to extend the deduction for expenses incurred in connection with the elimination of architectural and transportation barriers for the handicapped and elderly.

S. 945

At the request of Mr. THURMOND, the name of the Senator from Texas [Mr. BENTSEN] was added as a cosponsor of S. 945, a bill to recognize the organization known as the National Association of State Directors of Veterans' Affairs, Inc.

S. 1233

At the request of Mr. DOLE, the names of the Senator from Georgia [Mr. MATTINGLY], the Senator from Ohio [Mr. METZENBAUM], and the Senator from South Carolina [Mr. THURMOND] were added as cosponsors of S. 1233, a bill to amend the Animal Welfare Act to ensure the proper treatment of laboratory animals.

S. 1250

At the request of Mr. HEINZ, the name of the Senator from Hawaii [Mr. INOUYE] was added as a cosponsor of S. 1250, a bill to amend the Internal Revenue Code of 1954 to extend the targeted jobs tax credit for 5 years, and for other purposes.

S. 1647

At the request of Mr. ROTH, the name of the Senator from Rhode Island [Mr. CHAFEE] was added as a cosponsor of S. 1647, a bill to amend the Tariff Act of 1930 to enhance the protection of intellectual property rights.

S. 1741

At the request of Mr. DURENBERGER, the name of the Senator from California [Mr. WILSON] was added as a cosponsor of S. 1741, a bill to amend the Internal Revenue Code of 1954 to provide capital gain treatment for sales of certain condominiums.

S. 1774

At the request of Mr. GRASSLEY, the name of the Senator from Colorado [Mr. ARMSTRONG] was added as a cosponsor of S. 1774, a bill to amend section 1951 of title 18 of the United States Code, and for other purposes.

SENATE JOINT RESOLUTION 74

At the request of Mr. THURMOND, the name of the Senator from Michigan [Mr. RIEGLE] was added as a cosponsor of Senate Joint Resolution 74, a joint resolution to provide for the designation of the month of February, 1986, as "National Black (Afro-American) History Month."

SENATE JOINT RESOLUTION 217

At the request of Mr. HEINZ, the names of the Senator from Kansas [Mr. DOLE] and the Senator from Nebraska [Mr. ZORINSKY] were added as cosponsors of Senate Joint Resolution 217, a joint resolution to designate the week of December 2, 1985, to December 8, 1985, as "National Emergency Medical Air Transport Week."

SENATE JOINT RESOLUTION 222

At the request of Mr. D'AMATO, the names of the Senator from Nevada [Mr. LAXALT], the Senator from Indiana [Mr. QUAYLE], the Senator from Iowa [Mr. GRASSLEY], and the Senator from Tennessee [Mr. GORE] were added as cosponsors of Senate Joint Resolution 222, a jont resolution concerning the cruel and inhuman killing of Leon Klinghoffer by international terrorists aboard the cruise ship *Achille Lauro*, because he did not submit to the demands of these terrorists.

SENATE CONCURRENT RESOLUTION 69

At the request of Mr. DANFORTH, the name of the Senator from Nebraska [Mr. EXON] was added as a cosponsor of Senate Concurrent Resolution 69, a concurrent resolution to recognize the National Camp Fire Organization for 75 years of service.

AMENDMENT NO. 904

At the request of Mr. DOLE, the names of the Senator from Montana [Mr. MELCHER], the Senator from Nebraska [Mr. EXON], the Senator from Washington [Mr. EVANS], the Senator from South Carolina [Mr. THURMOND], and the Senator from West Virginia [Mr. ROCKEFELLER] were added as cosponsors of Amendment No. 904 proposed to S. 1714, an original bill to expand export markets for U.S. agricultural commodities, provide price and income protection for farmers, assure consumers an abundance of food and fiber at reasonable prices, continue food assistance to low-income households, and for other purposes.

AMENDMENT NO. 906

At the request of Mr. ABDNOR, the name of the Senator from South Dakota [Mr. PRESSLER] was added as a cosponsor of Amendment No. 906 proposed to S. 1714, an original bill to expand export markets for U.S. agricultural commodities, provide price and income protection for farmers, assure consumers an abundance of food and fiber at reasonable prices, continue food assistance to low-income households, and for other purposes.

SENATE RESOLUTION 246—RECOGNIZING BASEBALL'S NEW WORLD CHAMPIONS, THE KANSAS CITY ROYALS

Mr. DOLE (for himself, Mrs. KASSEBAUM, Mr. EAGLETON, and Mr. DANFORTH) submitted the following resolution; which was considered and agreed to:

S. RES. 246

Whereas, on the night of October 27, 1985, the Kansas City Royals climaxed one of the great chapters in major league baseball annals with a world championship;

Whereas, the Kansas City Royals captured the hearts of baseball fans all across the country with its tenacious comebacks in both the American League playoffs and the World Series;

Whereas, the Royals made history by becoming the only team to lose the first two games of a World Series in its home park but then to fight back and win it all;

Whereas, the so-called experts gave the Royals almost no chance of winning anything in postseason play;

Whereas, the Kansas City Royals defeated an outstanding Saint Louis Cardinal team in the World Series and a great Toronto Blue Jays squad in the playoffs;

Whereas, after 16 years of loyalty, Kansas City Royals fans in Kansas, Iowa, Arkansas, South Dakota, Missouri, and all over this great Nation have been rewarded with a much-deserved world title;

Whereas, Manager Dick Howser and his team have demonstrated they are indeed the right stuff;

Whereas, after an 11-0 seventh game victory last night the Royals—and Kansas City, Kansas, and Kansas City, Missouri—are on top of the baseball world: Now, therefore, be it

Resolved, That the Senate recognizes and applauds the accomplishments of the Kansas City Royals, 1985 baseball champions.

AMENDMENTS SUBMITTED

AGRICULTURAL, FOOD, CONSERVATION, AND TRADE ACT

BENTSEN (AND OTHERS) AMENDMENT NO. 908

Mr. BENTSEN (for himself, Mr. COCHRAN, Mr. PRYOR, Mr. BURDICK, Mr. FORD, Mr. SYMMS, and Mr. ABDNOR) proposed an amendment to the bill (S. 1714) to expand markets for U.S. agricultural commodities, provide price and income protection for farmers, assure consumers of an abundance of food and fiber at reasonable prices, continue food assistance to low-income households, and for other purposes; as follows:

On page 26, between lines 15 and 16, insert a new subsection (c) as follows:

"(c) The United States Trade Representative shall—

(1) review the reports prepared under subsection (a) and any other information available to identify export subsidies or other export enhancing techniques (within the meaning of the agreement on Interpretation and Application of Articles VI, XVI, and XXIII of the General Agreement on Tariffs and Trade);

(2) identify markets (in order of priority) in which United States export subsidies can be used most efficiently and will have the greatest impact in offsetting the benefits of foreign export subsidies that—

(A) harm United States exports,

(B) are inconsistent with the Agreement on Interpretation and Application of Articles VI, XVI, and XXIII of the General Agreement on Tariffs and Trade,

(C) nullify or impair benefits accruing to the United States under international agreements, or

(D) cause serious prejudice to the interests of the United States and

(3) submit to the Congress and to the Secretary of Agriculture an annual report on—

(A) the existence and status of export subsidies and other export enhancing techniques that are the subject of the investigation conducted under paragraph (1), and

(B) the identification and assignment of priority to markets under paragraph (2)."

On page 26, line 16, strike out "(c)" and insert in lieu thereof "(d)".

On page 26, line 24, strike "subsection (a)" and insert in lieu thereof "subsections (a) and (c)".

On page 27, line 3, strike out "(c)" and insert in lieu thereof "(d)".

On page 27, line 9, strike "subsection (a)" and insert in lieu thereof "subsections (a) and (c)".

ABDNOR AMENDMENT NO. 909

(Order to lie on the table.)

Mr. ABDNOR submitted an amendment intended to be proposed by him to the bill S. 1714, supra; as follows:

On page 459, between lines 18 and 19, insert the following new section:

IMPORTED BEEF, PORK AND LAMB

SEC. 1927. (a)(1) Notwithstanding any other provision of law—

(A) all beef, pork and lamb, and parts or products thereof, capable of use as human food, offered for importation into the United States shall be subject to the same inspection, sanitary, quality, species verification, and residue requirements and standards applicable to beef, pork and lamb, respectively, and to the products thereof, produced in the United States; and

(B) no beef pork, or lamb, or any product thereof, may be imported into the United States unless the Secretary of Agriculture determines that it has been processed in facilities and under conditions that are at least equal to those under which beef, pork and lamb, or the products thereof, as the case may be, are processed in the United States.

(2) Any imported beef, pork or lamb, or product thereof, that fails to meet the standards referred to in paragraph (1)(A) may not be permitted entry into the United States.

(3) The Secretary of Agriculture shall enforce this section through—

(A) random inspections for species verification and for residues; and

(B) random sampling and testing of internal organs and fat of carcasses for residues at the point of slaughter by the exporting country, in accordance with methods approved by the Secretary.

(b) This section shall becomes effective 180 days after the date of enactment of this Act.

DIXON AMENDMENT NOS. 910 AND 911

Mr. DIXON proposed two amendments to the bill S. 1714, supra, as follows:

AMENDMENT No. 910

On page 287, line 5, insert "(a)" after the section designation.

On page 287, between lines 8 and 9, insert the following new subsection:

(b) Section 1407(b) of such Act is amended by inserting before the last sentence the following new sentence: "To ensure that views of food technologists are considered by the Joint Council, two of the members of the Joint Council shall as determined to be appropriate by the Secretary, be appointed by the Secretary from among distinguished persons who are food technologists from accredited or certified departments of food technology, as determined by the Secretary.".

On page 287, between lines 14 and 15, insert the following new subsection:

(b) Section 1408(b) of such Act is amended—

(1) by striking out "twenty-five" in the matter preceding clause (1) and inserting in lieu thereof "27";

(2) by striking out "and" at the end of clause (10);

(3) by striking out the period at the end of clause (11) and inserting in lieu thereof ", and"; and

(4) by adding at the end thereof the following new clause:

"(12) two members who are food technologists from accredited or certified departments of food technology, as determined by the Secretary.".

On page 287, line 15, by striking out "(b)" and inserting in lieu thereof "(c)".

AMENDMENT No. 911

On page 287, between lines 14 and 15, insert the following:

(1) in paragraph (8)—

(A) by striking out "and" at the end of subparagraph (N);

(B) by inserting "and" at the end of subparagraph (O); and

(C) by adding at the end thereof the following:

"(P) research on new or improved food processing or value-added food technologies;";

On page 285, line 15, strike out "(1)" and insert in lieu thereof "(2)".

On page 285, line 17, strike out "(2)" and insert in lieu thereof "(3)".

On page 285, line 19, strike out "(3)" and insert in lieu thereof "(4)".

GORTON AMENDMENT NO. 912

Mr. GORTON proposed an amendment to amendment No. 565 proposed by Mr. PRESSLER to the bill S. 1714, supra, as follows:

Senate Amendment No. 565 is amended striking all after "Section 1." and inserting in lieu thereof:

"(a) This section may be cited as the "Taxpayer Antitrust Enforcement Act of 1985".

(b) Section 4 of the Clayton Act (15 U.S.C. 15) is amended by adding at the end thereof the following:

"SEC. 4I. (a)(1) An action brought by the attorney general of a State on behalf of the State or a political subdivision thereof, pursuant to section 4 of this Act to secure monetary relief as provided for injury sustained by such State or political subdivision by reason of any violation of section 1 of the Sherman Act, by the United States pursuant to section 4A of this Act for injury sustained by the United States by reason of any violation of section 1 of the Sherman Act, or by an attorney general pursuant to section 4(C) of this Act, may be maintained when such State, political subdivision, the United States, or such natural persons on whose behalf the action is brought has or have purchased indirectly from the defendant: *Provided,* That nothing in this section shall preclude any existing right of any State, political subdivision, the United States, or an attorney general on behalf of natural persons, to sue under section 4, 4A, or 4C.

"(2) In any action arising out of indirect purchases by the United States, any State or political subdivision thereof, or by any natural person, permitted by subsection (a)(1), the court shall award to the United States, State, or political subdivision, threefold that amount which constitutes the damage which would have been sustained by any direct purchaser with respect to purchases, directly or indirectly, by the United States, State or political subdivision, or natural persons, had the damage not been passed on by the direct purchaser to any other person: *Provided, however,* That there shall be excluded from the amount of monetary relief awarded in such action any amount of monetary relief which (A) duplicates amounts which have been awarded for the same injury to another person who has proven, in fact, such injury in a previous action in which the defendant has asserted a defense under subsection (b) against such other person and in which notice has been properly given pursuant to such section, or (B) is properly allocable to any person who purchased directly from the defendant, upon proof, in fact, in such action that the damage was not passed on by such person. The court shall also award to the attorney general the cost of suit, including a reasonable attorney's fee.

"(b)(1) In any action brought under section 4 of this Act, the defendant shall be entitled to allege, as a partial or complete defense, that some or all of what would otherwise constitute plaintiff's damages were passed on by plaintiff to any other person and that with respect to such damages an action may be brought by the United States or an attorney general of a State pursuant to subsection (a)(1). The defendant shall set forth, in asserting such defense, with as much particularity as is reasonable, the identity of those to whom the defendant asserts the plaintiff has passed on, directly or indirectly, some or all of plaintiffs damages.

"(2) In the event that a defendant has pleaded the defense permitted by paragraph (1), the plaintiff shall have the burden of proving that all or part of the damages, as the case may be, have not been passed on by the plaintiff.

"(3) In the event that the defendant asserts the defense permitted by paragraph (1), the defendant shall provide written notice, by certified or registered mail, return receipt requested, to any attorney general who may be entitled to maintain an action against the defendant under subsection (a)(1).

"(4) Upon receipt of such notice, the Attorney General of the United States, or of any State, in addition to any other remedy, may, upon motion made within one hundred and twenty days, intervene in such action and shall be joined pursuant to rule 24 of the Federal Rules of Civil Procedures with respect to any issue arising under paragraph (1) of this subsection.

"(5) In any case in which the defendant has asserted a defense pursuant to this subsection and in which the court awards monetary relief, there shall be excluded from the amount of monetary relief awarded any amount which (1) duplicates amounts which have been awarded for the same injury to another person who has proven, in fact, such injury in a previous action, or (2) is properly allocable to the United States, any State or political subdivision, or any natural person based on the application of this subsection to any action.

"SEC. 4J. (a) An action brought by the attorney general of a State on behalf of a seller for damages resulting from any underpayment received on the sale of cattle, hogs, sheep, grains, or soybeans shall not be barred solely because such person on whose behalf the action is brought did not sell such products directly to the defendant, if such person possessed the livestock or grain plant for feeding or growing purposes for a period of at least 21 days prior to the date of any such sale.

"(b)(1) In any action brought under section 4 of this Act by a seller, for damages resulting form any underpayment on the sale of cattle, hogs, sheep, grains, or soybeans, the defendant shall be entitled to allege, as a partial or completed defense, that some or all of what would otherwise constitute plaintiff's damages were passed on by the plantiff to any other person and that with respect to such damages an action may be brought by the United States or an attorney general of a State pursuant to this section. The defendant shall set forth, in asserting such defense, with as much particularity as is reasonable, the identity of those to whom the defendant asserts the plantiff has passed on, directly or indirectly, some or all of plaintiffs damages.

"(2) If a defendant pleads the defense permitted by paragraph (1), the plaintiff shall have the burden of proving that all or part of the damages, as the case may be, have not been passed on by the plaintiff.

"(3) If the defendant asserts the defense permitted by paragraph (1), the defendant shall provide written notice, by certified or registered mail, return receipt requested, to any attorney general who may be entitled to maintain an action against the defendant under subsection (a)(1).

"(4) Upon receipt of such notice, the Attorney General of the United States, or of any State, in addition to any other remedy, may, upon motion made within one hundred and twenty days, intervene in such action and shall be joined pursuant to rule 24 of the Federal Rules of Civil Procedures with respect to any issue arising under paragraph (1) of this subsection.

"(5) In any case in which the defendant has asserted a defense pursuant to this subsection and in which the court awards monetary relief, there shall be excluded from the amount of monetary relief awarded any amount which (A) duplicates amounts which have been awarded for the same injury to another person who has proven, in fact, such injury in a previous action, or (B) is properly allocable to the United States, any State or political subdivision, or any person based on the application of this subsection to any action.

"(d) Notwithstanding the provisions of section 4C of this Act providing that an attorney general of a State may bring an action as parens patriae only on behalf of natural persons, such attorney general may bring an action on behalf of any person, residing in such State.".

(c) The amendments made by this Act shall become effective upon the date of the enactment of this Act.".

OMNIBUS BUDGET RECONCILIATION ACT

RIEGLE AMENDMENT NO. 913

Mr. RIEGLE proposed an amendment to the bill (S. 1730) to provide for reconciliation pursuant to section 2 of the first concurrent resolution on the budget for fiscal year 1986, and for other purposes; as follows:

At the end of the bill add the following new section:

SEC. . (a) The Secretary of the Treasury shall pay, from funds in the general fund of the Treasury, into each of the Social Security Trust Funds, amounts equal to any amount of interest which would have accrued to such Trust Fund but for actions which were taken by the United States with respect to investments of such Trust Fund which would not otherwise have been taken (as determined by the Secretary of the Treasury) if the increase in the statutory debt ceiling had been enacted into law on September 30, 1985, as provided in H.J. Res. 372 (99th Congress, 1st Session) as it was passed by the House of Representatives and reported by the Senate Committee on Finance.

(b) For purposes of subsection (a), the term "Social Security Trust Funds" means the Federal Old-Age and Survivors Insurance Trust Fund, the Federal Disability Insurance Trust Fund, the Federal Hospital Insurance Trust Fund, and the Federal Supplementary Medical Insurance Trust Fund.

ADDITIONAL STATEMENTS

WEEKLY BUDGET SCOREKEEPING REPORT

● Mr. DOMENICI. Mr. President, I hereby submit to the Senate the budget scorekeeping report for the week of October 21, 1985, prepared by the Congressional Budget Office in response to section 5 of the first budget resolution for fiscal year 1986. This report also serves as the scorekeeping report for the purposes of section 311 of the Congressional Budget Act.

The report follows:

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, DC, October 28, 1985.

Hon. PETE V. DOMENICI,
Chairman, Committee on the Budget,
U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: The attached report shows the effects of Congressional action on the budget for fiscal year 1986. The estimated totals of budget authority, outlays, and revenues are compared to the appropriate or recommended levels contained in the most recent budget resolution, S. Con. Res. 32. This report meets the requirements for Senate scorekeeping of Section 5 of S. Con. Res. 32 and is current through October 25, 1985. The report is submitted under Section 308(b) and in aid of Section 311(b) of the Congressional Budget Act.

No changes have occurred since my last report.

With best wishes,
Sincerely,

RUDOLPH G. PENNER.

CBO WEEKLY SCOREKEEPING REPORT FOR THE U.S. SENATE, 99TH CONGRESS, 1ST SESSION, AS OF OCTOBER 25, 1985

[Fiscal year 1986—In billions of dollars]

	Budget authority	Outlays	Revenues	Debt subject to limit
Current level [1]	1,067.4	980.3	793.0	1,823.8
Budget resolution Senate Concurrent Resolution 32	1,069.7	967.6	795.7	[2] 2,078.7
Current level is:				
Over Resolution by		12.7		
Under Resolution by	2.3		2.7	255.0

[1] The current level represents the estimated revenue and direct spending effects (budget authority and outlays) of all legislation that Congress has enacted in this or previous sessions or sent to the President for his approval. In addition, estimates are included of the direct spending effects for all entitlement or other programs requiring annual appropriations under current law even though the appropriations have not been made. The current level exclused the revenue and direct spending effects of legislation that is in earlier stages of completion, such as reported from a Senate Committee or passed by the Senate. Thus, savings from reconciliation action assumed in S. Con. Res. 32 will not be included until Congress sends the legislation to the President for his approval. The current level of debt subject to limit reflects the latest U.S. Treasury information on public debt transactions.

[2] The current statutory debt limit is $1,823.8 billion.

FISCAL YEAR 1986, SUPPORTING DETAILS FOR CBO WEEKLY SCOREKEEPING REPORT, U.S. SENATE, 99TH CONGRESS, 1ST SESSION, AS OF OCT. 25, 1985

LEGAL SERVICES CORPORATION'S BOARD OF DIRECTORS

● Mr. EAST. Mr. President, this past spring the Senate confirmed the Legal Services Corporation's Board of Directors, the first confirmed Board in 5 years. This was the first step in shifting the direct control of the Corporation away from Congress and over to the Board where such control rightfully belongs. H.R. 2965 is the second step. It does not diminish, as previous appropriation bills have, the authority that is established in the original Legal Services Act of 1974. Passage of H.R. 2965 should bring to an end the micromanagement of the Corporation by Congress.

To be specific, the language in this bill does not include restrictions on the Corporation's basic grantmaking power. In last year's appropriation bill, Public Law 98-411, there was a requirement to maintain funding levels to grantees at the same levels as the fiscal year 1984 appropriation. Public Law 98-411 also contained the requirement that the Corporation follow a funding formula directing it to make available funds at specific amounts to every grantee. The absence of this language clearly demonstrates the confidence that this body has in the newly confirmed Board of Directors.

The importance of H.R. 2965 is that it restores the self-management to Legal Services, while retaining some good provisions that were contained in previous appropriations bills. The provisions that have been retained are restrictions on lobbying, class action lawsuits, representation of certain aliens, procedures for refunding, and local control of the LSC grantees.

I am concerned, however, by the language in the report which accompanies this bill. This language restores funding reductions proposed by the Corporation in their annual budget submission. It appears that there are still Members of this body who wish to act not only as Senators but also as directors of the Legal Services Corporation. When we confirmed this Board last spring, we expressed our trust in those nominees to act in a manner which is in the best interest of poor persons. Let's not abdictate that trust just because the Board has made some tough decisions.●

THE STATUE OF LIBERTY'S BIRTHDAY

● Mr. D'AMATO. Mr. President, it is with great pleasure that I rise today to call attention to a measure which will be signed by the President today. This measure, H.R. 407, designates the 12-month period beginning today as the "Centennial Year of Liberty in the United States." The signing ceremony is especially significant, for today also marks the 100th birthday of the Statue of Liberty.

The French gave the Statue of Liberty to the United States in 1884, and its erection on Liberty Island was completed the following year in 1885. Since that time, the Statue of Liberty has stood as a symbol of friendship and of the liberty citizens enjoy under a free form of goverment. A model of this statue, on a bridge above the Seine River in Paris, France, also stands as a symbol of every individual's right to liberty and freedom. While many nations have striven to uphold these individual rights, it is the United States which has had a longer period of constitutional, democratic government and uninterrupted freedom and liberty for its people than any other nation in history.

In 1776, the United States gained independence from Britain. For more than 200 years, Americans have enjoyed their fundamental rights to the pursuit of happiness through personal liberty and freedom. These rights are the foundation of America. These are God-given rights, which, unfortunately, many peoples of this world may never have.

As our beloved statue undergoes her final stages of renovation, well into the "Centennial Year of Liberty," let us all use this year to recommit ourselves to enjoying what we have here at home, and pray that some day all nations of this world will be free.●

PAUL W. REED III RECEIVES MELVIN T. DIXON AWARD

● Mr. BOREN. Mr. President, I rise to bring to the attention of my colleagues the fact that an outstanding young Oklahoman, Mr. Paul W. "Pete" Reed III, has been named the top Veterans' Affairs Director in the Nation. Reed, director of the Oklahoma Department of Veterans Affairs, was presented the Melvin T. Dixon Award by the National Association of State Directors of Veterans Affairs during their recent meeting in Mobile, AL.

The Melvin T. Dixon Award is the highest award given by the association and recognizes excellence in leadership and management. In presenting the award, Hoyt B. Hill, president of the association, described Reed as "one of the most dynamic young leaders in America today."

Under Reed's direction, the Department of Veterans Affairs in Oklahoma has reduced the cost per patient day by just under 17 percent while increasing services and maintaining a high quality care at Oklahoma's five veterans' centers. The department converted an underutilized hospital unit to provide additional nursing care beds for Oklahoma's war veterans and has consolidated consulting contracts. Both actions resulted in an annual cost savings of just under $500,000.●

EXECUTIVE SESSION

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate now go into executive session to consider certain nominations on the Executive Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE CALENDAR

Mr. SIMPSON. Mr. President, after conferring with the Democratic leader, I ask unanimous consent that the Senate proceed to consider the following nominations on the Executive Calendar: Calendar No. 494, Julius W. Becton, Jr., of Virginia, to be Director of the Federal Emergency Management Agency; Calendar No. 495, James P. McNeill, of Maryland, to be an Associate Director of the Federal Emergency Management Agency; Calendar No. 496, William R. Barton, of Virginia, to be Inspector General, General Services Administration; and Calendar No. 497, Francis S.M. Hodsoll, of Virginia, to be Chairman of the National Endowment for the Arts.

Mr. President, I ask unanimous consent that the calendar items just identified be considered en bloc and confirmed en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations confirmed en bloc are as follows:

FEDERAL EMERGENCY MANAGEMENT AGENCY

Julius W. Becton, Jr., of Virginia, to be director of the Federal Emergency Management Agency, vice Louis O. Giuffrida, resigned.

James P. McNeill, of Maryland, to be an associate director of the Federal Emergency Management Agency, vice Fred Joseph Villella.

GENERAL SERVICES ADMINISTRATION

William R. Barton, of Virginia, to be Inspector General, General Services Administration, vice Joseph A. Sickon, resigned.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Francis S.M. Hodsoll, of Virginia, to be Chairman of the National Endowment for the Arts for a term of four years. (Reappointment.)

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the nominations were confirmed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. SIMPSON. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

JOINT REFERRAL OF NOMINATION OF ALEXANDER HANSEN GOOD

Mr. SIMPSON. Mr. President, after conferring with the minority leader, I ask unanimous consent that the nomination of Alexander Hansen Good, to be Director General of the United States and Foreign Commercial Services, be jointly referred to the Committee on Commerce, Science, and Transportation and the Committee on Banking, Housing, and Urban Affairs.

The PRESIDING OFFICER. Without objection it is so ordered.

LEGISLATIVE SESSION

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR TUESDAY

RECESS UNTIL TOMORROW AT 9 A.M.

Mr. SIMPSON. Mr. President, I ask unanimous consent that once the Senate completes its business today, it stand in recess until the hour of 9 a.m. on Tuesday, October 29, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR PROXMIRE

Mr. SIMPSON. Mr. President, I ask unanimous consent that following the recognition of the two leaders under the standing order, there be a special order in favor of the Senator from Wisconsin [Mr. PROXMIRE] for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. SIMPSON. Mr. President, following the Proxmire special order, I ask unanimous consent that there be a period for the transaction of routine morning business, not to extend beyond the hour of 9:30 a.m., with Senators permitted to speak therein for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

RESUME CONSIDERATION OF S. 1714

Mr. SIMPSON. Mr. President, following routine morning business, the Senate will resume consideration of S. 1714, the farm bill. Votes can be expected throughout the day on Tuesday, and a late session is expected Tuesday night in order to address the business before us.

RECESS FROM 12 NOON UNTIL 2 P.M. TOMORROW

Mr. SIMPSON. Mr. President, I ask unanimous consent that at the hour of 12 noon on tomorrow, the Senate stand in recess until the hour of 2 p.m. for the weekly party caucuses.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SIMPSON. Mr. President, when the Senate does reconvene at 2 p.m., the pending business shall be the farm bill.

ORDER OF BUSINESS

Mr. SIMPSON. Mr. President, I yield to the Senator from Minnesota. When he has concluded his remarks, in accordance with the previous order, he will conclude the Senate's activities for today.

The PRESIDING OFFICER. The Chair thanks the assistant majority leader.

THE FARM BILL

Mr. BOSCHWITZ. Mr. President, I should like to speak at some length about the farm bill, a subject that the Senate is now turning its attention to and certainly a subject that is going to be very meaningful, not only to the Middle West but to the entire country.

All of us here in the Senate have been made most aware of the farmers' problems—low prices, high interest rates, an expensive dollar; perhaps most of all, large debts. Those problems are not only the farmers', however. They are shared by the entire rural economy and the many businesses that depend on agriculture—farm equipment dealers and manufacturers, rural elevators, truckers, barges, suppliers of seed and fertilizer, and Main Street as well.

Twenty percent of the jobs, even more—25 percent of the jobs—are in the food and fiber industries. So our solution to the farm problem has to go beyond the farmer himself and include the infrastructure as well—all the people who service the farmer and who are served by him; all of rural America has to be put back to work and profitably.

My solution involves a greater reliance on the free market than what has come out of the Senate or the House Agriculture Committees. I would return halfway to the free market over a 6-year period. Certainly, that is gradually enough. The administration's plan, which was rejected by the committee, would have withdrawn supports entirely in 5 years. Clearly, that was too fast, considering the present condition of agriculture.

Both the Senate committee bill and the House bill continue existing programs despite overwhelming evidence, in my mind, that those programs have not served agriculture well. To me, existing programs are part of the problem. In combination with deficit-driven interest rates and the high dollar, which is also deficit-driven, the current programs have led to the worst times in agriculture in over 50 years. Many agree, and so do I, that balancing the budget is perhaps the primary cure for many things including agriculture.

Before we embark on what we all know will be a long farm bill debate, I would like my colleagues to look at some of the factors that caused this agricultural recession—indeed, in many areas, depression. Certainly, the high cost of land, combined with easy credit and an inflationary psychology, ignited the farm crisis we face today. The good agricultural years of the 1970's were translated into higher land costs at a rate never before experienced in agriculture. Consider the average cost of an acre of land in Minnesota from 1910-84. That includes everything from some pretty swampy stuff to rich black earth in south and central Minnesota. In 1910, the average cost of land was not quite $100 an acre. It rose to just above $200 an acre between 1910 and 1973, just 63 years. Then, fueled by inflation, land values exploded to more than $1,300 an acre. Over the past 75 years, lots of things have gone up in cost as much—but few things with such rapidity. Any farmer who could sign his name could get a loan—indeed, was encouraged to do so by the banker, the Government, and virtually all his advisers. Meanwhile, back in the city, lenders were making far larger but less creditworthy loans to foreign governments. It was considered good business to be highly leveraged. Was not inflation higher than interest rates, and on top of that, interest was deductible, and the Farm Credit System had access to some pretty cheap money?

Over coffee in the local cafe, lots of farmers with 500 acres found themselves to be millionares—at least on paper. Pretty heady stuff. Amazingly, most farmers did not bite. Or they paid cash! Remember that even today, the largest group of farmers, perhaps half have no debt at all.

Back in the 1970's, cash flow—even profit—was considered unimportant by many. You were making big bucks on the escalating value of your land and lots of institutions were anxious to loan money secured by those rising values.

And then, rather suddenly, the tune changed. It was cash flow that was required again and by the very same institutions that loaned on rising land values the year before. Suddenly, with expensive land and high interest rates, the squeeze was really on.

It is important in these discussions to understand farm cash flow. Take an acre of corn land bought at $2,000—which is high now but was low 5 years ago—yielding the national average of 110 bushels of corn per acre. Our farmer joins the Federal program so is guaranteed $3.03 a bushel but is allowed to plant only 90 percent of his land. He has a real estate loan from the Federal Land Bank. The fluctuating rate—out our way—is presently 12¾ percent. That 1 acre yields $333 in cash flow—that is how much comes in—less $33 toward the land that has to be set aside. So the farmer takes in $300 per acre. That is gross revenues.

What is his interest costs?

Well, if he financed all $2,000 with the land bank, he is paying $255 just for the interest. If he financed only three-fourths of his land, the cost drops to $191.

If he owed on only 50 percent of the land, which might be closer to the average, still $127.50 of the $300 of gross income goes to interest.

So interest—without considering all the costs of planting, seeds, fertilizer and harvesting—is taking a huge chunk of the farmer's gross income. This heavy investment in capital makes agriculture particularly vulnerable when interest rates shoot up as they did.

We should also keep in mind that there are many types of farmers. The Department of Agriculture tells us there are about 2.4 million farms in the United States. To be counted as a farm it must have $1,000 in gross sales per year. That is not very much. A whopping 35 percent of people classified as "farmers" produce less than $5,000 worth of commodities a year. Virtually half of all people counted as farmers produce less than $10,000 a year. Those are what we call hobby farmers, who get most of their income off the farm. Nearly three-quarters of all farmers produce less than $40,000 annually in gross income. All of them, certainly those below $20,000 get most of their income off farms. Yet they are all eligible for farm programs. That is just plain silly. Farm programs should concern themselves with family farms—those in the $30,000 to $500,000 category. There are about 800,000 of these family farmers and we should concern ourselves with them.

One benefit of this is that we could significantly reduce the work of the USDA. If we were to say that a farmer must be entitled to $1,000 in payments under farm programs to be considered a full-time family farmer whom we want to help, we'd eliminate slightly over half of the checks sent to farmers, though only 4 percent of the dollars paid. The work of the USDA bureaucracy would be enormously reduced.

I believe strongly that the farmer not only needs but deserves our help. Our embargoes plus pricing policies all affected his business negatively. But be should move back to free markets, half way in 6 years and then make a reappraisal.

The farmer has always done best when his income comes from the free market. That is what happened in the 1970s. One other thing. We have to adopt a program and we have to stick with it. Continuity and the ability to plan are terribly important to farmers and their lenders and by fiddling with farm programs every year—and sometimes we even do it more often—we are denying the central ingredient of success to rural America.

If prosperity is to return to agriculture, I believe we have to regain in addition our share of world markets.

In discussing world trade, I talk about grains—wheat, coarse grains, which include corn, sorghum, barley and oats, and rice. Oil seeds are also a part of the group that I will discuss. Oil seeds, of course, are soybeans and sunflowers. While the U.S. exports have been as high as 60 percent of the wheat we grow, 30 percent of the corn and 50 percent of the soybeans, only 13 percent of the world production of these grains, including ours, comes onto the world market; 87 percent of the grains that are produced in the world are consumed in the countries where they are grown.

Agricultural exports affect our Nation much more so than the ordinary nation. At their height, agriculture exports were nearly triple agriculture imports. We had a positive balance of trade in agriculture of $28 billion in 1981, and even today with agricultural suffering and exports lower than they have been, our agriculture exports exceed imports by $14 billion.

The world's markets have certainly begun to elude us. The high dollar, plus the American crop loan rate—that sets our minimum price—have priced the United States out of the world market. These prices have also brought about substantial new production worldwide, so despite starvation in many parts of Africa, the world is awash in grain.

Consider our corn exports. In 1980-81 we exported 2.3 billion bushels of corn. In 1984-85 that has dropped to 1.9 billion bushels of corn. The European Community alone has gone from 711 million bushels of grain from us in 1979 to a mere 60 million bushels in this past year. Exports of wheat show the same kind of trend. Despite a growing world market for grains, our share is shrinking.

During some years we exported 60 percent of our wheat, and those were good years for agriculture. As a matter of fact, if you draw a graph and look at land values in Minnesota, you see that they rise with extreme rapidity starting in 1973. That is when the agricultural exports took off, and you see that the lines of agricultural success follow very much the lines of agricultural exports.

Since so much of what we produce goes to the world market, we are indeed a dominating force in that market, though much less so than we have been in the past. We set the world prices, many farmers and others have told me, so why not set it high. Everybody will follow. Everybody will simply price his corn or wheat 5 cents under ours. I would agree if only markets and production would remain static.

The Brazilians used to have well over two-thirds of the world's coffee market, nearly 90 percent of the world's coffee market. Surely this was a situation they could take advantage of, or so they reasoned, and they jacked up the prices. But production and markets simply do not remain static. If they had, Brazil's debts today sure would look a lot better. At higher prices lots of people, of course, began what you would expect them to do, they started to grow coffee. Today, Brazil has one-third of the coffee market, not 90 percent, and that one-third at lower prices.

The Saudis and their friends in OPEC thought that they could control oil so they raised the price out of sight, catalyzed a deep world recession and developed a huge amount of cash. By controlling production, they would continue to raise prices and prosper, at least that is the way they reasoned. As we waited in gas lines, the predictions of experts of $100 per barrel oil seemed a possibility, if only markets had remained static, but they never do, whether it is conservation, smaller cars or new production stimulated by higher prices. Well, said the Saudis, we have such a large share of world production—and the Saudis really do—that if we curtail our production we will be able to hold world prices up.

Many in agriculture reason the same way. The Saudis used to produce 10½ million barrels a day. They are now down to slightly over 2. And that is oil—a finite resource produced by relatively few countries—not grain, a renewable resource produced by virtually all 180 countries of the world.

We simply cannot control world agricultural markets. You cannot fool economic realities. We will break rural America if we try, not to speak of the U.S. Treasury.

Also, given a chance, larger and larger world competitors worldwide will develop. Earlier this year, Pro

Farmer, a weekly newsletter, reported on a trip to South America by members of the House Agriculture Committee. They found that Brazil had 620 million acres of arable ground; 120 million is currently cropped. Argentina has 400 million acres. About 50 million are plowed. We farm 420 million acres in the United States. If, through high loan rates or continuing deficits and an expensive dollar, we keep giving them an incentive to plow up more land, American farmers and their sons will face a bleak future.

Clearly, all is not bright in Argentina and Brazil, which are unstable economies and Governments. One would think hard before investing there.

Nor is there much infrastructure in those countries. In our midwest heartland, every town has a grain elevator, modern loading and unloading equipment, good roads, rails nearby, and we are blessed with a river system that bisects and cuts across our farm belt in all directions, with locks and dams to provide cheap access to markets.

Clearly, much of the Brazilian/Argentinian land does not have these advantages. It costs those farmers many times as much to get their goods to the port as it does ours. At the farm gate, those farmers get far less for their crop than our farmers do. Our infrastructure not only creates millions of jobs. It gives us our biggest advantage.

If our policies and our dollar continue to give them incentives to produce and develop their infrastructure—well, watch out. Generations of our farmers will suffer.

While I agree that the Europeans have export subsidies that hurt us—most other subsidies are exaggerated or smaller than our own—and Japan does not give us full market access, Europe and Japan remain our two largest markets. Those subsidies and barriers have to be dealt, with, and aggressive, market-oriented, long-term farm legislation is probably the best way, because you can not fool economic realities for long. But those realities certainly include propping us a faltering farm economy while the transition to more market-oriented policies is made.

I plan to offer many new ideas about how we can maintain farm income, regain those world markets that have brought prosperity in the past, and put the entire rural economy to work. That rural economy is on its knees now. We must give it the change for prosperity. We can do it with a progressive, market-oriented farm bill.

CARGO PREFERENCE

Mr. BOSCHWITZ. Mr. President, the current cargo preference law requires that 50 percent of the cargo generated by the Federal Government must be shipped on U.S.-flag vessels. This means that the U.S. Government must pay the price difference between the more expensive U.S. vessel and its foreign flag competitor. Over the past year USDA data shows that for the Public Law 480—or Food For Peace Program—this difference has averaged about $40 per ton—over a dollar per bushel of wheat—meaning the U.S. rate has been double that of the going market rate. This differential cost $150 million in fiscal year 1985.

So, when this differential is applied to commercial export programs such as blended credit, the cost either wipes out any price advantage the program may offer, or makes the program so expensive to that it is no longer cost-effective. This is the situation we now find ourselves in.

The farm bill now includes language to exempt commercial export programs from the preference laws, but the merchant marine has strongly opposed any efforts to keep them from expanding into the commercial credit programs of the Department of Agriculture.

So in response it appears that some Senators may come forward with a proposal which they argue will resolve this problem by giving the merchant marine an increase from the current 50 percent cargo preference requirement to 75 percent on the following programs: Public Law 480; section 416 donations; the African Food Aid Program; and USAID.

And then exempting the Blended Credit Program, and export PIK from the having cargo preference apply to them.

Unfortunately, this is not a real compromise. Instead it is inequitable, costly, and extremely detrimental to the Great Lakes ports.

So, Mr. President, I simply wanted to put the Senate on notice that the so-called Cochran compromise is not noncontroversial, and will be opposed by this Senator for several reasons. And I hope that those Senators and staffs listening on the box will take note that I am not alone in my opposition.

Mr. President, I ask unanimous consent to have printed in the RECORD a letter from Secretary Block in opposition to the Cochran amendment.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, DC, October 28, 1985.

Hon. RUDY BOSCHWITZ,
U.S. Senate,
Washington, DC.

DEAR RUDY: In accordance with your request, I am enclosing a memorandum covering our interpretation of the Cargo Preference Compromise. The Department is opposed to such a scheme because, in our judgment, it will be expensive, contrary to the Administration's policy not to expand cargo preference requirements and could result in less food aid to needy nations than would otherwise be sent without this type of legislation.

Sincerely,

JOHN R. BLOCK, *Secretary.*

PROPOSED CARGO PREFERENCE COMPROMISE

Our basic assessment is that the compromise, however well intended, would result in an immediate increase in U.S. Government subsidy payments to the U.S. maritime industry. In addition, the proposed amendment provides no assurance that the application of cargo preference to agriculture exports would be satisfactorily resolved.

For FY 1985, USDA subsidized the U.S. Merchant Marine with ocean freight payments of between $150 and $160 million (ocean freight differential) in the PL 480 program (both Title I and Title II).

Under the compromise, an additional 1.6 million tons of U.S. food aid would ultimately have to be shipped on U.S. vessels every year (i.e., beginning in the third year a 25 percentage point increase over FY 1985 Title I and II U.S. flag shipments of approximately 4.1 million tons). (Current depressed freight rates and the need to reactivate old U.S. vessels, including tankers to handle this additional tonnage would contribute significantly to USDA estimates as average U.S. freight rates would rise by 20-30 percent for all preference cargo.)

Thus, the compromise could increase total subsidy costs (paid by USDA and MARAD under the proposal) to well over $200 million a year in the PL 480 program alone.

Since the funding of these large subsidies would be divided between USDA and MARAD under the proposal, there appears to be substantial risk of controversy over relative contributions. Moreover, there is a risk that MADRAD funding might at some point become unavailable. The proposal recognizes this and provides that the entire compromise will dissolve in this event.

There is no assurance that the proposal will resolve the cargo preference questions. It could terminate at any time, with an immediate risk that court actions by the maritime industry could again disrupt USDA commercial export programs.

It makes no sense to increase cargo preference for what would be primarily bulk grain tonnage in the PL 480 program, with the result that old U.S. vessels would be reactivated to earn high freight rates. This would only inflate U.S. budgetary costs.

The Administration opposes an expansion of our cargo preference laws and thus opposes this cargo preference compromise because it is a costly expansion of cargo prefernce and would create a substantial administrative burden for both USDA and DOT.

RECESS UNTIL 9 A.M. TOMORROW

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that the Senate stand in recess in accordance with the previous order.

There being no objection, the Senate, at 4:55 p.m., recessed until tomorrow, Tuesday, October 29, 1985, at 9 a.m.

NOMINATIONS

Executive nominations received by the Senate October 28, 1985:

DEPARTMENT OF STATE

Laurence William Lane, Jr., of California, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Australia and to serve concurrently and without additional compensation as Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Nauru.

John Edwin Upston, of Virginia, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Rwanda.

DEPARTMENT OF DEFENSE

Sam A. Nixon, of Texas, to be a member of the Board of Regents of the Uniformed Services University of the Health Sciences for a term expiring June 20, 1991, vice Caro Elise Luhrs, term expired.

DEPARTMENT OF COMMERCE

Alexander Hansen Good, of the District of Columbia, to be Director General of the United States and Foreign Commercial Services, vice Kenneth S. George.

NATIONAL MEDIATION BOARD

Helen M. Witt, of Pennsylvania, to be a member of the National Mediation Board for the term expiring July 1, 1988, reappointment.

U.S. INFORMATION AGENCY

Charles Edward Horner, of the District of Columbia, to be an associate director of the U.S. Information Agency, vice Charles E. Courtney.

DEPARTMENT OF STATE

The following-named career member of the Senior Foreign Service, class of career Minister, for the personal rank of career Ambassador in recognition of especially distinguished service over a sustained period:

Richard W. Murphy, of Maryland.

FOREIGN SERVICE

The following-named career members of the Senior Foreign Service of the Department of State for promotion in the Senior Foreign Service to the classes indicated:

Career members of the Senior Foreign Service of the United States of America, class of career Minister:

L. Paul Bremer III, of Connecticut.
Edwin G. Corr, of Oklahoma.
Maynard W. Glitman, of Vermont.
John Dimitri Negroponte, of New York.
Nicholas Platt, of the District of Columbia.
Anthony Cecil Eden Quainton, of Washington.
Frank George Wisner II, of the District of Columbia.

Career members of the Senior Foreign Service of the United States of America, class of Minister-Counselor:

Laurence Desaix Anderson, Jr., of Mississippi.
Richard Clark Barkley, of Michigan.
Nicholas S. Baskey, Jr., of Ohio.
Felix S. Bloch, of North Carolina.
Richard Wayne Bogosian, of Maryland.
Warren Clark, Jr., of New York.
Richard E. Combs, Jr., of California.
Frances D. Cook, of Florida.
Timothy E. Deal, of California.
Carl Edward Dillery, of Washington.
Emil P. Ericksen, of South Dakota.
Vincent J. Farley, of New York.
Alan H. Flanigan, of Tennessee.
Robert A. Flaten, of Virginia.
Myles R. René Frechette, of Washington.
Charles A. Gillespie, Jr., of California.
Richard C. Howland, of New York.
David George Newton, of Virginia.
Leo J. Reddy, of South Carolina.
Robert C. Ribera, of Virginia.
William Frederick Rope, of New York.
Charles Evan Rushing, of Illinois.
Mary A. Ryan, of Texas.
M. James Wilkinson, of California.
Richard L. Wilson, of Iowa.

The following-named career members of the Foreign Service for promotion into the Senior Foreign Service, and Consular officer and secretary in the Diplomatic Service appointments, as indicated:

Career members of the Senior Foreign Service of the United States of America, class of Counselor:

John H. Adams, of California.
Eric J. Boswell, of California.
Charles H. Brayshaw, of Colorado.
William T. Breer, of California.
Albert Peter Burleigh, of California.
Jose J. Cao-Garcia, of Maryland.
Marshall L. Casse III, of Georgia.
Jeffrey Davidow, of Minnesota.
John S. Davison, of Maine.
Jon G. Edensword, of Washington.
Wesley William Egan, Jr., of North Carolina.
Adolph H. Eisner, of Florida.
Thomas Austin Forbord, of California.
Harold W. Geisel, of Illinois.
Edward W. Gnehm, Jr., of Georgia.
Dennis C. Goodman, of Ohio.
William Bruce Harbin, of California.
H. Kenneth Hill, of California.
Genta Hawkins Holmes, of California.
Robert Onan Homme, of Minnesota.
Mark Johnson, of Montana.
Ralph T. Jones, of Maryland.
Patricia A. Langford, of Mississippi.
Edward Gibson Lanpher, of Virginia.
Alan P. Larson, of Iowa.
Warren E. Littrel, Jr., of Illinois.
Robert A. MacCallum, of Oregon.
John F. Maisto, of Pennsylvania.
Philip R. Mayhew, of the District of Columbia.
Joseph H. Melrose, Jr., of Pennsylvania.
Joseph P. O'Neill, of New York.
Donald K. Parsons, of California.
Robert Stephen Pastorino, of California.
Samuel R. Peale, of the District of Columbia.
Lauralee M. Peters, of Virginia.
H. Clarke Rodgers, Jr., of Georgia.
William E. Ryerson, of Maryland.
David H. Shinn, of Washington.
Leonard G. Shurtleff, of Massachusetts.
Keith C. Smith, of Virginia.
Elizabeth A. Swift, of the District of Columbia.
James Tarrant, of California.
David S. Wilson, of California.
John Melvin Yates, of Washington.

Career members of the Senior Foreign Service, class of Counselor, and Consular officers and secretaries in the Diplomatic Service of the United States of America:

Joseph F. Acquavella, of Virginia.
Laurence G. Brown, M.D., of Oregon.
Marvin T. Doig, of Virginia.
Thomas M. Farley, of Florida.
Ralph F. Laurello, Jr., of Florida.
Jerome F. Tolson, Jr., of Pennsylvania.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

EXTENSIONS OF REMARKS

HON. ALLARD K. LOWENSTEIN

HON. ANDREW JACOBS, JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, October 28, 1985

Mr. JACOBS. Mr. Speaker, the following article from the New York Times speaks eloquently for itself about some false, absurd, and ridiculous efforts at character assassination made by one person against our former colleague, the late and honorable Allard K. Lowenstein.

"Truth crushed to earth shall rise again . . ."

THE SECOND ASSASSINATION OF AL LOWENSTEIN

(By Hendrik Hertzberg)

People who get written about in newspapers know that a correction never catches up with a mistake. The correction, if it is made at all, straggles in days or weeks later, and is printed in an obscure part of the paper, under an unexciting heading like "Editor's Note." It is an imperfect procedure at best.

The victims of mistakes made in books are less lucky. Publishers occasionally promise a corrected second edition but they usually don't regard themselves as responsible for the accuracy of what they publish; accuracy is something for authors to worry about. Nor do careless publishing houses pay much of a price in reputation. Most of us know what newspaper Janet Cooke wrote for, but how many people outside the book industry know who Clifford Irving's publisher was? Apart from a lawsuit, there is little a person about whom an inaccurate book has been written can do; and if that person is no longer living, even the courts are closed.

Still, there are times when one must try to set the record straight; and seldom has the effort been made with such cause as in the present case. More is involved here than mere error. For Richard Cummings has committed, with the collaboration of his publisher, Grove Press, what is more than a series of mistakes, something closer to the attempted murder of a dead man's honor.

Allard L. Lowenstein, born in Newark, New Jersey, on January 16, 1929, and assassinated in New York City on March 14, 1980, was a remarkable politician. He was the son of Jewish immigrants from Lithuania. His father, who gave up a professorship of biochemistry at Columbia to join the family restaurant business, was an active socialist and a prominent supporter of Jewish educational charities. Allard Lowenstein went to the Ethical Culture School and to Horace Mann; to the University of North Carolina at Chapel Hill, whose liberal president, Frank Graham, became his mentor, and where he got involved in civil rights and student politics; and to the Yale Law School. In 1950, at the age of twenty-one, Lowenstein became president of the National Student Association. For the next thirty years he was a restless samurai of American liberalism, moving from cause to job to campaign.

He agitated against fascism in Spain and racism in South Africa; wrote a fine book, *Brutal Mandate*, about a trip he took to South-West Africa; worked in reform Democratic politics in Manhattan. He was at one time or another a foreign-policy assistant to Senator Hubert Humphrey; a teacher at Stanford and at North Carolina State College; the national chairman of Americans for Democratic Action; a campaign organizer for many liberal politicians, including Adlai Stevenson, Eugene McCarthy, Jerry Brown, and Edward Kennedy; a lawyer in New York and Mississippi; a member of Congress; the only white board member of Martin Luther King, Jr.'s Southern Christian Leadership Conference; and an ambassador to the Human Rights Commission of the UN under Andrew Young.

Lowenstein played a singular role in the civil rights and antiwar movements, the upheavals that shaped so much of the politics of the 1960s. He was as responsible as anyone else for two efforts that hastened the end of black disfranchisement in the Deep South: the Mississippi Freedom Vote of 1963, which led to the formation of the Mississippi Freedom Democratic Party and the destruction of Jim Crow in the national party; and the Freedom Summer of 1964, which brought one thousand student volunteers (including Andrew Goodman and Mickey Schwerner) to Mississippi, and helped guarantee the passage of the Voting Rights Act. In 1965 Lowenstein began organizing students against the Vietnam War. He deliberately recruited young people whose participation would get sympathetic public attention: student-body presidents against the war, Peace Corps returnees against the war, seminarians against the war, Rhodes scholars against the war.

He is perhaps best known for leading, with Curtis Gans, the movement that brought Eugene McCarthy and then Robert Kennedy into the 1968 Democratic presidential race and forced Lyndon Johnson to withdraw as a candidate for reelection. Lowenstein pleaded repeatedly with Kennedy to run, and after Kennedy gave his final refusal Lowenstein told him, "You understand, of course, that there are those of us who think the honor and direction of the country are at stake. . . . We're going to do it without you, and that's too bad because you could have been president of the United States." By the time Kennedy got around to announcing his candidacy, Lowenstein was firmly committed to McCarthy. Kennedy never stopped trying to persuade Lowenstein to join with him. Before Kennedy made his victory speech the night of the California primary he asked an aide to get Lowenstein on the telephone; Lowenstein was in his bedroom on Long Island, holding the line, when Kennedy was shot.

Lowenstein ran for office himself—twice for the Senate and ten times for Congress, from six different districts in and around New York. He won only once—in 1968, in a Long Island congressional district to which he had gone partly to escape the conflict he felt between his public commitment to McCarthy and his private preference for and friendship with Kennedy. The Republicans in the state legislature (with the acquiescence of the machine Democrats) promptly gerrymandered him. In 1970 he ran more strongly than before in the parts of his old district left to him, but he lost that election and never won another.

This summary suggests the extent of Lowenstein's activities. It also suggests the fragmented quality some people saw in him. Actually, Lowenstein's many passions were all of a piece; the wildly varied things he did were all in the service of a coherent political vision. He was always being told that he was too old to be running around stirring up students, that he had better settle on some sort of conventional career or he would lose his "credibility." Yet if he had not been something of a vagabond, he probably could never have performed the special political role he devised for himself—the role of an intermediary. He tried to link Mississippi blacks with Notre Dame fraternity boys, Spanish exiles with West Side reformers, Afrikaners with third world revolutionaries, "the kids" with "the system." He was that rarity, a political figure at home in both electoral and protest politics. The mixture opened him to the risk of being thought a dreamer by practical politicians and a manipulator by radical idealists. But at his best he was able to fuse the two, bringing the energy and moral witness of protest into electoral politics and introducing protesting groups to the disciplines and practical possibilities of elections.

Lowenstein was always late, he lived on junk food and milkshakes, and his clothes were a mess. But he had immense energy, and he was able to concentrate it on the person or the task at hand with exceptional clarity of mind. He was a powerful extemporaneous speaker. Sam Brown, the antiwar organizer who became a Colorado politician, once called him the "white Martin Luther King"; and with an audience of students or liberals he could establish an emotional rapport as strong as King's with black churchgoers. Lowenstein spoke constantly—David Halberstam calculated that in the eighteen months leading up to the 1968 Democratic national convention he made 2,367 speeches in 1,392 cities [1]—and he could be as persuasive with one person as with an audience of a thousand.

He was himself a protege—of Frank Graham, Eleanor Roosevelt, and Norman Thomas, the three people he most admired—and in his campus travels he in his turn acquired proteges, by the dozen. I never became one of them, but I was part of a larger network of thousands who were drawn to him. I met him in 1963, when he came to Harvard to give a talk about South Africa and Mississippi. Afterward a half-dozen of us went with him to the Hong Kong restaurant, on Massachusetts Avenue, and ate terrible Chinese food and talked until the place closed for the night.

[1] Halberstam's article may be found in Lowenstein: Acts of Courage and Belief, edited by Gregory Stone and Douglas Lowenstein (Harcourt Brace Jovanovich, 1983). The book also contains transcripts of about a dozen of Lowenstein's speeches.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member of the Senate on the floor.

Boldface type indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

Lowenstein had a thick, weightlifter's neck and torso which made his head seem a little too small for his body, and he had thinning hair, Coke-bottle glasses, a big nose, and a delicate mouth. Yet he had "presence," which came, I suppose, from his limitless self-confidence and from the infectious urgency of his mind and voice. At the Hong Kong we all talked mostly about the excitement of changing the world (as well as about old Humphrey Bogart movies, and we gossiped about famous liberals). Lowenstein dominated the table, as we wanted him to, but he let the talk take its own course, and somehow he made each of us feel almost as brilliant, as funny, and, potentially, as dedicated to light and truth as he so obviously was himself.

There were other such evenings over the years. I was active in the National Student Association, and Lowenstein, NSA's most illustrious old boy, could be relied on to turn up each August at the association's annual congress. (Lowenstein is said to have inspired George S. Kaufmann's remark, "The student leader of today is the student leader of tomorrow.") At the 1967 NSA congress, at the University of Maryland, I saw Lowenstein launch the "Dump Johnson" campaign with an exhilarating extemporaneous speech. (I've never heard a better one, before or since.) During the 1970s Lowenstein maintained a semipermanent lunchtime symposium at the Hyde Park Delicatessen on Madison Avenue, one of several Manhattan restaurants owned by his family, and I occasionally joined it. I wrote two "Talk of the Town" stories about him for the *The New Yorker*.

I also worked as a volunteer in two or three of his congressional campaigns. Whenever I did, I made sure I had some specific task to do—usually it was editing a campaign tabloid—and then left as soon as the task was done, a few days later. Lowenstein could be immensely demanding. He consumed other people's energy, physical and emotional, almost as extravagantly as he expended his own. I knew people who had broken with him over this—people who had "burned out"—and I didn't want to join them. As it was, at the end of a sixteen-hour day of campaigning Al would come to the print shop where I was working on a campaign flyer and argue with me about the wording of headlines until three in the morning. He liked to do everything himself, which was both a strength and a weakness.

The last time I saw Al Lowenstein was toward the end of 1979, when I was living in Washington. He called one afternoon to ask if I could put him up for the night. His custom all his life was to cadge a bed from friends when he traveled. It held down expenses and helped him to maintain his vast circle. He was good company, and people were usually happy to oblige. This time he arrived at around midnight, and we stayed up talking until one-thirty or so. He was gone very early the next morning, the guest bed neatly made. A few months later he was murdered, shot in his law office by a former protégé, a civil rights worker whom he had brought into the movement. The man had gone insane, and Al was trying to help him. I went to the memorial service for Lowenstein at the Central Synagogue, on East Fifty-fifth Street, an emotional event attended by 2,500 people whose political, racial, and national heterogeneity was a reflection of the dead man's skill at building unlikely coalitions.

I mention these personal details by way of full disclosure. I liked and respected Al Lowenstein. Even so, I made a conscientious effort to approach Richard Cummings's book with an open mind.

Much of The Pied Piper is a querulous, spottily inaccurate, unperceptive biography. Had Cummings stopped there he would have been guilty of nothing worse than having written a bad book. But he did not stop there. He went on to interlard his narrative with a series of grave and ugly accusations.

Cummings's central accusation is that Allard Lowenstein was an agent of the Central Intelligence Agency between 1962 and 1967. More vaguely but hardly less confidently, he also asserts that much of Lowenstein's work before and after those dates was performed with the connivance or cooperation or encouragement—or something—of the CIA. He further asserts that Lowenstein was an informer who reported to government police agencies on people in the civil rights movement whom he regarded as Communists or subversives.

When Lowenstein's friends and family learned that these accusations were about to be made—some of them had been advanced earlier in an article by Cummings in Evergreen Review, also published by Grove Press—they decided to answer them, even at the risk of giving them greater currency. Gary Bellow, a professor at Harvard Law School, and two other lawyers, Jeffrey S. Robbins and Ronald J. Tabak, collected a great deal of material, including affidavits from more than two dozen people who had been interviewed by Cummings and whose statements to him had been used to provide incidental support to the CIA-agent thesis. The result is a curious volume the size and shape of the Manhattan telephone directory, in which many of the characters, as it were, from Cummings's book rise up, rebel, and speak for themselves. Documents Concerning Serious Factual Errors, etc., is a sort of Lowenstein reunion—a gathering of his friends and ex-friends brought together for one last cause.

A close reading of *The Pied Piper*, together with the response it generated, yields a conclusion at odds with the one Cummings intended. Notwithstanding the notorious difficulty of proving a negative, it can be said with fair certainty that Allard Lowenstein was not an agent of the Central Intelligence Agency between 1962 and 1967, or at any other time. Cumming's assertions and the proof he adduces for them are worth examining in some detail, however, for what they tell us about the standards of evidence considered acceptable by at least one more or less respectable publishing house.

Cummings sidles into his spy story in the fifteenth of his sixty-six chapters. He has been describing the trip Lowenstein took in 1959 and wrote about in *Brutal Mandate*. Taking leave from his job with Senator Humphrey, Lowenstein, with two friends, went to South Africa. Their plan was to buy a car and drive it to South-West Africa, where they would travel around collecting testimony about the situation in that territory, which was (and is) ruled by the Pretoria government under a League of Nations mandate. Then, back in New York, they would present the testimony to a committee of the United Nations General Assembly. All of this they did in due course, but first there was a detour.

While his friends shopped for a cheap used car, Lowenstein went to Johannesburg to speak to the annual congress of the National Union of South African Students, the multiracial, fervently antiapartheid federation of English-speaking university students. There he heard an eloquent speech by Hans Beukes, a "Coloured," or mixed-race, student from South-West Africa who had won a scholarship to Norway and then been denied a passport—partly because he had been caught with a book written by Adlai Stevenson. Beukes asked Lowenstein to help him get out of the country, and Lowenstein agreed to try, thinking Beukes would make an excellent witness before the UN committee. (A few days later, Lowenstein and his friends managed to sneak Beukes across the border into Botswana by stuffing him behind the back seat of their used Volkswagen and covering him with boxes and suitcases. Beukes testified at the UN and made a strong impression.)

In the middle of telling this story, Cummings writes:

"Sources report that while Lowenstein was in Johannesburg he was contacted by the CIA and asked to perform a mission which must have been highly appealing to his romantic side, while at the same time allowing him to strike what he felt was a telling blow against the apartheid government of South Africa. This mission was to smuggle Hans Beukes out of the country.

"Just who it was who recruited Lowenstein for this assignment remains a matter of conjecture. . . ."

And who are these sources? In the back of the book, where Cummings has put together twenty-six impressively dense-looking pages of reference notes keyed to quotes and facts or purported facts, we find this:

"*Sources report that* . . . July 13, 1982. One of these sources served with US Army Intelligence. The others, also with backgrounds in intelligence work, are close to the CIA."

Five chapters and two or three Lowenstein jobs later, just when Lowenstein has resigned his Stanford deanship, Cummings sets forth the assertion on which his book stands or falls:

"This was Lowenstein's situation in 1962 when, according to sources with background in intelligence work, he was formally recruited by the Central Intelligence Agency."

He immediately adds:

"Although the author's attempts to obtain Lowenstein's CIA file under the Freedom of Information-Privacy Act from the CIA and from his lawyer Gary Bellow proved unavailing, other evidence overwhelmingly supports these sources."

Turning once more to the reference notes in the back of the book, we find: "*according to sources* . . . These are the same sources referred to in Chapter 15."

Later we are told that "Lowenstein was separated from the CIA sometime in 1967," again on the authority of "sources"—"the same sources referred to in Chapters 15 and 20."

This is all Cummings provides by way of anything remotely resembling hard evidence for his central accusation—an accusation that if true would make a mockery of Lowenstein's passionately professed belief in democratic openness.

Cummings's one-line descriptions of his "sources" do not inspire confidence. A person who "served with US Army Intelligence" could be anyone from a three-star general to an ex-reservist who put in six months clipping newspapers at Fort Dix. Neither general nor clerk, however, would be in any better position to know the identity of a particular CIA agent than would tens of thousands of other federal employees, and Cummings makes no effort to ex-

plain why he thinks his "source" is exceptional. And Cummings's "others" could be anyone at all—though if they were "close to the CIA," whatever that means, then clearly they were never *in* the CIA.

Cumming's remarks about Lowenstein's * * * leaves the impression that Gary Bellow somehow prevented him from seeing it. This does not appear to be true. In 1975, with Bellow's help, Lowenstein himself filed a Freedom of Information Act request for any and all CIA materials concerning his background and activities. (A curious thing for an agent to do, though no doubt Cummings would dismiss it as part of a cover.) After some prodding, the agency replied that its search of its files had turned up seventy-six items. Nine of them were provided in full, twenty-eight were provided in expurgated form, and thirty-nine were withheld entirely. The material yielded by the CIA, a total of forty-eight pages, was available in the Lowenstein archive at Chapel Hill when Cummings was there doing his research. That material is reprinted in *Documents Concerning.* It consists almost entirely of clippings and tiny excerpts from what appear to be routine embassy cables (sample: "Advised that Congressman Allard K. Lowenstein (D-NY) planning trip to Tunisia, arriving 5 Jan. . . .").

The only item that is at all suggestive from the point of view of Cumming's thesis is a 1962 memorandum from "Chief, Contract Division" to "Chief, Personnel Security Division," asking for "approval to contact Subject [Lowenstein] on an ad hoc basis" to question him about "the Soviet educational system; teaching methods; caliber of faculty; subjects emphasized; etc." (It was then standard procedure for the CIA to try to interview Americans who visited the Soviet Union, as Lowenstein, accompanying Eleanor Roosevelt, had done in 1957.) The memo continues:

"Subject, reportedly, has stated that he has done some work for CIA. If he were used in a [six-letter word obliterated] capacity, then this is an indiscretion regarding which our field representative should like to know something about the background before any contact is made. We shall appreciate your checking this out as far as possible. Thanks."

This memo, provided by Lowenstein's friends, and more provocative by far than anything Cummings came up with in four years of research, is ambiguous. Even the significance of the subjunctive ("were used") is obscure; it is unclear whether the memo writer is talking about the past or the future.

A free-lance do-gooder of left-wing anti-Communist leanings, working with opposition groups in the third world in the late 1950s and early 1960s—as Lowenstein was—would almost certainly have encountered CIA people along the way. In some countries the CIA station chief would be the best-informed person in the US embassy, and the most sympathetic to the notion that the long-term interests of the United States lay with members of the democratic opposition rather than with the local autocracy. As was revealed in 1967, the CIA had an extensive program of channeling support to such dissidents. It is entirely possible that Lowenstein met CIA people during his travels, even that he traded information with them. There would be nothing scandalous about that. It's also possible that Lowenstein—given what another CIA document calls his "propensity for name-dropping" [2]—bragged about such contacts. A garbled version of some such boasting was probably at the root of this memo.

Or the memo could simply be wrong. It doesn't pretend to be anything more than hearsay. In any event it doesn't prove that Lowenstein was a CIA agent. And while the omissions in Lowenstein's CIA file make any definitive judgment impossible, the overall effect of what has been made available is rather to undermine than to support the accusation.

As for the "other evidence" that "overwhelmingly supports" Cummings's "sources," none of it is convincing, and much of it is self-refuting. It is of three kinds: defective tautology, outrageous misreading, and financial perplexity. To give an example or two of each:

Defective tautology.—Cummings writes that the CIA divides its work into two categories, intelligence collection and covert action. "Lowenstein," he writes, "was involved in both of these activities." The proof that he was involved in intelligence collection is the following:

"He clipped and analyzed newspaper reports on African affairs extensively. He saved thousands of newspaper and magazine articles, which he outlined carefully. He subscribed to numerous magazines on Africa, and to others likely to carry information of relevance."

The proof that he was involved in covert action is the following:

"Lowenstein, became involved in the politics of Spain and in Africa in ways that constituted 'covert action.' As Richard Bissell explained [to Victor Marchetti and John D. Marks, authors of *The CIA and the Cult of Intelligence],* the 'operational types' would be risk-takers, which Lowenstein was. Bissell, who was chief of Clandestine Services of the CIA under President Kennedy until he was forced to resign after the Bay of Pigs, classified the various forms of covert action: "(1) political advice and counsel; (2) subsidies to an individual; (3) financial support and "technical assistance" to political organizations, including labor unions, business firms, cooperatives, etc. . . .'."

And so on for four more items, culminating in Bay of Pigs-style military efforts to overthrow governments. Then comes Cumming's conclusion:

"Lowenstein's actions can be seen to fall into most, if not all, of these categories."

Cummings makes no effort whatever to show that Lowenstein's newspaper clipping or advice giving or support providing had any connection of any kind to the CIA. His reasoning is as follows: CIA employees clip newspapers, give advice, and provide support. Allard Lowenstein clipped newspapers, gave advice, and provided support. Therefore Allard Lowenstein was a CIA employee.

Outrageous misreadings—.Lowenstein, a journalist *manqué* (at the Horace Mann School, he edged out Roy Cohn in a competition for editor of the school paper), turns out to have kept an oddly touching diary in which he recorded his public and private doings in the style of the headlines in *The New York Times.* A single word on one entry in this diary is the sole source for Cummings' accusation that Lowenstein was an informer against his fellow civil rights workers. Cummings' text is a diary entry for mid-April 1964, when Lowenstein was touring the country recruiting student volunteers for the Freedon Summer project but was thinking of withdrawing from the project altogether because of the increasing involvement of the National Lawyers Guild, which began as a Communist front and retained its fellow-traveling politics into the 1960s. Here is the diary entry in full:

"Mississippi Mire: Frenzied Recruiting + Firm Withdrawal = Schizophrenia.

"A summary of the situation.

"In Mississippi—

"At Campus 'Centers'—

"In National Orgs—

"Amongst Ind. Groups—

"'Wrong' Decisions and 'Wrong' Group Making Them Combine to End 'Deep' Commitment; Problem Rises of Who to Tell How Much.

"Campus 'center' leaders in mixed roles.

"Obligation to Keep Them Informed Called 'Great' But Particularly on Question of 'Infiltration' Dilemma Is Acute and Has Not Been Solved.

"Project Still 'Right,' Desire to Help—Strong, But Policy Disagreements Make Presence During the Summer Seem 'Unwise'.

"So speech schedule will be fulfilled.

"Participation as Lawyer 'In Ranks' Still Possible but 'Priorites' Make It Unlikely If LG [3] Stays; 'Success' of Drive for Students Is a Surprise."

The single word, of course, is "informed." That word, especially in such close conjunction with the word "infiltration," is for Cummings sufficient proof that Lowenstein was an "informer." Cummings still has the problem that the people whom Lowenstein felt obliged to keep informed were "campus 'center' leaders," not government police agencies. He solves that problem with the following assertion: "It is known that the CIA had established centers on the campuses of many American universities." No evidence is adduced for the existence of these purported CIA "centers"—it is simply "known."

Cummings then suggests that these "centers" were being staffed by people Lowenstein was working within the civil rights recruitment effort, "people who had been affiliated with the CIA or had participated in CIA-sponsored projects." He names two such people: William Sloane Coffin, the Yale chaplain, who had worked for the CIA before becoming a clergyman, and Barney Frank, now a Congressman from Massachusetts, who as a college student in 1962 had attended a summer youth festival in Europe under the auspices of a program that later turned out to be funded by the CIA.

It is hard to know which is more contemptible, Cummings' sophistry or his smearing of Coffin, Frank, and, of course, Lowenstein.

The "campus centers" in Lowenstein's diary entry were of course the recruiting centers he himself had helped to set up. In an affidavit reprinted in *Documents Concerning,* Coffin remarks, "Mr. Lowenstein was not my friend *because* I had worked for the CIA from 1950–53 but, rather, *in spite* of it." Coffin writes that he thinks Lowenstein was "a bit paranoid about the possibility that radicals would take over the Mississippi Freedom Democratic Party," but adds,

"It was Mr. Lowenstein's concern about the possible unjustified damage to students'

[2] The document, apparently a cable from the CIA station at the US embassy in Madrid, calls Lowenstein "among other things a troublemaker out to establish himself as American through whom Spanish opposition leaders should deal," and adds, "To our knowledge he represents no one but himself in spite of propensity," etc.

[3] Lawyers Guild.

reputations through guilt by association that undoubtedly was the cause of the dilemma which his notes describe. Thus, the following is likely the meaning of Mr. Lowenstein's notes: With the McCarthy era fresh in mind, Allard Lowenstein was concerned about the possibility that if radicals took over the Mississippi effort, non-radical students whom he recruited to go there would later be falsely accused of being subversives. Thus, he felt some obligation to them to warn them about what he—somewhat paranoiacally, in my view—perceived to be a danger. Yet, he also worried that by providing the students with these warnings he might harm the important civil rights effort in Mississippi by discouraging many students from coming."

Calling Lowenstein an informer enables Cummings to find low irony in the fact that Lowenstein ended up on Nixon's enemies list. ("Lowenstein. . . . Now he was on Nixon's list.") There was no irony. Lowenstein earned his place on Nixon's list—No. 7—by honest work.

Another of Cummings' fantasies was occasioned by his discovery in the Lowenstein papers at Chapel Hill of some photocopies of letters home written by young Americans—all of them friends or the offspring of friends of Lowenstein's—who were teaching and living abroad. Some of the letters opened with the salutation "Dear Family"—a common enough salutation, one I often used myself when writing home from abroad to my parents and sister. But for Cummings these letters are deeply sinister:

"They were not letters home to mom and dad. There was nothing personal in them. They were intelligence reports to the "family" of trusted Americans within or at the periphery of that amorphous mass "known as the 'intelligence community.' "

But they were precisely letters home to mom and dad. In one instance, as we learn from an affidavit in *Documents Concerning* by the former Kennedy administration official Harris Wofford, mom and dad were Mr. and Mrs. Chester Bowles. The Bowleses proudly circulated copies of letters from their son Sam to their friends, including Wofford and Lowenstein. None of it had anything to do with the "intelligence community."

Financial perplexity.—Cummings writes that Lowenstein's "ability to travel abroad extensively and stay at excellent hotels when he was, for example, on leave of absence from his job as a professor and received no salary, reinforces the conclusion that the sources"—the purported sources who say Lowenstein was a CIA agent—"are correct."

Lowenstein's finances were unconventional, but there is no need to invoke the CIA in order to balance his books. When he traveled in the US, he stayed with friends and called collect from airport booths. He seldom bought clothes and was indifferent to luxury. There was always a campus group, liberal organization, or rich patron ready to pay his plane fare. In New York, he and his often numerous guests ate free at the Hyde Park and the other restaurants his family owned. He lived rent-free in his stepmother's large apartment. His wife, who was from a well-to-do family, had her own income. He never had a steady job, but he did have a more or less steady subsidy from his father and from the family restaurant business. In 1967, for example, a year in which Cummings asserts that Lowenstein's income from the restaurants was "insignificant" it was in fact $15,519, according to Lawrence Lowenstein, Allard's older brother. The equivalent in 1985 dollars is $49,600.

Cummings's CIA theorizing reaches a zany climax at the beginning of his account of Lowenstein's leadership of the Dump Johnson movement. "It has been suggested," he writes, "that Lowenstein's opposition to the war in Vietnam is proof that he could not possibly have been involved with the CIA: in actuality, his opposition to the war confirms his CIA involvement as much as anything." Cummings's reasoning—and I am not caricaturing his view—is that because (a) liberals opposed the war and (b) the CIA "was partly a liberal institution," then (c) Lowenstein's antiwar views are proof of his CIA connection. Cummings even asserts that the CIA, or rather its "good wing," had decided that Johnson had to go and was using Lowenstein as its instrument to get rid of him. Again, no evidence is provided for any of this—only circular deductive reasoning.

Although Cummings never admits of any doubt that Lowenstein worked for the CIA, he asks none of the questions that this would raise. Who made the decision to hire Lowenstein? Were there internal battles over that decision? Why did Lowenstein never call on the CIA when he and other civil rights workers were in mortal danger in Mississippi? How did he manage to fool so many people about his true identity—his wife, his friends, his associates? How did the conspiracy to keep his CIA affiliation a secret come to include enemies of his as well as friends? Why wasn't the story of Lowenstein's secret CIA job leaked to the press by LBJ, who Cummings says knew about it, in order to destroy the effectiveness and credibility of the leader of the Dump Johnson movement?

The accusation that Lowenstein worked for the CIA is not original with Cummings, of course. It was a staple of leftwing suspicions for years, though in a different and more plausible form: it always revolved around Lowenstein's ties to the National Student Association. The matter has been raked over thoroughly, beginning with *Ramparts* magazine's disclosure in 1967 that the CIA had been funding and manipulating the NSA since 1952, the year after Lowenstein was its president. Although many have tried, no one has ever succeeded in coming up with a shred of evidence that Lowenstein was witting or "witty," as those privy to the arrangement called themselves.

Moreover, there is good evidence to the contrary. The clique of ex-NSA officers later revealed as CIA agents was always cool, even hostile, to Lowenstein. Lowenstein was never invited to sit on any of the NSA's many advisory boards. When the NSA's president and vice-president finally told Lowenstein the truth, a few months before the *Ramparts* article appeared, he advised them to break the link quickly, completely, and publicly, although at that point the CIA was still hoping to keep the connection quite. After the revelation Lowenstein had a number of awkward confrontations with "witty" ex-NSAers.

Still, many people, friends as well as opponents of Lowenstein among them, * * * to believe that a man of Lowenstein's political sophistication could have been kept in dark for fifteen years about the finances of an organization with which he had such extensive dealings. I find it all too easy to believe. As it happens, I worked full time during 1965 and 1966 on the NSA staff, editing a magazine. A few months after I left, I learned, along with the rest of the world, that the organization had been financed by the CIA. I also learned that the foundation that had paid my salary and my magazine's costs was a CIA front; that a summer training program I had attended was wholly run by the CIA; that during the year I spent at NSA its top officers, all of whom I worked with nearly every day, had been engaged in a frantic debate over whether and how to break the link; and that people I had regarded as intimate friends had known all of this and more. Yet I had no inkling of any of it.

A few years later, at one of those lunches at the Hyde Park, I asked Lowenstein what he thought about the morality of the NSA-CIA connection, and I agreed with his assessment. He said that although he wouldn't agree with it or excuse it, he could make a case for the CIA's having subsidized the NSA's international activities during the early 1950s—as long as the subsidy was kept secret from its recipients. But he added he was glad he hadn't known about it, because he didn't know what he would have done with the knowledge.

He said he could see no excuse whatever for what the CIA actually did, which was to compromise and corrupt young NSA officers, most of them just out of college, by telling them about the arrangement, threatening them with jail or other harm if they exposed it, and then using them as spies in gathering intelligence on student leaders in other countries. It still seemed almost too monstrous to believe; it certainly had been too monstrous to be guessed.

The CIA-NSA revelation had a far greater effect than is generally appreciated upon the views of a generation of politically active young people. The most moderate student leaders at once understood that the government was capable of lying to its citizens to a shocking degree. The news helped to "radicalize" untold numbers of students. I'm convinced it had a similar impact upon Lowestein, who set out almost immediately to overthrow the government—or at least to overthrow a president still regarded by most of the leaders of the liberal establishment as an indispensable ally.

In a letter reprinted in *Documents Concerning*, William F. Buckley, Jr., himself a former CIA agent, writes, in his customary confident style:

"You ask whether I ever had any reason to suppose that Al Lowenstein was engaged in undercover work for the CIA. My answer: no. To be sure, if Al had been a trained undercover operative, he'd have given me no suspicion to guess this. On the other hand, with my background I might have suspected something there if something had been there. But at this point I draw on transcendent knowledge of Lowenstein: this is not the sort of thing he'd have done. And those of us who knew his character, and I was one of them, would feel safe in saying that the very idea is preposterous."

Buckley's comment suggests the most telling refutation of Cummings's thesis. As the calmer portions of his own book show, Lowenstein was too independent, too uncontrollable, too inclinded to try to run whatever show he was part of, and too talkative to be amenable to the kind of discipline under which CIA agents necessarily labor.

There was a secret in Lowenstein's life, but it has nothing to do with the CIA. Rather it had to do with his personal life and his relations with some few of the hundreds of young men he inspired and befriended. In various books and articles there are accounts of perhaps a half-dozen almost

identical incidents—incidents in which Lowenstein evinced a desire to hold and be held by a young man. David Harris provided his own account of such an encounter in his interesting memoir of the 1960's *Dreams Die Hard.*[4] In each instance, Lowenstein and a young man share a room with one bed, purportedly because no other is available; after the light is out, the protégé finds himself being hugged wordlessly by Lowenstein; he indicates somehow that the hugging is unwelcome, and Lowenstein immediately stops; afterward, the matter is never mentioned. The protégé is left with a complicated mixture of feelings: his hero worship weakens if it does not vanish altogether, and he feels manipulated; yet he feels sympathy and compassion for what seems a private torment.

Lowenstein was married between 1966 and 1977, and had three children. His separation from his wife was by all accounts caused by the demands of Lowenstein's frenetic schedule, not by any lack of affection. She and the children were with him at the hospital when he was dying. It seems unlikely that Lowenstein was an active homosexual. Approaches like the one Harris experienced were apparently as rare as they were confused and uncertain.

Yet the mostly repressed feelings those approaches reflected were obviously important. Those feelings, one can speculate, were somehow related to the potency of Lowenstein's leadership. He evoked feelings that had an intensity reminiscent of adolescent friendship. There is a sense in which charismatic leadership always draws upon a kind of libidinal force—the generalized erotic energy Whitman called "adhesiveness." That mysterious energy helped Lowenstein turn his appeals to reason and idealism into powerful bonds between himself and his thousands of young followers.

Toward the end of his life, Lowenstein was apparently trying to deal with the feelings that had led him into furtive encounters like the one with David Harris. In 1980 he campaigned successfully for Edward Kennedy in the homosexual community in Florida and had a number of earnest, private conversations with leaders of the gay movement there. According to Harris, Lowenstein spoke of wanting intimacy and affection, not sex, in his relations with men, and wondered aloud what that made him. He seemed eager to understand himself and to do away with whatever deceit his emotional life had entailed. He was worried about the effect on his children. Had he lived, he might well have become a political intermediary between homesexuals and other constituencies in the Democratic party, much as he had been an intermediary for students.

Cummings's discussion of this aspect of Lowenstein's life is relatively restrained. The conclusion he draws from that discussion does not come as a surprise. It is this: "In his personal life, as in his political life, Lowenstein was not able to reveal his relationships fully." The CIA again.

Why, finally, does Cummings find the fantasy of Lowenstein-as-CIA-agent so congenial? Why was that fantasy judged appealing enough to justify publication? I suspect it has something to do with a fundamental incomprehension of Lowenstein's politics. Lowenstein was a serious democrat and a serious liberal. He was, therefore, opposed to racism in North Carolina and Mississippi, colonialism in Angola and Mozambique, apartheid in South Africa and Namibia, dictatorship in Franco's Spain and Somoza's Nicargua, military dictatorship in Greece—and Communism in Russia and Cuba. That is, he was opposed to injustice without distinction, except the distinction of degree. Cummings understands that Lowenstein was a passionate person—in the best line in his book, he calls Lowenstein "a kind of Trotsky of the middle class"—but he does not understand what Lowenstein was passionate about. Again and again, he tests Lowenstein's—anti-communism as somehow undermining or contradicting his other professed value:

"Lowenstein was, before anything else, an anti-Communist, to whom liberalism was the most effective strategy for defeating Communism.

"And while Lowenstein spoke frequently of the need for change and for justice, it was also his burning anti-Communism that motivated him to act.

"Lowenstein became a leading liberal spokesman against the HUAC,[5] stressing the need for a more subtle brand of anti-Communism that did not overtly (!) challenge the civil liberties guaranteed by the Constitution.

"Liberals, including Humphrey and Lowenstein, feared that Communists would exploit the unrest, and this led to American support of the anti-apartheid struggle."

These formulas miss the point. Certainly there are anticommunists who are not antifascist, and antifascists who are not anticommunist, and antiracists who are neither—and Lowenstein thought there were times and purposes that required alliances with all of them. But like his hero Norman Thomas, Lowenstein was indiscriminate in his commitment to a liberal, democratic, and humane social order. Lowenstein had learned from the Spanish civil war, which he passionately followed as a child (when Madrid fell, Cummings was told, the ten-year-old Allard stayed in his room for two days, weeping), that antifascism and anticommunism alike are inseparable from the defense of democracy.

He was sometimes impatient with those whose experience had not taught them this lesson. In the civil rights and antiwar movements, he was often at odds with those who regarded his emphatic anti-communism as anachronistic or irrelevant—to say nothing of those who saw it as evidence of hypocrisy or even hostility to the cause at hand. His argument in 1964 with some of his civil rights comrades about the National Lawyers Guild caused a bitter split with them, foreshadowing the larger break between integrationists and nationalists that finally broke up the movement. The sort of radicals who used the epithet "liberal" as an insult naturally hated him, but it must be said that he also quarreled with people who were his natural allies. For example, when Sam Brown, David Hawk, and David Mixner were organizing the Vietnam moratorium in 1969, Lowenstein, then in Congress, advised them to exclude Communists and others who might carry pro-Viet Cong banners. When Brown and the others demurred, Lowenstein tried to persuade some of his House colleagues to withhold their endorsements.

Yet the moratorium organizers' rejection of Lowenstein's advice had more to do with their generation's do-your-own-thing spirit than with any sympathy for communism. They thought that excluding people would undermine the relaxed, decentralized quality of the demonstration, and that besides, the Communists weren't numerous or powerful enough to be worth the fuss it would cause to ban them. Lowenstein thought the pro-Viet Cong activists should be excluded both as a matter of principle, because they were not so much against the war as wanting the other side to win, and as a matter of tactics, because their presence would alienate vast numbers of patriotic, potentially antiwar citizens.

In the end, Lowenstein endorsed the moratorium and spoke on eight campuses under its sponsorship. However legitimate his disagreement with the organizers was, the venom it provoked was unnecessary. Lowenstein was better at handling differences with people whose views were to the right of his own. He lavished his charm on conservatives (and on the politically unawakened); he saw them as potential converts, to be persuaded or beguiled into enlightenment. But with those to his left he could be abrupt and self-righteous. It was as if he thought they were willfully turning away from truth and reason, as if he suspected them of rejecting *his* moral bona fides.

Lowenstein, however, was far from being an incipient neoconservative. He saw anticommunism as a requirement of democratic ideology, but at the same time he rejected the cold war obsession with communism as a unique evil that justifies any means—even liberalism!—to oppose it. For Lowenstein, liberalism, understood as a belief in a liberal society, was not a means or a strategy, or a way to make anticommunism palatable, or a watered-down substitute for a more "authentic" radicalism. It was the central value. Anticommunism, antiracism, and antifacism were logical, emotionally inescapable corollaries; but in isolation none of them could be relied upon to lead to a humane politics.

Cummings is puzzled by what he sees as the contradictions between Lowenstein's passionate—radical, one might say—commitment and his "moderate" politics; between his straightforward patriotism and his opposition to the Vietnam War; between his anticommunism and his support for civil rights. The CIA accusation resolves the puzzle for him, but there is no puzzle, because there were no contradictions. And if there had never been any such thing as communism, Lowenstein's lifelong political engagement would have been just as intense.

That engagement had its disappointments and defeats for him, which went well beyond the loss of elections. The civil rights movement enfranchised southern blacks but then collapsed in acrimony, leaving the hope of integration unfulfilled. Johnson was "dumped," but Nixon came to power. Democracy returned in Spain, but in southern Africa there seemed less and less chance for justice to be achieved peacefully, if at all. The large American student movement Lowenstein did so much to create produced a few Leninist sects and then crumbled. The liberal coalitions he helped build lost their verve and self-confidence.

Lowenstein, who felt these disappointments, blamed them mostly on the assassinations. The violent deaths of John Kennedy, Martin Luther King, Jr., and Robert Kennedy had changed everything—they

[4] David Harris, *Dreams Die Hard: Three Men's Journey Through the Sixties* (St. Martin's/Marek, 1982). Harris, now a journalist, was a protégé of Lowenstein's in 1965. He eventually went to jail for draft resistance, and for a time was married to Joan Baez. The three men of the title are Harris himself, Lowenstein, and Lowenstein's assassin, Dennis Sweeney, who had been a friend of Harris's at Stanford and in the civil rights and antiwar movements.

[5] The House Un-American Activities Committee.

"left us haunted," he wrote in a 1978 newspaper article,[6] "by great absence through years made difficult in part by those absences." He dwelt especially on the death of Robert Kennedy. During the middle 1970s, to the dismay of many of his friends and rather to the annoyance of the Kennedy family, he spent a great deal of time upon an inconclusive effort to point out what he regarded as discrepancies in the claim that Sirhan Sirhan alone was responsible. Lowenstein had intense feeling for Robert Kennedy, and Kennedy's murder seemed to summarize for him all the forces of unreason and malevolence that had robbed the movements he served of their fruits. In that same 1978 article he wrote:

"I was never close to Robert Kennedy. Our relationship was political, and started out in rather adversary circumstances at that. Of the only year I knew him at all well, it would be accurate to say that I spent one half arguing that he should run for president when he wouldn't, and the other half supporting an opponent when he did. Yet he meant more to me, as to so many others, than any other public figure of the time, and the awful fact of his unnatural death will shadow events as long as we are a part of them.

"And in that shadow we still struggle with the problem connected to so many others—the problem of how to revive enthusiasm and excite energies, of how a spirit once aborted can be born again. . . . America is neither as innocent nor as easily changed as we once thought."

Two years later, Lowenstein was assassinated himself. His death was another blow to the politics he shared with the Kennedys and King—an inspirational, democratic politics whose weakness is precisely that it requires such heavy and risky investments in the fortunes of particular leaders. Lowenstein would be fifty-six now. I don't know what he would be doing but it is hard to imagine him sharing the present liberal mood of lassitude and self-pity. Things were palpably different in 1964 and 1968 because of him, and it's possible things would be different in 1985 if he were still alive.

The man who murdered Allard Lowenstein, Dennis Sweeny, had broken with him over the question of whether or not the "system" was redeemable, Sweeney had been a civil rights worker, by all accounts a heroic one; he became a revolutionary, then a dropout, and then he went mad. In Mississippi, Sweeney had had his teeth capped by a volunteer "movement" dentist. He apparently came to believe that an electronic device had been planted in his teeth, that the CIA had done it, and that somehow the CIA and Lowenstein were using it to control his mind. Sweeney's delusions obviously tell us nothing about Lowenstein's relationship with the CIA—only about the pervasiveness of the fantasy of the CIA as mysterious and all-powerful.

Richard Cummings has clung to his beliefs about Lowenstein and the CIA as tenaciously as Dennis Sweeney did to his. The affidavits in *Documents Concerning* are full of descriptions of meetings with Cummings in which he tries to press his Beukes theory or his-informer theory or his "Dear Family" theory on people he interviews, and then, having been shown wrong, leaves in disappointment or * * * but undissuaded. His fantasy of Lowenstein's CIA connection has far more in common with Sweeney's than either has with what is commonly understood as reality. Such people may be convinced their delusions are true, but what is Grove Press's excuse?

Fortunately, Lowenstein's reputation survives, thanks partly to the diligence of his friends. But a scar will remain as long as *The Pied Piper* is the only biography available. It would be a shame if a bad book about Lowenstein were to discourage the writing of a good one. Lowenstein was a man whose large flaws and immense strengths went together. He was a kind of hero, and his picaresque life has much to reveal about the mysteries of politics and about the susceptibility of events to one man's will. The next biographer of Allard Lowenstein need not agree with his political views, but he or she must be able to understand them. Only then can the story of Lowenstein's life be taken beyond polemic to explore his complex character and its impact on his times.

THE 60TH ANNIVERSARY OF ST. NICHOLAS RUSSIAN ORTHODOX CHURCH

HON. PAUL E. KANJORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, October 28, 1985

Mr. KANJORSKI. Mr. Speaker, it is my pleasure to draw your attention to the 60th anniversary of the St. Nicholas Russian Orthodox Church in Wilkes-Barre, PA. I am happy to extend my personal congratulations and share with my colleagues in the House of Representatives the history of this fine church. The United States was founded on the principles of religious freedom for all, and this church in particular exemplifies this great American tradition.

The St. Nicholas Russian Orthodox Church was organized in 1932 by 19 dedicated men and their families, most of whom were immigrants from various parts of Russia. The first Hierarchal was Bishop Platon, and the first parish priest was Reverend Nicholian, who held services in nearby St. Mary's Syrian Orthodox Church. In the fall of 1925 Reverend Nicholian held Liturgy in the newly constructed church, a basement type building.

A number of priests were assigned to the church, and in the early 1950's the energetic Rev. Timothy Korblinoff began a new building fund. Before he was able to witness the completion of his dream for a newly constructed church, Reverend Korblinoff unfortunately suffered a fatal heart attack. His successor Rev. Gregory Szeyko was able to continue his plans, and the new church was dedicated in 1954. After only 5 years, the mortgage was completely paid off.

With the help of many dedicated individuals who donated a tremendous amount of their time and money, the interior church painting was completed and dedicated by a Pontifical Blessing on May 20, 1962. The golden anniversary of the church was celebrated on Sunday, October 26, 1985. Currently under the guidance of Rev. Stephen Janos, St. Nicholas Russian Orthodox Church has grown from an original congregation of 30 families to more than 100 families.

Mr. Speaker, it is indeed a privilege to commemorate the founders and the current members of the Russian Orthodox Greek Catholic Church as they celebrate the 60 years of history, and I would like to take this opportunity to wish them all the best for their future.

TISH SOMMERS, A SPECIAL PERSON REMEMBERED

HON. OLYMPIA J. SNOWE

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Monday, October 28, 1985

Ms. SNOWE. Mr. Speaker, almost everyone who knew her has a special story to tell about this remarkable woman who touched the lives of so many. Thus, when she died on Friday, October 18, those who mourned for Tish Sommers spanned the continent. Not only was she the founder of the Older Women's League, she was the founder of something much more fundamental—she "discovered" older women. Until Tish, older women were invisible. Tish helped to elevate older women from a position of obsolescence to a place of honor where they could again develop the network, the confidence, and the personal vision to think, speak, and advocate for their rights.

For all of us, Tish Sommers was a model—of aging, of womanhood, of the very best that each of us can be.

Mr. Speaker, I would like to include in the RECORD the following tribute to Tish Sommers that appeared in the Washington Post.

TISH SOMMERS, A SPECIAL PERSON REMEMBERED

(By Cynthia Gorney)

OAKLAND.—I am gazing at a pile of typewritten speeches and snapshots and political notes and trying to think how to explain the life and death of Tish Sommers, who died of cancer here yesterday and left women across the country working to believe they would finally have to let her go.

She was 71, as graceful a woman as I have ever known, tall and slender and given to the controlled movements of a dancer. She had danced in her youth, as part of modern troupes that performed internationally, but that was not how Tish emerged in the lives of all these women, women who were old enough and young enough to be one another's grandchildren and great-aunts. She was an organizer, an agitator, a woman of such passionate purpose and drive that in her last two weeks, as she lay in her upstairs bedroom and felt her systems failing one by one, she talked seriously about the need for improved national organization within the hospice movement.

The term "displaced homemakers," an initially unsettling concept that swiftly became popular currency among politicians discovering new constituencies, was invented by Tish Sommers; it was her imagination, her political instincts and her precisely channeled outrage that gave national voice to a vast assortment of American women

who found themselves aging in a society that appeared to have almost wholly lost interest in them.

When corps of older women besieged Capitol Hill last Mother's Day, bearing cards invoking the congressmen's own mothers along with reminders about legislative matters like Social Security cost-of-living adjustments and low-cost senior housing, that was Tish. When Displaced Homemaker bills were approved in 23 states, each vote following an onslaught of publicity about the emotional and financial distress of the homemaker set aflounder by widowhood or divorce, that was Tish.

It was Tish who would appear on television programs, smiling pleasantly at the host and holding always to her thoughtful low voice, and lay out the kind of plain information that made women sit down at their kitchen tables and write long angry letters about what had happened to them. She would talk about pensions, and job discrimination, and the statistics she had culled that week. Four million women between age 45 and 65 have no insurance at all. Tish would say. White women are twice as likely as white men to be living in old-age poverty, she would say; the figure doubles for black women. Less than 20 percent of women are eligible for non-Social Security pensions, and there is no Social Security for a homemaker's work, making most mid-life widowhood or divorce a sudden thrust into a job market that will not be bothered with 52-year-old women who lack "experience."

A Displaced Homemaker Network grew from the groundwork Tish laid, so that 500 programs around the country now offer counseling and job training to the women she wanted to reach. She had founded a group called OWL, Older Women's League—Tish always liked the venerable image of owls—and by the time she died, OWL had grown in five years to a 13,000-member organization with 90 chapters across the country. There are OWL chapters in places like Jeffersonville, Ind., and Eatontown, N.J., and there is a national headquarters in Washington, and there are senators and congressmen and Social Security critics who keep hearing from OWL members, and there are women who write still to Oakland or to Washington to lay out afresh the stories Tish had heard so many times before.

Economy, Ind.: "I need to get out in the world again. After 33 years we're getting a divorce. I need to know how to get a job and meet people." Saratoga, Calif.: "I found myself, at age 53, working for an employment agency. At the end of three months, I left feeling old, inadequate and worthless."

Those letters were sustenance for Tish; she worked them into speeches, invoked them in public hearings, sat friends down at her kitchen table to argue out the next plans for setting those women into motion. Helplessness drove her wild. There is a transcription here of a conversation at Tish's bedside a month before she died; she is explaining, probably by way of slightly sheepish apology to the friends asking her to please slow down and pay attention to herself for a minute, why even her own cancer was driving her to organize among the dying and those who cared for them.

I can't help it," Tish is saying. "It's part of my nature, that since I'm going through this experience to turn it into energy for positive change. Of course that energizes me. I have the feeling in terms of pain control. I go on daytime on adrenalin and at night on sleeping pills. Now I find it's hard to meditate—when I relax and go blank, I'm so aware of physical discomfort. It doesn't work for me. Action does."

I met Tish 12 years ago, when I was a Berkeley undergraduate and she was stirring up trouble in a local advocacy group she had named Jobs for Older Women. I was dazzled from the beginning; she was so lovely, so driven, so removed from the sickly passiveness I had once thought America forces on its elderly, that she gave me a new vision of what it might be like to celebrate my 70th birthday. We flew to Washington together before I graduated, each of us at work on questions of Social Security for homemakers.

Tish told me a little about her early days: the years in Germany as a visiting American dancer, the gathering rage about what Hitler was doing to the Jewish family that had taken her in, the middle years as a professor's wife and civil righs organizer in Alabama, the early feminist work. When she divorced, she was a 57-year-old woman with no pension and no Social Security entitlement of her own. She was denied credit, turned down as a PhD candidate, rejected for health insurance because of her earlier cancer.

"I wrote a book," Tish said last spring, when some oral historians asked her to talk about her life, "called 'The Not So Helpless Female.'" (I can see her smiling as she says this; she was usually charmed by her own pithy titles, and particularly liked the business cards she designed, in which a jovial witch rides across the logo. "Free-lance agitator," the cards read.)

"Kind of how to make things happen," Tish said, remembering her book. "To shake things up. Sort of a wave-making manual. After all, I had quite a bit of experience at making waves."

She had cancer for six years. It was massive, pervasive cancer, spread through her bones, and she carried it the way she had carried her divorce and her earlier mastectomy and everything else that another kind of person might have imagined the most private of personal hurdles. She wrote position papers on health care, flew East for hearings and board meetings, made outlines for a book about women as caregivers. Once a year, with friends from around the country in tow, she and her organizing partner Laurie Shields arranged rafting trips, and then Tish would lie back in places like Idaho or Jackson Hole, Wyo., and dangle her ankles in the water, and talk about how the cancer was changing her tactics. When she got back, she worked white-water rafting images into her speeches.

It was almost as though Tish had no private self, as though introspection and fear seemed to her the most self-indulgent of luxuries. You never talked to Tish about restaurants or couch upholstery or whatever it is friends talk about when they're feeling evasive and silly. She wanted the central questions raised immediately, and then she wanted to figure out how to make things better.

We were all afraid of her cancer, especially the younger women around her. It was awful to imagine illness destroying Tish, and she would look us in the eye and talk about that, just as she had grinned at us 10 years ago and said that when America began thinking right, the cosmetics industry would begin marketing pour-on wrinkles and age spots for women eager to display their own maturity.

And she never did let the cancer destroy her, at least not so we could see it. She slowed for it, and eased her traveling and spent more time in the upstairs room with the sun pouring in, gritting her way through the worst parts and refusing until the last week the painkillers that kept her from thinking clearly and making plans.

When she knew she would die before the year ended, she told us, one by one.

She was lying in bed when I saw her two weeks ago, her thin arms folded up behind her head, and she let me know almost immediately that she was saying goodbye. I asked her if she was frightened, and she said she was not, that an awful lot of people had begun trying to convert her to their particular God, but that she didn't feel the need. Her work was going to survive her, and that would do.

Then Tish smiled at me, and God bless her, she gave me my assignment for her memorial. She had typed it out. The OWL convention was being planned; she thought a memorial might help fire people up. There would be some singing, and some reminiscences, and a brief summary of her life, with slides. I was to write the narration. Maybe Ronnie Gilbert, the big-voiced folk singer from the Weavers, could read it, "Not Maudlin," the paper said, right near the top.

UNFAIR TAX REFORM PLAN INHIBITS CAPITAL INVESTMENT

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Monday, October 28, 1985

Mr. HUBBARD. Mr. Speaker, I received an excellent letter from one of my constituents, Lowell P. Haywood, wood procurement manager of Westvaco Corp. at Wickliffe, KY, which I believe will be of interest to my colleagues.

Mr. Haywood has contacted me because of the potential impact of changing tax policy upon Westvaco's current capital investment program. Although the President's tax reform proposal has many desirable features, he believes that it is important to alert Members of Congress to the provisions that will adversely affect Westvaco Corp. and other businesses across the Nation.

I urge my colleagues to carefully consider his comments. The letter from Mr. Haywood follows:

AUGUST 26, 1985.

Hon. CARROLL HUBBARD, Jr.,
Rayburn House Office Building,
Washington, DC.

DEAR MR. HUBBARD: Sound economic growth is important to the future of our nation as well as to the future of the paper industry and the company I work for, Westvaco. Because of the potential impact of changing tax policy on our current capital investment program, we are monitoring with great interest the tax reform proposals now being considered by Congress.

The President's tax reform proposal has many desirable features which are beneficial to individuals as well as business and industry. The fundamental concept of fairness and simplicity as well as the stated objective of creating a future of greater growth and opportunity for all is sound. We realize that the proposals now being considered by the Congressional tax writing com-

mittees may undergo considerable change. However, we feel that it is very important to alert our representatives in Congress, as well as the citizens of the communities where we have been investing our capital, regarding the possible impact that several of the tax proposals presently being considered, may have on Westvaco and the paper industry.

The major concerns we have are the following:

(1) Recapture of the tax benefits obtained from the use of accelerated recovery systems from 1980 through June 1986.

(2) Replacement of the current investment tax credit and accelerated cost recovery system with a less favorable capital cost recovery system.

(3) Removal of the investment tax credit on January 1, 1986.

(4) Changes in foreign tax credits.

(5) Timber related provisions—capital gains treatment and capitalization of management expenses.

The enactment of these provisions will take $90 million right off the bottom line of our cash flow. This shortfall may cause Westvaco to defer some of the things we need to do to enhance further our competitive strength and affect our ability to maintain the same level of employment stability in the future that we have been able to provide in the past. It is estimated that the implementation of these proposals will result in a loss of 180,000 jobs in the paper industry over a five year period, (36,000 jobs lost each year).

Since I live and work in Western Kentucky, I am deeply concerned about future industrial development in our area. Westvaco contributes considerably to the local economy and we all hope that in the future Westvaco will expand their operations. Slowing any expansion plans will not only affect the people who work at the present mill but reach into the surrounding counties where we purchase our wood fiber. The many landowners who we purchase timber from and the logging crews who make their living by selling their wood production to us would be adversely affected by any negative moves forced on Westvaco.

In recent years, the climate for capital investment has been relatively good and has allowed our industry to remain healthy and highly competitive. In 1984, Westvaco embarked on its latest growth program. The new $1.6 billion capital improvement program was made on the basis that the tax credits would be available. The removal of the ITC at this point would be unfair because in prior periods of tax changes, transition rules were always available for committed projects.

The recapture concept is unprecedented, retroactive and discriminatory. The recapture proposal will have more than a $1.2 billion negative impact on the paper industry, money that will not be available for capital expenditure. Additionally, our international competitors have accelerated recovery and without it the U.S. paper industry will fall far behind our major competitors, Canada and Sweden.

Our industry is a major contributor to the nation's tax base, and Westvaco has paid its fair share of taxes. Over the past four years we have paid over $197 million in Federal taxes.

What is needed? We urge you to consider the following:

(1) Elimination of recapture.

(2) Provide for a capital recovery system that approximates the current combination of ACRS/ITC or expensing—if a new capital recovery system is adopted, provisions for transition should be made for those who have made investments under ITC.

(3) Preserve the current method of computing the foreign tax credit.

(4) Retain the current deductibility of timber management, maintenance, and carrying costs as under the present law.

(5) Retention of capital gains for timber.

Your attention to everything I have mentioned in this letter will be greatly appreciated. Understanding our concerns and conveying this information to your colleagues on the Ways and Means Committee will be appreciated. Your help is needed by all of us in Kentucky. I look forward to hearing your views on these issues.

Sincerely,

LOWELL P. HAYWOOD,
Wood Procurement Manager.

AN OUTSTANDING CHOICE, RUSSELL A. ROURKE, AIR FORCE SECRETARY-DESIGNATE

HON. GUY VANDER JAGT

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, October 28, 1985

Mr. VANDER JAGT. Mr. Speaker, it is with a great deal of personal pride and pleasure to bring to the attention of my colleagues an outstanding feature story on a man that we all know, Russell A. Rourke, who has been selected by President Reagan to be our Nation's new Secretary of the Air Force within the next few weeks. We know Russ in his present role as Assistant Secretary of Defense for Legislative Affairs. But many of us recall with great pleasure his earlier service on the Hill dating back to 1961 when he served with great distinction as administrative assistant for our former colleagues John Pillion, Henry Smith, and Harold Sawyer. I am certain that we would all agree that the President has made an exceptional, excellent choice in Russ Rourke.

One of the most respected and popular Washington writers, Jeremiah O'Leary, recently wrote an excellent feature story on Russ which appeared in the October 14 edition of the Washington Times. I am delighted to include it at the conclusion of my remarks.

I know that Russ views this appointment as Secretary of the Air Force as one of tremendous challenge in what we know as an already illustrious career. But, there's no question he'll meet this challenge as well. Congratulations Russ.

The news article follow:

[From the Washington Times, Oct. 14, 1985]

YOUTH WHO LIED TO JOIN UP AT 15 IS AF SECRETARY-DESIGNATE AT 53

(By Jeremiah O'Leary)

Thirty-two years ago, a kid named "Rusty" Rourke was a Marine private first class who cleared latrines at the Henderson Hall Barracks in Arlington when he was not pulling sentry duty. Next month he will be confirmed as secretary of the Air Force in charge of 600,000 uniformed personnel, 266,000 civilian employees, 7,299 operational aircraft and 136 air bases.

Russell A. Rourke, 53, a red-haired half-Irish, half-Swedish New Yorker from the Bronx, has come a long way from the day in 1947 when he lied about his age (he was 15) to join the Navy as a seaman recruit. Today he is assistant secretary of defense for legislative affairs at the Pentagon, awaiting only the standard FBI background check and Senate confirmation before becoming one of the three service secretaries.

A lifelong conservative and Republican, Mr. Rourke has had a roller-coaster career since he got his true age straightened out with Uncle Sam; he switched to the Marine Corps in November 1953 and became an officer candidate after graduating from the University of Maryland. The war in Korea was over by the time he got there as a lieutenant and radar air controller stationed at Pohang for a year.

He left active duty in 1956 to attend Georgetown University Law School, and joined a reserve unit, Marine Air Control Squadron 24, which had the interesting distinction of training on the grounds of St. Elizabeths Hospital.

"It was never dull up there on the hill," said Mr. Rourke. "We used to drill on a parking lot next to one of the locked wards to the vast enjoyment of the inmates. There must have been some ex-Marines in there as patients because they were always yelling at us to get in step."

On one occasion in the early '60s, he recalled, the "St. Elizabeth Marines" had to deploy guards and call in the police when their radar dome was subjected to a bow-and-arrow attack by unseen neighborhood youths who may have thought the radar was playing hob with their television sets.

As a young Washington lawyer in a large firm, Mr. Rourke found himself mired in routine paperwork and rarely in a courtroom and in 1961 began a new career that lasted for 20 years as an administrative assistant to several Republican members of Congress from the Buffalo, N.Y., area. The first of these was the late Rep. John R. Pillion, an old-school politico who ran his office like a first sergeant and took a dim view of anyone who thought Sunday was a day of rest.

"That wasn't the best move I ever made," said Mr. Rourke. "Mr. Pillion was the floor manager for Congressman William Miller on the 1964 Republican presidential ticket of Goldwater-Miller when they were swamped by Lyndon Johnson and Hubert Humphrey. Mr. Pillion was defeated in the Democratic landslide."

Bill Miller, the vice presidential candidate hardly anybody can name, helped Mr. Rourke switch over to a new post as administrative assistant to moderately conservative Rep. Henry P. Smith III of North Tonawanda, N.Y. When Mr. Smith retired in 1974, Mr. Rourke ran for his seat, endorsed by both the Republican and Conservative parties. He lost the election in the solidly Republican 36th district in the backlash of President Nixon's resignation and the Watergate scandal.

But Mr. Rourke rose Phoenix-like from the ashes and became deputy to President Gerald R. Ford's counselor John O. Marsh Jr., now secretary of the Army. When Mr. Ford lost the presidential election to Jimmy Carter in 1976, Mr. Rourke returned to Capitol Hill as administrative assistant to Rep. Harold Sawyer, a Republican from Dearborn, Mich. After President Ronald Reagan's victory in 1980, Mr. Rourke was

chosen by Secretary of Defense Caspar W. Weinberger as assistant secretary of defense for legislative affairs.

Mr. Rourke said he sees nothing remarkable about the meteoric series of ups and downs in his life. Having been a Marine Corps private, he was not surprised to reach the reserve rank of colonel from which he has now retired. He said his long service at the House of Representatives, with its ever-changing membership, taught him about the impermanence of power in a political democracy.

He also learned, in the process of being made an honorary citizen of Texas, that life is not dull at the Capitol. This was arranged by former Sen. John H. Tower after Mr. Rourke overpowered a man who tried to assault a Defense Department nominee during a confirmation hearing in 1982.

At the end of the first Reagan term, Mr. Rourke was ready to leave the Defense Department to enter private enterprise but Mr. Weinberger asked him to stay on for possible promotion. It came when Air Force Secretary Verne Orr notified Mr. Weinberger that he intended to retire for personal reasons. Mr. Rourke got the nomination next month.

Because he knows by name and face every member of the Senate and House from his legislative liaison duties, Mr. Rourke anticipates no problem in being confirmed. He has no known enemies or opposition in either House of Congress and has an easy relationship with nearly everyone at the Capitol based on his knowledge of how Congress works and his own reputation for candor and wit.

He could probably make a lot more money on the outside. Mr. Rourke says the new job amounts to a $2,000 raise to $75,000 a year, but an invitingly new set of challenges.

"Verne Orr knows every square foot of the 104 American air bases in the U.S., the 32 foreign air bases and the more than 2,000 minor installations," he said. "I have a lot of ground to cover to catch up."

CENTENNIAL OF THE NEWPORT UNITED METHODIST CHURCH

HON. PAUL E. KANJORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, October 28, 1985

Mr. KANJORSKI. Mr. Speaker, it is my pleasure to draw your attention to the centennial of the Newport United Methodist Church. It is an honor to share with my colleagues the history of this fine church.

The origins of the Newport United Methodist Church date back to a Sunday in October 1885, when a group of worshippers met in a school in Alden as Methodists. It was not until the following year that the congregation had the services of a pastor, Rev. George Greenfield. The original charter lists William Reese, Thomas Turner, William Netherton, M.H. Fine, and Thomas Byran as the first trustees.

The First Methodist Episcopal Church of Alden was incorporated on September 26, 1889, and in 1890 three members of the congregation were able to obtain a land grant on which to erect a church. The church was dedicated on June 29, 1890, and contributions from the 1 day of dedication services paid for more than half of the cost of the church.

With the national merger of the Methodist Episcopal Church and the Evangelical United Brethren Church in 1970, Rev. LeRoy Flohr was appointed pastor of the Calvary Charge which included the Alden congregation. The Alden and Wanamie congregations merged in 1978 to form the present Newport United Methodist Church, which is currently served by Rev. Roger C. Yoder.

Mr. Speaker, religious faith has played an important role in the development of our Nation, and the 100-year history of the Newport United Methodist Church is testament to the continuing importance religion has in the lives of Americans.

NATURAL GAS DECONTROL

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, October 28, 1985

Mr. MARKEY. Mr. Speaker, the issue of natural gas decontrol has been debated regularly by this body and its committees. One feature of that debate has been a regular discussion about the Powerplant and Industrial Fuel Use Act of 1978 which puts limits on the use of natural gas.

Now that significant portions of new gas is decontrolled, we are seeing how the marketplace responds. However, it is important to note that controls on old gas remain, and I strongly believe that these controls should not be lifted or else the consumer will pay dearly. But another portion of the controls which have not been lifted yet are the restrictions put in place by the Fuel Use Act.

There should be some discussion on this proposal. My mind is not made up on how the consumer would benefit if these restrictions are lifted. But, in order to advance the discussion on this subject, I offer to my colleagues a summary of a recent study, "Regulatory Restraints on Natural Gas Use: The Logic is Lacking" by Ted R. Miller and Charles F. Stone. This research paper, published by the Urban Institute, reviews the effect of this act on consumers, international trade and the environment. I invite my colleagues to make use of its analysis in our continuing discussions on this subject.

EXECUTIVE SUMMARY

The Powerplant and Industrial Fuel Use Act (FUA) of 1978 prohibits electric powerplants and major industrial fuel-burning installations from using natural gas and oil as fuels in newly-built facilities. This paper provides an assessment of the logical foundation of FUA in a number of areas and finds it lacking in every respect. Thus, FUA appears to be an unnecessary and burdensome regulation. Its repeal would further the regulatory relief objectives of the Reagan economic recovery program.

FUA was passed to deal with an energy "crisis" and fears that the U.S. was rapidly exhausting domestic supplies of natural gas. However, events since 1978 have shown that decontrol of wellhead natural gas prices alone would have been sufficient to provide an adequate supply of natural gas for the next several decades. FUA prohibitions, together with "incremental pricing" provisions of the Natural Gas Policy Act that impose higher natural gas prices on certain industrial users, have impacts in several areas.

IMPACT ON ECONOMIC EFFICIENCY

Natural gas appears to be competitive with coal in many situations where its use is prohibited by FUA. Besides electric powerplants, the main industries affected are food processing, paper, chemicals, and primary metals. Although firms may be able to get an exemption from FUA prohibitions, the process is costly and time-consuming, the outcome is uncertain, and many may be unaware of the exemption process. Thus, FUA prohibitions discourage the use of gas-fired facilities even when they are economically justified.

Where firms install coal-fired capacity as a second-best choice, production costs and prices faced by consumers are higher than they would be if FUA and incremental pricing were repealed. The very long lead times required to bring coal-fired capacity on line compared to gas expose firms to uncertainty about future demand that raises costs and risks. Also, coal-fired capacity requires a larger capital investment in an economy where large federal budget deficits drain a large supply of available savings. While firms forego investment in new capacity that they would otherwise make, consumers must either forego consumption or the country must increase its imports of electricity and energy-intensive industrial goods. This is hardly a desirable outcome in an economy already facing severe balance of payments problems.

Estimates of the costs of FUA prohibitions developed by The Urban Institute using the American Gas Association's Total Energy Resource Analysis (TERA) system of computer simulation models show that repealing FUA would increase annual natural gas consumption by 2.6 quadrillion BTUs by the year 2000 and reduce the annual cost of producing electricity and energy-intensive industrial goods by $1.65 billion (measured in constant 1985 dollars). The present value of the savings between 1986 and 2000 would be about $5 billion. The exact magnitudes of these estimates are less important than the fact that FUA is now adding to economic inefficiency rather than reducing it as was originally intended.

IMPACT ON CONSUMERS

Repeal of FUA almost certainly will increase the demand for natural gas and put upward pressure on wellhead gas prices, but it may not result in higher prices at the burner tip. This is because greater industrial demand would allow pipelines to make greater use of their existing capacity and lower average transmission and distribution costs. Estimates based on the TERA simulations suggest that these savings will be large enough to offset any increase in pipeline acquisition costs. Repeal of incremental pricing would further encourage industrial demand and lower average pipeline costs.

Even if delivered gas prices rise as the result of repealing FUA and incremental pricing, the overall impact on consumers need not be adverse. Higher prices to residential customers will be offset by lower prices for electricity and industrial products where lower production costs and reduced investment risks are achieved by substituting gas for coal. In the aggregate, consum-

ers will gain from repeal since the whole market basket of goods they consume will be produced more efficiently. Furthermore, since households that heat with natural gas also generally have substantial electric bills, they will share in the gains.

IMPACT ON URBAN AREAS

Coal-fired facilities require about three times as much land as equivalent gas-fired facilities and urban land is scarce and expensive; natural gas prices are lower in urban areas served by well-developed pipeline facilities than in rural areas; and it is much easier to meet strict environmental standards in urban areas with gas rather than coal. Thus, FUA prohibitions on using gas encourage firms to locate in rural rather than urban areas.

REGIONAL IMPACTS

The relative costs of gas and coal differ considerably between regions of the United States. Consequently, FUA and incremental pricing create artificial economic advantages that cause the Mountain and West South Central regions, which already are the nation's fastest-growing regions, to grow at the expense of other regions.

ENVIRONMENTAL IMPACTS

Natural gas burns much more cleanly than coal, even when the coal is burned using sophisticated emission controls. The TERA simulations, when combined with emissions data, indicate that by the year 2000, FUA annually will result in a 5-percent increase in sulphur dioxide emissions, or over 2 billion pounds; add 600 million pounds of nitrogen oxides (NOX) emissions, a 1.5-percent increase; and generate over 100 billion pounds of extra sludge and ash that require disposal. Based on the best available estimates of the economic costs of air pollution, FUA is likely to result in over $7 billion dollars in environmental damages between 1986 and 2000. Additional TERA runs show that a stricter interpretation of FUA would roughly double these impacts. By discouraging natural gas use, incremental pricing would have a similar effect of unknown size.

Technological breakthroughs may well permit the construction of clean coal-burning capacity within 30 or 40 years. From an environmental viewpoint, the most sensible approach would be to build gas-burning capacity almost exclusively until affordable technology becomes available for burning coal cleanly. The great irony of FUA is that it imposes exactly the opposite restriction.

THE LOGIC OF FUA AND INCREMENTAL PRICING

The logic of FUA and incremental pricing have been assessed from any directions and found wanting. These legislatively-mandated restrictions on natural gas demand and pricing create economic inefficiency and harm international competitiveness. They offer negligible price savings for consumers. They create incentives against urban industrial location at a time when public policy supports fighting urban decline. They artificially subsidize the nation's fastest growing regions at the expense of its declining regions. Finally, they create unnecessary and costly environmental pollution.

ALIEN FARM WORKERS FEAR IMMIGRATION LAW CHANGE

HON. HOWARD L. BERMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, October 28, 1985

Mr. BERMAN. Mr. Speaker, time and again during our consideration of immigration reform, we have heard one constant refrain from the lobbyists representing agricultural employers. They insist that immigration reform legislation must include special provisions designed to give growers access to over one-quarter of a million foreign guestworkers. These claims persist in the face of compelling evidence of rampant unemployment among American farmworkers, and leave me convinced that it is a particularly vulnerable worker that growers seek, one that does not enjoy the rights of American workers.

I urge my colleagues to read the following article which appeared on page 1 of the Los Angeles Times on October 22. In no uncertain terms, prominent growers in California take issue with the position asserted by the grower lobbyists we hear from here in Washington. The California growers told these Los Angeles Times reporters that there is an adequate labor supply in California—more than an adequate supply. For those of us who hate to see immigration reform stymied by the grower lobbyists' special pleading, the evidence of a plentiful agricultural labor supply is of great interest.

I would also point out the poignant statement from the undocumented farmworker whom the legalization component of immigration reform is designed to help. He would be eligible for legalization under H.R. 3080, and yet he says, "There isn't enough work now. And there would be much less work for us * * * with the coming of the bracero, I cannot see much future for my children." What are we doing in the name of immigration reform?

The article follows:

ALIEN FARM WORKERS FEAR IMMIGRATION LAW CHANGE

(By Bob Secter and Ronald B. Taylor)

GILROY, CA.—Salvador, Maria and their children have picked chilies, tomatoes and other vegetables here and in the Salinas Valley for 10 years, stooping in the fertile fields and keeping a nervous lookout for immigration agents who could swoop down at any time and ship them back to Mexico.

On a typical day recently, Salvador and Maria brought home $40—barely more than $2 an hour and far below the $3.35 minimum wage—for eight hours of harvesting chilies. When not in school, their children—including an 8-year-old son who is four years from the legal working age—work beside them in the fields despite laws against child labor.

But Salvador and Maria, both in the country illegally, are in no position to invoke the niceties of American labor laws.

Under a set of sweeping changes in immigration laws that passed the Senate last month and are under consideration in the House, people like Salvador and Maria might gain a chance to emerge from the underworld of the undocumented and demand better working conditions.

Instead of applauding, however, they fear the changes could usher in a new wave of cheap and legal foreign labor to snatch jobs from farm workers already here—both lawfully and otherwise.

"There is hardly enough work for us in the fields now because there are too many workers," said Salvador, who did not want to give his last name because of his illegal status. Maria agreed: "If the braceros come, there will be even less work for us."

Agricultural interests are pressing Congress to vastly expand their power to legally import "guest workers," primarily from Mexico, for temporary periods to harvest perishable fruits and vegetables. That demand has elevated the guest-worker issue to a pivotal role this year in Congress' long-running effort to overhaul the nation's immigration laws.

So heated has the battle over the guest-worker provision become that it threatens to affect the outcome on the entire bill.

The Senate-passed legislation, while granting amnesty to many illegal aliens like Salvador and Maria who have been in the country for several years, would also make it illegal for the first time for employers to hire undocumented workers.

FEAR LABOR SHORTAGE

Growers and their congressional allies, chief among them Republican Sen. Pete Wilson of California, contend that such sanctions would quickly dry up today's labor glut and create a shortage that—in the absence of guest workers—would leave weather-sensitive crops rotting on the ground and cripple the $23-billion perishable produce industry.

Critics of the guest-worker program, on the other hand, contend that the clamor for it is rooted more in greed than need. Latino groups and labor unions say unemployment in most of the nation's produce-growing regions is double the national average and that the jobless rate in California's agricultural heartland is even worse. Importing new workers, they argue, would merely keep those already here from demanding better wages and working conditions.

Dolores Huerta, a top official of the United Farm Workers' Union, envisions a "slave system for labor," supported by a "giant police system to enforce it that will affect only one group (Latinos)."

"Nonsense," counters Rep. Dan Lungren (R-Long Beach), a leading House advocate of a guestworker program. "They talk as if we don't already have a large-scale presence of foreign farm labor."

FOUR IN FIVE COULD STAY

Neither side has conclusive facts at its disposal, but the only study available, done in 1983 by the State Employment Development Department and the University of California at Davis, indicates that four seasonal farm workers in five could prove legal immigration status and remain in the work force.

And in a further blow to the growers' argument that immigration reform could dry up their supply of labor, the study added: "Seasonality and oversupply of workers . . . leaves most farm worker families below the poverty level." Both sides' bleak visions of the future grow largely from the bitter experience of Western agriculture's traditional reliance on foreign workers to do the back-breaking work of harvesting produce.

California farmers have employed foreign workers ever since the golden spike was

driven in 1869, inaugurating transcontinental rail traffic and opening Eastern markets to fruits and vegetables grown in the San Joaquin Valley. The first wave of foreign hands was mostly Chinese, but when they struck for higher wages, growers brought in Japanese, Filipinos and even Arabs. And always, there were the Mexicans.

"OKIES" JOIN MILITARY

During the Depression years of the 1930s, Western growers turned to impoverished domestic workers driven off their lands in Oklahoma, Arkansas and other Southern states. But when the "Okies" left the fields to join the military in World War II, Washington arranged with the Mexican government to send replacements.

It was the start of the controversial program nicknamed bracero, which grew from a few thousand participants in the early years to about 400,000 annually by the time it was terminated by the United States in 1964 amid widespread complaints that employers were exploiting their foreign farmhands and forcing them to live in squalor.

The bracero experience casts a long shadow over today's guest worker debate. Labor Department studies showed that even though program rules set the prevailing wage for braceros, their large-scale presence depressed wages for all seasonal farm workers, both domestic and foreign. And many of those brought in legally on a temporary basis stayed on illegally when the work was done, or slipped back across the border after they were sent home. Fewer than 5 million braceros entered the United States during the life of the program, but 5.6 million illegal aliens were detained by immigration agents over the same time span.

SHORTAGE PREDICTED

When the bracero program ended, Western farmers predicted a shortage of domestic farm labor and said their efforts to lure local residents into the fields at harvest time had fallen flat. Merced County tomato growers claimed they would be forced to halve the acreage they planted. A spokesman for fruit growers said the industry would move to Mexico because of lower labor costs there.

Despite the ominous predictions, the industry thrived, though it never kicked its dependence on foreign labor. Large numbers of undocumented workers continued to supplement the migrant work force.

Today, as in the 1960s, many growers insist that anything that would disrupt their access to foreign workers—such as sanctions imposing hefty fines on the growers for hiring them—would have serious repercussions for agriculture in the West, where perishable crops ripen with the whims of the weather and spoil if not picked quickly.

"There is a functioning network in place that provides employees where and when they are needed—which is the bottom line in perishable agriculture," Michael V. Durando, president of the California Grape & Tree Fruit League, recently told a House Judiciary subcommittee. ". . . Our members' worst fear is that, with an inflexible system, we could end up with an emergency and no way to respond. In that case, a farmer would have one of two choices: break the law (and hire illegal aliens) or lose his crop."

Growers are not unanimous in that view. Milas Russell, president of the Imperial Valley Vegetable Growers Assn., said that there is "an abundance of labor" in the valley, whose proximity to Mexico enables growers to reach across the border for thousands of aliens who hold "green cards" entitling them to work in the United States. Similarly, Richard Thornton, former executive director of the Growers & Shippers Assn. in the Salinas Valley, said high wages paid in California guarantee an adequate labor supply.

But this view is a minority. The dominant growers succeeded in attaching to the Senate-passed immigration reform bill an amendment sponsored by Sen. Wilson to let them import up to 350,000 guest workers nationally at a time for at least the next three years if Atty. Gen. Edwin Meese III certifies that domestic labor supplies were inadequate to harvest perishable crops.

The Reagan Administration for the first time has endorsed the guest-worker concept, sketching out a program that would open the borders to foreign workers for years or even decades. A key figure in reaching that decision was John R. Norton, a former president of the Western Growers Assn. who became deputy secretary of agriculture earlier this year.

CITES UNCERTAINTIES

Norton, whose firm, J.R. Norton Co., has been charged by the California Agricultural Labor Relations Board with more than 100 farm labor law violations since 1975, insists that farmers need a standby guest-worker program because of the uncertainties raised by immigration reform.

"It is an insurance policy," he said in an interview. "We can't say to what extent the (program) would have to be used because . . . you don't know exactly the consequences of the law. We're not asking for labor it it's not needed."

Farm labor advocates think that farmers would make plenty of use of the program, especially with a sympathetic attorney general likely to let the program go ahead.

"One of the goals of immigration reform is to stop displacement of American workers from their jobs, and here in the immigration bill we're totally undercutting the intent of that reform with proposals to bring in more foreigners," argued Rep. Howard L. Berman (D-Panorama City), a one-time farm union lawyer.

"Guest workers are less contentious and more malleable because they know they want to come back next year," Berman said. "Foreign workers are less likely to unionize and less likely to file grievances or lawsuits."

The prospect of competition from guest workers for scarce jobs has raised alarms throughout the migrant community in California. Interviews with two dozen workers in five key agricultural counties found that virtually all of them, those in the country both legally and illegally, complained that wages were already depressed, labor contractors were exploiting them and laws governing housing, sanitation and other working conditions were rarely enforced.

"For the first time in 20 years, lettuce cutters are begging for work," said Mario Bustamente, 37, a green-card holder and former United Farm Workers official.

'WHAT WOULD WE DO?'

An illegal alien who declined to give his name acknowledged that a new guest-worker program "may be of help to those people from Mexico. But what would we do?"

The man, a father of five who looks like a short, stout version of Anthony Quinn, settled in the Salinas Valley in 1981 after shuttling back and forth to Tijuana for a dozen years. That means he has lived in the United States continuously long enough to qualify for legal status under the immigration reform bill before the House Judiciary Committee—although not long enough under the Senate-passed bill.

The family is living in a ramshackle house without water or toilet in a labor camp provided by the grower. On one recent day, the man and his wife earned $30 for eight hours of chili picking—less than $2 an hour.

"There isn't enough work now," he complained. "And there would be much less work for us. . . . With the coming of the bracero, I cannot see much future for my children."

MEDICARE AND THE PATIENTS' RIGHT TO KNOW

HON. OLYMPIA J. SNOWE

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Monday, October 28, 1985

Ms. SNOWE. Mr. Speaker, today I am introducing a bill which will express the sense of Congress that Medicare patients are entitled to accurate and timely information about their Medicare hospital benefits. House Concurrent Resolution 221 assures that all hospitals participating in the Medicare Program will voluntarily reproduce and distribute a statement of Medicare patients' benefits and rights to all Medicare beneficiaries upon admission and to their families or guardians, upon request. This statement, to be written by senior citizen groups, the hospital industry, physicians, and nurses, within a 90-day period, would be a concise, understandable statement of Medicare patients' rights, including the names and numbers of local agencies that aid senior citizens.

In an effort to contain spending, Medicare has changed its method of paying for medical care. Instead of paying for each test, each day in the hospital, and each drug, Medicare pays a preset price based on the patient's diagnosis. Ailments are classified into 468 diagnosis-related groups, or DRG's. The system, called prospective payment, is a revolution in the Medicare payment system.

We are all aware of the rising cost of health care in this country. In 1982, the Federal Government spent $41.8 billion on the Medicare Program. With the introduction of DRG's, the number of days of hospitalization has decreased from 9.5 to 7.3 days and the increase in the cost of Medicare has slowed. This has been achieved, however, without adequate safeguards for the care that patients may be receiving.

Under the prospective payment system [PPS], hospitals that spend less than the fixed fee can keep the profits, and those that spend more must absorb the losses. The result has been that under PPS, hospitals are discharging patients earlier, performing fewer inpatient tests, and shifting some surgery to outpatient centers. More patients are using home health care and home-delivered meals.

While these changes are not intrinsically risky for the patient, there is a critical issue of concern. The risk is that Medicare patients who are not familiar with DRG's may face premature release from hospitals and encounter problems in securing community based care. The president of the American Association of Retired Persons [AARP] Vita Ostrander testified recently that, "The DRG system creates the economic incentive to skimp on quality care. The result is that patients are being released 'quicker and sicker' and often without proper followup care."

This concern has been echoed in my own State of Maine. There, Legal Services for the Elderly handles numerous appeals for Medicare patients. One striking example is that of a man in his eighties who fell and fractured his hip. His admission diagnosis included respiratory infection, dehydration, incontinence, and history of stroke. He was admitted to the hospital on April 24 and given notice that his Medicare coverage would end May 10. Feeling quite ill, however, this patient stayed on in the hospital, at his own expense, until he died on May 27. His daughter received notification, from the PRO, of the date on which her father's coverage would end, and of the right to appeal. However, this confirmation letter arrived July 19, over 7 weeks after the death of her father.

This is only one of many cases demonstrating that with the DRG's, which limit the length of hospital stay and the cost of treatment on the basis of a particular illness, the Medicare patient is faced with a system of health care which is new and entirely alien. Moreover, Medicare beneficiaries have not always had their questions regarding their rights and responsibilities clearly and accurately answered during their period of hospitalization.

In recognition of those who have been denied adequate Medicare coverage, Maine's Committee on Aging and the Maine Hospital Association have formed a task force called LAMP, Legal Assistance for Medicare Patients. This task force includes representatives from the Professional Review Organization [PRO], hospitals, area agencies on aging, legal services, and other interested groups. Initially LAMP was formed in order to develop an improved communication of rights under the new system for Medicare beneficiaries. They have now written a brochure which outlines in clear language the Medicare Prospective Payment System, the appeal system and where local assistance can be sought.

I am proud of such efforts in Maine; however, this is a national problem. All Medicare patients are entitled to accurate information about the DRG system and their rights as patients. For example, each patient admitted to a hospital or similar facility has several rights, as assured by Social Security, including: First, the right to be fully informed prior to or at the time of admission and during the hospital stay, of the rights and responsibilities of patients; two, the right to be fully informed, by a physician, of one's medical condition, and afforded the opportunity to participate in planning for medical treatment and to refuse to participate in experimental research; third, the right to be transferred or discharged only for medical reasons, or for the individual's welfare or that of other patients; and fourth, the right to be encouraged and assisted, throughout the period of stay, to exercise the rights of a patient and citizen, and to this end to voice grievances.

Such education is essential if older persons are to be spared the shock of unanticipated early discharges. Information is also critical to the patients' ability to assert the right to a longer hospital stay or to an appeal when it is felt that a poor judgment has been made.

House Concurrent Resolution 221 addresses these needs. My colleague Senator PROXMIRE, introduced a similar bill, Senate Concurrent Resolution 58, on July 31, 1985. I am introducing this legislation today in recognition of the fact that we can no longer deny the right of the Medicare patient to be an active participant in his or her health care.

Following is the complete text of House Concurrent Resolution 221:

H. CON. RES. 221

Concurrent resolution to express the sense of the Congress that Medicare patients are entitled to accurate and timely information regarding their Medicare benefits

Whereas thirty million elderly and disabled Americans rely upon the Medicare Program for essential health care;

Whereas the new prospective payment system for hospitals has resulted in unintended confusion among Medicare beneficiaries regarding their entitlement to hospitalization;

Whereas Medicare beneficiaries have not always had their questions regarding their rights and responsibilities clearly and accurately answered during their period of hospitalization;

Whereas the Congress believes that the Medicare Program, senior citizen groups, the hospital industry, physicians, and nurses should work together to resolve this problem cooperatively: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that—

(1) on this, the twentieth anniversary of the Medicare Program, the Congress reaffirms its strong support for that program and for the right of all Medicare beneficiaries to receive accurate and timely information regarding their Medicare benefits during a period of hospitalization;

(2) the Secretary of Health and Human Services should immediately endeavor to convene a working group of representatives from senior citizen groups, the hospital industry, physicians, and nurses to draft, within 90 days of the date of enactment of this concurrent resolution, a simple statement of the rights and responsibilities of Medicare patients;

(3) the Secretary of Health and Human Services should transmit copies of such statement to all Members of Congress and all hospitals and physicians participating in the Medicare Program and shall provide additional copies upon request; and

(4) all hospitals participating in the Medicare Program should voluntarily reproduce and distribute such statement to all Medicare beneficiaries upon their admission to such hospitals and to their families upon request.

SEC. 2. The Clerk of the House shall transmit a copy of this concurrent resolution to the Secretary of Health and Human Services.

ST. MARY'S OF CZESTOCHOWA

HON. PAUL E. KANJORKSI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, October 28, 1985

Mr. KANJORSKI. Mr. Speaker, it is my pleasure to bring to the attention of my colleagues in the House of Representatives the 75th anniversary of Saint Mary's of Czestochowa Parish in Swoyersville, PA. I am honored to share with you today the history of this fine church.

Father B. Baranowski organized the first meeting for the establishment of St. Mary's of Czestochowa Parish in 1909. The first church was completed in July 1910, and Rev. Alexander Kowalczyk served as the first pastor.

Several parishioners and organizations contributed funds to purchase the church hall in 1916, and the present church was completed in 1925 under the guidance of Rev. Clement Drapiewski. Reverend Drapiewski was succeeded by Rev. Joseph Buda, and Rev. Anthony G. Levankowski. The current pastor, Rev. Edward V. Sokolowski, has served the parish since 1967.

St. Mary's has undergone many improvements over the years, including the installation of an elevator to provide access to the elderly and handicapped, a new nursing room, a new rectory, and a new kitchen. The congregation has grown to approximately 600 families.

Religious faith has played an important role in the development of our Nation, and the 75-year history of St. Mary's of Czestochowa is testament to the continuing importance religion has in the lives of Americans. Mr. Speaker, I am honored to commend this fine church on the floor of the House of Representatives.

TRASH IN SPACE AND THE ARMS RACE

HON. ROBERT W. KASTENMEIER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, October 28, 1985

Mr. KASTENMEIER. Mr. Speaker, I urge my colleagues to take the time to read an interesting article by Eliot Marshall in the October 25, 1985, issue of Science.

Mr. Marshall discusses the problem of trash in space and the danger it presents, particularly as the efforts to move the arms race into space intensify.

[From Science magazine, Oct. 25, 1985]

SPACE JUNK GROWS WITH WEAPONS TESTS

(By Eliot Marshall)

By destroying a live satellite in a weapons test this September, the U.S. Air Force

became a willful polluter of space, adding 100 bits of debris to the junk in orbit above Earth (Science, 4 October, p. 44). It also added slightly to the chances of a collision between orbiting trash and a working satellite, a growing hazard for all users of space, including the military.

America has often dumped trash in space by accident and indifference, but until recently it did not compound this record with intention. Unlike Russia, it did not smash its own spacecraft in anti-satellite (ASAT) tests. Now that has changed. The growing burden of trash will accelerate a phenomenon that may begin forming a man-made meteoroid belt in 10 years, according to researchers at the National Aeronautics and Space Administration (NASA).

At present, more than 5600 man-made objects are tracked in orbit around Earth. Of these, about 72 percent are classed as debris (a category that does not include dead satellites), and of this debris, about 57 percent belongs to the United States. It includes spent rocket stages, ejected satellite shrouds, clamps, exploded fuel tanks, insulation, and odds and ends left by astronauts. The Soviets' share of the debris is about 40 percent. It includes the same kind of junk, but also the finely shattered (and less visible) remains of nine antisatellite explosions from a series of ASAT tests begun in 1968. The last 3 percent of debris was contributed by Britain, the European Space Agency, France, West Germany, India, Japan, and the People's Republic of China.

In addition to these relatively large objects, there are reckoned to be tens of thousands of pieces of untracked debris the size of marbles, and literally billions of paint flakes orbiting Earth. There are also transient bits of frozen sewage from the shuttle.

The ill effects of this junkpile will take time to be noticed. The people who will be affected directly are those who travel in or send equipment to outer space. For them, the debris will add to a growing possibility of a high-speed collision. Even a tiny 0.5-mm metal chip, ecountered at the average collision speed in space of 10 kilometers a second, can puncture a space suit, if it hits at the right point, and kill an astronaut. Objects 1 to 10 millimeters across can damage a spacecraft.

This presents obvious risks for the shuttle, especially for the crew members when they are on extra-vehicular tasks. It poses greater risks for the space station and its planned industrial lab to be built in the 1990's. They will be larger than anything launched before, making them more likely to be hit. Trash also creates some unusual hazards for the President's Strategic Defense Initiative, which aims to fill near-Earth space with weapons in the 1990's. Some of the weapons will be "salvage-fused," meaning they will be set to explode if tampered with. The Defense Initiative will add to the problem most significantly just by increasing the number of machines in low orbit.

Any increase in the number of large space objects will raise the risk of collison, NASA astrophysicist Donald Kessler has written. There is already a great deal of trash in space; putting up large targets for it to collide with will produce more. Trash will engender trash. Once a critical density is reached, the pollution will grow at an exponential rate. Natural asteriod belts may have been formed by the same kind of grinding in space, Kessler says. By his calculation, exponential growth of debris could begin dramatically within a century. Some satellites may have been hit by trash already. In 10 years, an artificial asteroid belt may begin to encircle Earth.

Space trash has been growing in the last two decades at varying rates, influenced by the level of solar activity. (During the cyclical period of storms and sunspots from 1979 to 1981, solar pressure drove many objects down to destruction in the atmosphere, including Skylab.) The best way to describe the situation, according to Kessler, is to say the net balance of junk in space is growing by 300 to 500 objects per year, at a time when new launches are running at 100 per year.

Most users of space see this as a minor problem because "there's a lot of room out there," as one insurance broker put it. Furthermore, junk is concentrated at low altitudes (600 to 1100 km high), not out in the precious geosynchronous orbit (35,800 km) were communications satellites operate. The closer the trash is to Earth, the sooner it will fall back and burn in the atmosphere. So the hazard seems "negligible," in term used by Geral Frick of Marsh and McLennan, a satellite insurance broker. It appears to be a mess that will clean itself up.

The notion of space as self-cleaning is misleading, according to Kessler. It understates the time it takes gravity to pull debris out of orbit. A small, marble-like object released in a circular orbit at 500 kilometers would stay aloft for about a year. But if it were released at 800 kilometers, it would stay up for 30 years. And at 1200 kilometers it would remain in space 300 years. Man-made junk has been dumped in this densely polluted area in such quantities, Kessler says, that it is becoming more abundant than natural meteoroids.

No wilderness tract on Earth is as wild as the void where satellites travel, and none shows human intrusions so readily. Space is not protected by environmental laws. Thus, a single event such as the U.S. ASAT test on 13 September can have a great impact. At 4:42 p.m. EDT, a U.S. missile hit an old Air Force satellite called P78-1, on a low polar orbit about 530 kilometers high.

The large pieces are tracked by the radars and cameras of the North American Aerospace Defense Command (NORAD), which can see objects the size of a baseball (10 centimeters across) at distances beyond 500 kilometers. Shattering a satellite generates many more unseen than visible pieces. Those from P78-1 have now joined the estimated 40,000 bits of untracked, marble-size debris already aloft.

What are the chances that some of this litter could damage a live satellite? Kessler, who directs a 10-year study of debris for NASA in preparation for the space station, says the risk is small but real. His summary of a 1982 workshop at NASA states: "All modelers concluded that the probability that a large structure (approximately 100 meters in diameter) would collide with a currently tracked object in low-Earth orbit is already significant—approximately 0.1 in a 10-year period." If small, untracked objects are considered, the risk grows three to five times larger. The shuttle faces only one chance in a million, per mission, of being hit by a major object because it has smaller dimensions, stays aloft for short periods, and hugs low altitudes where debris quickly falls to Earth.

Many experts, including Kessler, think there is evidence of damage being done right now. They cite examples such as the following:

In April 1984, the shuttle crew brought back to Earth some malfunctioning electronics boxes on the Solar Max satellite. NASA found the outer surfaces peppered with around 160 small holes created by flying paint chips.

On its seventh mission in July 1983, the shuttle orbiter Challenger was hit by something that chipped a window. NASA concluded that the damage was done by a tiny (0.2 mm) flake of white paint, possibly the kind used on U.S. Delta rockets. (It was not clearly of Russian origin, as NASA administrator James Beggs once suggested.)

In July 1981, the Soviet navigation satellite Kosmos 1275 broke up over Alaska in a pattern suggesting it had been hit by debris.

The Soviet surveillance satellite Kosmos 954, with a nuclear reactor aboard, suddenly depressurized and fell to Earth over northern Canada in January 1978, also in a way that suggested a collision had occurred.

The European Earth observation satellite, GEOS-2, suffered injury to its solar panels in 1978, apparently when hit by debris.

PAGEOS, a U.S. balloon satellite, probably was struck by untracked debris and damaged in high orbit in July 1975.

The visible bits of debris are few enough at present that they can be tracked and avoided. Some communications satellites have to make dodging maneuvers on occasion, coming within kilometers of other satellites. And when the shuttle in traveling in space, NORAD uses much of its computer power to scan the shuttle's route for hours in advance, preparing for evasive action if necessary. Kessler says that, according to statistical probabilities, the shuttle should pass within 25 kilometers of a visible object at least once a day.

While big and dangerous objects can be dodged, there is no way to avoid the less-threatening small forms of trash such as paint. Kessler estimates that there are now 10 to 100 billion paint flakes in orbit. It's not clear how they came to be there, but NASA scientists think they may have broken loose from orbiting rocket hulls when the bonding agent in the paint was corroded by atomic oxygen or ultraviolet light.

In addition, NASA has found that second-stage rockets, when fired in deep space to put satellites in exact orbit, emit a particulate exhaust of aluminum oxide (Al_2O_3). When the windows of the Skylab command module were examined, half the pit marks were found to contain this compound. Kessler reports that firing one solid rocket motor in high orbit produces for 2 weeks afterward a cloud of tiny particles that outnumber natural objects of the same size. In fact, this pollution has frustrated several studies of tiny meteoroids, for the data were drowned out by the artificial "noise." This form of debris, although it may be short-lived, can damage optical instruments.

Some remedial suggestions, such as sending up a flying garbage truck, seem impractical. Others make sense intuitively, but may be more risky than doing nothing. For example, at the recent meeting in Geneva of the World Administrative Radio Conference for geostationary orbit matters, Britain urged members to create a standard method for disposal of used satellites. The plan was to have everyone boost old units out of geosynchronous orbit into a higher "junkpile orbit." But the U.S. delgate, Dean Olmstead, insisted that it was too early to adopt such a position, for the risk associated with restarting old spacecraft motors may be greater than leaving the satellites where they are. He persuaded the group to study

the issue rather than make recommendations.

The cheapest and simpliest way to deal with trash is to take some preventive steps. One successful example of this is the U.S. program of burning to depletion all the fuel that remains in Delta second-stage rockets. A study made by John Gabbard, a former NORAD employee, showed that 15 percent of all the debris in space had been caused by the breakup of these used and abandoned Delta second stages. Fuel tanks appeared to be corroding, leading to the mixing of fuel and spontaneous explosion. At Kessler's urging, NASA investigated and confirmed the problem, and then asked the controlling company to bleed the fuel out of Deltas still in orbit. Since that program began in 1981, there have been no more explosions.

Scientists at various institutions have tried to interest the space-using nations in adopting a formal policy on debris. The American Institute of Aeronautics and Astronautics issued a position paper in July 1981 calling for international action to curb space trashing. In discussing ASAT tests, it said, "Even if such actions are essential to national security, they should be carried out with a clear understanding of the consequences." The AIAA recommended that ASAT test fallout be studied intensively. "In the long term," the paper noted. "the issue must be faced cooperatively by all space users, and international agreements should be drawn up to ban or restrict to low orbit the explosion of satellites."

In the past, NASA officials have tried to interest Soviet space authorities in ideas such as this, with absolutely no success. Now that U.S. ASAT tests have begun, it will be more difficult. And while American military authorities may be sympathetic to NASA's case, they have other, higher priorities at the moment. Responding to questions about the Strategic Defense Initiative, Col. George Hess made only one comment: "The problem created by natural and man made debris. . . is not trivial." He added that it would be dealt with by contractors who are designing military spacecraft.

Thus it seems possible that the space pollution will grow steadily. It may even accelerate in the 1990's, if the plans for arming outer space are carried to fruition. And the predicated man-made asteroid belt may start to appear within a generation.

GRAYCE BATEMAN COMPLETES 40 YEARS OF SERVICE

HON. CHARLES E. BENNETT

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, October 28, 1985

Mr. BENNETT. Mr. Speaker, Grayce Bateman, director of the Clara White Mission in Jacksonville, FL, is retiring after 40 years of service with that mission. It is a well-deserved retirement because all her years have been ones of tremendous assistance to people of all ages, with a multitude of needs. And she has always done this with joy, enthusiasm and effectiveness.

She was a trusted employee and associate of the late Eartha M.M. White. Miss White was once chosen as the outstanding volunteer in America because of her mission and numerous other philanthropies. Mrs. Bateman played a large part in the achievement of these good works and deserves tremendous praise in her own right.

Mr. Speaker, I include at this point an article from the Jacksonville Journal concerning the retirement of Mrs. Bateman:

[From the Jacksonville (FL) Journal, Oct. 3, 1985]

GRAYCE BATEMAN WILL RETIRE AFTER A LIFE OF SERVICE

Grayce Bateman, director of the Clara White Mission since 1974, will retire this month after 40 years of service with three Jacksonville institutions founded by the late Eartha M.M. White.

"I have always liked working with people and helping people, especially the unfortunate, and so it seemed a natural thing for me to work with Miss White in her activities and projects," Mrs. Bateman said.

"I like what I have done here at the missions better than anything else I have done; so many thousands of people have been served," she said. "We have helped so many. I could not have planned a better career for myself."

Mrs. Bateman began working for Miss White and the mission, 613 W. Ashley St., in May 1945, as a secretary. Later she was named office manager, but it was only a part of her work. She was also Miss White's personal secretary and companion until she died in January 1974.

"The work was challenging from the first day of employment because of the many activities of Miss White, and while she lived, I never had regular working hours. With Miss White you just worked until the job was completed," she said.

"I always worked on Christmas Day when she was living because she had a party at 10 a.m. for the adults and one at 2 p.m. for the children. On Christmas Eve, we visited all the nursing homes and the jails, singing Christmas carols," she said.

Mrs. Bateman said she sometimes worked from 8 a.m. to 11 p.m.

In addition to her work at the mission, Mrs. Bateman assisted Miss White with two other projects, the establishment of the Eartha M.M. White Museum and the building of the Eartha M.M. White Nursing Home on Moncrief Road.

She said it was Miss White's dream to rebuild the Old Folks Home, which she operated on Jacksonville's Eastside, into a modern well-equipped nursing home. That dream materialized in 1967 after Miss White donated land she owned for the new structure. The nursing home currently is planning a new addition to the building.

"My job was to take care of all the paperwork and recordkeeping required by the Hill-Burton state grant that Miss White got to build the nursing home, while I continued to serve as office manager for the mission and her personal secretary and companion," Mrs. Bateman said.

The Eartha M.M. White Museum was established across the street from the nursing home. It contained a collection of Miss White's papers, personal belongings and other artifacts and memorabilia she had acquired.

Mrs. Bateman assisted in setting up the museum and later moved its contents to the second floor of the mission. It has been renamed the Eartha M.M. White Art and Historical Resource Center. The former site on Moncrief Road has been converted into the Eartha M.M. White Memorial Boys Club by the Boys Club of Greater Jacksonville Inc.

The nursing home and the mission are now two separately incorporated institutions, Mrs. Bateman said.

Renovation of the three-story mission building began in 1979, under the supervision of the mission's 25-member volunteer board. She said all that remains to be done is carpeting the third floor, which will house a clothing distribution center and an addition to the art center.

She said the area that most needed remodeling was the first floor, which now has a new kitchen and better equipped dining room, dedicated last year.

"These new areas have made it possible to faster serve the thousands of clients who enter the doors of the mission," she said. "We can now provide the care and share the atmosphere that encourages positive thinking and a new lease on life to many of those who have lost hope," she said.

She said the approximate $100,000 cost of the renovation was funded through a $20,000 grant from City Housing and Urban Development Block Grant funds matched by donations to the mission from individuals, organizations and companies in the city. Construction classes at Florida Junior College's Downtown Campus provided free labor.

The operation of the mission is financed by the United Way, the city of Jacksonville and private and public donations.

"I am truly grateful to all of those individuals, churches, businesses, social groups and volunteers who have assisted me in my work here at the mission through their contributions," Mrs. Bateman said.

Mrs. Bateman said through Miss White and her work with the three institutions she has met many influential people.

"I met President and Mrs. Nixon, and I was most impressed by the Lane Bryant Co. officials who one year presented Miss White a $5,000 cash award," she said.

Mrs. Bateman is a Jacksonville native and attended the local public schools until her high school years. She said because of the illness of her father and mother she completed high school by correspondence. She later completed a three-year course in business management from LaSalle University in Chicago, also by correspondence.

Before going to the mission she had worked as an agent for the Afro-American Life Insurance Co. and as a secretary for the American Red Cross and the United Negro College Fund.

A widow since 1947 and member of Ephesus Seventh-day Adventist Church on Edgewood Avenue, Mrs. Bateman said she is retiring to take better care of her invalid sister who is 89.

"I think 40 years is long enough," she said.

Mrs. Bateman has received awards for her humanitarianism and community service from the Jacksonville Opportunities Industrial Center Inc., Ladies Auxiliary of Florida Morticians, Volunteer Jacksonville Inc., United Way of Jacksonville, Jacksonville Links Inc., Operation Respect and her church.

VIOLENCE IN OUR PRISONS

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, October 28, 1985

Mr. CONYERS. Mr. Speaker, the level of violence in our prisons is an issue of concern to all of us involved with the criminal justice system. The adjustment of prison inmates to the outside world when they are released is, undoubtedly, heavily influenced by what occurs during their incarceration. For many prisoners, extreme violence is, unfortunately, a large part of their prison experience.

The level of violence experienced by prisoners can only serve to further dehumanize them and complicate efforts at rehabilitation. Research has indicated that prison violence escalates as prison overpopulation increases. Overpopulation is a fact of life in our prisons. Justice Department statistics on the Federal prison system, for example, indicate that as of October 21, 1985, the Federal prison population is 41 percent overrated prison capacity and 12 percent over operational capacity.

Overpopulation affects another problem—the paucity of meaningful work or activities available to prisoners. Although it has long been accepted that prison jobs are necessary to retrain those with low skill levels, it is now being argued that this inactivity also breeds the frustration, anomie, and apathy that can lead to violence.

Charles Colson, special counsel to former President Richard M. Nixon, knows what prisons are like, not only from first hand, having served time but also from his work as head of the Prison Fellowship Ministry. He is actively involved with prisoners and prison matters and recently wrote an article in the New York Times on the present state of prisons in the United States.

I commend his article to my colleagues and ask that it be inserted at this point in the RECORD.

The article follows:

[From the New York Times, Oct. 13, 1985]

DESPAIR: A TRIGGER OF JAIL RIOTING

(By Charles W. Colson)

WASHINGTON.—This has been a bad year for prison disturbances. Every month headlines report violence in yet another state. And each time a governor appoints an investigative panel, which blames everything on overcrowding, poor facilities or mismanagment. The corrections commissioner is then fired and the cycle begins again. But during a visit to a Western penitentiary, site of two recent riots, I discovered what I think could be a root cause.

The prison is a cluster of handsome brick buildings surrounded by gentle hills. But for the fences it might be mistaken for a college campus. Inside the steel gates, however, things were tense. The corrections comissioner and the warden both looked harried, even as they assured me everything was under control.

Most prisoners wouldn't talk much, but they spoke volumes with their darting glances. Where the riots had broken out, a thick cement wall was but a pile of rubble—frenzied inmates had punched it out with their bare fists! One wing was charred ruins, with toilets ripped out of the walls and debris everywhere.

There were no obvious reasons. Atypically, the prison was not overcrowed; the facilities were excellent, the staff well-trained. Yet inmates had beaten out a cement wall with their bare fists. Why? The warden had no explanation.

"But," he said, "of course we have no work here—only 100 jobs for 800 men. We make work."

"Make work." In his offhand remark, the warden may very well have provided the key to the unrest.

The nation is indebted to Chief Justice Warren E. Burger, who has crusaded for more inmate jobs. But those who argue for prison jobs usually do so on the grounds that they are important for rehabilitation: Offenders need vocational skills when they get out.

That's true enough. But I think there's a more crucial theological reason as well, one that explains why our prisons drive men to despair. Like the universe, man is created by God—in His very image. Thus man is imbued with the same sense of purpose evident in his Creator. This affects not only our overall perception of life, but practical, everyday relationships. That man cannot live without purpose was captured by Dostoevsky, imprisoned during Czarist repression. He wrote: "If one wanted to crush, to annihilate a man utterly, to inflict on him the most terrible punishments, one need only give him work of an absolutely, completely useless and irrational character."

Some of Hitler's henchmen must have read Dostoevsky. Eugene Heimler, a Holocaust survivor, wrote of an experiment in which Jews who had been working in a prison factory were suddenly ordered to move sand from one end of their camp to another—back and forth, over a period of weeks. Many prisoners, who have been able to cling to life even while working for their captors, went berserk and were shot by guards. Others threw themselves into the electrified wire fence.

This is why it is so crucial to expose the widespread illusion about punishment and prisons. Some on the liberal side believe we can create humane facilities that will "cure" criminals of their errant behavior; many on the conservative side confuse prison and punishment by arguing that we should simply lock everyone up and "teach them a lesson."

The result is a national policy that stuffs our facilities with humans, half of them nonviolent, gives them nothing meaningful to do, then stands back in amazement when prisoners riot.

Punishment? Yes. Biblical justice demands it. And prisons are necessary to separate dangerous offenders from society. But confining nondangerous men and women with nothing to do, driving them to the brink of their sanity? No. In doing so, we can only expect more violence.

TRIBUTE TO J. WENDELL RAMEY

HON. AUSTIN J. MURPHY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, October 28, 1985

Mr. MURPHY. Mr. Speaker, one of my constituents, a good friend and a community leader in the Monongahela Valley, recently announced his retirement, and I wanted to take this opportunity to pay tribute for his many outstanding accomplishments.

As founder of the Mon Valley Community Health Center, J. Wendell Ramey created a comprehensive health and human service system that has helped tens of thousands of persons as well as served as a model for other areas in the United States. Upon his retirement, Wendell was chief executive officer of Southwestern Pennsylvania Human Services, Inc. During his professional career, he has also served as the chief executive of the Mon Valley United Health Services, the Mon Valley United Fund, and the Mon Valley Health and Welfare Authority. But his résumé cannot begin to recount the tangible results of his many efforts.

In the early 1960's, using a small grant from the local United Fund, Wendell developed the first comprehensive human services plan for the Mon Valley. Then, over the next two decades, he successfully sought out the available local, State, and Federal dollars needed to bring his ideas into reality.

Because of his work, the first visiting nurse service in the Mon Valley was created almost 20 years ago; virtually every community in the area has a senior citizen center; and unemployed persons can obtain affordable health care. In addition, every person in the Mon Valley has access to a whole array of services and programs made available through the Mon Valley Community Health Center.

What started out as one man with a concept and vision, grew and evolved into a health care system employing over 400 persons and serving over 2,100 persons each day. Over the years, literally millions of dollars were brought in the area's economy.

Countless lives have been touched through Wendell Ramey's efforts. When unemployment hit Mon Valley's steel workers and coal miners, the system Wendell created was there and no one was denied any service because of an inability to pay.

Wendell never sought the limelight of any personal honor or recognition. He preferred to work his "magic" behind the scenes while giving the credit to others. His ultimate goal was always the health and well-being of the residents of his Mon Valley, especially those who needed services the most.

For all those who have walked through the doors of the Mon Valley Community Health Center, for every handicapped person, for the children on their way to day care, for every senior citizen, for every unemployed person seeking a doctor, we thank you Wendell.

CLARA WILLIAMS—A MODEL FOR ALL

HON. GUS SAVAGE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, October 28, 1985

Mr. SAVAGE. Mr. Speaker, I am proud to take this occasion to pay tribute to an outstanding black woman—a mother, grandmother, and great grandmother, a teacher, a builder, and an honorary doctor and lawyer—Clara Williams.

Clara Williams is 100 years old today. In the past 100 years she has made her mark on her family, her community, and her people.

Born to sharecropper parents in 1885, Clara was taught the value of education and excellence at an early age. At 15 years of age, she won a 4-year scholarship to Prairie View State Normal and Industrial College where she did laundry to contribute to her board. She graduated with a teaching certificate, valedictorian of her class, and began teaching for $30 per month. In 1930, Clara Williams became the first black graduate of New Mexico State University where the entire class boycotted graduation services because of her presence.

Clara married Jaspar Williams in 1917, bore three sons, and instilled in all the commitment to family, community, and educational excellence. All three sons, Jaspar, James, and Charles, became physicians.

In 1946, Clara lost her husband, mother, and father. She joined her sons in Chicago upon her retirement in 1951 where they had interned at Providence Hospital, one of the few hospitals in the country to then accept blacks. In 1961, characteristically determined, Clara invested her entire life savings in a new medical center, the Jaspar Williams Clinic, now one of the busiest in Chicago's black community, serving over 100,000 patients a year with care and counseling. Not only do Clara's three sons serve the community at the clinic, but several of their sons, as well, have come aboard as physicians, and Clara worked in the clinic for 18 years, helping it to achieve its notable success.

Clara raised her sons "to never doubt that they could forge a better world." Her message has been instilled in her children, her grandchildren and the many others she has taught and touched, It is a message she has made a reality.

Clara Williams is a model for all to emulate—a brilliant, effective black woman. I proudly pay tribute and wish her an enormously happy and healthy 100th birthday.

A LIFE ALTRUISM

HON. PAUL E. KANJORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, October 28, 1985

Mr. KANJORSKI. Mr. Speaker, it is my great pleasure to inform you and my fellow Members of the House of Representatives of the altruistic deeds of Mr. Jack S. Goodsir, of Wilkes-Barre, PA.

Mr. Goodsir is an extraordinary individual. He has time and again jeopardized his own safety in efforts to help others. On no less than eight occasions, Mr. Goodsir has felt compelled to risk his life for others.

Mr. Goodsir's rescue has occured in a variety of places. He rescued swimmers and a wind surfer at Myrtle Beach, SC, as well as two men from the cab of a Salvation Army truck that had crashed into a pole outside of his home. At home or a vacation, Mr. Goodsir's unselfish spirit shines through.

Mr. Goodsir is a man to be admired for his wholehearted concern for life. In the summer of 1965, he rescued two black children caught in a strong undertow at Alantic City. This rescue occurred at a time when a firm line still existed between black and white. However, Mr. Goodsir's concern forcused on the children and not their race. It is this type of caring for which Mr. Goodsir is to be commended.

Recognized as a local legend in the Wilkes-Bare area, Mr. Goodsir continues to exhibit concern for those who need his help. In times when it is often difficult to discern who genuinely cares for others, one can be assured that Mr. Goodsir cares. We have all benefited from the actions of men and women like Mr. Goodsir. It is reassuring to know that men like Mr. Goodsir continue to positively influence our lives.

Mr. Speaker, it is a pleasure and a privilege to be able to honor Mr. Goodsir's extraordinarily unselfish accomplishments.

RUNNING TO CALL ATTENTION TO ANIMAL ABUSE

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, October 28, 1985

Mr. LANTOS. Mr. Speaker, in the aftermath of the much-heralded New York Marathon last weekend, it is obvious that people run for many reasons—for their health, a desire to compete, to associate with other runners. One young man, however, is running for a very different, and a very worthy reason—to draw attention to the inhumane treatment of animals through live experimentation, through animal shows, through hunting and trapping.

In July, Ron Sadowsky, a 38-year-old animal rights activist from Minnesota, left Boston to run 5,000 miles across the United States. Earlier this fall, he was here in Washington, DC, where he participated in a rally on the steps of the U.S. Capitol Building. Many national humane groups participated in that event.

In January, Mr. Sadowsky will arrive in Los Angeles. He has been running an average of 20 miles a day, 6 days a week. But he is also participating in a number of events and projects along his route to raise the public awareness of cruelty done to laboratory animals, of mistreatment of animals in shows and performances, of unnecessary pain inflicted through cruel trapping and hunting practices.

Mr. Speaker, Mr. Sadowsky's devotion is being expressed through positive action. His conviction is leading to greater awareness of animal abuse, and ultimately to greater protection of all creatures from pain and suffering. I commend him for this most praiseworthy effort.

RAINBOW NAVIGATION

HON. JAMES J. HOWARD

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, October 28, 1985

Mr. HOWARD. Mr. Speaker, I rise to call to the attention of the House a situation wherein a small shipping company headquartered in a town in my district, Red Bank, NJ, has been the victim of unfair and perhaps illegal action on the part of three Government agencies. The facts will show that the Department of State, the Department of Defense, and the Maritime Administration have ignored provisions of the Cargo Preference Act of 1904 with respect to shipping military cargo to and from Iceland.

Rainbow Navigation is an American-flag shipping company which operates one general cargo vessel between Norfolk, VA and Keflavik, Iceland. Rainbow is the only American-flag carrier transporting military cargo between the United States and Iceland.

The Cargo Preference Act of 1904 directs the U.S. Government to use U.S.-flag carriers, if available, to transport Department of Defense cargo. Thus, in May 1984, Rainbow Navigation began operations. Subsequently, the Icelandic Government suggested that the United State military base at Keflavik, Iceland, might be closed if Icelandic carriers were not given some of the cargo carry business.

As previously noted in a letter that 18 of my colleagues and I signed and sent to the Secretary of State, the Secretary of Defense, and the Administrator of the Maritime Administration, I appreciate the security importance of cordial relations with the Government of Iceland. However, I want to be assured that the cargo preference laws enacted by Congress are enforced.

Rainbow, though eligible for 100 percent of the shipping trade, complied with a Department of Defense request that it accept only 60 percent of the cargo business, thereby leaving Icelandic carriers 40 percent of the trade; accordingly, Rainbow declined to exercise its option to charter a second ship from the Maritime Administration for the Icelandic trade. The U.S. Government offered to pay the Icelandic carriers the money which they would have received given 100 percent of the trade.

In spite of the good faith shown by Rainbow, the U.S. military—while Congress was in recess—began to divert westbound military cargo to military aircraft, thus squeez-

ing Rainbow Navigation out of business. Rainbow's first voyage carried 1,749 tons of military cargo and earned $237,452 in revenue. Twenty-one months later, on October 11, 1985, Rainbow carried only 24 tons of military cargo and received a mere $5,000 in revenue. Obviously, Government interference is successfully destroying an American business that has every right to engage in trade.

On August 8, Secretary of the Navy John Lehman determined that the freight charged by Rainbow Navigation is excessive and unreasonable. On that same afternoon, Rainbow received an unsigned and undated request for proposals from the Military Sealift Command for the carriage of military cargo to and from Iceland for a 6-month period beginning October 1. This RFP specifically states it will be open to foreign-flag vessels. The Cargo Preference Act, it should be noted, gives only the President the power to make such a determination. Rainbow charges the same rates as the Icelandic carriers. Also, the Rainbow carrier provides better service at an overall lower cost to the United States Government by shipping to a port closer to the military base than the Icelandic carriers.

Subsequently, Rainbow filed suit in the U.S. District Court for the District of Columbia for declaratory and injunctive relief, alleging that the actions of Secretary Lehman, the Military Sealift Command, and others were contrary to the 1904 act and the procurement statute and regulations, and to the Constitution and Civil Rights Act.

On October 15, the district court ordered the defendants to withdraw the requests for proposals on or after September 6, I am pleased that Rainbow's rights have been upheld by the court. But it is my hope that the U.S. Government will allow Rainbow to continue business as permitted under existing law. Our Government has no place in directing private business to foreign vendors for any reason, and certainly not at the expense of an American firm ready, able, and willing to continue serving American shipping.

ROD CHANDLER'S PHOTOGRAPHIC DISPLAY

HON. JOHN MILLER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Monday, October 28, 1985

Mr. MILLER of Washington. Mr. Speaker, opportunities to catch a glimpse of the nonpolitical talents of our colleagues are all too rare. So chances are, you didn't know that one of our colleagues, ROD CHANDLER, is an accomplished photographer.

I was delighted to kick off the opening in the Cannon rotunda of Mr. CHANDLER's beautiful photographic exhibit.

We all know what hectic and frequently chaotic lives Congressmen lead. We are spread between floor activities, committee meetings, and trips to our home States.

In spite of his schedule, Representative CHANDLER still takes time to appreciate nature—the mountains, streams, trees, and creatures God has created are captured so well in his photographs.

Most of the pictures were taken in Washington State, but there is also a collection from Oregon and from faraway places like Thailand and Sweden.

Mr. CHANDLER became an avid shutterbug in his early career as a Seattle television reporter. He took a few classes in photography, but really developed his skill by practicing. He also received lots of advice from his coworkers at the television station who lugged around heavy 16-mm cameras to cover stories.

His tools are a single-lens, reflex 35-mm camera and an eye for the world's peaceful and harmonious offerings.

We enjoyed this rare glimpse of our colleague and his world.

RETURN TRUST FUND MONEYS

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, October 28, 1985

Ms. OAKAR. Mr. Speaker, today I am introducing legislation that is of timely importance. My bill would require the U.S. Department of the Treasury to immediately begin paying interest on all amounts borrowed from the civil service retirement fund, the military retirement fund, the Federal supplemental insurance fund, and the Social Security trust fund.

Since October 1 of this year, Mr. Speaker, the Treasury Department has been borrowing from these trust funds to keep the Government running. Because the Treasury Department has not been investing in the trust funds, $8 million per day in interest has been lost. This disinvestment of the trust funds has consequently affected Federal and military retirees who will not receive benefit of the interest were it being paid.

Mr. Speaker, the Treasury Department is blaming their disinvestment action on the Congress for not acquiescing to their wish to raise the debt ceiling. Such an accusation is unconscionable and hides the real fact that the Treasury Department is holding the American people hostage to pay the national debt. This situation exists solely because the administration has run up a $212 billion deficit.

If the Federal Government is permitted to borrow money from the trust funds, Mr. Speaker, it should be required to pay interest to those funds. Federal military retirees and Social Security recipients are entitled to interest on the trust funds on which they rely for their retirement.

Mr. Speaker, my bill would correct this unfair practice by requiring the Treasury Department to pay interest on all amounts borrowed from the civil service retirement fund, the military retirement fund, the Federal supplemental insurance fund, or Social Security trust funds.

I look forward to its swift consideration and passage.

THE 20TH ANNIVERSARY OF FRESNO COUNTY'S ECONOMIC OPPORTUNITES COMMISSION

HON. RICHARD H. LEHMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, October 28, 1985

Mr. LEHMAN of California. Mr. Speaker, it is with great pleasure that I share with this House the recognition of a community action program in my district that has been providing the residents of Fresno County with invaluable community, economic, and development services for the past 20 years. The Fresno County Economic Opportunities Commission [FCEOC] is celebrating its 20th anniversary and I am honored to present this proclamation in recognition of its efforts. I hope to see the FCEOC continue its work long into the future.

The FCEOC is credited with providing invaluable community service in the areas of job training for low-income and rural residents, health and family planning services for those who cannot afford private health care, and many recreational and advisory activities for senior citizens in Fresno County. In this time of fiscal constraints, the efforts of the FCEOC become even more valuable and the people at the FCEOC respond by giving their constant attention to the needs of the community.

In 1973, the FCEOC initiated the development of Orange Cove Community Center which has served for the past 12 years as a facility where community groups can meet and discuss community development plans, where senior citizens can learn how to conserve energy, and where young people can go to learn how they can be trained for productive jobs. Without the energy and motivation of the staff at FCEOC, a facility like Orange Cove would not exist to provide the valuable social services for all residents. Projects like Orange Cove also offer residents the chance to lend a hand to those who need it.

I wish the Fresno County Economic Opportunities Commission the best of luck and I commend Joe Williams, executive director, and Luisa Medina, board chairperson, for their excellent work and contribution to the community of Fresno County. I applaud their 20 years of service and look forward to many more.

EULOGY TO KEITH M. GAFFANEY

HON. CARLOS J. MOORHEAD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, October 28, 1985

Mr. MOORHEAD. Mr. Speaker, I have the sad task of notifying my colleagues in the U.S. House of Representatives of the death of a dear friend, a fine citizen, and a

beloved father and grandfather, Mr. Keith M. Gaffaney.

Keith Gaffaney died suddenly on October 19 in Sacramento, CA, doing those things he spent a lifetime doing so well. In the end, he was representing those causes which formed the core of his public life.

Last April, Mr. Gaffaney was unanimously elected as an honorary life member of the National Rifle Association, thus becoming only the 15th individual to be accorded the association's highest honor. This special tribute was in recognition of 35 years of dedicated service to the NRA. First elected to the NRA board in 1960, Keith Gaffaney served as vice president from 1979 to 1981 and as president from 1981 to 1983. He had been an executive councilman since 1983 and was serving on the legislative policy, membership and women's policies committees at the time of his death.

Mr. Gaffaney was active in many youth service organizations, sportsmen's groups, and State and local politics. He was a leader in the California Rifle & Pistol Association, serving as CRPA president and executive council member. He was a member of the California Wildlife Federation Board of Directors; he was president and founder of the United Sportsmen of California, and permanent chairman of the California Sportsmen's Round Table.

Before becoming a full-time representative for the NRA, Keith Gaffaney spent 30 years as a member of the Los Angeles Police Department. He retired from the LAPD in 1966 as assistant operations officer for the police academy. Since his departure from the police force, he has been a respected and effective lobbyist representing sportsmen and gun owners.

Mr. Speaker, I had known Keith Gaffaney for many years. He was a fine and treasured friend. I respected him as a fair and honest advocate for a cause not always void of polemics. I will miss his friendship, his humor, his sense of political balance, and his fundamental decency. Mr. Gaffaney is survived by his wife, Ruth, his son, Dennis, and two grandchildren.

IN MEMORY OF ALEX ODEH

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, October 28, 1985

Mr. CONYERS. Mr. Speaker, last week a memorial service was held in Washington, DC, for Alexander M. Odeh, the west coast regional director for the American-Arab Anti Discrimination Committee [ADC]. He was killed by a terrorist's bomb rigged to explode when he opened the door of his Santa Ana, CA, office the morning of October 11. Mr. Odeh, a man of peace, still largely unknown to many Americans, was the second tragic victim of the *Achille Lauro* hijacking.

Alex Odeh, who had been associated with ADC since it was founded in 1980, was a tireless organizer within the Arab-American community and a promoter, as well as a source of Arab-American pride. He strongly believed that a nonviolent solution could be found to the Israeli/Palestinian conflict in the Middle East through negotiation. He spent his last night speaking out on the hijacking, pointing out that violence only breeds violence. While he has been the target of many threats in the past. Alex Odeh's death still comes as a shock to those of us familiar with his efforts to combat terror and racism.

The hatred which caused the deaths of both Alex Odeh and Leon Klinghoffer has its roots in the unresolved problem of Palestinian homelessness. The failure of the United States and Israel to recognize the national rights of the Palestinian people remains an obstacle to peace in the Holy Land. The result has been years of bloodshed which has touched all of the countries in the region. Now, America finds itself a battleground.

Arab-Americans are the targets of increasing violence and public hostility. To some extent, the media is responsible for creating the misperception that all Arabs are the enemy of Israel, something which marks them as fair game for abuse. Alex Odeh was, in life, an example of how incorrect that perception can be. In death, he is another example of how innocent people in both communities fall prey to those who falsely believe that their actions will produce peace.

There is no reason to doubt that Leon Klinghoffer was murdered because he was Jewish, just as there is no doubt that Alex Odeh was murdered because he was an Arab. What is most important, however, is both men were noncombatants and both were Americans. Alex Odeh was killed for exercising his constitutional right of free speech in a country that values free political expression above all else. I, therefore, find his loss particularly disturbing because if we cannot openly discuss the Middle East problem here, there will remain little chance that Americans can help the Israelis and Palestinians make peace.

TRIBUTE TO EDNA SHERMER GROSSMAN, R.N.: VA NURSE

HON. ROBERT J. MRAZEK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, October 28, 1985

Mr. MRAZEK. Mr. Speaker, I ask my colleagues to join me in paying tribute to Edna Shermer Grossman, of Northport, NY, who was born on this day in 1905. At a time when there are deep concerns about the military medical system, it is especially fitting to recognize Edna's three decades of service as a registered nurse in the U.S. Navy and the Northport Veterans' Administration Hospital. Her professionalism and tender loving care demonstrate the very best that can be expected from the Nation's 63,000 VA nurses.

The 10.2 million active and retired soldiers and their dependents who rely by necessity on the military health-care system deserve high-quality medical services. During the past year, unprecedented reports of tragic cases of malpractice have prompted committees in both the U.S. House of Representatives and the Senate to examine whether armed services personnel are receiving substandard health care. A recent Department of Defense survey of 20,000 military households documented the widespread belief that civilians receive substantially better health care than the men and women who serve this country in the military. Apparently, inefficiency and lack of staff continuity contribute largely to this perception.

Recently, the Veterans' Administration itself recognized the urgent need to improve the Nation's largest health-care system in which more than 25 percent of the physicians in this country work full or part time. In 1984 alone, the Federal agency recorded over 20 million patient visits in 500 hospitals, outpatient clinics, and nursing homes. Over the same period, veterans hospitals reported almost 81,000 complaints from patients and other sources about quality of care and related issues. Clearly, we are facing a problem of national scope that demands immediate attention.

The point that I want to make today is that along with the problems there are many dedicated individuals in the military medical corps whose skill and compassion deserve recognition. And the quality of care not only hinges on the ability of the 46,000 VA doctors but also on the efforts of registered nurses, licensed practical nurses, nursing assistants, aides, and clerical staff.

This I know first hand from my experience in the Navy as a patient in the veterans' Administration Hospital in Norfolk, VA. And this I know from the humanity and special qualities of one of my constitutents, Edna Shermer Grossman, whose career as a registered nurse proves that one person, even in the midst of an enormous bureaucracy, can make a difference.

To mark this special day for Edna, and to encourage others to follow her example, it is appropriate that we recall a few of the highlights of a rich and varied life that her family and friends in Northport have shared with me.

In honor of the milestone that Edna passes today, I will ignore the evidence that she is the daughter of the first registered Republican in Davie County, NC—Tandy Meroney Shermer. Perhaps Tandy Shermer was forgiven for suffering that once rare affliction, having been incurably bitten by the bug in Cuba while fighting alongside Lt. Col. Theodore Roosevelt, the most famous Republican of the day. As a member of the volunteer cavalry known as the "Rough Riders" he served with distinction at the engagement of Las Gausimas and the battle of San Juan Hill. And it is still said—at least in the hollows of Davie County—that during the successful 1904 campaign to become 25th President of the United States, Teddy Roosevelt declared that he could have put a few more men like

Trooper Shermer to good use and ended the Spanish-American War even sooner.

Edna's mother, Minnie Lee Caton Shermer, must have been a Democrat at heart, at least judging from the names she chose for her nine sons and daughters: Willie Jo—the oldest daughter, "X"—that's right, just the letter X, Edna Viola "Tippy", Alpha "Alfy', Eulius "Sherm", Atlee "Sis", Lucy, Jerome "Buck", and Julia "Julie."

Forty-six years living in the North Shore, Long Island community of Northport have done little to erase either Edna's soft accent or mischievious sense of fun, which both trace to her childhood home in the small rural town of Advance, NC. Her arm still bears the scar from playing too near the big saw in the mill. And at times she will now admit that it was she who got the rest of the Shermer brood to sample rabbit tobacco.

Following her older sister into nursing was immediately appealing to Edna. She always had respect for Willie Jo, who has never seen either 5 feet in height or 100 pounds in weight, but would tell anyone who made fun of her boyish name "to go to hell." So Edna worked hard and became the youngest nurse in the State. In fact, a waiver of the state license requirement was needed to allow the new teen nurse to practice.

But there must have been times when Willie Jo—who became Edna's first nursing supervisor at City Memorial Hospital in Winston-Salem—wished Edna had instead chosen a career in farming, or even helping out at the local still, known formally as "Bailey's Liquor Manufacturer." One of these times most certainly was when the hospital administrator Dr. Whittington looked out his office window to see Tippy showing the other student nurses how to ride a horse around the hospital grounds. By the time she completed her training in 1925 and arrived in Greensboro to work at the Clinic Hospital as an RN, Tippy was sporting the first "Boots Bob" haircut in town and tearing up the countryside in a Ford roadster with a rumble seat.

In 1929, Edna left North Carolina to join the Navy and see the world. Instead, she spent the depression seeing whistle-stop tours of duty in hospitals up and down the eastern seaboard: Brooklyn, Miller's Falls, Waterbury, Manhatten, Lincolnton, Salisburg, and back to New York.

Finally in 1939 Edna was able to settle down, moving to Northport where she has lived ever since. There she began the challenging work of attending psychiatric patients in the VA hospital. In those days tranquilizers and restraints were rarely, if ever, used. Edna's children, Lillian Lee and Bill, remember times when Edna would return from work not only exhausted, but bruised. But they also remember the respect and dignity she always accorded all of her charges, including those patients with grounds privileges who she would introduce to the children with full name and rank each day when they met her after work at the hospital.

Over the years Edna cared for thousands of patients, including men from Admiral Byrd's polar exploration, the gangster "Baby Face" Nelson, Gene Tunney, and other well known people who for a variety of different reasons passed through her ward. The stories she tells about these experiences convey the secret of her success as a nurse: she enjoyed her work and tried to treat every patient as an individual human being.

There are many examples of Edna's basic kindness and how creative she could be within a bureaucracy to satisfy a patient's needs. During the time she was put in charge of a "colored ward" in a Southern hospital, she built an incubator and saved a premature baby's life when the necessary equipment was removed from her ward to treat a white child. And once during the Second World War, a French deserter being treated in Northport had to be moved to another more secure facility. For some unfathomable reason, the Frenchman steadfastly refused to leave the psychiatric ward until he had a new "chappeau." It was obvious that the usual channels for Government procurement did not offer a fast solution, but Edna was unwilling to simply ignore the seriously disturbed man's request. We will never know if he appreciated the collection Edna took up among the staff to buy a beret, or whether the gesture had any therapeutic benefit, but once he had his hat the Frenchman did leave the ward voluntarily, without the assistance of the burly orderly waiting in the wings.

After Edna retired in 1966 it took a long time for her seven grandchildren to get accustomed to her out of her white nurse's uniform. Until then she would go off duty at the same time they returned home from school and wouldn't bother to change before joining them in a game of baseball. Once she had to sheepishly admit to her own doctor that she had broken her hand bare-handing a line drive. "I should have gloved the damn thing," she disgustedly explained.

The tykes, as she called the grandchildren, were never quite sure what all the fuss was about Gram's nursing ability. At night when you were ill, didn't she always switch on the light, wake you up and ask if you were OK? And didn't she catch and recycle every drop of the medicine you tried to squirt out of the corner of your mouth? As far as they could see the only benefits of her nursing were the stray alley cats she brought home from the hospital grounds, and the annual VA Christmas party where they got to see grown ups in pajamas during the middle of the day.

Well, maybe some day they will remember more than the trips to New York City, swimming lessons at Crabmeadow Beach, on the Cow Harbor dock, painting landscapes at the Old Northport Golf Course, and the wild rides in her Carmen Ghia along Fort Salonga Road. some day they will understand, and her four great-grandchildren will learn, what an outstanding contribution she made in her profession and what an inspiration she is to us all.

After hearing from so many of Edna's friends and neighbors in the Third Congressional District, it is reassuring for me to know that she does not have aspirations to represent the district in Congress. So on behalf of all who wish Edna and her husband Alexander well, I thank my colleagues for joining me in a tribute richly deserved.

MIAMI HERALD COLUMN ON SDI RAISES VALID ARMS CONTROL CONCERNS

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, October 28, 1985

Mr. FASCELL. Mr. Speaker, as the debate over the President's strategic defense initiative [SDI] rages on, proponents and opponents continue to refine the debate over its desirability and practicality. However, the basic arguments remain the same.

In the House Foreign Affairs Committee's May 1984 Interim Report on U.S. Policy concerning the SDI and antisatellite weapons, many of the concerns raised by these programs were outlined. Namely, these included the SDI's adverse impact on arms control, its potential for undermining the ABM Treaty, and the potential alienation of our allies.

An important column on this subject appeared in the Miami Herald of October 13. In that column, Associate Editor Joanna Wragg, raises several points that Congress should consider in its deliberations on the SDI:

First, if the SDI is pursued as a development program "it can only ignite another round of inflationary arms spending by both nations."

Second, an imperfect shield defense "would require years to develop [and] provides an incentive for the Soviets simply to build more weapons to compensate" for our improved defenses.

Third, "No rational government would stand by while the retaliatory impact on which it depends is effectively cut by half or more. Rather, it will compensate probably in cruise and submarine-launched missiles; because of their low trajectories, the SDI could not stop them."

Fourth, "A truly missile-proof net would be wonderful—assuming that the Soviets would stand peaceably by while it was assembled. But to believe in a foolproof defense is to be a fool, as the French discovered when Minister of War Andre Maginot's defense line crumbled in World War II."

Fifth, our European allies are very wary of the SDI. The SDI "is a plan for an umbrella that they can't squeeze under. They would be left vulnerable to Soviet aggression as never before. To them, Star Wars represents a multibillion-dollar proof of U.S. isolationism."

These and other valid points raised in Ms. Wragg's column will be the subject of ongoing hearings conducted by the Foreign Affairs Subcommittee on Arms Control, International Security and Science, which I

chair. We will continue to monitor and evaluate the SDI Program emphasizing the need for SDI-related research as allowed under the ABM Treaty as a way to keep apprised of technological developments in the area and as a hedge against possible Soviet breakout from the ABM Treaty.

The Miami Herald column by Joanna Wragg follows:

[From the Miami Herald, Oct. 13, 1985]

'STAR WARS' IS PIE IN THE SKY

(By Joanne Wragg)

Ideas, are dangerous and unreliable allies, as any revolutionary or would-be censor can attest. They can fall into the "wrong" hands and be twisted to serve ends that embarrass their early proponents. That is precisely how the quasi-pacifist nuclear-freeze movement came to produce the idea on which the Reagan Administration's "Star Wars" initiative rests.

That freeze movement promoted the notion that the two superpowers' nuclear-arms buildup is "immoral." The President snatched that idea and bent it to serve a very different strategy. He justified "Star Wars" as a way to "end nuclear weapons," a goal that the peace movement popularized.

"Star Wars"—the strategic defense initiative (SDI)—is the President's proposal for a defensive system that could destroy incoming Soviet intercontinental ballistic missiles (ICBMs) well before they reached the United States. No such system now exists. The NORAD complex headquartered in Cheyenne Mountain, Colo., is designed merely to *warn* the U.S. and Canadian governments when they are under Soviet nuclear attack, so that a decision on retaliation can be made. The system can't stop that attack. Neither can the Soviets stop U.S. missiles.

Each superpower now possesses enough nuclear warheads, along with the missiles, airplanes, and submarines to deliver them, to obliterate the other several times over. The theory is that a rational enemy will not launch a "first strike" if he believes that the retaliatory "second strike" will destroy his nation. Strategists on both sides thought the world safer with each thus armed with an awesome second-strike capacity. In the two generations of the nuclear age, the northern hemisphere has enjoyed a remarkable absence of war under the superpowers' nuclear umbrella.

This theory of mutual assured destruction bears the unsettling acronym of MAD. It hinges on the enemy's good sense. It leaves the American people's safety uncomfortably dependent upon the Kremlin's sanity. So when the peace movement persuaded the public that the threat implict in the deterrence strategy was "immoral," the stage was set for the Administration to seek to reduce that threat.

The result is the SDI. If used as a bargaining chip, it might yet serve the interests of peace. If pursued as a development program, however, it can only ignite another round of inflationary arms spending by both nations.

At a recent editors' seminar at the Air Force Academy in Colorado Springs, home of NORAD and the Unified Space Command, I heard expositions and debates that included representatives of every military, civilian, and scientific point of view on the subject. Speakers ranged from Reagan Administration arms-agency chief Kenneth Adelman to arch-critic and astronomer Carl Sagan. Their conflicting arguments made the issue unexpectedly clear.

First, it's evident that basic strategic-defense research should continue. Research on related computers and sensors already was funded at about $900 million per year before the President announced his megabucks initiative. That research eventually might make possible a targeted defense program that could guard against a single ICBM shot by a Khadafy-type renegade. That would be worth having even if the Soviets suddenly converted to our side.

The multibillion-dollar SDI, however, would move quickly toward development and testing of space-based weapons that would shoot down incoming missiles—some day. For now, it is not possible to produce an SDI network that is 100 percent, or even 50 percent, effective. Not even Mr. Adelman contends that it is. A 90-percent screen still would allow about 1,000 Soviet nuclear missiles to hit the United States.

Such a permeable line, which would require years to develop, provides an incentive for the Soviets simply to build more weapons to compensate for the net. Thus Stars Wars can only accelerate the arms race and render an arms-reduction treaty impossible. No rational government would stand by while the retaliatory impact on which it depends is effectively cut by half or more. Rather, it will compensate, probably in cruise and submarine-launched missiles; because of their low trajectories, the SDI couldn't stop them.

A truly missile-proof net would be wonderful—assuming that the Soviets would stand peaceably by while it was assembled. But to believe in a foolproof defense is to be a fool, as the French discovered when Minister of War Andre Maginot's defense line crumbled in World War II. Star Wars advocates like to invoke the successful campaign to go to the moon as an example of America's can-do technology. They neglect to point out, as Dr. Sagan gleefully does, that the moon was not shooting back. A contest between clever, highly motivated adversaries never ends.

Moreover, it is unreasonable to expect an adversary to trust us. Most Americans suspect that the Soviets would bury the United States if they thought they could get away with it. That prudent assumption should continue to guide U.S. policy. But Americans cannot afford the naivete of believing that the Soviets share our view that we are the good guys. They don't. They know that, no matter what our President says, a defensive shield that takes the "M" out of MAD would set us up for a first strike against them.

The nations of Western Europe don't like Star Wars either, and with good reason. It is a plan for an umbrella that they can't squeeze under. They would be left vulnerable to Soviet aggression as never before. To them, Star Wars represents a multibillion-dollar proof of U.S. isolationism. No wonder Soviet Premier Mikhail Gorbachev is seizing this opportunity to play peace maker in Western Europe.

For all these reasons, and because the program would soak up engineers, metallurgists, and mathematicians who are desperately needed in private industry, the President ought to reconsider. He has said that the SDI was not conceived as a bargaining chip for Geneva. He probably meant it at the time, but he can afford to change his mind. The nation and the world, however, cannot afford for him not to.

NO PRODUCTION FUNDS FOR THE BIGEYE BOMB

HON. NICHOLAS MAVROULES

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, October 28, 1985

Mr. MAVROULES. Mr. Speaker, I want to join my colleague, DANTE B. FASCELL, chairman of the Foreign Affairs Committee, in praising the action taken by the Appropriations Committee on October 24 striking out funds for new nerve gas weapons. I am including here Chairman FASCELL's statement. He points out how this new chemical weapons program is proclaimed to be a modern and safe replacement for our current stockpile of chemical weapons when, in fact, it is a request to fund weapons which are judged not ready for production by our own GAO and which may prove to be unsafe. His conclusion clearly summarizes the persuasive foreign policy, defense, arms control, and budgetary reasons why Congress should not fund this program.

Our colleagues, Chairman FASCELL and Representative JOHN PORTER, have provided excellent leadership on the chemical weapons issue in the House of Representatives. They have tried to present to all their colleagues the facts on the binary nerve gas weapons program. When they have sensed problems in the program they have investigated themselves and they have asked the GAO to investigate. As Chairman FASCELL so aptly puts it in his statement, "Every time I've asked GAO to take another look at the Bigeye they turn up new technical problems and persistent test failures." It is their judgment and the recommendation to Congress by the GAO that Congress should not appropriate funds for this binary nerve gas weapons production.

I am also including here an editorial which appeared on October 23 in the Boston Globe. That editorial entitled, "Another Flawed-Weapon Plan That Needs Scrapping", also underscores the severe and persistent testing problems of the Bigeye bomb. The editorial has an important instructional message for Congress, Congress should not make decisions to fund production of weapons systems until those weapons have successfully completed their testing programs.

Chairman FASCELL's statement and the editorial follow:

STATEMENT BY HON. DANTE B. FASCELL

FASCELL LAUDS APPROPRIATIONS COMMITTEE ACTION STRIKING OUT FUNDS FOR NERVE GAS WEAPONS

Commenting on the Appropriations Committee decision to delete funds for binary production, Rep. Dante B. Fascell (D-FL), Chairman of the House Foreign Affairs Committee said: "Today's vote by the Appropriations Committee to delete funding for new binary nerve gas weapons is the right vote at the right time. Thanks to the leadership of Rep. John Porter (R-IL), the Appropriations Committee decided the issue of new nerve gas weapons on its merits and

voted not to appropriate funds for their production."

The Chairman said he sent a letter to Members of the Appropriations Committee detailing new information about the Bigeye bomb and its testing failures. In that letter Fascell pointed out: "The GAO has recommended for three consecutive years that the Congress should not appropriate the $163 million requested for the binary production program." Fascell added: "Every time I've asked GAO to take another look at the Bigeye they turn up new technical problems and persistent test failures. The news on the Bigeye bomb and on the 155-mm artillery projectile is bad and may get worse if we begin production. Leaks, nitrogen bulges, and hot spots burning holes in artillery canisters and bombs which can still explode from pressure buildup on runways or before hitting their targets don't reassure me that we will be providing our troops the safe, reliable weaponry that they deserve."

Chairman Fascell concluded: "This vote by the Appropriations Committee states clearly that we do not need a weapons system which is not needed, does not work, has not been proven safe for our troops, will cost the U.S. taxpayer billions of dollars, will harm the NATO alliance, will risk proliferation, and will jeopardize chances for a negotiated solution with the Soviet Union."

[From the Boston Globe, Oct. 23, 1985]

ANOTHER FLAWED-WEAPON PLAN THAT NEEDS SCRAPPING

(By Elisa D. Harris and Jeanne Guillemin)

Defense Secretary Caspar Weinberger's recent decision to cancel the fatally flawed Sgt. York Division Air Defense gun (DIVAD) should serve as a lesson for government officials in charge of weapons programs. The $1.8 billion mistake was the result of a 1977 Pentagon decision to start production of the gun before the system had successfully completed its tests.

Now Congress is once again considering funding the production of a costly weapon still in the testing stage. This time it is "Bigeye," an aircraft-delivered nerve gas bomb with a price tag of more than two billion dollars.

Since 1982 the Pentagon has sought congressional approval for Bigeye bomb production before confirming the reliability of the system by adequate tests. In reports issued in April 1983 and October 1984, the General Accounting Office identified a range of serious, unresolved problems: physical damage to the bomb casing due to high temperature and increased pressure during delivery, questions about the purity and toxicity of the enclosed chemical agent, and the vulnerability of Bigeye delivery aircraft to enemy air defenses.

These findings, together with reluctance to break a long-standing moratorium on nerve gas production, led Congress in 1982, 1983, and again in 1984 to reject the Pentagon's request.

This year Congress appears on the verge of approving chemical weapons production for the first time in 16 years. Its members thus risk supporting production of a system that looks good on the Pentagon drawing board but which later turns out to have major defects.

The Bigeye bomb's test history is filled with instances of crucial test data being withheld from the Pentagon and congressional committees, as well as questionable interpretations of test results. In October 1982 a chemical-mixing test resulted in a surprise explosion of the bomb. This setback was not reported to the Office of the Secretary of Defense until December 1982, and not to Congress until January 1983.

In an August 1985 letter report to House Foreign Affairs Committee Chairman Dante Fascell, the GAO suggested that, using the Pentagon's own test criteria, the number of successful Bigeye tests claimed by the Department of Defense could not possibly be correct.

The same report took issue with the Pentagon's assertion that tests had confirmed the solution of Bigeye's pressure problem. The GAO wrote, "[T]he pressure buildup problem has been sidestepped by DoD and has not been resolved—the bomb could still blow up."

In the case of Sgt. York—and now with Bigeye—the Army has repeatedly maintained that performance specifications were being met and that the system was fit for production. Until the end, the Army insisted that Sgt. York was essential to the defense of Europe and that its various technical and operational problems could be resolved. Likewise, in Senate testimony on Feb. 28, 1985, Thomas Welch, deputy assistant secretary of defense for chemical matters, claimed, "All the problems have been fixed. The Bigeye today is a success story."

Yet only last month, in still another report to Congress, the GAO concluded that Bigeye bomb production is premature because "numerous, critical technical issues" remain unresolved.

The GAO is right about the Bigeye bomb. Both Congress and the Pentagon should have learned from their multibillion dollar mistake that weapons systems should not be produced until successfully tested and that such tests must be conducted openly and honestly.

Congress will soon have another opportunity to reject Bigeye bomb production when it considers the 1986 defense appropriations bill. The lesson from the Sgt. York is: weapons systems that don't work should not be funded.

GRAMM/RUDMAN

HON. BRUCE A. MORRISON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Monday, October 28, 1985

Mr. MORRISON of Connecticut. Mr. Speaker, I would like to bring to the attention of my colleagues letters from three low-income advocacy groups which raise serious questions about the Gramm-Rudman proposal and its likely effect on low-income people.

COALITION ON BLOCK GRANTS AND HUMAN NEEDS,
Washington, DC, October 11, 1985.

DEAR REPRESENTATIVE: The Coalition of Block Grants and Human Needs believes that the Gramm-Rudman approach to deficit reduction will be greatly detrimental to those with the greatest need in our society, those who suffered the brunt of past budget cuts.

If any such legislation is to be adopted, we believe it must exempt means tested entitlements and low income discretionary programs.

The Gramm-Rudman amendment, H.J. Res. 372, exempts Social Security and as much as 40 percent of the defense budget, then automatically allocates, by formula, the reductions necessary to meet specified deficit targets. This procedure unavoidably focuses deficit reduction on vital means tested entitlements and programs for health, education and other supports on which the poor depend. Since 1981, $56 billion has been cut from human resource programs, including $34 billion from those targeted specifically to poor people. It would be grossly unjust to protect defense contractors and middle and upper income Social Security recipients from cuts while letting them fall on the poor and others with special needs.

During this year's budget debate, bipartisan majorities in both houses accepted the principle that low income programs should bear no further reductions. We believe the same commitment should extend to consideration of any deficit reduction measure.

The Coalition on Block Grants and Human Needs consists of over 100 religious, civil rights and labor organizations and others concerned about the needs of the poor, minorities, women, children, the disabled and elderly.

While we share your concern about the seemingly uncontrollable deficit, we believe that a measure which automatically puts the burden on low income programs is both unwise and unfair.

Sincerely,

SUSAN REES,
Executive Director.

NATIONAL LOW INCOME HOUSING COALITION,
Washington, DC, October 15, 1985.

DEAR REPRESENTATIVE: On behalf of the members of the National Low Income Housing Coalition, I urge you to reject the Gramm-Rudman budget proposal as an unbalanced, unfair and desperate attempt to reduce the national deficit through draconian cuts in discretionary domestic spending programs which benefit low income people. While the Gramm-Rudman proposal purports to mandate "across the board" reductions in the federal budget deficit through automatic cuts, major program areas—including Social Security, large portions of defense, and all tax expenditures—are off limits. The result is that programs which serve the poor must bear a share of automatic spending reductions equal to as much as twice their share of the federal budget.

We are particularly concerned about the impact of Gramm-Rudman on low income housing programs. Because the proposal requires reductions in budget authority to be matched by outlay reductions, housing appropriations would have to be eliminated entirely to meet the targets. This is due to housing's unique use of long-term budget authority.

Since 1981, budget authority for low income housing subsidies has been slashed by over 60 percent. The Section 8 new construction and substantial rehabilitation programs have been repealed. The bulk of the inadequate subsidies in today's HUD budget is in existing housing subsidies.

I ask that you vote to maintain the authority of Congress to set budget and spending priorities and not to rely on automatic spending reductions or Presidential discretion. Reject the Gramm-Rudman proposal. At the very least, any eventual proposal should exclude all means-tested low income programs such as low income housing.

Sincerely,

BARRY ZIGAS,
President.

CENTER FOR LAW
AND SOCIAL POLICY,
Washington, DC, October 18, 1985.

DEAR REPRESENTATIVE: The Center for Law and Social Policy urges you to fully and carefully consider the effect of the Gramm-Rudman approach to deficit reduction on the poor and vulnerable before voting upon it. If Gramm-Rudman or similar legislation is to be adopted, we believe means-tested entitlements as well as discretionary programs serving primarily low-income populations and people with disabilities must be exempted from its provisions.

As you know, programs for the poor have been subject to enormous budget cuts since 1981. More than thirty-four (34) billion dollars has been eliminated from programs serving poor families and children, including decreases in AFDC, food stamps, child nutrition, health, housing, legal services and job training. As a result poverty among single-parent families with children has increased dramatically. In consideration of this, during this year's budget debate, bipartisan majorities of both House of Congress accepted the principle that low-income programs should bear no further reductions. We believe the same commitment should extend to consideration of any deficit reduction measure.

Yet, under Gramm-Rudman, programs assisting the poor will bear a share of automatic spending reductions equal to as much as twice their share of the federal budget. This is morally unjustifiable.

Moreover, because of the ambiguous language of the bill, it is possible that both entitlement and non-means tested programs, such as education of children with disabilities, immunizaiton, foster care, and adoption assistance programs will lose so much funding as to be incapable of delivering the services that Congress intended them to deliver when they were enacted and reauthorized. At the very least, the kinds of funding reductions encompassed within Gramm-Rudman will result in cuts in personnel that will cause disruptions in such other essential functions as law enforcement, the courts, air traffic control, management of public lands, tax collection, processing of Social Security and other benefit checks, and operation of VA and other publicly-funded health facilities.

Clearly something must be done to control the deficit. To do so fairly and equitably, all defense spending and Social Security should be included in the base amount available for reduction. In addition, tax reform which contains a minimum corporate tax and closes loopholes available to upper-income taxpayers must be a priority.

We appreciate your attention to altering the Gramm-Rudman bill, and would be happy to assist you in your work on achieving deficit reductions that are both effective and fair.

Sincerely,

ALAN W. HOUSEMAN,
Director.

THE MEDICARE FAIR HOSPITAL DEDUCTIBLE ACT OF 1985

HON. EDWARD R. ROYBAL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, October 28, 1985

Mr. ROYBAL. Mr. Speaker, today I rise to introduce the Medicare Fair Hospital Deductible Act. This bill will limit increases in the hospital deductible and nursing home coinsurance to no more than the lesser of increases in Medicare's DRG payments or Social Security's COLA—an indicator of the elderly's ability to pay for health care. Nursing home coinsurance will be reduced from one-eighth of the hospital deductible to one-twelfth. Finally, full nursing home coverage will be extended by 5 days to give seniors some relief from the "sicker and sooner" problem of early hospital discharges.

Why is this legislation so critical? Just a few weeks ago, we were all shocked by the upcoming increase in Medicare's hospital deductible and nursing home coinsurance for 1986. While the increase for 1985 was already an unacceptable 12 percent, no one was prepared for the unreasonable increase of 23 percent which the elderly face for 1986. This 23-percent increase is even more excessive when you consider that the Social Security COLA for 1986 is only 3.1 percent. This situation is intolerable and requires some remedy.

While most of my colleagues probably agree with the need to hold down the hospital deductible and nursing home coinsurance, they are also concerned about the fiscal impact. For this reason, we have attached a revenue enhancing provision whereby the cigarette excise tax will be increased by 8 cents, indexed to the Consumer Price Index, and earmarked for the Medicare hospital trust fund. The estimated $4.8 billion in added revenues over the next 3 years will not only cover the cost of the above hospital deductible and nursing home coinsurance provisions—about $3.7 billion—but will give the trust fund and the Federal budget a much needed "revenue tranfusion" of over $1 billion.

Already many congressional offices are receiving mail from senior citizens who are angry about the massive increase. This is only the beginning. Soon, the elderly will receive insurance company notifications of what impact this increase will have on Medigap policies. If this Congress does not act soon, senior citizens entering the hospitals after January 1 will face the $492 deductible—$92 higher than last year. As we all know, the mail will begin to flow and with good reason.

In a July study conducted by the Committee on Aging, we documented that the elderly are already spending more of their income today for health care than when Medicare and Medicaid began nearly 20 years ago. Even without this massive increase in the hospital deductible, the situation was going to get much worse. Even with a hospital deductible less than the $492, the elderly are projected to spend $2,583 for health care in 1990—nearly 19 percent of their income. This is substantially higher than the already excessive 15 percent they are paying today.

I believe that the vast majority of my colleagues agree that the elderly are already paying too much out of pocket for health care and that these increases in the hospital deductible and nursing home coinsurance are too much for the elderly to absorb. For this reason, I urge my colleagues to throw their support behind the Medicare Fair Hospital Deductible Act. Only if this legislation is passed quickly can the Congress protect America's elderly and disabled from being hit with the $92 increase starting in January.

I ask that the Medicare Fair Hospital Deductible Act text be printed in the RECORD.

H.R.3630

A bill to amend part A of title XVIII of the Social Security Act to limit the rate of increase in the inpatient hospital deductible and to change the extended care coinsurance amount and to amend the Internal Revenue Code of 1954 to increase by 8 cents per pack the excise taxes on cigarettes and to earmark revenues from the tax increase to the Federal Hospital Insurance Trust Fund

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This act may be cited as the "Medicare Fair Hospital Deductible Act".

SEC. 2. LIMITING RATE OF INCREASE OF PART A INPATIENT HOSPITAL DEDUCTIBLE AND NURSING HOME COINSURANCE.

(a) INPATIENT HOSPITAL DEDUCTIBLE.—Section 1813(b)(2) of the Social Security Act (42 U.S.C. 1395e(b)(2)) is amended—

(1) in the first sentence, by strking out "between July 1 and October 1 of 1968, and of each year thereafter" and inserting in lieu thereof "not later than November 15 of each year", and

(2) by amending the second sentence to read as follows: "Such inpatient hospital deductible shall be equal to the lesser of the following:

"(A) $45 multiplied by the ratio of (i) the current average per diem rate for inpatient hospital services for the calendar year preceding the promulgation, to (ii) the current average per diem rate for such services for 1966.

"(B) The inpatient hospital deductible for services furnished in the preceding year increased by the lesser of the following percentages:

"(i) The percentage increase (if any) as applies for purposes of DRG prospective payment rates under section 1886(b)(3) or 1886(e)(4) (whichever is applicable) to discharges in the fiscal year which begins on October 1 in the year of promulgation.

"(ii) The applicable increase percentage (relating to the annual cost-of-living increase in OASDI benefit payments) determined under section 215(i) in the year of promulgation.".

(b) EXTENDED CARE COINSURANCE AMOUNT.—

(1) APPLICATION BEGINNING ON 25TH DAY OF EXTENDED CARE SERVICES.—Section 1813(a)(3) of the Social Security Act (42 U.S.C. 1395e(a)(3)) is amended by striking out "20" and inserting in lieu thereof "25".

(2) REDUCTION TO ONE-TWELFTH OF HOSPITAL INSURANCE DEDUCTIBLE.—Such section is further amended—

(A) by striking out "one-eighth" and inserting in lieu thereof "one-twelfth", and

(B) by adding at the end the following new sentence: "Any amount determined under the preceding sentence which is not a multiple of $1 shall be rounded to the nearest multiple of $1 (or, if it is midway between two multiples of $1, to the next higher multiple of $1).".

(c) EFFECTIVE DATES.—

(1) IN GENERAL.—The amendments made by subsections (a) and (b) shall apply to—

(A) inpatient hospital services furnished during a spell of illness beginning on or after January 1, 1986,

(B) extended care services furnished on or after January 1, 1986, and

(C) monthly premiums under section 1818 of the Social Security Act for months beginning with January 1986.

(2) New determination of inpatient hospital deductible and extended care coinsurance amounts.—Within 15 days after the date of the enactment of this Act and taking into account the amendments made by this section, the Secretary of Health and Human Services shall redetermine and repromulgate the inpatient hospital deductible, and the extended care coinsurance amount, which will apply for purposes of section 1813(a) of the Social Security Act for inpatient hospital services and extended care services furnished during 1986 and the monthly premium that will apply for purposes of section 1818 of the Social Security Act for months in 1986.

SEC. 3. INCREASE IN FEDERAL EXCISE TAX ON CIGARETTES AND APPLICATION OF INCREASE TO FEDERAL HOSPITAL INSURANCE TRUST FUND.

(a) INCREASE IN CIGARETTE TAXES.—Section 5701 of the Internal Revenue Code of 1954 (relating to the imposition of tax on cigarettes) is amended—

(1) by adding at the end of subsection (b) the following new paragraph:

"(3) ADDITIONAL TAXES.—In addition to the rates under paragraphs (1) and (2) and subject to subsection (f)—

"(A) SMALL CIGARETTES.—On cigarettes, weighing not more than 3 pounds per thousand, $4 per thousand.

"(B) LARGE CIGARETTES.—On cigarettes, weighing more than 3 pounds per thousand, $8.40; except that, if more than 6½ inches in length, they shall be taxable at the rate prescribed for cigarettes weighing not more than 3 pounds per thousand, counting each 2¾ inches, or fraction thereof, of the length of each as one cigarette."; and

(2) by adding at the end thereof the following new subsection:

"(f) COST-OF-LIVING ADJUSTMENTS IN RATE OF ADDITIONAL TAX ON CIGARETTES.—

"(1) IN GENERAL.—In the case of cigarettes removed during a fiscal year after fiscal year 1986, subsection (b)(3) shall be applied by increasing each dollar amount contained therein by the cost-of-living adjustment for such fiscal year.

"(2) COST-OF-LIVING ADJUSTMENT.—For purposes of paragraph (1), the cost-of-living adjustment for any fiscal year is the percentage (if any) by which—

"(A) the CPI for the preceding fiscal year, exceeds

"(B) the CPI for fiscal year 1985.

"(3) CPI FOR FISCAL YEAR.—For purposes of paragraph (2), the CPI for any fiscal year is the average of the Consumer Price Index as of the close of the 12-month period ending on July 31 of such fiscal year.

"(4) DEFINITIONS.—For purposes of this subsection—

"(A) CONSUMER PRICE INDEX.—The term 'Consumer Price Index' means the last Consumer Price Index for all urban consumers published by the Department of Labor.

"(B) FISCAL YEAR.—The term 'fiscal year' means the 1-year period ending on September 30 of the calendar year to which such term relates.

"(5) ROUNDING.—Any increase under paragraph (1) shall be rounded to the nearest cent (or if such increase is a multiple of ½ cent, such increase shall be increased to the next highest multiple of 1 cent)."

(b) FLOOR STOCKS.—

(1) IMPOSITION OF TAX.—On cigarettes manufactured in or imported into the United States which are removed before November 15, 1985, and held on such date for sale by any person, there shall be imposed the following taxes:

(A) SMALL CIGARETTES.—On cigarettes, weighing not more than 3 pounds per thousand, $4 per thousand; and

(B) LARGE CIGARETTES.—On cigarettes, weighing more than 3 pounds per thousand, $8.40 per thousand; except that, if more than 6½ inches in length, they shall be taxable at the rate prescribed for cigarettes weighing not more than 3 pounds per thousand, counting each 2¾ inches, or fraction thereof, of the length of each as one cigarette.

(2) LIABILITY FOR TAX AND METHOD OF PAYMENT.—

(A) LIABILITY FOR TAX.—A person holding cigarettes on Novermber 15, 1985, to which any tax imposed by paragraph (1) applies shall be liable for such tax.

(B) METHOD OF PAYMENT.—The tax imposed by paragraph (1) shall be treated as a tax imposed under section 5701 of the Internal Revenue Code of 1954 and shall be due and payable on January 1, 1986, in the same manner as the tax imposed under such section is payable with respect to cigarettes removed on November 15, 1985.

(3) CIGARETTE.—For purposes of this subsection, the term "cigarette" shall have the meaning given to such term by subsection (b) of section 5702 of the Internal Revenue Code of 1954.

(4) EXCEPTION FOR RETAILERS.—The taxes imposed by paragraph (1) shall not apply to the cigarettes in retail stocks held on November 15, 1985, at the place where intended to be sold at retail.

(c) APPLICATION OF ADDITIONAL TAXES TO FEDERAL HOSPITAL INSURANCE TRUST FUND.—Section 1817(a) of the Social Security Act (42 U.S.C. 1395i(a)) is amended—

(1) by striking out "and" at the end of paragraph (1),

(2) by striking out the period at the end of paragraph (2) and inserting in lieu thereof "; and", and

(3) by inserting after paragraph (2) the following new paragraph:

"(3) the taxes imposed by section 5701(b)(3) of the Internal Revenue Code of 1954.".

(d) EFFECTIVE DATES.—

(1) TAX INCREASE.—The amendments made by subsection (a) shall apply to cigarettes removed after November 14, 1985.

(2) DEPOSIT OF INCREASE INTO TRUST FUND.—The amendments made by subsection (c) shall apply to taxes imposed on cigarettes removed after December 31, 1985.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, October 29, 1985, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

OCTOBER 30

9:00 a.m.

Armed Services

Strategic and Theater Nuclear Forces Subcommittee

To hold hearings on policy and technology objectives of the Strategic Defense Initiative (SDI) program.

SR-232A

9:30 a.m.

Banking, Housing, and Urban Affairs

International Finance and Monetary Policy Subcommittee

To hold hearings on S. 1763, to clarify U.S. negotiating goals in seeking to eliminate predatory concessional financing in the form of tied aid and partially untied aid credits.

SD-538

Environment and Public Works

To hold oversight hearings on the Department of Energy's high-level radioactive waste disposal program.

SD-406

Foreign Relations

To hold hearings to review United States policy toward the Philippines.

SD-419

Judiciary

Patents, Copyrights and Trademarks Subcommittee

To hold hearings on S. 1739, Home Audio Recording Act.

SD-562

Labor and Human Resources

Business meeting, to consider pending calendar business.

SD-430

Select on Intelligence

To hold closed hearings on intelligence matters.

SH-219

10:00 a.m.

Appropriations

Defense Subcommittee

Business meeting, to mark up proposed legislation appropriating funds for fiscal year 1986 for the Department of Defense.

SD-192

Judiciary

Criminal Law Subcommittee

To hold hearings on S. 440, Computer Systems Protection Act of 1985, and other computer fraud related measures.

SD-226

Select on Indian Affairs

Business meeting, to mark up S. 1684, to declare that the U.S. holds certain Chilocco Indian School lands in trust

for the Kaw, Otoe-Missouri, Ponca, and Tonkawa Indian Tribes of Oklahoma, S. 1728, to authorize the Cherokee Nation of Oklahoma to lease certain lands held in trust for up to ninety-nine years, S. 1298, to coordinate and expand services for the prevention, identification, and treatment of alcohol and drug abuse among Indian youth, S. 1621, to revise the Indian Education Act Amendments of 1978, by defining the eligibility of children who attend the Bureau of Indian Affairs funded schools, and S. 1396, to settle unresolved claims relating to certain a lotted Indian lands on the White Earth Indian Reservation in Minnesota.
SD-138

Conferees
On H.R. 3036, appropriating funds for fiscal year 1986 for the Department of the Treasury, U.S. Postal Service, Executive Office of the President, and certain independent agencies.
H-164, Capitol

11:00 a.m.
Labor and Human Resources
Children, Family, Drugs, and Alcoholism Subcommittee
To hold hearings on the effects of domestic violence.
SD-628

1:00 p.m.
Judiciary
Courts Subcommittee
Business meeting, to mark up S. 704, to establish an Intercircuit Panel of the United States Courts of Appeals to decide cases referred by the U.S. Supreme Court.
SD-226

2:00 p.m.
Judiciary
To hold hearings on pending nominations.
SD-226

3:30 p.m.
Select on Ethics
To meet in closed session to consider pending business.
SH-220

OCTOBER 31

9:30 a.m.
Agriculture, Nutrition, and Forestry
To hold hearings on the financial condition of the farm credit system, and to discuss possible legislative remedies.
SR-328A

Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold hearings on S. 240, to start daylight savings time on the first Sunday of March, and S. 1433, to start daylight savings time on the first Sunday of April and to end it on the first Sunday of November.
SR-253

*Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Foreign Relations
To hold hearings to review certain defense issues, focusing on nuclear strategy, ballistic missile defense, and arms control.
SD-419

Veterans' Affairs
Business meeting, to mark up S. 1788, to increase the rates of disability compensation for disabled veterans and the rates of dependency and indemnity compensation for surviving spouses and children of veterans.
SR-418

10:00 a.m.
Judiciary
Business meeting, on pending calendar business.
SD-226

Labor and Human Resources
Employment and Productivity Subcommittee
To resume hearings on the impact of trade on employment and productivity.
SD-430

2:00 p.m.
Appropriations
Business meeting, to mark up H.R. 3327, appropriating funds for fiscal year 1986 for military construction programs of the Department of Defense, and provisions of H.R. 3228, appropriating funds for fiscal year 1986 for foreign assistance and related programs.
SD-192

Joint Library
To hold a general business meeting.
H-328, Capitol

3:00 p.m.
Armed Services
Preparedness Subcommittee
To hold open and closed hearings on Department of Defense ammunition requirements, production base, and future directions.
SR-232A

4:00 p.m.
Select on Intelligence
Closed briefing on U.S. intelligence monitoring capabilities.
SH-219

NOVEMBER 1

9:15 a.m.
Commerce, Science, and Transportation
Surface Transportation Subcommittee
To hold oversight hearings on the implementation of the Staggers Rail Act (P.L. 96-448).
SR-253

9:30 a.m.
Agriculture, Nutrition, and Forestry
To continue hearings on the financial condition of the farm credit system, and to discuss possible legislative remedies.
SR-328A

Finance
Health Subcommittee
To hold hearings on S. 1551, to provide for administrative appeals and judicial review under Part B of Medicare, and to review the beneficiary and provider appeals provisions under Part A and B of the Medicare program.
SD-342

Joint Economic
To hold hearings on the employment/unemployment situation for October.
SD-342

NOVEMBER 4

9:30 a.m.
Commerce, Science, and Transportation
Surface Transportation Subcommittee
To resume oversight hearings on the implementation of the Staggers Rail Act (P.L. 96-448).
SR-253

Labor and Human Resources
To hold hearings on the impact of space technology on human resources.
SD-430

NOVEMBER 5

9:30 a.m.
Commerce, Science, and Transportation
Aviation Subcommittee
To hold oversight hearings on regional airlines.
SR-253

Rules and Administration
To hold hearings on proposed legislation to provide for public financing of Senate general election campaigns.
SR-301

10:00 a.m.
Appropriations
Business meeting, to mark up proposed legislation appropriating funds for fiscal year 1986 for the Department of Defense.
SD-192

NOVEMBER 6

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Environment and Public Works
Transportation Subcommittee
To hold hearings to examine problems associated with construction of Hawaii Interstate H-3, including parkland protection issues.
SD-406

Judiciary
Administrative Practice and Procedure Subcommittee
Courts Subcommittee
To hold joint hearings on farm bankruptcy.
SD-628

2:00 p.m.
Commerce, Science, and Transportation
Communications Subcommittee
Science, Technology, and Space Subcommittee
To hold joint hearings on the space world administrative radio (WARC).
SR-253

NOVEMBER 7

9:30 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold hearings on insurance and space commercialization.
SR-253

NOVEMBER 8

9:15 a.m.
Finance
Health Subcommittee
To hold hearings on a Department of Health and Human Services report on proposed reform of the Federal hospital insurance program (Medicare Part A) method of paying for capital costs.
SD-215

9:30 a.m.
Energy and Natural Resources
Natural Resources Development and Production Subcommittee
To hold hearings on S. 570, S. 372, S. 946, and S. 913, bills to improve the administration of the Federal coal leasing program, and other coal related issues.
SD-366

NOVEMBER 12

9:30 a.m.
Governmental Affairs
Permanent Subcommittee on Investigations
To resume hearings on espionage activities in the United States.
SD-342

10:00 a.m.
Labor and Human Resources
Employment and Productivity Subcommittee
To resume hearings on the impact of trade on employment and productivity.
SD-562

NOVEMBER 13

9:30 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold oversight hearings on LANDSAT commercialization.
SR-253
Labor and Human Resources
To hold hearings on nutrition and fitness in public health.
SD-430

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

NOVEMBER 14

9:30 a.m.
Commerce, Science, and Transportation
Business meeting, to consider pending calendar business.
SR-253
Governmental Affairs
Permanent Subcommittee on Investigations
To resume hearings on espionage activities in the United States.
SD-342
*Governmental Affairs
Intergovernmental Relations Subcommittee
To hold oversight hearings on regulatory activities of the Office of Management and Budget.
SD-562

10:00 a.m.
Energy and Natural Resources
To hold oversight hearings on the President's July 8, 1985 National Defense Stockpile "modernization" proposal and its potential impact on the domestic mining industry.
SD-366
Labor and Human Resources
Education, Arts, and Humanities Subcommittee
Business meeting, to mark up proposed legislation authorizing funds for programs of the Higher Education Act.
SD-430

NOVEMBER 15

10:00 a.m.
Environment and Public Works
Toxic Substances and Environmental Oversight Subcommittee
To resume oversight hearings on ground-water level and use and on ground-water quality and flow in the United States.
SD-406

NOVEMBER 18

9:15 a.m.
Finance
Health Subcommittee
To hold hearings on the Federal supplementary medical insurance program (Medicare Part B) payments for physician services, focusing on efforts by the Department of Health and Human Services and others to assess the current payment mechanism and develop reform options.
SD-215

NOVEMBER 19

9:30 a.m.
Energy and Natural Resources
To hold hearings on S.J. Res. 192, to authorize financial assistance for the Northern Mariana Islands.
SD-366

10:00 a.m.
Commerce, Science, and Transportation
Business, Trade, and Tourism Subcommittee
To hold hearings on the promotion of domestic tourism.
SD-253
Office of Technology Assessment
The Board, to meet to discuss pending business.
EF-100, Capitol

NOVEMBER 20

9:30 a.m.
Labor and Human Resources
To resume hearings to examine certain barriers to health care.
SD-430

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business
SD-366
Governmental Affairs
Energy, Nuclear Proliferation and Government Processes Subcommittee
To hold hearings on the 1985 Conferences on the Treaty on the Non-Proliferation of Nuclear Weapons and on the International Atomic Energy Agency.
SD-342

NOVEMBER 21

9:30 a.m.
Energy and Natural Resources
Energy Regulation and Conservation Subcommittee
To hold oversight hearings to review Federal Energy Regulatory Commission's Order 436, final rule and notice requesting supplemental comments on regulation of natural gas pipelines after partial wellhead decontrol (Docket No. RM 85-1-000).
SD-366

DECEMBER 3

10:00 a.m.
Labor and Human Resources
Children, Family, Drugs, and Alcoholism Subcommittee
To hold hearings on the issues of childcare, focusing on education, job training and the labor market.
SD-430

DECEMBER 10

10:00 a.m.
Environment and Public Works
Toxic Substances and Environmental Oversight Subcommittee
To hold oversight hearings on environmental effects of global atmospheric warmings.
SD-406

CANCELLATIONS

OCTOBER 31

10:00 a.m.
Small Business
To hold oversight hearings on activities of the Small Business Administration's Office of Veterans Affairs.
SR-428A

HOUSE OF REPRESENTATIVES—*Tuesday, October 29, 1985*

The House met at 12 o'clock noon.

Rev. Dr. H. Eugene Cotey, First Baptist Church, Murfreesboro, TN, offered the following prayer:

Eternal Father, strong to save
Hear us when we cry to Thee:
Hear us when our Nation sails through unchartered waters.
Hear us as we voice diverse and contradictory concerns about complex options and,
Hear us in the midst of indecision.
We pray for these representatives of the people as they come together in one body.
Give them common ground on which to stand.
Give them wisdom to find solutions to complicated problems,
Give them courage to act when fear might lead to inaction.
Give them a sense of mission when it is easier to be self-serving.
Dear God, hold our Nation and these men and women in the hollow of Thy hand,
In the name of Jesus Christ our Lord, I pray.
Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

DR. EUGENE COTEY

(Mr. GORDON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GORDON. Mr. Speaker, we had the privilege today of having Dr. Eugene Cotey provide the opening prayer.

Dr. Cotey has had a distinguished pastoral career, for almost 25 years, he has provided a wealth of practical and spiritual guidance to not only his congregation, but the entire community.

In addition to his duties as pastor of First Baptist Church of Murfreesboro, he has served as president of the Tennessee Baptist Convention and as a director of the Home Mission Board of the Southern Baptist Convention.

As a trustee of the Baptist Hospital of Nashville and Belmont College, he has used his administrative talents to minister to the sick, and to the young people of our area.

Dr. Cotey's greatest contribution has been his capacity to foster concern for our neighbors and the community as a whole.

I know that my colleagues join me in welcoming this fine American and his family to our Nation's Capital.

THE MORAL BANKRUPTCY OF THE NICARAGUAN REVOLUTION

(Mr. BROOMFIELD asked and was given permission to address the House for 1 minute.)

Mr. BROOMFIELD. Mr. Speaker, isn't America wonderful?

Where else could a poor, struggling revolutionary like Comandante Ortega, his country under siege by the United States, enjoy a millionaire's vacation in New York with his family.

Diner's Club and the American way made it all possible.

The picture of the little dictator from Managua emerging from a designer boutique with $3,500 worth of eyeglasses for himself and his family said it all.

After suspending the basic freedoms of his people and commanding the poor to tighten their belts another notch, he took his credit cards and left home without them.

In Nicaragua today, the rug has been pulled from under the free trade unions and opposition political parties; the popular Catholic Church is under siege; and the country has taken on the trappings of a police state.

Meanwhile, its tinpot dictator has taken off his military fatigues, donned designer clothes, and is gallivanting around New York enjoying all of the capitalistic pleasures he says he despises.

Better than words, his performance describes the moral bankruptcy of the Nicaraguan revolution.

HURRICANE JUAN

(Mr. TAUZIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TAUZIN. Mr. Speaker, today much of my district is below water as a result of Hurricane Juan. Unfortunately, the rains continue to fall and the waters continue to rise.

Since Sunday 1,400 people have been stranded in Grand Isle, LA. I've gotten reports of water as high as 14 feet in many areas.

The situation offshore is just as bad. This storm surprised and stranded thousands of offshore workers who risk their lives every day to help this country meet its energy needs. Vessels already offshore brought many of those to land, but waters were too rough to allow those vessels to go back to sea to evacuate others. High winds and waves toppled at least three rigs off of the Louisiana coast, forcing hundreds of workers into 15- to 20-foot seas. Some of them were holding to driftwood for as many as 16 hours before they could be rescued.

Mr. Speaker, our prayers and thoughts should be with the victims of Hurricane Juan as they try to rebuild their lives. But we should learn a valuable lesson too. We could have been better prepared.

We should stop referring to greatly needed public works projects as "pork" and realize that levees and flood control works could have saved lives and millions of dollars in damage to homes and businesses.

Second, we should pass legislation requiring standby vessels to provide more protection for our offshore workers in time of disaster.

One of my constituents summed it up quite well when she was interviewed by CNN this morning. She said, "I'm mad. I thought we had protection here." Well, I'm not sure how I will explain that that protection is caught up in petty fighting here, while she is underwater there.

UNITED STATES SHOULD HAVE TRADE RECIPROCITY WITH JAPAN

(Mr. McKINNEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McKINNEY. Well, Mr. Speaker, here we go, just as I have often said. Mr. Nakasone came to Washington last week. Mr. Nakasone went to Juneau and Mr. Nakasone is taking 6,000 barrels of Cook Inlet oil back to Japan, in violation of the intent if not the direct law of Congress. And, guess what. Just as I said 10 years ago, 8 years ago, and 6 years ago, it is going on Japanese ship bottoms, not American ship bottoms, therefore endangering more American jobs and endangering the Jones Shipbuilding Program.

Now, we are told this oil will be replaced by Mexican oil. Mexican oil is nowhere near as good as Cook Inlet oil. Cook Inlet oil is very pure. And I would suggest that everyone look at the Oil Daily of Thursday, October 24, which states that Mexico expects to raise the price of its Isthmus oil 50 cents to 75 cents.

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.
Boldface type indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

Mr. Speaker, when are we going to demand some sort of reciprocity from the Japanese before they take our oil, our ship jobs, and in fact we receive nothing in return?

INTERNATIONAL PHYSICIANS FOR THE PREVENTION OF NUCLEAR WAR

(Mrs. BOXER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BOXER. Mr. Speaker, amidst all the news of hijackings and terrorism and fear and hatred, we have a chance to celebrate a deserving organization dedicated to life and peace on this planet.

International Physicians for the Prevention of Nuclear War has won the Nobel Peace Prize and we should be uplifted by that achievement.

I work with this group in my community to bring an awareness to all our citizens—an awareness none of us had until groups like International Physicians began to flower.

The nuclear arms buildup was never voted on by the people of America or the Soviet Union. It happened because of a mutual mistrust, and faith that all new technology was an improvement—even new technologies that destroy. Weapons that kill the people but keep the building standing; weapons that have "hard-target" capability, thus presenting a first-strike threat. Such weapons escalate the chances of a nuclear war.

We don't want to think about it but these physicians made us think about it. And the first step to getting the arms race under control is to understand it. Thank you physicians for teaching us that as healers, even you, with all the medical advances at your disposal, cannot bring us back from a nuclear holocaust. And with that knowledge, we can begin to change the world.

YOUTH EMPLOYMENT OPPORTUNITY WAGE ACT OF 1985

(Mr. LIVINGSTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LIVINGSTON. Mr. Speaker, the problem of unemployment among our Nation's youth has reached tragic proportions. Last year, the jobless rate for our 16- to 19-year-olds was almost 19 percent, more than twice the national average. In my own State of Louisiana, which has the second highest unemployment in the country, the problem is even worse. Projected teenage unemployment for 1986 is 23.5 percent, and for minority youth, almost 40 percent.

The answer to this problem is H.R. 1811, the Youth Employment Opportunity Wage Act of 1985. By creating a subminimum wage for youth during the summer months, this legislation will significantly reduce minority unemployment and generate up to a half a million new jobs for teenagers in the private sector.

Unfortunately, this bill has been stalled in committee for months and has never received a hearing.

It is time for the Democratic leadership to get serious about this problem and to allow the bill out of committee and onto the floor for debate. It is time to quit stifling a proposal that will give thousands of citizens their first valuable work experience.

The Federal minimum wage discriminates against teenagers and minorities. These people lack jobs because they lack basic job skills. Employers simply cannot afford to train them at $3.35 per hour, and every time the minimum wage rises, their opportunities for employment are reduced.

If opponents of this bill have a better solution, I'm ready to listen. So far, I haven't heard one, and I believe it is time to give H.R. 1811 a chance.

THIS AUTUMN OF DISCONTENT

(Mr. JACOBS asked and was given permission to address the House for 1 minute.)

Mr. JACOBS. Mr. Speaker, in this autumn of discontent it seems reasonable to remember that perfect self-government of imperfect people is not likely. Or as my father puts it, "You can't dip clear water from a muddy stream."

Yet for those thoughtful Members of Congress who feel the frustration of the follies of this time and place, there is this encouraging thought from the late statesman, Henry Stimson:

> Let them not turn aside from what they must do, or think that criticism excuses inaction. For there is good as well as evil. And for the person who works for a goal, believing in its eventual attainment, while there may be setback and even disaster, there will never be defeat. The only deadly sin I know is cynicism.

DON'T GET DUPED AGAIN: VOTE "NO" ON CHEMICAL WEAPONS FUNDING

(Mr. PORTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PORTER. Mr. Speaker, last week, in a closed, top secret markup, the Appropriations Committee voted to eliminate all funding for new chemical weapons.

In a session that included a full discussion of the Soviet threat, the status of our own stockpile and the miserable performance of the new Bigeye bomb, the committee voted to delete the money the Pentagon requested for these weapons.

Many Appropriations Committee members who originally supported the tentative authorization in June felt sold out when the authorizing committee gutted the strict conditions on funding for new chemical weapons. They realized that there is only one reason to include money for chemical weapons in the fiscal year 1986 appropriations bill and that is to gut the conditions on funding just like they were in the authorizing conference and spend the money this year.

The Appropriations Committee did the right thing in rejecting new chemical weapons funding, but some say: "Never mind the deficit, never mind the GAO recommendations not to fund the Bigeye bomb, never mind our NATO allies who will not accept them, just spend the money."

Mr. Speaker, that is the same kind of thinking that got us into this deficit mess in the first place. Let's not make it worse.

SOCIAL SECURITY TRUST FUND

(Mr. CHAPMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CHAPMAN. Mr. Speaker, the administration, in order to force action on the debt ceiling, is once again using Social Security as a pawn in their game.

First, earlier this month when Social Security taxes were received by the Government, the Department of the Treasury was unable to purchase Government securities for the Social Security trust fund, because their purchase would have punctured the debt ceiling.

Second, for the first time in U.S. history, the administration has not placed Social Security taxes into the Social Security trust fund. On Friday, again for the first time, the administration threatens to accelerate disinvestment of the trust fund.

Third, other options exist and should be explored by the administration, whether it be the Federal financing bank or any other method available. Instead, this administration again attacks Social Security first.

Fourth, having taken the money that should have gone to Social Security, this administration is obligated to find a method to repay the principal and interest lost to Social Security, a program with a surplus that is paying its own way.

This theft from Social Security cannot be condoned. Yes; we need a balanced budget. No; we need not terrify Social Security recipients in order to achieve it.

□ 1215

CHILD SAFETY DAY

(Mr. MONSON asked and was given permission to address the House for 1 minute.)

Mr. MONSON. Mr. Speaker, child safety continues to be an important concern for people in the United States. When 1½ million children disappear as they did last year, it is something that we all need to pay more attention to.

Last Saturday, in the district that I represent, a child safety day was held. This provided parents an opportunity to do something that would bring about more peace of mind regarding this issue by giving them an educational opportunity to teach their children and find ways they can better protect their children. It also provided identification materials to the parents that will help identify their children if an emergency situation arises.

I want to thank the law enforcement officials that provided the materials and technical assistance for this child safety day which we sponsored. I want to commend those parents who waited in line up to 2 hours to take advantage of this educational opportunity and to obtain these materials for their children in the event that an unfortunate situation requires it. All responses indicated that the time involved was not nearly as important as the protection of their children.

We obviously hope that no event will occur that will require the use of these materials and training, but in the event that it does, these almost 2,500 children are now better prepared to handle such a situation and their parents will rest a little easier. Many people deserve thanks for the work that was done last Saturday in the Second Congressional District of Utah and I sincerely and wholeheartedly say thank you to them.

NO EXPORT OF COOK INLET OIL

(Mr. MANTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MANTON. Mr. Speaker, yesterday's Wall Street Journal contained an article stating that President Reagan has told Japanese officials he is considering allowing the export of domestic oil produced in Alaska's Cook Inlet.

Congress recently renewed the Export Administration Act by a wide margin. In that bill, both Houses strongly agreed that it is in our national interest to prohibit the export of crude oil from Alaska's North Slope. That oil is critical to our Nation's energy independence and to our domestic maritime industry, which transports the oil to refineries in California and the gulf coast.

Even though less oil is produced in Cook Inlet than at Prudhoe Bay, the same national interests apply. The United States needs the 6,000 barrels produced there daily. But more importantly our maritime industry, which already is struggling to survive against unfair foreign competition, cannot afford to have the door opened for the export of Alaskan oil.

If the export of Cook Inlet oil is approved today, Alaskan North Slope crude will be under siege tomorrow. If we are serious about keeping our domestic maritime industry alive, we must not let that happen.

THE PRESIDENT'S VETO OF RUNAWAY SPENDING BILLS HAS HOUSE BACKING

(Mr. DORNAN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORNAN of California. Mr. Speaker, yesterday those of us who belong to one of the informal caucuses around this legislative body called the Grace caucus, named after Mr. Peter Grace who made the most extensive analysis of Government waste in the history of this country, yesterday we met in the Rose Garden of the White House with the President, and the President's remarks were stirring about the time is now at hand when the American people are disgusted with the amount of spending in this country and the refusal of this Congress to match the promise it made to the President in his first term that if he raised taxes over $90 billion, we could cut $3 for every $1 that the President took or added to our budget.

Mr. Speaker, I am looking at the status of our appropriations bills that is given to us daily in our calendars of the U.S. House of Representatives, and we are way behind schedule, Mr. President. We have gotten 1 of our 13 appropriations bills through conference: energy and water. Only 2 more have been reported to conference with the help of the other body, and that leaves 10 bills, particularly our defense and military construction bills on which there is barely any action at all.

Eight of these bills will be over the request of the administration. I gave to Peter Grace to put into the President's hands yesterday a letter I circulated here in July with one-third of the Members of this body signing it, and a buffer of two more, in case one of us gets ill. That is 147 signatures which make our President a 9,000-pound gorilla, Mr. Speaker. Our President is now veto proof.

Whatever the President vetos on these appropriation bills to hold down spending, a third of the Members of this House plus two have promised to back him up in these vetos.

Mr. President, get busy with your pen and cut the cost of runaway Federal spending.

GRAMM-RUDMAN: TRICK OR TREAT?

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. With all of his talk about cutting spending, the President now wants Congress to approve his $2 trillion national debt. Mr. Reagan disguises his debt increase by supporting the Gramm-Rudman proposal—clearly a trick, not a treat. In fact, Gramm-Rudman might win the prize for the best Halloween hoax of 1985.

Even the Secretary of Defense is horrified by the irresponsible manner in which Gramm-Rudman would attack Federal spending and threaten national security. Members of Congress are likewise outraged because the Gramm-Rudman proposal would postpone the pain of deficit reduction until after next year's elections.

Mr. Speaker, the American people should not be misled by the President's Halloween disguise. Gramm-Rudman is no treat; it is poisoned candy by which the President and his party hope to deceive the voters of America just long enough to let them off the hook for one more election.

Mr. Speaker, what the American people want is not another Reagan trick. What they want is a Presidential treat; a serious consideration of the budget problem.

THE PENN STATE HEART

(Mr. GEKAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GEKAS. Mr. Speaker, the Penn State Heart has done its job. I am not talking about the exploits of the Penn State football team; I am talking about the extraordinary success that the Hershey Medical Center in Pennsylvania has fashioned with the temporary implant, the plastic implant, imbedded into the chest of a Philadelphia man who was dying of heart disease.

The temporary implant was placed in the chest and then the search for a human heart began; for a permanent transplant. For 11 days nothing occurred because a proper transplant could not be obtained. Throughout that time, that temporary, plastic Penn State Heart pounded away and did its job, and then when a human heart was finally brought onto the scene and the temporary implant re-

moved, a chance for life has now been given to this man from Philadelphia.

The miracle of it is not only has this man now emerged into the world of the living, as it were, but this temporary implant has shown no evidence at all of any damage done or any imperfection. No blood clotting. It has worked. Good luck to a future recipient of the Penn State Heart.

VIVA ITALY! VIVA PIZZOLATO!

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BIAGGI. Mr. Speaker, I proudly rise today to pay tribute to an extraordinary athlete for a magnificent athletic achievement. Orlando Pizzolato, a gifted, disciplined, and determined runner from Italy captured the grueling 26.2-mile New York City Marathon this past Sunday, his second consecutive New York City Marathon victory.

One had to be as fortunate as I to watch the marathon to fully appreciate the Pizzolato victory. Consider at the 13-mile mark, Pizzolato was trailing the leaders by almost 2 minutes. At the 14-mile mark he was still in 20th place. At the 17-mile mark he was in 10th place. Yet never doubting his strategy or ability, Pizzolato began to make up the final places methodically until he moved into second place at the 20-mile mark. From this point on, he ran his best. As he entered the hills in beautiful Central Park with some 2 miles to go he made his final move. He moved left then right but kept narrowing the gap on leader Ahmed Saleh. As he hit the longest hill he passed Saleh. As he said later, "I could see he was in big trouble. I tried to go by him several times and he followed me. So I put all my energy into the last hill. I thought that might be my last chance."

From that point on there was no stopping him. He finished the race in 2 hours 11 minutes and 34 seconds, a full 54 seconds ahead of Saleh. What a marvelous race he ran! What a thrill he provided to the viewing audience! What pride he brought to Italy and the Italian-American community! All one can say is what a wonderful inspiration to all Americans.

Viva Italy! Viva Pizzolato!

THE WORLD CHAMPION KANSAS CITY ROYALS—THE TEAM THAT NEVER QUIT

(Mr. COLEMAN of Missouri asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COLEMAN of Missouri. Mr. Speaker, I rise today to congratulate the world champion Kansas City Royals on their World Series victory over the St. Louis Cardinals this last weekend.

The Kansas City Royals of 1985 is a team that would not quit. They would never give up. Even though they were the underdogs in the Western Division of the American League, they won the division. Upon entering the playoffs, again they were the underdogs and were down three games to one to the Toronto Blue Jays. They had to win the playoffs in Toronto, a feat that no one said could be done.

Then, going into the World Series against the St. Louis Cardinals, they lost the first two games at home. They went to St. Louis and won two games but were down three games to one at one point. They came back to Kansas City and then, in the very important sixth game, with one more inning left to play, the Royals became the miracle workers of 1985. Down 1–0 in the ninth inning, pinchhitter Dane Iorg got a hit with the bases loaded to drive in the winning two runs. The frosting on the cake, was an 11–0 victory over the Cardinals Sunday night clinching the series. In doing so, the Royals made baseball history, the only team ever to win the World Series after losing the first two games at home.

I want to congratulate the owners of the Kansas City Royals, Mr. and Mrs. Ewing Kauffman and Mr. Avron Fogelman, as well as all the players and manager, Dick Howser. I would extend special congratulations to George Brett, our outstanding third baseman, to Bret Saberhagen, who was named the most valuable player of the World Series, to Frank White, our golden glove second baseman, and to Hal McRae, who, while not seeing much action in this series, was the spirit and the glue that held the team together over this year.

Mr. Speaker, it has been 30 years since Kansas City has had major league baseball. While the Athletics played in Kansas City suffered a great many indignities, including Charlie Finley, through those years. It took us 30 years to win the World Series. We were very happy to have a parade and a celebration in which 250,000 Kansas Citians—and there are only 1 million people in the entire metropolitan area—came to pay tribute to a team that endeared itself to all America.

We will never forget the 1985 Royals. As ABC said last night on its conclusion to the coverage of the World Series, "It could not happen to a nicer team and it could not happen to a nicer town."

SEMICONDUCTER INDUSTRY THREATENED: SILICON VALLEY MAY BECOME A "DEATH VALLEY"

(Mr. LEVIN of Michigan asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEVIN of Michigan. Mr. Speaker, I was reading the New York Times this morning, and it carried a really disconcerting report on another piece of American industry. It described how the United States is about to lose an important chunk of the semiconductor industry, the standard memory chip that stores data in everything from computers to video cassette recorders. It pointed out the fact that with the loss of that production, there is a threat to the entire electronics industry of the United States. In other words, is there a danger that Silicon Valley can become an economic "Death Valley"?

The administration's response to the eroding manufacturing base in the United States has so far been essentially zero. Whenever there has been action, it has not been to take constructive action or to take the offensive, but it really has been a defensive measure to try to hem in action by the Congress.

I think we are learning that it is not inevitable that America will always land on its feet economically. This is shown in the report in the Times this morning about the semiconductor industry.

Mr. Speaker, it is time for us to wake up. It is time for us to put our heads together. It is time for us to act or otherwise one industry after another is going to leave the shores of America.

BALANCED BUDGET AND EMERGENCY DEFICIT CONTROL ACT OF 1985

(Mr. LAGOMARSINO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LAGOMARSINO. Mr. Speaker, there are many, too many, in this House who are simply all talk and no action when it come to dealing with the deficit. Even though 59 percent of Americans rate reducing the deficit as the No. 1 job facing this body and 67 percent of the Nation believe that the fault lies with the Congress, many of my liberal colleagues have simply not acted in a meaningful way to reduce the deficit. They have opposed the balanced budget amendment, the line-item veto, cost cutting reommendations of the Grace Commission, amendments to appropriation bills to cut spending and other measures intended to reduce deficits.

In 1974 Congress enacted the Congressional Budget Act. Now no one can really say this has resulted in any better control of the budget than we had before. Although Congress has the power and authority to balance the budget, it presently does not have the obligation or discipline to do it.

Recently, a majority of both Republicans and Democrats in the other body voted in favor of the Gramm-Rudman amendment. With more than 150 cosponsors in the House I urge my colleagues to begin showing some fiscal responsibility and support this reasonable and responsible measure.

PROPOSED LEGISLATION TO DEPOLITICIZE SOCIAL SECURITY

(Mr. BONER of Tennessee asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BONER of Tennessee. Mr. Speaker, for quite a while now, there has been talk that we should take Social Security out of the political arena and insure its safety as a continuing source of income for retirees and disabled. There is evidence to support this.

There have been nine Commissioners in the past 12 years. There have been several branch office closings and the attrition of 17,000 employees. Under new legislation that I support, H.R. 3470, the agency would be headed by a three member, bipartisan Board, appointed by the President with the consent of the Senate.

The other half of this proposal would be to separate Social Security from the unified budget and give a clearer picture of the continuing deficit problem. Since 1967, the Social Security trust funds have been in the unified budget—in the displays of overall levels of Federal spending and taxing. The deception starts taking place when the surpluses accumulated each year in Social Security revenues lead to a reduction of the Federal deficit.

This self-sufficient fund takes no appropriated money from the budget, but is being used as a smoke screen to artificially hold down the deficit problem. By taking Social Security out of the unified budget, we will get a much clearer, truer picture of the deficit problem.

The time is now to remove Social Security once and for all from those who use it for political gain.

INTEGRAL VISTAS

(Mr. HANSEN asked and was given permission to address the House for 1 minute.)

Mr. HANSEN. Mr. Speaker, when Barbra Streisand sings "On a Clear Day You Can See Forever," she must be singing about the beautiful scenery in Utah and the mountain West. Because of the clean, dry air in the West you can literally see for hundreds of miles from many mountaintop lookout points.

But several of these lookout points are in national parks, and many people are concerned that economic development and the accompanying pollution in areas that can be seen from the parks should be severely restricted and that these "integral vistas" should be precisely defined.

Last week, Interior Department Secretary Don Hodel made a courageous decision not to formally identify these "integral vistas." The EPA had given him that power in the last month of the Carter administration.

I believe we should protect the beautiful scenery in and around our national parks, but the Federal and State governments already have the authority and programs to address visibility concerns in the parks.

The final identification of integral vistas would have added unnecessary regulations that would have only harmed local economies without benefiting the environment.

In light of the intense emotions surrounding this issue, I appreciate and congratulate Secretary Hodel for his wise and prudent decision.

□ 1235

CONGRATULATIONS TO KANSAS CITY ROYALS

(Mr. SLATTERY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SLATTERY. Mr. Speaker, on behalf of all the loyal Royals fans in Kansas, I rise to join my colleague from Missouri in congratulating the Kansas City Royals.

The Kansas City Royals did what all the experts said they could not do, they came from behind to win the western division in the American League, they came from behind to win the American League pennant, and they came from behind to win the World Series.

Mr. Speaker, the Kansas City Royals are world champions, and all the loyal fans in Kansas and in Missouri could not be prouder. I congratulate the Royals players, manager Dick Howser, their coaches and their owners.

And as a prominent sports writer observed, whether the Kansas City Royals are the best team in baseball is a matter of definition, that they represent what is best in baseball is beyond doubt. That, in my judgment, is far more important.

LET US GET FEDERAL SPENDING UNDER CONTROL

(Mr. PACKARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PACKARD. Mr. Speaker, I rise to respond to the gentleman from Arkansas who claimed that the President is just using Gramm-Rudman as another trick in an effort to reduce the deficit.

Every effort that this body has made to reduce deficits and every effort the President has made to reduce deficits have been repudiated by the liberal majority of this body by the use of their numbers and, short of raising taxes, they have given no alternatives.

Mr. Speaker, I am proud to stand here in support of the Gramm-Rudman-Mack-Cheney prosposal to eliminate the Federal deficit. The people of the United States have made their voice heard—they are demanding that Congress get Federal spending under control. Gramm-Rudman-Mack-Cheney does the job.

The plan is simple. In the next 6 fiscal years, the deficit will be reduced from $180 billion to zero—in $36 billion annual increments.

The plan is flexible. The President and Congress may devise alternative plans to eliminate spending in excess of the straightline schedule.

The plan is fair. It provides a backup sequestering process that makes uniform, across-the-board spending cuts.

The plan is necessary. It is a realistic approach to eliminating our run-away Federal deficit.

Mr. Speaker, this Congress has no choice but to reduce excessive Government spending. The Gramm-Rudman-Mack-Cheney proposal does the job with simplicity, flexibility, and fairness. I hope it passes and that Congress has the commitment to abide by its provisions.

REMEMBER THE SIX HOSTAGES IN LEBANON

(Mr. MINETA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MINETA. Mr. Speaker, I rise once again to remind my colleagues that six Americans are languishing in captivity in Lebanon.

This hostage drama has gone on for more than a year, and it is time for this administration to use its energy and its wisdom to bring this tragedy to an end.

I am pleased and heartened by reports that President Reagan met with the hostages' families yesterday; and that those families were heartened by being able to meet with Mr. Reagan.

These families have suffered for months. During that time, they have endured not only the fear and concern that naturally comes with having a loved one held hostage, but they have also been forced to bear that burden in isolation.

Mr. Speaker, the hostage families have asked me and other Members if we believe the Government is doing everything it can to bring their loved ones home.

Until now, I have answered that I did not believe everything that could

be done was being done. Perhaps now that President Reagan has become personally involved we will soon see all of the hostages reunited with their families.

DECREASING EXCISE TAX ON CIGARETTES MAKES NO SENSE

(Mr. BOEHLERT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BOEHLERT. Mr. Speaker, I keep reading and hearing reports that "White House sources" and "those close to the Oval Office" are urging a Presidential veto of the proposal to maintain the excise tax on cigarettes at the present level of 16 cents a pack.

I hope what I am reading and hearing is wrong. If a veto comes, the excise tax on cigarettes will drop from 16 to 8 cents a pack.

Does it make sense to permit a 50-percent reduction in excise tax on cigarettes at a time when we are in the process of increasing the national debt to $2 trillion? We are spending $360 million a day—$15 million an hour—just on interest on the national debt.

Now, you might say that 8 cents a pack excise tax on cigarettes is no big deal. If you say that, you are wrong. Every one penny in excise tax brings in $212 million. Multiply that by eight and you come up with $1.7 billion. That is more than the entire budget of the National Science Foundation. That is money the Treasury needs.

Do not follow the advice of nameless advisors, Mr. President. A veto of the excise tax on cigarettes would not be good for America.

MARITIME ADMINISTRATION PROPOSES TO ALTER ITS "BUY AMERICA" POLICY

(Mrs. BENTLEY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BENTLEY. Mr. Speaker, I have just learned of a proposed regulation by the Maritime Administration to alter its "Buy America" policy by adopting a less restrictive policy with regard to title XI's financing requirements.

The original purpose of title XI, mortgage guarantee, was to beef up construction in American shipyards and thus provide more American jobs. By protecting American business and domestic economy, we ensured our industrial base for defense mobilization purposes and enabled our industries to be self-sustaining.

MarAd's reasoning for relaxing the "Buy America" requirements is the shrinking domestic and marine supplier industry. According to MarAd, the reduced number of U.S. built commercial vessels has not provided a sufficient market to make it profitable for certain domestic companies to engage in the development and manufacture of various types of marine equipment, that is, slow-speed marine diesel engines, lifeboat engines.

This less restrictive material purchasing regulation could have an annual effect on the economy of hundreds of millions of dollars and have significant adverse effects on the ability of the remaining domestic suppliers to compete with foreigners in the U.S. marine equipment market.

Therefore, I think it imperative that we voice our opposition to MarAd's proposed rulemaking and encourage MarAd to look into the possibility of more research and development in the marine equipment manufacturing area in order to enhance the competitive posture of our domestic shipbuilding industry.

SIGN DISCHARGE PETITION NO. 1

(Mr. COBEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COBEY. Mr. Speaker, on March 5, 1984, the Supreme Court ruled that a Nativity scene in Pawtucket, RI, could be displayed on State property if there was a "legitimate secular purpose" for this display.

In other words, displaying anything nonsecular on State property would be a violation of the first amendment.

Perhaps this line of reasoning could have some validity were it not for the fact that "secularism" is today a vast and growing religion—a nontheistic religion, but a religion, nonetheless.

In the Court's attempt to take a neutral position toward theistic beliefs in cases such as Wallace versus Jaffree, it has swung the pendulum wholly to the side of the secular humanists.

And it has done this, I might add, in the face of the fact that 97 percent of the people in this country claim to have some belief in God. The Court has turned its back on the God who has blessed our country and our Nation so richly and it has done this under the false pretense of neutrality.

The prayer issue is only one manifestation of this, but it is an issue that we must take out of the Court's hands. We can do this by passing a constitutional amendment providing for voluntary prayer in schools.

Mr. Speaker, I urge my colleagues to sign discharge petition No. 1 and get this matter to the floor and let us put it behind us and have voluntary prayer back in the schools.

IMAGES FROM HALLOWEEN

(Mr. LUNGREN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUNGREN. Mr. Speaker, a few minutes ago I was sitting in my office watching the 1-minute speeches when I had an opportunity to watch the distinguished, I guess, chief deputy whip of the Democratic side, the gentleman from Arkansas [Mr. ALEXANDER] come forward and criticize the President for the Reagan deficit. He used some nice language, talking about images from Halloween.

Well, I have here the—one, two, three, four, five, six latest ratings from the National Taxpayers Union where they rate all Members of Congress on spending. I thought just to see who was playing trick and who was playing treat, we might take a look at that and see how the gentleman from Arkansas [Mr. ALEXANDER] stacks up.

And was I disappointed to find out that he is listed in the big spender category in every single year. As a matter of fact, in the last 2 years he was in the zero percentile and the No. 1 percentile in terms of those who were attempting to reduce spending.

In other words, he could not find any opportunities to do so.

I think it is just strange that we just sit here and talk about the Reagan deficit, then nothing gets to the President unless we pass it.

The gentleman from Arkansas has shown the way for the big spenders.

Perhaps the old saying that "consistency is the hobgoblin of small minds" is what the gentleman from Arkansas has in mind, but maybe in the Halloween spirit he might try to be a hobgoblin, at least a couple times and find some consistency about his enunciations on spending and the votes that he casts on the floor of the House.

COMMENDING INTERIOR SECRETARY HODEL FOR KILLING PLAN TO LIMIT STATE CONTROL OF DEVELOPMENT AROUND NATIONAL PARKS

(Mr. NIELSON of Utah asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. NIELSON of Utah. Mr. Speaker, I commend Secretary of the Interior Don Hodel for killing a plan that would have limited State control of development on picturesque scenery surrounding national parks. Utah has five national parks with over 1 million acres and had the Secretary not made the decision he made, the entire eastern and southern part of our State would have been effectively precluded from any further development of its coal, synthetic fuels and uranium resources, not to mention its other economic activities.

Governor Bangerter said he was very pleased, and may I quote:

51-059 O-87-27 (Pt. 21)

Gov. Norm Bangerter said he was pleased the state will be given responsibility for protecting areas around the park and that he thinks the state can better meet the protective goals. He opposed the plan partly on a state's rights platform. I think we have enough guidelines from the federal government. I believe in the West controlling its own destiny, he said.

The Governor goes on:

One outcome of the failed federal plan is that the 17 targeted areas in Utah will receive "special attention," the governor said. They include views around Arches, Bryce Canyon, Canyonlands, Capitol Reef and Zion national parks.

As Congressman HANSEN said earlier, you can see a long way from those parks. In fact, the entire Kaiparowits Plateau was precluded from development a number of years ago because from 80 miles north in Bryce Canyon you can see where the coal mines might be developed.

So I commend Secretary Hodel for a very courageous decision, one that is absolutely necessary for the development of the West.

TIME FOR DEMOCRATIC LEADERSHIP TO ALLOW A VOTE ON GRAMM-MACK PROPOSAL TO REDUCE DEFICITS

(Mr. WALKER asked and was given permission to address the House for 1 minute.)

Mr. WALKER. Mr. Speaker, it is time for the Democratic leadership of this House to allow us to vote on the Gramm-Mack proposal to reduce deficits.

It is time for that vote to take place in this body. It is time for the American people to find out where their Member of Congress stands on the issue of reducing the deficit.

If the Democrats have an alternative, they ought to bring forth that alternative. If they do not have an alternative, they ought to give us a chance to vote. It is a chance the American people have been waiting for, a chance to reduce the deficit. Let us have that chance in the House of Representatives. Let us have it soon.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The PRESIDENT pro tempore (Mr. MONTGOMERY). Pursuant to the provisions of clause 5 of rule I, the Chair announces that he will postpone further proceedings today on both motions to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such rollcall votes, if postponed, will take place after all other legislative business today.

RESTITUTION AMENDMENTS ACT OF 1985

Mr. CONYERS. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2713) to amend title 18, United States Code, to modify certain provisions pertaining to restitution, and for other purposes, as amended.

The Clerk read as follows:

H.R. 2713

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Restitution Amendments Act of 1985".

SEC. 2. POWER TO ORDER RESTITUTION IN LIEU OF OTHER SENTENCES.

(a) SECTION 3579 AMENDMENT.—Section 3579(a)(1) of title 18, United States Code, is amended by inserting ", in the case of any misdemeanor or a class E felony," after "in addition to or".

(b) SECTION 3556 AMENDMENT.—Section 3556 of title 18, United States Code, as amended by the Sentencing Reform Act of 1984, is amended by striking out "under this title" and all that follows through the end of such section and inserting in lieu thereof "may order restitution in accordance with sections 3663 and 3664.".

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on the date of the taking effect of section 212(a)(2) of the Sentencing Reform Act of 1984.

SEC. 3. STANDARDS FOR IMPOSITION OF RESTITUTION.

(a) IN GENERAL.—Subsection (d) of section 3579 of title 18, United States Code, is amended to read as follows:

"(d) To the extent that the court determines that the complication and prolongation of the sentencing process resulting from the fashioning of an order of restitution under this section outweighs the need to provide restitution to any victims, the court may decline to make such an order.".

(b) EFFECTIVE DATE.—The amendment made by this section shall take effect on the 30th day after the date of the enactment of this Act.

SEC. 4. STATEMENT OF REASONS RELATING TO RESTITUTION.

(a) IN GENERAL.—Section 3553(c) of title 18, United States Code, is amended by inserting "or the court orders only partial restitution," after "restitution,".

(b) CONFORMING AMENDMENT.—Section 3579(a) of title 18, United States Code, is amended—

(1) by striking out "(1)" where it appears after "(a)"; and

(2) by striking out paragraph (2).

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on the date of the taking effect of section 212(a)(2) of the Sentencing Reform Act of 1984.

SEC. 5. ENFORCEMENT OF RESTITUTION ORDER.

(a) IN GENERAL.—Subsection (h) of section 3579 of title 18, United States Code, is amended by striking out "or" and inserting in lieu thereof "in the manner provided for the collection of fines and penalties by section 3565 or by".

(b) EFFECTIVE DATE.—The amendment made by this section shall take effect on the 30th day after the date of the enactment of this Act.

SEC. 6. CLARIFYING AMENDMENT.

(a) IN GENERAL.—Section 3579(a)(1) of title 18, United States Code, is amended by striking out "the offense" and inserting in lieu thereof "such offense".

(b) EFFECTIVE DATE.—The amendment made by this section shall take effect on the date of the enactment of this Act.

SEC. 7. PRESENTENCE PROCEDURE RELATING TO RESTITUTION.

(a) IN GENERAL.—Section 3553(d) of title 18, United States Code, is amended—

(1) by striking out "OR RESTITUTION" in the subsection heading; and

(2) by striking out "or an order of restitution pursuant to section 3556,".

(b) EFFECTIVE DATE.—The amendments made by this section shall take effect on the date of the taking effect of section 212(a)(2) of the Sentencing Reform Act of 1984.

SEC. 8. NEED FOR RESTITUTION TO BE CONSIDERED AS FACTOR IN SENTENCING.

(a) IN GENERAL.—Section 3553(a) of title 18, United States Code, is amended—

(1) by striking out "and" at the end of paragraph (5);

(2) by striking out the period at the end of paragraph (6) and inserting "; and" in lieu thereof; and

(3) by adding at the end the following new paragraph:

"(7) the need to provide restitution to any victims of the offense.".

(b) EFFECTIVE DATE.—The amendments made by this section shall take effect on the date of the taking effect of section 212(a)(2) of the Sentencing Reform Act of 1984.

The SPEAKER pro tempore. Is a second demanded?

Mr. GEKAS. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Michigan [Mr. CONYERS] will be recognized for 20 minutes and the gentleman from Pennsylvania [Mr. GEKAS] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Michigan [Mr. CONYERS].

□ 1250

Mr. CONYERS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 2713 was reported from committee without dissent. It has two purposes—to make technical amendments to the restitution provisions of current law and the recently enacted Sentencing Reform Act, and to state explicitly that restitution to victims is a purpose of sentencing.

Under current Federal law restitution to crime victims is in fact a purpose of sentencing. There is a presumption in favor of ordering restitution. The Sentencing Reform Act, however, does not mention restitution when setting forth several purposes sought in the sentencing of Federal criminal offenders. Section 8 of H.R. 2713 would simply amend the Sentencing Reform Act to state explicitly that restitution to the victim is one of the purposes of sentencing. This will bring the Sentencing Reform Act into line with current Federal law.

H.R. 2713 also resolves an inconsistency in the Sentencing Reform Act concerning when restitution can be ordered. One provision of the Sentencing Reform Act, which carries forward a section enacted by the Victim and Witness Protection Act of 1982, authorizes the court to order restitution in addition to or in lieu of any other penalty. A second provision of the Sentencing Reform Act refers to ordering restitution in addition to any other penalty but is silent about "in lieu of."

The legislative history of the Sentencing Reform Act sheds little or no light about why the two provisions are not identically worded.

However, because they are not worded the same, there is doubt or may be doubt about which language controls. H.R. 2713 clarifies the ambiguity. Section 2 of the bill provides that for misdemeanors and felonies carrying a maximum prison term of 2 years or less, the sentencing court can impose restitution in lieu of any other punishment. For other offenses, restitution can be imposed in addition to other punishment. The other punishment could be probation, for example.

Mr. Speaker, the changes made by H.R. 2713 are spelled out in detail in the committee report. They are all desirable changes. The bill has bipartisan support, and was drafted in close cooperation with the subcommittee's ranking minority member, the gentleman from Pennsylvania [Mr. GEKAS]. I urge my colleagues to support the bill.

Mr. Speaker, I now yield such time as he may consume to my colleague, the gentleman from Virginia [Mr. BOUCHER].

Mr. BOUCHER. I thank the gentleman for yielding time to me.

Mr. Speaker, it is my pleasure to rise in support of the bill. H.R. 2713 will help ensure that the new sentencing system established by the Sentencing Reform Act will completely carry forward the victim-orientation features of the Federal criminal justice system.

Congress in 1982 unanimously enacted the Victim and Witness Protection Act to insure that victims of crime receive fairer treatment. Briefly, the act creates a presumption in favor of restitution and defines the losses for which a convicted defendant can be ordered to make restitution. It sets forth procedures to be followed by the sentencing court when determining whether—and to what extent—to order restitution. If the judge orders less than full restitution, the act requires the judge to state, on the record, the reason for his decision.

The Sentencing Reform Act, enacted last year, carries forward these provisions in their entirety. In addition, the Sentencing Reform Act adds a new provision that states that a sentencing court can order the defendant to make restitution "in addition to the sentence" that is otherwise imposed. This new provision, as well as the renumbering of the current law provisions, is scheduled to take effect on November 1, 1986.

Earlier this year, I introduced a bill to resolve some technical problems in the restitution provisions and to make what I believe to be a noncontroversial addition to the Sentencing Reform Act. Both the Justice Department and a representative of the Judicial Conference of the United States concurred that my bill raises no problems, and the Criminal Justice Subcommittee and the Committee on the Judiciary then reported it favorably.

The technical amendments in H.R. 2713 simply clarify meaning and remove ambiguity in provisions of current law and in provisions of the Sentencing Reform Act scheduled to take effect on November 1, 1986.

H.R. 2713 also amends the Sentencing Reform Act's statement of the purposes to be served by criminal punishment. These purposes, which include deterrence, protection of the public, promotion of respect for the law, and providing just punishment, must be considered by a judge when determining sentence. The Sentencing Reform Act, however, does not include making restitution to the victim as a purpose of sentencing.

The restitution provisions enacted by the Victim and Witness Protection Act clearly manifest that restitution to victims is a purpose of sentencing, and I am sure that this omission was just an oversight. H.R. 2713, therefore, adds restitution to the list of sentencing purposes.

Finally, H.R. 2713 resolves a difference between two provisions of the Sentencing Reform Act over whether restitution alone can be ordered as punishment for a Federal crime. The bill provides that a court can order just restitution if the offense is a misdemeanor or a felony whose maximum authorized prison term does not exceed 2 years. For all other offenses, restitution can be ordered only in addition to other punishment.

Mr. Speaker, I know of no opposition to the bill. It was crafted with the support and the assistance of the minority, and I urge the House to approve its provisions.

Mr. GEKAS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the gentleman from Michigan [Mr. CONYERS] and then the gentleman from Virginia [Mr. BOUCHER] have adequately set forth the provisions of the legislation that is before us.

Right from the outset, when we saw that there was an issue with regard to the interpretation of the two competing statutes as described, the only concern I had, I believe, has now been resolved. I never wanted anyone to get the impression that restitution could be used universally and abjectly as a substitute or as a single remedy for crimes which carried with it mandatory sometimes, and sometimes not mandatory, prison sentences for some of the serious felonies.

My concern has been fully remedied by this legislation. As we proceed with this legislation, and when it goes into effect, we will see that restitution can only be used as a single and unique remedy for certain crimes that we enumerate, the lesser misdemeanors and lesser felonies. So we leave intact the original thought and purpose of the comprehensive crime package of 1984 wherein restitution is used, along with other penalties, for a true remedy for an offense visited against our society.

Therefore, Mr. Speaker, I concur with the impetus as presented by the gentleman from Michigan and the gentleman from Virginia and ask that the bill be passed unanimously.

Mr. Speaker, I yield back the balance of my time.

Mr. CONYERS. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Michigan [Mr. CONYERS] that the House suspend the rules and pass the bill, H.R. 2713, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

BANK BRIBERY AMENDMENTS ACT OF 1985

Mr. CONYERS. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3511) to amend title 18, United States Code, with respect to certain bribery and related offenses, as amended.

The Clerk read as follows:

H.R. 3511

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Bank Bribery Amendments Act of 1985".

SEC. 2. CHAPTER 11 AMENDMENT.

Section 215 of title 18, United States Code, is amended to read as follows:

"§ 215. Receipt of commission or gifts for procuring loans

"(a) Whoever—

"(1) corruptly gives, offers, or promises anything of value to any person, with intent to influence or reward an officer, director, employee, agent, or attorney of a financial institution in connection with any business or transaction of such institution; or

"(2) as an officer, director, employee, agent, or attorney of a financial institution, corruptly solicits or demands for the benefit of any person, or corruptly accepts or agrees

to accept, anything of value from any person, if the giving, offering, or promising of that thing of value would be or is in violation of paragraph (1);

shall be fined not more than $5,000 or three times the value of the thing given, offered, promised, solicited, demanded, accepted, or agreed to be accepted, whichever is greater, or imprisoned not more than five years, or both, but if the value of the thing given, offered, promised, solicited, demanded, accepted, or agreed to be accepted does not exceed $100, shall be fined not more than $1,000 or imprisoned not more than one year, or both.

"(b) As used in this section, the term "financial institution" means—

"(1) a bank with deposits insured by the Federal Deposit Insurance Corporation;

"(2) an institution with accounts insured by the Federal Savings and Loan Insurance Corporation;

"(3) a credit union with accounts insured by the National Credit Union Share Insurance Fund;

"(4) a Federal home loan bank or a member, as defined in section 2 of the Federal Home Loan Bank Act (12 U.S.C. 1422), of the Federal home loan bank system;

"(5) a Federal land bank, Federal intermediate credit bank, bank for cooperatives, production credit association, and Federal land bank association;

"(6) a small business investment company, as defined in section 103 of the Small Business Investment Act of 1958 (15 U.S.C. 662);

"(7) a bank holding company as defined in section 2 of the Bank Holding Company Act of 1956 (12 U.S.C. 1841); or

"(8) a savings and loan holding company as defined in section 408 of the National Housing Act (12 U.S.C. 1730a).

"(c) This section shall not apply to bona fide salary, wages, fees, or other compensation paid, or expenses paid or reimbursed, in the usual course of business.".

SEC. 3. EFFECTIVE DATE.

This Act and the amendments made by this Act shall take effect 30 days after the date of the enactment of this Act.

The SPEAKER pro tempore. Is a second demanded?

Mr. GEKAS. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Michigan [Mr. CONYERS] will be recognized for 20 minutes and the gentleman from Pennsylvania [Mr. GEKAS] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Michigan [Mr. CONYERS].

Mr. CONYERS. Mr. Speaker, I yield myself such time as I may consume.

□ 1300

Mr. CONYERS. Mr. Speaker, H.R. 3511 corrects a problem with the present bank bribery offense, title 18, United States Code section 215. Present section 215 is so broadly drafted that it penalizes conduct that is not culpable or wrongful.

Subsection (a) of section 215, for example, punishes a bank official for seeking anything of value for another in connection with bank business, whether or not the bank official had a bad purpose or intended to undermine a fiduciary duty owed the bank. Thus, a bank official who simply refers a customer to a correspondent bank or to an attorney, a stock broker, a CPA, or other professional has committed a Federal crime.

Subsection (b) is also too sweeping. It punishes someone who gives anything of value to a bank official in connection with bank business, whether or not the giver had a bad purpose or an intention to corrupt the bank official. Thus, subsection (b) could make it a Federal crime for a company to donate free space to a credit union that serves its employees, or to permit its employees to work on company time as volunteers in the credit union.

The Justice Department's response to concerns with the sweeping language of section 215 has been to argue that its prosecutorial guidelines will take care of these kind of problems. Those affected by section 215, however, are not satisfied with that approach, and neither is the Committee on the Judiciary. Witnesses at the hearing of the Subcommittee on Criminal Justice pointed out, correctly, that Department of Justice guidelines are ambiguous. The guidelines tell prosecutors not to bring "inconsequential" cases and to use a rule of "reasonableness" in deciding what is consequential. Obviously the guidelines are not binding and confer no legally enforceable rights.

Finally, the prosecutorial guidelines offer no protection from vexatious civil actions. A civil litigant is not constrained by the Justice Department's guidelines and can use an inconsequential violation of section 215 as a basis for a RICO treble damage action.

In short, Mr. Speaker, the Justice Department approach does nothing to prevent vindictive or selective prosecution and results in innocent people engaged in legitimate activity being stigmatized as Federal criminals.

The Committee on the Judiciary, therefore, concluded that section 215 should be narrowed. In narrowing section 215, the committee sought to effectuate the purpose of section 215 as identified by the Justice Department. That purpose is to proscribe breaches of fiduciary duty and dishonest efforts to undermine bank transactions. H.R. 3511 redrafts section 215 so that it—rather than the Justice Department's guidelines—expressed this purpose. As redrafted by H.R. 3511, section 215 requires that the giving or receiving of something of value be done corruptly, which means that the giver or recipient must act with the specific intent to accomplish an unlawful end or to bring about a lawful end by unlawful means. Ordinarily, this will require proof that the defendant acted with a hope or expectation of personal gain or of profit to another.

H.R. 3511 also makes other minor changes in the current law. These changes are set out in the committee's report—No. 99-335.

Mr. Speaker, H.R. 3511 is the product of a bipartisan effort to correct a defect of current law. It was drafted in close consultation with the ranking minority member of the Subcommittee on Criminal Justice, the gentleman from Pennsylvania [Mr. GEKAS]. I want to express my appreciation to him and to the other members of the subcommittee for their assistant in helping to perfect the bill. The bill was reported from subcommittee and the full committee without opposition, and I urge my colleagues to vote for it.

Mr. Speaker, I yield such time as he may consume to the gentleman from Virginia [Mr. BOUCHER] for any observations he may have.

Mr. BOUCHER. Mr. Speaker, I rise in support of the bill.

The present bank bribery offense is in need of revision because it makes Federal criminals out of people whose conduct does not violate a fiduciary duty or endanger the soundness or security of financial institutions.

For example, the present law makes it a Federal crime for a credit union to pay interest on the account of one of its employees, and for that employee to accept the interest. It makes it a Federal crime for someone to pay for a business lunch with a savings and loan association official, even if the person paying for the lunch did not intend to corrupt the official and the official was not, in fact, corrupted. It makes it a Federal crime for a bank holding company or a savings and loan holding company to pay an employee for work in connection with a subsidiary bank or savings and loan. It makes it a Federal crime for that employee to accept that salary.

In short, in the words of one of the witnesses before the Subcommittee on Criminal Justice, the current provision, "read literally, would prevent financial institutions for conduting day-to-day business."

Because the present bank bribery provision is so broad, it puts tremendous power into the hands of Federal prosecutors and exposes people to selective and vindictive prosecution. Moreover, by labeling people as "criminals" for doing things that are not morally blameworthy or culpable things that do not pose any kind of threat to the public well-being—the provision breeds disrespect for the law in general.

The Subcommittee on Criminal Justice looked at the provisions carefully and drafted the bill now before the House to address these problems. The bill redrafts the bank bribery provision so that it reaches conduct that is intended to corrupt officials of financial institutions. As redrafted by H.R.

3511, the bank bribery offense will punish only that conduct which deserves punishment—namely, conduct that breaches a fiduciary duty or that dishonestly undermines a transaction. Mr. Speaker, the bill before us will cure the defects of the present law. It is the product of a bipartisan effort and has been endorsed by the financial services community, including the Independent Bankers Association of America, the American Bankers Association, the U.S. League of Savings Institutions, the Credit Union National Association, the National Association of Federal Credit Unions, and the National Council of Savings Institutions. I urge my colleagues to support this well considered measure.

Mr. GEKAS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of the legislation that is before us.

Mr. Speaker, the Congress of the United States, in passing the comprehensive crime package or 1984, intended to target white-collar crimes just as vociferously as it did the street and violent crimes on which the American public insisted we take action, and we did, and on which we intend to continue that effort. But while we intended to make bank bribery and corrupt practices within the banking community one of the features of our new fight against crime, we were not careful enough to point out that what we were after was corrupt action on the part of the bank officials, or corrupt action on the part of the bank customers dealing with bank officials or employees, and that is what brought forth the effort culminating in the legislation which we have before us today.

The gentleman from Virginia [Mr. BOUCHER] quite adequately pointed out some of the horror stories that could occur and have occurred really since the genesis of the action we took in 1984, where simply having lunch between a customer and bank official could be deemed to be a corrupt transaction.

Now we are making that clear. Where, in fact, that kind of luncheon leads from the beginning with corrupt intent and leads to a corrupt result, then that should be punished and prosecuted. But where an innocent transaction such as that occurs with no corrupt intent on anyone's part, we should not be throwing out the baby with the bathwater, as an example that has been used many times in legislative actions on this floor.

Moreover, we were struck by much of the testimony as we recall it before the subcommittee where the innocent act of banking or saving institution lending space to a credit union of its employee could be construed in its ultimate as being an act prohibited by the legislation that is now the law of the land. We believe that it is not enough, Mr. Speaker, to leave it to prosecutorial guidelines and discretion, who could ultimately determine that this was allowable. Rather, we want to make sure that such an innocent act be outside the prohibitions of this legislation.

So, Mr. Speaker, I am in support of the legislation before us. I ask that we support it unanimously.

Mr. Speaker, I yield 4 minutes to the gentleman from New York [Mr. FISH], the distinguished ranking member of the full Committee on the Judiciary.

Mr. FISH. Mr. Speaker, I rise in strong support of H.R. 3511.

In May of this year, I joined as a cosponsor of H.R. 2617, which was introduced by my distinguished colleague from Pennsylvania, Mr. GEKAS. That measure reflected our view that the intent and scope of the Federal Bank Bribery statute, 18 U.S.C. 215, ought to be clarified. That statute, because of amendments added through last year's Comprehensive Crime Control Act, is so broad that legitimate business activity has become covered by a cloud of criminal liability.

Unfortunately, as amended section 215 does not require a corrupt or bad purpose, and so it reaches all kinds of legitimate, acceptable conduct. For example, subsection 215(a) punishes a bank official for simply seeking anything of value from another in connection with any business of the bank, without regard to the intent of the official. Thus, a bank official who has routinely referred a bank customer to a correspondent bank or a stockbroker, may be guilty of a Federal crime. Similarly, subsection 215(b) merely requires the giving of anything of value to a bank official in connection with any business of the bank, without regard to the intention of the giver. Thus, a person potentially commits a Federal crime if he or she merely pays for a lunch with a bank official at which business with the bank is discussed.

Other examples of legitimate and acceptable practices that section 215 could make criminal include—payment by a bank of interest on an employee's account—and acceptance of the interest by the employee; sale of securities for a customer's account by a trust officer of a bank; requiring a borrower who is contractually responsible for paying the bank's legal fees to pay them directly to the attorneys; giving away promotional items at a business or trade show; and authorization of any payment to a customer—for example, interest on an account—by a bank official.

The current breadth of section 215 has other serious consequences as well. A violation of section 215 can become a predicate offense under the Federal racketeering law RICO. For example, if a telephone is used, there is a possible violation of 18 U.S.C. 1952, which is a RICO predicate offense. A RICO violation not only raises the possibility of additional criminal prosecution, it also exposes the person to a civil damage action that could result in an award of treble damages and attorney fees to the plaintiff. A bank or bank officer or director who violates section 215 also faces civil liability under 12 U.S.C 503, and may be ordered to pay punitive damages.

Hearings before the Criminal Justice Subcommittee on H.R. 2617 demonstrated near unanimous support for a revision of the bribery statute to narrow its scope. H.R. 3511 would insert a state of mind, or mens rea requirement, into the law so as to restrict its application to genuinely "corrupt" conduct.

Mr. Speaker, the revisions proposed by this legislation have been carefully considered through both in the hearing and committee markup process. Representatives of the banking industry have expressed their understandable concern and assisted in drafting these amendments. The administration, now, has no objection to enactment of this bill. The result is a reasonable and balanced proposal that reconciles the interests of law enforcement and the realities of the banking business. It clarifies a statute that has been a source of confusion and concern since its enactment. It deserves the support of this House.

The goal which I sought originally to achieve in cosponsoring H.R. 2617 has been admirably achieved by the successor legislation (H.R. 3511) before us today. I urge my colleagues to support its passage under the suspension of the rules.

□ 1315

Mr. GEKAS. Mr. Speaker, I yield 4 minutes to the gentleman from California [Mr. LUNGREN].

Mr. LUNGREN. First of all, Mr. Speaker, I would like to take this opportunity to thank both the chairman of the subcommittee, the gentleman from Michigan [Mr. CONYERS] and the ranking minority member, the gentleman from Pennsylvania [Mr. GEKAS] for bringing this bill forward on the suspension calendar.

This does what I think has been already said; it clarifies what this body intended last year, I believe, when we adopted the section of the comprehensive crime control bill.

There was an effort made by this subcommittee last year on this legislation individually, but because of the parliamentary situation we were in in which it required us to deal totally with the comprehensive crime control bill without an opportunity for amendment, I believe that this clarifying language is necessary.

Many in the banking community have come to me and others, as has already been said, on the committee and expressed their concern that the language in the bank bribery section of the bill was too expensive, and that it would criminalize some activity that was not intended to be reached and in fact is quite innocent.

The primary area of concern involves the fact that the statute does not articulate a suitable mens rea, or mental culpability requirement. It was feared that under the statute a bank official who receives anything of value might violate its provisions. Examples have already been stated here; the simplest example are those involving taking someone to lunch where business is discussed; a small charm given at Christmastime; any number of things which would fall under the prohibitions of the law.

It was never our intent, and clarification is therefore in order. While there has been some suggestion by some, in fact some from the administration, the Justice Department, that the problem could be corrected by regulation and that even their guidelines, which have already been sent out to all the U.S. attorneys in the United States would take care of the problem.

In my estimation, as well as the estimation of the full committee and subcommittee, this is not sufficient. It seems only appropriate that the statute should explicitly require a corrupt purpose before bribery can be found.

I might add, as others have said, this is the approach that we find in the Criminal Code with respect to public officials. If this is the standard of proof; if this is the mens rea that is necessary for conviction of public officials in such a situation, it seems to me that we ought not to ask anything less where we are talking about bank officials.

Accordingly, the Committee on the Judiciary adopted this language, adding the requirement of specific intent of the law, and therefore under this bill that we are to vote on today for bribery to exist, a gift will have to be given or received with a corrupt motive to influence a transaction in connection with the business of banking.

I would hope that all Members would support this bill, because in fact it does what we had intended to do all along.

Therefore, Mr. Speaker, I rise in strong support of H.R. 3511.

Mr. GEKAS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would like to ask the gentleman from Michigan, the distinguished chairman of our subcommittee, Mr. CONYERS, to engage with me in a colloquy.

As I understand it, the motion before the House is to suspend the rules and pass the bill before us with amendments. What I would like to do for the record, so that it would be absolutely clear, is for the gentleman from Michigan to articulate the sense and letter of the amendments which now form a part of the bill to be subsequently adopted by the House.

Mr. CONYERS. Will the gentleman yield?

Mr. GEKAS. I certainly will.

Mr. CONYERS. I thank the gentleman for yielding to me.

Mr. Speaker, this is popularly called the free lunch amendment to the banking bill, and the changes that we have made in it are two.

One, we change at subsection (b)(7) an "and" to an "or" and another, we strike two "ands". They are almost technical changes.

And then in another amendment, we strike the phrase "in an official action" since there could not be any crime unless it was in the course of official conduct.

So those, then, are the several changes that constitute the amendment part of our bill.

Mr. GEKAS. I thank the gentleman.

By way of repetition for the record, the amendments occur on page 2 of the bill, as constituted under section 215(a) where the phrase in line 7 of "in an official action" is deleted.

On page 3, under subsection (6) in line 16, the word "and" is deleted. On the same page, page 3, on line 19, the word "and" is changed to "or".

These are technical amendments, as the chairman has indicated. We now feel that the record is complete.

Mr. Speaker, I yield back the balance of my time.

Mr. CONYERS. Mr. Speaker, I have no further requests for time and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Michigan [Mr. CONYERS] that the House suspend the rules and pass the bill, H.R. 3511, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. CONYERS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous matter on H.R. 2713 and H.R. 3511, the bills just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 5, rule I, the Chair will now put the question on each motion on which further proceedings were postponed on Monday, October 28, 1985, in the order in which that motion was entertained.

Votes will be taken in the following order:

H.R. 3606, by the yeas and nays, and House Concurrent Resolution 201, by the yeas and nays.

The Chair will reduce to 5 minutes the time for the second vote by electronic device.

CLARIFYING APPLICATION OF SECTION 2406 OF TITLE 10, UNITED STATES CODE

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill, H.R. 3606.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wisconsin [Mr. ASPIN] that the House suspend the rules and pass the bill, H.R. 3606, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 397, nays 18, not voting 19 as follows:

Mr. BARTLETT and Mr. GROTBERG changed their votes from "yea" to "nay".

Messrs. MOODY, GARCIA, ROBERTS, and LEATH of Texas changed their votes from "nay" to "yea."

So (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

TENTH ANNIVERSARY COMMEMORATION OF EDUCATION FOR ALL HANDICAPPED CHILDREN ACT

The SPEAKER pro tempore (Mr. MONTGOMERY). The unfinished business is the question of suspending the rules and agreeing to the concurrent resolution, House Concurrent Resolution 201, as amended.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Montana [Mr. WILLIAMS] that the House suspend the rules and agree to the concurrent resolution, House Concurrent Resolution 201, as amended, on which the yeas and nays are ordered.

This will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 404, nays 1, not voting 29, as follows:

So (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution, as amended, was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. WILLIAMS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table a similar Senate concurrent resolution (S. Con. Res. 71) to commemorate the accomplishments of Public Law 94-142, the Education for All Handicapped Children Act on the 10th anniversary of its enactment, and ask for its immediate consideration.

The Clerk read the title of the Senate concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Montana?

There was no objection.

The Clerk read the Senate concurrent resolution, as follows:

S. CON. RES. 71

Whereas part B of the Education of the Handicapped Act, commonly known as Public Law 94-142 (The Education for All Handicapped Children Act), was signed into law ten years ago on November 29, 1975;

Whereas Public Law 94-142 established as policy for the United States of America the principle that all children, regardless of disabling condition, have the right to a free, appropriate public education in the least restrictive setting;

Whereas Public Law 94-142 currently serves over 4,000,000 handicapped children;

Whereas Public Law 94-142 ensures the full partnership between parents of children with disabilities and education professionals in design and implementation of the educational services to be provided handicapped children;

Whereas Public Law 94-142 has greatly enriched the classrooms of the Nation by allowing the potential of children with disabilities to be developed, together with the potential of nondisabled youngsters;

Whereas Public Law 94-142 has greatly enriched America's society as a whole by providing the means for disabled youngsters to contribute to the social and economic progress of the United States; and

Whereas Public Law 94-142 has succeeded even beyond the expectations of congressional supporters in marshalling the resources of the nation to fulfill the promise of full participation in society of disabled youngsters: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the Congress—

(1) recognizes the 10th anniversary of the enactment of Public Law 94-142 and the successful implementation of that law;

(2) acknowledges the many and varied contributions by disabled youngsters, parents, teachers, and administrators; and

(3) reaffirms its support for Public Law 94-142 and the primary goal of Public Law 94-142 that all children, regardless of disabling condition, have the right to a free, appropriate public education in the least restrictive setting.

The Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

A similar House concurrent resolution (H. Con. Res. 201) was laid on the table.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 2601

Ms. FIEDLER. Mr. Speaker, I ask unanimous consent that my name be removed as a cosponsor of H.R. 2601. I wholeheartedly support the intent of this bill to provide for the recognition of Haym Salomon in a significant way. However, I cannot support this bill with the inclusion of a specifically named organization. When I originally cosponsored this bill, I was not aware that it included this organization as the recipient of the funds.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from California?

There was no objection.

CONFERENCE REPORT ON S. 1160, DEPARTMENT OF DEFENSE AUTHORIZATION ACT, 1986

Mr. BONIOR of Michigan. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 299 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 299

Resolved, That all points of order against the conference report on the bill (S. 1160) to authorize appropriations for the military functions of the Department of Defense and to prescribe personnel levels for the Department of Defense for fiscal year 1986, to authorize certain construction at military installations for such fiscal year, to authorize appropriations for the Department of Energy for national security programs for such fiscal year, and for other purposes, and against the consideration of such conference report, are hereby waived.

The SPEAKER pro tempore. The gentleman from Michigan [Mr. BONIOR] is recognized for 1 hour.

Mr. BONIOR of Michigan. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Tennessee [Mr. QUILLEN], pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 299 waives all points of order against the conference report on the bill S. 1160, the Department of Defense Authorization Act for fiscal year 1986. The rule also waives all points of order against consideration of the conference report.

Mr. Speaker, this is a simple rule that will allow us to proceed to the immediate consideration of the Department of Defense authorization conference report. There had been speculation about the possibility of separate votes being taken on several of the controversial items contained in this conference report.

This rules does not provide for separate votes on any item. Instead, these issues will be addressed on other legislations, most notably the Department of Defense appropriations bill which is scheduled for floor consideration later this week.

In other words, this conference report will be considered under the normal procedures for conference reports. Under the rules of the House, conference reports are privileged, and are considered for 1 hour. No amendments are in order.

Mr. Speaker, I urge the adoption of this rule so that the House may proceed to an up or down vote on this conference report.

□ 1355

Mr. Speaker, I yield 5 minutes to the gentleman from California [Mr. LEVINE].

Mr. LEVINE of California. I thank the gentleman for yielding me this time.

Mr. Speaker, I do not oppose the rule, in fact, I support the rule, but I would like to take this opportunity to explain the reasons that I feel that I must rise, albeit with great reluctance, to oppose the conference report itself.

I am deeply concerned, as we all are, about the security of our country. As a result of that concern, I have generally supported past defense authorization bills. My decision to oppose this conference report was made even more difficult because of the enthusiasm that I had for this bill when it passed the House last June.

I viewed the defense authorization bill when we passed it as landmark legislation. In that bill we froze defense spending; we capped the number of MX missiles to be deployed in Minuteman silos at 40; we placed a prohibition on testing of new antisatellite weapons; we placed strict conditions on the deployment and production of new chemical weapons; we killed 22 wasteful and unnecessary weapons; and we passed a series of amendments which would make fundamental

changes in the way in which the Pentagon does business.

Mr. Speaker, a great deal of credit for this legislation must go to the chairman and members of the House Armed Services Committee. I know they spent hundreds of hours fashioning the bill as it passed the House. I know that they spent many hours fashioning a conference report, and I personally am deeply grateful to the members and to the staff for their assistance to me in preparing amendments which I offered to this bill. That is why I regret so deeply that I must rise in opposition to the conference report itself.

However, Mr. Speaker, this conference report bears little resemblance to the authorization bill that we on this floor supported a few months ago. Gone is the freeze in spending; gone is the crucial House language on the MX, on antisatellite weapons and on chemical weapons. Funding has been restored for every weapons system killed by the House or by the other body. Every one of the procurement reforms are mere shadows of their former selves.

I am most disturbed about the gutting of the procurement reforms which were passed by this House on overwhelming bipartisan votes. Immediate action is needed to restore the public's confidence in our Defense Establishment and assure that American taxpayers get the most bang for their tax buck.

The House demonstrated its commitment to procurement reform when it passed, as I said before, by overwhelming bipartisan majorities, legislation fundamentally to change the way the Pentagon does business. These amendments mandated competition in the development and production of new weapons; limited the types of costs which defense contractors could pass along to the Government; slam shut the revolving door between the Defense Department and defense contractors and required contractors to make information available on the efficiency of their operations.

Every major procurement reform has been watered down during conference. This bill does not reform the defense procurement process. The reforms it contains are all show and little substance. We would be misleading the American public if we told him anything else as to the contents of this conference report.

This bill, on the other hand, does allow the production of new MX missiles, new chemical weapons and new space weapons. Once again, critics can legitimately point to Congress and say, "We never met a weapon we did not like."

I am pleased that the Appropriations Committee has included these procurement reforms in their original form in the 1986 defense appropriations bill. The reform language contained in this bill unfortunately remains unsatisfactory. We cannot continue down the path of business as usual. We are building a new generation of weapons which have not been adequately tested, which cost more than our economy can bear, which may be unable to perform their missions on the battlefield, and which threaten nuclear stability.

Mr. Speaker, defeat of this conference report will send a clear message that the House is serious about clamping a lid on defense spending; will no longer serve as a rubberstamp for wasteful and unnecessary weapons; and will not settle for anything less than fundamental reform of the procurement process.

Mr. Speaker, I urge my colleagues, when the conference report is before them, to reject it.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the Senate passed this conference report some 3 months ago, and there has been some squabbling over it. But I understood when it was presented to the Rules Committee that everything had been worked out. Certainly, it is time that we pass this authorization bill so that we can consider the appropriation bill tomorrow and possibly the next day.

Our defense posture is so important. We must be second to none militarily. With that concept in mind, let us get down to business on the conference report and pass it. Mr. Speaker, I urge approval of the rule. I have no requests for time, and I reserve the balance of my time.

Mr. BONIOR of Michigan. Mr. Speaker, I yield such time as he may consume to the gentleman from Oklahoma [Mr. ENGLISH].

Mr. ENGLISH. I thank the gentleman for yielding to me.

Mr. Speaker, the Government Operations Subcommittee which I chair has now held 31 hearings on the drug interdiction problem. We have been working closely with many members of the House Armed Services Committee to develop ways that the military could play an increasing role in support of the civilian drug interdiction agencies.

This conference report reflects two such congressional initiatives that, I am confident, will truly demonstrate to the American people that a real war against the drug smuggler is at hand.

The first initiative creates a new Air Force wing designed to detect the smuggler as he transits by sea or air to our country. This wing will meet an Air Force combat requirement which has not previously been funded, while at the same time meeting a critical law enforcement need. The second proposal calls for the placement of Coast Guard personnel on every Navy ship that might be in a position to intercept a drug laden vessel destined for the United States. This provision, in effect, ensures that all Navy ships operating in the known drug trafficking routes will be lawfully authorized to interdict smugglers, and it increases our interceptor fleet to a level which becomes credible.

I want to commend my good friend from Florida, Mr. BENNETT, who has been a stalwart during the long hearing process, for recognizing the potential value of authorizing the use of U.S. naval surface forces in this vital struggle. He knows, as we are all coming to know, that the only way we can prevail in our drug interdiction effort is to enlist all available resources, ensure they are well coordinated, and significantly improve the intelligence necessary to properly deploy our forces.

I would like to clarify for us all the intent of the conferees on these most important initiatives.

Mr. Speaker, I would like to enter into a colloquy with the chairman of the Armed Services Subcommittee on Readiness and the chairman of the Special Operations Panel of the Armed Services Committee. I am particularly concerned that the intent of the conferees concerning the creation and purpose of the Special Operations Drug Interdiction Wing be clearly understood by all parties involved.

Will the gentleman from Virginia please assure the House that the intent of the conferees in establishing the Special Operations Drug Interdiction Wing, to support the U.S. Customs Service, was for the command and control of that wing to be under the Air Force's Special Operations Forces?

I yield to the gentleman for his response.

Mr. DANIEL. That is correct.

Mr. ENGLISH. Further, was it the intent of the conferees that this Air Force support would include two of the interdiction aircraft to be assigned on a daily basis in support of the Southern Command?

Mr. DANIEL. Yes; that is a very important military benefit that will accrue to the Department of Defense, and it answers a critical need for detection in that vital part of the world. We have discussed before the high correlation between drug traffickers and arms smugglers in that region. We agreed that this wing will eventually provide eight operational aricraft per day to the U.S. Customs Service, and two to Southcom.

Mr. ENGLISH. If the gentleman will comment further, was it also the intent of the conferees that his new detection and interdiction capability would greatly enhance the mission potential of the Air Force Special Operations Forces?

□ 1405

Mr. DANIEL. That is the agreement that the conferees reached. We were advised by the Navy that there are no available P-3's for this mission, and the Navy has suggested that there is no comparable military mission in the Navy for such an aircraft. This is a most important point.

Mr. ENGLISH. Mr. Speaker, what would have been the effect of having the surveillance and detection mission performed by the Naval Reserve in P-3's rather than the Air Force's Special Operations C-130's?

Mr. DANIEL. Mr. Speaker, may I ask the gentleman from Oklahoma if he would repeat his question?

Mr. ENGLISH. In recognition of the fact, of course, that the Naval Reserve would have P-3's rather than the Air Force Special Operations C-130's, what would have been the effect of having the surveillance and detection mission performed by the Naval Reserve in the P-3's?

Mr. DANIEL. The Joint Chiefs would not validate a wartime mission for a Navy P-3 counterinfiltration squadron. It also would have degraded readiness rather than enhanced readiness.

Mr. ENGLISH. Does the same hold true for the non-Special Operations C-130 units?

Mr. Speaker, I yield to the subcommittee chairman of the Special Operations Panel of the Committee on Armed Services to respond to that question.

Mr. HUTTO. Mr. Speaker, I appreciate the gentleman's yielding.

The answer to the question is, yes. To put portable sensors on Reserve or Guard tactical airlift C-130's would have adversely impacted their readiness in two ways. By using Special Operations aircraft, we avoid both readiness problems. We practice in peacetime for the wartime role.

The best potential aircraft for this mission which the Special Operations Force currently operates is the AC-130.

Mr. ENGLISH. Mr. Speaker, is it further the understanding of the conferees that other assets of the Department of Defense, especially the National Guard and Reserve assets, could be mobilized, when needed, to assist the Air Force in conducting the drug interdiction missions?

Mr. DANIEL. Absolutely. This provides good training for these units. We want to be sure that we bring every possible military unit to bear on this terrible drug problem, without degrading combat readiness.

Mr. ENGLISH. Mr. Speaker, I want to thank the chairman of the two subcommittees and certainly the Committee on Armed Services for their cooperation and support in this vital effort.

Mr. Speaker, I yield back the balance of my time.

Mr. QUILLEN. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. Mr. Speaker, I thank the gentleman for yielding this time to me.

Often when we have talked spending on the House floor and we have talked budget-busting and we have talked about all the horrors of big deficits, we have heard many Members come to the floor and say, "Take it out of defense spending. That is where we ought to find the cuts we need in order to do things."

Well, what do we have coming before us now? We have a rule coming before us that busts the budget on the issue of defense. The budget that we passed the other week is being busted. Section 311(a) of the Budget Act is being busted with regard to pay. We are providing new spending authority in the bill for pay, and as a result we have another budget-buster.

Now, the Rules Committee is not really telling us that in the rule. They have just given a blanket waiver on everything. Instead of being able to specify in this rule that we have a budget-buster, we cannot do that. Instead, what we have is just that all points of order against the conference report are waived, and that includes the Budget Act.

So what we have before us is another attempt to break the budget, another attempt to bust the budget and to do it in this case in defense. I really seriously question whether or not anybody in this body who is concerned with these rules is really concerned about the Budget Act, because nearly every rule that we have brought out here since the Budget Act was passed in August has had some waiver of the Budget Act in it. There has been a wholesale abandonment of the budget process. There has been a wholesale attempt to simply say that the budget process around here does not matter anymore.

If ever there is an argument for moving toward the Gramm-Mack approach in attempting to come up with some kind of a system for the President to sequester funds, it has been our performance on the Budget Act. We have one more example before us right now. We are attempting here once again to pass a rule that permits the Budget Act to be waived.

Mr. Speaker, I would urge a vote against that kind of rule.

Mr. BONIOR of Michigan. Mr. Speaker, I yield 5 minutes to the gentleman from Massachusetts [Mr. MAVROULES].

Mr. MAVROULES. Mr. Speaker, more than 2 months ago, conferees of both houses concluded work on the fiscal year 1986 Department of Defense authorization bill.

Since completing the conference, this bill has been the subject of some controversy and much criticism.

Like many, I would have preferred a lower budget authorization number. However, this conference report reduced the administration's budget request by $15.4 billion. Basically, this is a budget freeze at last year's level with an adjustment for inflation.

And, it is important to recognize, that this conference report does not establish the final budget number for Defense. That decision will be made when work is completed on the next piece of legislation we will consider, the Defense appropriations bill.

Another matter of concern is that this legislation did not maintain the requirements of the House-approved amendment on binary or chemical munitions.

For sound foreign policy and national security reasons, I believe we should maintain the current moratorium on the production of chemical weapons.

While this conference report provides for a 2-year moratorium, until October 1987, on the final assembly of these munitions, the Appropriations Committee has already voted to eliminate funding for these chemical weapons. I strongly support that action.

However, recognizing the reservations that many have with this authorization conference report, and also, realizing that we have a chance to revisit many of these basic issues when we debate the appropriations bill tomorrow. I would like to offer a few reasons why I hope my colleagues will join in supporting this conference report.

For 3 years, I have fought production and deployment of the MX missile. The arguments are well known. With budget deficits as far as the eye can see, we must restructure our priorities.

Prior to the consideration of this fiscal year's budget, 42 MX missiles had been approved. In May, the House approved an amendment I coauthored with the gentleman from Oklahoma, limiting MX deployment to those missiles already approved.

The conference agreed to a limitation in law—a permanent statutory limitation—of no more than 50 MX missiles deployed in existing Minuteman silos.

I would point out to my colleagues that this is the first major strategic weapons program ever to be limited in this manner.

While many shared my belief that no MX missiles should be deployed, this statutory limitation is certainly preferable to the original 200 MX missiles requested by the Air Force, and the 100 requested by the Scowcroft Commission.

If for no other reason, I would urge my colleagues in this House to support

the conference report and make the MX limitation, permanent public law.

In a final area, there is the question of procurement reforms. With this conference report, we have made a start in directing the Department of Defense to put its procurement house in order.

On allowable costs, the conference restricted the charges that contractors can pass on to the Government. The thrust of the agreement is to define more carefully, what costs cannot be passed on to the Government.

The multiple-sourcing measure will be applicable to both full-scale development contracts, and production contracts.

Revolving door provisions, must be refined further, I agree.

But in raising all of these issues, Congress has made a significant step in correcting the procurement problems which have greatly eroded public support and confidence in the Defense Department.

□ 1415

Mr. QUILLEN. Mr. Speaker, I yield 2 minutes to the gentleman from Michigan [Mr. DAVIS].

Mr. DAVIS. Mr. Speaker, I would like to engage in a short colloquy with the gentleman from Alabama [Mr. NICHOLS].

May I say to the gentleman from Alabama, [Mr. NICHOLS], the subject of this colloquy is section 1534 of the conference report on Senate bill 1160, the Department of Defense Authorization Act. Section 1534 of that act directs the Secretary of Energy to write regulations that establish definitions, exclusions, limitations, and qualifications to the list of items for which costs may not be submitted on DOE contracts for defense-related programs.

As you know, in the House Armed Services Committee report on H.R. 1872 (H. Rept. No. 99-81) we commented on this matter in some detail. The related House section—section 934—points out that it is not our intent to isolate the Congress from the technical and scientific advice of experts employed by contactors carrying out these DOE programs. In fact, the report states, "The committee has found such advice and counsel to be invaluable over the years." Am I correct, then, Mr. Speaker, in my assumption that the intent of this section was not to restrict the flow of this technical and scientific advice from DOE contractors to the Congress?

Mr. NICHOLS. Mr. Speaker, if the gentleman will yield, that is a correct assumption. Clearly it was not our intent to inhibit the flow of this important information. What it is intended to do is prevent DOE contractors from attempting to influence legislation to a contractor's own advantage while using Department of Energy funds to support such efforts.

Mr. DAVIS. Mr. Speaker, I thank the gentleman for this clarification and for his fine work.

Mr. QUILLEN. Mr. Speaker, I yield 3 minutes to the gentleman from Oregon [Mr. DENNY SMITH].

Mr. DENNY SMITH. Mr. Speaker, what kind of signal does the conference action send to the Pentagon and the American people—a signal that says, "Please continue buying overpriced weapons," a signal that says, "Please continue throwing our tax dollars down a sink hole," a signal that says, "Please continue with business as usual."

Mr. Speaker, I rise in opposition to the conference report and I urge my colleagues to defeat this bill.

Earlier this year the House passed several procurement reform amendments to the DOD authorization bill. These amendments were some of the most far-reaching reforms ever passed by this body, and they were passed by an overwhelming majority.

By a vote of 342 to 52 we mandated increased competition in defense procurement.

By a vote of 397 to 19 we closed the revolving door.

By a vote of 411 to 4 we defined allowable costs for defense contractors.

We had a right to be proud of these reforms that this package of amendments put in place. The bill and the reforms were then sent off to conference.

What happened in conference to these reforms? They were gutted. Sure, there is some high-minded rhetoric in the report, but let us not kid ourselves. Where we offered medicine to a sick system, the conference chose to only shake its finger, while asking the system to please get well.

Since that conference we have had the Goldwater-Nunn report, which in fact shows that the system is broke.

What kind of signal does the conference action send to the Pentagon and the American people? I say it again, a signal that says, "Please continue buying overpriced weapons," a signal that says, "Please continue throwing our tax dollars down the sink hole," a signal that says, "Please continue with a business as usual approach."

Mr. Speaker, this is not a signal that this body should be sending. Even if this body is not fed up with procurement scandals, I can assure you that the American taxpayers are.

Tomorrow we have a chance to send a different signal, a signal that it will no longer be business as usual, a signal that it is high time for a change.

The defense appropriations bill will be coming to the floor. It will contain the Pentagon reform measures as we originally passed them here in the House. That will have my support, and it should have yours.

Even if we do prevail tomorrow, our victory and the taxpayers' victory will not be assured. Once again the bill will be shephered off to conference and once again we run the risk of the conference turning it into a sacrificial lamb. This is no way to legislate.

In closing, let me keep it short and simple. If you want to continue the procurement scandals, if you want to weaken America's defense posture and if you want someone to hang a $600 toilet seat around your neck in November 1986, then I suggest you vote for the conference report. If you do not want these results, then I suggest that a vote against the conference report would be in order.

Mr. BONIOR of Michigan. Mr. Speaker, I yield 5 minutes to the gentleman from Georgia [Mr. ROWLAND].

Mr. ROWLAND of Georgia. Mr. Speaker, I thank the gentleman for yielding time to me.

Mr. Speaker, earlier this month we considered and passed H.R. 3174 which would amend the Federal Tort Claims Act to permit members of the Armed Forces to sue the Federal Government for medical malpractice. When I spoke against passage of that legislation, I pointed out that there was nothing in that bill that would assure that the quality of military medical care would be improved. Mr. Speaker, I still would maintain that position regarding H.R. 3174. Today, however, my purpose in rising is to discuss the conference report on S. 1160, the Defense Department Authorization Act of 1986.

In reviewing this report, I was pleased to find a number of provisions which, I believe, will ultimately result in the improvement of the quality of medical care being provided to our military personnel, retirees, and dependents. These changes will go much further, Mr. Speaker, than any malpractice actions would to provide the best medical care available in our military facilities. There are two provisions that I want to highlight at this time.

The first is section 1203 dealing with a demonstration project to test the use of a computer system in military hospitals. The reason I point out this provision is because it is an example of cooperation between the DOD and the VA in testing a decentralized hospital computer system which should result in a product which could serve both. Additionally, I would hope that this effort in cooperation would provide additional impetus for joint consideration of other information systems used by one which could be utilized by the other.

This would include DOD's Tri-Service Medical Information System and the Defense Enrollment Eligibility Reporting System. It is only through such potential sharing of systems that

we can avoid costly duplication and reinventing of the wheel by one department after another. I would close this comment by expressing the hope that the responsible officials in both organizations have also taken time to obtain the input of DHHS personnel in the development of the information systems for military and VA medical programs.

The second and perhaps most important provision which I would address here is section 1207 which requires a report to the Congress by the Secretary of DOD on the organizational structure of the military health care delivery system. This report, prepared by the Assistant Secretary of Defense for Health Affairs, has set goals which should set the stage for a fundamental change in the delivery of medical care within the Department. These revisions should assure the quality of medical care and its cost-effective delivery during peacetime and enhance medical readiness for any contingencies.

I am particularly impressed by the committee's goals to integrate and coordinate the planning, programming, and budgeting of military facilities, equipment, and staffing and, additionally, to improve the quality of medical care by a number of measures, including the adoption of rigorous quality assurance standards and procedures to monitor their implementation. As the plans are drawn to achieve these goals, I am certain that we will be able to look forward to a stronger, more effective, less costly military medical care system that will serve our Nation in peace and in time of conflict.

My final comment regarding this bill is to congratulate the committee for including section 563, the licensure requirement for health care professionals. Although this measure in and of itself will not guarantee the competence of the health personnel serving in military medical facilites, it goes a long way toward reassuring the public and the Members of this Congress. Licensure cannot be equated with competence but it does provide a preliminary check on the individuals' credentials and offers the opportunity to avoid some of the tragic results of inappropriate recruitment that have occurred in the recent past.

Mr. Speaker, this bill contains a number of other important provisions related to health care, which cannot be covered now. I recognize that health care is not the primary focus of S. 1160, but it is as vital to the well being of our military preparedness as any weapon system. Without a reliable system of health care delivery, our military men and women would be deprived of access to what they should rightfully expect—quality medical care. Can we expect the best from our Armed Forces if we are not prepared to provide them with the best of medical care?

Mr. BONIOR of Michigan. Mr. Speaker, I yield 3 minutes to the gentleman from New York [Mr. SCHUMER].

Mr. SCHUMER. Mr. Speaker, I rise in support of the rule.

This rule marks a long and to some I guess tortured history of what has happened with the Defense authorization bill over the last few months.

Let me say that when the authorization bill reached the floor I voted for it and voted for it proudly. I thought it was the best authorization bill to reach the floor of the House in a long time. It provided for a strong defense. Certainly the amount of money, $292 billion, was nothing to sneeze at, but at the same time it implemented some procurement reforms and said enough to certain weapons systems that no matter how much money we threw into them would not really work.

Something funny happened on the way to the conference and on the way back. Most of the things that I thought were good in the bill and many Members on this side of the aisle, at least, thought were very good in the bill, and on the other side, got lost and, of course, many people said they would not vote for the defense authorization conference report on that basis.

Well, a number of changes have occurred that make certainly the rule in order to vote for and I am sure some of us will vote for the conference report, others against. It does not meet all our needs, but certainly, first, the amount of money that is going to be spent as the Appropriations Committee has indicated by their reporting out their appropriations bill, which will be on the floor, is way below the $292 billion ceiling that we had sought. It is $276 billion.

Just as important, the procurement reforms, the four of them, will be attached and have been attached by the Appropriations Committee to the bill.

As I understand it, and as we all understand it, there is certainly a guarantee from the Appropriations Committee that if those procurement reforms are knocked out in conference, we will at least have a chance to vote them back in the amendments in disagreement when they reach the floor of the House, giving this House a chance to work its will on some amendments that have passed in the authorization bill on this floor overwhelmingly.

Given all that, I think the rule is worthy of support. It does not do everything that those of us who sought some changes in the conference report wanted. It does not do everything that those of us who were upset with the conference report wanted, but it certainly does some, and politics being the art of compromise, I can happily vote for this rule.

Mr. BONIOR of Michigan. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 320, nays 91, answered "present" 1, not voting 22, as follows:

□ 1440

Messrs. KASICH, SUNDQUIST, PACKARD, SMITH of Iowa, JONES of Oklahoma, MILLER of California, DANNEMEYER, ENGLISH, BREAUX, and GINGRICH changed their votes from "yea" to "nay."

Mr. GALLO changed his vote from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. ASPIN. Mr. Speaker, I call up the conference report on the Senate bill (S. 1160), to authorize appropriations for the military functions of the Department of Defense and to prescribe personnel levels for the Department of Defense for fiscal year 1986, to authorize certain construction at military installations for such fiscal year, to authorize appropriations for the Department of Energy for national security programs for such fiscal year, and for other purposes.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore (Mr. BROWN of California). Pursuant to the rule, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of July 29, 1985.)

The SPEAKER pro tempore. The gentleman from Wisconsin [Mr. ASPIN] will be recognized for 30 minutes and the gentleman from Alabama [Mr. DICKINSON] will be recognized for 30 minutes.

Mr. FRANK. Mr. Speaker, on the assumption that the gentleman from Alabama [Mr. DICKINSON] and the gentleman from Wisconsin [Mr. ASPIN] both support the bill, I seek recognition for 20 minutes as a Member opposed to the conference report.

The SPEAKER pro tempore. Does the gentleman from Alabama [Mr. DICKINSON] support the conference report?

Mr. DICKINSON. I do, Mr. Speaker.

The SPEAKER pro tempore. The gentleman from Massachusetts [Mr. FRANK] will be recognized for 20 minutes, the gentleman from Wisconsin [Mr. ASPIN] will be recognized for 20 minutes, and the gentleman from Alabama [Mr. DICKINSON] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Wisconsin [Mr. ASPIN].

Mr. ASPIN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I urge the adoption of the conference report on Senate 1160, the conference report on the defense authorization bill.

I would like to make one correction in the authorization bill report that came back from the conference. The conference report contained language in it which was the Boxer amendment in the House and the Grassley amendment in the Senate on labor costs. The two amendments offered on the floor of the House and the Senate were the same. They were agreed to in conference. There was no chance to change them in conference, so the language as it was exactly in both the House and the Senate, which passed, was put into the House bill and into the conference report.

That conference report, when the statement of managers came to be written, the statement of managers said that it was the understanding of the managers that this provision should go into effect on new contracts that were to be signed after the date of the enactment of the act. The language itself was not clear on that point, but I want to say, as one of the conferees, that that was not my intention.

So, creating a little legislative history here, the statement of managers on that issue is incorrect and, in fact, we passed under suspension of the rules a few minutes ago a bill which sets that matter straight and tells us when the bill is to go into effect, when this provision is to go into effect and under what circumstances.

But I want to make clear here that the statement of managers on that provision is incorrect.

Mr. Speaker, through some confusion as to what the agreed on position of the conferees was on section 917 of S. 1160, the statement of managers accompanying the conference report inaccurately reflects my view concerning the effective date of section 917.

Athough the statement of managers suggests that there is an understanding that the effective date is prospective, I and several other House conferees considered it to be effective on all contracts—including those currently in existence on the date of enactment.

For this reason, Mr. Speaker, the statement of managers language accompanying section 917 in the conference report on S. 1160 is inaccurate and should be disregarded.

Mr. Speaker, I yield 4 minutes to the gentleman from California [Mr. DELLUMS].

Mr. DELLUMS. Mr. Speaker, I find myself in an interesting position, because in a little while, I will be standing up in opposition to the conference report. But at this particular moment, I wear the hat of the chairman of the Subcommittee on Military Facilities and Installations.

In that regard, it was my responsibility to negotiate with our counterparts in the other body on the issue of base closures, and it is to that question that I would speak briefly.

Mr. Speaker, I would like to take a few minutes to explain one provision of this conference report on which I spent considerable time—the issue of base closures.

My colleagues will recall that I fought to have the base closures legislation considered as a provision of the military construction authorization bill where it properly belongs. This would have enabled the subcommittee on military installations to hold hearings and develop legislation in an orderly fashion. However, we were unsuccessful in convincing the Senate to agree and we, therefore, had to address this issue in the conference on the Defense authorization bill. Nevertheless, I believe that we have produced a workable compromise that will be acceptable to the House.

We were able to preserve the proper legislative oversight while providing the Secretary of Defense with adequate flexibility to initiate a closure or realignment if such a decision can be supported by the facts. The new law removes the requirement that the Secretary notify Congress when a base is a mere candidate for closure or realignment. The conferees believe this action will eliminate some of the anxieties that have routinely followed the public announcement of a study to realign or close an individual base. The law further requires that any closure list be submitted along with justification at the time of the annual budget submission. Any construction associated with a closure or realignment would have to be authorized and appropriated through the normal legislative process.

The issue that caused more concern than any other was the conferees' decision to delete any specific reference to the National Environmental Policy Act [NEPA] in section 2687 of title 10, United States Code.

The Senate bill waived the applicability of NEPA entirely for base closures when there is a Federal deficit. However, the House conferees rejected any language waiving NEPA (or parts of NEPA) in the case of base closures. The conference agreed to delete the specific reference to NEPA in section 2687 of title 10, United States Code, in the belief that this would not affect the requirement for the Defense Department to comply with the National Environmental Policy Act.

Mr. Speaker, it is not the intent of the conferees that this action be construed to override the applicability of NEPA in relationship to base closures or realignments. It is not our intention to exempt the Department of Defense from compliance with NEPA. Instead, the Secretary of Defense must make his own independent decision as to the applicability of NEPA and face the legal consequences if the decision is not in accordance with the requirements of the National Environmental Policy Act of 1969 (42 U.S.C. 4332).

□ 1455

The SPEAKER pro tempore. The Chair recognizes the gentleman from Alabama [Mr. DICKINSON].

Mr. DICKINSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, after more than 3 months of delay, I am very pleased that we are today considering the fiscal year 1986 Defense authorization conference report.

The report would authorize a national defense program of $302.5 billion for fiscal year 1986. At this level, we are freezing the defense budget in real terms to the level of 1985; and I might add, Mr. Speaker, that this was the authorization bill that was passed some months past, and then intervening events have occurred that would lower this substantially, even more.

For that reason, this bill represents a watershed in the Nation's reports and efforts to modernize our Armed Forces. Our Nation, buffeted by the large deficits and to a lesser extent caused by a crisis of confidence in the ability of the Department of Defense and perhaps the Congress to manage its affairs, has decided that the rate of spending for defense should level at this time.

Unfortunately, and I might add parenthetically that there is no evidence that any potential major adversary to the East has done the same.

With respect to the MX missile, the conference capped the program at 50 deployable missiles and authorizes the production of 12.

On the ASAT missile program, the conference report limits the Department of Defense to no more than three tests before October 1986.

Again, it is interesting to note that as of this date, our Government has used one of the tests; we have had one ASAT test, and it is estimated that the Soviets have had somewhere between 15 and 20, probably closer to 20.

I think that we have a lot of catching up to do and I for one am pleased that we have started with our ASAT Program.

The conferees recommended $2.75 billion for the Space Defense Initiative [SDI] Program and expresses the sense of Congress encouraging compliance with applicable treaties.

Now, the Members well might remember that the administration came in and asked for $3.7 billion for SDI. Our committee came out initially and cut this figure, to $2.5 billion; the Senate had $3 billion in theirs; this $2.75 billion was a compromise halfway between the House and Senate figure—and I think it is a reasonable figure.

With respect to chemical weapons, the conferees recommend authorization of $155 million for the production, but would delay assembly of any such weapons for 2 years. Additionally, the President is directed to consult with NATO before production can begin.

Concerned over recent spy activities, the conferees directed the Secretary of Defense to implement a polygraph testing program for military and civilian employees who have access to highly classified and secret information, top secret and above.

The program would be limited to 3,500 polygraph exams the first year, to not exceed 7,000 in subsequent years. This, I think, would have a good, salutory effect on any potential spies or saboteurs within the employment of the Department of Defense. I think it was a good idea, and I supported it in conference, and I am sure that the majority of the House Members will feel the same way.

These are just a few of the brief highlights of the bill, but let me say, Mr. Speaker, in speaking to all Members, the Members of this House went into conference in good faith with the bill that was approved by a very large majority in the House.

We went in with the intention of supporting the House position; and this is what we did. I think the conferees did a great job, and I think our chairman, the gentleman from Wisconsin [Mr. ASPIN] did an outstanding job in mediating and and moderating and working between the various factions that had to be dealt with.

Overall, we came out with about 80 percent of the House bill. We did a good job; we acted in good faith with the House numbers, to sustain the House position on the question of the binary chemicals. We even agreed in conference, even though subsequently it was not insisted on, because we modified the House position, we agreed that we would come back and if demanded, give an additional vote on that one issue to the House numbers, because we did do different from what the House had voted on.

So, we did a good job; I think this is a good product, I think it has been reported in the press and as we have been told that these amounts and some of the items have been reduced even further by the Appropriations Committee bill which came out, which will be voted on tomorrow, but as far as this membership and this Member is concerned, I think that this is a good conference report and I urge support from all Members.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Massachusetts [Mr. FRANK].

Mr. FRANK. Mr. Speaker, I yield myself such time as I may consume.

There is probably some question among some of the Members as to why an issue as important as the armed services authorization conference report appears to be attracting so little attention, and it has to do with the

fact that tomorrow we will be dealing with the appropriation, and many of the issues that are dealt here will be open again; things like the ASAT and star wars, the procurement issues, and I am hoping that we will get a rule that will put them in order; so that is why there is a certain lack of fervor, but I do not think the opportunity ought to be let pass without talking about some of these issues.

First of all, I think we ought to talk about Gramm-Rudman. We undergo a curiously disassociative process around here sometimes. Some of the people in this Chamber who are the world's most rabid deficit-reducers most of the time get lapses on occasion.

□ 1505

We are dealing here with a very large authorization, the single largest, I believe, that we have any control over since Social Security is not very much controllable.

The amount of money in this authorization is more than almost anybody except Caspar Weinberger thinks makes sense. Yet we have people who talk about how urgent it is to balance the budget, how we should have passed Gramm-Rudman 3 weeks ago without reading it because it does not read well. They are going to vote for this. We cannot have budget balancing in general with budget busting in particular.

Now we have parliamentary norms here which are fortunate and keep us relatively civil, and words like "hypocrisy" have no place among us. But I must say that there seems to me as wide a disparity between the professions of concern for the deficit we get from supporters of Gramm-Rudman and reality in terms of people supporting this authorization as I can imagine.

We have in here, let us take a look at the MX missile, and I congratulate Members on this side, my colleague, the gentleman from Massachusetts, who serves on this committee; they did a pretty good job trying to negotiate, given the intransigence they met in another place, which we are not suppose to mention under the rules.

But we voted for 40 MX missiles. Another group of people voted for 50. So we average 40 and 50, and we come out with a compromise. You know what happened in that conference, when you add 40 and 50 and divide by 2? You get 50. But that is small potatoes. What happens when you take $292 billion and $302 billion and you divide by 2, do you know what the answer is? Under Gramm-Rudman math—$302 billion. The House voted for $292 billion authorization, the Senate voted for $302 billion—oops, I am sorry I said that word, I did not mean that; we had another vote for $302 billion. So our conferees went in there, and they did it in good faith, I do not doubt that they went in in good faith and came out in good faith. The bill was in good shape, but they were in good faith. They added 302 and 292 together, and they got 302 after they divided by 2.

Now I could see 296, 297, I could hope for 294, but 302? Where is the concern about budget balancing? You talk about quick conversions.

A couple of months ago, a group of conferees, choosing between 292 and 302, went for the highest possible figure they were legally allowed under the rules of the House to accept, and now many of those same people are coming back preaching to us budget reduction. We are told that some of the poorest people in this country, ill children, elderly people who are suffering, they are going to have to be tough. You know, this is an aside: It strikes me as unfortunate that one of the ways in which politicians show how tough they are is by bearing up manfully under the suffering of other people which they themselves will not have to deal with.

So we are going to inflict some harm on some very poor people because when we added 292 and 302 and divided by 2, we came up with 302. We also had some procurement reforms in here, and they were also negotiated in good faith. And they are unrecognizable, substantially.

I want to congratulate and thank the members of the Committee on Armed Services because we passed a bill earlier today, and it was a genuine showing of good faith on their part to try and resolve the "should-cost" thing.

But as I said last week, we cannot just do it by ourselves, we have to have the cooperation of something, which we cannot mention.

Our problem so far has been with regard to procurement reforms, as somebody pointed out to me afterward, you know, we can do it in the House, but then we have to get some action from something over the rotunda. And it is true that you cannot get something out of nothing, but we cannot continue to get nothing out of something and still legislate.

So that is why we are in the situation we are in now.

Now we are going to have an unusual rule tomorrow, which I hope will be adopted, which will give us another shot and renegotiate this thing. But I hope that will not be necessary. We should have been dealing with this in conference some time ago. I do not think it is good government that we are so late in dealing with this conference report. We are here because the position of the House was not, in my judgment, well represented.

I do not doubt the good faith of people, and part of it is the problem with the committee system. And I understand that there are people here, we have Agriculture Committee full of farmers, Banking Committee full of people who are prohousing, we have an unrepresentative committee system. Maybe we have to look at the way we set up conferees and pick some nonhousing people for the Banking Committee conference and some nonarmed services types for this conference. That is a generic problem. But we cannot have what we had before. We sent a bill to conference, and I voted for the armed services bill this year, I thought it was a good bill, but it came out of conference unrecognizable in area after area: ASAT's, SDI, et cetera.

Now this is a warm-up for tomorrow's appropriation.

We are going to be asked to vote more money for MX missiles, which is a necessary compromise that no one thinks makes sense.

You know, there are people who do not want any MX missiles, and there are people who want 100 MX missiles. I have not met the strategist who thinks that 50 MX missiles makes any sense at all, unless you are a cement mason and you get to put all the cement on top of this stuff and the poor guys that have been put out of business by high interest rates; maybe that is not a bad job creation program. But we are going to vote for another 10 MX missiles that nobody thinks we need.

The people who are pushing us to do this, they are going to turn around and take money away from the Women's, Infants', and Children's Program, and we get letters from United Cerebral Palsy and Autism Foundation saying, "Please don't do what you are threatening to do to us under Gramm-Rudman." That does not make any sense.

We have a conference report today that I am going to vote against. When you take 292 and 302 and add them up and divide by 2 and get 302, please do not come in your Gramm-Rudman guise and play "Trick or Treat" with me because I think your disguise is not persuasive.

Mr. LOWRY of Washington. Mr. Speaker, will the gentleman yield?

Mr. FRANK. I yield to the gentleman from Washington.

Mr. LOWRY of Washington. I thank the gentleman for yielding.

Mr. Speaker, I congratulate the gentleman for his shrewd observation on actually what I think is the most important defense bill this week, which is Gramm-Rudman, because what Gramm-Rudman is going to do, of course, is tell us, "Cut those maintenance and operation accounts, those pay accounts," those things that all of us are for in our military security but do not sit here and vote to do it. You see, when we vote to pass this authorization bill today and at the end of this

week we vote to pass Gramm-Rudman, what we are doing is saying, "Take that part of the defense budget, that 60 percent of the defense budget that is O&M, readiness, things that we all support, take that and make a percentage cut on that, but the 39 to 40 percent of the defense budget which are the prior year contracts, that cannot be cut, and so on, those we cannot cut." So, really, the most important defense vote this week is going to be Gramm-Rudman at the end of this week, which takes away from our conferees, from our Armed Services Committee, from our military experts, the way to really choose the right way to spend money, the basic way to spend money for defense in this country, but instead of exempting out those things that should be cut, and we as a consequence cut readiness.

Mr. FRANK. That is a very good point, because Gramm-Rudman, as it comes over to us, exempts from its cutting things where we have contracts. I guess that is supposed to mean where we have contracts we get more of our money's worth. My impression from reading about the Defense Department contracting, if I had to go into a tough negotiation over contracts, I would want the Defense Department to be on the other side. I think that would be a nice situation to be in. The area where it seems to me the spending abuse pattern has been the greatest is the one that is going to be exempted.

Paying the young men and young women who serve us a decent wage, providing them good living conditions and all those other things, those are apparently not going to happen. I agree with the gentleman, but again I want to stress, it seems to me, this great disparity. Where are all the deficit reducers, where are all the budget balancers? $302 billion, more than everybody thinks, and nobody is here. So it is going to be now you see them, and now you don't.

When you talk about the authorization, they are going to be quiet. But then Gramm-Rudman is going to come up, and we are going to be cutting all these programs. I do not understand it.

Mr. LOWRY of Washington. Mr. Speaker, will the gentleman continue to yield?

Mr. FRANK. I yield to the gentleman from Washington.

Mr. LOWRY of Washington. I thank the gentleman for yielding.

The distinguished ranking minority member and the distinguished chairman of the committee—and this committee have done a good job this year on a good bill that came out of this House. I voted for the defense authorization bill that came out of this House because I thought it was a good bill. But what Gramm-Rudman will do for those who are going to vote for that at the end of this week is take away from them the ability by which to spend the money for the defense of this country so we can duck having to vote on the right way to do it.

One thing I would like to ask the chairman of the committee, what his opinion is that Gramm-Rudman would do.

Mr. FRANK. I will yield to the gentleman in one second. I just want to anticipate one thing that we will be told, which is that under Gramm-Rudman those are automatic cuts, and no one says they are for the automatic cuts, but the automatic cuts do not have to go into effect if we do a good job of deficit reduction program by program. I agree with that. But I do not have a lot of confidence that people who tell me I should buy 10 MX missiles for nothing, 10 MX missiles again. Nobody thinks that between 40 and 50 MX missiles you have done anything, nobody is for that. But you are telling us to do that.

That is why we may get into this problem, you are going to waste that money on that, you are going to waste money in these other areas, and then you are going to tell us that we are confronted with this, an unwillingness to deal seriously with the excesses in the military. And we did it in the House. I congratulate the gentleman from Wisconsin for doing a superb job in the bill that came forward in the House.

But then we have to go to conference. This is a bicameral legislature.

What came back bears no more resemblance to serious deficit reduction than it does to the man in the Moon.

That is the problem we have.

Mr. ASPIN. Mr. Speaker, will the gentleman yield?

Mr. FRANK. I yield to the chairman.

Mr. ASPIN. I thank the gentleman for yielding.

Let me say that I agree, certainly, with the gentleman from Washington about his appraisal of Gramm-Rudman.

Mr. FRANK. I take it that the gentleman does not agree with me, but I am not too upset, that is OK. We will take it as an agreement with the gentleman from Washington.

Mr. ASPIN. The gentleman from Massachusetts comments about Gramm-Rudman, too.

The gentleman from Massachusetts and the gentleman from Washington do not always agree on other things, but we agree on the effect of Gramm-Rudman. I think the gentleman from Washington is right that the defense vote this week, when you have got an authorization conference report, you have got an appropriation bill, and you have got Gramm-Rudman on the floor all in 1 week, the question before the committee, a small but not worthless prize will be given to the person who can tell us which one of those three things is the most important for defense, because the answer is Gramm-Rudman. There is no question about the effect that Gramm-Rudman will have, that it will be much more than we vote on here today in this bill or tomorrow and Thursday on the appropriation bill. And for the exact reason that the gentleman from Washington stated.

Basically, the question is, the Congress and the authors of Gramm-Rudman recognize that if we totally abdicated our total area of responsibility to the President to make the cuts where he wanted, that would be (a) unconstitutional and (b) Congress would be out of business. So what we have put in is a ministerial function. What the President is going to do is cut in a ministerial way, cut all of the programs by 5 percent, or whatever it is, that we are over the target. But what that does is create these absurdities where we are going to be creating in places that neither doves nor hawks would want to cut, if we were in fact to come back and say on the defense budget, "You have got to take x billion dollars out of the bill."

Mr. FRANK. I thank the chairman. Maybe we can trade back and forth here.

Mr. WEAVER. Mr. Speaker, will the gentleman yield?

Mr. FRANK. I yield to the gentleman from Oregon.

Mr. WEAVER. I thank the gentleman for yielding.

Mr. SPEAKER, I want to ask the chairman a question that has been puzzling me. Under Gramm-Rudman you are not allowed to lower salaries of employees, as I understand it, so you have to have layoffs. Well, also under Gramm-Rudman, you cannot touch existing contracts.

The question I have, and I am sure it probably has a simple answer, is: Is a military enlistment a contract?

Mr. ASPIN. According to the definitions that we have been told, or the conferees have been told, under Gramm-Rudman, that is not considered a contract.

Mr. WEAVER. That is not a contract. So you would have to lay off members of the armed services to meet the cuts.

Mr. FRANK. I thank the gentleman from Oregon. That is a good point.

Mr. DELLUMS. Mr. Speaker, will the gentleman yield?

Mr. FRANK. I yield to the gentleman from California.

Mr. DELLUMS. I thank the gentleman for yielding.

Mr. Speaker, I rise in opposition to the conference report, and for just a few moments I would like to change the thrust of the discussion away from Gramm-Rudman and explain why I voted against the bill when it came out

of full committee and why I voted against the bill when it went to conference, why I choose to oppose the bill as it comes out of conference.

One, this bill continues to move away from the reality that war, in my estimation, is not a viable option in a nuclear age. I do not believe that the majority of my colleagues have confronted that harsh reality. War is not an option in the nuclear age.

In this conference report, it contains strategies that move us beyond the concept of nuclear deterrence to the development of nuclear war-fighting capability. There are highly accurate, time-urgent, first-strike nuclear weapons in this bill. We have funded the strategic defense initiative, star wars, and when you put first strike weapons together with star wars, you have developed the capacity to fight nuclear war.

I think that is insanity of the highest order. I think in this bill there are very sophisticated levels of nuclear weaponry that create enormous problems for arms controllers on a geometric basis.

□ 1520

Finally, in this bill there are funds to deploy nuclear weapons, particularly those in Europe, that, in my estimation make nuclear war by accident, by mistake and by miscalculation that much more possible.

In this bill we embrace policies of intervention; in this bill we continue to cling tenaciously to the notions of the cold war as if there were only two nations in the world, the United States and the Soviet Union, and everybody else is terrain against which we act out this struggle.

In this bill we continue to assume that we can achieve peace by taking ourselves to the brink of thermonuclear disaster.

It is for these reasons that I oppose the bill.

We will deal with Gramm-Rudman. That has its own level of insanity. But this bill speaks to how we perceive our role in the world, how we choose to conduct our business in the world.

I will finally conclude with this: As we look at the nature of the world, Mr. Speaker and Members of this House, the problems of the world do not lend themselves to a military solution. You cannot solve the problems of poverty and hunger and disease and ignorance in the world that desperately need resolving by building a new weapons system, by building a new nuclear bomb, by deploying new nuclear weapons, by stationing troops all over the world. We have to address the misery that is all too real.

Finally, the other day I got up and talked about the fact that the children are the largest single group of poverty stricken people in this country. We are not addressing that problem. But in this budget we are providing great fear symbols to the children of America. The overwhelming majority of them believe that they will not achieve adulthood because some tired old people will destroy the world in the absurdity and in the insanity and in the cruelty, the harshness, of nuclear war. I say again that a nation that threatens its children is a nation on its way to dying. This conference report threatens the children, threatens the adults and threatens the world.

Anyone who believes that we must seek peace, that we must seek disarmament, that we must move away from the cold war that masquerades as our foreign policy, that we must move away from militarism and intervention and redirect our human priorities to address the miseries of people in the Third World and address the misery of poverty, hunger and disease that is real in this country, join with me in voting against this conference report.

The notion of its budgetary considerations is only one notion. But contained in this conference report are items much more dangerous to us than a few billion dollars. We desperately need to redirect them. But there is much more important reason why we ought to be opposing this conference report, not just on budgetary considerations but on the dangers it inflicts upon ourselves, upon our children and upon our children's children.

Mr. FRANK. Mr. Speaker, I reserve the balance of my time.

Mr. ASPIN. Mr. Speaker, I yield 2 minutes to the gentleman from Alabama [Mr. NICHOLS].

Mr. NICHOLS. Mr. Speaker, as we consider this conference report, I would like to address several misconceptions about the procurement reform measures agreed to in conference. It is obvious that some Members believe the conference agreement weakens or "guts" the significant provisions of the House bill. It has also been said that the House conferees were not committed or did not understand the provisions adopted by the House.

Nothing could be further from the truth. The House conferees were stalwart in their attempts to maintain the House position, and even went so far as persuading the Senate conferees to allow the House sponsors of various measures to address the conferees.

After many hours of discussion and deliberation, it was apparent that both Houses would have to concede on some issues in order to reach an agreement. We believe the conference agreement represents a compromise between the two bills in which the House won, not 50 percent of the battles, but at least 80 percent. As in any other conference agreement, we were not able to retain 100 percent of the House measure. One cannot just compare the conference report to the House bill; one must also look at how many provisions in the House bill were not included in the Senate bill and, in fact, were adamantly opposed by the Senate. Each time we were able to retain a House provision which had no Senate counterpart, we achieved a victory. In addition, the conferees retained the most stringent of the Senate provisions, thus strengthening the House bill.

Although everyone hopes to see "a provision they believe in" adopted as written, the nature of the democratic system dictates a process of compromise—and for this we cannot be faulted.

The conferees spent literally hours upon end debating these provisions. The conference followed countless hearings on the issue of procurement reform by the Armed Services Committee of both Houses of Congress. We believe that the conference agreement reflects that attention to detail which is necessary to craft provisions which will strike at the heart of the problems within the Defense procurement process.

I invite you to review a brief summary of the 17 procurement provisions in the bill which I will make a part of the RECORD today.

PROCUREMENT PROVISIONS ENACTED IN THE FISCAL YEAR 1986 DOD AUTHORIZATION ACT

Allowable Cost Reform Act—limits the costs which contractors may charge to DOD contracts.

Multiple Sources—requires the DOD to maintain at least two sources for a major system throughout the development and production of the system.

Revolving Door—limits the employment of Presidential appointees for two years after they leave the government and imposes new reporting and job-seeking restrictions on all DOD employees.

Cost and Price Management—requires DOD to ensure that contractors provide to the government data which they collect regarding manufacturing efficiency.

Progress Payments—limits progress payments to amounts commensurate with the amount of work performed, and not more than 80 percent of the value of that work with respect to undefinitized contracts.

Competition (Creeping Capitalism)—requires the DOD to develop and submit to Congress a plan for increasing competition, and report at the end of the year on its success or failure.

Subpoena Power—grants the Defense Contract Audit Agency the authority to subpoena defense contractor records.

Qualifications of Government Procurement Personnel—requires a minimum of eight years' experience in procurement before that person may be appointed as a program manager or may be assigned in a general officer position with responsibility for procurement matters.

Burden of Proof—shifts the burden of proof in reasonableness of contractor costs from the government to the contractor.

Mandatory Debarment of Employees Convicted of Fraud or Other Felonies—imposes a mandatory bar on the employment of any such person by DOD or a contractor.

Procurement Technical Assistance Programs—authorizes $5 million in fiscal year

1986 and $6 million in fiscal year 1987 as matching funds for any state or local nonprofit organization to assist businesses on bidding on defense contracts.

Increased Penalties for False Claims—increases the penalties for defense contractors who file a false claim from $2,000 to $1 million.

Reimbursement of Overpayments—establishes a penalty for knowing submission of inaccurate or incomplete cost and pricing data and authorizes the government to recover interest on amounts overpaid a contractor.

Should-Cost Analysis—requires DOD to report annually for Congressional review on why and which programs it intends to perform should-cost analyses on.

Control of Consultants (Contract Advisory and Assistance Services)—requires DOD to establish an accounting procedure to track and reconcile expended amounts with those budgeted and to establish new and precise definitions of consulting and other services.

Technical Corrections to the Competition in Contracting Act—makes technical corrections to the Competition in Contracting Act which was passed last year.

Rotation of Principal and Corporate Administrative Contracting Officers—requires the Department of Defense to establish a rotation policy for administrative contracting officers to ensure they do not establish a relationship with a particular contractor.

Mr. DICKINSON. Mr. Speaker, I yield 2 minutes to the gentleman from New Mexico [Mr. LUJAN].

Mr. LUJAN. Mr. Speaker, I requested these 2 minutes so that I might have a colloquy with the gentleman from New York [Mr. STRATTON].

As the gentleman is aware, the gentleman from Illinois [Mr. MICHEL], our minority leader, is the sponsor of some legislation to improve the transfer of technology from Government laboratories to the public and private sectors (H.R. 695).

I am concerned that the language of section 1534 not be interpreted to place further limitations on DOE defense research facilities ability to respond to the mandate of the Stevenson-Wydler Act as to the intent of H.R. 695.

DOE defense-related research facilities, like other facilities involved in tax-supported research, and mandated by the Stevenson-Wydler Act to facilitate the transfer of technology to the public and private sectors. H.R. 695 would extend those responsibilities. However, before technology can be transferred, those who may have interest must know it exists and understand its potential benefits. This requires the publication of information, that by its content must "promote" the "product", if it is to be successful. Such publications would appear to be advertising under the language of 1534 and, therefore, prohibited.

Currently, DOE has very restrictive regulations that curtail efforts in technology transfer. I am concerned that the language of section 1534 will hamper those efforts further, if not make them impossible.

Mr. Chairman, am I correct in assuming that the language which prohibits costs associated with "advertising designed to promote the contractor or its products" is not intended to further restrict DOE defense program research facilities from efforts to transfer technology to the public and private sectors?

Mr. STRATTON. Mr. Speaker, in response to the gentleman's question, I would say that the gentleman is absolutely correct. It was not directed toward the laboratories or toward the Stevenson-Wydler Act. The gentleman's assumption is absolutely correct.

Mr. LUJAN. I thank the gentleman for his explanation.

Mr. DICKINSON. Mr. Speaker, I yield 3 minutes to the gentleman from Ohio [Mr. KASICH].

Mr. KASICH. I appreciate the gentleman yielding.

Mr. Speaker, I would just like to make a couple points. We are holding hearings in the Armed Services Committee right now on whether we got our trillion dollars' worth of budget authority over the last 4 years. We had a dramatic change in the way we approached defense in this country when Ronald Reagan entered the White House, and we just spent 3 weeks having hearings on whether we got our trillion dollars' worth of spending.

Now we are going to pass a bill today or an authorization bill today that limits us simply to an inflation increase.

People are saying: Well, where is the deficit reduction being reflected in this House?

When you go from an increase of $1 trillion in authority for 4 years to no more than an inflation increase today, that is a dramatic change in the manner and in the attitude of this House, and certainly is a contributor to deficit reduction.

Additionally, when we get this appropriations bill on the floor, we are going to pass an appropriations bill that keeps us at last year's level, which is in fact a true freeze.

So we are, in an Armed Services Committee process, contributing to deficit reduction dramatically over what we have done in the last 4 years.

Additionally, we have tried to meet some of our duties as Members of Congress.

No. 1, we have tried to improve our strategic programs with the B-1, the Trident, and with the MX missile, which is in this bill, still keeping us at no more than inflation increase. We have tried to improve ourselves conventionally with the M-1 tank. As the Members all know, the Soviets have us outmanned 4 tanks to 1 in Europe alone. So we tried to bring some more tanks on line. We tried to bring on some F-15's and F-16's, the finest aircraft in the world, to keep up with the massive increase in the numbers on the Soviet side. So we have tried to do some things strategically and conventionally and at the same time we have been mindful toward reform. We are now saying we ought to buy the F-20. Everybody is hearing from their constituents. It is on "60 Minutes"; you read it in Reader's Digest. We are not going to complete the F-20, which is bringing down the prices on some of these other aircraft.

Additionally, we passed the Nichols bill, which has some "should" costs in there, so that these contractors do not get away with the abuses that they have over the last couple of years. We have got some reform language in there on the "should" costs on revolving door. It may not satisfy everybody on the Democrat side, in terms of some of that legislation, or on the Republican side, but it is a giant step forward in the procurement process.

The final part of it will probably be completed when we get the appropriation bill. So we are giving the American public a great deal, no more than an inflation increase, yet we are also modernizing our strategic forces, we are bringing on line our conventional forces, and we have been mindful to the need of reform in this House with both the Nichols amendment and a variety of other amendments, and we are doing it at no more than inflation increase and we are contributing to deficit reduction. At the same time, we are meeting our charge as Members of Congress to provide for the common defense.

I think it is a good authorization bill. I think it ought to be recognized for the change that we have had in this House, and we do want to be contributors to deficit reduction.

Mr. FRANK. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I guess when arithmetic fails, you have got to resort to logic. My friend from Ohio has just said, well, of course this is deficit reduction, never mind that it is $302 billion when the House voted for $292 billion and it is an inflation increase.

He says: Look at it this way. We have spent so much on defense in the last 4 years, you ought to be grateful we are only grabbing this much this year.

That is an extraordinary way to go about deficit reduction.

Someone else might suggest that the areas where you had grotesquely underspent in some previous years, like for some of the programs that I think help the poor or where we have taken away medical benefits from older people, that some of those might be entitled to more.

The gentleman from Ohio has a new measurement standard. Having been greatly favored in the past, if you are

only partially favored in the future, you have, therefore, sacrificed. That is the kind of sacrifice all of us can get into.

Mr. Speaker, I yield the remainder of my time to the gentleman from California [Mr. LEVINE].

Mr. LEVINE of California. I thank the gentleman for yielding, and I commend the gentleman for the points that he has been making in the course of this debate.

I think the gentleman from Massachusetts very eloquently and appropriately illustrates the type of new math that is going on in the course of the development of this conference report. He points out appropriately that when we compromise between 292 and 302, on the one hand, we get 302. When we compromise between 40 and 50, on the other hand, we get 50.

Another point of compromise that I am not sure was mentioned thus far in the course of this debate is that we compromise between killing or modifying some 22 new weapons systems in the House version of the bill versus zero in the Senate version of the bill, and we end up with zero again.

In each of the instances that we are talking about, some form of compromise between the House version and the Senate version, we either get very close to the Senate version or the Senate version itself.

More than anything else, whether any of these particular points on its own merits is determinative with regard to this piece of legislation, I think it raises very key questions about process, and I would hope that in the course of the coming session that as much good effort as the chairman has put into this bill, as the Members have put into this bill and as the staff have put into this bill, I hope that we will analyze as effectively and as analytically as possible the process which brings us, on the one hand, from a very good bill as it left the House to a bill which is not nearly as good and, in fact, which I believe is very significantly flawed as it comes back to us in conference.

Mr. ASPIN. Mr. Speaker, I yield myself 1 minute.

Mr. Speaker, let me talk for just a second about this conference bill, because it was a compromise on the merits. I do not want the remarks of the gentleman from California to go unresponded to. The point is that on all of these issues there was some compromise involved. On the 50 MX, we did agree to 50, which is the Senate number, but we agreed on the freeze, a permanent cap, of 50, which is in the House language.

On the procurement issues, there were a number of issues that were terminated in the House, three in the Senate. We compromised on the issue in about half. It was a total of 31 in the House, 3 in the Senate, a total of 34. We ended up with 16 of them cut in the final version. So there was an agreement on the merits.

□ 1535

The issue is that the conference is a compromise. I do not want people to go away thinking that we did not have compromise on these issues.

Mr. Speaker, I yield 3 minutes to the gentlewoman from Colorado [Mrs. SCHROEDER].

Mrs. SCHROEDER. I thank the gentleman for yielding me this time.

Mr. Speaker, military life imposes grueling burdens on family life. Virtually all members of the military are transferred from place to place every 2 or 3 years. This means that the spouse and children have to abandon old friends and make new ones, leave old jobs and find new ones, leave the old house and find a new one. They become resentful and ask the member of the military why he or she doesn't quit and take a job which does not require this continual dislocation.

To make matters worse, each move costs the family money. The amount of reimbursement the Government provides is just plain inadequate.

Further, military service sometimes involves long periods of separation. Spouses are understandably upset when they learn that their sailor spouses are off on a 6-month cruise. And, military service sometimes involves danger.

We cannot maintain a peacetime military of 2.2 million individuals by shutting our eyes to the very real conflicts and difficulties of military family life.

The conference report before us today confronts the problem and contains some meaningful solutions. Title VIII of the legislation is the Military Family Act of 1985. Section 802 creates an Office of Family Policy which is established to coordinate and study military family programs and policies. I expect that this office will tell us what further legislation is needed to reduce the pressure on military families.

Section 806 is a very strong provision to help spouses of members of the military find jobs when they are transferred from place to place. The section tells the President to order measures to increase the employment opportunities for spouses. The provision suggests exempting from the competitive service positions abroad and providing preference in nonappropriated fund jobs. Further, the section mandates that spouses be given preference for any position above GS-7. This means that, where a spouse makes the certificate of the top three applicants qualified for a position, the spouse must be selected unless a preference eligible is also on the list. The suggested steps for the President are not exhaustive. He has considerable authority under title 5, United States Code, to provide for noncompetitive appointment of spouses in Federal jobs. The President should use this authority. No issue is of greater concern to military spouses than the ability to get a job. And members of the military have better morale when their spouses are able to get jobs.

Other sections in title VIII make more reasonable the cost of housing, authorize the use of relocation services, reduce food costs at messes for junior enlisted families, and provide for reporting of child abuse cases.

Title VI of the bill contains a number of important new allowances which will ease the burden of military life on families. Most important, section 612 raises the level of travel and per diem reimbursement to the level that civil service employees receive. This is crucial if service members are not to lose money each time they move. Yet, I was distressed to note that the Appropriations Committee decided not to fund these higher levels. I, therefore, intend to offer an amendment to the Defense appropriations bill to provide the additional $193 million needed to pay the higher amounts and to reduce procurement accounts across the board to pay for it.

Title VI also has provisions allowing for the advance payment of housing allowances to cover rent deposits, doubles the family separation payment from $30 to $60 a month, doubles the dislocation allowance from 1 month's basic pay to 2, makes temporary lodging expenses an entitlement, and expands the allowances for baggage and transportation of household effects.

Of particular note, section 651 established a program to pay for dental benefits for spouses and children under CHAMPUS. This program would allow for sharing of premium costs between the Department and the beneficiaries. This benefit is strongly desired and can be provided at low cost. The bill allows the program to be set up during fiscal year 1986 and to be implemented in the next year.

Title VII of the bill revises and strengthens the survivor benefit plan under military retirement. The percentage cost of providing a survivor benefit will not increase with inflation because section 714 indexes the base amount for reduction. Section 716 permits the coverage of both a former spouse and a child. Section 721 requires the concurrence of a spouse or former spouse before survivors benefits can be waived. And, section 722 clarifies that spousal agreements dividing property and survivor benefits are enforceable. All of these changes will help protect both spouses and former spouses from being left destitute after divorce or the death of the military member.

We still have a long way to go to making family life and military life compatible. Yet, this bill makes giant strides in that direction.

Mr. DICKINSON. Mr. Speaker, I yield 3 minutes to the very distinguished, able, articulate, and persuasive gentleman from California [Mr. HUNTER].

Mr. HUNTER. I thank the gentleman for yielding to me.

Mr. Speaker, I just want to say a few words about the binary chemical munitions program that is going to be coming up in the appropriations bill. It was a matter of some concern to Members of this House.

We passed a House provision that had a number of limitations on expenditure. It said that funds could not be used for final assembly until before October 1, 1987, and then only if a verifiable international agreement had not been entered into, and only if the President certified to Congress a number of conditions. Namely, that it was in the U.S. security interest to go forward; that performance specifications had been met; that Federal safety requirements were met in the handling, storage and use; that a plan for destruction of current stockpiles is ready to be implemented; and also that final assembly is then carried out only after a 60-day period when Congress has been notified. I think very importantly that the peacetime storage of the binary elements are in separate States.

On that point, I think it is going to be brought out in the ensuring discussion during the appropriations bill that in fact we have a number of present unitary nerve gas containers that are leaking. We have an opportunity here to replace those leaky, very deadly nerve gas containers, and the nerve gas that is in them presently can kill on contact; it is very deadly. We will have an opportunity to replace that with a binary system where you have two elements that are relatively harmless until you combine those elements.

Under the program that was passed by the House, those two elements are going to be kept in separate States. That means that the mayor of Pine Bluff, AR, instead of having nerve gas in his particular community, is now going to have an element akin to sulfur or perhaps an element akin to pesticide, to a species of pesticide, but he is not going to have the two elements together which together form nerve gas.

It is a very important safety measure, and I would urge all the Members of the House to act in the interest of common sense and safety and to vote for this program when it comes up on the appropriations bill. I commend the conferees for the work that they did. I think that the provisions that they have allowed in the conference still provide for some NATO consultation, which was one of the interests of the House when we passed our bill.

Mr. DICKINSON. Mr. Speaker, I yield 1 minute to the gentleman from Ohio [Mr. KASICH].

Mr. KASICH. I thank the gentleman for yielding me this time.

Mr. Speaker, let me just make a point as we consider this bill. I think that sometimes there is a tendency to look at things in complete isolation. I think we have got to make some comparative examples here.

The question is why have we given ourselves a trillion dollars in additional budget authority over the last 4 years? Frankly because former Presidents all think we need it. Anybody who has spent time studying defense issues feel that we need it. Not only do we need it because defense in real terms declined, but also because of the Soviet threat and the increased Soviet threat.

Even after a trillion dollars increase in authority, and even after only an inflation increase in this bill, we still are at historically low levels in defense spending, with defense only making up somewhere around 25 to 26 percent of the total budget when it was about 50 percent of the budget under JFK, and as a percentage of GNP we are still significantly lower than where we have been historically.

I think that it all falls together; that we need to do some things to improve the common defense, and I think we are doing it intelligently, and I think we are doing it mindful of reform.

Mr. ASPIN. Mr. Speaker, may I inquire how much time is remaining on each side?

The SPEAKER pro tempore. The Chair will state that the gentleman from Wisconsin [Mr. ASPIN] has 8 minutes remaining and that the gentleman from Alabama [Mr. DICKINSON] has 5 minutes remaining.

Mr. ASPIN. I thank the Chair.

Mr. Speaker, I yield 2 minutes to the gentleman from Florida [Mr. BENNETT].

Mr. BENNETT. I thank the gentleman for yielding me this time.

Mr. Speaker, there has been some confusion concerning the coverage of section 921 of the conference report. This is the section dealing with post-employment restrictions on Department of Defense personnel. Allow me to clarify who is covered.

It was our intent during the conference to include both civilians and military employees of the Department of Defense in this section. After the conference some people suggested that the language applied to only a handful of civilian personnel. This is not correct. The Department of Justice and the Congressional Research Service agree that the phrase "Presidential appointees in Federal employment" covers all persons who hold an office, position, et cetera, from the President and that this includes military officers.

So any military officer who is a program manager, a test officer, or in any other position where he is a negotiator with a defense contractor, can no longer retire and immediately go to work for that defense contractor. This provision also covers civilians who are Presidential appointees, for example, assistant secretaries of the services.

This is what we intended in conference and I am glad that the Department of Justice agrees. I would like to enter for the RECORD the opinion of the Department of Justice and the opinion of the Congressional Research Service.

This provision is not adequate to deal adequately with the problem of the "revolving door," however. For that reason the original amendment which the House attached to Defense Authorization Act by a vote of 398 to 19, is now part of the Appropriations Act. I expect our conferees on Appropriations will learn from the problems we had in the defense conference and will help us pass a truly meaningful provision.

U.S. DEPARTMENT OF JUSTICE,
OFFICE OF LEGISLATIVE AND INTERGOVERNMENTAL AFFAIRS,
Washington, DC, September 1, 1985.

Hon. CHARLES E. BENNETT,
House of Representatives, Washington, DC.

DEAR CONGRESSMAN BENNETT: This is in response to your letter of August 2, 1985, requesting a legal interpretation regarding the coverage of Section 921 of the Defense Authorization Act. Your letter requests our opinion about what level of positions are considered "Presidential appointees" for purposes of Section 921, what activities would be covered by the clause in Section 921 which reads, "as a primary government representative in the negotiation of a government contract or the settlement thereof," and whether members of the Armed Forces of the United States are covered by Section 921.

In our opinion, Section 921 would cover all persons who hold an office, position, etc., from the President, pursuant to the President's authority under the Constitution of the United States or statutes enacted by the Congress. Thus, its coverage would include members of the Armed Forces who are appointed by the President, such as, for example, newly commissioned graduates of the Service Academies. It would not cover, however, all GS-11 and above employees who hold their appointment not from the President, but from the head of their employing agency or some other appointing authority instead. Our interpretation of the term "Presidential appointee" is based on the application of a well-known principle of statutory construction which, in the absence of definitions in a statute of its terms, requires us to assume that Congress intends that its world be interpreted as taking their "ordinary, contemporary, common meaning." *Perrin* v. *United States*, 444 U.S. 37, 42 (1979). See also, *United States* v. *Rodgers*, U.S. , 104 S. Ct. 1942, 1946 (1984); *Richards* v. *United States*, 369 U.S. 1, 9 (1962); see generally, 2A Sutherland Stat. Const.

§§ 47.28-47.31 (4th Ed.). Thus, Article II, Section 2 of the Constitution of the United States provides:

"[H]e [the President] shall nominate, and by and with the advice and consent of the senate, shall appoint ambassadors, other public ministers and consuls, judges of the supreme court, and all other officers of the United States, whose appointments are not herein otherwise provided for, and which shall be established by law. But Congress may by law vest the appointment of such inferior officers, as they think proper, in the president alone, in the courts of law, or in the heads of departments.

"The president shall have power to fill up all vacancies that may happen during the recess of the senate, by granting commissions which shall expire at the end of their next session."

Webster's New World Dictionary of the American Language, Second College Edition, p. 67 (1980) defines "appoint" to mean, among other things, "to name or select officially for an office, position, etc." See also, Black's Law Dictionary 128 (4th ed. 1968). Webster's furthermore defines "appointee" as, "a person appointed to some position," and "appointment" as, "1. an appointing or being appointed; specif., a naming or selecting for an office, position, etc.; 2. a person so selected; 3. a position held in this way. . . ." See also, Black's Law Dictionary 128 (4th ed. 1968). a "Presidential appointee" is, therefore, a person who holds an office, position, etc. from the President pursuant to the President's authority under the Constitution or statute. Viewed in this light, commissioned officers of the Armed Forces of the United States would be covered by Section 921 but enlisted members of the Armed Forces, including noncommissioned officers, and other members of the Armed Forces who are not appointed by the President would not be covered. Likewise, civilians in federal employment who hold their employment through an appointment made by the President pursuant to Constitutional or statutory authority would be covered, but other federal employees, the majority, would not be covered.

Section 921 also does not define "a primary government representative in the negotiation of a government contract or the settlement thereof with a defense contractor." Thus, the meaning of this clause should be determined by giving the words their usual meaning. *Perrin* v. *United States*, 444 U.S. at 42. See also, *United States* v. *Rodgers*, 104 S. Ct. at 1946; *Richards* v. *United States*, 369 U.S. at 9; *United States* v. *Conlon*, 202 U.S. App. D.C. 150, 628 F.2d 150, 154 (1980). Thus, Webster's New World Dictionary of the American Language, Second College Edition, p. 952 (1980) defines "negotiation" as, "a negotiating; specif., [. . .] a conferring, discussing, or bargaining to reach agreement," and defines negotiate to mean, "to carry on business . . . to confer, bargain, or discuss with a view to reaching agreement . . ., to make arrangements for, settle, or conclude (a business transaction, treaty, etc.). . . ." Webster's, p. 1129, defines "primary" to mean, among other things, "chief" and "main." Webster's, p. 1304, defines "settlement" as, in part, "a settling," and at page 1303 defines settle as, "to fix definitely; determine or decide (something in doubt) . . . , to decide (a legal dispute) by agreement without court action . . . , to reach an agreement or decision . . . , to accept something in place of what is hope for, demanded, etc. . . . , to pay a bill or debt. . . ." In view of these definitions, we believe that a rather broad range of activities would be covered by Section 921. But we are unable to determine, in the abstract, precisely what activities would be covered.

We think that Section 921 is unnecessarily vague. Should Congress determine that a statute like section 921 is warranted, the statute should be drafted to clearly define the persons who are covered. In this regard, see 18 U.S.C. §§ 201(a), 202(a) for examples of the use of definitions which have proved to be helpful in resolving issues of statutory interpretation. Even with these definitions, however, difficult questions regarding coverage of the federal bribery and conflicts of interest statutes have arisen. See, e.g., *United States* v. *Hollingshead*, 672 F.2d 751 (9th Cir. 1982); *United States* v. *Del Toro*, 531 F.2d 655 (2d Cir. 1975). Since Section 921 does not include definitions for any of its terms, it would, if enacted, invite litigation regarding their meaning and would be difficult to enforce. Indeed, your inquiry to us illustrates that problems of interpretation are likely to arise in the future should Section 921 be enacted.

If we may be of any further assistance, please tell me.

Sincerely,

PHILLIP D. BRADY,
Acting Assistant Attorney General.

CONGRESSIONAL RESEARCH SERVICE,
THE LIBRARY OF CONGRESS,
Washington, DC, September 27, 1985.

To: Hon. Charles Bennett.
From: American Law Division.
Subject: Coverage of "Revolving Door" Provision in the Defense Authorization Act of 1986.

This memorandum responds to your request concerning the scope and coverage of the "revolving door" restrictions which have been added to the Department of Defense Authorization Act, 1986 (S. 1110, 99th Congress). This section extends to a "Presidential appointee in Federal employment" who acts as a primary government representative in negotiations with a defense contractor. Sec. 921, S. 1110, see Conf. Rpt. No. 99-235. You have specifically inquired as to whether the term, "in Federal employment," is broad enough to encompass military as well as civilian appointees.

The term "in Federal employment" is not defined within the Act. Furthermore, the context of the language of the provision within the Act does not provide a definitive interpretation of the precise meaning of the term. The phrase "in Federal employment", depending on its context and the intent of the legislative drafters, is, of course, broad enough to include both military and civilian employment, but in certain other contexts could, at least arguably, apply only to civilian employees. Narrowing terms or phrases, such as "civilian" employment or "civil" service or employment, or "competitive service", or the like, were not used in this particular provision, and it is therefore not unreasonable, illogical, nor inconsistent with other provisions of federal law, to aver that this provision of the Act, and specifically the term "in Federal employment" applies to both military and civilian personnel, if this were in fact the intent of Congress. The difficulty appears to lie in determining the intent of Congress in this provision.

General principles of statutory construction hold that the starting point for interpretation of a statute is the language of the law itself. *Consumer Product Safety Commission* v. *GTE Sylvania, Inc.*, 447 U.S.C. 102 (1980); *Dickerson* v. *New Banner Institute, Inc.*, 460 U.S. 103 (1983). The plain and ordinary meaning of the words used in a law will control its interpretation (*Malat* v. *Riddell*, 383 U.S. 569 (1966); *Perrin* v. *United States*, 444 U.S. 37 (1979)), "absent a clearly expressed legislative intention to the contrary." *CPSC* v. GTE, Sylvania, Inc., supra at 108; *North Dakota* v. *United States*, 460 U.S. 300, 312 (1983); *Aaron* v. *Securities Exchange Commission*, 446 U.S. 680 (1980). The intent of the legislature is of course of principal importance in determining the meaning of a law, and the Supreme Court has ruled that it should be generally assumed "that Congress expresses its purpose through the ordinary meaning of the words it uses." *Escondido Mutual Water Co.* v. *La-Jolla*, 104 S. Ct. 2105, 2110 (1984); *American Tobacco Co.* v. *Patterson*, 456 U.S. 63 (1982).

Furthermore, the courts will generally not attempt to construe language in a law in isolation, but will look to the context of the language in the operation of the statute in its entirety, and will look to the object and policy of the law to give the act the most "harmonious, comprehensive meaning possible in light of legislative policy and purpose." *Weinberger* v. *Hynson, Wescott & Dunning*, 412 U.S. 609, 631-632 (1973); *Philbrook* v. *Glodgett*, 421 U.S. 707 (1975).

Turning to the language of the law itself, the phrase "in Federal employment," as noted above, is not defined within the Act. The context of the language and the provision within the Act may give some indications, or at least support for arguments, concerning the meaning of the phrase and the intent of Congress, but it does not appear definitive.

The provision in question is in a military authorization bill and deals with defense contracting and the potential conflicts of interest and influences upon Federal representatives which may arise in defense and military contracting. It thus might logically be argued that military personnel would have been intended to have been included in a provision dealing with conflicts in military authorizations and defense contract matters, and that nothing in the status of presidentially appointed military personnel, as opposed to appointed civilian personnel, would insulate them or make them immune from the influences and potential conflicts to which this measure is addressed.

It may be noted that in the immediate subsequent sections of the Act, dealing again with the "revolving door" issue, "former employees of the Defense Department", specifically includes "active duty or civilian employment with the Department" (Section 922); and that requirements concerning reporting contacts with defense contractors by "Defense Department officials", also cover certain civilian and "active duty" personnel (Section 923). Now it may be argued on the one hand that since military personnel were specifically included in the latter two sections (922 and 923), but not mentioned in Section 921, that Congress did not intend to cover military personnel in the provision in question. On the other hand, however, it may be argued that when Congress wanted to specifically distinguish between "civilian" and "military" personnel, that they would draft language such as "civilian" employees and "active duty" members of the armed forces as in Sections 922 and 923. No such limiting language was employed in Section 921. In Sections 922 and 923 Congress was addressing specific positions and grades of personnel in the Department of Defense and thus needed to articulate which "civilian" positions (GS-11 and

above) and which "military" positions (0-4 and above) in the Department of Defense were covered. In Section 921 no such delineation or articulation was needed since that section covers only those persons who were "Presidential appointees." It may be argued that there was thus no need to specifically articulate both "civilian" and "military" persons covered in Section 921, and that the language used in that section was generically similar language, and provided for a similar purpose and policy as that used in the latter two sections which obviously applied to military personnel. Arguments based on the context of the provision in the Act may thus be forwarded for "internal consistency" of the three consecutive "revolving door" conflict of interest provisions in the Act.

The language of the Act and the context of the provision within the law may thus give indications of the meaning of the terms employed but are not definitive on the issue of its application. In examining next the legislative history to determine congressional intent, it appears that the scant legislative history provided tends to support the argument for internal consistency of the three conflict of interest and "revolving door" provisions of the Act as to their applicability to military personnel as well as civilian. The manager's report on the legislation [Joint Explanatory Statement of the Committee of Conference] does in fact group the three sections together, discussing the provisions of the new "revolving door" regulations and restrictions upon employees as a whole, and in relation to one another as agreed to by the conferees. There is no other language in the conference report of assistance in this matter. The manager's report states as follows:

PART B—PROCUREMENT PERSONNEL MATTERS

LEGISLATIVE PROVISIONS ADOPTED

Conflict of interest (sec. 921-923)

Both the House and Senate bills contain provisions (sec. 607 and sec. 810, respectively) limiting the activities of Department of Defense employees with respect to post-government employment. The Senate bill would provide that employees (O-4 or GS-11 and above) report contacts with a contractor regarding future employment possibilities and disqualify themselves from any actions relating to that contractor. It would also strengthen the reporting requirement for Department of Defense personnel who leave the government and go to work for a defense contractor.

The House bill would place an absolute two-year prohibition on employment by a defense contractor of any employee who had significant responsibilities for a procurement function with respect to that contractor or any of its subsidiaries or affiliates. It would also require a contractor to submit annually a report on those persons in its employ who held positions in the Department of Defense in the previous two years. Violation of the prohibition would result in a $10,000 fine and up to one year's imprisonment for the person accepting such compensation; a fine in an amount of $100,000 or three times the compensation paid if a contractor knowingly violates the prohibition; and a fine of $10,000 for failure of a company to file the required reports.

The House receded with an amendment which would add a new provision to the Senate bill prohibiting Presidential appointees who act as a primary government representative in the negotiation or settlement of a government contract from accepting employment from that contractor within two years after the termination of such activities. If that person knowingly violates this ban, the person would be subjected to a $5,000 fine and up to one year's imprisonment and the contractor employing the individual would be subject to liquidated damages of $50,000. (131 CONGRESSIONAL RECORD H6647, July 29, 1985 [Daily ed.].)

As to external assistance in interpreting the provision in question, it should be noted that the term "in Federal employment" does not appear to be a legal term of art with a specific meaning in all cases. Case law and judicial interpretation have not been of assistance in ascertaining the general meaning of the phrase for all purposes.

The term "in Federal employment" is not one which appears with regularity in substantive provisions of the United States Code. When provisions of law apply to those in Federal employment, or those employed by the government, and no specific delineation is made, then reliance must be made on the legislative history to ascertain the intention of Congress as to whether uniformed personnel were meant to be within the provision. *Johnson* v. *Alexander*, 572 F. 2d 1219 (8th Cir. 1978), Congress did not intend for uniformed personnel to be considered in federal employment for purposes of Title VII of the Civil Rights Act, the equal employment opportunity provisions, 42 U.S.C. § 2000e-16. But note for purposes of Federal Tort Claims Act that a uniformed military person is considered an "employee of the Government" such that the United States is liable for his tortious conduct committed in the course of his employment, 28 U.S.C. § 1346(b). See Jayson, *Handling Federal Tort Claims: Administrative and Judicial Remedies*, Vol. I, at 1-8 (1985): ". . . the United States employs more than 5 million people, military and civilian, for whose tortious conduct it is answerable in damages under the Tort Claims Act."

In certain circumstances the term "officer or employee" of the government, or similar terms of that nature, will not cover military personnel when such terms are defined or expressed with restrictive language to mean one appointed in the "civil" serivce (such as, for example, for purposes of title 5, United States Code, see specifically 5 U.S.C. § 2105). The term "civil service" is used to specifically exclude military personnel from its scope. 5 U.S.C. § 2101. However, when used without such limiting language as in title 5 of the U.S. Code, terms such as "officers and employees" of the government may be inclusive of military personnel, depending on the legislative intent.

In the context of federal statutes relating to conflicts of interest generally, or "revolving door" restrictions specifically, the phrase that is employed is usually "officer or employee of the United States" rather than a person "in Federal employment." However, in such conflict of interest provisions an "officer or employee of the United States" generally includes active military officers. See, generally, 18 U.S.C. § 201-209, specifically 18 U.S.C. § 207 re post-employment ("revolving door" restrictions) and Memorandum of Attorney General Regarding Conflict of Interest Provisions of Public Law 87-849, 28 F.R. 985 (1963), 18 U.S.C. § 201, note.

In sum, the phrase "in Federal employment" appears broad enough in legal parlance, as well as in general usage,[1] to include uniformed military personnel within the operation of a law, if intended by Congress. The provision in question, on its face and in the context of the Act as a whole, is not definitive as to whether military personnel are intended to be included, although coverage of such persons may arguably appear more logical and internally consistent with other provisions of the Act, given the nature of the restrictions and the subjects to which it applies, than an intentional exclusion of such persons. The legislative history of the provision, in the form of the "manager's report," appears to provide again, on balance, for an argument to support a contention of internal consistency of the three "revolving door" provisions of the Act to cover both civilian and military personnel, rather than an exclusion of uniformed personnel in the provision in question.

JACK H. MASKELL,
LEGISLATIVE ATTORNEY,
American Law Division.
SEPTEMBER 27, 1985.

□ 1545

Mr. ASPIN. Mr. Speaker, I yield 2 minutes to the gentleman from Oregon [Mr. WEAVER].

Mr. WEAVER. Mr. Speaker, I thank the gentleman for yielding this time to me.

Mr. Speaker, I rise in opposition to the conference report. I agree with the remarks of the gentleman from California [Mr. DELLUMS] that this bill continues us into the vicious cycle of the arms race toward nuclear holocaust.

I have long felt that the only hope we have in this world of eliminating nuclear weapons is when the hawks, the militaristic hawks, decide that they cannot fight a war—which they in nature want to fight—so long as there are nuclear weapons. It is impossible to fight a war, and the hawks realize this, and so they say we will do away with the nuclear weapons so we can fight a regular war that we used to enjoy so much in the past.

That sounds like it is a strange situation, but I have just recently read in a book called "War" by Gwynne Dyer—a remarkable book that I urge all Members to read—that the samurai class in Japan, once the rifle had been developed by Japan, found that they were subjugated by all the other people of Japan and were no longer the top dogs. So by the time that Admiral Perry landed in 1850 in Japan there were no more guns in Japan, the reason being that the samurai class, in order to stay top dogs in Japan, had in effect legislated guns out of existence in Japan.

Now perhaps our hawks will realize that you cannot fight the war that you perhaps would like to fight until finally you eliminate nuclear weapons

and save humanity from the impending nuclear holocaust.

The SPEAKER pro tempore. The time of the gentleman from Oregon [Mr. WEAVER] has expired.

Mr. DICKINSON. Mr. Speaker, I yield myself 1 minute.

Mr. Speaker, some of our previous speakers have mentioned the fact that we came in with the budget figure of 302, which was the original figure going in, and that was the Senate's figure, so that we did not compromise because we went to the Senate figure.

I would just like to point out to the Members that the figure that we arrived at in conference is exactly the same figure that was approved by the Joint Committee on the Budget, 302.5. That is what we approved, that is what the Joint Committee on the Budget approved. We hit it right on the head. So we are not budget-busters, we came in right on the money. And again I reiterate the fact that we were operating in good faith, we did exercise our judgment as best we could, and I think we did a darned good job. I am proud of the conferees. And again, I would urge support of this bill.

The SPEAKER pro tempore. The time of the gentleman from Alabama [Mr. DICKINSON] has expired.

The gentleman from Wisconsin [Mr. ASPIN] has 4 minutes remaining and the gentleman from Alabama [Mr. DICKINSON] has 4 minutes remaining.

Mr. ASPIN. Mr. Speaker, I yield my remaining 4 minutes to the gentleman from Mississippi [Mr. MONTGOMERY].

Mrs. LLOYD. Mr Speaker, will the gentleman yield?

Mr. MONTGOMERY. I yield to the gentlewoman from Tennessee.

Mrs. LLOYD. Mr. Speaker, I thank the gentleman for yielding this time to me, and I rise in support of the conference report.

Mr. Speaker, I believe that this conference report represents a very responsible position adopted by the conferees which the House should support. There has been a great deal of concern about the fact that the House receded to the Senate budget level which was $10 billion above the House-passed level. Yet, I think this is misleading since, as I look at the major issues in the bill, there clearly has been significant "give and take" between the two bodies.

This bill contains funding for the most controversial strategic program to be begun in several decades, the Strategic Defense Initiative [SDI]. The bill authorizes a genuine middle-ground level on SDI funding at $2.75 billion and thankfully it replaces House restrictions on the SDI spending with a "sense of the Congress" statement. I am concerned about the deployment issues which the SDI might ultimately raise in the context of the 1972 ABM Treaty, but I was quite uncomfortable with what was viewed as "micromanagement" of the program through allocations of the reduction.

When all the arms control rhetoric is stripped away, the real reason that the Russians fear SDI emerges, and that is because this program will serve as a tremendous driver to accelerate United States high technology. The U.S.S.R. is already playing "catchup" in the high-technology arena and it realizes that the technology focus of SDI can only put them further behind in such fields as microelectronics, computer software, lasers, sensing systems, and communications. I recently chaired a series of hearings in my Energy Research and Production Subcommittee in the Science and Technology Committee on "Space Nuclear Power for the Nineties and Beyond." These hearings revealed tremendous enthusiasm and a great diversity of innovative approaches in the technical community which will serve to attract our best young people to meet the challenge of defense and civilian needs for space power.

This program is an example of the direct potential benefits of SDI in the defense sector as well as in civilian programs through effective technology transfer. I hope my colleagues will recognize the real "Gut technology issue" involved in this controversial R&D program; SDI will allow the United States to put on a real burst of speed in the high-technology race.

An important element in this defense programs bill is title XV which authorizes the Department of Energy's national security programs undertaken in support of the Department of Defense. These activities include the operations of weapons-related facilities such as the Y-12 plant in my district at Oak Ridge, TN. I am pleased to note that the conference report authorizes funding for all the critical projects to enhance security and safeguards for handling of uranium and to conduct environmental cleanup and control. These areas have caused us great concern at Oak Ridge over the past several years and I commend my subcommittee chairman, Mr. STRATTON, for seeing that they are addressed in this bill with adequate funding. I am also pleased that the conference report on energy, water, and development appropriations reflected these recommendations by the authorizing committee. This conference report also contains $41 million for final payment of obligations for community assistance to the city of Oak Ridge, and Roane and Anderson Counties, which are the result of commitments made under the Atomic Energy Act. The retention of the House position on this funding issue in S. 1160 was most important to me in that it gave great encouragement to the appropriations conferees in deciding this difficult budget item.

My strong support of this conference report is somewhat muted by my awareness of the funding levels which may be provided pursuant to the House Appropriations bill. In the case of SDI, the House will be just $250 million below this conference report level of $2.75 billion, but the overall DOD level of appropriations will be $18.5 billion below today's authorization level. Let me underline this fact for my colleagues; we will soon be asked to vote an a measure which is $8.5 billion below the House-passed authorization level for DOD.

There is a danger of a damaging pendulum swing in the present congressional deliberations on the defense budget. Initially, Mr. Weinberger made the mistake of refusing to tell us where cuts would be most acceptable even though such reductions were inevitable. Now the Appropriations Committee bill and the conference on the Gramm-Rudman deficit reduction amendment are going forward with serious implications for even a modest continued buildup in our national defense. I would hope that the President and both houses of Congress would recognize that there has been an overreaction. Now we are going to cut significant amounts of "muscle" as well as the well-known "fat" which accompanies any strategically "padded" budget request. I urge my colleagues to support this conference report in the spirit of proper balance between fiscal responsibility and the real needs of national security. I would hope that subsequent legislative and money bills on this floor will present as well-balanced an approach to fiscal and defense matters as this conference report.

Mr. MONTGOMERY. Mr. Speaker, I certainly rise in support of this defense authorization conference report.

I would like to point out, too, that there has been much discussion today pro and con about the MX missile, about the revolving doors that are a part of this conference report, about military contracts, and also about binary gas. But what I would like to point out in particular is that there are other matters of importance in this conference report, and if we do not act today, we are going to cause a lot of problems for our personnel serving in the Armed Forces.

There is a pay raise of 3 percent in the bill. We have told the members of the armed services and the Reserves that they would get this pay raise. It is tied up in the conference report.

Some of you have heard from your National Guard Adjutants General pertaining to bonuses and incentives for the National Guard and for Reservists. These incentives, which expired on September 30 of this year, are critical to attracting young men and women into the National Guard and the Reserves. We have put an extension of the authority to pay bonuses for the Reserves in this conference report, but it has been held up. We are losing fine young men and women today because we have not extended the bonuses and incentives for the Reserve forces.

So this has got to be done. We must move this bill forward.

In this legislation we also have provisions for improving the Individual Ready Reserve. The Individual Ready Reserve is almost a disaster. We are making some of those corrections in this authorization bill.

Members say to me: "Why do you talk about the Reserves?" Let me say this to my colleagues: that the Army National Guard, in relation to the total Army, has 46 percent of all the combat missions of the Army. The Army Reserve has 70 percent of all the combat support forces of the Army. The Army cannot move without the National Guard and without the Reserve.

With regard to the Air Force, the top Air Force unit in the Nation today is an Air Force Reserve unit in Utah. It won the "Gunsmoke" contest, and it was the top unit over the active-duty Air Force units, as well as those from Mexico and from Canada. So the Air Force is totally dependent on the Reserve forces, and a lot in this bill today pertains to the Reserves.

With regard to the Navy, the Navy is turning over ships every day to our Naval Reserves; 25 percent of the Marine Corps is in the Reserves.

So, Mr. Speaker, I would certainly like to stress that we have already met a small problem that we can solve, but we are not enlisting and reenlisting people in the National Guard and the Reserves because the bonuses have expired. It is absolutely necessary that we implement these bonuses or we are going to endanger the total strength of the National Guard and the Reserves.

I ask unanimous consent to include my full statement as a part of the RECORD.

Mr. Speaker, I rise in support of S. 1160, the fiscal year 1986 Defense authorization conference report. Although the House did not prevail on every issue it would have liked, the conference report represents a fair compromise between the House and Senate Defense authorization bills.

Let me summarize some of the major facts about S. 1160. Together with the military construction bill that is moving through Congress, the conference report will authorize $302.5 billion for national defense in fiscal year 1986. This total is $19.7 billion below the President's request and represents no real growth for national defense over the fiscal year 1985 appropriated level.

Mr. Speaker, this bill contains many strong points—many elements that will continue the ongoing process of rebuilding America's defenses, improve the quality of life of our uniformed personnel, and expand the use of economics and efficiencies in Department of Defense management. In the interest of time, I will limit my remarks to four areas that I consider especially important.

First is National Guard and Reserve forces readiness and effectiveness. I am pleased to report that the men and women of the National Guard and the Reserves are continuing to get the modern equipment and training they need to do their job. Although the task of revitalizing the Reserve forces is not yet complete, the Reserves have realized significant gains in the last several years. There is no doubt that today's National Guardsmen and reservists are better equipped, better trained, and better led than every before. The conference report contains more than $600 million for Guard and Reserve equipment, including UH helicopters, tanker aircraft, C-130H aircraft, Chaparral missiles, and improved TOW vehicles.

The current high quality of our Reserve forces is due partially to recruiting and retention incentives provided by the Congress. As the services continue to turn over more and more missions to the Guard and Reserve, we felt it especially important to keep the quality of our personnel high by extending and, in some areas, enhancing recruiting and retention incentives. The conference report, therefore, contains a number of authorities concerning Reserve enlistement and reenlistment bonuses, and establishes two programs to attract medical personnel in an Educational Loan Repayment Program and a Health Professions Scholarship Program. I believe that the latter two incentives, in particular, will go a long way toward reducing the critical shortfalls of required medical personnel in the Reserve forces.

I should note that we corrected an inequity suffered by the survivors of reservists who die of an illness or disease during inactive duty training. At my suggestion, the conferees agreed to extend health care benefits to such individuals so that they will enjoy the same protection as survivors of reservists who die as a result of illness or injury incurred or aggravated during active duty for training.

Finally, I am excited about the requirement in the conference report for the Army to conduct a muster of its Individual Ready Reserve. A number of us have been concerned for some time about the readiness of the IRR. I believe this muster will be an important first step for the army in ironing out some of the wrinkles of the mobilization process and in improving the potential effectiveness of the IRR.

The second area I would like to touch upon is the new GI bill. Although Congress only enacted this important educational program last year with a startup date of July 1, 1985, the Senate wanted to substantially alter the program before it began. It is too early in the process to know what changes may be needed, and I am pleased that the conferees agreed to deter revisions to the new program until next year when we have more experience on which to make a judgment.

We did accept one amendment, however, that will benefit some Vietnam-era veterans. This provision will permit service members with Vietnam-era GI bill eligibility to earn benefits under the new program even though they have had a break in service after December 1976. I might note that I and three of my colleagues recently visited a nearby military entrance processing station [MEPS] to review the services' implementation of the new GI bill. We were pleased to discover that prospective recruits receive briefings on this program not only from their recruiters, but also from their military counselors at the MEPS. In addition, the parents of new recruits receive information on the new GI bill through the mail so that the family as a whole can consider the merits of this important educational benefit. We were privileged to chat with a number of fine young men and women as they were making their commitments to serve in the military and each one named the new GI bill among their primary reasons for enlisting.

Third, I would like to mention my amendment to test the use of the Veterans' Administration's Decentralized Computer Program [DHCP] system in military hospitals. The purpose of this test and evaluation of all available DHCP system software components is to determine if it is a cost effective and feasible system for use in military hospitals in lieu of DOD's plan to acquire its own composite health-care system [CHCS].

Let me briefly outline the reasons for this amendment, Mr. Speaker. I became concerned about DOD's efforts in this area because of the time and money the Department has already expended on developing its own computerized medical information system. Moreover, charges have been leveled against the Department during the process, including the charge of "gold plating."

In the meantime, the Veterans' Administration has installed its own medical information software system—and it is working extremely well. It makes sense to test the VA system in DOD facilities to see if it could meet DOD needs at less cost. Hence—my amendment.

The original amendment called for testing the VA system in two hospitals in each of the three services, as I strongly believe all three Surgeons General should be active participants in this important evaluation to ensure that their individual service requirements are considered. However, in order to reach a compromise with the Senate conferees, I reluctantly agreed to the test being conducted at only two sites, one being the hospital at March Air Force Base in California, and the other site to be located at an Army or Navy hospital.

Inasmuch as the test will be conducted at two of the services' medical facilities, I suggest that Secretary Weinberger assign health care professional representatives from the offices of each of the three service Surgeons General to participate in all aspects of the test so that they can provide valid and useful service-unique contributions to the report of the Secretary of Defense required by the amendment.

I would also like the Secretary to provide the House and Senate Armed Services Committees with a detailed plan of action to meet the requirements of the amendment by December 1, 1985. I would expect this plan to be developed in cooperation with the Comptroller General and the three Surgeons General in order that all parties concerned will have the benefit of a single document which provides mutually agreed-upon responsibilities and expected time schedules for all phases of the test, evalua-

tions, and the subsequent reports. The timeframe for the sequence of test, evaluations, and reports is critical to the system procurement process, and I hope that all parties make a special effort to stay within the timetable so that we will not have to address this issue during next year's authorization process.

Finally, Mr. Speaker, I am pleased to report that the conferees reached agreement on a provision to prohibit employment in the executive branch of individuals who failed to register with the Selective Service System. As the sponsor of similar legislation in this Congress, I was proud to assist in the drafting of this measure.

Peacetime registration is a straightforward and vital element in the maintenance of our Nation's defense. This program contributes significantly to our national readiness posture in the event America must mobilize for war or national emergency.

I would like to clarify, however, that it was never our intent that an honorably discharged veteran or a physically disabled person who may have failed to register be denied the opportunity for employment in the Federal Government. Implementing regulations for this legislation should make this point clear.

I would also like to clarify the conferees' intent with regard to variable housing allowance in Alaska and Hawaii. The transition provisions of section 603 are extremely important and were very difficult to develop. The provisions agreed to by the conference committee are intended to ensure that the transition to the variable housing allowance in Alaska and Hawaii will not unfairly affect service members currently assigned to those States. Lest there be any doubt about that intent, let me emphasize that all members assigned to Alaska and Hawaii who are entitled to station housing allowances or who are receiving temporary lodging allowances on the date of enactment of this bill will continue to be eligible to receive rent plus. Further, members serving unaccompanied tours of Alaska and Hawaii who have dependents residing in other States and who are receiving variable housing allowances on behalf of those dependents should continue to receive those allowances. This last provision applies whether a member is assigned Government quarters in Alaska or Hawaii or is authorized to reside on the local economy and receive rent plus for the member's housing expenses. We trust that the uniformed services, in developing the necessary regulations, will ensure that this intent is implemented and will be guided by the principle that the fundamental purpose of the grandfather provision is to avoid penalizing those who made commitments in reasonable reliance on the predecessor provision.

Mr. Speaker, let me conclude my remarks by saying that, although S. 1160 is not a perfect bill, it will continue to take us in the direction we want to go for our national defense. The country cannot afford to have this legislation voted down. I urge the adoption of the conference report.

Mr. FRENZEL. Mr. Speaker, I rise in opposition to the conference report on S. 1160, which authorizes fiscal year 1986 appropriations for the Department of Defense.

For the first time in several years I voted for the defense authorizations bill brought before the House earlier this year. I did so because the House version of this bill froze funding at the fiscal year 1985 level of $292 billion, thus exercising the kind of fiscal restraint which I believe needs to apply to all Federal action.

Unfortunately, the high hopes generated by our original bill have been dashed in conference. Today we are presented with a bill that fails to hold the line on spending, and instead authorizes the princely sum of $302 billion. That kind of increase is suspect at any time; it is unconscionable in a time of runaway budget deficits.

The deficit crisis is real and it is immediate. We cannot put it aside in our consideration of any legislation, regardless of merit. This conference report fails in that obligation. I therefore urge my colleagues to join me in opposition to the conference report.

Mr. HILLIS. Mr. Speaker, will the gentleman yield?

Mr. MONTGOMERY. I am glad to yield to the gentleman from Indiana.

Mr. HILLIS. Mr. Speaker, I was listening to the gentleman's comments here with great interest because he is exactly right in his statement about the missions of the Reserves and the National Guard and how important they are to the concept of the total force which we rely on in the defense of our country and our freedom.

I just want to say also to the gentleman that there is one man in the Congress of the United States who stands out as being responsible for the great strides we have made in readiness, as evidenced by the fact that an Air Force Reserve unit won the unit citation in the contest—and that is the gentleman in the well.

I want to commend him on the tremendous job he has done. He always comes forward, and stands forth, and speaks on behalf of the Reserves and Reserve affairs.

The SPEAKER pro tempore. The time of the gentleman from Mississippi [Mr. MONTGOMERY] has expired.

Mr. DICKINSON. Mr. Speaker, I yield 1 additional minute to the gentleman from Mississippi [Mr. MONTGOMERY].

Mr. MONTGOMERY. Mr. Speaker, I thank the gentleman from Indiana [Mr. HILLIS], and I appreciate what he said, but it has been really the entire House Armed Services Committee that has pushed for improvements in the Reserves; it has not been one individual.

Perhaps we have not done a very good job by letting this conference report sit around for 3 months when we have some of these programs in important areas that are expiring. I am certainly not happy that I could not help more in getting this conference report to the floor and in getting a good vote on it before this.

Mr. HILLIS. Mr. Speaker, if the gentleman will yield further, I would say to the gentleman in response that it is true that there are others on the Committee on Armed Services who have followed the course of the Reserves and the National Guard, but we are always in your tracks and following your leadership when we do so.

Mr. ASPIN. Mr. Speaker, if the gentleman will yield, I would like to second the words of the gentleman from Indiana [Mr. HILLIS] and those of the gentleman from Alabama. If there is one Member who leads the Armed Services Committee, the House of Representatives, and the whole Congress of the United States on the issue of the National Guard and the Reserves, that is the gentleman in the well.

Mr. MONTGOMERY. Mr. Speaker, I thank the gentleman.

Mr. FAUNTROY. Mr. Speaker, I rise in opposition to the conference report on the Defense Department authorization for fiscal year 1986.

This conference report takes us further down the road to excessive and dangerous military spending. It does this by:

Adding $155.5 million for the procurement and assembly of binary chemical weapons;

Permitting up to three antisatellite tests during fiscal year 1986;

Rejecting the spending guidelines for the strategic defense initiative; and

Raising the cap on the procurement of MX missiles to 50 and authorizing 12 MX missiles in fiscal year 1986.

This conference report also contains funding for 22 different weapons systems that were not contained in the House authorization. They are as follows: $200 million for Amraam missile; $412 million for P3C Orion antisubmarine partol aircraft; $400 million for the E6A communications aircraft; and $240 million for the JStars airborne radar system.

It should be noted that the House Armed Service Committee had recommended against funding for these programs on the basis of either excessive cost increases, duplication, or because these weapons were not functional.

This is not a conference report that pulls us back from the edge of the abyss of nuclear war and its level of spending is at $10 billion more than H.R. 1872. When combined with military construction and spending resulting from authorized personnel total defense for fiscal year 1986 would be $302.5 billion. If you are worried by our budget deficit and the neglect of human needs here at home, then vote against this report.

Mr. RANGEL. Mr. Speaker, I rise to express my support for a number of provisions relating to drug interdiction in the conference agreement on S. 1160, the Department of Defense Authorization Act, 1986. As chairman of the Select Committee

on Narcotics, I want to comment briefly on these provisions which will increase military support for the fight against drug smugglers.

Section 1421 of the conference bill authorizes an additional 500 active duty military positions for the Coast Guard for 1986. These new personnel would be trained in drug law enforcement and would be assigned to Navy ships operating in waters where drug smuggling is ongoing. If a smuggling vessel is encountered, the Navy ship can interdict it and the Coast Guard personnel can board, search for and seize drugs, and make arrests.

Coast Guard boarding teams frequently sail now on Navy vessels operating in areas of drug smuggling activity. The 500 additional Coast Guard law enforcement positions authorized by section 1421 will permit the existing program to be greatly expanded. It will assure a Coast Guard presence on board each Navy ship at sea in a drug-interdiction area and let smugglers know that any time they run across a Navy vessel they will be subject to arrest, search and seizure.

Earlier this year, I joined the gentleman from Florida [Mr. BENNETT] in introducing H.R. 2553, the Military Drug Interdiction Assistance Act. This bill authorized members of the Armed Forces to assist Federal drug enforcement officials in drug searches, seizures and arrests outside the land area of the United States, provided such assistance would not impair military readiness. The primary purpose of the bill was to bring the resources of the Navy to bear against maritime drug trafficking because the Coast Guard and our other drug enforcement agencies simply do not have the personnel and equipment to curtail significantly the flood of illicit drugs smuggled into the United States by sophisticated, well-equipped, and well-financed drug traffickers.

During House debate on the Defense authorization bill, Mr. BENNETT offered the text of H.R. 2553 as an amendment. By the overwhelming margin of 364–51, the House signaled its strong desire to have the military more actively involved in supporting our drug interdiction efforts.

In conference with the Senate, however, concerns were raised about granting civil law enforcement powers to the Armed Forces. In addition, it was thought that direct military involvement in drug enforcement would require military members to receive special law enforcement training and testify in criminal court, diverting them from their normal military duties.

Section 1421 represents the compromise reached on the Bennett amendment. It removes the military from direct involvement in drug searches, seizures, and arrests, but in authorizing 500 additional Coast Guard law enforcement personnel to sail on Navy ships it recognizes that we cannot hope to stop drug smugglers without providing additional manpower. It also recognizes that the Navy can play a greater role in assisting drug enforcement efforts. I believe section 1421 substantially accomplishes the purpose of H.R. 2553 and the Bennett amendment, and I am pleased to support it.

S. 1160 also authorizes funds for the establishment, operation, and maintenance of airborne surveillance, detection, and interdiction units in the Defense Department to support civilian law enforcement drug interdiction efforts. In addition, the bill establishes as a permanent office the Directorate of the Department of Defense Task Force on Drug Law Enforcement, the unit responsible for coordinating Defense assistance to civilian law enforcement agencies. These provisions are modifications of legislation introduced by the gentleman from Oklahoma [Mr. ENGLISH] which I cosponsored.

The bill also requires the Attorney General, in consultation with the Secretary of Defense, to conduct annual briefings for State and local law enforcement officials about assistance available through the Department of Defense. Finally, it requires the Navy to conduct a test along the southwest border with Mexico to determine the effectiveness of E–2 aircraft in drug interdiction.

All of these provisions will enhance the role of the military in support of drug interdiction. In view of the fact that drug abuse and drug smuggling pose growing threats to the national security of our country, these measures are amply justified.

Mr. WEISS. Mr. Speaker, I am opposed to this conference report. By equating security with excess weaponry, by aggravating the deficit, and by ignoring the absolutely urgent need to restore lagging investment in our Nation's human resources, the conference report before us today will weaken our Nation. It will weaken our Nation even more than the original House version of the Defense authorization, which was itself unworthy of our support.

I voted against the original House bill because of the continued commitment it expressed for weaponry we don't need and can't afford. But at least the House bill proposed the first serious restraints in the administration's mindless policy of nuclear stockpiling. The House vote for a freeze on defense appropriations, along with important restrictions on the strategic defense initiative, antisatellite weapons, and the MX, indicated a promising shift in defense policy.

This shift was not a fluke. It was born of public discontent with an array of revealed Pentagon abuses and a growing public realization that what is given indiscriminately to the military is taken from the mouths of youngsters and the pocketbooks of the elderly. Americans everywhere are drawing the connection between wasteful military spending, astronomical deficits, and the reduced availability of Government programs that serve the needs of all Americans.

But this shift in attitudes, which was embodied to an extent in the House bill, did not find any expression in the conference report. It is true that we will later have an opportunity to limit defense appropriations to last year's level. It is true that the conference report contains certain minor improvements over previous defense policy. But none of this can make up for the fact that the overall conference report moves us distinctly in the wrong direction at a time when every lost moment and every lost opportunity tragically increases the danger of nuclear annihilation. At a time when we desperately need a fundamental reordering of defense policy, we're simply ordering more weapons.

The fate of humanity may be at stake, but we authorize an additional $10 billion in unneeded military spending, including funding for about 18 different weapons systems that were found to be entirely unnecessary by the House Armed Services Committee.

The fate of humanity may be at stake, but we commit ourselves to an unbridled arms race in the heavens that will violate existing arms agreements and increase the danger of nuclear war.

The fate of humanity may be at stake, but we permit the assembly of heinous nerve gas weapons.

The fate of humanity may be at stake, but we continue to endorse the deployment of highly destabilizing first-strike weapons like the MX and Trident II or D–5.

The administration has argued again and again that it must have any and all weapons, especially in advance of the summit in Geneva, in order to negotiate from a position of strength. Some of them, it is claimed, might be bargained away as part of an overall arms control agreement. But this misguided policy of "build now and negotiate later" overlooks what we know from experience: The best time to stop an arms race is before it begins.

The continued acquisition of weapons that threaten the Soviet Union's land-based forces, as do the MX and the D–5, encourages the Soviets to launch on warning, or even to launch a preemptive strike of their own. The pursuit of the strategic defense initiative only encourages the Soviet Union to increase its nuclear forces. These systems have never and will never contribute to greater security for our people or enhance the prospects for achieving arms agreements. Instead, they raise the risk of annihilation and derail the arms control process.

We all hope and pray that the President will approach the summit in Geneva with the high level of commitment that this endeavor deserves and that he will eventually succeed in negotiating an equitable and verifiable arms control agreement. But continued congressional support for destabilizing weapons systems backed by the administration will not contribute to this process. It squanders our precious human and material resources. It limits our ability to negotiate. And it brings the ultimate day of nuclear holocaust closer and closer.

There is a way to protect the United States, but that way is not to leave our citizens hungry, sick, homeless, or ill-educated. There is a message to send before the Geneva summit, but that message is not support for more and more weapons of destruction. I strongly urge that we reject the

conference report and instead begin the process of producing a sane military budget.

Mr. HAWKINS. Mr. Speaker, I want to discuss, for the record, the provisions in the DOD authorization conference report which amend labor and education statutes under the jurisdiction of the Committee on Education and Labor. During consideration of S. 1160, the other body adopted amendments to three labor statutes: The Contract Work Hours and Safety Standards Act, the Walsh-Healey Act, and the Davis-Bacon Act. To protect the jurisdictional integrity of the Committee on Education and Labor, a request was made to have members of the committee appointed conferees solely to resolve the controversy over the nongermane amendments. During the conference our members raised objections to the incluson of the labor provisions on grounds that the provisions are not germane to the legislation and represent a preemption of the jurisdiction of another House Committee.

In final resolution of the labor matters in controversy, the conference committee agreed to delete the provisions that would have amended the Davis-Bacon Act, and to accept amendments to the Walsh-Healey Act and the Contract Work Hours and Safety Standards Act as embodied in S. 1105 as reported by the Senate Committee on Labor and Human Resources, with an amendment making the legislation effective January 1, 1986.

I want to make it absolutely clear that this agreement entered into by members of the Committee on Education and Labor does not, in any respect, indicate the committee's abdication of jurisdiction over these specific labor statutes or any other legislation under the committee's jurisdiction. However, the committee had been required by the budget resolution to achieve savings through changes in the overtime provisions of the labor statutes. Indeed, I would emphasize that the agreement, as formulated and presented by the conferees from the other body specifically recognizes that the compromise is not a circumvention of the jurisdiction of the Committee on Education and Labor, and shall not be a precedent for the introduction and consideration of other such nongermane amendments in future Department of Defense authorization measures.

I am providing this explanation not only to clarify the committee's role in the conference, but in the hope that it will help to discourage future attempts to circumvent committee jurisdiction and undermine the House rules.

I would also like to call attention to several education items in this conference report that are under the jurisdiction of the Committee on Education and Labor.

First, the conference report contains two provisions affecting the Department of Defense Dependents' Schools [DODDS], which fall under the jurisdiction of the Committee on Education and Labor. These schools educate children of military personnel overseas.

One such provision repeals the transfer of these schools to the Department of Education which was to occur in 1986 and allows these schools to remain under the Department of Defense. This arrangement will be less disruptive. In addition, the amendment in the conference report will achieve our objective in that the Secretary of Education will be consulted on educational practices for DODDS, and teachers and professional employees will be represented on the advisory councils for the schools.

The other provision relating to DODDS clarifies which categories of students are permitted to attend these schools on a tuition-paying basis. Currently, in addition to providing free education to dependents of DOD personnel, the DODDS schools educate other students who must pay tuition, including dependents of other U.S. Government employees, U.S. Government contractors, and certain other citizens. A DOD general counsel ruling would seem to prohibit many of these children from attending. The amendment in the conference report would allow the same groups of children who are currently attending to continue to attend.

Second, the Senate version of the DOD authorization bill contained a provision to authorize a national commission to study illiteracy, authored by Senator ZORINSKY. The conferees did not accept this provision because it was not appropriate to deal with a major and serious educational problem in a DOD authorization bill. However, I commend our colleague Senator ZORINSKY for his concern about this problem and for his testimony before a joint hearing of the House Subcommittee on Elementary, Secondary, and Vocational Education and the Senate Subcommittee on Education, Arts, and Humanities. We are conducting these hearings and hope to arrive at an understanding of and some solutions to the problem. Senator ZORINSKY'S knowledge and recommendations have been helpful in this process.

Mr. ROWLAND of Georgia. Mr. Speaker, the Department of Defense authorization conference report which we are considering today contains a provision which will repeal the Monroney amendment. This unfortunate action will have adverse economic consequences in many parts of our country, including my own Eighth District of Georgia.

The Monroney amendment allows labor surveys over broad geographic areas for the purpose of determining the wages paid to Defense Department blue-collar employees.

I certainly share the concerns of my colleagues in holding down costs in this country. However, I think that the amount of savings generated is minimal in comparison with the serious economic consequences that some rural areas will experience as a result of this provision.

As a result of the repeal of the Monroney amendment, we will have employees working side by side at the same jobs under different wage rates. This will obviously create morale problems. Many areas will experience difficulties in attracting and keeping workers with special skills. Certain military installations will lose qualified workers to other installations where the prevailing wage rate is higher. In some instances we will have differing wage scales in installations less than 100 miles apart.

I urge my colleagues to continue to look at this issue and reconsider it at a future date.

The SPEAKER pro tempore. The gentleman from Alabama [Mr. DICKINSON] has 3 minutes remaining.

Mr. DICKINSON. Mr. Speaker, I yield back the balance of my time.

The SPEAKER. All time has expired.

Without objection, the previous question is ordered on the conference report.

There was no objection.

The question is on the conference report.

The conference report was agreed to.

A motion to reconsider was laid on the table.

□ 1555

GENERAL LEAVE

Mr. ASPIN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report on the Senate bill, S. 1160, just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

PERMISSION FOR COMMITTEE ON ARMED SERVICES TO HAVE UNTIL 5 P.M., SATURDAY, NOVEMBER 2, 1985, TO FILE REPORT ON H.R. 3622, JOINT CHIEFS OF STAFF REORGANIZATION ACT OF 1985

Mr. NICHOLS. Mr. Speaker, I ask unanimous consent that the Committee on Armed Services may have until 5 p.m., Saturday, November 2, 1985, to file a report on H.R. 3622, as amended, the Joint Chiefs of Staff Reorganization Act of 1985.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 3128, DEFICIT REDUCTION AMENDMENTS OF 1985

Mrs. BURTON of California, from the Committee on Rules, submitted a privileged report (Rept. No. 99-338) on the resolution (H. Res. 301) providing for the consideration of the bill (H.R. 3128) to make changes in spending and revenue provisions for purposes of deficit reduction and program improve-

ment, consistent with the budget process, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION WAIVING CERTAIN POINTS OF ORDER AGAINST CONSIDERATION OF H.R. 3629, DEPARTMENT OF DEFENSE APPROPRIATIONS, 1986

Mrs. BURTON of California, from the Committee on Rules, submitted a privileged report (Rept. No. 99-339) on the resolution (H. Res. 302) waiving certain points of order against consideration of the bill (H.R. 3629) making appropriations for the Department of Defense for the fiscal year ending September 30, 1986, and for other purposes, which was referred to the House Calendar and ordered to be printed.

GENERAL LEAVE

Mr. MURTHA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the consideration of the conference report on the bill (H.R. 2942) making appropriations for the legislative branch for the fiscal year ending September 30, 1986, and for other purposes, and to include extraneous and tabular material.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

CONFERENCE REPORT ON H.R. 2942, LEGISLATIVE BRANCH APPROPRIATIONS, 1986

Mr. MURTHA. Mr. Speaker, I call up the conference report on the bill (H.R. 2942) making appropriations for the legislative branch for the fiscal year ending September 30, 1986, and for other purposes.

Mr. Speaker, I do this on behalf of the subcommittee chairman, the gentleman from California [Mr. FAZIO] and the other members of the Legislative Subcommittee of the Committee on Appropriations. The gentleman from California is on his way and will be here shortly.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Pursuant to the rule, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of October 23, 1985.)

The SPEAKER pro tempore. The gentleman from Pennsylvania [Mr. MURTHA] will be recognized for 30 minutes and the gentleman from Indiana [Mr. MYERS] will be recognized for 30 minutes.

The Chair now recognizes the gentleman from Pennsylvania [Mr. MURTHA].

Mr. MURTHA. Mr. Speaker, I yield myself such time as I may consume. Mr. Speaker, I just want to say that the chairman, the gentleman from California [Mr. FAZIO] who has been tied up in the conference report on a very important decision, the Gramm-Rudman amendment on reducing the deficit, is on his way over; he and the ranking member of the subcommittee, the gentleman from California [Mr. LEWIS], have worked diligently trying to reduce the legislative branch appropriations substantially. I have never seen anybody work harder in conjunction with other members of the subcommittee, including the gentleman from Indiana [Mr. MYERS], the ranking Republican.

I think it is a bipartisan consensus and we all agree to the conference report.

Mr. MYERS of Indiana. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, at this time I see that the ranking minority member just came on the floor, the late gentleman from California [Mr. LEWIS].

While I still have the time, though, Mr. Speaker, I want to commend both Chairman FAZIO, as well as the ranking member, the gentleman from California [Mr. LEWIS], both of whom are Californians. The California show did well this year. I do not know what it is going to do on the road, but it did very well here in mowing this down, as well as the other members of the subcommittee from the Legislative Committee.

Talk about them and they both show up. If you just have patience, everything turns out all right.

So I will now turn over the time to the gentleman from California [Mr. LEWIS].

The SPEAKER pro tempore. The Chairman recognizes the gentleman from California [Mr. FAZIO].

Mr. FAZIO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the conferees on H.R. 2942 the Legislative Branch Appropriation Act, 1986, have reached an agreement which provides appropriations totaling $1,598,293,800—just under $1.6 billion—for fiscal year 1986. This amount is $1,683,338—$1.7 million—under the level enacted to date for fiscal year 1985 and $184,961,200—almost $185 million—below the budget estimates.

When the bill went to the Senate, the other body added $309.6 million for their own operations. If the Senate items are excluded, the conference agreement is $5.8 million below the amount in the bill as it passed the House.

Mr. Speaker, under leave I have already obtained, I will include a comparative tabulation of the conference action at this point in the RECORD.

COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY—LEGISLATIVE BILL (H.R. 2942)

	Fiscal year—		House	Senate	Conference	Conference compared with—

I will not attempt to speak to each of the items we considered in conference. There were a total of 26 amendments, of which two related solely to Senate housekeeping items. The remainder are explained fully in the statement accompanying the conference report.

There is one add on made by the Senate in the Capitol grounds account that I would like to mention. We have agreed to provide $725,000—$495,000 in appropriations and a $230,000 reprogramming—for security improvements in the east plaza. With these funds, the Architect of the Capitol will install hydraulic barriers to aid in the control of traffic through the plaza. He will also install new guardhouses, and several steel and concrete bollards that will help with security and traffic control. When this project is finished, we have been told that it will no longer be necessary to park the garbage trucks, vans, and other unsightly obstacles for night and weekend traffic barriers.

I want to make clear that this funding is not for the overall enhancement of the east plaza. That project is the subject of another bill which has been reported by the Public Works and Transportation Committee. We have only dealt with the security aspects, and we have been urged to do that by members of the Capitol Police Board.

With respect to the conference agreement on all legislative branch activities, I do wish to point out that this is another example of the willingness on the part of the legislative branch to control its own spending. We are approving a budget that is actually less than the current year. The legislative branch has frozen its own budget—and believe me it is a tight budget. We have already heard many cries of anguish on the frugality of this bill.

We have checked and found that since fiscal year 1979, the legislative branch budget has grown at only 4.9 percent annually, while the entire Federal budget has grown at 11.8 percent—more than double the rate of increase of the legislative branch. During that same period of time, the Consumer Price Index has increased by 8.1 percent annually. So we have not even kept pace with inflation.

The legislative branch has clearly applied a rigorous amount of restraint to its own activities. We can be proud of these efforts, Mr. Speaker, and proud of the example in fiscal responsibility being set by the Congress and its support agencies.

Mr. Speaker, this is a good conference report. I urge its adoption.

Mr. Speaker, before yielding time to my good friend and colleague, the ranking member, the gentleman from California [Mr. LEWIS], I would like at this point to express my appreciation to all my colleagues in both parties who sit on this subcommittee. It is not necessarily the most popular subcommittee a Member can serve on, but the members who have taken the responsibility performed well.

I would also like to express my appreciation to the staff of the committee, particularly Mr. Lombard, who particularly distinguishes himself and thereby us with the service he renders to the Congress, particularly the House of Representatives.

Mr. LEWIS of California. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I thank the gentleman for recognizing me at this moment. I thought for a while that my chairman, the gentleman from California [Mr. FAZIO] was not going to show up today. Indeed, I clearly would have understood if he had not come to the floor for a presentation of this conference committee report, for I am here to testify to the membership that in this chairman I am dealing with a real "skinflint." I mean, you talk about tight, I would appreciate if the present Speaker pro tempore [Mr. MATSUI] from Sacramento, CA, would take this message back home to the north, that this fellow is here really cutting, squeezing, and trimming, to the point that it was so embarrassing to me that if he had not shown up, I was not going to come from the back of the Chamber myself.

□ 1610

But after having said that, Mr. Speaker, this is the bill whereby the legislative branch seriously exposes itself to its willingness to cut or not to cut, to pay lipservice or do something about spending. If there is a demonstration program around, this bill is probably it.

The conference committee has reported out a bill that totals $1,598,293,800. That amount is over $1 million under the Senate-passed bill, but more specifically, it is important to know the figure is $1,683,338 below the 1985 bill, including supplementals. It is $101,706,200 below the 320(b) allocation. It is $184,961,200, almost $185 million, below the budget request.

I think it is important to point out to the Members that within the cuts that are made here, there are a number that are very significant to the operation of the House. Among them, there is a cut in official mail costs of $44,458,000, almost $5 million below the House-passed bill.

In the General Accounting Office, there is a cut of over $38 million in this conference report.

Among House items, there is an additional $27 million cut, and the Senate made an additional $22 million cut from their portion of the budget.

The significance here, Members and colleagues, is that the House by this bill is demonstrating its willingness to be tough on itself. I guess the real point is that the proof of the pudding is in the eating. That which is presented in this bill will become a reality in terms of expenditure if the House responds to itself. If, indeed, we are willing to be tight on our budgets, and particularly our mail, then we will be serving as a demonstration for the rest of the Government, and not just the activities of the Congress. Indeed, if the House should decide instead to follow a pattern of business as usual, we will be back in later with probably the largest supplemental request that this portion of the appropriations process has ever experienced.

The reason that is significant is that I would submit if the House follows the pattern they have set forth here that indeed we will send a message to the rest of the Government, as well as to our appropriations process. On the other hand, if we just go forward blithely following the paths of former years, along with that supplemental which will be huge, it will be a message to all the other committees around to just go forward as usual and supplementals will follow and the deficit will continue to expand.

On a serious note for a moment, this subcommittee is not an easy subcommittee to deal with. I want to express my appreciation for the hard work done by our staff, their willingness to deal with the chairman and myself in our difficult moments. Particularly, I would like to express my appreciation for the patience of our colleagues on our subcommittee on both sides of the aisle, for they have had to deal with the gentleman from California [Mr. FAZIO] and myself over these several years now, and I think they have dealt with us in an admirable way.

Having said that, Mr. Speaker, I want to congratulate my chairman, the gentleman from California [Mr. FAZIO].

Mr. Speaker, I yield back the balance of my time.

Mr. FAZIO. Mr. Speaker, I yield back the balance of my time, and I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 251, nays 164, not voting 19, as follows:

□ 1620

The Clerk announced the following pairs:

On this vote:

Mr. Nelson of Florida for, with Mr. McMillan against.

Mrs. Collins for, with Mr. Weber against.

Mr. Young of Alaska for, with Mr. Kolbe against.

Messrs. CARR, KOLTER, DORGAN of North Dakota, BATEMAN, APPLEGATE, HAMMERSCHMIDT, YATRON, and McKERNAN, Ms. KAPTUR, Mr. SHAW, and Mr. CHAPMAN changed their votes from "yea" to "nay."

Mr. LUNDINE and Mr. COUGHLIN changed their votes from "nay" to "yea."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

□ 1635

AMENDMENTS IN DISAGREEMENT

The SPEAKER pro tempore. The Clerk will designate the first amendment in disagreement.

The text of the amendment is as follows:

Senate amendment No. 1: Page 1, after line 7, insert:

SENATE

MILEAGE OF THE VICE PRESIDENT AND SENATORS AND EXPENSE ALLOWANCES OF THE VICE PRESIDENT, THE PRESIDENT PRO TEMPORE, MAJORITY AND MINORITY LEADERS, MAJORITY AND MINORITY WHIPS, AND CHAIRMEN OF THE MAJORITY AND MINORITY CONFERENCE COMMITTEES

MILEAGE OF THE VICE PRESIDENT AND SENATORS

For mileage of the Vice President and Senators of the United States, $60,000.

EXPENSE ALLOWANCES OF THE VICE PRESIDENT, THE PRESIDENT PRO TEMPORE, MAJORITY AND MINORITY LEADERS, MAJORITY AND MINORITY WHIPS, AND CHAIRMEN OF THE MAJORITY AND MINORITY CONFERENCE COMMITTEES

For expense allowances of the Vice President, $10,000; the President Pro Tempore of the Senate, $10,000; Majority Leader of the Senate, $10,000; Minority Leader of the Senate, $10,000; Majority Whip of the Senate, $5,000; Minority Whip of the Senate, $5,000; and Chairmen of the Majority and Minority Conference Committees, $6,000; in all, $56,000.

REPRESENTATION ALLOWANCES FOR THE MAJORITY AND MINORITY LEADERS

For representation allowances of the Majority and Minority Leaders of the Senate, $10,000 for each such Leader, in all $20,000.

SALARIES, OFFICERS AND EMPLOYEES

For compensation of officers, employees, clerks to Senators, and others as authorized by law, including agency contributions, which shall be paid from this appropriation without regard to the below limitations, as follows:

OFFICE OF THE VICE PRESIDENT

For the Office of the Vice President, $1,112,000.

OFFICE OF THE PRESIDENT PRO TEMPORE

For Office of the President Pro Tempore, $149,000.

OFFICES OF THE MAJORITY AND MINORITY LEADERS

For Offices of the Majority and Minority Leaders, $1,090,000.

OFFICES OF THE MAJORITY AND MINORITY WHIPS

For Offices of the Majority and Minority Whips, $418,000.

CONFERENCE COMMITTEES

For the Conference of the Majority and the Conference of the Minority, at rates of compensation to be fixed by the Chairman of each such committee, $540,500 for each such committee; in all, $1,081,000.

OFFICES OF THE SECRETARIES OF THE CONFERENCE OF THE MAJORITY AND THE CONFERENCE OF THE MINORITY

For Offices of the Secretaries of the Conference of the Majority and the Conference of the Minority, $182,000.

OFFICE OF THE CHAPLAIN

For Office of the Chaplain, $90,000.

OFFICE OF THE SECRETARY

For Office of the Secretary, $6,953,000.

ADMINISTRATIVE, CLERICAL, AND LEGISLATIVE ASSISTANCE TO SENATORS

For administrative, clerical, and legislative assistance to Senators, $102,549,000.

OFFICE OF THE SERGEANT AT ARMS AND DOORKEEPER

For Office of the Sergeant at Arms and Doorkeeper, $36,358,000.

OFFICES OF THE SECRETARIES FOR THE MAJORITY AND MINORITY

For Offices of the Secretary for the Majority and the Secretary for the Minority, $879,000.

AGENCY CONTRIBUTIONS

For agency contributions for employee benefits, as authorized by law, $19,612,000.

OFFICE OF THE LEGISLATIVE COUNSEL OF THE SENATE

For salaries and expenses of the Office of the Legislative Counsel of the Senate, $1,437,000.

OFFICE OF SENATE LEGAL COUNSEL

For salaries and expenses of the Office of Senate Legal Counsel, $565,000.

EXPENSE ALLOWANCES OF THE SECRETARY OF THE SENATE, SERGEANT AT ARMS AND DOORKEEPER OF THE SENATE, AND SECRETARIES FOR THE MAJORITY AND MINORITY OF THE SENATE

For expenses allowances of the Secretary of the Senate, $3,000; Sergeant at Arms and Doorkeeper of the Senate, $3,000; Secretary for the Majority of the Senate, $3,000; Secretary for the Minority of the Senate, $3,000; in all, $12,000.

CONTINGENT EXPENSES OF THE SENATE

SENATE POLICY COMMITTEES

For salaries and expenses of the Majority Policy Committee and the Minority Policy Committee, $974,000 for each such committee; in all $1,948,000.

INQUIRIES AND INVESTIGATIONS

For expenses of inquiries and investigations ordered by the Senate, or conducted pursuant to section 134(a) of Public Law 601, Seventy-nineth Congress, as amended, section 112 of Public Law 96-304 and Senate Resolution 281, agreed to March 11, 1980, $51,050,000.

EXPENSES OF UNITED STATES INTERNATIONAL NARCOTICS CONTROL COMMISSION

For expenses of the United States International Narcotics Control Commisison, as authorized by section 814 of the Foreign Relations Authorized Act, passed by the Senate on July 31, 1985, $325,000.

SECRETARY OF THE SENATE

For expenses of the Office of the Secretary of the Senate, $683,800.

SERGEANT AT ARMS AND DOORKEEPER OF THE SENATE

For expenses of the Office at Arms and Doorkeeper of the Senate, $54,153,000.

MISCELLANEOUS ITEMS

For miscellaneous items, $9,659,000.

STATIONARY (REVOLVING FUND)

For stationary for the President of the Senate, $4,500, for officers of the Senate and the Conference of the Majority and Conference of the Minority of the Senate, $7,500; in all, $12,000.

ADMINISTRATIVE PROVISION

Section 1. The second sentence of section 120 of Public Law 978-51 (2 U.S.C. 61g-6) is amended by inserting immediately before the period at the end thereof the following: ", except that vouchers shall not be required for payment of long-distance telephone calls".

MOTION OFFERED BY MR. FAZIO

Mr. FAZIO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FAZIO moves that the House recede from its disagreement to the amendment of the Senate numbered 1, and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The text of the amendment is as follows:

Senate amendment No. 11: Page 14, after line 8, insert:

Of the funds appropriated under this head in Public Law 98-367, not to exceed $109,000 shall remain available until September 30, 1986.

MOTION OFFERED BY MR. FAZIO

Mr. FAZIO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FAZIO moves that the House recede from its disagreement to the amendment of the Senate numbered 11, and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The text of the amendment is as follows:

Senate amendment No. 12: Page 14, line 12, strike out "$3,041,000" and insert "$3,362,000".

MOTION OFFERED BY MR. FAZIO

Mr. FAZIO. Mr. Speaker, I offer a motion.

The Clerk read as follow:

Mr. FAZIO moves that the House recede from its disagreement to the amendment of the Senate numbered 12 and concur therein with an amendment, as follows: In lieu of the sum stricken and inserted by said amendment, insert the following: "$3,510,000, of which $495,000 shall be available until expended for the procurement and installation of hydraulic security barriers at vehicular entrances to the Capitol grounds, subject to the approval of the design development drawings by the House and Senate Committees on Appropriations".

Mr. LEWIS of California (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California [Mr. FAZIO].

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 13: Page 14, after line 22, insert:

SENATE OFFICE BUILDINGS

For all necessary expenses for maintenance, care and operation of the Senate Office Buildings; and furniture and furnishings, to be expended under the control and supervision of the Architect of the Capitol, $19,163,000, of which $649,000 shall remain available until expended.

MOTION OFFERED BY MR. FAZIO

Mr. FAZIO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FAZIO moves that the House recede from its disagreement to the amendment of the Senate numbered 13, and concur therein.

Mr. LEWIS of California (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California [Mr. FAZIO].

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The text of the amendment is as follows:

Senate amendment No. 14: Page 14, after line 22, insert:

Of the funds appropriated under this head in Public Law 98-367 for demolition and paving of Square 724, $561,000 shall remain available until September 30, 1986.

MOTION OFFERED BY MR. FAZIO

Mr. FAZIO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FAZIO moves that the House recede from its disagreement to the amendment of the Senate numbered 14, and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The text of the amendment is as follows:

Senate amendment No. 22: Page 22, line 14, after "$25,981,000" insert ", of which $3,000,000 shall be derived from the Government Printing Office revolving fund, representing excess receipts from the sale of publications".

MOTION OFFERED BY MR. FAZIO

Mr. FAZIO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FAZIO moves that the House recede from its disagreement to the amendment of the Senate numbered 22, and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the last amendment in disagreement.

The text of the amendment is as follows:

Senate amendment No. 26: Page 29, after the 2 lines which appear after line 9, insert:

SEC. 306. (a) Section 309 of title 44, United States Code, is amended:

(1) striking out "except the Office of Superintendent of Documents," contained in the first subparagraph of subsection (a); and

(2) by striking out subsection (b)(3).

(b) Section 1708 of title 44, United States Code, is amended by striking out the last sentence of the first full paragraph.

(c) The amendments made by subsections (a) and (b) above shall take effect on October 1, 1985.

MOTION OFFERED BY MR. FAZIO

Mr. FAZIO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FAZIO moves that the House recede from its disagreement to the amendment of the Senate numbered 26 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

SEC. 306. (a) Notwithstanding the provisions of this or any other Act, the United States International Narcotics Control Commission, established by section 814 of the Foreign Relations Authorization Act, Fiscal Years 1986 and 1987, is hereby redesignated and shall hereafter be known as the United States Senate Caucus on International Narcotics Control.

(b) Any reference to the United States International Narcotics Control Commission in any law, regulation, document, record, or other official paper of the United States shall be deemed to be a reference to the United States Senate Caucus on International Narcotics Control.

Mr. LEWIS of California (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California [Mr. FAZIO].

The motion was agreed to.

A motion to reconsider the votes by which action was taken on the conference report and the several motions was laid on the table.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 3630

Mr. BONER of Tennessee. Mr. Speaker, I ask unanimous consent that my name be removed as a cosponsor of H.R. 3630.

Mr. SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

COMMENDING SWITZERLAND ON CONTRIBUTIONS TO FREEDOM, INTERNATIONAL PEACE, AND UNDERSTANDING ON OCCASION OF MEETING BETWEEN LEADERS OF THE UNITED STATES AND THE SOVIET UNION

Mr. WEISS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate joint resolution (S.J. Res. 227) to commend the people and the sovereign confederation of the neutral nation of Switzerland for their contributions to freedom, international peace, and understanding on the occasion of the meeting between the leaders of the United States and the Soviet Union on November 19-20, 1985, in Geneva, Switzerland, and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. BROOMFIELD. Mr. Speaker, reserving the right to object, I do so to afford my good friend, the gentleman from New York [Mr. WEISS], an opportunity to give an explanation of this resolution.

I yield to the gentleman from New York.

Mr. WEISS. I thank my distinguished colleague, the ranking minority member on the Committee on Foreign Affairs for yielding to me.

Mr. Speaker, I rise in support of Senate Joint Resolution 227, to commend the people and the sovereign confederation of the neutral nation of Switzerland for their contributions to freedom, international peace, and understanding on the occasion of the meeting between the leaders of the United States and the Soviet Union on November 19-20, 1985, in Geneva, Switzerland.

The resolution now before the House was passed by the Senate on October 25. It is very similar to a measure introduced in the House by Chairman FASCELL, along with other members of the Committee on Foreign Affairs, including the distinguished Member from Michigan [Mr. BROOMFIELD], the Honorable LEE H. HAMILTON, the Honorable BENJAMIN A. GILMAN.

Quite simply, the resolution expresses appreciation to the Swiss for hosting the upcoming Reagan-Gorbachev summit next month, and for their historic neutrality and contributions to international peace.

Mr. BROOMFIELD. Mr. Speaker, today the House considers Senate Joint Resolution 227 which expresses the warm gratitude of the American people for the strong bonds of friendship which have long existed between the United States and Switzerland. The resolution also commends the people and nation of Switzerland for all they have done throughout this century in the search for freedom, international peace, and understanding. Our consideration of this matter is timely in that it occurs on the eve of a major international meeting in Geneva, Switzerland, between the leaders of the United States and the Soviet Union. Once again, Switzerland has offered its territory and facilities to host an important international event.

It comes as no surprise that this small nation—whose neutrality in political and military struggles is well-known—would again offer its services to mankind in the search for international understanding and world peace. When one thinks of the beautiful and historic city of Geneva one cannot fail to recall the important contribution made by an earlier meeting in this city. I refer, of course, to the Geneva Convention, a code of conduct intended to adhere a semblance of humanity to the otherwise ugly business of armed conflict.

In addition, a close variation of Switzerland's flag is the familiar symbol of one of the most admired organizations in the world: the International Red Cross which was founded in Switzerland in 1863 and has chapters in some 120 countries.

Switzerland has never interpreted its neutrality as a license for standing aloof from the world's problems. Instead, this remarkable country has a solid and longstanding record of energetically contributing more than its fair share in efforts to end suffering, and to achieve and sustain peace.

The resolution we consider today is an important recognition of the accomplishments and continuing efforts of the people and nation of Switzerland in the pursuit of a better world for us all.

Mr. FASCELL. Mr. Speaker, I rise in support of Senate Joint Resolution 227, to commend the people and the sovereign confederation of the neutral nation of Switzerland for their contributions to freedom, international peace, and understanding on the occasion of the meeting between the leaders of the United States and the Soviet Union on November 19-20, 1985, in Geneva, Switzerland.

As pointed out earlier, the resolution expresses appreciation to the Swiss for hosting the upcoming Reagan-Gorbachev summit next month, and for their historic neutrality and contributions to international peace.

Over the years, Switzerland has so graciously played host to numerous international meetings, conferences, and organizations. This bastion of neutrality has provided its territory so that nations may resolve disputes, conflicts, and encourage peace among members of the international community.

Switzerland's neutrality is in a class by itself—that country is universally revered as the quintessentially neutral nation. Thus, there is no more appropriate site for parties to meet to work out their differences. It has been the locale of many mediative efforts and discussions on a panoply of geopolitical issues—Cyprus, Afghanistan, chemical weapons, and the disarmament conference, to cite a few.

Around the world, wars have been fought and conflicts have escalated. Switzerland's soil, however, has been the site for bridging the schisms, and resolving disputes. It provides fertile ground on which to elucidate priorities and forge international consensus.

We appreciate the continuing receptivity of the Swiss in affording their territory so that other nations may work toward increased understanding and harmony. Switzerland has encouraged the flourishing of diplomacy, the mitigating of tensions, and the nurturing of peace.

We underscore our bonds of friendship with the Swiss, and our appreciation for their adherence to principles of neutrality in a democratic climate which fosters precepts of political freedom, peace, and cooperation. We look forward to the upcoming United States/Soviet summit with appreciation to the Swiss, and with optimism for the prospective negotiations.

Mr. Speaker, I urge the adoption of Senate Joint Resolution 227.

Mr. GILMAN. Mr. Speaker, I rise in support of the resolution.

Mr. Speaker, the resolution makes clear the deep gratitude of the American people to the Swiss people for hosting the upcoming meeting between President Reagan and General Secretary Gorbachev.

In addition to their hospitality in this respect, the Swiss people and their Government have been of help to our Nation and to the world at large, on numerous occasions over many years.

The Swiss people and Government have offered their good offices in pursuit of peace, have provided the permanent home of the International Red Cross, and have hosted interest sections in foreign countries which have represented American interests when we have been unable to operate our embassies.

Accordingly, Mr. Speaker, I urge the adoption of this resolution.

Mr. BROOMFIELD. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 227

Whereas Switzerland has long played a leading role among nations in the search for international peace and understanding, has generously provided its territory and assistance for international organizations and conferences, and its diplomatic services for arbitration and mediation of disputes among states; and

Whereas the government of Switzerland has for many years generously represented the diplomatic interests of other nations, in-

cluding the United States, in lands where these nations have no relations; and

Whereas the United States and Switzerland share a common heritage, based on a commitment to political and religious freedom of expression, on our shared legacy of a constitutional and Federal Government, on our commitment to human rights and dignity of the individual, and on our firm belief that a free enterprise economy provides the greatest prosperity for the greatest number of people; and

Whereas Switzerland, and the beautiful and historic city of Geneva, ever mindful of their tradition and vocation in the search for international peace, have once again offered their territory and facilities for a major international meeting, on this occasion between the leaders of the United States and the Soviet Union, on November 19–20, 1985: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That it is the sense of the Congress that, in recognition of their many contributions and as an expression of the warm gratitude of the American people for the strong bonds of friendship which have long existed between our two great democracies, the people and nation of Switzerland are to be commended for all they have done throughout this century in the search for freedom, international peace, and understanding.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. WEISS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous matter on Senate Joint Resolution 227, the Senate joint resolution just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

COMPUTER HACKERS STRIKE AGAIN

The SPEAKER pro tempore (Mr. LIPINSKI). Under a previous order of the House, the gentleman from Florida [Mr. NELSON] is recognized for 5 minutes.

Mr. NELSON of Florida. Mr. Speaker, another newspaper headline tells the tale of continuing computer crime. According to the USA today, just recently 23 computer hackers caused "significant damage" to Chase Manhattan Bank's records.

Last year this body passed the first Federal law addressing computer crime, and this particular incident is likely prosecuted with that statute. However, the fact remains that our Nation's computer systems remain vulnerable to attack by malicious criminals who would use the tremendous capabilities of these machines for illegal gain.

This year I have introduced legislation, H.R. 930, to expand the current law to cover abuses and breakins of computer systems which operate in interstate or foreign commerce. I believe it is important to safeguard the business records of the systems our economy relies on daily—not just the Federal Government computers and certain banking records—and to protect the interests of the country's citizens. Earlier this year we heard testimony on this subject before the Judiciary Subcommittee on Crime, chaired by my distinguished colleague [BILL HUGHES]. I am hopeful we will move forward with legislation to broaden the coverage of the present law later this fall.

As computers become ubiquitous to our society, this type of crime will proliferate. Often unbeknownst to its victims, it is reaching into the pocketbooks of the Nation's consumers. I believe we must provide adequate deterrents to this type of activity and responsibly address the issue of computer crime in the Congress.

I respectfully request insertion of the October 18, 1985, USA Today article at this point in the RECORD:

[From USA Today, Oct. 18, 1985]

COMPUTER HACKERS VEX NO. 3 BANK

(By Jack Kelley)

A gang of 23 teen-age computer hackers has done "significant damage" to Chase Manhattan Bank's records.

The teens changed secret passwords to bar rightful users from getting access to financial records, altered accounts and tampered with the money transfer system, FBI's Gary Laturno said Thursday.

They made 40 attempts to break into the system, says an affidavit filed in federal court in San Diego.

FBI agents seized computers, keyboards, modems and software from homes in seven Southern California counties in what experts are calling the USA's largest hacker round-up.

But no arrests have been made in the continuing probe.

Officials of Chase Manhattan—the USA's third largest bank—said the unauthorized entries date back to June at Interactive Data Corp., in Waltham, Mass., where the computer records are stored. They are still assessing the damage.

If prosecuted the teens could face up to $100,000 in fines, a year in prison, or both.

There are about 30,000 computer hackers, but only a few hundred reportedly "break" into other computers. Hacking is against the law in 46 states, said Jay BloomBecker, director for the National Center for Computer Crime Data.

BloomBecker predicts an increase in hacking in the next decade: "Many businesses are somewhat slow" in tightening up computer security.

CONSULTATION ON THE REFUGEE ADMISSIONS PROGRAM FOR FISCAL YEAR 1986

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey [Mr. RODINO] is recognized for 5 minutes.

Mr. RODINO. Mr. Speaker, the Refugee Act of 1980 (Public Law 96–212) requires the President to consult with Congress prior to the beginning of each fiscal year on his proposals for refugee admissions for the coming year.

The consultation was initiated with the following communication:

U.S. COORDINATOR FOR
REFUGEE AFFAIRS,
Washington, DC, September 10, 1985.

Hon. PETER W. RODINO, Jr.,
Chairman, Committee on the Judiciary, House of Representatives.

DEAR MR. CHAIRMAN: In accordance with the Refugee Act of 1980, I am pleased to transmit the President's recommendation for the Fiscal Year 1986 refugee admission ceiling in preparation for our annual consultations with the Congress.

The Administration's final determination on admission levels and regional allocations will be made only after we have carefully considered Congressional and other views expressed during the consultation process.

Sincerely,

H. EUGENE DOUGLAS,
Ambassador at Large.

THE WHITE HOUSE,
Washington, September 10, 1985.

Memorandum for the Honorable H. Eugene Douglas, United States Coordinator for Refugee Affairs.

Subject: FY 1986 Refugee Consultations.

In accordance with the Refugee Act of 1980, I have approved the following ceilings for consultations with the appropriate committees of the Congress concerning FY 1986 refugee admissions.

The admission of up to 70,000 refugees to the United States during FY 1986 to be allocated among the regions of the world as follows: 48,500 for East Asia; 9,500 for the Soviet Union/Eastern Europe; 6,000 for the Near East/South Asia; 3,000 for Africa; and 3,000 for Latin America/Caribbean; and

An additional 5,000 refugee admissions numbers which shall be made available for the adjustment to permanent residence status of aliens who have been granted asylum in the United States, as this is justified by humanitarian concerns or is otherwise in the national interest.

Further in accordance with provisions of the Immigration and Nationality Act, I propose to specify that special circumstances exist that for the purposes of admission, the following persons, if they otherwise qualify for admission, may be considered refugees of special humanitarian concern to the United States even though they are still within their countries of nationality or habitual residence:

Persons in Vietnam with past or present ties to the United States, including Amerasian children; and

Present and former political prisoners, and persons in imminent danger of loss of life, and their family members, in countries of Latin America and the Caribbean.

RONALD REAGAN.

Adhering to the two-tier consultation format used in prior years, I, as chairman of the Committee on the Judiciary, convened on September 19, 1985, first, a closed meeting between Secretary of State George Shultz and the committee's consultative members, ranking minority member, Congressman HAMILTON FISH, JR., the chairman and ranking minority member of the Subcommittee on Immigration, Refugees, and International Law, Congressman ROMANO L. MAZZOLI, and DANIEL LUNGREN, respectively, and myself.

This closed meeting was followed immediately by an open public hearing by the full committee.

The following tables were supplied as background information for members of the committtee:

REFUGEE ADMISSIONS LEVELS SINCE ENACTMENT OF REFUGEE ACT OF 1980

	President's proposal	President's determination	Actual admissions
Fiscal year:			
1981	217,000	217,000	159,252
1982	173,000	140,000	97,355
1983	98,000	90,000	61,681
1984	72,000	72,000	71,113
1985	70,000	70,000	68,100

Proposed U.S. refugee admissions in fiscal year 1986

Area of origin	
Africa	3,000
East Asia [1]:	
First asylum countries	40,000
ODP from Vietnam	8,500
Eastern Europe and the Soviet Union	9,500
Latin America and the Caribbean	3,000
Near East and South Asia	6,000
Total	70,000

[1] In order to differentiate between those Indochinese refugee admissions from East Asia coming from first asylum countries and those coming directly from Vietnam, a separate admissions ceiling is again being proposed for the Orderly Departure Program.

ESTIMATED COSTS OF REFUGEE MOVEMENT TO AND RESETTLEMENT IN THE UNITED STATES—FISCAL YEAR 1985 AND FISCAL YEAR 1986

[Dollars in millions]

Agency	Fiscal year 1985 program total cost	Fiscal year 1986 Arrivals 1986	Prior	Total
Department of State				
Bureau for Refugee Programs:				
Volags' Services Overseas	$16.0	$15.0	.....	$15.0
Language/Orientation Programs Overseas	18.2	18.3	.....	18.3
Transportation loans	29.0	36.3	.....	36.3
Reception and placement agreements	40.8	60.5	.....	60.5
Subtotal	103.2	130.1	.....	130.1

Other subtotal	35,674,000	19,300,000
Administration [7]	8,150,000	7,880,000
Subtotal: Refugee Program	267,300,000	207,580,000
Other assistance: Food for Peace (Public Law 480, title II) [8]	150,000,000	150,000,000
Grand total	418,300,000	357,580,000

[1] Includes $10.5 million from the Emergency Refugee and Migration Assistance Fund [ERMA].
[2] Does not include rupee contributions equivalent to $3 million for UNHCR and $750,000 for the ICRC for fiscal year 1985 and similar amounts in fiscal year 1986.
[3] Includes $8 million from ERMA.
[4] Includes $12 million from ERMA.
[5] Includes $500,000 from ERMA.
[6] Includes $1.5 million from ERMA.
[7] Portions of these funds are associated with the costs of the U.S.S Refugee Admissions Program.
[8] Estimate as of August 25, 1985.

In the closed meeting with the consultative members, Secretary of State Shultz presented the President's proposal for the admission of 70,000 refugees in fiscal year 1986. He explained that the President wished to maintain a separate ceiling for the Orderly Departure Program to assure the ASEAN countries that an expanding ODP will not decrease resettlement from first asylum lamps and secondly, to reiterate that the United States is prepared to make good on its offer made last year to accept a large number of Amerasians and "reeducation camp" prisoners. The Secretary stated that "once again in 1985, the United States played a major part in responding to urgent refugee needs—both through life-saving assistance overseas and through resettlement in the United States where necessary."

Immediately following the closed meeting, the full committee held an open hearing on the President's refugee admissions proposal for fiscal year 1986. The following witnesses were heard by the committee:

Ambassador H. Eugene Douglas, U.S. Coordinator for Refugee Affairs;

Edward J. Derwinski, Counselor, Department of State;

James N. Purcell, Jr., Director, Bureau of Refugee Programs, Department of State;

Alan C. Nelson, Commissioner, Immigration and Naturalization Service, Department of Justice; and

Dr. Phil'ip Hawkes, Director, Office of Refugee Resettlement, Department of Health and Human Services.

Following the completion of the consultation process, the consultative members addressed the following letters to the President:

COMMITTEE ON THE JUDICIARY,
Washington, DC, September 23, 1985.

The PRESIDENT,
The White House,
Washington, DC.

DEAR MR. PRESIDENT: We have completed the consultative process mandated by P.L. 96-212, the Refugee Act of 1980, with regard to refugee admissions and allocations for FY 1986 as recommended by you in your memorandum dated September 10, 1985 to Ambassador H. Eugene Douglas, U.S. Coordinator for Refugee Affairs.

The proposal, as transmitted to us on the same date, provides for a ceiling of 70,000 refugees allocated as follows: 48,500 for East Asia; 9,500 for the Soviet Union/Eastern Europe; 6,000 for the Near East/South Asia; 3,000 for Africa and 3,000 for Latin America/Caribbean; and an additional 5,000 refugee admission numbers which shall be made available for the adjustment to permanent residence of certain qualified aliens.

We are pleased to advise you that we interpose no objections to the number and allocations as recommended.

We believe, however, that no reallocation of refugee numbers between regions should take place during the fiscal year without notifying the Committee on the Judiciary sufficiently in advance to permit an expression of an opinion should it be deemed advisable.

We are concerned about two financial aspects of the FY 1986 refugee admissions program: one, the proposed action to be taken (contrary to the position of the House of Representatives) regarding the Matching Grant Program administered by the Office of Refugee Resettlement of the Department of Health and Human Services; and two, the effect of the Appropriations Committee's action in cutting $45 million from the refugee resettlement program.

We urge that the reductions (per capita and total funding) in the Matching Grant Program as proposed by the Administration be suspended until completion of Congressional consideration of the refugee reauthorization legislation. The Judiciary Committee and the full House of Representatives have recognized the importance of this program and, as a result, recently recommended against any funding reductions (Sec. 7 of H.R. 1452, as passed by the House of Representatives on June 13, 1985).

With regard to the overall budget, we believe it is incumbent upon the Administration to take all necessary action to provide adequate funds to finance the refugee admissions program ultimately decided upon by you in consultation with the Congress. If adequate funding is not available through the regular appropriations process and if the reprogramming of funds is not a viable alternative, we would expect the Administration to submit to the Congress a supplemental budget request for any additional appropriations which may be necessary to

fund the refugee admissions program which you determine for FY 1986.

As in the past, the Committee would appreciate being kept informed on a monthly basis with regard to the progress of the FY 1986 refugee admissions program.

We wish to convey our thanks to Secretary of State Shultz, the U.S. Coordinator for Refugees and the representatives of the Department of State, Justice and Health and Human Services for their cooperation and assistance in this consultative process.

Sincerely,

HAMILTON FISH, Jr.,
Ranking Minority Member,
PETER W. RODINO, Jr.,
Chairman, Committee on the Judiciary.

COMMITTEE ON THE JUDICIARY, SUBCOMMITTEE ON IMMIGRATION, REFUGEES AND INTERNATIONAL LAW,
Washington, DC, September 27, 1985.

The PRESIDENT,
The White House,
Washington, DC.

DEAR MR. PRESIDENT: This is to advise you of several of my deep concerns relating to the Administration's refugee admissions' proposal which was presented to the consultative members of the Committee on the Judiciary by the Secretary of State on September 19, 1985.

First of all, I do not believe the proposed 70,000 refugee numbers is consistent with the Administration's previously stated objective of "managing down" the Indochinese refugee program. Since the refugee situation in Indochina has not worsened over the past year and in view of the fact that the countries in the region are following a humane first asylum policy, I see no valid reason why admissions cannot be reduced for Fiscal Year 1986.

Second, there is a likelihood that the House will follow the lead of its Appropriations Committee and reduce the funding level for the refugee program. We were told that such an action could have the effect of reducing the refugee admissions' level to 53,000. I am not wedded to an admissions number, but 53,000 may be an appropriate admissions level in light of possible funding cuts and in light of the fact that may domestic programs for poor and underprivileged Americans have recently suffered drastic budget cuts.

As you know, I fought hard to maintain the Judiciary Committee's recommended funding for the domestic resettlement program during House floor consideration of the Refugee Reauthorization legislation. My efforts were unsuccessful. The recommendations of my Subcommittee which had been accepted by the full Judiciary Committee were flatly rejected by our colleagues. This underscores the need to deal realistically in setting admissions levels with likely funding reductions.

The United States should not admit any more refugees for resettlement than it is willing to properly finance. Accordingly, and in further light of the Administration's decision to terminate targeted assistance to communities heavily impacted by refugee admissions, I think the admissions numbers should be reduced.

Thirdly, Mr. President, the State Department has failed to commit the necessary personnel and resources to monitoring the use of the millions of dollars it grants to the voluntary agencies to resettle refugees. I have brought this often to the attention of the Secretary of State, but I do not sense he shares my concerns in this regard. I continue to believe strongly that a greater commitment must be made to ensuring that the taxpayer is getting the most "bounce for the buck" in the cooperative agreements.

Fourthly, the Department of State and Health and Human Services should make every effort to expand the role of Mutual Assistance Associations (MAA's) in the resettlement process. A refugee's own countrymen and women, who have made the tough journey from refugee to productive U.S. citizen are often in the very best position to help that individual enter the mainstream promptly and with as little trauma as possible.

The House Refugee Reauthorization bill recognizes that MAA's are underutilized, and I would urge the Administration to take concrete steps to achieve a greater use of this resource administratively without awaiting Congressional passage of the Refugee bill.

Fifthly, I am concerned that the State Department has not sufficiently pursued in Southeast Asia the preferred response to refugee problems, that is, voluntary repatriation. I do not feel the U.S. has actively pressed the U.N. High Commissioner for Refugees (UNHCR) to intensify its efforts to voluntarily repatriate refugees back to Vietnam, particularly unaccompanied minors in closed camps in Hong Kong. Nor, have we adequately pressed the Thai Government, the Laotian Government, and the UNHCR on the question of returning Laotians to Laos who are determined not to be refugees after requisite screening. Unless these matters are addressed in an urgent fashion, I am convinced that a broad use of voluntary repatriation in suitable cases will never get off the ground.

Sixth, the second preferred approach to refugee problems—local settlement, i.e. allowing refugees to remain permanently in the country in which they sought asylum—has not been vigorously pursued by the State Department in Thailand. For many years the Committee has been told that "now is not the time to raise the issue" of local settlement of Laotian highlanders in Thailand. I think, instead, Mr. President, that the time has come to raise the issue with the Thai Government contemporaneously with announcing the refugee admission numbers for 1986. In addition to local settlement, U.S. officials should continue to press with Thai officials the sea piracy issue prior to commiting our Government to resettling a specific number of refugees from Thailand.

Seventh, the fact that some 23,000 persons are already in the refugee pipelines makes the Executive-Legislative consultation process less a consultation than a cut-and-dried notice. To the extent that the U.S. has placed refugees in a Refugee Processing Center (like Bataan) the U.S. has agreed to admit the refugees. So in future years, I hope the Administration could note clearly and in a separate category the refugees in the "pipeline". Presented this way in the Administration's consultation documents, the Committee will be able to more accurately reach its decisions on refugee admission recommendations.

Finally, but certainly not the least important, is my serious concern that our admissions program is tilted too heavily toward Indochinese refugees. I believe we must have a better regional and nationality balance in our program. The Refugee Act of 1980 was intended to eliminate ideology and geography as the controlling factors in our refugee admission program. We seem not to have accomplished this most important objective and a more balanced program would certainly be a step in the right direction.

I appreciate this opportunity to share with you my views and concerns on your admissions proposal and on the refugee program in general. I believe we have made great strides since the enactment of the Refugee Act and I look forward to discussing these matters further with your representatives in the Department of State, Justice and Health and Human Services.

Sincerely,

ROMANO L. MAZZOLI,
Chairman.

COMMITTEE ON THE JUDICIARY,
Washington, DC, September 30, 1985.

The PRESIDENT,
The White House, Washington, DC.

DEAR MR. PRESIDENT: I am pleased to have been able to participate in the consultative process mandated by P.L. 96-212, the Refugee Act of 1980, with respect to refugee admissions and allocations for fiscal year 1986. While I am in general agreement with the Chairman of the Committee, Mr. Rodino, and the Ranking Minority Member, Mr. Fish, I do wish to make a couple of personal observations, some of which I brought up during the course of our meeting with Secretary of State George Shultz on September 19.

As the Ranking Republican on the Subcommittee on Immigration, Refugees, and International Law, I am sensitive to the need for the United States to assume a leadership role in the resettlement of refugees. But, as the consultative report correctly noted, we already carry the bulk of the responsibility for the support and resettlement of refugees worldwide. In recent years, we have been particularly generous.

Funds, though, are finite, and while I support and endorse the Administration's recommended ceiling of 70,000, I would hope that the necessary funding level could be achieved in ways other than enhanced Federal expenditures. For example, I mentioned to Secretary Shultz the possibility of reprogramming funds in such a way as to make up the difference between the Administration's request and the amount likely to be appropriated by the Congress. I think, too, that we should consider approaching allies, such as Japan, who, for internal political reasons, decline to resettle significant numbers of refugees. If such nations prefer not to accept their fair share of refugees, they should be willing to contribute to the expenses of those who do.

Lastly, I also want to emphasize, as I have in the past, the urgent need for effective and accelerated English training. Perhaps if there were more of an emphasis on such training in camps outside the United States, time there could be reduced and funds could be saved. If we are to reduce refugee welfare dependency, which is unacceptably high in our home State of California, then we must stress English training.

I join with my colleagues in expressing the hope that the Committee will be kept informed with regard to the progress of the FY 1986 refugee admissions program, and I wish to express my appreciation to you and to your Administration for your help and cooperation throughout the consultative process.

Sincerely,

DANIEL E. LUNGREN,

Ranking Minority Member, Subcommittee on Immigration, Refugees and International Law.

The following Presidential determination, No. 85-21, dated October 16, 1985, was transmitted to the Congress by Ambassador H. Eugene Douglas on October 18, 1985:

U.S. COORDINATOR
FOR REFUGEE AFFAIRS,
Washington, DC, October 18, 1985.

Hon. PETER W. RODINO, Jr.,
Chairman, Committee on the Judiciary, House of Representatives.

DEAR MR. CHAIRMAN: In accordance with the provisions of the Refugee Act of 1980 and after consulting with the Congress, the President has established the refugee ceiling for Fiscal Year 1986.

I have the honor of transmitting a copy of the Presidential Determination dated October 16, 1985.

Sincerely,

H. EUGENE DOUGLAS,
Ambassador at Large.

Attachment.

THE WHITE HOUSE,
Washington, October 16, 1985.

PRESIDENTIAL DETERMINATION No. 85-21

Memorandum for the Honorable H. Eugene Douglas, United States Coordinator for Refugee Affairs.

Subject: FY 1986 Refugee Ceilings

In accordance with the relevant statutes and after appropriate consultations with the Congress, I have determined that:

The admission of up to 67,000 refugees to the United States during FY 1986 is justified by humanitarian concerns or is otherwise in the national interest;

The 67,000 worldwide refugee admission ceiling shall be allocated among the regions of the world as follows: 37,000 for first asylum from East Asia and 8,500 for the East Asian Orderly Departure Program; 9,500 for Eastern Europe and the Soviet Union; 6,000 for the Near East and South Asia; 3,000 for Africa; and 3,000 for Latin America and the Caribbean.

An additional 5,000 refugee admissions numbers shall be made available for the adjustment to permanent resident status of aliens who have been granted asylum in the United States, as this is justified by humanitarian concerns or is otherwise in the national interest.

In accordance with provisions of the Immigration and Nationality Act and after appropriate consultations with the Congress, I specify that special circumstances exist such that, for the purposes of admission under the limits established above, the following persons, if they otherwise qualify for admission, may be considered refugees of special humanitarian concern to the United States even though they are still within their countries of nationality or habitual residence:

Persons in Vietnam with past or present ties to the United States, including Amerasian children; and

Present and former political prisoners, and persons in imminent danger of loss of life, and their family members, in countries of Latin America and the Caribbean.

This determination shall be transmitted to Congress immediately and shall be published in the Federal Register.

RONALD REAGAN.

ORDER OF BUSINESS

Mr. PARRIS. Mr. Speaker, I ask unanimous consent that my special order precede the special order of the gentleman from Texas [Mr. BARTON].

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Virginia?

There was no objection.

REAFFIRMING DEPOSITS AT ALL FEDERALLY INSURED INSTITUTIONS ARE BACKED BY THE U.S. TREASURY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Virginia [Mr. PARRIS] is recognized for 60 minutes.

Mr. PARRIS. Mr. Speaker, I appreciate the approval of the gentleman from Texas [Mr. BARTON] for this agenda change.

Mr. Speaker, I have today introduced legislation which reaffirms that deposits at all federally insured institutions are backed by the full faith and credit of the U.S. Treasury. A similar resolution, House Concurrent Resolution 290, passed the House of Representatives on March 18, 1982, by an overwhelming margin of 382 to 7. The Senate passed this guarantee to depositors unanimously. I commend that resolution to my colleagues and am confident it will receive substantial support.

I take the well of the House today, Mr. Speaker, in an attempt to increase what I have called less than complete public understanding of the problems facing the Nation's thrift industry. Regulators at the Federal Savings and Loan Insurance Corporation [FSLIC], which protects depositors' accounts up to $100,000 per depositor per institution, have become increasingly concerned about a portion of the savings institutions it insures. The problem is twofold: in our older, industrial States, thrifts are still crippled by interest rate problems left over from the collapse of 1981-82.

□ 1645

In some of our Sunbelt States a new, potentially more costly problem has emerged related to exposure to credit risk. Eighty percent of the thrift industry's problems are in four States: California, Texas, Florida, and Louisiana, but in those States particularly, those problems are severe.

I want to assure my fellow Virginians that, according to Federal regulators, Virginia savings institutions are generally very safe and sound.

Scores of our Nation's thrifts see little prospect of an early return to profitability; therefore, these institutions have little to lose by making highly speculative loans and direct equity investments with money obtained from the Federal credit window; they know the FSLIC will cover all their losses. The situation therefore, amounts to an industry that is steadily deteriorating—a condition that can no longer be tolerated.

The Chairman of the Federal Home Loan Bank Board has testified that the insurance fund could be at zero balance within a year. An independent study by the General Accounting Office [GAO] reveals that 42 percent of all savings institutions are insolvent or have a dangerously low net worth. This group of 1,343 institutions, at the end of 1984, had roughly one-half of the industry's assets, $483.7 billion. Most are not earning a profit and are, in fact, accumulating losses. Over time, the potential cost of liquidating all these troubled institutions is estimated at between $15 and $20 billion. The cost could even amount to between $30 and $50 billion, according to FSLIC officials.

This far outstrips the insurance fund's current reported $3.2 billion unobligated balance. The GAO study is important because it focuses on the low net worth of the entire thrift industry and provides an independent assessment of the number of insolvent institutions that may need assistance from the FSLIC. The numbers also demonstrate that Congress was correct in adopting the principle of expanded powers for thrifts in 1980 and 1982 in order to allow the market value of the thrift industry's sagging loan portfolio to recover from the ravages of inflation and to enjoy the benefits of a declining interest rate. In addition, it is clear that any attempt to require the industry to set aside a portion of its own resources would move an additional 159 thrifts into insolvency and categorize 247 more in a low net worth position, depleting funds available to protect the industry from future losses which would make the future even more bleak. But equally important, these powerful facts confront the Congress, thrift regulators, and the industry with a crucial window of opportunity to address the insolvency crisis at FSLIC before the cost escalates dramatically and the Nation's healthy and profitable thrifts are adversely affected by the unfortunate condition of low negative net worth, which is the condition of a portion of thrift institutions now.

Mr. Speaker, these are the unfortunate facts we have gathered from conversations with top officials at the insurance fund and experts who have investigated the thrift industry at the General Accounting Office, Congress' independent auditor.

Let me hasten to add, the thrift industry is in the midst of a serious situation, but there is no reason for the average depositor to be concerned. Congress will never allow deposits at federally insured savings institutions to be lost. That precedent has been

firmly established and will not be repudiated. In 1982, when a portion of the thrift industry was collapsing, Congress pledged the full faith and credit of the U.S. Treasury in support. I don't believe there is one Member of Congress who does not feel obligated to stand behind his promise, even though the thrift industry may face much more costly problems today. No account holder should feel compelled to withdraw their deposits from their neighborhood savings and loan. Yet all of us as taxpayers must urge the thrift industry, its regulators, and we in the Congress to calmly and decisively begin improving the situation which exists at institutions that threaten this $1 trillion industry, the bulwark of our housing finance efforts. We simply cannot afford to ignore the situation any longer. It would be unthinkable to permit the excesses of a few to jeopardize the future of the many in this important industry.

The real issues surrounding this crisis, Mr. Speaker, only indirectly relate to the current balance of the Federal Savings and Loan Insurance Fund. We must begin to consider the questions: How many thrifts will or should be allowed to fail? Who will pay to correct this increasingly serious situation? How much will it cost the Nation's taxpayers? And how many profitable thrifts will be adversely affected by the mistakes in judgment by a number of thrifts that are already insolvent or floundering in low net worth?

I wholeheartedly agree with the principals advocated by the Federal Deposit Insurance Corporation, the insurer of commercial banks' deposits.

Public confidence in the banking system is enhanced when the public receives fair and meaningful disclosure, and confidence is eroded when the public believes it is being decieved or is not receiving all the facts it needs to evaluate a situation.

As one Member of Congress and one member of the House Banking Committee, I believe it is long since past time to be candid with America about the extent of the problems at the Federal Savings and Loan Insurance Corporation. Therefore these remarks are the beginning of what I hope will be increased candor by all concerned with this situation.

FSLIC is a wholly owned Government Corporation that is governed by the Federal Home Loan Bank Board. FSLIC is responsible for insuring the safety of deposits in thrift and home financing institutions.

At my request, a team of economists at the General Accounting Office [GAO] has compiled the most up-to-date public analysis of the problems facing the thrift industry and the solvency of the insurance fund available. "Thrift Industry Problems: Potential Demands on the FSLIC Insurance Fund," dated October 23, 1985, was prepared by and through the auspices of the GAO.

This independent analysis of the perilous financial condition of a significant portion of thrift institutions insured by the Federal Savings and Loan Insurance Corporation dramatically illustrates the problems faced by the fund. What's more, GAO's timely study exposes the strains a significant number of financially distressed thrifts have placed on the large majority of savings and loans who have labored to retain a margin of profitability.

These glaring numbers illustrated in tables and charts, to which I will refer throughout these remarks, are based on data supplied to the GAO by the Federal Home Loan Bank Board. The GAO analyzed the Bank Board's data in a sophisticated computer study, using one of the best data bases on the thrift industry currently available. The figures presented in the study are based on data from 1977 to December 31, 1984, and are consistent with historical data which is comparable over time. The numbers clearly show the developing trends.

By way of background, in the 1960's and 1970's, thrift industry profits were healthy. Commercial banks and savings institutions operated under interest rate ceilings. The financing of housing was a priority for this country, and savings and loans were given a slight advantage over commercial banks on what they could pay for deposits in order to compete with banks.

Savings and loans would take in deposits on a fixed rate basis and lend out those funds as home mortgages. Thrift failures were rare, but economic and financial upheavel in the 1970's began to unravel this scenario.

Inflation and a volatile interest rate environment left thrifts with an asset base of primarily long-term, fixed rate mortgages yielding lower rates of return than the institutions had to pay to attract deposits to support their loans. The easy days of thrift profits from fixed rate deposits loaned out as home mortgages were long gone.

Pressure built for Congress to address these structural problems. In 1980 Congress passed legislation to phase out consumer interest rate ceilings by 1986, with the passage of the Depository Institutions Deregulation and Monetary Control Act. Nevertheless, banks and thrifts remained hampered by interest rate ceilings and were losing deposits. Consumers had a choice about where they would deposit their money. Money market mutual funds, free to offer market rates, attracted over $200 billion by 1982. Consequently, the thrift industry was thrown into the throes of a real crisis between 1981 and 1982.

As interest rates soared to unprecedented heights, thrifts failed in record numbers. According to figures compiled by Washington Financial Reports a full 20 percent of the federally insured savings industry vanished between 1980 and 1984. FSLIC-insured thrifts either failed or were merged out of existence. The number of federally insured savings institutions fell from 4,002 in 1980 to 3,167 in 1984, with a record 252 thrifts failing in 1982. In contrast, only 117 savings institutions failed between 1934, when the FSLIC was set up, and 1980, a failure rate of 2.5 institutions per year, one one-hundredth of last years rate.

Congress soon realized that the process of lifting consumer interest rate ceilings had to be accelerated. Legislation passed in 1982, the Garn-St Germain Depository Institutions Act, thrust depository institutions onto the same level playing field as uninsured money market mutual funds. It gave federally insured institutions a money market deposit account, a ceiling-free, ready-access account and expanded operations opportunities. Once again, depository institutions could offer the small saver market rates of interest on savings.

Today, the thrift industry has approximately $1 trillion in total assets. Deposits amount to 80 percent of this $1 trillion figure. Net income, the after-tax profits for the industry, has improved for many thrifts, especially the larger, better managed thrifts. A great majority of federally insured thrifts—80 percent of all thrifts according to the Bank Board Chairman—are returning to profitability. Many analysts project that the savings and loan industry will earn between $4 and $5 billion in 1985. This year could well bring record profits for the industry, but earnings are still a modest return on assets when compared with other commercial ventures. However, the thrift industry's earnings are historically declining.

Let us look at the net income under table 1. From 1977 to 1984, and this is net income in billions of dollars, this rate of return on assets. It starts at roughly 0.8 and comes down in 1984 to 0.25, $5 billion on a $1 trillion investment.

The 1985 after tax earnings should be an improvement over the $2 billion in profits earned in 1983 and the $1.7 billion the industry earned in 1984. But let's put the $4 to $5 billion projected earnings for 1985 in proper perspective. They are a modest return when contrasted with the $1 trillion size of the industry. In fact, these earnings are probably overstated because the Bank Board and Congress have permitted creative accounting techniques to artificially increase net worth and earnings; the undesirability of these accounting methods will become clear when we examine the

net worth of FSLIC-insured institutions.

The rate of return on assets in the thrift industry has been steadily deteriorating—reduced from 0.80 to 0.25 percent return on assets—and casts doubt on whether the thrift industry can attract much needed new capital for private mergers of insolvent thrifts, at a time when regional and national banking are developing.

Let us now look at table 2, net worth as a percentage of total assets.

The net worth of federally insured savings institutions, that is assets minus liabilities, fell below 3 percent of assets at the end of 1984 for the thrift industry as a whole, according to the GAO study. This is measured according to generally accepted accounting principles. Industry analysts project that net worth will improve marginally in 1985, hovering around the 3 percent mark for the year; but that is still the level at which, under the Bank Board's own rules, an individual institution should be closed.

Net worth is one measure of how well protected against losses the thrift industry is. It presents a much truer snapshot of the industry than regulatory net worth, which was 3.8 percent for the last quarter of 1984. Regulatory net worth is measured according to the Bank Board's more liberal regulatory accounting principles [RAP].

Let me give you a short lesson on thrift accounting history.

In 1980, net worth for all FSLIC-insured institutions was roughly 5.5 percent, as measured by the Bank Board's regulatory accounting standards and generally accepted standards. But net worth plunged between the middle of 1980 and the end of 1984. Remember, the industry was caught between the one-two punch of long-term, fixed rate mortgages yielding lower rates of return than the thrifts had to pay to attract deposits to support their loans.

Confronted with a collapsing thrift industry, the Bank Board, with Congress' blessing, devised new definitions of net worth for regulatory purposes.

□ 1700

Prior to the adoption of these creative accounting reforms, FSLIC could close or bail out a savings institution when its net worth fell below 5 percent. This was eased to 4 percent in 1980 and dropped to 3 percent in 1982.

Regulatory net worth is calculated according to regulatory approved principles. It is a Washington devise that many disdainfully call creative accounting. RAP amounts to a two-front assault on a sinking balance sheet.

Let me define RAP for you very quickly. RAP is regulatory net worth, which is the sum of preferred stock, the permanent reserve or guaranty stock, paid-in surplus, qualifying mutual capital certificates, qualifying subordinated debentures, appraised equity capital, net worth certificates, accrued net worth certificates, income capital certificates, reserve, undivided profits, retained earnings and net undistributed income.

GAAP is net worth, as defined under generally accepted accounting principles. It excludes the components of regulatory net worth. Deferred net losses on loans and other assets sold are also excluded from the assets. TAP is tangible net worth, which is GAAP net worth, less good will and other intangible assets.

Now, on table 5, net worth certificates, the capital, as shown on the net worth certificates figure here, capital is bolstered through the use of a device called net worth certificates, a paper for paper exchange between the insurance fund and an ailing thrift, which can list them as assets. It is kind of a fancy IOU. If net worth certificates are not enough to prop up a savings and loan, then when FSLIC takes over an insolvent thrift, it can make another capital infusion called income capital certificates.

These are the figures again from 1977 through 1984 in those categories.

According to the Bank Board Chairman, FSLIC has had to reduce its inobligated insurance balance by $580 million in 1985, this year alone, in order to bail out just 17 thrifts with these capital infusions, and the meter is still running. The Chairman has said that more than a billion and a half dollars may be needed to sustain these and other thrifts before the end of this year.

Now, let us look at deferred losses in this chart, right here.

At the end of 1984, regulatory net worth appears to be a somewhat stronger percentage of assets, right here. The thrift industry does not earn profits on these assets, and good will, which is the next column, is 63 percent of the total net worth. It is pumped into net worth, but you must remember that all of these are nonperforming assets and do not generate profits. Deferred losses work this way: You sell your bad assets, but you only acknowledge 10 percent of the loss. Over the next 10 years, you carry the balance as a remaining asset, which it clearly is not. Deferred losses equal full 17 percent of the RAP net worth of insured institutions in this Nation.

Let us go to table 3, GAAP insolvent thrifts.

The General Accounting Office reports that at the end of 1984, a total of 434 savings and loans and mutual savings institutions insured by the FSLIC, with total assets of $101.6 billion, are insolvent under generally accepted accounting principles. Ten percent of the industry's total assets are held in insolvent institutions. I am told by generally reliable sources close to the crisis that this number has recently increased by an additional 25, bringing the total to roughly 460 insolvent institutions.

Table 4, low net worth thrifts, is the next chart.

Unfortunately, more troubles loom on the horizon—909 Depository institutions insured by FSLIC, with total assets of $382.1 billion, have a low net worth of between 0 and 3 percent of assets. Again, the source of this information is the independent General Accounting Office relying on FSLIC's own numbers and reports. Keep in mind that savings and loans with a net worth below 3 percent were often closed by FSLIC before 1982.

If you combine the 909 thrifts with low net worth with the 434 insolvent thrifts being kept in business because FSLIC lacks the resources to reorganize them, you find a staggering 1,343 problem institutions. Viewed on a percentage basis, almost one-half of all thrifts still in business today, 42 percent, to be exact, should be technically closed if the regulatory standards were impartially applied.

On table 6 we have the estimates of FSLIC losses.

The cost to close just the 434 insolvent thrifts with negative net worth at the end of 1984 may have exceeded $15 billion. This figure does not include the potential cost of having to liquidate or assist the 909 thrifts with net worth between 0 and 3 percent at the end of 1984.

The $15-billion price tag is based on a 15-percent average cost to the insurance fund of dealing with failed institutions in 1984. Obviously, this potential cost is far in excess of the oftencited $3.2 billion FSLIC balance which FSLIC currently has on hand to insure over $800 billion of deposits.

The GAO cost is, again, probably conservative. The Bank Board Chairman recently told our committee that the loss ratio FSLIC is experiencing on bailout this year is between 15 and 20 percent. In Texas, the FSLIC estimates losses at some thrifts could go as high as 70 percent of their assets.

A high-ranking Bank Board official has told Members of Congress that the cost of ridding the savings and loan industry of all the threatened thrifts could cost between $30 billion and $50 billion over the next several years.

Early this fall, the head of the FSLIC told the House Banking Committee that the reserves of the insurance fund were $6.6 billion. On October 17, just several weeks ago, the Bank Board Chairman told the same panel that the unobligated reserves are currently $3.2 billion.

But he also conceded that $2.6 billion "represents the effective usable reserves of the fund available at this time to deal with the problem cases." And there is some confusion about whether that figure includes all of the

banks' obligations for income certificates and net worth certificates or not.

We know all too well that there is no shortage of problem thrifts. Right now, FSLIC is operating a holding operation for 18 insolvent thrifts it was forced to liquidate but for which it lacks a buyer. A team of recognized experts from solvent institutions, who are on loan to FSLIC under short-term management consignment contracts, operate these federally chartered institutions. FSLIC injects capital through income capital certificates.

When FSLIC reopens these managed thrifts, they begin with a negative net worth. FSLIC has put together a fine group of thrifts executives who are laboring mightily to straighten out these troubled institutions.

However, these 18 thrifts have cost the insurance fund $580 million in this year alone, over $32 million apiece per institution. Liquidity is provided through the reserve window at the Federal Home Loan district banks. To date, just these 17 thrifts received $1.2 billion in cash advances guaranteed by the Federal Savings and Loan Insurance Corporation.

The Chairman has admitted at the October 17 hearing that within the next 6 or 7 months the fund would be depleted by another $1 billion to $1.5 billion, just to keep alive the 17 thrifts it is operating under management contact, plus prop up another 30 to 70 thrifts located mainly in California and Texas.

FSLIC will receive up to $1 billion over the next year from a special premium assessed against the industry. Also, the fund will receive another billion dollars from investment revenue and from the regular industry premium, which is one-twelfth of the deposits of insured institutions.

But the Chairman has publicly stated that FSLIC "could run out of money much sooner than (a year) if we chose to resolve all these cases and not just keep them."

The magnitude of the problem, therefore, far outstrips FSLIC's current and future resources unless other funds are provided.

There are those in the thrift industry who indicate that the mounting problems among the 20 percent or so of the industry that are the most serious are not really significant because, with time, many of these institutions will recover. Meanwhile, FSLIC can quietly close the thrifts that are unable to make it.

Let us look now, briefly, at table 7, profit experience.

The GAO analysis contradicts this hope. The vast majority of insolvent thrifts for 1984 did not earn a profit for the year, when thrift performance is measured on an average annualized basis.

The economists at GAO found that of the 19 thrifts whose liabilities exceeded assets by 9 to 12 percent, only 1 turned a profit for the year. What is more, this group's rate of return on assets can only be considered a disaster, ranging from negative 3.2 percent to negative 8.12 percent. That means their net worth is falling every day and their problems are worsening, not improving.

The table shows that of the 334 thrifts whose liabilities exceeded assets by 0 to 6 percent, only 138 earned a profit for the year.

Of the 179 thrifts with a positive net worth, whose assets exceeded liabilities by 1 percent, only half, 89, managed to generate a profit. The average rate of return for this group was a negative 0.16 percent. The picture is not much better for many of the 302 thrifts with a net worth as a percentage of assets between 1 and 2 percent.

Therefore, the profit experience for these institutions with a negative net worth is generally one of declining net worth for every day they remained in business in 1984. These institutions are piling up losses, which clearly indicates we cannot reasonably expect that they could work themselves out of their unprofitable condition.

Figure 1 shows why.

This chart shows that the institutions with the greatest negative net worth are losing money at the fastest rate. That does not give you cause for great optimism that they can work themselves out of their own problems.

By comparison, there were 455 thrifts with a positive net worth, whose assets exceeded liabilities by 3 to 4 percent. This group's rate of return on assets is a positive 0.39 percent. Only 21 percent of this group failed to earn a profit in 1984. This is a positive sign and is cause for optimism in the future. But as shown in figure 1, the poor thrifts are getting poorer, and they are deteriorating rapidly. The ones whose net worth are the lowest are generally performing the worst. Congress, the regulators, and the healthy thrifts must act quickly to correct this imbalance.

Presently the guardians of our Federal Insurance Fund are powerless to act, except to move against the thrifts in the most dire straits. Unfortunate, yes, but reality. FSLIC officials are understandably apprehensive that if they enforce the law and close insolvent thrifts, the fund will be exhausted soon after they begin the job of reducing the number of threatened thrifts. Depositor confidence could be shaken, even though the full faith and credit of the U.S. Treasury stands behind insured thrift deposits. As you can see, there are so many problems and so little money.

This study clearly demonstrates that the longer FSLIC is immobilized, the higher the cost to the taxpayer will be and the greater the damage to the majority of all thrifts whose fortunes are, in fact, improving.

The complexion of thrifts' problems has changed from the earnings spread problems encountered we referred to in 1981 and 1982. The cost of correcting that situation is proving to be very minor, in comparison to the asset quality problems with which FSLIC is now confronted.

We were told on October 17 of this year that the cost of solving today's asset deterioration crisis is between 3 and 5 times as great as the earnings spread costs experienced in 1981 and 1982. At that time FSLIC spent 4 to 5 percent on bailouts. Today the cost is running between 15 and 20 percent of insolvent thrifts' assets.

Most of the thrift failures this year were largely due to bad judgment on real estate and credit extensions.

□ 1715

Recall that Congress passed legislation in 1980 and 1982 to assist thrifts to meet the changing competition. The 1980 law also granted federally chartered thrifts new authority to make commercial real estate and consumer loans and to invest in commercial paper and corporate securities.

The Garn-St Germain Depository Institutions Act, passed in 1982, greatly expanded savings institutions' power to make commercial real estate and consumer loans. The 1982 law also gave thrifts the power to make commercial loans. Many States also expanded the loans and investment powers of their State chartered, federally insured thrifts.

But clearly, real estate activities are the leading cause of today's thrift problems. Under current Federal regulation, federally chartered thrifts can invest, in effect, no more than 3 percent of their assets in direct real estate investments. These activities include the ownership of land held for development, commercial projects, and equity and service corporations.

But State chartered thrifts have been able to utilize a greater share of their assets in direct investments. In California, for example, State-chartered thrifts can invest up to 100 percent of their assets in real-estate development and other investment held on the thrift's behalf.

If the risky ventures pay off, then owners and lenders benefit. If they do not, then losses due to excessive risk taking by some thrifts may be borne by other, more conservatively managed instutitions, or ultimately, if the insurance funds were depleted, by the U.S. Treasury.

As I previously indicated, California, Texas, Florida, and Louisiana have lead the way in liberalizing direct investment and loan powers for their State-chartered thrifts. They are also

the States where the FSLIC is uncovering the most troubled institutions.

The worst failures have occurred in these four States, where the legislatures freely grant lending and investment powers in excess of Federal authority, but have no obligation to pay the cost when failures occur.

To his credit, the Bank Board Chairman recognized the risk to the fund taken by these State chartered thrifts and rushed through regulations that now require State-chartered thrifts to obtain Bank Board permission for direct investments greater than 10 percent of their assets.

It would be simplistic to say a problem of this magnitude has been caused by real estate activities alone. The problem is more widespread, and includes federally chartered institutions. While FSLIC stands by, unable to deliver the treatment of liquidation or assisted merger, desparate thrift executives who find themselves trapped in an unprofitable position are taking other types of big risks in a last ditch effort to grow out of their problems. Failures are inevitable.

"Common threads are woven through the fabric of such failure," the Chairman told us, "Exceedingly fast growth, very high levels of brokered funds, very poor underwriting of loans and investments, shoddy management systems and practices, atrocious recordkeeping, and questionable documentation, misleading and sometimes fraudulent behavior by those vested with a public trust as insured depository institution executives."

The Chairman lays much of the blame on "high flyers and daredevils," who have tried to grow out of their problems. For the last 2 years the industry has enjoyed an annual growth rate in deposits of 20 percent. Bank Board officials have told me they have found 25 thrifts in Texas that have been growing at a rate 70 to 90 percent above what the Board thinks is prudent.

The Bank Board recently provided congressional investigators a glimpse of the problems FSLIC has uncovered at a number of California thrifts now operated by the fund. The deposed executives of one large thrift invested in a mushroom farm and a tire retreading company, which FSLIC must now dispose of.

FSLIC is also trying to figure out what to do with Olympic Village, a Squaw Valley time-share resort, in which one federally chartered thrift invested. This investment, made without a feasibility study is a $750,000 a month drain on this FSLIC operated thrift. This thrift's problems are compounded by the drain created in its being the sole lender for another time-share developer with poorly planned locations throughout the country. All told, the thrift is losing $2 million a month on its holdings.

This same thrift's interest in vacation projects extended to its own facilities. It built a $25 million headquarters complete with executive bedrooms, wine cellar, racquetball courts, a two-story theater and a 30-foot waterfall. Shortly after this palatial headquarters was completed, the thrift collapsed. By now the excesses in some of the thrift industry are legend.

But even lending to those in the housing business has brought on problems for some savings institutions. In Texas, where FSLIC is bracing for more asset problems, a glut in apartment construction is forcing some thrifts that loaned money for construction projects to foreclose and sell the properties at a loss.

The Wall Street Journal reported on October 16 that Texas has accounted for fully half the Nation's apartments constructed since 1983. The article cited the problem landlords face in Fort Worth. In that city alone, experts predict that it would take an estimated 6 years to rent all the apartments now available and more are being built. The city's vacancy rate has hit 16 percent, up from 12 percent in 1984. Meanwhile, rents have remained stagnant.

Well-managed thrifts are being hurt by those with extended positions. A number of the FSLIC operated thrifts in California are unable to attract deposits without paying interest rates up to 1½ percentage points above the market rate. This is pushing up the cost of funds for the most healthy thrifts, and forcing them to redouble their loan and investment returns to cover the high rates of return they must meet to hold their position in the market.

Let us look at figure 2, consolidated bond financings.

Of even greater concern, Home Loan bank note rates are up since July of this year, possibly caused by a proposal to buttress FSLIC with an asset management division financed by Federal Home Loan Banks bond issues, a so-called section 406 bank.

Clearly, sophisticated investors are beginning to attach risk to the bank's offerings, and investors are demanding higher rates of interest for these securities. This is January 1984, and this is October of 1985. You can see a general trend here until just about the middle of this summer, when in fact the consolidated bond financing rates for regional Federal Home Loan Bank Boards jumped about 15 basis points.

The Maryland and Ohio thrift crises precipitated by State insurance failures reveals how precious depositor confidence is to the stability of a thrift system, while at the same time demonstrating how fragile this important resource is.

If the danger of unacceptable low net worth ratios are not soon addressed, it could quickly spread and unfairly threaten some of our Nation's large number of stable, profitably managed, secure savings and loans which are the institutions that are taking prudent steps to build on increased earnings.

If depositors are not comfortable with and do not have confidence in their thrifts, what is there to prevent a huge drain of thrift deposits into commercial banks, which are protected by a much stronger Federal Deposit Insurance Corporation—FDIC?

Healthy thrifts, therefore, have much to gain in the long run from the correction of the problems of the important portion of their industry that is troubled.

Let us now go to table 8, the market value of assets.

This table clearly indicates that the losses have been reduced by adoption of the banking legislation of 1982. Table 8 also shows that even the troubled thrifts, with low-yielding loans in the early 1980's, have gained from adjustable rate mortgages and lower interest rates. The market value of the loan portfolio of these 66 thrifts who received net worth certificates and that was their definition, those 66, has gained by about one-third between the end of 1982 and 1984. Thus, the market value of the entire industry is dramatically higher today than it was 2 years ago.

□ 1725

Should we wait much longer? No, interest rates will probably not trend much lower, if at all. Can we afford to rely on the uncertainty of the continuation of relatively low interest rates into 1986, which would permit healthy thrifts to maintain favorable earnings spreads and profits?

Even if rates did continue to decline, it is not clear that additional delay would prove beneficial to the thrift industry. Consumers will begin to refinance their mortgages in greater numbers if rates continue to drop and this could erode the market value of many thrifts' assets even further.

What's more, with regional banking a reality and nationwide banking being advocated by many, the value of a thrift charter to those interested in its advantages will not last for long and voluntary mergers with profitable institutions in the future will become more difficult to arrange.

We now, therefore, have a window of opportunity in which the cost to the taxpayers of liquidating or merging thrifts can be minimized. The benefits of waiting have already been maximized.

So, what do we do about the situation?

There are no easy answers to the severe problems facing the thrift industry and its insurance fund. We

have only painful, costly options. Frankly, there is no ready cure. I can only begin to identify for my colleagues in Congress a menu of possible alternatives available. Many of these entrees are so costly that perhaps none of us could support any or all of them.

The alternatives available must also be considered against our current backdrop of money problems:

We have a $180 billion national deficit; Congress is being asked to consider a multibillion-dollar bailout of the farm credit system; we may have to provide billions of dollars of funds to our neighbors in the less developed countries who are running out of cash and cannot obtain loans from the international banking system because these countries are no longer good credit risks.

Nevertheless, we must address the immediate and long-term funding problems that face the Federal Savings and Loan Insurance Fund. Through a combination of some of the following alternatives, and those that are developed through the ingenuity of the many responsible parties at work to save the thrift industry, I hope that we can reduce the number of troubled institutions and renew confidence in the majority of thrift institutions returning to a profitable position.

The first alternative is, obviously, to do absolutely nothing. We could turn our backs on depositors and the industry, allowing them to bear the cost. This is indefensible. Depositors must be fully protected. We cannot return to the uncertainty of the 1920's, when depositors had to sort out the good financial institutions from the bad without any guidance or backing if their guesses proved wrong. Besides, this option is morally and politically unjustifiable.

The second alternative, is equally as undesirable. Congress could write a blank U.S. Treasurer's check for FSLIC to draw upon whenever the need would arise. This option is equally unacceptable. At a time of record deficits and other pressing problems, the taxpayers would not support an increase in the deficit or individual and corporate taxes to bailout the thrift industry.

Let us look at table 9, 1 percent recapitalization costs.

A third option involves collecting more money from the savings and loan industry itself. The thrift industry itself has always provided the capital necessary to enable FSLIC to meet its obligations to insured depositors. This would take several forms.

We could recapitalize the insurance fund with industry profits. It has been suggested that the industry pay 1 percent of its deposits into the FSLIC fund, to be held as an asset on the thrifts' balance sheet until they are used by FSLIC and then they would be expended. The credit union industry recently completed a similar proposal, but credit union problems are simply not comparable to those facing FSLIC. This option would provide the fund with an additional $8.5 billion. In effect, the total tangible net worth of the industry at the end of 1984 would be transferred to FSLIC.

The main problem is that GAO figures show that if this set-aside plan had been adopted at the end of 1984, an additional 159 institutions would have plunged from low net worth to insolvency. An additional 247 thrifts would have tumbled from a position of adequate net worth to low net worth below 3 percent. While this $8.5 billion infusion appears to help the industry bridge the funding crisis at FSLIC, the industry is opposed. Many healthy thrifts would simply convert to a bank charter, in order to preserve their stockholders' profits and escape the levy of this set-aside proposal. It is not an attractive prospect and appears to provide no benefit either long or short term.

Another potential solution to the problem of FSLIC would be for it to turn to the Federal Home Loan Bank System for funding. Currently, the 12 district banks have approximately $9 billion in capital, some portion of which could be used to bailout FSLIC. How much of this money would be actually available is in question because much of the total capital, which is held by the member thrifts, is tied up in capital stock. But invading the district bank's capital could send tremors through the money markets, were the bank's must borrow money on a constant basis.

The district banks are also authorized to raise money in the financial markets and lend what they borrow to FSLIC. The district bank's could issue bonds in the financial markets as a possible option to bailing out FSLIC. Rather than having the district banks go to the credit market, Congress could increase the FSLIC credit line at the Treasury from the current line of $750 million to somewhere approaching the $3 billion line of credit the FDIC enjoys.

Another industry solution to FSLIC's problems would be to set up a federally chartered S&L to help the insurance fund to dispose of problem assests, the so-called section 406 bank. This institution would acquire and liquidate assets now held by FSLIC. The corporation would be funded initially through the purchase of stock by FSLIC and the Federal Home Loan Banks. The immediate goal of the corporation would be to inject capital back into the insurance fund through the purchase of low-quality assets.

This semiprivate company, operating free of budget and personnel constraints that pertain to the fund, could perhaps manage and dispose of the more than $2.3 billion in assets that the insurance fund has aquired from failed thrifts. Advocates of this proposal say it would be a vehicle for FSLIC's liquidators to operate more efficiently at a lower cost to the insurance fund. But unless carefully structured, this company could simply be another level of regulatory management under the Government. In addition, there is some question whether the 12 district banks, who would provide some of the startup capital, can legally take an equity position in this section 406 proposed semiprivate banking corporation. So, many difficult questions remain.

Another potential solution to the problem of FSLIC undercapitalization is to merge the FSLIC and the FDIC, the commercial banks' insurance fund. According to the former FDIC Chairman, the FDIC is so strong financially it may be able to handle thrift institutions solely from the earnings of the combined fund. However, a merger would force the banking industry to pay for the excesses of its competitors and could possibly require a supplemental tariff on member banks. It would most certainly take sometime to phase in and would surely bring an end to the thrift industry as we know it. In fairness, substantial changes in the Federal laws and regulations would be required to bring about greater parity in capital requirements, the ability to offer various financial products and services, and many other areas. Both bankers and thrift executives oppose this option. Merger would still leave the taxpayers with a huge number of ailing thrifts.

Another option would be to attract additional capital to the thrift industry from whatever source; these nonthrift firms could be enticed to acquire weak but still salvageable thrifts. Financial service firms engaged in securities activities, such as insurance firms and bank holding companies, could serve as potential acquirers. These entities may be willing to inject capital into the thrift industry in order to gain access to the Federal payments window. But how realistic is it to think that nonfinancial institutions would be willing to invest in thrift charters when nationwide banking may be just around the corner and FSLIC is having to provide cash to induce healthy thrifts to take over its backlog of ailing thrifts?

There are still other, long-term remedies that Congress may choose to consider. These options include:

Risk-related deposit insurance premiums or risk-related capital requirements, which would allow FSLIC to charge a higher premium or increased capital based on the risk an institution poses to the insurance fund. But this

would require some subjective rating process by the regulators.

□ 1735

Thrifts could also be required to sell short-term subordinated debt to the market. This would subject thrifts to market discipline, since a thrift engaging in risky activities would either have to offer a much higher interest rate to sell its subordinated debt, or would not be able to market its debt instruments at all. Of course, this option would have to be coupled with increased disclosure to the public of problems thrift examiners have uncovered and dramatically intensified supervision would be called for. Examiners would also have to be better compensated for the insurance fund to attract and retain high-quality people who can analyze sophisticated loans and investments.

A change to market value accounting may also be beneficial. At present, institutions value both their assets and liabilities for regulatory purposes at the initial cost or value of the asset or liability.

Since the initial value of an asset or liability does not represent its current value, this method does not give the regulators a true picture of the institution. One proposal to correct this problem is to switch to market value accounting, under which the asset is valued at its value in the market at the time of the report.

And there are other possible alternatives, all of which must be considered, and in my view, at an early timeframe.

After listening to this description of the magnitude of the problems facing our thrift industry and its insurance fund, you may join me in the realization that no easy answers exist. I have been studying the problems for weeks; I have discovered no ready cure. Perhaps my colleagues will summarily dismiss of all the options I have set forth today for dealing with this situation, but I do hope I have begun to identify the problem and alternatives. Congress cannot begin to act alone. We need the assistance and the suggestions of all responsible parties associated with the thrift industry, including, obviously, the industry itself.

In closing, I hope I have begun to increase the public's understanding of the problems facing the important thrift industry. The public is after all the final arbiter of what actions we here in this body take.

I am confident that Congress will act calmly and decisively. Depositors should remain assured that the full faith and credit of the U.S. Treasury stands behind their money. In 1982, when similar problems confronted the thrift industry, Congress overwhelmingly moved to restore confidence to our historic system of Federal deposit insurance. I have little doubt that Congress will renew this important pledge so that we can act decisively to revitalize the thrift industry, an important aspect of the financial planning of many of our citizens.

Mr. WYLIE. Will the gentleman yield?

Mr. PARRIS. I am delighted to yield to my friend, the gentleman from Ohio.

Mr. WYLIE. Mr. Speaker, I want to commend the gentleman from Virginia for his very significant contribution to some most important deliberations which are going on in the Banking Committee at the present time. The gentleman from Virginia is a good and valuable member of our Banking Committee.

May I say that the gentleman's talk here this evening demonstrates a tremendous amount of thorough and excellent work and indicates to this Member that the gentleman from Virginia certainly has put a lot of time into what is a very important problem for us.

As I mentioned, hearings have been held and many of the problems which the gentleman has identified in his own paper here have been outlined and also many of the suggestions which the gentleman made here in his paper were mentioned by various witnesses before our committee.

I do think it is important that we get on with it. I would not want the impression left, and I am sure that the gentleman did not mean to leave the impression, that there is need for alarm. I do not think there is need for alarm, but we do need to express our apprehension about the way in which the deliberations on this most important question are progressing.

Attention was called to the thrift industry of Ohio. I was pretty close to that, of course, at the time and the fact that 71 State-chartered S&L's did have to close for a while, but as severe as the case was in Ohio, and I might add that none of those institutions were insured by FSLIC or the FDIC, they were insured by a private fund which was not guaranteed by the State of Ohio or guaranteed by the Federal Government, and that did cause some of the apprehension and concern, of course; all of those institutions except one have now been reopened and are insured by FSLIC or FDIC or have been acquired by banks.

So as severe as the problem was in Ohio, and this is the point I wanted to make, no depositor lost any money in any of those institutions.

I know that this Congress will be responsive to the problems which the gentleman has outlined. He is not alone in outlining those problems.

As I said a little earlier, we took testimony before our Banking Committee. One of the gentlemen who came before us was the Chairman of the Federal Deposit Insurance Corporation at the time, Mr. Bill Isaac. He stated:

It is not hyperbole to characterize the changes now taking place in the financial system as revolutionary. A structure put into place a half century ago, at the nadir of the Great Depression, is crumbling. In part this is occurring by design, but in larger part it is caused by the forces of economics and technology. The central question facing government today is not whether change will or should continue but, rather, how to insure that the financial structure that eventually results will best serve the public interest.

And in a very important statement made by the Chairman of the Federal Home Loan Bank Board, Mr. Ed Gray, he said:

Frankly, I can think of no single issue which needs to be dealt with more carefully, and yet more expeditiously, than this one [deposit insurance reform] in today's depository institutions environment. As you know, the Bank Board has studied this entire matter over the past several years and, both last year, and again this year, we proposed legislation to the Congress which, in our view, could effectively deal with excessive risks in the thrift system—particualarly the risk of loss to the FSLIC.

Just one other quote. Then Federal Reserve Board Chairman Paul Volcker came before our committee and warned Congress:

We are at a crucial point. We can turn the system toward creative innovation consistent with certain broad and continuing concerns of public policy. Or, left unattended, we can continue to see the financial system evolve in haphazard and potentially dangerous ways—ways dictated not just by natural responses to market needs but by the often capricious effects of existing and now outmoded provisions of law * * *.

* * * The pervading atmosphere of unfairness, of constant stretching and testing of the limits of law and regulation and of circumvention of their intent, and of regulatory disarray is inherently troublesome and basically unhealth * * *

Well, the point I want to make is that the gentleman has, as I say, made a very significant contribution to a difficult problem, and the gentleman has said that it is a difficult problem that we need to resolve.

As I indicated earlier, the gentleman has outlined in a very significant statement many of the various proposals that have been brought before us; but I think that together the gentleman and I and others on the Banking Committee and, as a matter of fact, every Member of Congress does need to take action to assure that our system of deposit insurance is safe and sound, especially as it refers to FSLIC.

The GAO report which the gentleman referred to here should lead us I think with some of their suggestions in the direction of a stronger and even more stable financial system that is responsive to the needs of the American public; but the Federal Home Loan Bank Board and the thrift industry have been exploring ways to improve the assets of the insurance fund to

figure out ways by which the insurance fund might be bolstered.

I think central to the long-term reform are both the question of how the risks might be realigned and how they might be minimized and that again is a point which the gentleman from Virginia made.

I do want to compliment the gentleman for the very significant statement he has made.

The SPEAKER pro tempore. The time of the gentleman from Virginia [Mr. PARRIS] has expired.

Mr. PARRIS. Mr. Speaker, I ask unanimous consent to proceed for 2 additional minutes.

The SPEAKER pro tempore. Under the rules of the House, the gentleman may not extend under special orders.

REVENUE SHARING WILL PROP UP "RUST BELT" CITIES FOR A WHILE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania [Mr. GAYDOS] is recognized for 30 minutes.

Mr. MURTHA. Mr. Speaker, will the gentleman yield?

Mr. GAYDOS. I yield to my good friend and associate on the Steel Caucus and my colleague from the adjoining congressional district, the gentleman from Pennsylvania [Mr. MURTHA], who is chairman of the steel caucus and has been alternating in the executive post for the last 8 years since its inception; so I yield to my colleague.

Mr. MURTHA. Mr. Speaker, I appreciate my colleague yielding. I just want to extend my appreciation to the gentleman for the tremendous job he has done as chairman of the executive board of the steel caucus and the work that the gentleman has done behind the scenes in keeping the steel caucus as a bipartisan group which has tried to fashion legislation in order to help keep people working in the steel industry.

I know western Pennsylvania has been hit as hard as any area in this entire country. Nobody has done more to try to save those jobs than has the gentleman from Pennsylvania. Nobody has worked harder. Nobody has articulated the issues more forcefully and more carefully than has the gentleman. All of us in this country that are interested in trying to save steel and reduce unfair subsidized imports into this country, all of us owe a debt of gratitude to the gentleman for the work he has done; so I want to commend the gentleman for having this special order, as well as the other special orders the gentleman has held so often. I know this takes a lot of preparation and no one knows the subject better than the gentleman from Pennsylvania. All of us applaud the gentleman for his efforts and the accomplishments of the steel caucus under the gentleman's leadership. I know everything that has been done has been because of the gentleman's diligence and hard work, so I appreciate the work the gentleman has done and express my appreciation with the other 120 members of the steel caucus for the gentleman taking this special order and the work that the gentleman has done in trying to keep Americans working in the steel business.

Mr. GAYDOS. Mr. Speaker, I certainly appreciate the remarks of my colleague. I want him to know that the work that he has done over the years, it has been a pleasure working with him and I think the work he has done over the years, along with the executive committee, is now reaching full fruition and all the things we hoped for I think now are going to be accomplished, so I thank the gentleman for his very nice remarks.

Mr. Speaker, when some 12,000 citizens fear for their health, safety, and welfare because the community in which they live is forced to eliminate police, fire, and other basic services because it has run out of money, I am concerned.

When the city is in my own congressional district, and is representative of other cities, townships, and boroughs in my district and others in what is commonly called the Rust Belt, I feel the need to act.

And, when national newspapers focus on the problem, as the New York Times did 3 weeks ago and U.S.A. Today did last Thursday, I find I can no longer sit by and watch the tragedy that will befall thousands of Americans who, through little fault of their own, are threatened.

Clairton, PA, once a city of nearly 25,000 that has seen its population shrink to some 12,000 and its tax base shrivel up as steel mills, forced to shut down because of unfair competition from imported steel, has become a focus of national attention.

What many of us who live in and around the Monogahela Valley of Pennsylvania expected to happen to Clairton—and other such steel mill towns and cities, has happened.

Last month, Clairton laid off its entire 14-member police force because it couldn't pay the salaries. Today, the Pennslyvania State Police are covering the area, but, as good as they are and as much as they care, they just cannot devote the attention to the city's residents that the local police did.

Last month, Clairton laid off its 10-member fire department because it couldn't meet the salaries. Today, those same firemen are staying on the job as volunteers, doing what they can and counting on fire assistance from neighboring communities should a real emergency arise.

Other city workers have not been laid off because their collective bargaining agreement prohibits it, but they may not get paid and, without money for city projects, they have little to do.

All of this is being done by city officials in an attempt to balance the city's books and to persuade the banks to renew the city's line of credit. There is no longer any fat in the city budget; today's cuts are into flesh and bone.

How could things get this bad? It's not that hard to see. Dependent on steel mills for its taxes and employment of its citizens, Clairton found that the plant closings cut so deeply into the tax base that even with sharp tax increases, municipal income plunged at the same time that a record unemployment created extraordinary demands for services.

In the last 5 years, Clairton's total revenue dropped by almost $1 million, from $3.1 million to $2.4 million. The reason: The loss of revenue from the United States Steel Corp. whose total payments to the city in the past 2 years have declined by nearly 50 percent.

And, as the mill shut down operations, people were left out of work with little prospect of a new job anywhere, at almost any salary unless they moved away. So "For Sale" signs dot every neighborhood and homes that 10 years ago sold for $50,000 are now being offered at $25,000—and there are few takers.

Five years ago, each 10th of 1 cent of real estate tax rates brought in $48,000. Today, the same 10th of 1 cent real estate taxes brings in just over $28,000.

The numbers tell the story. There is just no way that Clairton can bring in enough dollars to provide the increasing services that its citizens need.

But Clairton isn't the only city to feel the pinch. McKeesport, my home city, has a projected operating deficit of $700,000 and has laid off police officers and clerical workers, and West Homestead, also in my district, has laid off 9 of 14 employees in its public works department, and that may be just the beginning.

The pressure of Clairton's officials and its citizens is being repeated in varying degrees in any number of other communities across the country. I am sure there are cities and towns in North and South Carolina that are in the same kinds of financial trouble that Clairton, McKeesport, and West Homestead, PA, are because of the impact of textile imports on the manufacturing mills in the South.

We have a limited range of choices available to us to help these cities, towns, and boroughs. We are trying to get a handle on the import problem, but, even if we do, it is unlikely that the closed mills will be reopened.

We all know that once a plant closes, the cost of reopening it is so great that it rarely, if ever, happens.

We are trying to attract new industries to those areas, to retrain the unemployed for new kinds of jobs, but, even at best, there is likely to be a 3-to-5-year lag before any real benefits can be shown from a new business.

We know that it is highly unlikely that this Congress and this administration would support or approve a $1 billion bailout program such as the kind we OK'd for New York City in 1975 when it threatened to default on its loans, or for Chrysler Corp. in 1979 when it was reporting financial losses of more than $1 billion.

Let's face it, Clairton, McKeesport, West Homestead, and all the other small cities and towns facing bankruptcy because of plant closings, together don't have the same national impact that New York City and Chrysler do.

But we must consider the people living in those communities. How would any of us feel if the city or town in which we were living was forced to cut back or eliminate the most basic of services?

There is an answer, though. We could extend general revenue sharing which could provide an ample supply of dollars to those cities and towns that are resting on that thin line between life and death, so they could provide those basic services until such time as new plants opened, providing jobs for the people and taxes for the communities.

One of the reasons I voted against the budget resolution that was so carefully crafted by the House and Senate conferees was that it funded revenue sharing for 1986, but eliminated it as of 1987.

I oppose this concept even more today.

To that end, Mr. Speaker, I have introduced H.R. 3466, which would extend the General Revenue Sharing Program for 7 years, a period of time I believe will be adequate to help some of those stricken communities get back on their feet.

It is true than when the Revenue Sharing Program was first created, we warned our cities and towns and counties not to use the funds for operating expenses because the program could be discontinued at any time.

But I can understand that as more traditional sources of operating funds for our cities and counties have dried up, the only available dollars came from revenue sharing.

Congress passed the authorizing legislation for revenue sharing in 1972 and the program got underway the following year. For a while, everything looked rosy, but since 1976, funding has not been stable. In fact, considering the levels of inflation since 1976, while the dollars remained fairly steady at $4.6 billion a year, they just didn't go as far.

And, even if we were to keep the appropriation level at $4.6 billion a year for the next 7 years, at least those cities and towns and boroughs and counties could count on a fairly stable financial resource for that period of time.

But, even as I speak, the Senate is threatening to go back on its commitment to full funding for revenue sharing for fiscal year 1986. Even though the final budget resolution adopted by both the House and Senate called for full funding of revenue sharing—$4.6 billion—for 1986, the Senate has already suggested a cut of better than 12 percent for the program in the budget for the Department of Housing and Urban Development.

I am concerned that this body, too, will accept that cut even though we have made a commitment to our communities that they could depend on our help.

The dollar amounts for individual cities and counties, including those in my district, are not large, but those funds are vital to the existence of those cities.

The 72 communities and 2 counties I represent receive under $10 million in general revenue sharing funds. Clairton, the city cited in these national news reports, receives about $190,000.

McKeesport, with a population under 30,000 gets less than $500,000 a year. In fact, revenue sharing provides only about $15 to $20 per citizen.

We are not talking about a lot of money. What we are talking about is providing a safety net so those cities, towns, and boroughs that are feeling the pinch can at the very least keep offering essential services.

After all, the Defense Department probably overspends the same amount for hammers, wrenches, and toilet seats.

At least if we provide the money to the communities, our people will get more direct benefit.

I urge all of my colleagues to join me by cosponsoring H.R. 3466 and by seeing to its passage.

□ 1750

RECIPROCITY BEGINS AT HOME—OPEN FOREIGN MARKETS TO OUR GOODS OR WE WILL CLOSE OURS TO YOU

Mr. Speaker, speaking on that subject, I would have to say that reciprocity begins at home, and I want to at this time take the opportunity to talk a little more about the technicalities of the problem, an outgrowth of which is the problem I have just very hurriedly mentioned, that is, the squeezing of the lifeblood out of various municipalities because of circumstances beyond their control.

After all, a nation owes to its residents, its citizens, and taxpayers the obligation to at least maintain and to provide a reasonable climate in which to manufacture, and to compete, and to practice the so-called laissez faire type of business in this country. We have not done it. We have allowed ourselves to be open, and openly taken advantage of internationally, and to that I want to address these few technical remarks because there are many people in this country who still do not fundamentally understand the implications of international trade, balance of payments, why we must sell a certain amount of goods in order to earn money to buy certain things, and to maintain a good standard of living. All of these things are fundamental, economic principles, but surprisingly, many if not most Americans do not understand them, do not take the time to understand them, to read about it, because basically and fundamentally it is not an interesting subject, it is a rather difficult subject, but it is one so essential to the well-being of this country that I would even go so far as to say that it should be a mandatory subject, yes, in as low as the seventh and eighth grade, to that our young people going through matriculation in our public school system would eventually at least fundamentally understand the economic international problems so that they would be prepared in going out into the world, and in seeking their end, and their fulfillment that they would understand the economic significance of trade, so let me very hurriedly refer to the technicalities of trade.

Mr. Speaker, just the other day, four respected economists jointly issued a statement condemning efforts by the Congress to limit the flow of foreign goods into this country.

These economists concluded that the protectionist measures being considered by this body "might trigger retaliatory restrictions abroad and increase international tensions."

I am more than just a little concerned about this kind of statement because it makes me wonder where these individuals and all of the others who criticize this Congress for trying to keep American jobs have been for the past several years.

I wonder if they have heard any number of administration officials, from the President on down, complain to our foreign allies about their closed door practices.

Why is it that the United States is depicted as the bad guy, even by our own citizens? Don't we have any national pride?

Japan, Korea, Brazil, Mexico, the European Common Market, and a host of other nations with whom we trade have all sorts of restrictions—quota and tariff laws as well as hidden barriers—on what they will accept from foreign manufacturers, American as well as other nations. Some nations,

such as Japan, have special testing requirements, others have domestic-content laws that preclude any foreign goods.

Just last week, Argentina complained that Europe's trade subsidies prevent it and other nations from shipping agricultural products there so as to raise enough funds to meet the interest payments on their international loans.

Last week, a United States negotiator expressed his frustration in trying to get the Japanese to open their market for American-made telcommunications equipment. He complained that the Japanese were stalling—even though they had said repeatedly during the past 8 months that with the end of the monopoly of the telecommunications industry, their market would be more open.

South Korea has agreed to immediately open 102 industries to foreign investments and to set a timetable for lifting import controls in 603 products over the next 3 years.

Brazil, which insists that access to the American market for its steel, shoes, and other goods is vital so it can earn enough capital to pay the interest on its loans, prohibits any import goods that compete directly with any product manufactured in Brazil.

The list is virtually endless. Let us face it, the United States is the most open market in the world. And, even if we set limits on imports, we would continue to be the largest and the most open.

Why are these economists and this administration so concerned about retaliation from countries that already restrict the flow of American goods abroad?

Perhaps we should change our words. Perhaps we should say that we are retaliating against the practices of those nations who have closed their doors to American goods.

If those nations want to close their doors to American goods so their industries can grow and prosper, that's all well and good. There is no reason on Earth that we shouldn't say that we are closing our doors to their goods so American industries can grow and prosper.

Why is it wrong for the United States to consider setting some limits on imports of steel, automobiles, machine tools, lumber, electronics, shoes, textiles, and so many other goods—which are crippling our industrial growth—when it is apparent that some in the United States continue to accept that kind of response from many other nations?

None of the proposed bills that deal with import limitation would close our market completely to foreign goods. All we are saying is that we, the people of the United States, are determined to set the limits, we have a right to decide how much of our market we will permit imports to take.

Recently, I was talking with a friend in my congressional district who wanted to know why I was so opposed to the flow of imported products into this country—why I was opposed to free international trade.

I explained about the illegal practices that foreign exporters have used, such as dumping, subsidization, patent infringements to gain an ever-growing foothold here that would lead to eventual control and domination of a segment of the market. I also explained about the restrictions on American goods abroad.

I was astonished that this friend was not aware of those problems.

I have difficulty believing that Americans aren't aware of the practices used by so many nations to protect their industries by denying competitive goods in their home markets.

As I mentioned last week, a United States negotiator complained that the Japanese are stalling on an agreement to open their market for telecommunications equipment.

So, what else is new? The Japanese—and other countries as well—have been promising for years that they are knocking down their barriers to American goods.

Every time we complain about tariff and nontariff barriers to American goods, Japan says it has a new plan. But the plan never goes into effect. It's just a lot of talk with no action.

Well, it's time we took action. Let us retaliate against the world's closed markets to American goods.

If countries won't allow our goods in their markets, let's do the same to them—shut our markets to their goods.

But we don't say that. No one in this body has ever proposed that we close our markets to any foreign country's goods. All we have ever said was: "We are going to set some reasonable limits on the share of the American market."

No one seems to care that our merchandise trade deficit for 1984 was $123 billion and appears headed for the $150 billion mark plus, for 1985.

At the same time, the current account, a broader estimate of the American trade picture because it includes goods and services, is showing an increasing deficit. In 1984, the current account deficit was just under $90 billion. For 1984, for the first time ever, it is expected to show a deficit above the $100 billion mark.

Also, for the first time since 1984, the United States has become a debtor nation and, according to many economic estimates, the United States will become the world's largest debtor within the next 6 to 8 months.

I am sure you can understand my concern when I find many citizens who are either unaware of the precarious nature of our trade picture or insensitive to the needs of the American people.

Articles in last week's newspapers support my position. In one article, it was noted that President Reagan had lodged unfair trade complaints against the European Economic Community for providing subsidies for exporting wheat which cost American farmers some $2 billion in foreign sales over the past 4 years and against Korea for failing to provide patent and copyright protection which cost American businesses at least $170 million a year.

While I applaud the President for his action, it falls far short of the goal. The President wants the European wheat problem handled by the Geneva-based General Agreement on Tariffs and Trade [GATT], but we all know it could take years before a settlement is reached.

The U.S. complaint says that subsidies to Western European farmers have allowed them to double, from 8 to 16 percent, their share of the world wheat market. Existing international trade laws prohibit the use of subsidies to gain more than an equitable share of a nation's market.

In the Korean case, the President told United States Trade Representtive Clayton Yeutter to investigate Korea's laws on copyright and patent protection of American property. What we don't know is what, if anything, will be done, once the investigation is complete.

On another front, Yeutter was encouraged to include Japan's aluminum industry in the next batch of unfair trade complaints filed by the President. It is charged that Japan uses high tariffs to keep American aluminum out of Japan and subsidizes its domestic market so it can sell in the United States.

These activities only prove what I have been saying for many years. The trade laws we have give us the tools to deal with unfair trading practices—but we have to use those tools and use them vigorously to insure American manufacturers can fairly compete.

Thus far, this administration is falling down on the job, as administrations before it have done.

That is why we in the Congress are forced to push for bills that would limit imports. If an administration repeatedly complains that it is making every effort to open foreign markets, which are closed to American goods because of quotas, tariffs and less visible barriers, then it must be prepared to use to the fullest the remedies that exist under the law.

If any administration fails to use those remedies, then it is incumbent upon the Congress to step into the vacuum by passing new laws that will more specifically direct an administration's actions.

I recently received a copy of some statements made by the European steel producers with regard to the current negotiations for extension of the steel agreement between the United States and the European Economic Community.

Among the comments, one of the most outrageous is the one that concludes that since European sales in the U.S. market accounted for one-third of all steel imports prior to the 1982 agreement, the current share of 25 percent is just barely acceptable.

Where any group of foreign steel exporters would ever get the idea that they are entitled to a specific share of the American market is beyond me. There is no question that there must have been times when imported steel has filled a gap between American production and consumption, but by no stretch of anyone's imagination does this guarantee an exporter a specific share of our American market.

In fact, one of my major objections to the voluntary agreements that we have concluded with various steel exporters is that it does appear to entitle them to a share of the market.

We should be doing it differently. We should determine how much imported steel we need to make up any difference between our production capacity and our needs and then let any steel exporter sell up to that amount in this country—provided that exporter plays by existing international rules.

But, that is beside the point in this case. Mr. Speaker, I am including for all of the Members of this body to read the comments by the Eurofer steel producers and the responses to them by the American Iron and Steel Institute. The package also includes a copy of a letter from Donald Trautlein, chairman of AISI, to the U.S. Trade Representative, expressing the concern we all have.

I hope my friend will understand our concerns. I hope he will keep an open mind and, perhaps, do a little more research on the way our so-called trading partners close their doors to American goods while at the same time flooding our market with their goods, often at below manufacturers' costs as a means to eventually driving the American competition out of business so it can have the market here to itself.

We in the Congress have an obligation to those men and women who have invested their lives and their savings in businesses to insure that they have an even chance to operate successfully against unfair competition, whether from American competitors or foreign competitors.

But we cannot allow unfair trading practices to persist. This administration must enforce existing laws. And, if it or any future administration won't do that, then it is up to the Congress to pass new laws that offer fewer choices to the administration in its dealings with unfair and illegal trade activities.

The comments and letter follow:

AMERICAN IRON AND STEEL INSTITUTE,
Washington, DC, October 3, 1985.

Hon. CLAYTON YEUTTER,
United States Trade Representative, Office of the United States Trade Representative, Washington, DC.

DEAR MR. AMBASSADOR: My industry colleagues and I have read with astonishment and outrage the assertions made public by Eurofer steel producers in regard to the current negotiations for extension of the U.S.-E.C. steel Arrangements. We think that each and every point made by Eurofer should be countered by a strong dose of the truth and have accordingly developed the attached list of the facts on each matter raised.

Of course we and our staffs are at your disposal to go into more detail on any or all of the points.

Sincerely,
DONALD H. TRAUTLEIN.

RESPONSES TO E.C./EUROFER POINTS ON U.S.-E.C. ARRANGEMENTS EXTENSION

1. "Prior to the signing of the [1982] Arrangement, [EC] sales on the U.S. market accounted for one-third of all U.S. steel imports. Today they account for barely 25%."

USA Response: Market shares are not an entitlement or a "right" of the E.C. or any other producer. In normal times they should reflect the ability of a producer to compete on a fair trade basis. Today, after a decade during which the U.S. industry has been brought to near ruin by largely unfair trading, the President's program is designed to correct the damage thus done. And the U.S.-E.C. Arrangements are an integral part of that program.

2. "The disappointment felt by the Community over the past three years . . . if [E.C.] exports had seen the same development as those from the other third countries, their share of the U.S. market would have risen by 50%."

USA Response: As just stated, E.C. has no *right* to any particular U.S. market share. The share the E.C. has enjoyed since the 1982 Arrangements was agreed to between the U.S. and E.C. authorities as a substitute for anti-dumping and countervailing duty penalties which otherwise would have been levied. That's why the E.C. came to the U.S. on bended knee in the summer of 1982 to seek a settlement in lieu of further processing of the U.S. industry's massive unfair trade cases.

3. "The restructuring of the U.S. steel industry . . . has yet to take place."

USA Response: Nonsense! Capacity has been cut from 160 million (net) tons in 1977 to 134 million today—and with more cuts in prospect. According to figures published by IISI, steel industry employment in the U.S. has been cut 46% between 1981 and 1984, and it continues to be reduced. This far exceeds the 19% reduction made within the EC during that same period. And we have continued modernization investments: another 12 million tons of continuous casting capacity comes on stream next year. All of this without a penny of government subsidization!

4. "Heavy additional sacrifices imposed in 1985 on [E.C.] exporters for 'consultation products'. These concessions cannot be renewed after 12/31/85."

USA Response: The so-called "heavy sacrifices" imposed in 1985 were no sacrifice at all! The 1982 Arrangement contemplated a U.S. market penetration for finished consultation products of roughly 2.5%. By 1984 the E.C. had violated this agreement and raised its penetration to 4.6%—and in the first half of this year further massive violations raised this to 6.8%! The settlement that took effect on August 1 merely prevented E.C. violations from rising further. The U.S. industry's view is that the August 1 levels agreed to are far too high in light of the history of EC. violations and must be sharply reduced.

The original consultation products Arrangement called for an E.C. semifinished import penetration level of 4.01%. The actual figure in 1982 was 13.6%, in 1983 12.2%, and in 1984 it was 29.9%. In 1984 alone, the E.C. shipped over 700 thousand net tons more than it was entitled to under the Arrangement.

5. "As regards stainless and tool steels . . . no further restrictive measures can be contemplated."

USA Response: This E.C. position disregards the fact that the E.C. is part and parcel of the President's program of International Steel Arrangements—as the E.C. itself recognized by the terms of the revised pipe and tube Arrangement which was negotiated earlier this year. But stainless and tool steels are also part of the Arrangements system and are covered in agreements with other countries. The E.C. must be covered also.

6. "For semi-products . . . the only customer is the U.S. steel industry, the quantity of imports is, by definition, fixed by the requirements of the domestic industry: the Community steel industry cannot allow itself to be the victim of certain internal conflicts within the U.S. steel industry."

USA Response: Semifinished steel is the core of the steel industry. As the U.S. industry continues its modernization and restructuring program each incremental ton ceded to foreign producers reduces the operating base within which the domestic industry can cover its costs and earn a profit. On an incremental tonnage basis, the lost operating income potential for every ton of semifinished lost to foreign producers is in the range of $75.

The success of the President's program depends on a strict limitation on semifinished imports at no more than 1.7 million tons annually. The E.C. is entitled to whatever portion of that total it can negotiate with the U.S. government.

7. "Eurofer producers reject . . . allegations of the U.S. steel industry . . . that the share of Community imports on the U.S. market has risen."

USA Response: First as stated earlier, the E.C. has no right to any U.S. market share as such. Secondly, a look at the data confirms that the E.C. market share has, in fact, risen.

During 1979-81, the base period during which serious violations of U.S. trade laws and resultant injury to the U.S. industry were found (in the 1982 trade cases), the E.C. market share averaged 5.1%. After holding at 4.9% in 1983, the first full year of the arrangement, it jumped sharply to 6.4% in 1984, and has risen again to 7.1% in the first six months of 1985. These increases represent millions of tons sorely needed by steel producers in the United States and they cannot be tolerated.

8. "Accusations that the Community has not respected the 1982 agreement cannot be accepted . . . monitoring system, developed by the European Community and the member states, has functioned perfectly. The 1982 agreement has also been respected regarding the 'consultation products'."

USA Response: Certainly the "E.C. monitoring system has functioned perfectly" for licensed products. That's because they were subject to a system of export licensing and certification—and that's why the U.S. wants all products to be so covered. But the E.C. totally violated the consultation products limitations, which were specified in the 1982 Arrangement by reference to the 1981 import penetration level. The E.C. also violated the pipe and tube Arrangement, raising import penetration from 5.9% to over 14% by November 1984, with key product i/ps also grossly violated—OCTG for example exceeding 20% in 1984 vs. the 8.76% which the 1982 Arrangement contemplated.

9. "Indeed, in the original agreement there was no restriction on these [consultation] products. The U.S. steel industry is, in fact, doing its utmost to ensure that the European Community has to pay twice by making the same sacrifices as it has made for the last three years."

USA Response: Wrong! The E.C. 1982 Arrangement wasn't a "payment" or a "sacrifice": it was a substitute penalty for unfair trading duties which would surely have been imposed on many products of E.C. producers if their pleas to the U.S. to substitute an Arrangement had not been met. Extension of the Arrangements—which was contemplated in the Arrangement itself—is simply to include the E.C. in President Reagan's program for the domestic industry. Given the E.C. violations in pipe and tube and consultation products, the E.C. hasn't even "paid" once for the injury done to the U.S. industry by foreign unfair trading.

10. ". . . [U.S.] trying to strengthen its protectionist barriers, which are already highly developed and which has already existed for over 20 years."

USA Response: What "protectionist barriers"? Look at the numbers. The E.C. has a foreign steel import penetration of 12-13% according to OECD. Japan has 3-4%. The U.S. has 25%.

11. " . . . the progress of the E.C. steel restructuring program. . . . No state aids to the E.C. steel industry have been available for some time for any purposes other than the further cut-back of production capacity."

USA Response: We understand that some E.C. steel operating subsidies may be phased out. However, Eurofer itself concedes that, even beyond 1985, state money will be spent on R&D, environmental protection, and possibly further steel plant closings. Subsidies for these items are functionally not different from operating subsidies. A staggering $25 million has been poured into the E.C. steel industry since 1980 for operating and investment subsidies alone. State subsidies create an artificial "advantage" which will be felt in the market place long after the money has been spent.

12. "The E.C. . . . now appears to be in the position of being asked to make still further concessions to support more than a dozen bilateral steel export restraint agreements which the U.S. has negotiated. . . ."

USA Response: In announcing the President's steel decision, USTR Brock said that the "President's decision assumes the continuation of the U.S./European Community's arrangement on steel as well as voluntary agreements. . . [with] Mexico and South Africa." Both Mexico and South Africa has negotiated new Arrangements which will continue through September, 1989; the E.C. is therefore not being asked to do anything which has not already been asked of—and acceded to—other countries.

□ 1815

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas [Mr. CHAPMAN] is recognized for 5 minutes.

Mr. CHAPMAN. Mr. Speaker, due to official business back in my district, I was not able to be present for two votes last Thursday, October 17, 1985. On the first vote, passage of H.R. 3227, military construction appropriations, I would have voted "yea." On the second vote, approval of House Resolution 228, the rule providing for consideration of H.R. 2095, the Daylight Saving Extension Act, I would have also voted "yea."

JEWISH HISTORICAL SOCIETY OF NEW YORK SPONSORS CEREMONY FOR UNVEILING PLAQUE DENOTING SITE AS BIRTHPLACE OF HERBERT LEHMAN

(Mr. WEISS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. WEISS. Mr. Speaker, earlier this year New York City's Fifth Avenue Synagogue was the scene of a ceremony sponsored by the Jewish Historical Society of New York, for unveiling a plaque denoting the site as the birthplace of Herbert Lehman. Mr. Lehman, as we well remember, was two-term Lieutenant Governor, four-term Governor, and two-term U.S. Senator from New York. I wish to share with you the eloquent tribute to this great man delivered by Julius C.C. Edelstein, senior vice chancellor emeritus of Hunter College of the City University of New York.

REMARKS BY JULIUS C.C. EDELSTEIN—INSTALLATION OF PLAQUE—HERBERT H. LEHMAN BIRTHPLACE

One hundred and seven years ago, plus 31 days, Herbert Hilary Lehman was born in the five-story brownstone house which once stood on the exact site of this synagogue. The house faced 62nd Street, as this synagogue does, a relatively quiet and modest street in those days. Here lived Meyer Lehman, the Commodity Broker and Investment Banker, his wife Babette and his seven children, with Herbert being the youngest. In this house the family remained until all the sons and daughters had married and moved. Herbert was the last son to do so.

This synagogue was built in 1958. Not long after it was completed, Governor Lehman was invited to pay a visit. He came and toured the building, I am told, pointing out exactly where his bedroom had been, and the living room, and the playroom, and the kitchen. He never forgot this place where he spent his childhood, and grew into manhood. He often spoke of it nostalgically and lovingly.

So it is especially appropriate that a bronze plaque dedicated to Herbert Lehman's memory should be installed on the outside of this place of worship, and that this should take place today, exactly one month after the 107th anniversary of his birth.

Today incidentally, is precisely the 75th anniversary of Herbert Lehman's idyllic marriage to Edith Altschul, in her 20th birthday and his 32nd—a union as close and happy and as interdependent as any union of two people in marriage I have ever seen in my entire life.

Both the Jewish Historical Society of New York and the Fifth Avenue Synagogue are to be gratefully saluted for today's event. The Jewish Historical Society is to be especially congratulated for its creative enterprise and historical perspective in conceiving and arranging for this occasion.

It is good that we should be reminded—and that we should remind the world—of the life of this very great man, in this particular month which has been nationally proclaimed as Jewish Heritage Month. If ever there was a man who should be remembered as a Great Jew and a Great American—a pillar of his people and of all people—the Mr. New York of his time—it is Herbert H. Lehman, two-term Lieutenant Governor, four-term Governor, two-term United States Senator from New York—nine times a candidate for statewide office, eight times elected, Mr. Honesty and Mr. Incorruptible.

Traditionally, Jews pay their greatest tribute to teachers, sages, and prophets—and also to law-givers. Herbert Lehman was not precisely any one of these. But he was a little of each. He was certainly very close to being a saint, in my judgment. He was not only a great man, but a good man, a sweet man, a virtuous man, a dedicated man, a fighting man with a fighting faith—who deserves to be remembered as a model and hero until the end of recorded time. But he is not, and that is a question we should ask ourselves today. Why not?

He was not charismatic. He was not electric. He was no Demosthenes. He could be dull. He was not an intellectual. He was not a creator of new social or political concepts. But he could and did advance great concepts. He could and did successfully implement them. He was an advocate, not an orginator. He was not a thinker; he was a doer, in the words of Allan Nevins, the historian.

He was a great organizer, a great administrator, a great judge of people, a man of constant conscience, and of almost painful conscientiousness. He was serious about his work and unbelievably sensitive about his responsibilities.

He was sincere. Oh, he was sincere. He communicated sincerity. It was once said about him that he could hold the attention of an audience by reading them the names in a telephone book. His audience would listen, impressed with sincerity. Of course he wouldn't read from a telephone book unless he believed in it.

He was beloved. He was respected. At election time, on the Sunday before Election Tuesday, he would always take a walk down Coney Island Boardwalk and on Brighton Beach. Venerable men and women would reach out to touch his sleeve, his collar, the hem of his coat, just to say they had done so, that they had made contact with honesty and integrity. He was courageous. Indeed he was the personification of courage for the sake of conscience.

In 1937 he publicly attacked President Roosevelt, his close friend and patron, for trying to pack the U.S. Supreme Court. In 1949, on the eve of his own candidacy for the U.S. Senate, he publicly criticized the powerful Francis Cardinal Spellman for attacking Eleanor Roosevelt for something she had written in her newspaper column. That was thought to spell his political doom, but it didn't.

As a Senator, he confronted and faced down the savage and fearsome Senator Joe McCarthy, the Communist hunter, on the floor of the Senate, in defense of freedom of association. He locked horns with the acid-tongued Senator Pat McCarran, the red-baiter from Nevada. Because of his penchant for debate and controversy, he was often a thorn in the side of the Senate majority leader, Lyndon B. Johnson. But when Lyndon Johnson was struck down by a heart attack, Senator Lehman was the first on his feet with an eloquent motion, praying for Lyndon Johnson's recovery. Lyndon Johnson never forgot that act of spontaneous human feeling.

Nor did Senator Lehman fail, when his conscience directed him, to oppose and criticize his closest friends in the Senate, Senator Paul Douglas, Senator Hubert Humphrey, and Senator Wayne Morse.

He took up every losing cause. He was a friend of the losers. He defended Alger Hiss. He fought for civil rights long before that became a popular cause. He fought for liberalized immigration laws against encroachments on civil liberties in the name of anti-communism.

He used to say: I don't like to fight. I am a peace-loving man. But I keep finding myself in fighting situations. So I have to fight.

In his time in the United States Senate, the media, and many of his colleagues, called him the Conscience of the United States Senate.

He was a believing and practicing Jew, a deeply involved communicant of nearby Temple Emmanu-El. Not originally a Zionist, he came to be a staunch and generous supporter of Israel. In 1957 he served as National Chairman of the American Committee for the Tenth Anniversary of Israel, an epic of the annual anniversary celebrations. In 1913 he was a co-founder of the renowned Jewish Joint Distribution Committee, the famous "Joint", which brought thousands of Jews away from the Pogroms of Russia and Poland, to the United States, to Canada and Palestine. He was also a founding member of ORT, Organization for Rehabilitation Through Training For European Jews.

In the waiting room of the Joint Distribution Committee there hangs a large painting of the original Board of the Joint. In the forefront are Felix Warburg, Chairman, and Louis Marshall, Vice Chairman; immediately to the left and right of them are Herbert Lehman and Jacob Schiff.

He was a major supporter of the United Jewish Appeal. He served as an active member of the Mount Sinai Hospital Board. These are only a few of his Jewish-related activities. Many others were known. Some are not known.

To his beloved City, New York, he gave the Children's Zoo in Central Park, just a long stone's throw from here. That was his birthday gift to the City for his 75th birthday.

He was a major benefactor of Williams College, where Lehman Hall is named for him. He was a Board Member and generous supporter of the National Association For The Advancement of Colored People, and of the Urban League, from the earliest days of those organizations. He was an active supporter, and participant in the work of the Henry Street Settlement on the lower East Side. Pete's House is named for his son, Peter, killed in World War II. Herbert Lehman's mark remains in many other places. There is a Herbert H. Lehman College, a unit of the City University, and a Herbert H. Lehman Junior High School, a unit of the public school system, both in the Bronx. There is an outstanding scholarly Research Library, the Herbert H. Lehman Library, at Columbia University in Manhattan.

But most of all, the permanent marks and imprints of Herbert H. Lehman were left on the statute books of New York State, and of the United States—the Little New Deal in New York—the Niagara Water Power Redevelopment Act and the St. Lawrence Waterway Development Act, in the nation—and beyond these, in the banks and businesses which were saved from extinction and disaster during the Great Depression—and even more, the millions of lives that were saved—and the needs of the hungry, homeless, and destitute which were met, the light of hope was lit, in New York State, and later throughout the world.

Now at this point, before I proceed further with this celebration of the life and deeds of Herbert H. Lehman—let me tell my own story—the story of how I came to know and work for Governor Lehman, how I spoke and met with him for the first time, and subsequently became intimately associated with him for the last 14 years of his life—which were among the most memorable years of my own life.

The year was 1949; World War II had ended only four years before. I had worked in the White House under Presidents Roosevelt and Truman. I was in the process of writing a book on German-Japanese reparations on occupation policy.

In New York State, the nation's attention had been focussed in a special election for the U.S. Senate. The incumbent was the renowned John Foster Dulles, Advisor to Presidents, a world figure, a polished orator, a moderate Republican. His Democratic opponent, running for the Senate for the second time, was Herbert H. Lehman, four times Governor of his state, a six-time winner in state-wide elections.

The chief issue in that election was the welfare state. In that faraway time, still overshadowed by the New Deal, John Foster Dulles charged Governor Lehman with being an advocate of a welfare state. Governor Lehman admitted the charge and embraced it. He accused Dulles of wanting to repeal the New Deal—unemployment insurance, public housing, old age insurance, union recognition and legalized bargaining.

Herbert Lehman won that election by almost 200,000 votes. It was a hard-fought contest. In the course of the campaign, I had been asked by New York friends—I was located in Washington at the time—to draft some speech material on reparations and post-war occupation policy, for Governor Lehman's campaign use. I was glad to oblige. I did so, and thought no more about it.

Several days after that election, I was preparing to leave for St. Louis, to visit an old friend. I needed a rest from my book-writing. I was rushing and packing. My telephone rang.

An unfamiliar voice spoke up, saying that he had been referred to me by mutual friends: Could I please call on him at the Mayflower Hotel, that very day?

"Well, I don't think I can," I said, "But who is this anyway?" I had failed to catch the name.

"Herbert Lehman," he answered.

"Well, who are you?" I ask somewhat petulantly, for I was in a hurry.

"Oh, I'm the new Senator from New York," he answered.

"Oh, Governor Lehman," I said.

"Yes," he replied, "Only I pronounce it Lehman. Could you come to see me, today? I am considering hiring you as my Chief Assistant. You are one of three or four whom I am considering.

That was my introduction to him. I went to see him, was charmed by him, then went to St. Louis, stayed for a fortnight, and almost forgot about him. On my return from St. Louis, I found that he had been calling me daily, to offer me the job. I demurred at first on account of my unfinished book, but he pressed, saying that I could have as much time as I needed to finish the book. I took the job and never had a spare hour thereafter to work on that book which remains unwritten to this day.

He was a charmer. He was also a driver. He gave no quarter. He spared no effort himself. He was a 24-hour man. He expected the same from his staff. And he got it.

He was a leader by both inspiration and perspiration. He was never beyond reach—7 days a week—except when he went on vacation with his Edith.

The South France, Switzerland, England—those were their favorite vacation lands—and occasionally California, where Mrs. Lehman had been born and brought up. I received daily telephone calls from all these places, and addressed countless memoranda and cablegrams and telegrams to him, wherever they happened to be. Yes, he was a hard-worker—intense, earnest, high-minded, noble, conscientious to a fault.

His father had wanted him to study engineering. A family friend talked him out of that. So he received a Liberal Arts education and became a businessman. He loved sports, loved playing tennis, but was never good at it. He taught his wife how to play tennis. Soon she was able to beat him at it, but he kept playing and trying.

He was a good businessman, worked in textiles. That prepared him for his service in procurement for the Navy Department, in World War I, where he met and worked with Assistant Secretary of the Navy, Franklin D. Roosevelt, and later with the U.S. Army.

After his service in the First World War, Lehman went to work as a partner in Lehman Brothers, the family banking firm. All the partners in Lehman Brothers were family at that time, brothers, cousins, uncles and nephews, no outsiders. Herbert Lehman successfully urged bringing in non-family partners. The first such outside non-family non-Jewish partner was named John Hancock. The firm grew like Topsy and achieved like Hercules. It became one of the most respected firms in Wall Street, conservative and yet venturesome, with an almost unbroken record of sensational successes . . . Herbert Lehman resigned from the firm in 1928 when he ran for Lieutenant Governor. Yet how saddened he would be, were he alive, to witness how, only some weeks ago, in 1985, that great and venerable banking firm was swallowed up, like a fish in the mouth of a whale, by the mammoth American Express Company.

Herbert Lehman had a great respect for institutions—for private business institutions like Lehman Brothers, for such politi-

cal institutions as the Democratic Party, and for the basic institutions of government such as the U.S. Senate—and for non-profit institutions, like the Mount Sinai Hospital and the Henry Street Settlement.

He especially loved politics, as his father had, before him and he respected party politicians, especially Democrats. But above politics, he placed principle. It was one of his favorite words. It was one of his most respected values. One of his first judicial appointments when he was elected Governor was a Republican as Chief Judge of the Court of Appeals. Professional Democrats were appalled.

Herbert Lehman was above all, a gentleman, a courtly gentleman who was always guided by the rules of honor and principle.

When he was elected Governor, he continued Al Smith's friend, Robert Moses, as State Parks Commissioner. When the same Robert Moses sought and secured the Republican nomination for Governor to run against Lehman in Lehman's first race for reelection in 1934, and when he, Robert Moses, used his renowned powers of invective to attack Lehman, calling him a liar and on one occasion, a "cowardly, snivelling, lying weakling." Lehman refrained from responding in kind. After the extremely bitter election campaign, in which Moses was defeated by 800,000 votes, Governor Lehman announced that he would retain Moses as his State Parks Commissioner. Moses was a great State Parks Commissioner, Lehman said.

Some years later, when there was concern over crime and racketeering in New York City, Governor Lehman appointed an Assistant U.S. Attorney by the name of Thomas E. Dewey to be Special Prosecutor to investigate and prosecute crime and criminals in Manhattan. Eight months later, the same Dewey became the Republican candidate for Governor. That was 1938. Lehman won by the narrowest of margins.

After that election, Governor Lehman reconfirmed his appointment of Dewey as Special Prosecutor. Dewey's subsequent achievements as a racket-buster enabled him to run successfully for Governor in 1942, and then unsuccessfully, as the Republican candidate for President against Franklin D. Roosevelt, in Roosevelt's fourth and last successful run for that office.

It could be said that Herbert Lehman was somewhat weak in his sense of humor. He was a most pleasant and gracious man, but not a generally fun-loving man. He smiled and laughed at other people's jokes, but seldom told any of his own. He and his wife were serious people.

There is a true story that illustrates this feature. The year was 1939. There was a New York State boxer, a pugilist of some reputation, not quite a world champion, but close to it, by the name of Lou Ambers, born in Herkimer, New York.

His publicity man called him the Herkimer Hurricane. In 1939 Ambers was going downhill. He could no longer command the big purses. He took on clubhouse engagements in tank towns. Albany was such a tank town. Ambers was scheduled for a clubhouse fight in Albany, and then for an overnight train ride to Buffalo for another match. He had to be on the eight p.m. train out of Albany. It was arranged, shall we say, that his opponent would be knocked out by 7:30. Ambers' schedule gave him a free afternoon in Albany. His manager thought it might be a good idea to get a picture with Governor Lehman. And on a dull day in Albany, the Governor ought to be glad to be photographed with a New York State boxer, a native son.

Governor Lehman was glad to oblige. The photo opportunity was set up. The Governor shook hands with the Herkimer Hurricane. The Governor had a tic in his left eye. As the picture taking ended, Governor Lehman, ever gracious, said: "Mr. Ambers, I wish you the best of luck. I hope you win tonight." At that moment the Governor's tic took over. He winked hard.

Ambers turned to his manager, "Is this guy in on the fix, too?" he asked, very annoyed.

Lehman didn't get the point. He never did. The manager hustled his fighter out of the executive office in a hurry, and on his way to the clubhouse arena where the Herkimer Hurricane would be out of harm's way.

On December 6, 1963, two weeks after the assassination of John Kennedy, Herbert Lehman, at the age of 85, still active and engaged, passed away without pain or suffering, quietly, full of honor and respect, with his beloved wife at his side. She did not outlive him long. They were a pair, and I am personally proud that my daughter, who sits among you this morning, was named for her.

I might say that he died in good and hopeful times. He would not like to see what has happened to this world, to his political party, to his ideals.

After all is said and done, looking back on this great and good life, what do Herbert Lehman's achievements mean, in 1985, for those of us still alive, and for those whose lives remain still to unfold and develop?

To pursue the answers to this central question, let us for a moment dip into Allen Nevins' biography of Lehman, and recall the list of legislative enactments which are credited to Lehman's leadership in his first term as Governor, from 1932 to 1934.

Although Lehman was not a personal powerhouse, and no wheeler and dealer—he was able to secure from the Republican-controlled State Legislature in his first term, from 1932 to 1934, the following:

An unemployment insurance law;

A law raising the compulsory school age from fourteen to sixteen;

A law abolishing certain abuses by physicians in Workmen's Compensation cases;

A law providing jury trial in all labor injunction cases;

A law providing free milk for needy children;

A law placing occupational diseases under the Compensation Statues;

A law ending suits for Breach of Promise and Alienation of Affections;

A law permitting Sunday performances of legitimate stage productions;

A law giving the State Transit Commission full control over all transit lines in New York City;

A law requiring utility companies to file semi-annual statements; and

A proposed constitutional amendment increasing the Governor's term from two to four years and Assemblymen's terms to two years.

That was just a sampler of the legislation Lehman was able to get enacted in one term in office, through a predominantly Republican legislature; he succeeded in this by appeals based on merit and on principle, not on the basis of his skills in the tide of change and reform—and of hope—that was sweeping over the land at that time. Where is that tide today?

One month ago today, former Mayor John V. Lindsay, originally a Republican, speaking on Herbert Lehman's birthday at Herbert H. Lehman College, said of him:

"In these, and scores of other struggles Herbert Lehman represented the best of the bipartisan tradition in American politics. His victories were fought and won by alliances of Democrats and Republicans whose allegiance to the nation's best interests transcended party loyalties and ideological dogma."

It is not easy for us today to appreciate, nor even to recall, the public temper of the Lehman-Roosevelt times, and to compare them with the entirely different moral and social temper of our present day.

The values which Herbert Lehman stood for were social values, the values of generosity and compassion, of sharing and sacrifice, of brotherhood and struggle, of opposition to the special interests . . . the utility magnates, the robber barons, the sweatshop owners, the stock market speculators, the slumlords.

The prevailing spirit of the present era is far different, far more inner-directed, far less certain, far less hopeful. The prevailing spirit today is no longer one of public compassion; it is one of private possession. The driving force is no longer to help others but to have and to enjoy.

Today the social instinct—the concern of the strong for the weak, and of the comfortable for the disadvantaged—is disowned and discredited. Individualism, privatism and selfism are given the highest value and reward. Being "cool" it is called.

These are no times for serious speeches—such as this one. Today's focus is on glitz and sparkle: This is the rhinestone era. This is the heyday of the TV commercial—of one-liners—of quick quips, dark humor and the sexy flash of flesh.

The 20th Century Spanish philosopher, Jose Ortega y Gasset, wrote not too long ago:

"Civilization is, above all, the will to live in common. A man is uncivilized and barbarian in the degree to which he does not take others into account. Barbarianism is the tendency to dissociation. Accordingly, all barbarous epochs have been times of human scattering, of the pullulation of tiny groups, separate from and hostile to one another."

Is this an accurate projection of the spirit and temper of our present times? If it is, it is no wonder that the recollection of the life and values of Herbert H. Lehman sounds somewhat strange and foreign, like a Beethoven sonata at a punk rock festival.

If there was one lamp of hope that was held up and cherished by Herbert H. Lehman and his times, it was for the young—the children, the youth. They were to be protected, assisted and advanced—at all costs.

What is happening to our youth today—in this day of drug culture, the hype culture, and the speed culture?

A terrible statistic jumps out at us—that suicide has overtaken homicide as the second largest killer of youth between 15 and 24 in our nation. The rate of youth suicide in the 80's has grown at triple the rate of the 1950's. It now claims the lives of more young men and women than cancer. Suicide is the enemy of hope.

Today morals seem to be outmoded. Liasons and divorces are without consequences. Distinctions between male and female fade away. Chivalry is out of style. Idealism is out of style. Public service is for those who have rather than those who can, and for what can be gotten out of it rather than what can be put into it.

What is this chamber of horrors in which we wander—and wonder—today? Are we lost in some magical hall of mirrors in which we see enlarged and distorted images of ourselves, Or are they true images? Are such TV serials as Dallas and Dynasty the true images of society today? Are Boy George and Michael Jackson the true reflections of the model values which are taught and held up before the growing children and youth of today?

We know, from population surveys, that the overwhelming majority of people are dissatisfied with what they are—and with what they have today. Larger and larger majorities distrust the established institutions and organs of our society—the government, the press, TV, the law, the courts, the police, doctors, the schools? How can this data fail to concern and frighten us? How can this fail to galvanize our thoughts and our actions?

There is a light of hope. Maybe we see the faint shine. There are some few indications that we are reaching a watermark in the present tendencies toward materialism and hedonism. Perhaps the barbarization of our culture—and of our hero figures—and of our politics —is also approaching its limits.

It could be that the social values of Herbert H. Lehman, and the Roosevelts, and the Trumans, and the Adlai Stevensons, and the Albert Einsteins and the Robert LaFollettes and the George Norrises and the Al Smiths and the Norman Thomases and the Hillquits and the Walter Reuthers and the Sidney Hillmans and the David Dubinskys, and the Lillian Walds and the Jane Addamses and the Jacob Riises . . . are at the dawn of their reemergence. It is sometimes darkest just before dawn. It may be that these great and indeed timeless values—and the people who upheld them—will again be remembered and embraced and celebrated and honored. The pendulum does swing.

If so, if this should come to pass, then the recollection of a life-story like that of Herbert H. Lehman and his ever-loving wife Edith, the story of a man of courage, and honor and high principle, who was an achiever and a businessman and became a leader of his people and all people—a vote-getter, a bleeding-heart, a freedom fighter: such a story can and will again be told and retold to the children of succeeding generations, like the story of the Exodus, like the story of Don Quixote, of El Cid, of Richard the Lion-hearted, like the story of Roland like the story of King Arthur . . . but in this case a true story, a great story—the story of a noble, honest, sincere and incorruptible man.

Speed the day. That will be the day. That would fill my cup.

That would make my day.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. CLINGER (at the request of Mr. MICHEL), for today, on account of official business.

Ms. MIKULSKI (at the request of Mr. WRIGHT), for today from 1:30 p.m. to 3:30 p.m., on account of official business.

Mrs. BYRON (at the request of Mr. WRIGHT), for today from 1:30 p.m. to 3:00 p.m., on account of official business.

Mr. MARLENEE (at the request of Mr. MICHEL), for today and the balance of the week, on account of a death in the family.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. RIDGE) to revise and extend their remarks and include extraneous material:)

Mr. IRELAND, for 5 minutes, on October 30.

Mr. CRAIG, for 60 minutes, on October 30.

Mr. FISH, for 10 minutes, on October 30.

Mr. BARTLETT, for 5 minutes, on October 30.

(The following Members (at the request of Mr. DONNELLY) to revise and extend their remarks and include extraneous material:)

Mr. NELSON of Florida, for 5 minutes.

Mr. ANNUNZIO, for 5 minutes.

Mr. RODINO, for 5 minutes.

Mr. GONZALEZ, for 5 minutes.

Mr. EDGAR, for 60 minutes, on November 5.

Mr. EDGAR, for 60 minutes, on November 6.

(The following Members (at the request of Mr. GAYDOS) to revise and extend their remarks and include extraneous material:)

Mr. OBEY, for 60 minutes, on October 30.

Mr. OBEY, for 60 minutes, on October 31.

Mr. OBEY, for 60 minutes, on November 1.

Mr. CHAPMAN, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. WEISS, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,545.

Mr. WEISS, prior to the vote on the conference report on the Department of Defense authorization, in the House today.

(The following Members (at the request of Mr. RIDGE) and to include extraneous matter:)

Mr. WOLF in two instances.
Mr. LEWIS of Florida.

Mr. DUNCAN.
Mr. GREEN.
Mr. GALLO.
Mr. MCEWEN.
Mr. BROOMFIELD in two instances.
Mr. WHITEHURST.
Mr. GALLO in two instances.
Mr. CONTE.
Mr. GOODLING.
Mr. O'BRIEN.
Mr. JEFFORDS.
Mr. GINGRICH.
Mr. SENSENBRENNER.

(The following Members (at the request of Mr. DONNELLY) and to include extraneous matter:)

Mr. ST GERMAIN.
Mr. LANTOS.
Mr. MARTINEZ.
Mr. STOKES.
Mr. BEILENSON.
Mr. GRAY of Pennsylvania.
Mr. GAYDOS.
Mr. SCHUMER.
Mr. HUBBARD.
Mr. OBEY.
Mr. BRYANT.
Mr. SHELBY.
Mr. LELAND.
Mrs. COLLINS.
Mr. EDGAR.
Mr. MORRISON of Connecticut.
Mr. BERMAN.
Mr. FOWLER.
Mr. YOUNG of Missouri.
Mr. HOYER.
Mr. PEPPER.
Mr. HAYES.

ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill and joint resolutions of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 3605. An act to provide that the authority to establish and administer flexible and compressed work schedules for Federal Government employees be extended through December 31, 1985;

H.J. Res. 308. Joint resolution designating the week beginning on October 20, 1985, as "Benign Essential Blepharospacm Awareness Week"; and

H.J. Res. 322. Joint resolution to provide for the designation of October 1985, as "National Sudden Infant Death Syndrome Awareness Month."

ADJOURNMENT

Mr. GAYDOS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 17 minutes p.m.), the House adjourned until tomorrow, Wednesday, October 30, 1985, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2190. A letter from the Auditor, District of Columbia, transmitting a copy of the report

entitled, "University of the District of Columbia President's Representation Fund for fiscal year 1985", pursuant to Public Law 93-198, section 455(d); to the Committee on the District of Columbia.

2191. A letter from the Chairman, Board of Directors, Future Farmers of America, transmitting the report and financial audit, pursuant to Public Law 88-504, section 3 (36 U.S.C. 1103); to the Committee on the Judiciary.

2192. A letter from the Military Order of the Purple Heart of the United States of America, transmitting the report and financial audit, pursuant to Public Law 88-504, section 3 (36 U.S.C. 1103); to the Committee on the Judiciary.

2193. A letter from the Administrator, General Services Administration, transmitting a lease prospectus, pursuant to Public Law 86-249, section 7(a) (86 Stat. 217); to the Committee on Public Works and Transportation.

2194. A letter from the Director, National Bureau of Standards, transmitting the Director's review of the recommendations of the President's Private Sector Survey on Cost Control and of such other advisements contained in the OMB report entitled, "Management of the United States Government—1986," pursuant to Public Law 99-73; to the Committee on Science and Technology.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HAWKINS. Committee on Education and Labor H.R. 1616. A bill to require employers to notify and consult with employees before ordering a plant closing or permanent layoff. With an amendment (Rept. 99-336). Referred to the Committee of the Whole House on the State of the Union.

Mr. DERRICK. Committee on Rules. H.Res. 301. A resolution providing for the consideration of H.R. 3128, a bill to make changes in spending and revenue provisions for purposes of deficit reduction and program improvement, consistent with the budget process. (Rept. 99-338). Referred to the House Calendar.

Mr. WHEAT. Committee on Rules. H. Res. 302. A resolution waiving certain points of order against consideration of H.R. 3629 a bill making appropriations fo: the Department of Defense for the fiscal year ending September 30, 1986, and for other purposes. (Rept. 99-339). Referred to the House Calendar.

Mrs. OAKAR. Committee on House Administration. H.J. Res. 142. A bill to authorize the Black Revolutionary War Patriots Foundation to establish a memorial in the District of Columbia at an appropriate site in Constitution Gardens, with amendments (Rept. 99-340). Referred to the Committee of the Whole House on the State of the Union.

Ms. OAKAR. Committee on House Administration. H.R. 2205. A bill to erect a memorial on Federal land in the District of Columbia or its environs to honor members of the Armed Forces of the United States who served in the Korean war, with amendments (Rept. 99-341). Referred to the Committee of the Whole House on the State of the Union.

Ms. OAKAR. Committee on House Administration. H.J. Res. 36. A bill authorizing establishment of a memorial in the District of Columbia or its environs, with amendments (Rept. 99-342). Referred to the Committee of the Whole House on the State of the Union.

Mr. HAWKINS. Committee on Education and Labor. H. Con. Res. 207. A bill to recognize the twentieth anniversary of the Higher Education Act of 1965 and reaffirm its purpose. (Rept. 99-343). Referred to the House Calendar.

REPORTED BILLS SEQUENTIALLY REFERRED

Under clause 5 of rule X, bills and reports were delivered to the Clerk for printing, and bills referred as follows:

Mr. MONTGOMERY. Committee on Veterans' Affairs. H.R. 1538. A bill to amend title 38, United States Code, to provide a 4.1 percent increase in the rates of compensation and of dependency and indemnity compensation (DIC) paid by the Veterans' Administration with an amendment (Rept. 99-337, Pt 1). Referred to the Committee on Ways and Means for a period ending not later than November 15, 1985, for consideration of such provisions of section 204 of the amendment recommended by the Committee on Veterans' Affairs as fall within the jurisdiction of the Committee on Ways and Means under clause 1(v), rule X. Order to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. FAZIO (for himself and Mr. CHAPPIE):

H.R. 3637. A bill to provide for the payment of losses incurred by domestic growers, manufacturers, packers, and distributors as a result of the Food and Drug Administration's erroneous publicity and misrepresentations during 1969 and 1970 regarding the carcinogenic effects of cyclamates after extensive inventories of foods containing cyclamates had been prepared or packed or packaging, labeling, and other materials had been prepared; to the Committee on the Judiciary.

By Mr. LELAND:

H.R. 3638. A bill to amend Chapter 83 of Title 5, United States Code, to provide Civil Service Retirement Credit for service performed under the Railroad Retirement Act, and for other purposes; jointly, to the Committees on Post Office and Civil Service, and Energy and Commerce.

By Mr. RODINO (for himself, Mr. FISH, Mr. KASTENMEIER, Mr. SEIBERLING, Mr. HUGHES, Mr. CROCKETT, Mr. FEIGHAN, and Mr. SMITH of Florida):

H.R. 3639. A bill to amend the Clayton Act by modifying the notification requirements applicable to mergers and tenders offers; to the Committee on the Judiciary.

By Mr. WAXMAN (for himself and Mr. MADIGAN):

H.R. 3640. A bill to amend the Federal Food, Drug, and Cosmetic Act to prescribe warnings respecting Reye's Syndrome for drugs containing aspirin; to the Committee on Energy and Commerce.

By Mr. WOLF:

H.R. 3641. A bill to amend title 5, United States Code, to increase the opportunity to provide a survivor annuity under subchapter III of chapter 83 of such title; and to improve retirement counseling for Federal Government employees; to the Committee on Post Office and Civil Service.

By Mr. BROYHILL (for himself, Mr. HENDON, Mr. COBLE, Mr. HEFNER, Mr. JONES of North Carolina, Mr. MCMILLAN, Mr. NEAL, Mr. ROSE, Mr. VALENTINE, Mr. SPENCE, Mr. SPRATT, Mr. CAMPBELL, Mr. TALLON, Mr. DERRICK, Mr. RAY, Mr. DARDEN, Mr. JENKINS, Mr. CALLAHAN, Mr. ERDREICH, Mr. MOORE, Mr. TAUZIN, Mr. DOWDY of Mississippi, Mr. LEWIS of Florida, Mr. DANIEL, Mr. WORTLEY, Mr. QUILLEN, Mr. RICHARDSON, Mrs. BENTLEY, Mr. DENNY SMITH, Mr. PRICE, Mr. WATKINS, Mr. REGULA, Mr. ROGERS, Mr. ADDABBO, Mr. KINDNESS, Mr. NICHOLS, Mr. REID, Mr. EMERSON, Mr. SCHULZE, Mr. KOLTER, Ms. KAPTUR, Mr. COBEY, Mr. HUNTER, Mr. SKELTON, Mr. DWYER of New Jersey, Mr. HUGHES, Mr. RINALDO, Mr. SAXTON, Mr. TORRICELLI, Mr. ROE, Mrs. BOXER, Mr. BROWN of California, Mr. DYMALLY, Mr. DYSON, Mr. HORTON, Mr. WHITLEY, Mr. ACKERMAN, Mr. HARTNETT, and Mr. HILLIS):

H.J. Res. 430. Joint resolution to authorize and request the President to designate December 1985 as "Made in America Month;" to the Committee on Post Office and Civil Service.

By Mr. FASCELL (for himself, Mr. BROOMFIELD, Mr. HAMILTON, and Mr. GILMAN):

H.J. Res. 431. Joint resolution to commend the people and the sovereign confederation of the neutral nation of Switzerland for their contributions to freedom, international peace, and understanding on the occasion of the meeting between the leaders of the United States and the Soviet Union in Geneva, Switzerland, on November 19 and 20, 1985; to the Committee on Foreign Affairs.

By Mr. WHITTEN:

H.J. Res. 432. Joint resolution making further continuing appropriations for the fiscal year 1986; to the Committee on Appropriations.

By Mr. JONES of North Carolina:

H.J. Res. 433. Joint resolution to authorize and request the President to issue a proclamation designating June 2 through June 8, 1986, as "National Fishing Week;" to the Committee on Post Office and Civil Service.

By Mr. BROOMFIELD (for himself, Mr. YATRON, Mr. LAGOMARSINO, and Mr. MURTHA):

H. Con. Res. 222. Concurrent resolution condemning the state of emergency imposed by the Sandinista regime suspending fundamental civil liberties of the Nicaraguan people; to the Committee on Foreign Affairs.

By Mr. PARRIS:

H. Con. Res. 223. Concurrent resolution reaffirming that deposits, up to the statutorily prescribed amount, in federally insured depository institutions are backed by the full faith and credit of the United States; to the Committee on Banking, Finance and Urban Affairs.

By Mr. FISH (for himself, Mr. RODINO, Mr. HYDE, Mr. BROOKS, Mr. DANNEMEYER, Mr. EDWARDS of California, Mr. SEIBERLING, Mr. HUGHES,

Mr. SYNAR, Mr. GLICKMAN, Mr. FEIGHAN, Mr. SMITH of Florida, Mr. CONYERS, Mrs. SCHROEDER, Mr. FRANK, Mr. SCHUMER, Mr. BERMAN, Mr. BOUCHER, Mr. BRYANT, Mr. GALLO, Mr. NIELSON of Utah, Mr. EVANS of Illinois, Mr. SMITH of New Jersey, Mr. STOKES, and Mr. TOWNS):

H. Res. 303. Resolution expressing the sense of the House of Representatives that the antitrust enforcement guidelines entitled "Vertical Restraints Guidelines," published by the Department of Justice on January 23, 1985, do not have the force of law, do not accurately state current antitrust law, and shall not be considered by the courts of the United States as binding or persuasive; to the Committee on Judiciary.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. ANDERSON introduced a bill (H.R. 3642) to clear certain impediments to the documentation of the vessel "Gypsy Rose" as a vessel of the United States; to the Committee on Merchant Marine and Fisheries.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

Sec. 451. Coordination.

PART I—SUPERFUND AND ITS REVENUE SOURCES

SEC. 411. EXTENSION OF ENVIRONMENTAL TAXES.

(a) IN GENERAL.—Subsection (d) of section 4611 of the International Revenue Code of 1954 (relating to termination) is amended to read as follows:

"(d) APPLICATION OF TAXES.—The taxes imposed by this section shall apply after October 31, 1985, and before October 1, 1990."

(b) TECHNICAL AMENDMENT.—Section 303 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 is hereby repealed.

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on November 1, 1985.

SEC. 412. INCREASE IN TAX ON PETROLEUM.

(a) INCREASE IN TAX.—Subsections (a) and (b) of section 4611 of the Internal Revenue Code of 1954 (relating to environmental tax on petroleum) are each amended by striking out "0.79 cent" and inserting in lieu thereof "11.9 cents".

(b) EFFECTIVE DATE.—The amendments made by this section shall take effect on November 1, 1985.

SEC. 413. INCREASE IN TAX ON CERTAIN CHEMICALS.

(a) INCREASE IN RATE OF TAX; LEAD ADDED AS TAXABLE CHEMICAL.—Subsection (b) of section 4661 of the Internal Revenue Code of 1954 (relating to amount of tax imposed on certain chemicals) is amended by striking out the table contained in such subsection and inserting in lieu thereof the following:

"In the case of:	The tax (before any inflation adjustment) is the following amount per ton:
Organic substances:	
Acetylene	$6.25
Benzene	6.25
Butadiene	6.25
Butane	5.54
Butylene	6.25
Ethylene	6.25
Methane	3.44
Napthalene	6.25
Propylene	6.25
Toluene	6.25
Xylene	11.19
Inorganic substances:	
Ammonia	4.20
Antimony	6.25
Antimony trioxide	6.25
Arsenic	6.25
Arsenic trioxide	6.25
Barium sulfide	6.25
Bromine	6.25
Cadmium	6.25
Chlorine	4.03
Chromite	1.52
Chromium	6.25
Cobalt	6.25
Cupric oxide	6.25
Cupric sulfate	6.25
Cuprous oxide	6.25
Hydrochloric acid	1.24
Hydrogen fluoride	6.25
Lead	6.25
Lead oxide	6.25
Mercury	6.25
Nickel	6.25
Nitric acid	3.90
Phosphorous	6.25
Potassium dichromate	6.25
Potassium hydroxide	6.25
Sodium dichromate	6.25
Sodium hydroxide	3.72
Stannic choloride	6.25
Stannous chloride	6.25
Sulfuric acid	1.03
Zinc chloride	6.25
Zinc sulfate	6.25."

(b) INFLATION ADJUSTMENTS IN AMOUNT OF TAX.—Section 4661 of such Code is amended by redesignating subsection (c) as subsection (d) and by inserting after subsection (b) the following new subsection:

"(c) INFLATION ADJUSTMENTS IN AMOUNT OF TAX.—

"(1) IN GENERAL.—In the case of any taxable chemical sold in a calendar year after 1986, the amount of the tax imposed by subsection (a) shall be the amount determined under subsection (b) increased by the applicable inflation adjustment for such calendar year.

"(2) APPLICABLE INFLATION ADJUSTMENT.—

"(A) IN GENERAL.—In the case of a taxable chemical, the applicable inflation adjustment for the calendar year is the percentage (if any) by which—

"(i) the applicable price index for the preceding calendar year, exceeds

"(ii) the applicable price index for 1985.

"(B) APPLICABLE PRICE INDEX.—For purposes of subparagraph (A), the applicable price index for any calendar year is the average for the months in the 12-month period ending on September 30 of such calendar year of—

"(i) in the case of organic substances, the producer price index for basic organic chemicals as published by the Secretary of Labor, or

"(ii) in the case of inorganic substances, the producer price index for basic inorganic chemicals as published by the Secretary of Labor.

"(3) ROUNDING.—If any increase determined under paragraph (1) is not a multiple of 1 cent, such increase shall be rounded to the nearest multiple of 1 cent (or, if the increase determined under paragraph (1) is a multiple of ½ of 1 cent, such increase shall be increased to the next higher multiple of 1 cent)."

(c) EXEMPTION FOR EXPORTS OF TAXABLE CHEMICALS.—

(1) Section 4662 of such Code (relating to definitions and special rules) is amended by redesignating subsection (e) as subsection (f) and by inserting after subsection (d) the following new subsection:

"(e) EXEMPTION FOR EXPORTS OF TAXABLE CHEMICALS.—

"(1) TAX-FREE SALES.—

"(A) IN GENERAL.—No tax shall be imposed under section 4661 on the sale by the manufacturer or producer of any taxable chemical for export, or for resale by the purchaser to a second purchaser for export.

"(B) PROOF OF EXPORT REQUIRED.—Rules similar to the rules of section 4221(b) shall apply for purposes of subparagraph (A).

"(2) CREDIT OR REFUND WHERE TAX PAID.—

"(A) IN GENERAL.—Except as provided in subparagraph (B), if—

"(i) tax under section 4661 was paid with respect to any taxable chemical, and

"(ii) such chemical was exported by any person,

credit or refund (without interest) of such tax shall be allowed or made to the person who paid such tax.

"(B) CONDITION TO ALLOWANCE.—No credit or refund shall be allowed or made under subparagraph (A) unless the person who paid the tax establishes that he—

"(i) has repaid or agreed to repay the amount of the tax to the person who exported the taxable chemical, or

"(ii) has obtained the written consent of such exporter to the allowance of the credit or the making of the refund.

"(3) REGULATIONS.—The Secretary shall prescribe such regulations as may be necessary to carry out the purposes of this subsection."

(2) Paragraph (1) of section 4662(d) of such Code (relating to refund or credit for certain uses) is amended—

(A) by striking out "the sale of which by such person would be taxable under such section" and inserting in lieu thereof "which is a taxable chemical", and

(B) by striking out "imposed by such section on the other substance manufactured or produced" and inserting in lieu thereof "imposed by such section on the other substance manufactured or produced (or which would have been imposed by such section on such other substance but for subsection (b) or (e) of this section)".

(d) SPECIAL RULES FOR CERTAIN CHEMICALS.—

(1) REPEAL OF EXEMPTION FOR CHEMICALS DERIVED FROM COAL.—

(A) Section 4662(b) of such Code (relating to exemptions; other special rules) is amended by striking out paragraph (4) and by redesignating paragraphs (5) and (6) as paragraphs (4) and (5), respectively.

(B) Paragraph (3) of section 4662(d) of such Code is amended by striking out "subsection (b)(5)" each place it appears and inserting in lieu thereof "subsection (b)(4)".

(2) EXEMPTION FOR LEAD HAVING TRANSITORY PRESENCE DURING EXTRACTING PROCESS.—Clause (i) of section 4662(b)(5)(B) of such Code (relating to substance having transitory presence during extracting process), as redesignated by paragraph (1), is amended by inserting "lead," before "lead oxide".

(3) SPECIAL RULE FOR XYLENE.—Subsection (b) of section 4662 of such Code (relating to exceptions; other special rules) is amended by adding after paragraph (5) the following new paragraph:

"(6) SPECIAL RULE FOR XYLENE.—Except in the case of any substance imported into the United States or exported from the United States, the term 'xylene' does not include any separated isomer of xylene."

(4) SPECIAL RULE FOR NITRIC ACID USED IN PRODUCTION OF NITROCELLULOSE.—Subsection (b) of section 4662 of such Code (relating to exceptions; other special rules) is amended by adding after paragraph (6) the following new paragraph:

"(7) SPECIAL RULE FOR NITRIC ACID USED IN PRODUCTION OF NITROCELLULOSE.—The tax imposed under section 4661 on nitric acid used by the producer of such acid in the production of nitrocellulose shall not exceed $0.24 per ton."

(e) EXEMPTION FOR CERTAIN RECYCLED CHEMICALS.—Subsection (b) of section 4662 of such Code (relating to exceptions; other special rules) is amended by adding after paragraph (7) the following new paragraph:

"(8) RECYCLED CHROMIUM, COBALT, NICKEL, AND LEAD.—

"(A) IN GENERAL.—No tax shall be imposed under section 4661(a) on any chromium, cobalt, nickel, or lead which is diverted or recoverd in the United States from any solid waste as part of a recycling process (and not as part of the original manufacturing or production process).

"(B) EXEMPTION NOT TO APPLY WHILE CORRECTIVE ACTION UNCOMPLETED.—Subparagraph (A) shall not apply during any period that required corrective action by the taxpayer is uncompleted.

"(C) REQUIRED CORRECTIVE ACTION.—For purposes of subparagraph (B), required corrective action shall be treated as uncompleted during the period—

"(i) beginning on the date that the corrective action is required by the Administrator or an authorized State pursuant to—

"(I) a final permit under section 3005 of the Solid Waste Disposal Act or final order under section 3004 or 3008 of such Act, or

"(II) a final order under section 106 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, and

"(ii) ending on the date the Administrator or such State (as the case may be) certifies to the Secretary that such corrective action has been completed.

"(D) SOLID WASTE.—For purposes of this paragraph, the term 'solid waste' has the meaning given such term by section 1004 of the Solid Waste Disposal Act, except that such term shall not include any byproduct, coproduct, or other waste from any process of smelting, refining, or otherwise extracting any metal."

(f) EXEMPTION FOR ANIMAL FEED SUBSTANCES.—

(1) IN GENERAL.—Subsection (b) of section 4662 of such Code (relating to exceptions; other special rules) is amended by adding after paragraph (8) the following new paragraph:

"(9) SUBSTANCES USED IN THE PRODUCTION OF ANIMAL FEED.—

"(A) IN GENERAL.—In the case of—

"(i) nitric acid,

"(ii) sulfuric acid,

"(iii) ammonia, or

"(iv) methane used to produce ammonia,

which is a qualified animal feed substance, no tax shall be imposed under section 4661(a).

"(B) QUALIFIED ANIMAL FEED SUBSTANCE.—For purposes of this section, the term 'qualified animal feed substance' means any substance—

"(i) used in a qualified animal feed use by the manufacturer, producer, or importer,

"(ii) sold for use by any purchaser in a qualified animal feed use, or

"(iii) sold for resale by any purchaser for use, or resale for ultimate use, in a qualified animal feed use.

"(C) QUALIFIED ANIMAL FEED USE.—The term 'qualified animal feed use' means any use in the manufacture or production of animal feed or animal feed supplements, or of ingredients used in animal feed or animal feed supplements.

"(D) TAXATION OF NONQUALIFIED SALE OR USE.—For purposes of section 4661(a), if no tax was imposed by such section on the sale or use of any chemical by reason of subparagraph (A), the first person who sells or uses such chemical other than in a sale or use described in subparagraph (A) shall be treated as the manufacturer of such chemical."

(2) REFUND OR CREDIT FOR SUBSTANCES USED IN THE PRODUCTION OF ANIMAL FEED.—Subsection (d) of section 4662 of such Code (relating to refunds and credits with respect to the tax on certain chemicals) is amended by adding at the end thereof the following new paragraph:

"(4) USE IN THE PRODUCTION OF ANIMAL FEED.—Under regulations prescribed by the Secretary, if—

"(A) a tax under section 4661 was paid with respect to nitric acid, sulfuric acid, ammonia, or methane used to produce ammonia, without regard to subsection (b)(9), and

"(B) any peson uses such substance as a qualified animal feed substance,

then an amount equal to the excess of the tax so paid over the tax determined with regard to subsection (b)(9) shall be allowed as a credit or refund (without interest) to such person in the same manner as if it were an overpayment of tax imposed by this section."

(g) CERTAIN EXCHANGES BY TAXPAYERS NOT TREATED AS SALES.—Subsection (c) of section 4662 of such Code (relating to use by manufacturers) is amended to read as follows:

"(c) USE AND CERTAIN EXCHANGES BY MANUFACTURER, ETC.—

"(1) USE TREATED AS SALE.—Except as provided in subsections (b) and (e), if any person manufacturers, produces, or imports any taxable chemical and uses such chemical, than such person shall be liable for tax under section 4661 in the same manner as if such chemical were sold by such person.

"(2) SPECIAL RULES FOR INVENTORY EXCHANGES.—

"(A) IN GENERAL.—Except as provided in this paragraph, in any case in which a manufacturer, producer, or importer of a taxable chemical exchanges such chemical as part of an inventory exchange with another person—

"(i) such exchange shall not be treated as a sale, and

"(ii) such other person shall, for purposes of section 4661, be treated as the manufacturer, producer, or importer of such chemical.

"(B) REGISTRATION REQUIREMENT.—Subparagraph (A) shall not apply to any inventory exchange unless—

"(i) both parties are registered with the Secretary as manufacturers, producers, or importers of taxable chemicals, and

"(ii) the person receiving the taxable chemical has, at such time as the Secretary may prescribe, notified the manufacturer, producer, or importer of such person's registration number and the internal revenue district in which such person is registered.

"(C) INVENTORY EXCHANGE.—For purposes of this paragraph, the term 'inventory exchange' means any exchange in which 2 persons exchange property which is, in the hands of each person, property described in section 1221(1)."

(h) EFFECTIVE DATES.—

(1) IN GENERAL.—Except as otherwise provided in this subsection, the amendments made by this section shall take effect on November 1, 1985.

(2) REPEAL OF TAX ON XYLENE FOR PERIODS BEFORE OCTOBER 1, 1985.—

(A) REFUND OF TAX PREVIOUSLY IMPOSED.—In the case of any tax imposed by section 4661 of the Internal Revenue Code of 1954 on the sale or use of xylene before October 1, 1985, such tax (including interest, additions to tax, and additional amounts) shall not be assessed, and if assessed, the assessment shall be abated, and if collected shall be credited or refunded (with interest) as an overpayment.

(B) WAIVER OF STATUTE OF LIMITATIONS.—If on the date of the enactment of this Act (or at any time within 1 year after such date of enactment) refund or credit of any overpayment of tax resulting from the application of subparagraph (A) is barred by any law or rule of law, refund or credit of such overpayment shall, nevertheless, be made or allowed if claim therefor is filed before the date 1 year after the date of the enactment of this Act.

(C) XYLENE TO INCLUDE ISOMERS.—For purposes of this paragraph, the term "xylene" shall include any isomer of xylene whether or not separated.

(3) INVENTORY EXCHANGES.—

(A) IN GENERAL.—Except as otherwise provided in this paragraph, the amendment made by subsection (g) shall apply as if included in the amendments made by section 211 of the Hazardous Substance Response Revenue Act of 1980.

(B) RECIPIENT MUST AGREE TO TREATMENT AS MANUFACTURER.—In the case of any inventory exchange before January 1, 1986, the amendment made by subsection (g) shall apply only if the person receiving the chemical from the manufacturer, producer, or importer in the exchange agrees to be treated as the manufacturer, producer, or importer of such chemical for purposes of subchapter B of chapter 38 of the Internal Revenue Code of 1954.

(C) EXCEPTION WHERE MANUFACTURER PAID TAX.—In the case of any inventory exchange before January 1, 1986, the amendment made by subsection (g) shall not apply if the manufacturer, producer, or importer treated such exchange as a sale for purposes of section 4661 of such Code and paid the tax imposed by such section.

(D) REGISTRATION REQUIREMENTS.—Section 4662(c)(2)(B) of such Code (as added by subsection (g)) shall apply to exchanges made after December 31, 1985.

SEC. 414. REPEAL OF POST-CLOSURE TAX AND TRUST FUND.

(a) REPEAL OF TAX.—

(1) Subchapter C of chapter 38 of the Internal Revenue Code of 1954 (relating to tax on hazardous wastes) is hereby repealed.

(2) The table of subchapters for such chapter 38 is amended by striking out the item relating to subchapter C.

(b) REPEAL OF TRUST FUND.—Section 232 of the Hazardous Substance Response Revenue Act of 1980 is hereby repealed.

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on October 1, 1983.

SEC. 415. WASTE MANAGEMENT TAX.

(a) GENERAL RULE.—Chapter 38 of the Internal Revenue Code of 1954 (as amended by section 414 of this Act) is amended by adding after subchapter B the following new subchapter:

"Subchapter C—Hazardous Waste Management Tax

"Sec. 4671. Waste management tax.
"Sec. 4672. Exemptions; reduction of tax where prior taxable event.
"Sec. 4673. Special rules for waste water treatment, incineration, etc.
"Sec. 4674. Backup tax on generator.
"Sec. 4675. Definitions and special rules.

SEC. 4671. WASTE MANAGEMENT TAX.

"(a) IMPOSITION OF TAX.—There is hereby imposed a tax on—

"(1) the receipt of hazardous waste at a qualified hazardous waste management unit,

"(2) the receipt of hazardous waste for transport from the United States for the purpose of ocean disposal, and

"(3) the exportation of hazardous waste from the United States.

"(b) AMOUNT OF TAX.—

"(1) IN GENERAL.—The amount of the tax imposed by subsection (a) with respect to each ton of hazardous waste shall be determined in accordance with the following table:

	If the taxable event is:	
	Land Disposal	Any Other Taxable Event
"For calendar year:	The tax per ton is:	
1986	$37.00	$4.15
1987	39.00	4.15
1988	42.00	4.15
1989	44.00	4.15
1990	47.00	4.15

"(2) DEFINITIONS RELATING TO AMOUNT OF TAX.—For definition of—

"(A) hazardous waste, see section 4675(a)(1), and

"(B) land disposal and any other taxable event, see section 4675(a)(5).

"(c) LIABILITY FOR TAX.—

"(1) WASTE RECEIVED AT MANAGEMENT UNITS.—The tax imposed by subsection (a)(1) shall be paid by the owner or operator of the qualified hazardous waste management unit.

"(2) WASTE RECEIVED FOR TRANSPORT FROM THE UNITED STATES.—The tax imposed by subsection (a)(2) shall be paid by the person holding the permit issued for transport for ocean disposal under section 102 of the Marine Protection, Research, and Sanctuaries Act of 1972.

"(3) WASTE EXPORTED.—The tax imposed by subsection (a)(3) shall be paid by the exporter.

"(d) TERMINATION.—The taxes imposed by this section shall not apply after September 30, 1990.

"SEC. 4672. EXEMPTIONS; REDUCTION OF TAX WHERE PRIOR TAXABLE EVENT.

"(a) EXEMPTION FOR CERTAIN REMOVAL AND REMEDIAL ACTIONS, ETC.—The tax imposed by section 4671 shall not apply to the receipt or export of hazardous waste pursuant to—

"(1) a corrective action specified in—

"(A) an initial or final order, or

"(B) a proposed or final permit.

issued by the Administrator under the Solid Waste Disposal Act or a State under a hazardous waste program authorized under section 3006 of such Act,

"(2) a proposed or final closure plan approved by the Administrator or such a State,

"(3) a removal or remedial action under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 which has been selected or approved by the Administrator, or

"(4) an action to correct an emergency situation arising from a product spill which is certified by the Administrator to the Secretary as carrying out the purposes of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980.

"(b) EXEMPTION FOR WASTE RECEIVED AT ANY FEDERAL FACILITY.—The tax imposed by section 4671 shall not apply to any hazardous waste received at any facility owned by the United States.

"(3) REDUCTION IN TAX WHERE PRIOR TAXABLE EVENT—.

"(1) IN GENERAL.—If—

"(A) tax under section 4671 or 4674 was paid with respect to any hazardous waste, and

"(B) tax under section 4671 is subsequently imposed on such waste (hereinafters in this subsection referred to as the 'later taxable event'),

then the tax under section 4671 on the later taxable event shall be reduced by the amount determined under paragraph (2).

"(2) AMOUNT OF REDUCTION.—The amount of the reduction determined under this paragraph is the product of—

"(A) the weight of hazardous waste involved in the later taxable event, multiplied by

"(B) the lesser of—

"(i) the highest rate of tax paid under section 4671 or 4674 with respect to any prior taxable event involving such waste (determined without regard to this subsection), or

"(ii) the rate of tax imposed by section 4671 with respect to the later taxable event (as so determined).

"SEC. 4673. SPECIAL RULES FOR WASTE WATER TREATMENT, INCINERATION, ETC.

"(a) EXEMPTION FOR WASTE RECEIVED AT CERTAIN WASTE WATER TREATMENT UNITS.—The tax imposed by section 4671 shall not apply to hazardous waste received at any waste water treatment unit.

"(b) INCINERATION, ETC. WITHIN 90 DAYS OF RECEIPT.—

"(1) In GENERAL.—Under regulations prescribed by the Secretary, if—

"(A) tax under section 4671 was paid with respect to the receipt of any hazardous waste at any qualified hazardous waste management unit or for transport described in section 4671(a)(2), and

"(B) such waste is incinerated on land (or the equivalent of incineration on land) by any person within 90 days after the date of the first receipt referred to in subparagraph (A),

then the tax so paid shall be allowed as a credit or refund (without interest) to such person in the same manner as if it were an overpayment of tax imposed by section 4671.

"(2) EQUIVALENT OF INCINERATION.—For purposes of subparagraph (A), a method, technique, or process shall be treated as the equivalent of incineration on land if—

"(A) such method, technique, or process meets detailed performance standards established by the Environmental Protection Agency, and

"(B) such standards require a destruction and removal efficiency for the hazardous waste involved at least equivalent to the destruction and removal efficiency applicable to incineration on land.

"(c) QUALIFIED CHEMICAL FUELS OR SOLVENTS.—

"(1) In GENERAL.—Under regulations prescribed by the Secretary, if—

"(A) tax under section 4671 was paid with respect to any hazardous waste,

"(B) such waste is used by any person in the production of any qualified chemical fuel or solvent, and

"(C) such fuel or solvent is by such person sold for use or used in any industrial or commercial use,

then the tax so paid shall be allowed as a credit or refund (without interest) to such person in the same manner as if it were an overpayment of tax imposed by section 4671.

"(2) QUALIFIED CHEMICAL FUEL OR SOLVENT.—For purposes of subparagraph (A), the term 'qualified chemical fuel or solvent' means any chemical or solvent which is determined by the Administrator as not being a hazardous waste.

"(d) RECYCLING OF BATTERIES.—Under regulations prescribed by the Secretary, if—

"(1) tax under section 4671 was paid with respect to the receipt of any battery at a qualified hazardous waste management unit, and

"(2) the recycling of such battery begins at such a unit by any person within 90 days after the date of the first receipt of such battery at any qualified hazardous waste management unit,

then the tax so paid shall be allowed as a credit or refund (without interest) to such person in the same manner as if it were an overpayment of tax imposed by section 4671.

"(e) TAX TO APPLY WHILE CORRECTIVE ACTION NOT COMPLETED.—

"(1) IN GENERAL.—The exemption provided by subsection (a) shall not apply (and no credit or refund shall be allowed under this section) with respect to any activity conducted at a facility (or part thereof) during the period that required corrective action remains uncompleted with respect to such facility (or part).

"(2) REQUIRED CORRECTIVE ACTION.—For purposes of paragraph (1), required corrective action shall be treated as uncompleted during the period—

"(A) beginning on the date that the corrective action is required by the Administrator or an authorized State pursuant to a final permit under section 3005 of the Solid Waste Disposal Act or a final order under section 3004 or 3008 of such Act, and

"(B) ending on the date the Administrator or such State (as the case may be) certifies to the Secretary that such corrective action has been completed.

"(3) RATE OF TAX WITH RESPECT TO WASTE WATER TREATMENT.—The rate of tax imposed by section 4671 by reason of this subsection with respect to hazardous waste received at

any waste water treatment unit shall be 15 cents per ton.

"SEC. 4674. BACKUP TAX ON GENERATOR.

"(a) IMPOSITON OF TAX.—There is hereby imposed a tax on each ton of hazardous waste which, as of the close of the 270-day period beginning on the day after the day on which such waste was generated, has not been—

"(1) received at a qualified hazardous waste management unit,

"(2) received for transport from the United States for the purpose of ocean disposal, or

"(3) exported from the United States.

"(b) RATE OF TAX.—The rate of the tax imposed by subsection (a) shall be the rate of tax applicable to land disposal under section 4671 at the end of the 270-day period described in subsection (a).

"(c) LIABILITY FOR TAX.—The tax imposed by subsection (a) shall be paid by the generator of the hazardous waste.

"(d) EXEMPTIONS.—

"(1) SMALL GENERATORS.—The tax imposed by subsection (a) shall not apply to hazardous waste generated during any month if the generator of such waste does not generate more than 100 kilograms of hazardous waste during such month.

"(2) WASTE LEGALLY DISPOSED OF IN PUBLICLY OWNED TREATMENT WORKS.—The tax imposed by subsection (a) shall not apply to hazardous waste disposed of in any publicly owned treatment works if the disposal of such waste is not in violation of Federal, State, or local law.

"(3) OTHER EXEMPTIONS TO APPLY.—The exemptions provided by subsections (a) and (b) of section 4672 shall apply to the tax imposed by subsection (a).

"(4) EXEMPTIONS UNDER REGULATIONS; APPLICATION OF LOWER RATE.—The Secretary may prescribe regulations which provide exemptions from the tax imposed by subsection (a) (or the application of a lower rate) which are not inconsistent with the purposes of this section.

"(e) GENERATOR.—For purposes of this section, the term 'generator' means the person whose act or process produces the hazardous waste.

"(f) TERMINATION.—No tax shall be imposed by this section on waste generated after September 30, 1990.

"SEC. 4675. DEFINITIONS AND SPECIAL RULES.

"(a) DEFINITIONS.—For purposes of this subchapter—

"(1) HAZARDOUS WASTE.—The term 'hazardous waste' means any waste which is listed or identified as of the date of the enactment of the Superfund Revenue Act of 1985 under section 3001 of the Solid Waste Disposal Act. Rainwater shall not be treated as hazardous waste unless mixed with hazardous waste (as defined in the preceding sentence).

"(2) QUALIFIED HAZARDOUS WASTE MANAGEMENT UNIT.—The term 'qualified hazardous waste management unit' means the specified area of land or structure—

"(A) which isolates the hazardous wastes within a qualified hazardous waste facility, and

"(B) which is subject to the requirements for obtaining interim status or a final permit under subtitle C of the Solid Waste Disposal Act.

"(3) QUALIFIED HAZARDOUS WASTE MANAGEMENT FACILITY.—The term 'qualified hazardous waste management facility' means any facility, as defined under substitle C of the Solid Waste Disposal Act, which has received a permit or is accorded interim status under—

"(A) section 3005 of the Solid Waste Disposal Act, or

"(B) a State program authorized under section 3006 of such Act.

"(4) OCEAN DISPOSAL.—The term 'ocean disposal' means the incineration or dumping of hazardous waste over or into ocean waters or the waters described in section 101(b) of the Marine Protection, Research, and Sanctuaries Act of 1972, pursuant to section 102 of such Act.

"(5) DEFINITIONS RELATING TO AMOUNT OF TAX.—

"(A) LAND DISPOSAL.—The term 'land disposal' means a taxable event described in section 4671(a)(1) with respect to a qualified hazardous waste management unit which is a landfill, surface impoundment, waste pile, or land treatment unit.

"(B) LANDFILL, ETC.—For purposes of subparagraph (A), the terms 'landfill', 'surface impoundment', 'waste pile' and 'land treatment unit' have the respective meanings given such terms in regulations prescribed by the Administrator pursuant to sections 3004 and 3005 of the Solid Waste Disposal Act.

"(C) OTHER TAXABLE EVENT.—The term 'and other taxable event' means—

"(i) a taxable event described in section 4671(a)(1) which is not land disposal, and

"(ii) a taxable event described in paragraph (2) or (3) of section 4671(a).

"(6) WASTE WATER TREATMENT UNIT.—The term 'waste water treatment unit' means any qualified hazardous waste management unit which is an integral and necessary part of a treatment system—

"(A) for which a permit is required under section 402 of the Clean Water Act,

"(B) which is subject to pretreatment standards under subsection (b) or (c) of section 307 of the Clean Water Act, or

"(C) which is a zero discharge treatment system—

"(i) which, if the system discharged into navigable waters, would comply with effluent limitation guidelines prescribed under paragraph (2) or (4) of section 304(b) of the Clean Water Act,

"(ii) which, if the system discharged into a publicly owned treatment works, would comply with the pretreatment standards described in subparagraph (B), or

"(iii) if no such guidelines or standards have been prescribed, which employs biological treatment.

The term 'waste water treatment unit' shall not include any qualified hazardous waste management unit which receives for storage or final disposition concentrated treatment residues resulting from wastewater treatment.

"(7) ADMINISTRATOR.—The term 'Administrator' means the Administrator of the Environmental Protection Agency.

"(8) UNITED STATES.—The term 'United States' has the meaning given such term by section 4612(a)(4).

"(9) TON.—The term 'ton' means 2,000 pounds.

"(10) FRACTIONAL PART OF TON.—In the case of a fraction of a ton, the tax imposed by this subchapter shall be the same fraction of the amount of such tax imposed on a whole ton.

"(b) TREATMENT OF CONTAINERS, ETC. WHICH ARE RELATED TO INJECTION UNITS.—For purposes of this subchapter—

"(1) any container, tank, or surface impoundment which, with respect to any hazardous waste, is used to treat or store such waste before underground injection of such waste (whether or not the waste when injected is hazardous waste) into an injection well, and

"(2) the injection well into which such waste is injected.

shall be treated as a single hazardous waste management unit.

"(c) DISPOSITION OF REVENUES FROM PUERTO RICO AND THE VIRGIN ISLANDS.—The provisions of subsection (a)(3) and (b)(3) of section 7652 shall not apply to any tax imposed by this subchapter."

(b) INFORMATION REPORTING REQUIREMENT.—

(1) IN GENERAL.—Subpart A of part III of subchapter A of chapter 61 of such Code is amended by inserting after section 6039D the following new section:

"SEC. 6039E. INFORMATION WITH RESPECT TO MANAGEMENT TAX ON HAZARDOUS WASTE.

"Each person on whom a tax is imposed under subchapter C of chapter 38 shall (at such time and in such manner as the Secretary may require) submit to the Secretary such information as the Secretary may require, including information which such person is required to provide the Administrator of the Environmental Protection Agency under the Solid Waste Disposal Act. To the extent provided in regulations prescribed by the Secretary, the preceding sentence shall also apply to persons not described therein with respect to information which the Secretary determines is necessary or appropriate to the administration of such subchapter."

(2) PENALTY.—Subchapter B of chapter 68 of such Code (relating to assessable penalties) is amended by redesignating section 6708 (relating to mortgage credit certificates) as section 6709 and by adding to the end thereof the following new section:

"SEC. 6710. FAILURE TO PROVIDE INFORMATION WITH RESPECT TO MANAGEMENT TAX ON HAZARDOUS WASTE.

"(a) IN GENERAL.—Any person who fails to meet any requirement imposed by section 6039E shall pay a penalty of $100 for each day during which such failure continues, unless it is shown that such failure is due to reasonable cause and not due to willful neglect. The maximum penalty imposed under this subsection with respect to any failure shall not exceed $50,000.

"(b) PENALTY IN ADDITION TO OTHER PENALTIES.—The penalty imposed by this section shall be in addition to any other penalty provided by law."

(3) CONFORMING AMENDMENTS.—

(A) The table of sections for subpart A of part III of subchapter A of chapter 61 of such Code is amended by inserting after the item relating to section 6039D the following new item:

"Sec. 6039E. Information with respect to management tax on hazardous waste."

(B) The table of sections for subchapter B of chapter 68 of such Code is amended by redesignating the item relating to mortgage credit certificates as section 6709 and by adding at the end thereof the following new item:

"Sec. 6710. Failure to provide information with respect to management tax on hazardous waste."

(c) PENALTY FOR NEGLIGENCE TO APPLY TO ENVIRONMENTAL TAXES.—Section 6653 of such Code (relating to failure to pay tax) is

amended by adding at the end thereof the following new subsection:

"(i) NEGLIGENCE PENALTY TO APPLY TO ENVIRONMENTAL TAXES.—For purposes of applying paragraphs (1) and (2) of subsection (a), paragraph (1) of subsection (a) shall be treated as including a reference to underpayments (as defined in subsection (c)) of tax imposed by chapter 38 (relating to environmental taxes)."

(d) CLERICAL AMENDMENT.—The table of subchapters for chapter 38 of such Code is amended by adding after the item relating to subchapter B the following new item:

"Subchapter C. Hazardous waste management tax."

(e) EFFECTIVE DATES.—

(1) IN GENERAL.—The amendments made by this section shall take effect on January 1, 1986.

(2) BACKUP TAX ON GENERATOR.—Section 4674 of the Internal Revenue Code of 1954 (relating to backup tax on generator), as added by this section, shall apply to waste generated after December 31, 1986.

SEC. 416. TAX ON CERTAIN IMPORTED SUBSTANCES DERIVED FROM TAXABLE CHEMICALS.

(a) GENERAL RULE.—Chapter 38 of the Internal Revenue Code of 1954 is amended by adding after subchapter C the following new subchapter:

"Subchapter D—Tax on Certain Imported Substances

"Sec. 4677. Imposition of tax.

"Sec. 4678. Definitions and special rules.

"SEC. 4677. IMPOSITION OF TAX.

"(a) GENERAL RULE.—There is hereby imposed a tax on any taxable substance sold or used by the importer thereof.

"(b) AMOUNT OF TAX.—

"(1) IN GENERAL.—Except as provided in paragraph (2), the amount of the tax imposed by subsection (a) with respect to any taxable substance shall be the amount of the tax which would have been imposed by section 4661 on the taxable chemicals or petroleum used as materials or process fuel in the manufacture or production of such substance if such taxable chemicals or petroleum had been sold in the United States for use in the manufacture or production of such taxable substance.

"(2) RATE WHERE IMPORTER DOES NOT FURNISH INFORMATION TO SECRETARY.—If the importer does not furnish to the Secretary (at such time and in such manner as the Secretary shall prescribe) sufficient information to determine under paragraph (1) the amount of the tax imposed by subsection (a) on any taxable substance, the amount of the tax imposed on such taxable substance shall be 5 percent of the appraised value of such substance as of the time such substance was entered into the United States for consumption, use, or warehousing.

"(c) EXEMPTIONS FOR SUBSTANCES TAXES UNDER SECTIONS 4611 AND 4661.—No tax shall be imposed by this section on the sale or use of any substance if tax is imposed on such sale or use under section 4611 or 4661.

"(d) TERMINATION.—The taxes imposed by this section shall not apply after September 30, 1990.

"SEC. 4678. DEFINITIONS AND SPECIAL RULES.

"(a) TAXABLE SUBSTANCE.—For purposes of this subchapter—

"(1) IN GENERAL.—The term 'taxable substance' means any substance which, at the time of sale or use by the importer, is listed as a taxable substance by the Secretary for purposes of this subchapter.

"(2) DETERMINATION OF SUBSTANCES ON LIST.—A substance shall be listed under paragraph (1) if—

"(A) The substance is contained in the list under paragraph (3), or

"(B) the Secretary determines, in consultation with the Administrator of the Environmental Protection Agency and the Commissioner of Customs, that such substance generally has more than 50 percent of its value derived (as materials or as process fuel) from taxable chemicals or petroleum (determined on the basis of the predominant method of production).

"(3) INITIAL LIST OF TAXABLE SUBSTANCES.—

Cumene
Styrene
Ammonium nitrate
Nickel oxide
Isopropyl alcohol
Ethylene glycol
Vinyl chloride
Polyethylene resins, total
Polybutadiene
Styrene-butadiene, latex
Styrene-butadiene, snpf
Synthetic rubber, not containing fillers
Urea,
Ferronickel
Ferrochromium nov 3 pct
Ferrochrome ov 3 pct carbon
Unwrought nickel
Nickel waste and scrap
Wrought nickel rods and wire
Nickel powders
Phenolic resins
Polyvinylchloride resins
Polystyrene resins and copolymers
Ethyl alcohol for nonbeverage use
Methylene chloride
Polypropylene
Propylene glycol
Formaldehyde
Acetone
Propylene oxide
Polypropylene resins
Ethylene oxide
Ethylene dichloride
Cyclohexane
Isophthalic acid
Maleic anhydride
Phthalic anhydride
Ethyl methyl ketone
Chloroform
Carbon tetrachloride
Chromic acid
Hydrogen peroxide
Polystyrene homopolymer resins
Melamine
Acrylic and methacrylic acid resins
Vinyl resins
Vinyl resins, NSPF.

"(4) MODIFICATIONS TO LIST.—The Secretary may add or remove substances from the list under paragraph (2) (including items listed by reason of paragraph (3)) as necessary to carry cut the purposes of this subchapter.

"(b) OTHER DEFINITIONS.—For purposes of this subchapter—

"(1) IMPORTER.—The term "importer" means the person entering the taxable substance for consumption, use, or warehousing.

"(2) TAXABLE CHEMICALS; UNITED STATES.—The terms 'taxable chemical' and 'United States' have the respective meanings given such terms by section 4662(a).

"(c) DISPOSITION OF REVENUES FROM PUERTO RICO AND THE VIRGIN ISLANDS.—The provisions of subsections (a)(3) and (b)(3) of section 7652 shall not apply to any tax imposed by section 4677."

(b) CLERICAL AMENDMENT.—The table of subchapters for chapter 38 of such Code is amended by adding after the item relating to subchapter C the following new item:

"Subchapter D. Tax on certain imported substances."

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on January 1, 1987.

SEC. 417. HAZARDOUS SUBSTANCE SUPERFUND.

(a) IN GENERAL.—Subchapter A of chapter 98 of the Internal Revenue Code of 1954 (relating to establishment of trust funds) is amended by adding after section 9504 the following new section:

"SEC. 9505. HAZARDOUS SUBSTANCE SUPERFUND.

"(a) CREATION OF TRUST FUND.—There is established in the Treasury of the United States a trust fund to be known as the 'Hazardous Substance Superfund' (hereinafter in this section referred to as the 'Superfund'), consisting of such amounts as may be—

"(1) appropriated to the Superfund as provided in this section,

"(2) appropriated to the Superfund pursuant to section 418(b) of the Superfund Revenue Act of 1985, or

"(3) credited to the Superfund as provided in section 9602(b).

"(b) TRANSFERS TO SUPERFUND.—There are hereby appropriated to the Superfund amounts equivalent to—

"(1) the taxes received in the Treasury under section 4611, 4661, 4671, 4674, or 4677 (relating to environmental taxes),

"(2) amounts recovered on behalf of the Superfund under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (hereinafter in this section referred to as 'CERCLA'),

"(3) all moneys recovered or collected under section 311(b)(6)(B) of the Clean Water Act,

"(4) penalties assessed under title I of CERCLA, and

"(5) punitive damages under section 107(c)(3) of CERCLA.

"(c) EXPENDITURES FROM SUPERFUND.—

"(1) IN GENERAL.—Amounts in the Superfund shall be available, as provided in appropriation Acts, only for purposes of making expenditures—

"(A) to carry out the purposes of paragraphs (1), (2), (4), and (5) of section 111(a) of CERCLA as in effect on the date of the enactment of the Superfund Amendments of 1985, or

"(B) hereafter authorized by a law which authorizes the expenditure out of the Superfund for a general purpose covered by paragraphs (1), (2), (4), and (5) of such section 111(a) (as so in effect).

"(2) EXCEPTION FOR CERTAIN TRANSFERS, ETC., OF HAZARDOUS SUBSTANCES.—Amounts in the Superfund shall not be available for any transfer or disposal which could not be made but for section 121(i) of CERCLA as in effect on the date of the enactment of the Superfund Amendments of 1985.

"(d) AUTHORITY TO BORROW.—

"(1) IN GENERAL.—There are authorized to be appropriated to the Superfund, as repayable advances, such sums as may be necessary to carry out the purposes of the Superfund.

"(2) REPAYMENT OF ADVANCES.—

"(A) IN GENERAL.—Advances made pursuant to this subsection shall be repaid, and interest on such advances shall be paid, to the general fund of the Treasury when the Secretary determines that moneys are available for such purposes in the Superfund.

"(B) FINAL REPAYMENT.—No advance shall be made to the Superfund after September

30, 1990, and all advances to such Fund shall be repaid on or before such date.

"(C) RATE OF INTEREST.—Interest on advances made pursuant to this subsection shall be at a rate determined by the Secretary of the Treasury (as of the close of the calendar month preceding the month in which the advance is made) to be equal to the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the anticipated period during which the advance will be outstanding and shall be compounded annually.

"(e) LIABILITY OF UNITED STATES LIMITED TO AMOUNT IN TRUST FUND.—

"(1) GENERAL RULE.—Any claim filed against the Superfund may be paid only out of the Superfund.

"(2) COORDINATION WITH OTHER PROVISIONS.—Nothing in CERCLA or the Superfund Amendments of 1985 (or in any amendment made by either of such Acts) shall authorize the payment by the United States Government of any amount with respect to any such claim out of any source other than the Superfund.

"(3) ORDER IN WHICH UNPAID CLAIMS ARE TO BE PAID.—If at any time the Superfund has insufficient funds to pay all of the claims payable out of the Superfund at such time, such claims shall, to the extent permitted under paragraph (1), be paid in full in the order in which they were finally determined."

(b) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, to the Hazardous Substance Superfund for fiscal year—

(1) 1986, $316,600,000,
(2) 1987, $316,600,000,
(3) 1988, $316,600,000,
(4) 1989, $316,600,000, and
(5) 1990, $316,600,000,

plus for each fiscal year an amount equal to so much of the aggregate amount authorized to be appropriated under this subsection (and paragraph (2) of section 221(b) of the Hazardous Substance Response Act of 1980, as in effect before its repeal) as has not been appropriated before the beginning of the fiscal year involved.

(c) CONFORMING AMENDMENTS. —

(1) Subtitle B of the Hazardous Substance Response Revenue Act of 1980 (relating to establishment of Hazardous Substance Response Trust Fund) is hereby repealed.

(2) Paragraph (11) of section 101 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 is amended to read as follows:

"(11) 'Fund' or 'Trust Fund' means the Hazardous Substance Superfund established by section 9505 of the Internal Revenue Code of 1954;".

(d) CLERICAL AMENDMENT.—The table of sections for subchapter A of chapter 98 of such Code is amended by adding after the item relating to section 9504 the following new item:

"Sec. 9505. Hazardous Substance Superfund."

(e) EFFECTIVE DATE. —

(1) IN GENERAL. —The amendments made by this section shall take effect on November 1, 1985.

(2) SUPERFUND TREATED AS CONTINUATION OF OLD TRUST FUND. —The Hazardous Substance Superfund established by the amendments made by this section shall be treated for all purposes of law as a continuation of the Hazardous Substance Response Trust Fund established by section 221 of the Hazardous Substance Response Revenue Act of 1980. Any reference in any law to the Hazardous Substance Response Trust Fund established by such section 221 shall be deemed to include (wherever appropriate) a reference to the Hazardous Substance Superfund established by the amendments made by this section.

PART II—LEAKING UNDERGROUND STORAGE TANK TRUST FUND AND ITS REVENUE SOURCES

SEC. 421. ADDITIONAL TAX ON GASOLINE, DIESEL FUEL, AND SPECIAL MOTOR FUELS.

(a) GENERAL RULE. —

(1) GASOLINE. —Section 4081 of the Internal Revenue Code of 1954 (relating to the imposition of tax on gasoline) is amended by striking out subsections (a) and (b) and inserting in lieu thereof the following:

"(a) TAX TO FUND HIGHWAY PROGRAM.—

"(1) IN GENERAL.—There is hereby imposed on gasoline sold by the producer or importer thereof, or by any producer of gasoline, a tax of 9 cents a gallon.

"(2) TERMINATION.—On and after October 1, 1988, the tax imposed by paragraph (1) shall not apply.

"(b) ADDITIONAL TAX TO FUND LEAKING UNDERGROUND STORAGE TANK TRUST FUND.—

"(1) IN GENERAL.—In addition to the tax imposed by subsection (a), there is hereby imposed on gasoline sold by the producer or importer thereof, or by any producer of gasoline, a tax of 0.2 cents a gallon.

"(2) TERMINATION.—

"(A) IN GENERAL.—The tax imposed by paragraph (1) shall not apply after the earlier of—

"(i) September 30, 1990, or

"(ii) the last day of the termination month.

"(B) TERMINATION MONTH.—For purposes of subparagraph (A), the termination month is the 1st month as of the close of which the Secretary estimates that the net revenues from the taxes imposed by paragraph (1) and section 4041(d) are at least $850,000,000.

"(C) NET REVENUES.—For purposes of subparagraph (B), the term net 'revenue' means the excess of gross revenues over amounts payable by reason of section 9506(c)(2) (relating to transfer from Leaking Underground Storage Tank Trust Fund for certain repayments and credits)."

(2) DIESEL AND SPECIAL MOTOR FUELS.—Section 4041 of such Code (relating to tax on special fuels) is amended by redesignating subsection (d) as subsection (e) and by inserting after subsection (c) the following new subsection:

"(d) ADDITIONAL TAX ON DIESEL FUEL AND SPECIAL MOTOR FUELS TO FUND LEAKING UNDERGROUND STORAGE TANK TRUST FUND.—

"(1) DIESEL FUEL.—In addition to the taxes imposed by subsection (a), there is hereby imposed a tax of 0.2 cents a gallon on any liquid (other than a product taxable under section 4081)—

"(A) sold by any person to an owner, lessee, or other operator of a diesel-powered highway vehicle for use as a fuel in such vehicle, or

"(B) used by any person as a fuel in a diesel-powered highway vehicle unless there was a taxable sale of such liquid under subparagraph (A).

"(2) SPECIAL MOTOR FUELS.—In addition to the taxes imposed by subsection (a), there is hereby imposed a tax of 0.2 cents a gallon on benzol, benzene, naphtha, liquefied petroleum gas, casing head and natural gasoline, or any other liquid (other than kerosene, gas oil, or fuel oil, or any product taxable under section 4081 or paragraph (1) of this subsection)—

"(A) sold by any person to an owner, lessee, or other operator of a motor vehicle or motorboat for use as a fuel in such motor vehicle or motorboat, or

"(B) used by any person as a fuel in a motor vehicle or motorboat unless there was a taxable sale of such liquid under subparagraph (A).

"(3) TERMINATION.—The taxes imposed by this subsection shall not apply during any period during which no tax is imposed by section 4081(b)."

(b) ADDITIONAL TAXES NOT TRANSFERRED TO HIGHWAY TRUST FUND OR AIRPORT AND AIRWAY TRUST FUND.—

(1) HIGHWAY TRUST FUND.—

(A) IN GENERAL.—Subsection (b) of section 9503 of such Code (relating to transfer to Highway Trust Fund of amounts equivalent to certain taxes) is amended by adding at the end thereof the following new paragraph:

"(4) CERTAIN ADDITIONAL TAXES NOT TRANSFERRED TO HIGHWAY TRUST FUND.—For purposes of paragraphs (1) and (2), the taxes imposed by sections 4041(d) and 4081(b) shall not be taken into account."

(B) CONFORMING AMENDMENT.—Subparagraph (D) of section 9503(c)(4) of such Code (defining motorboat fuel taxes) is amended by striking out "section 4081" and inserting in lieu thereof "section 4081(a)".

(2) AIRPORT AND AIRWAY TRUST FUND.—Subsection (b) of section 9502 of such Code (relating to transfer to Airport and Airway Trust Fund of amounts equivalent to certain taxes) is amended—

(A) by striking out "subsections (c) and (d) of section 4041" in paragraph (1) and inserting in lieu thereof "subsections (c) and (e) of section 4041", and

(B) by striking out "section 4081" in paragraph (2) and inserting in lieu thereof "section 4081(a)".

(c) REPAYMENTS FOR GASOLINE USED ON FARMS, ETC.—

(1) GASOLINE USED ON FARMS.—Subsection (h) of section 6420 of such Code (relating to termination) is amended by striking out "This section" and inserting in lieu thereof "Except with respect to taxes imposed by section 4081(b), this section".

(2) GASOLINE USED FOR CERTAIN NONHIGHWAY PURPOSES OR BY LOCAL TRANSIT SYSTEMS.—Subsection (h) of section 6421 of such Code (relating to effective date) is amended by striking out "This section" and inserting in lieu thereof "Except with respect to taxes imposed by section 4081(b), this section".

(3) FUELS USED FOR NONTAXABLE PURPOSES.—

(A) Subsection (m) of section 6427 of such Code (relating to termination) is amended by striking out "Subsections" and inserting in lieu thereof "Except with respect to taxes imposed by sections 4041(d) and 4081(b), subsections".

(B) Section 6427 of such Code is amended by redesignating subsection (n) as subsection (o) and by inserting after subsection (m) the following new subsection:

"(n) PAYMENTS FOR TAXES IMPOSED BY SECTION 4041(d).—For purposes of subsections (a), (b), and (c), the taxes imposed by section 4041(d) shall be treated as imposed by section 4041(a)."

(C) Paragraph (1) of section 6427(f) of such Code (relating to gasoline used to produce certain alcohol fuels) is amended by striking out "section 4081" and inserting in lieu thereof "section 4081(a)".

(d) CONTINUATION OF CERTAIN EXEMPTIONS FROM ADDITIONAL TAXES.—

(1) Subsection (b) of section 4041 of such Code (relating to exemption for off-highway business use; exemption for qualified methanol and ethanol fuel) is amended by adding at the end thereof the following new paragraph:

"(3) COORDINATION WITH TAXES IMPOSED BY SUBSECTION (d).—

"(A) IN GENERAL.—Except as provided in subparagraph (B), rules similar to the rules of paragraphs (1) and (2) shall apply with respect to the taxes imposed by subsection (d).

"(B) TERMINATION NOT TO APPLY.—Subparagraph (C) of paragraph (2) shall not apply with respect to the taxes imposed by subsection (d)."

(2) Paragraph (3) of section 4041(f) of such Code (relating to exemption for farm use) is amended by striking out "On and after" and inserting in lieu thereof "Except with respect to the taxes imposed by subsection (d), on and after".

(3) The last sentence of section 4041(g) of such Code (relating to other exemptions) is amended by striking out "Paragraphs" and inserting in lieu thereof "Except with respect to the taxes imposed by subsection (d), paragraphs".

(4) The last sentence of section 4221(a) of such Code (relating to certain tax-free sales) is amended by striking out "4081" and inserting in lieu thereof "4081(a)".

(e) EFFECTIVE DATE.—The amendments made by this section shall take effect on November 1, 1985.

SEC. 422. LEAKING UNDERGROUND STORAGE TANK TRUST FUND.

(a) IN GENERAL.—Subchapter A of chapter 98 of the Internal Revenue Code 1954 (relating to establishment of trust funds) is amended by adding after section 9505 the following new section:

"SEC. 9506. LEAKING UNDERGROUND STORAGE TANK TRUST FUND.

"(a) CREATION OF TRUST FUND.—There is established in the Treasury of the United States a trust fund to be known as the 'Leaking Underground Storage Tank Trust Fund', consisting of such amounts as may be appropriated or credited to such Trust Fund as provided in this section or section 9602(b).

"(b) TRANSFERS TO TRUST FUND.—There are hereby appropriated to the Leaking Underground Storage Tank Trust Fund amounts equivalent to—

"(1) taxes received in the Treasury under sections 4041(d) and 4081(b) (relating to additional taxes on motor fuels and gasoline), and

"(2) amounts collected under section 9003(h)(3) of the Solid Waste Disposal Act.

"(c) EXPENDITURES.—

"(1) IN GENERAL.—Except as provided in paragraph (2), amounts in the Leaking Underground Storage Tank Trust Fund shall be available, as provided in appropriation Acts, only for purposes of making expenditures to carry out section 9003(h) of the Solid Waste Disposal Act as in effect on the date of the enactment of the Superfund Amendments of 1985.

"(2) TRANSFERS FROM TRUST FUND FOR CERTAIN REPAYMENT AND CREDITS.—

"(A) IN GENERAL.—The Secretary shall pay from time to time from the Leaking Underground Storage Tank Trust Fund into the general fund of the Treasury amounts equivalent to—

"(i) amounts paid under—

"(I) section 6420 (relating to amounts paid in respect of gasoline used on farms),

"(II) section 6421 (relating to amounts paid in respect of gasoline used for certain nonhighway purposes or by local transit systems), and

"(III) section 6427 (relating to fuels not used for taxable purposes), and

"(ii) credits allowed under section 34,

with respect to the taxes imposed by sections 4041(d) and 4081(b).

"(B) TRANSFERS BASED ON ESTIMATES.—Transfers under subparagraph (A) shall be made on the basis of estimates by the Secretary, and proper adjustments shall be made in amounts subsequently transferred to the extent prior estimates were in excess of or less than the amounts required to be transferred.

"(d) LIABILITY OF THE UNITED STATES LIMITED TO AMOUNT IN TRUST FUND.—

"(1) GENERAL RULE.—Any claim filed against the Leaking Underground Storage Tank Trust Fund may be paid only out of such Trust Fund.

"(2) COORDINATION WITH OTHER PROVISIONS.—Nothing in the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 or the Superfund Amendments of 1985 (or in any amendment made by either of such Acts) shall authorize the payment by the United States Government of any amount with respect to any such claim out of any source other than the Leaking Underground Storage Tank Trust Fund.

"(3) ORDER IN WHICH UNPAID CLAIMS ARE TO BE PAID.—If at any time the Leaking Underground Storage Tank Trust Fund has insufficient funds to pay all of the claims out of such Trust Fund at such time, such claims shall, to the extent permitted under paragraph (1), be paid in full in the order in which they were finally determined."

(b) CLERICAL AMENDMENT.—The table of sections for subchapter A of chapter 98 of such Code is amended by adding after the item relating to section 9505 the following new item:

"Sec. 9506. Leaking Underground Storage Tank Trust Fund."

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on November 1, 1985.

PART III—OIL SPILL LIABILITY TRUST FUND AND ITS REVENUE SOURCES

SEC. 431. INCREASE IN ENVIRONMENTAL TAX ON PETROLEUM.

(a) IN GENERAL.—Subsections (a) and (b) of section 4611 of the Internal Revenue Code of 1954 (relating to environmental tax on petroleum), as amended by section 411 of this Act, are each amended by striking out "of 11.9 cents a barrel" and inserting in lieu thereof "at the rate specified in subsection (c)".

(b) INCREASE IN TAX.—Section 4611 of such Code is amended by redesignating subsections (c) and (d) as subsections (d) and (e), respectively, and by inserting after subsection (b) the following new subsection:

"(c) RATE OF TAX.—

"(1) IN GENERAL.—The rate of the taxes imposed by this section is the sum of—

"(A) the Hazardous Substance Superfund financing rate, and

"(B) the Oil Spill Liability Trust Fund financing rate.

"(2) RATES.—For purposes of paragraph (1)—

"(A) the Hazardous Substance Superfund financing rate is 11.9 cents a barrel, and

"(B) the Oil Spill Liability Trust Fund financing rate is 1.3 cents a barrel."

(c) CONFORMING AMENDMENTS.—

(1) Subsection (e) of section 4611 of such Code (relating to application of taxes), as redesignated by subsection (b), is amended to read as follows:

"(e) APPLICATION OF TAXES.—

"(1) SUPERFUND RATE.—The Hazardous Substance Superfund financing rate under subsection (c) shall apply after October 31, 1985, and before October 1, 1990.

"(2) OIL SPILL RATE.—The Oil Spill Liability Trust Fund financing rate under subsection (c) shall apply after December 31, 1985, and before October 1, 1990."

(2) Subsection (d) of section 4661 of such Code (relating to termination of tax on certain chemicals) is amended to read as follows:

"(d) APPLICATION OF TAXES.—The tax imposed by this section shall apply after October 31, 1985, and before October 1, 1990."

(3) Subsection (b) of section 9505 of such Code (relating to transfers to Superfund) is amended by adding at the end thereof the following: "In the case of the tax imposed by section 4611, paragraph (1) shall apply only to so much of such tax as is attributable to the Superfund financing rate under section 4611(c)."

(d) EFFECTIVE DATE.—The amendments made by this section shall take effect on January 1, 1986.

SEC. 432. OIL SPILL LIABILITY TRUST FUND.

(a) IN GENERAL.—Subchapter A of chapter 98 of the Internal Revenue Code of 1954 (relating to establishment of trust funds) is amended by adding after section 9506 the following new section:

"SEC. 9507. OIL SPILL LIABILITY TRUST FUND.

"(a) CREATION OF TRUST FUND.—There is established in the Treasury of the United States a trust fund to be known as the 'Oil Spill Liability Trust Fund', consisting of such amounts as may be appropriated or credited to such Trust Fund as provided in this section or section 9602(b).

"(b) TRANSFERS TO TRUST FUND.—There are hereby appropriated to the Oil Spill Liability Trust Fund amounts equivalent to—

"(1) taxes received in the Treasury under section 4611 (relating to environmental tax on petroleum) to the extent attributable to the Oil Spill Liability Trust Fund financing rate under section 4611(c),

"(2) amounts recovered, collected, or received under title I of the Comprehensive Oil Pollution Liability and Compensation Act,

"(3) amounts remaining on the date of the enactment of this section in the Deep Water Port Liability Fund established by section 18(f) of the Deep Water Port Act of 1974, and

"(4) amounts remaining on the date of the enactment of this section in the Offshore Oil Pollution Compensation Fund established under section 302 of the Outer Continental Shelf Lands Act Amendments of 1978.

"(c) EXPENDITURES.—

"(1) IN GENERAL.—Amounts in the Oil Spill Liability Trust Fund shall be available, as provided in appropriation Acts, only for purposes of making expenditures for—

"(A) the payment of removal costs described in section 101(24)(A) of the Comprehensive Oil Pollution Liability and Compensation Act, as in effect on the date of the enactment of this section,

"(B) the payment of contributions to the International Fund under section 404 of such Act,

"(C) the payment of removal costs for which the Deep Water Port Liability Fund is liable under the Deep Water Port Act of 1974,

"(D) the payment of removal costs for which the Offshore Oil Pollution Compensation Fund is liable under title III of the Outer Continental Shelf Lands Act Amendments of 1978, and

"(E) the payment of all expenses of administration incurred by the Federal Government under the Comprehensive Oil Pollution Liability and Compensation Act.

Under regulations prescribed by the Secretary, amounts shall be available under subparagraph (B) with respect to any contribution to the International Fund only in proportion to the portion of the International Fund used for the payment of response costs.

"(2) LIMITATIONS ON EXPENDITURES.—

"(A) $200,000,000 PER INCIDENT.—The maximum amount which may be paid from the Oil Spill Liability Trust Fund with respect to any single incident shall not exceed $200,000,000.

"(B) $30,000,000 MINIMUM BALANCE.—Except in the case of payments described in paragraph (1)(A), a payment may be made from such Trust Fund only if the amount in such Trust Fund after such payment will not be less than $30,000,000.

"(d) AUTHORITY TO BORROW.—

"(1) IN GENERAL.—There are authorized to be appropriated to the Oil Spill Liability Trust Fund, as repayable advances, such sums as may be necessary to carry out the purposes of such Trust Fund.

"(2) LIMITATION ON AMOUNT OUTSTANDING.—The maximum aggregate amount of repayable advances to the Oil Spill Liability Trust Fund which is outstanding at any one time shall not exceed $300,000,000.

"(3) REPAYMENT OF ADVANCES.—Rules similar to the rules of paragraph (2) of section 9505(d) shall apply for purposes of this subsection.

"(e) LIABILITY OF THE UNITED STATES LIMITED TO AMOUNT IN TRUST FUND.—

"(1) GENERAL RULE.—Any claim filed against the Oil Spill Liability Trust Fund may be paid only out of such Trust Fund.

"(2) COORDINATION WITH OTHER PROVISIONS.—Nothing in the Comprehensive Oil Pollution Liability and Compensation Act or the Superfund Amendments for 1985 (or in any amendment made by either of such Acts) shall authorize the payment by the United States Government of any amount with respect to any such claim out of any source other than the Oil Spill Liability Trust Fund.

"(f) ORDER IN WHICH UNPAID CLAIMS ARE TO BE PAID.—If at any time the Oil Spill Liability Trust Fund has insufficient funds (or is unable by reason of subsection (c)(2)) to pay all of the claims out of such Trust Fund at such time, such claims shall, to the extent permitted under such subsections, be paid in full in the order in which they were finally determined."

(b) CLERICAL AMENDMENT.—The table of sections for subchapter A of chapter 98 of such Code is amended by adding after the item relating to section 9506 the following new item:

"Sec. 9507. Oil Spill Liability Trust Fund."

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on January 1, 1986.

PART IV—STUDIES

SEC. 441. STUDY OF IMPACT OF WASTE MANAGEMENT TAX ON DOMESTIC MANUFACTURERS.

(a) GENERAL RULE.—The Secretary of the Treasury or his delegate shall conduct a study on the effects of the tax imposed by section 4671 of the Internal Revenue Code of 1954 on the ability of domestic manufacturers to compete in international trade.

(b) REPORT.—Not later than July 1, 1986, the Secretary of the Treasury shall submit to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate a report on the study conducted under subsection (a). Such report shall include recommendations to minimize the trade impact of such tax and there shall be considered, in making such recommendations, a waste management tax export credit, an import equalization fee, and a maximum amount of tax with respect to hazardous waste generated by economically distressed industries.

SEC. 442. STUDY OF LEAD POISONING.

(a) IN GENERAL.—The Administrator of the Agency for Toxic Substances and Disease Registry shall, in consultation with the Administrator of the Environmental Protection Agency and other officials as appropriate, not later than March 1, 1986, submit to the Committee on Environment and Public Works, and the Committee on Finance, of the Senate and the Committee on Energy and Commerce, and the Committee on Ways and Means, of the House of Representatives, a report on the nature and extent of lead poisoning in children from environmental sources. Such report shall include, at a minimum, the following information:

(1) an estimate of the total number of children, arrayed according to Standard Metropolitan Statistical Area or other appropriate geographic unit, exposed to environmental sources of lead at concentrations sufficient to cause adverse health effects;

(2) an estimate of the total number of children exposed to environmental sources of lead arrayed according to source or source types;

(3) a statement of the long term consequences for public health of unabated exposures to environmental sources of lead, including (but not limited to) diminution in intelligence and increases in morbidity and mortality; and

(4) methods and alternatives available for reducing exposures of children to environmental sources of lead.

(b) EVALUATION OF SPECIFIC SITES.—Such report shall also score and evaluate specific sites at which children are known to be exposed to environmental sources of lead due to releases, utilizing the Hazard Ranking system of the National Priorities List.

(c) AUTHORIZATION FROM SUPERFUND.—There are authorized to be appropriated from the Hazardous Substance Superfund such sums as may be necessary to prepare and submit the report required by this section.

PART V—COORDINATION WITH OTHER PROVISIONS OF THIS ACT

SEC. 451. COORDINATION.

Notwithstanding any provision of this Act not contained in this title, any provision of this Act (not contained in this title) which—

(1) imposes any tax, premium, or fee,

(2) establishes any trust fund, or

(3) authorizes amounts to be expended from any trust fund which are not also authorized by this title,

shall have no force or effect.

By Mr. DOWNEY:

H.R. 2817

(Amendment to the amendment reported by the Committee on Ways and Means)

—Strike out part II of the proposed amendment and insert in lieu thereof the following:

PART II—LEAKING UNDERGROUND STORAGE TANK TRUST FUND AND ITS REVENUE SOURCES

SEC. 421. ADDITIONAL TAXES ON GASOLINE, DIESEL FUEL, SPECIAL MOTOR FUELS, FUELS USED IN AVIATION, AND FUELS USED IN COMMERCIAL TRANSPORTATION ON INLAND WATERWAYS.

(a) GENERAL RULE.—

(1) GASOLINE.—Section 4081 of the Internal Revenue Code of 1954 (relating to imposition of tax on gasoline) is amended by striking out subsections (a) and (b) and inserting in lieu thereof the following:

"(a) TAX TO FUND HIGHWAY PROGRAMS.—

"(1) IN GENERAL.—There is hereby imposed on gasoline sold by the producer or importer thereof, or by any producer of gasoline, a tax of 9 cents a gallon.

"(2) TERMINATION.—On and after October 1, 1988, the tax imposed by paragraph (1) shall not apply.

"(b) ADDITIONAL TAX TO FUND LEAKING UNDERGROUND STORAGE TANK TRUST FUND.—

"(1) IN GENERAL.—In addition to the tax imposed by subsection (a), there is hereby imposed on gasoline sold by the producer or importer thereof, or by any producer of gasoline, a tax of 0.2 cents a gallon.

"(2) TERMINATION.—

"(A) IN GENERAL.—The tax imposed by paragraph (1) shall not apply after the earlier of—

"(i) September 30, 1990, or

"(ii) the last day of the termination month.

"(B) TERMINATION MONTH.—For purposes of subparagraph (A), the termination month is the 1st month as of the close of which the Secretary estimates that the net revenues from the taxes imposed by paragraph (1) and section 4041(d) are at least $850,000,000.

"(C) NET REVENUES.—For purposes of subparagraph (B), the term 'net revenues' means the excess of gross revenues over amount payable by reason of section 9506(c)(2) (relating to transfer from Leaking Underground Storage Tank Trust Fund for certain repayments and credits)."

(2) DIESEL AND SPECIAL MOTOR FUELS; FUELS USED IN AVIATION.—Section 4041 of such Code (relating to tax on special fuels) is amended by redesignating subsection (d) as subsection (e) and by inserting after subsection (c) the following new subsection:

"(d) ADDITIONAL TAXES TO FUND LEAKING UNDERGROUND STORAGE TANK TRUST FUND.—

"(1) Liquids other than gasoline used in motor vehicles, motorboats, or trains.—In addition to the taxes imposed by subsection (a), there is hereby imposed a tax of 0.2 cents a gallon on benzol, benzene, naphtha, liquefied petroluem gas, casing head and natural gasoline, or any other liquid (other than kerosene, gas oil, or fuel oil, or any product taxable under section 4081)—

"(A) sold by any person to an owner, lessee, or other operator of a motor vehicle, motorboat, or train for use as a fuel in such motor vehicle, motorboat, or train, or

"(B) used by any person as a fuel in a motor vehicle, motorboat, or train unless there was a taxable sale of such liquid under subparagraph (A).

"(2) LIQUIDS USED IN AVIATION.—In addition to the taxes imposed by subsection (c) and section 4081, there is hereby imposed a tax of 0.2 cents a gallon on any liquid—

"(A) sold by any person to an owner, lessee, or other operator of an aircraft for use as a fuel in such aircraft, or

"(B) used by any person as a fuel in an aircraft unless there was a taxable sale of such liquid under subparagraph (A).

The tax imposed by this paragraph shall not apply to any product taxable under section 4081 which is used as a fuel in an aircraft other than in noncommercial aviation.

"(3) Termination.—The taxes imposed by this subsection shall not apply during any period during which no tax is imposed by section 4081(b)."

(3) FUEL USED IN COMMERCIAL TRANSPORTATION ON INLAND WATERWAYS.—Subsection (b) of section 4042 of such Code (relating to amount of tax on fuel used in commercial transportation on inland waterways) is amended to read as follows:

"(b) AMOUNT OF TAX.—

"(1) IN GENERAL.—The rate of the tax imposed by subsection (a) is the sum of—

"(A) the Inland Waterways Trust Fund financing rate, and

"(B) the Leaking Underground Storage Tank Trust Fund financing rate.

"(2) RATES.—For purposes of paragraph (1)—

"(A) the Inland Waterways Trust Fund financing rate is 10 cents a gallon, and

"(B) the Leaking Underground Storage Tank Trust Fund financing rate is 0.2 cents a gallon.

"(3) EXCEPTION FOR FUEL TAXED UNDER SECTION 4041(d).—The Leaking Underground Storage Tank financing rate under paragraph (2)(B) shall not apply to the use of any fuel if tax under section 4041(d) was imposed on the sale of such fuel or is imposed on such use.

"(4) TERMINATION OF LEAKING UNDERGROUND STORAGE TANK TRUST FUND FINANCING RATE.—The Leaking Underground Storage Tank Trust Fund financing rate under paragraph (2)(B) shall not apply during any period during which no tax is imposed by section 4081(b)."

(b) ADDITIONAL TAXES NOT TRANSFERRED TO HIGHWAY TRUST FUND, AIRPORT AND AIRWAY TRUST FUND, AND INLAND WATERWAYS TRUST FUND.—

(1) HIGHWAY TRUST FUND.—

(A) IN GENERAL.—Subsection (b) of section 9503 of such Code (relating to transfer to Highway Trust Fund of amounts equivalent to certain taxes) is amended by adding at the end thereof the following new paragraph:

"(4) CERTAIN ADDITIONAL TAXES NOT TRANSFERRED TO HIGHWAY TRUST FUND.—For purposes of paragraphs (1) and (2), the taxes imposed by sections 4041(d) and 4081(b) shall not be taken into account."

(B) CONFORMING AMENDMENT.—Subparagraph (D) of section 9503(c)(4) of such Code (defining motorboat fuel taxes) is amended by striking out "section 4081" and inserting in lieu thereof "section 4081(a)".

(2) AIRPORT AND AIRWAY TRUST FUND.—Subsection (b) of section 9502 of such Code (relating to transfer to Airport and Airway Trust Fund of amounts equivalent to certain taxes) is amended—

(A) by striking out "subsections (c) and (d) of section 4041" in paragraph (1) and inserting in lieu thereof "subsections (c) and (e) of section 4041", and

(B) by stiking out "section 4081" in paragraph (2) and inserting in lieu thereof "section 4081(a)".

(3) INLAND WATERWAYS TRUST FUND.—Paragraph (1) of section 203(b) of the Inland Waterways Revenue Act of 1978 is amended by adding at the end thereof the following new sentence: "The preceding sentence shall apply only to so much of such taxes as are attributable to the Inland Waterways Trust Fund financing rate under section 4042(b)."

(c) REPAYMENTS FOR GASOLINE USED ON FARMS, ETC.—

(1) GASOLINE USED ON FARMS.—Subsection (h) of section 6420 of such Code (relating to termination) is amended by striking out "This section" and inserting in lieu thereof "Except with respect to taxes imposed by section 4081(b), this section".

(2) GASOLINE USED FOR CERTAIN NONHIGHWAY PURPOSES OR BY LOCAL TRANSIT SYSTEMS.—

(A) TERMINATION NOT TO APPLY TO ADDITIONAL 0.2 CENT TAX.—Subsection (h) of section 6421 of such Code (relating to effective date) is amended by striking out "This section" and inserting in lieu thereof "Except with respect to taxes imposed by section 4081(b), this section".

(B) REPAYMENT OF ADDITIONAL TAX FOR OFF-HIGHWAY BUSINESS USE TO APPLY ONLY TO CERTAIN VESSELS.—Subsection (e) of section 6421 of such Code is amended by adding at the end thereof the following new paragraph:

"(4) SECTION NOT TO APPLY TO CERTAIN OFF-HIGHWAY BUSINESS USES WITH RESPECT TO THE TAX IMPOSED BY SECTION 4081(b).—This section shall not apply with respect to the tax imposed by section 4081(b) on gasoline used in any off-highway business use other than use in a vessel employed in the fisheries or in the whaling business."

(3) FUELS USED FOR NONTAXABLE PURPOSES.—

(A) Subsection (m) of section 6427 of such Code (relating to termination) is amended by striking out "Subsections" and inserting in lieu thereof "Except with respect to taxes imposed by sections 4041(d) and 4081(b), subsections".

(B) Section 6427 of such Code is amended by redesignating subsection (n) as subsection (o) and by inserting after subsection (m) the following new subsection:

"(n) PAYMENTS FOR TAXES IMPOSED BY SECTION 4041(d).—For purposes of subsections (a), (b), and (c), the taxes imposed by section 4041(d) shall be treated as imposed by section 4041(a)."

(C) Paragraph (1) of section 6427(f) of such Code (relating to gasoline used to produce certain alcohol fuels) is amended by striking out "section 4081" and inserting in lieu thereof "section 4081(a)".

(d) CONTINUATION OF CERTAIN EXEMPTIONS FROM ADDITIONAL TAXES.—

(1) Subsection (b) of section 4041 of such Code (relating to exemption for off-highway business use; exemption for qualified methanol and ethanol fuel) is amended by adding at the end thereof the following new paragraph:

"(3) COORDINATION WITH TAXES IMPOSED BY SUBSECTION (d).—

"(A) IN GENERAL.—Except as otherwise provided in this paragraph, rules similar to the rules of paragraphs (1) and (2) shall apply with respect to the taxes imposed by subsection (d).

"(B) LIMITATION ON EXEMPTION FOR OFF-HIGHWAY BUSINESS USE.—For purposes of subparagraph (A), paragraph (1) shall apply only with respect to off-highway business use in a vessel employed in the fisheries or in the whaling business.

"(C) TERMINATION NOT TO APPLY.—Subparagraph (C) of paragraph (2) shall not apply with respect to the taxes imposed by subsection (d)."

(2) Paragraph (3) of section 4041(f) of such Code (relating to exemption for farm use) is amended by striking out "On and after" and inserting in lieu thereof "Except with respect to the taxes imposed by subsection (d), on and after".

(3) The last sentence of section 4041(g) of such Code (relating to other exemptions) is amended by striking out "Paragraphs" and inserting in lieu thereof "Except with respect to the taxes imposed by subsection (d), paragraphs".

(4) The last sentence of section 4221(a) of such Code (relating to certain tax-free sales) is amended by striking out "4081" and inserting in lieu thereof "4081(a)".

(e) EFFECTIVE DATE.—The amendments made by this section shall take effect on November 1, 1985.

SEC. 422. LEAKING UNDERGROUND STORAGE TANK TRUST FUND.

(a) IN GENERAL.—Subchapter A of chapter 98 of the Internal Revenue Code of 1954 (relating to establishment of trust funds) is amended by adding after section 9505 the following new section:

"SEC. 9506. LEAKING UNDERGROUND STORAGE TANK TRUST FUND.

"(a) CREATION OF TRUST FUND.—There is established in the Treasury of the United States a trust fund to be known as the 'Leaking Underground Storage Tank Trust Fund', consisting of such amounts as may be appropriated or credited to such Trust Fund as provided in this section or section 9602(b).

"(b) TRANSFERS TO TRUST FUND.—There are hereby appropriated to the Leaking Underground Storage Tank Trust Fund amounts equivalent to—

"(1) taxes received in the Treasury under sections 4041(d) and 4081(b) (relating to additional taxes on motor fuels and gasoline),

"(2) taxes received in the Treasury under section 4042 to the extent attributable to the Leaking Underground Storage Tank Trust Fund financing rate under section 4042(b), and

"(3) amounts collected under section 9003(h)(3) of the Solid Waste Disposal Act.

(c) EXPENDITURES.—

"(1) IN GENERAL.—Except as provided in paragraph (2), amounts in the Leaking Underground Storage Tank Trust Fund shall be available, as provided in appropriation Acts, only for purposes of making expenditures to carry out section 9003(h) of the Solid Waste Disposal Act as in effect on the date of the enactment of the Superfund Amendments of 1985.

"(2) TRANSFERS FROM TRUST FUND FOR CERTAIN REPAYMENTS AND CREDITS.—

"(A) IN GENERAL.—The Secretary shall pay from time to time from the Leaking Underground Storage Tank Trust Fund into the general fund of the Treasury amounts equivalent to—

"(i) amounts paid under—

"(I) section 6420 (relating to amounts paid in respect of gasoline used on farms),

"(II) section 6421 (relating to amounts paid in respect of gasoline used for certain non-highway purposes or by local transit systems), and

"(III) section 6427 (relating to fuels not used for taxable purposes), and

"(ii) credits allowed under section 34.

with respect to the taxes imposed by sections 4041(d) and 4081(b).

"(B) TRANSFERS BASED ON ESTIMATES.—Transfers under subparagraph (A) shall be made on the basis of estimates by the Secretary, and proper adjustment shall be made in amounts subsequently transferred to the extent prior estimates were in excess of or less than the amounts required to be transferred.

"(d) LIABILITY OF THE UNITED STATES LIMITED TO AMOUNT IN TRUST FUND.—

"(1) GENERAL RULE.—Any claim filed against the Leaking Underground Storage Tank Trust Fund may be paid only out of such Trust Fund.

"(2) COORDINATION WITH OTHER PROVISIONS.—Nothing in the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 or the Superfund Amendments of 1985 (or in any amendment made by either of such Acts) shall authorize the payment by the United States Government of any amount with respect to any such claim out of any source other than the Leaking Underground Storage Tank Trust Fund.

"(3) ORDER IN WHICH UNPAID CLAIMS ARE TO BE PAID.—If at any time the Leaking Underground Storage Tank Trust Fund has insufficient funds to pay all of the claims out of such Trust Fund at such time, such claims shall, to the extent permitted under paragraph (1), be paid in full in the order which they were finally determined."

(b) CLERICAL AMENDMENT.—The table of sections for subchapter A of Chapter 98 of such Code is amended by adding after the item relating to section 9505 the following new item:

"Sec. 9506. Leaking Underground Storage Tank Trust Fund.

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on November 1, 1985.

By Mr. DUNCAN:

—Strike out title IV of the bill and insert in lieu thereof the following:

TITLE IV—AMENDMENTS OF THE INTERAL REVENUE CODE OF 1954

SEC. 401. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This title may be cited as the "Superfund Revenue Act of 1985".

(b) Table of Contents.—

Sec. 401. Short title; table of contents.

PART I—SUPERFUND AND ITS REVENUE SOURCES

Sec. 411. Extension of environmental taxes.
Sec. 412. Increase in tax on petroleum.
Sec. 413. Increase in tax on certain chemcials.
Sec. 414. Repeal of post-closure tax and trust fund.
Sec. 415. Waste management tax.
Sec. 416. Tax on certain imported substances derived from taxable chemicals.
Sec. 417. Imposition of superfund excise tax.
Sec. 418. Hazardous Substance Superfund.

PART II—LEAKING UNDERGROUND STORAGE TANK TRUST FUND AND ITS REVENUE SOURCES

Sec. 421. Additional tax on gasoline, diesel fuel, and special motor fuels.
Sec. 422. Leaking Underground Storage Tank Trust Fund.

PART III—OIL SPILL LIABILITY TRUST FUND AND ITS REVENUE SOURCES

Sec. 431. Increase in environmental tax on petroleum.
Sec. 432. Oil Spill Liability Trust Fund.

PART IV—STUDIES

Sec. 441. Study of impact of waste management tax on domestic manufacturers.
Sec. 442. Study of lead poisoning.

PART V—COORDINATION WITH OTHER PROVISIONS OF THIS ACT

Sec. 451. Coordination.

PART I—SUPERFUND AND ITS REVENUE SOURCES

SEC. 411. EXTENSION OF ENVIRONMENTAL TAXES.

(a) IN GENERAL.—Subsection (d) of section 4611 of the Internal Revenue Code of 1954 (relating to termination) is amended to read as follows:

"(d) APPLICATION OF TAXES.—The taxes imposed by this section shall apply after October 31, 1985, and before October 1, 1990."

(b) TECHNICAL AMENDMENT.—Section 303 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 is hereby repealed.

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on November 1, 1985.

SEC. 412. INCREASE IN TAX ON PETROLEUM.

(a) INCREASE IN TAX.—Subsections (a) and (b) of section 4611 of the Internal Revenue Code of 1954 (relating to environmental tax on petroleum) are each amended by striking out "0.79 cent" and inserting in lieu thereof "4 cents (4.6 cents for 1989 and 1990)".

(b) EFFECTIVE DATE.—The amendments made by this section shall take effect on November 1, 1985.

SEC. 413. INCREASE IN TAX ON CERTAIN CHEMICALS.

(a) INCREASE IN RATE OF TAX; LEAD ADDED AS TAXABLE CHEMICAL.—Subsection (b) of section 4661 of the Internal Revenue Code of 1954 (relating to amount of tax imposed on certain chemicals) is amended by striking out the table contained in such subsection and inserting in lieu thereof the following:

"In the case of:	The tax (before any inflation adjustment) is the following amount per ton:	
	For calendar year 1985, 1986, 1987, or 1988:	For calendar year 1989 or 1990:
Organic substances:		
Acetylene	$4.31	$4.56
Benzene	4.31	4.56
Butadine	4.31	4.56
Butane	4.31	4.56
Butylene	4.31	4.56
Ethylene	4.31	4.56
Methane	3.04	3.22
Naphthalene	4.31	4.56
Propylene	4.31	4.56
Toluene	4.31	4.56
Xylene	9.25	14.73
Inorganic substances:		
Ammonia	3.72	3.94
Antimony	3.94	4.17
Antimony trioxide	3.94	4.17
Arsenic	3.94	4.17
Arsenic trioxide	3.94	4.17
Barium sulfide	3.94	4.17
Bromine	3.94	4.17
Cadmium	3.94	4.17
Chlorine	3.57	3.78
Chromite	1.35	1.42
Chromium	3.94	4.17
Cobalt	3.94	4.17
Cupric oxide	3.94	4.17
Cupric sulfate	3.94	4.17
Cuprous oxide	3.94	4.17
Hydrochloric acid	1.10	1.16
Hydrogen fluoride	3.94	4.17
Lead	3.94	4.17
Lead Oxide	3.94	4.17
Mercury	3.94	4.17
Nickel	3.94	4.17
Nitric acid	3.54	3.65
Phosphorous	3.94	4.17
Potassium dichromate	3.94	4.17
Potassium hydroxide	3.94	4.17
Sodium dichromate	3.94	4.17
Sodium hydroxide	3.29	3.49
Stannic chloride	3.94	4.17
Stannous chloride	3.94	4.17
Sulfuric acid	0.91	0.97
Zinc chloride	3.94	4.17
Zinc sulfate	3.94	4.17."

(b) INFLATION ADJUSTMENTS IN AMOUNT OF TAX.—Section 4661 of such Code is amended by redesignating subsection (c) as subsection (d) and by inserting after subsection (b) the following new subsection:

"(c) INFLATION ADJUSTMENTS IN AMOUNT OF TAX.—

"(1) IN GENERAL.—In the case of any taxable chemical sold in a calendar year after 1986, the amount of the tax imposed by subsection (a) shall be the amount determined under subsection (b) increased by the applicable inflation adjustment for such calendar year.

"(2) APPLICABLE INFLATION ADJUSTMENT.—

"(A) IN GENERAL.—In the case of a taxable chemical, the applicable inflation adjustment for the calendar year is the percentage (if any) by which—

"(i) the applicable price index for the preceding calendar year, exceeds

"(ii) the applicable price index for the applicable base year.

"(B) APPLICABLE PRICE INDEX.—For purposes of subparagraph (A), the applicable price index for any calendar year is the average for the months in the 12-month period ending on September 30 of such calendar year of—

"(i) in the case of organic substances, the producer price index for basic organic chemicals as published by the Secretary of Labor, or

"(ii) in the case of inorganic substances, the producer price index for basic inorganic chemicals as published by the Secretary of Labor.

"(C) APPLICABLE BASE YEAR.—For purposes of subparagraph (A), the applicable base year is—

"(i) 1985 in the case of the adjustments for 1986 and 1988, and

"(ii) 1988 in the case of the adjustment for 1990.

"(3) NO ADJUSTMENT FOR 1989.—No adjustment shall be made under paragraph (1) for taxable chemicals sold in calendar year 1989.

"(4) ROUNDING.—If any increase determined under paragraph (1) is not a multiple of 1 cent, such increase shall be rounded to the nearest multiple of 1 cent (or, if the increase determined under paragraph (1) is a multiple of ½ of 1 cent, such increase shall be increased to the next higher multiple of 1 cent)."

(c) EXEMPTION FOR EXPORTS OF TAXABLE CHEMICALS.—

(1) Section 4662 of such Code (relating to definitions and special rules) is amended by redesignating subsection (e) as subsection (f) and by inserting after subsection (d) the following new subsection:

"(e) EXEMPTION FOR EXPORTS OF TAXABLE CHEMICALS.—

"(1) TAX-FREE SALES.—

"(A) IN GENERAL.—No tax shall be imposed under section 4661 on the sale by the manufacturer or producer of any taxable chemical for export, or for resale by the purchaser to a second purchaser for export.

"(B) PROOF OF EXPORT REQUIRED.—Rules similar to the rules of section 4221(b) shall apply for purposes of subparagraph (A).

"(2) CREDIT OR REFUND WHERE TAX PAID.—

"(A) IN GENERAL.—Except as provided in subparagraph (B), if—

"(i) tax under section 4661 was paid with respect to any taxable chemical, and

"(ii) such chemical was exported by any person,

credit or refund (without interest) of such tax shall be allowed or made to the person who paid such tax.

"(B) CONDITION TO ALLOWANCE.—No credit or refund shall be allowed or made under subparagraph (A) unless the person who paid the tax establishes that he—

"(i) has repaid or agreed to repay the amount of the tax to the person who exported the taxable chemical, or

"(ii) has obtained the written consent of such exporter to the allowance of the credit or the making of the refund.

"(3) REGULATIONS.—The Secretary shall prescribe such regulations as may be necessary to carry out the purposes of this subsection."

(2) Paragraph (1) of section 4662(d) of such Code (relating to refund or credit for certain uses) is amended—

(A) by striking out "the sale of which by such person would be taxable under such section" and inserting in lieu thereof "which is a taxable chemical", and

(B) by striking out "imposed by such section on the other substance manufactured or produced" and inserting in lieu thereof "imposed by such section on the other substance manufactured or produced (or which would have been imposed by such section on such other substance but for subsection (b) or (e) of this section)".

(d) SPECIAL RULES FOR CERTAIN CHEMICALS.—

(1) REPEAL OF EXEMPTION FOR CHEMICALS DERIVED FROM COAL.—

(A) Section 4662(b) of such Code (relating to exemptions; other special rules) is amended by striking out paragraph (4) and by redesignating paragraphs (5) and (6) as paragraphs (4) and (5), respectively.

(B) Paragraph (3) of section 4662(d) of such Code is amended by striking out "subsection (b)(5)" each place it appears and inserting in lieu thereof "subsection (b)(4)".

(2) EXEMPTION FOR LEAD HAVING TRANSITORY PRESENCE DURING EXTRACTING PROCESS.—Clause (i) of section 4662(b)(5)(B) of such Code (relating to substance having transitory presence during extracting process), as redesignated by paragraph (1), is amended by inserting "lead," before "lead oxide".

(3) SPECIAL RULE FOR XYLENE.—Subsection (b) of section 4662 of such Code (relating to exceptions; other special rules) is amended by adding after paragraph (5) the following new paragraph:

"(6) SPECIAL RULE FOR XYLENE.—Except in the case of any substance imported into the United States or exported from the United States, the term 'xylene' does not include any separated isomer of xylene."

(4) SPECIAL RULE FOR NITRIC ACID USED IN PRODUCTION OF NITROCELLULOSE.—Subsection (b) of section 4662 of such Code (relating to exceptions; other special rules) is amended by adding after paragraph (6) the following new paragraph:

"(7) SPECIAL RULE FOR NITRIC ACID USED IN PRODUCTION OF NITROCELLULOSE.—The tax imposed under section 4661 on nitric acid used by the producer of such acid in the production of nitrocellulose shall not exceed $0.24 per ton."

(e) EXEMPTION FOR CERTAIN RECYCLED CHEMICALS.—Subsection (b) of section 4662 of such Code (relating to exceptions; other special rules) is amended by adding after paragraph (7) the following new paragraph:

"(8) RECYCLED CHROMIUM, COBALT, NICKEL, AND LEAD.—

"(A) IN GENERAL.—No tax shall be imposed under section 4661(a) on any chromium, cobalt, nickel, or lead which is diverted or recovered in the United States from any solid waste as part of a recycling process (and not as part of the original manufacturing or production process).

"(B) EXEMPTION NOT TO APPLY WHILE CORRECTIVE ACTION UNCOMPLETED.—Subparagraph (A) shall not apply during any period that required corrective action by the taxpayer is uncompleted.

"(C) REQUIRED CORRECTIVE ACTION.—For purposes of subparagraph (B), required corrective action shall be treated as uncompleted during the period—

"(i) beginning on the date that the corrective action is required by the Administrator or an authorized State pursuant to—

"(I) a final permit under section 3005 of the Solid Waste Disposal Act or a final order under section 3004 or 3008 of such Act, or

"(II) a final order under section 106 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, and "(ii) ending on the date the Administrator or such State (as the case may be) certifies to the Secretary that such corrective action has been completed.

"(D) SOLID WASTE.—For purposes of this paragraph, the term 'solid waste' has the meaning given such term by section 1004 of the Solid Waste Disposal Act, except that such term shall not include any byproduct, coproduct, or other waste from any process of smelting, refining, or otherwise extracting any metal."

(f) EXEMPTION FOR ANIMAL FEED SUBSTANCES.—

(1) IN GENERAL.—Subsection (b) of section 4662 of such Code (relating to exceptions; other special rules) is amended by adding after paragraph (8) the following new paragraph:

"(9) SUBSTANCES USED IN THE PRODUCTION OF ANIMAL FEED.—

"(A) IN GENERAL.—In the case of—

"(i) nitric acid,

"(ii) sulfuric acid,

"(iii) ammonia, or

"(iv) methane used to produce ammonia.

which is a qualified animal feed substance, no tax shall be imposed under section 4661(a).

"(B) QUALIFIED ANIMAL FEED SUBSTANCE.—For purposes of this section, the term 'qualified animal feed substance' means any substance—

"(i) used in a qualified animal feed use by the manufacturer, producer, or importer,

"(ii) sold for use by any purchaser in a qualified animal feed use, or

"(iii) sold for resale by any purchaser for use, or resale for ultimate use, in a qualified animal feed use.

"(C) QUALIFIED ANIMAL FEED USE.—The term 'qualified animal feed use' means any use in the manufacture or production of animal feed or animal feed supplements, or of ingredients used in animal feed or animal feed supplements.

"(D) TAXATION OF NONQUALIFIED SALE OR USE.—For purposes of section 4661(a), if no tax was imposed by such section on the sale or use of any chemical by reason of subparagraph (A), the first person who sells or uses such chemical other than in a sale or use described in subparagraph (A) shall be treated as the manufacturer of such chemical."

(2) REFUND OR CREDIT FOR SUBSTANCES USED IN THE PRODUCTION OF ANIMAL FEED.—Subsection (d) of section 4662 of such Code (relating to refunds and credits with respect to the tax on certain chemicals) is amended by adding at the end thereof the following new paragraph:

"(4) USE IN THE PRODUCTION OF ANIMAL FEED.—Under regulations prescribed by the Secretary, if—

"(A) a tax under section 4661 was paid with respect to nitric acid, sulfuric acid, ammonia, or methane used to produce ammonia, without regard to subsection (b)(9), and

"(B) any person uses such substance as a qualified animal feed substance,

then an amount equal to the excess of the tax so paid over the tax determined with regard to subsection (b)(9) shall be allowed as a credit or refund (without interest) to such person in the same manner as if it were an overpayment of tax imposed by this section."

(g) CERTAIN EXCHANGES BY TAXPAYERS NOT TREATED AS SALES.—Subsection (c) of section 4662 of such Code (relating to use by manufacturers) is amended to read as follows:

"(c) USE AND CERTAIN EXCHANGES BY MANUFACTURER, ETC.—

"(1) USE TREATED AS SALE.—Except as provided in subsections (b) and (e), if any person manufactures, produces, or imports any taxable chemical and uses such chemical, then such person shall be liable for tax under section 4661 in the same manner as if such chemical were sold by such person.

"(2) SPECIAL RULES FOR INVENTORY EXCHANGES.—

"(A) IN GENERAL.—Except as provided in this paragraph, in any case in which a manufacturer, producer, or importer of a taxable chemical exchanges such chemical as pat of an inventory exchange with another person—

"(i) such exchange shall not be treated as a sale, and

"(ii) such other person shall, for purposes of section 4661, be treated as the manufacturer, producer, or importer of such chemical.

"(B) REGISTRATION REQUIREMENT.—Subparagraph (A) shall not apply to any inventory exchange unless—

"(i) both parties are registered with the Secretary as manufacturers, producers, or importers of taxable chemicals, and

"(ii) the person receiving the taxable chemical has, at such time as the Secretary may prescribe, notified the manufacturer, producer, or importer of such person's registration number and the internal revenue district in which such person is registered.

"(C) INVENTORY EXCHANGE.—For purposes of this paragraph, the term 'inventory exchange' means any exchange in which 2 persons exchange property which is, in the hands of each person, property described in section 1221(1)."

(h) EFFECTIVE DATES.—

(1) IN GENERAL.—Except as otherwise provided in this subsection, the amendments made by this section shall take effect on November 1, 1985.

(2) REPEAL OF TAX ON XYLENE FOR PERIODS BEFORE OCTOBER 1, 1985.—

(A) REFUND OF TAX PREVIOUSLY IMPOSED.—In the case of any tax imposed by section 4661 of the Internal Revenue Code of 1954 on the sale or use of xylene before October 1, 1985, such tax (including interest, additions to tax, and additional amounts) shall not be assessed, and if assessed, the assessment shall be abated, and if collected shall be credited or refunded (with interest) as an overpayment.

(B) WAIVER OF STATUTE OF LIMITATIONS.—If on the date of the enactment of this Act (or at any time within 1 year after such date of enactment) refund or credit of any overpayment of tax resulting from the application of subparagraph (A) is barred by any law or rule of law, refund or credit of such overpayment shall, nevertheless, be made or allowed if claim therefor is filed before the date 1 year after the date of the enactment of this Act.

(C) XYLENE TO INCLUDE ISOMERS.—For purposes of this paragraph, the term "xylene" shall include any isomer of xylene whether or not separated.

(3) INVENTORY EXCHANGES.—

(A) IN GENERAL.—Except as otherwise provided in this paragraph, the amendment made by subsection (g) shall apply as if included in the amendments made by section 211 of the Hazardous Substance Response Revenue Act of 1980.

(B) RECIPIENT MUST AGREE TO TREATMENT AS MANUFACTURER.—In the case of any inventory exchange before January 1, 1986, the amendment made by subsection (g) shall apply only if the person receiving the chemical from the manufacturer, producer, or importer in the exchange agrees to be treated as the manufacturer, producer, or importer of such chemical for purposes of subchapter B of chapter 38 of the Internal Revenue Code of 1954.

(C) EXCEPTION WHERE MANUFACTURER PAID TAX.—In the case of any inventory exchange before January 1, 1986, the amendment made by subsection (g) shall not apply if the manufacturer, producer, or importer treated such exchange as a sale for purposes of section 4661 of such Code and paid the tax imposed by such section.

(D) REGISTRATION REQUIREMENTS.—Section 4662(c)(2)(B) of such Code (as added by subsection (g)) shall apply to exchanges made after December 31, 1985.

SEC. 414. REPEAL OF POST-CLOSURE TAX AND TRUST FUND.

(a) REPEAL OF TAX.—

(1) Subchapter C of chapter 38 of the Internal Revenue Code of 1954 (relating to tax on hazardous wastes) is hereby repealed.

(2) The table of subchapters for such chapter 38 is amended by striking out the item relating to subchapter C.

(b) REPEAL OF TRUST FUND.—Section 232 of the Hazardous Substance Response Revenue Act of 1980 is hereby repealed.

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on October 1, 1983.

SEC. 415. WASTE MANAGEMENT TAX.

(a) GENERAL RULE.—Chapter 38 of the Internal Revenue Code of 1954 (as amended by section 414 of this Act) is amended by adding after subchapter B the following new subchapter:

"Subchapter C—Hazardous Waste Management Tax

"Sec. 4671. Waste management tax.
"Sec. 4672. Exemptions; reduction of tax where prior taxable event.
"Sec. 4673. Special rules for waste water treatment, incineration, etc.
"Sec. 4674. Backup tax on generator.
"Sec. 4675. Definitions and special rules.

"SEC. 4671. WASTE MANAGEMENT TAX.

"(a) IMPOSITION OF TAX.—There is hereby imposed a tax on—

"(1) the receipt of hazardous waste at a qualified hazardous waste management unit,

"(2) the receipt of hazardous waste for transport from the United States for the purpose of ocean disposal, and

"(3) the exportation of hazardous waste from the United States.

"(b) AMOUNT OF TAX.—

"(1) IN GENERAL.—The amount of the tax imposed by subsection (a) with respect to each ton of hazardous waste shall be determined in accordance with the following table:

	If the taxable event is:	
	Land Disposal	Any other Taxable Event
"For calendar year:	The tax per tone is:	
1986	$36.00	$3.00
1987	40.00	4.00
1988	42.00	4.00
1989	20.00	2.00
1990	24.00	2.00.

"(2) DEFINITIONS RELATING TO AMOUNT OF TAX.—For definition of—

"(A) hazardous waste, see section 4675(a)(1), and

"(B) land disposal and any other taxable event, see section 4675(a)(5).

"(c) LIABILITY FOR TAX.—

"(1) WASTE RECEIVED AT MANAGEMENT UNITS.—The tax imposed by subsection (a)(1) shall be paid by the owner or operator of the qualified hazardous waste management unit.

"(2) WASTE RECEIVED FOR TRANSPORT FROM THE UNITED STATES.—The tax imposed by subsection (a)(2) shall be paid by the person holding the permit issued for transport for ocean disposal under section 102 of the Marine Protection, Research, and Sanctuaries Act of 1972.

"(3) WASTE EXPORTED.—The tax imposed by subsection (a)(3) shall be paid by the exporter.

"(d) TERMINATION.—The taxes imposed by this section shall not apply after September 30, 1990.

"SEC. 4672. EXEMPTIONS; REDUCTION OF TAX WHERE PRIOR TAXABLE EVENT.

"(a) EXEMPTION FOR CERTAIN REMOVAL AND REMEDIAL ACTIONS, ETC.—The tax imposed by section 4671 shall not apply to the receipt or export of hazardous waste pursuant to—

"(1) a corrective action specified in—

"(A) an initial or final order, or

"(B) a proposed or final permit,

issued by the Administrator under the Solid Waste Disposal Act or a State under a hazardous waste program authorized under section 3006 of such Act,

"(2) a proposed or final closure plan approved by the Administrator or such a State,

"(3) a removal or remedial action under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 which has been selected or approved by the Administrator, or

"(4) an action to correct an emergency situation arising from a product spill which is certified by the Administrator to the Secretary as carrying out the purposes of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980.

"(b) EXEMPTION FOR WASTE RECEIVED AT ANY FEDERAL FACILITY.—The tax imposed by section 4671 shall not apply to any hazardous waste received at any facility owned by the United States.

"(c) REDUCTION IN TAX WHERE PRIOR TAXABLE EVENT.—

"(1) IN GENERAL.—If—

"(A) tax under section 4671 or 4674 was paid with respect to any hazardous waste, and

"(B) tax under section 4671 is subsequently imposed on such waste (hereinafter in this subsection referred to as the 'later taxable event'),

then the tax under section 4671 on the later taxable event shall be reduced by the amount determined under paragraph (2).

"(2) AMOUNT OF REDUCTION.—The amount of the reduction determined under this paragraph is the product of—

"(A) the weight of hazardous waste involved in the later taxable event, multiplied by

"(B) the lesser of—

"(i) the highest rate of tax paid under section 4671 or 4674 with respect to any prior taxable event involving such waste (determined without regard to this subsection), or

"(ii) the rate of tax imposed by section 4671 with respect to the later taxable event (as so determined).

"SEC. 4673. SPECIAL RULES FOR WASTE WATER TREATMENT, INCINERATION, ETC.

"(a) EXEMPTION FOR WASTE RECEIVED AT CERTAIN WASTE WATER TREATMENT UNITS.—The tax imposed by section 4671 shall not apply to hazardous waste received at any waste water treatment unit.

"(b) INCINERATION, ETC. WITHIN 90 DAYS OF RECEIPT.—

"(1) IN GENERAL.—Under regulations prescribed by the Secretary, if—

"(A) tax under section 4671 was paid with respect to the receipt of any hazardous waste at any qualified hazardous waste management unit or for transport described in section 4671(a)(2), and

"(B) such waste is incinerated on land (or the equivalent of incineration on land) by any person within 90 days after the date of the first receipt referred to in subparagraph (A),

then the tax so paid shall be allowed as a credit or refund (without interest) to such person in the same manner as if it were an overpayment of tax imposed by section 4671.

"(2) EQUIVALENT OF INCINERATION.—For purposes of subparagraph (A), a method, technique, or process shall be treated as the equivalent of incineration on land if—

"(A) such method, technique, or process meets detailed performance standards established by the Environmental Protection Agency, and

"(B) such standards require a destruction and removal efficiency for the hazardous waste involved at least equivalent to the destruction and removal efficiency applicable to incineration on land.

"(c) QUALIFIED CHEMICAL FUELS OR SOLVENTS.—

"(1) IN GENERAL.—Under regulations prescribed by the Secretary, if—

"(A) tax under section 4671 was paid with respect to any hazardous waste,

"(B) such waste is used by any person in the production of any qualified chemical fuel or solvent, and

"(C) such fuel or solvent is by such person sold for use or used in any industrial or commercial use,

then the tax so paid shall be allowed as a credit or refund (without interest) to such person in the same manner as if it were an overpayment of tax imposed by section 4671.

"(2) QUALIFIED CHEMICAL FUEL OR SOLVENT.—For purposes of subparagraph (A), the term 'qualified chemical fuel or solvent' means any chemical or solvent which is determined by the Administrator as not being a hazardous waste.

"(d) RECYCLING OF BATTERIES.—Under regulations prescribed by the Secretary, if—

"(1) tax under section 4671 was paid with respect to the receipt of any battery at a qualified hazardous waste management unit, and

"(2) the recycling of such battery begins at such a unit by any person within 90 days after the date of the first receipt of such battery at any qualified hazardous waste management unit,

then the tax so paid shall be allowed as a credit or refund (without interest) to such person in the same manner as if it were an overpayment of tax imposed by section 4671.

"(e) TAX TO APPLY WHILE CORRECTIVE ACTION NOT COMPLETED.—

"(1) IN GENERAL.—The exemption provided by subsection (a) shall not apply (and no credit or refund shall be allowed under this section) with respect to any activity conducted at a facility (or part thereof) during the period that required corrective action remains uncompleted with respect to such facility (or part).

"(2) REQUIRED CORRECTIVE ACTION.—For purposes of paragraph (1), required corrective action shall be treated as uncompleted during the period—

"(A) beginning on the date that the corrective action is required by the Administrator or an authorized State pursuant to a final permit under section 3005 of the Solid Waste Disposal Act or a final order under section 3004 or 3008 of such Act, and

"(B) ending on the date the Administrator or such State (as the case may be) certifies to the Secretary that such corrective action has been completed.

"(3) RATE OF TAX WITH RESPECT TO WASTE WATER TREATMENT.—The rate of tax imposed by section 4671 by reason of this subsection with respect to hazardous waste received at any waste water treatment unit shall be the amount determined in accordance with the following table:

For calendar years:	The tax per ton is:
1986, 1987, or 1988	19 cents
1989 or 1990	13 cents.

"SEC. 4674. BACKUP TAX ON GENERATOR.

"(a) IMPOSITION OF TAX.—There is hereby imposed a tax on each ton of hazardous waste which, as of the close of the 270-day period beginning on the day after the day on which such waste was generated, has not been—

"(1) received at a qualified hazardous waste management unit,

"(2) received for transport from the United States for the purpose of ocean disposal, or

"(3) exported from the United States.

"(b) RATE OF TAX.—The rate of the tax imposed by subsection (a) shall be the rate of tax applicable to land disposal under section 4671 at the end of the 270-day period described in subsection (a).

"(c) LIABILITY FOR TAX.—The tax imposed by subsection (a) shall be paid by the generator of the hazardous waste.

"(d) EXEMPTIONS.—

"(1) SMALL GENERATORS.—The tax imposed by subsection (a) shall not apply to hazardous waste generated during any month if the generator of such waste does not generte more than 100 kilograms of hazardous waste during such month.

"(2) WASTE LEGALLY DISPOSED OF IN PUBLICLY OWNED TREATMENT WORKS.—The tax imposed by subsection (a) shall not apply to hazardous waste disposed of in any publicly owned treatment works if the disposal of such waste is not in violation of Federal, State, or local law.

"(3) OTHER EXEMPTIONS TO APPLY.—The exemptions provided by subsections (a) and (b) of section 4672 shall apply to the tax imposed by subsection (a).

"(4) EXEMPTIONS UNDER REGULATIONS; APPLICTION OF LOWER RATE.—The Secretary may prescribe regulations which provide exemptions from the tax imposed by subsection (a) (or the application of a lower rate) which are not inconsistent with the purposes of this section.

"(e) GENERATOR.—For purposes of this section, the term 'generator' means the person whose act or process produces the hazardous waste.

"(f) TERMINATION.—No tax shall be imposed by this section on waste generated after September 30, 1990.

"SEC. 4675. DEFINITIONS AND SPECIAL RULES.

"(a) DEFINITIONS.—For purposes of this subchapter—

"(1) HAZARDOUS WASTE.—The term 'hazardous waste' means any waste which is listed or identified as of the date of the enactment of the Superfund Revenue Act of 1985 under section 3001 of the Solid Waste Disposal Act. Rainwater shall not be treated as hazardous waste unless mixed with hazardous waste (as defined in the preceding sentence).

"(2) QUALIFIED HAZARDOUS WASTE MANAGEMENT UNIT.—The term 'qualified hazardous waste management unit' means the specified area of land or structure—

"(A) which isolates the hazardous wastes within a qualified hazardous waste facility, and

"(B) which is subject to the requirements for obtaining interim status or a final permit under subtitle C of the Solid Waste Disposal Act.

"(3) QUALIFIED HAZARDOUS WASTE MANAGEMENT FACILITY.—The term 'qualified hazardous waste management facility' means any facility, as defined under subtitle C of the Solid Waste Disposal Act, which has received a permit or is accorded interim status under—

"(A) section 3005 of the Solid Waste Disposal Act, or

"(B) a State program authorized under section 3006 of such Act.

"(4) OCEAN DISPOSAL.—The term 'ocean disposal' means the incineration or dumping of hazardous waste over or into ocean waters or the waters described in section 101(b) of the Marine Protection, Research, and Sanctuaries Act of 1972, pursuant to section 102 of such Act.

"(5) DEFINITIONS RELATING TO AMOUNT OF TAX. —

"(A) LAND DISPOSAL.—The term 'land disposal' means a taxable event described in section 4671(a)(1) with respect to a qualified hazardous waste management unit which is a landfill, surface impoundment, waste pile, or land treatment unit.

"(B) LANDFILL, ETC.—For purposes of subparagraph (A), the terms 'landfill', 'surface impoundment', 'waste pile' and 'land treatment unit' have the respective meanings given such terms in regulations prescribed by the Administrator pursuant to sections 3004 and 3005 of the Solid Waste Disposal Act.

"(C) OTHER TAXABLE EVENT.—The term 'any other taxable event' means—

"(i) a taxable event described in section 4671(a)(1) which is not land disposal, and

"(ii) a taxable event described in paragraph (2) or (3) of section 4671(a).

"(6) WASTE WATER TREATMENT UNIT.—The term 'waste water treatment unit' means any qualified hazardous waste management unit which is an integral and necessary part of a treatment system—

"(A) for which a permit is required under section 402 of the Clean Water Act,

"(B) which is subject to pretreatment standards under subsection (b) or (c) of section 307 of the Clean Water Act, or

"(C) which is zero discharge treatment system—

"(i) which, if the system discharged into navigable waters, would comply with effluent limitation guidelines prescribed under paragraph (2) or (4) of section 304(b) of the Clean Water Act,

"(ii) which, if the system discharged into a publicly owned treatment works, would comply with the pretreatment standards described in subparagraph (B), or

"(iii) if no such guidelines or standards have been prescribed, which employs biological treatment.

The term 'waste water treatment unit' shall not include any qualified hazardous waste management unit which receives for storage or final disposition concenatrated treatment residues resulting from wastewater treatment.

"(7) ADMINISTRATOR.—The term 'Administrator' means the Administrator of the Environmental Protection Agency.

"(8) UNITED STATES.—The term 'United States' has the meaning given such term by section 4612(a)(4).

"(9) TON.—The term 'ton' means 2,000 pounds.

"(10) FRACTIONAL PART OF TON.—In the case of a fraction of a ton, the tax imposed by this subchapter shall be the same fraction of the amount of such tax imposed on a whole ton.

"(b) TREATMENT OF CONTAINERS, ETC. WHICH ARE RELATED TO INJECTION UNITS.—For purposes of this subchapter—

"(1) any container, tank, or surface impoundment which, with respect to any hazardous waste, is used to treat or store such waste before underground injection of such waste (whether or not the waste when injected is hazardous waste) into an injection well, and

"(2) the injection well into which such waste is injected,

shall be treated as a single hazardous waste management unit.

"(C) DISPOSITION OF REVENUES FROM PUERTO RICO AND THE VIRGIN ISLANDS.—The provisions of subsection (a)(3) and (b)(3) of section 7652 shall not apply to any tax imposed by this subchapter."

(b) INFORMATION REPORTING REQUIREMENT.—

(1) IN GENERAL.—Subpart A of part III of subchapter A of chapter 61 of such Code is amended by inserting after section 6039D the following new section:

"SEC. 6039E. INFORMATION WITH RESPECT TO MANAGEMENT TAX ON HAZARDOUS WASTE.

"Each person on whom a tax is imposed under subchapter C of chapter 38 shall (at such time and in such manner as the Secretary may require) submit to the Secretary such information as the Secretary may require, including information which such person is required to provide the Administrator of the Environmental Protection Agency under the Solid Waste Disposal Act. To the extent provided in regulations prescribed by the Secretary, the preceding sentence shall also apply to persons not described therein with respect to information which the Secretary determines is necessary or appropriate to the administration of such subchapter."

(2) PENALTY.—Subchapter B of chapter 68 of such Code (relating to assessable penalties) is amended by redesignating section 6708 (relating to mortgage credit certificates) as section 6709 and by adding at the end thereof the following new section:

"SEC. 6710. FAILURE TO PROVIDE INFORMATION WITH RESPECT TO MANAGEMENT TAX ON HAZARDOUS WASTE.

"(a) IN GENERAL.—Any person who fails to meet any requirement imposed by section 6039E shall pay a penalty of $100 for each day during which such failure continues, unless it is shown that such failure is due to reasonable cause and not due to willful neglect. The maximum penalty imposed under this subsection with respect to any failure shall not exceed $50,000.

"(b) PENALTY IN ADDITION TO OTHER PENALTIES.—The penalty imposed by this section shall be in addition to any other penalty provided by law."

(3) CONFORMING AMENDMENTS.—

(A) The table of section for subpart A of part III of subchapter A of chapter 61 of such Code is amended by inserting after the item relating to section 6039D the following new item:

"Sec. 6039E. Information with respect to management tax on hazardous waste."

(B) The table of sections for subchapter B of chapter 68 of such Code is amended by redesignating the item relating to mortgage credit certificates as section 6709 and by adding at the end thereof the following new item:

"Sec. 6710. Failure to provide information with respect to management tax on hazardous waste."

(c) PENALTY FOR NEGLIGENCE TO APPLY TO ENVIRONMENTAL TAXES.—Section 6653 of such Code (relating to failure to pay tax) is amended by adding at the end thereof the following new subsection:

"(i) NEGLIGENCE PENALTY TO APPLY TO ENVIRONMENTAL TAXES.—For purposes of applying paragraphs (1) and (2) of subsection (a), paragraph (1) of subsection (a) shall be treated as including a reference to underpayments (as defined in subsection (c)) of tax imposed by chapter 38 (relating to environmental taxes)."

(d) CLERICAL AMENDMENT.—The table of subchapters for chapter 38 of such Code is amended by adding after the item relating to subchapter B the following new item:

"Subchapter C. Hazardous waste management tax."

(e) EFFECTIVE DATES.—

(1) IN GENERAL.—The amendments made by this section shall take effect on January 1, 1986.

(2) BACKUP TAX ON GENERATOR.—Section 4674 of the Internal Revenue Code of 1954 (relating to backup tax on generator), as added by this section, shall apply to waste generated after December 31, 1986.

SEC. 416. TAX ON CERTAIN IMPORTED SUBSTANCES DERIVED FROM TAXABLE CHEMICALS.

(a) GENERAL RULE.—Chapter 38 of the Internal Revenue Code of 1954 is amended by adding after subchapter C the following new subchapter:

"Subchapter D—Tax on Certain Imported Substances

"Sec. 4677. Imposition of Tax.
"Sec. 4678. Definitions and special rules.

"SEC. 4677. IMPOSITION OF TAX.

"(a) GENERAL RULE.—There is hereby imposed a tax on any taxable substance sold or used by the importer thereof.

"(b) AMOUNT OF TAX.—

"(1) IN GENERAL.—Except as provided in paragraph (2), the amount of the tax imposed by subsection (a) with respect to any taxable substance shall be the amount of the tax which would have been imposed by section 4661 on the taxable chemicals or petroleum used as materials or process fuel in the manufacture or production of such substance if such taxable chemicals or petroleum had been sold in the United States for use in the manufacture or production of such taxable substance.

"(2) RATE WHERE IMPORTER DOES NOT FURNISH INFORMATION TO THE SECRETARY.—If the importer does not furnish to the Secretary (at such time and in such manner as the Secretary shall prescribe) sufficient information to determine under paragraph (1) the amount of the tax imposed by subsection (a) on any taxable substance, the amount of the tax imposed on such taxable substance shall be 5 percent of the appraised value of such substance as of the time such substance was entered into the United States for consumption, use, or warehousing.

"(C) EXEMPTIONS FOR SUBSTANCES TAXED UNDER SECTIONS 4611 AND 4661.—No tax shall be imposed by this section on the sale or use of any substance if tax is imposed on such sale or use under section 4611 or 4661.

"(d) TERMINATION.—The taxes imposed by this section shall not apply after September 30, 1990.

"SEC. 4678. DEFINITIONS AND SPECIAL RULES.

"(a) TAXABLE SUBSTANCE.—For purposes of this subchapter—

"(1) IN GENERAL.—The term 'taxable substance' means any substance which, at the time of sale or use by the importer, is listed as a taxable substance by the Secretary for purposes of this subchapter.

"(2) DETERMINATION OF SUBSTANCES ON LIST.—A substance shall be listed under paragraph (1) if the Secretary determines, in consultation with the Administrator of the Environmental Protection Agency and the Commissioner of Customs, that such substance generally has more than 50 percent of its value derived (as materials or as process fuel) from taxable chemicals or petroleum (determined on the basis of the predominant method of production).

"(3) MODIFICATIONS TO LIST.—The Secretary may add or remove substances from the list under paragraph (2) as necessary to carry out the purposes of this subchapter.

"(b) OTHER DEFINITIONS.—For purposes of this subchapter—

"(1) IMPORTER.—The term 'importer' means the person entering the taxable substance for consumption, use, or warehousing.

"(2) TAXABLE CHEMICALS; UNITED STATES.—The terms 'taxable chemical' and 'United States' have the respective meanings given such terms by section 4662(a).

"(c) DISPOSITION OF REVENUES FROM PUERTO RICO AND THE VIRGIN ISLANDS.—The provisions of subsections (a)(3) and (b)(3) of section 7652 shall not apply to any tax imposed by section 4677."

(b) CLERICAL AMENDMENT.—The table of subchapters for chapter 38 of such Code is amended by adding after the item relating to subchapter C the following new item:

"Subchapter D. Tax on certain imported substances."

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on January 1, 1987.

SEC. 417. IMPOSITION OF SUPERFUND EXCISE TAX.

(a) IN GENERAL.—Chapter 38 of the Internal Revenue Code of 1954 is amended by adding at the end thereof the following new subchapter:

"Subchapter E—Superfund Surcharge Tax

"Sec. 4685. Imposition of tax.
"Sec. 4686. Definitions and special rules.
"Sec. 4687. Return requirement; taxable period; payment of tax.
"Sec. 4688. Exemptions.
"Sec. 4689. Import-Export neutrality.
"Sec. 4690. Tax to apply only if shortfall in Superfund.

"SEC. 4685. IMPOSITION OF TAX.

"(a) IMPOSITION AND RATE OF TAX.—There is hereby imposed on each taxable person (as defined in section 4686(a)) carrying on one or more trades or businesses (as defined in section 4686(b)) in the United States a tax in respect of such trade or business activities in an amount determined in accordance with the following tables:

"(1) With respect to those trade or business activities conducted by or on behalf of the taxable person that constitute category A activities:

"If the number of employees properly allocable to such trade or business in accordance with subsection (c) is:	The tax is:
Not more than 5	$0.
At least 6 but less than 10.	$16.
At least 10 but less than 25.	$35.
At least 25 but less than 250.	$50 plus $50 for each additional increment of 25 employees in excess of 25.
250 or more	$500 plus 200 for each additional increment of 100 employees in excess of 250.

"(2) With respect to those trade or business activities conducted by or on behalf of the taxable person that constitute category B activities:

"If the number of employees properly allocable to such trade or business in accordance with subsection (c) is:	The tax is:
Not more than 5	$0.
At least 6 but less than 10.	$3.75.
At least 10 but less than 25.	$8.50.
At least 25 but less than 250.	$12.50 plus $12.50 for each additional increment of 25 employees in excess of 100.
250 or more	$12.50 plus $50 for each additional increment of 100 employees in excess of 250.

"(3) With respect to those trade or business activities conducted by the taxable person that constitute category C activities:

"If the number of employees properly allocable to such trade or business in accordance with subsection (c) is:	The tax is:
Not more than 5	$0.
At least 51 but less than 100.	$9.
At least 100 but less than 250.	$13 plus $6.50 for each additional increment of 50 employees in excess of 100.
250 or more	$32.50 plus $13 for each additional increment of 100 employees in excess of 250.

"(4) With respect to those trade or business activities conducted by the taxable person that constitute category D activities:

"If the number of employees properly allocable to such trade or business in accordance with subsection (c) is:	The tax is:
Not more than 50	$0.
At least 51 but less than 100.	$2.50.
At least 100 but less than 250.	$3.50 plus $1.75 for each additional increment of 50 employees in excess of 100.
250 or more	$8.75 plus $3.50 for each additional increment of 100 employees in excess of 250.

Provided, however, That in the case of trade or business activities of a taxable person that otherwise would be exempt from tax under this subsection during the taxable period by reason of the number of employees properly attributable to such trade or business activities under subsection (c), such trade or business activities nevertheless shall be subject to tax under the next succeeding bracket under which tax is imposed under paragraph (1), (2), (3), or (4) (whichever is applicable), if such trade or business activities result in the generation of more than 1000 kilograms per month of hazardous waste (as defined in section 1004 of the Resource Conservation and Recovery Act and the regulations thereunder).

"(b) CATEGORIES OF TAXABLE ACTIVITIES.—For purposes of this chapter—

"(1) CATEGORY A ACTIVITIES.—The term 'category A activities' means those trade or business activities that are subject to classification within Standard Industrial Classification Codes 28 (relating to chemicals and allied products) or 29 (relating to petroleum refining and relating industries).

"(2) CATEGORY B ACTIVITIES.—The term 'category B activites' means those trade or business activities that are subject to classification within Standard Industrial Classification Codes 30 (relating to rubber and miscellaneous plastics products), 33 (relating to primary metals industries), or 34 (relating to fabricated metal products, except machinery and transportation equipment).

"(3) CATEGORY C ACTIVITIES.—The term 'category C activities' means those trade or business activities that consist of manufacturing (as defined in section 4001(c)) activities other than those activities described in paragraphs (1) and (2).

"(4) CATEGORY D ACTIVITIES.—The term 'category D activities' means those trade or business activities that consist of the provision of services (as defined in section 4001(d)) to customers, except that services for this purpose shall not include services provided by the taxable person in respect of the sale, repair, or maintenance of products manufactured by the taxpayer in carrying on category A, B, or C activities. Such sales, repair, or maintenance services shall be treated as category A, B, or C activities on the basis of the products to which such services relate.

"(c) DETERMINATION OF NUMBER OF EMPLOYEES AND ALLOCATION AMONG TAXABLE CATEGORIES OF ACTIVITIES.—For purposes of this chapter—

"(1) DETERMINATION OF TAXABLE PERSON'S TOTAL WORK FORCE.—The total number of employees (as defined in section 3306(i)) of the taxable person in respect of all of its trade or business activities shall be determined by dividing the total amounts of wages paid or incurred by the taxable person (as determined under section 3306(b)) by $7,000 (or by such other ceiling on taxable wages for Federal Unemployment Tax purposes as thereafter may be adopted in section 3306(b) or its successor).

"(2) ALLOCATION OF TOTAL WORK FORCE AMONG TAXABLE PERSON'S BUSINESS ACTIVITIES.—

"(A) DIRECT LABOR.—All direct labor (as defined in section 4686(e)) in respect of trade or business activities of the taxable person is to be allocated among the four categories of taxable activities described in subsection (b) on the basis of the products or services to which such labor is properly attributable under principles similar to those applicable under section 471 (relating to inventoriable costs);

"(B) INDIRECT LABOR.—Indirect labor (as defined in section 4686(f)) in respect of trade or business activities of the taxable person is to be allocated among the four categories of taxable activities described in subsection (b) as follows:

"(i) indirect labor substantially all of which is directly related to, necessary for, and dedicated to particular manufacturing activities, or the provision of particular services, shall be allocated to such manufacturing activities or services,

"(ii) indirect labor other than that described in (i) shall be allocated among the categories of activities described in subsection (b) on the same proportionate basis at the labor described in subparagraph (A) is allocated among such categories.

"(C) GENERAL AND ADMINISTRATIVE LABOR.—All general and administrative labor (as defined in section 4686(f), in respect of trade or business activities of the taxable person is to be allocated among the four categories of taxable activities described in subsection (b) on the same proportionate basis as the labor described in subparagraph (A) is allocated among such categories.

"SEC. 4686. DEFINITIONS AND SPECIAL RULES.

"For purposes of this subchapter—

"(a) TAXABLE PERSON.—The term 'taxable person' means any corporation (as defined in section 7701(a)(3)) or partnership (as defined in section 7701(a)(2)). For this purpose, all corporations that are members of the same group of controlled corporations (within the meaning of section 1563(a), except that "more than 50 percent' shall be substituted for 'at least 80 percent' each place it appears in section 1563(a)(1)) shall be treated as a single taxable person.

"(b) TRADE OR BUSINESS.—The term 'trade or business' has the same meaning as under section 162 (relating to the deduction of trade or business expenses). In the case of a taxpayer that is a partnership, the determination of the trade or business activities of the partnership shall be made at the partnership level.

"(c) MANUFACTURING.—The term 'manufacturing' means trade or business activities that are subject to classification within Standard Industrial Classification Codes 1, 2, 7 through 14, 20 through 27, 31, 32,or 35 through 39, and such other activities as the Secretary may designate by regulation.

"(d) SERVICES.—The term 'services' means trade or business activities that are subject to classification within Standard Industrial Classification Codes 15 through 17, 40 through 67, 70, 72, 73, 75, 76, 78, 79, 80, 81, 82, 83, 84, 86, 88, or 89, and such other activities as the secretary may designate by regulation.

"(e) DIRECT LABOR.—The term 'direct labor' means labor that is incident to and necessary for manufacturing activities, or the provision of services, and the amount of which can be identified or associated with specific products or services.

"(f) INDIRECT LABOR.—The term 'indirect Labor' means labor that is associated with and necessary for manufacturing activities, or the provision of services, but which is not directly identifiable in amount with respect to specific products or services.

"(g) GENERAL AND ADMINISTRATIVE LABOR.—The term 'general and administrative labor' means labor that is undertaken in respect of administrative and other similar functions that are incident to and necessary for the taxable person's trade or business activities as a whole, rather than to particular manufacturing or service provision activities.

"(h) UNITED STATES.—The term 'United States', when used in a geographical sense, refers to the fifty States, the District of Columbia, a Commonwealth, and any possessions of the United States.

"(i) SPECIAL RULE.—The classification of particular trade or business activities within the Standard Industrial Classification Codes for purposes of this chapter shall be the classification of such activities that exists as of January 1, 1986. Any subsequent changes in such classifications of trade or business activities shall be effective for purposes of this chapter only upon the approval of the Secretary. The determination of the proper classification of particular trade or business activities within the Standard Industrial Classification Codes for purposes of this chapter shall be made by the Secretary.

"SEC. 4687. RETURN REQUIREMENT; TAXABLE PERIOD; PAYMENT OF TAX.

"(a) RETURN REQUIREMENT.—

"(1) IN GENERAL.—Except as provided in this subsection, each taxable person shall file a return of the tax imposed by section 4685 for any taxable period not later than the due date (including extensions) under chapter 1 for a taxable year that is the calendar year.

"(2) EXCEPTIONS.—The Secretary may exempt by regulation any taxable person from the requirement in paragraph (1).

"(b) TAXABLE PERIOD.—For purposes of this chapter, the term 'taxable period' means the calendar year.

"(c) PAYMENT OF TAX.—In the case of any taxable person with respect to whom a tax is imposed under section 4685 for any taxable period, such person shall make quarterly deposits of the estimated amount of such tax for the next succeeding taxable period.

"(d) REGULATIONS.—The Secretary shall prescribe such regulations as may be necessary to carry out the purposes of this chapter.

"SEC. 4688. EXEMPTIONS.

"(a) GOVERNMENT ENTITIES.—No tax shall be imposed under section 4685 on the United States, any State or political subdivision thereof, the District of Columbia, a Commonwealth or possession of the United States, or any agency or instrumentality of the foregoing: *Provided, however,* That if any such government entity shall engage in one or more activities during the taxable period that generate more than 1000 kilograms per month of hazardous waste (as defined in section 1004 of the Resource Conservation and Recovery Act and the regulations thereunder), such government entity shall be subject to a fee in an amount equal to the tax that would be imposed under section 4685 if such entity were a taxable person engaging in taxable activities described in section 4001(a)(4).

"(b) CHARITABLE ORGANIZATION.—No tax shall be imposed under section 4685 on any organization that is exempt from tax under chapter 1: *Provided, however,* That if any such organization carries on an unrelated trade or business (within the meaning of section 513) during the taxable period, such organization shall be treated as if it were a taxable person and shall be subject to the tax imposed under section 4685 to the extent of such unrelated trade or business activities.

"SEC. 4689. IMPORT-EXPORT NEUTRALITY.

"(a) EXEMPTION FOR EXPORTS.—

"(1) IN GENERAL.—No tax shall be imposed under section 4685 in respect of trade or business activities of the taxable person that are directly related to the manufacturing of products, or the provision of services, which are to be exported from the United States to locations outside of the United States.

"(2) DETERMINATION OF EXEMPT AMOUNT.—In determining the amount of tax due under section 4001 for the taxable period in respect of category A, B, C, or D activities, the taxable person shall reduce the amount of tax otherwise due in respect of each such category of taxable activities by the amount that is determined as the product of:

"(A) the total amount of tax otherwise due under section 4685 in respect of such category of taxable activities from the taxable person for the taxable period (without regard to this paragraph), multiplied by

"(B) a fraction, the numerator of which is the amount of gross receipts derived by the taxable person during the taxable period from the exportation from the United States of products or services attributable to such category of taxable activities, and the denominator of which is the total amount of gross receipts derived by the taxable person during the taxable period from such category of taxable activities.

"(b) IMPORT EQUALIZATION FEE.—

"(1) IN GENERAL.—There is hereby imposed on the importer with respect to the importation into the United States of products and services an import equalization fee in an amount determined under paragraph (2), which shall be imposed in addition to any duty or tariff otherwise imposed on such importation.

"(2) DETERMINATION OF AMOUNT.—In the case of imports of products or services attributable to category A, B, C, or D activities (within the meaning of section 4685(b)) conducted outside of the United States, the amount of the fee described in paragraph (1) shall be equal to the product of—

"(A) the customs value (or if there is no such customs value, the fair value of the imported product or service (determined as of the time of importation)), multiplied by

"(B) a fraction (as determined by the Secretary), the numerator of which is the total amount of tax imposed under section 4685 in respect of category A, B, C, or D activities (whichever is applicable) during the preceding calendar year (or such earlier year as the Secretary may designate) and the denominator of which is the total gross value of the products manufactured or the services provided in the United States during such year attributable to category A, B, C, or D activities (whichever is applicable).

"(c) REGULATIONS, ETC.—The Secretary shall publish not less than annually in an appropriate form the information described in subsection (b)(2)(B). The Secretary may promulgate such regulations as he deems necessary to carry out the provisions of this section.

"SEC. 4690. TAX TO APPLY ONLY IF SHORTFALL IN SUPERFUND.

"(a) GENERAL RULE.—

"(1) IN GENERAL.—The tax imposed by this subchapter shall apply only if the Secretary determines under subsection (b) that there will be shortfall in the Superfund.

"(2) PERIOD DURING WHICH TAX APPLIES; TERMINATION OF WASTE-END TAX.—If the Secretary determines under subsection (b) that there will be a shortfall in the Superfund—

"(A) the tax imposed by this subchapter shall apply to taxable periods beginning on or after the applicable commencement date and ending before January 1, 1991, and

"(B) the taxes imposed by subchapter C (relating to hazardous waste management tax) shall not apply during any period during which the tax imposed by this subchapter applies.

"(b) DETERMINATION OF SHORTFALL.—

"(1) IN GENERAL.—Not later than July 1 of 1988 and 1989, the Secretary (in consultation with the Administrator of the Environmental Protection Agency) shall determine whether there will be a shortfall in the Superfund as of the applicable commencement date.

"(2) APPLICABLE COMMENCEMENT DATE.—For purposes of this section, the term 'applicable commencement date' means—

"(A) January 1, 1989, in the case of the determination made not later than July 1, 1988, and

"(B) January 1, 1990, in the case of the determination made not later than July 1, 1989.

"(3) SHORT FALL.—For purposes of paragraph (1), a shortfall in the Superfund is the excess (if any) of—

"(A) the amount the Secretary estimates will be expended from the Hazardous Substance Superfund during the period beginning on November 1, 1985, and ending on September 30, 1990, over

"(B) the sum of—

"(i) the aggregate amount the Secretary estimates will be credited to such Fund during such period (determined without regard to the tax imposed by this subchapter and without regard to any repayable advances), and

"(ii) $100,000,000.

"(c) DETERMINATION OF RATE.—

"(1) IN GENERAL.—Each rate of tax set forth in section 4685 shall be adjusted by a uniform percentage established by the Secretary under paragraph (2).

"(2) DETERMINATION OF PERCENTAGE.—The percentage determined under this paragraph is a percentage which the Secretary estimates will eliminate the shortfall in the Superfund determined under subsection (b). The percentage determined under the preceding paragraph shall not exceed the percentage which the Secretary estimates will result in $10,000,000 being credited to the Hazardous Substance Superfund."

(b) CLERICAL AMENDMENT.—The table of subchapters for chapter 38 of such Code is amended by adding at the end thereof the following new item: "Subchapter E. Superfund surcharge tax."

SEC. 418. HAZARDOUS SUBSTANCE SUPERFUND.

(A) IN GENERAL.—Subchapter A of chapter 98 of the Internal Revenue Code of 1954 (relating to establishment of trust funds) is amended by adding after section 9504 the following new section:

"SEC. 9505. HAZARDOUS SUBSTANCE SUPERFUND.

"(a) CREATION OF TRUST FUND.—There is established in the Treasury of the United States a trust fund to be known as the 'Hazardous Substance Superfund' (hereinafter in this section referred to as the 'Superfund'), consisting of such amounts as may be—

"(1) appropriated to the Superfund as provided in this section,

"(2) appropriated to the Superfund pursuant to section 418(b) of the Superfund Revenue Act of 1985, or

"(3) credited to the Superfund as provided in section 9602(b).

"(b) TRANSFERS TO SUPERFUND.—There are hereby appropriated to the Superfund amounts equivalent to—

"(1) the taxes received in the Treasury under section 4611, 4661, 4671, 4674, 4677, 4685, or 4689 (relating to environmental taxes),

"(2) amounts recovered on behalf of the Superfund under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (hereinafter in this section referred to as 'CERCLA'),

"(3) all moneys recovered or collected under section 311(b)(6)(B) of the Clean Water Act,

"(4) penalties assessed under title I of CERCLA, and

"(5) punitive damages under section 107(c)(3) of CERCLA.

"(C) EXPENDITURES FROM SUPERFUND.—

"(1) IN GENERAL.—Amounts in the Superfund shall be available, as provided in appropriation Acts, only for purposes of making expenditures—

"(A) to carry out the purposes of paragraphs (1), (2), (4), and (5) of section 111(a) of CERCIA as in effect on the date of the enactment of the Superfund Amendments of 1985, or

"(B) hereafter authorized by a law which authorizes the expenditure out of the Superfund for a general purpose covered by paragraphs (1), (2), (4), and (5) of such section 111(a) (as so in effect).

"(2) EXCEPTION FOR CERTAIN TRANSFERS, ETC. OF HAZARDOUS SUBSTANCES.—Amounts in the Superfund shall not be available for any transfer or disposal which could not be made but for section 121(i) of CERCLA as in effect on the date of the enactment of the Superfund Amendments of 1985.

"(d) Authority to Borrow.—

"(1) IN GENERAL.—There are authorized to be appropriated to the Superfund, as repayable advances, such as may be necessary to carry out the purposes of the Superfund.

"(2) REPAYMENT OF ADVANCES.—

"(A) IN GENERAL.—Advances made pursuant to this subsection shall be repaid, and interest on such advances shall be paid, to the general fund of the Treasury when the

Secretary determines that moneys are available for such purposes in the Superfund.

"(B) Final repayment.—No advance shall be made to the Superfund after September 30, 1990, and all advances to such Fund shall be repaid on or before such date.

"(C) RATE OF INTEREST.—Interest on advances made pursuant to this subsection shall be at a rate determined by the Secretary of the Treasury (as of the close of the calendar month preceding the month in which the advance is made) to be equal to the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the anticipated period during which the advance will be outstanding and shall be compounded annually.

"(e) LIABILITY OF UNITED STATES LIMITED TO AMOUNT IN TRUST FUND.—

"(1) GENERAL RULE.—Any claim filed against the Superfund may be paid only out of the Superfund.

"(2) COORDINATION WITH OTHER PROVISIONS.—Nothing in CERCLA or the Superfund Amendments of 1985 (or in any amendment made by either of such Acts) shall authorize the payment by the United States Government of any amount with respect to any such claim out of any source other than the Superfund.

"(3) ORDER IN WHICH UNPAID CLAIMS ARE TO BE PAID.—If at any time the Superfund has insufficient funds to pay all of the claims payable out of the Superfund at such time, such claims shall, to the extent permitted under paragraph (1), be paid in full in the order in which they were finally determined."

(b) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, to the Hazardous Substance Superfund for fiscal year—

(1) 1986, $460,000,000,
(2) 1987, $460,000,000,
(3) 1988, $460,000,000,
(4) 1989, $460,000,000, and
(5) 1990, $460,000,000,

plus for each fiscal year an amount equal to so much of the aggregate amount authorized to be appropriated under this subsection (and paragragh (2) of section 221(b) of the Hazardous Substance Response Act of 1980, as in effect before its repeal) as has not been approriated before the beginning of the fiscal year involved.

(c) CONFORMING AMENDMENTS.—

(1) Subtitle B of the Hazardous Substance Response Revenue Act of 1980 (relating to establishment of Hazardous Substance Response Trust Fund) is hereby repealed.

(2) Paragraph (11) of section 101 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 is amended to read as follows:

"(11) 'Fund' or 'Trust Fund' means the Hazardous Substance Superfund established by section 9505 of the Internal Revenue Code of 1954;".

(d) CLERICAL AMENDMENT.—The table of sections for subchapter A of chapter 98 of such Code is amended by adding after the item relating to section 9504 the following new item:

"Sec. 9505. Hazardous Substance Superfund."

(a) EFFECTIVE DATE.—

(1) IN GENERAL.—The amendments made by this section shall take effect on November 1, 1985.

(2) SUPERFUND TREATED AS CONTINUATION OF OLD TRUST FUND.—The Hazardous Substance Superfund established by the amendments made by this section shall be treated for all purposes of law as a continuation of the Hazardous Substance Response Trust Fund established by section 221 of the Hazardous Substance Response Revenue Act of 1980. Any reference in any law to the Hazardous Substance Response Trust Fund established by such section 221 shall be deemed to include (wherever appropriate) a reference to the Hazardous Substance Superfund established by the amendments made by this section.

PART II—LEAKING UNDERGROUND STORAGE TANK TRUST FUND AND ITS REVENUE SOURCES

SEC. 421. ADDITIONAL TAX ON GASOLINE, DIESEL FUEL, AND SPECIAL MOTOR FUELS.

(a) GENERAL RULE.—

(1) GASOLINE.—Section 4081 of the Internal Revenue Code of 1954 (relating to imposition of tax on gasoline) is amended by striking out subsections (a) and (b) and inserting in lieu thereof the following:

"(a) TAX TO FUND HIGHWAY PROGRAM.—

"(1) IN GENERAL.—There is hereby imposed on gasoline sold by the producer or importer thereof, or by any producer of gasoline, a tax of 9 cents a gallon.

"(2) TERMINATION.—On and after October 1, 1988, the tax imposed by paragraph (1) shall not apply.

"(b) ADDITIONAL TAX TO FUND LEAKING UNDERGROUND STORAGE TANK TRUST FUND.—

"(1) IN GENERAL.—In addition to the tax imposed by subsection (a), there is hereby imposed on gasoline sold by the producer or importer thereof, or by any producer of gasoline, a tax of 0.2 cents a gallon.

"(2) TERMINATION.—

"(A) IN GENERAL.—The tax imposed by paragraph (1) shall not apply after the earlier of—

"(i) September 30, 1990, or

"(ii) the last day of the termination month.

"(B) TERMINATION MONTH.—For purposes of subparagraph (A), the termination month is the 1st month as of the close of which the Secretary estimates that the net revenues from the taxes imposed by paragraph (1) and section 4041(d) are at least $850,000,000.

"(C) NET REVENUES.—For purposes of subparagraph (B), the term 'net revenues' means the excess of gross revenues over amounts payable by reason of section 9506(c)(2) (relating to transfer from Leaking Underground Storage Tank Trust Fund for certain repayments and credits)."

(2) DIESEL AND SPECIAL MOTOR FUELS.—Section 4041 of such Code (relating to tax on special fuels) is amended by redesignating subsection (d) as subsection (e) and by inserting after subsection (c) the following new subsection:

"(d) ADDITIONAL TAX ON DIESEL FUEL AND SPECIAL MOTOR FUELS TO FUND LEAKING UNDERGROUND STORAGE TANK TRUST FUND.—

"(1) DIESEL FUEL.—In addition to the taxes imposed by subsection (a), there is hereby imposed a tax of 0.2 cents a gallon on any liquid (other than a product taxable under section 4081)—

"(A) sold by any person to an owner, lessee, or other operator of a diesel-powered highway vehicle for use as a fuel in such vehicle, or

"(B) used by any person as a fuel in a diesel-powered highway vehicle unless there was a taxable sale of such liquid under subparagraph (A).

"(2) SPECIAL MOTOR FUELS.—In addition to the taxes imposed by subsection (a), there is hereby imposed a tax of 0.2 cents a gallon on benzol, benzene, naphtha, liquefied petroleum gas, casing head and natural gasoline, or any other liquid (other than kerosene, gas oil, or fuel oil, or any product taxable under section 4081 or paragraph (1) of this subsection—

"(A) sold by any person to an owner, lessee, or other operator of a motor vehicle or motorboat for use as a fuel in such motor vehicle or motorboat, or

"(B) used by any person as a fuel in a motor vehicle or motorboat unless there was a taxable sale of such liquid under subparagraph (A).

"(3) TERMINATION.—The taxes imposed by this subsection shall not apply during any period during which no tax is imposed by section 4081(b)."

(b) ADDITIONAL TAXES NOT TRANSFERRED TO HIGHWAY TRUST FUND OR AIRPORT AND AIRWAY TRUST FUND.—

(1) HIGHWAY TRUST FUND.—

(A) IN GENERAL.—Subsection (b) of section 9503 of such Code (relating to transfer to Highway Trust Fund of amounts equivalent to certain taxes) is amended by adding at the end thereof the following new paragraph:

"(4) CERTAIN ADDITIONAL TAXES NOT TRANSFERRED TO HIGHWAY TRUST FUND.—For purposes of paragraphs (1) and (2), the taxes imposed by sections 4041(d) and 4081(b) shall not be taken into account."

(B) CONFORMING AMENDMENT.—Subparagraph (D) of section 9503(c)(4) of such Code (defining motorboat fuel taxes) is amended by striking out "section 4081" and inserting in lieu thereof "section 4081(a)".

(2) AIRPORT AND AIRWAY TRUST FUND.—Subsection (b) of section 9502 of such Code (relating to transfer to Airport and Airway Trust Fund of amounts equivalent to certain taxes) is amended—

(A) by striking out "subsections (c) and (d) of section 4041" in paragraph (1) and inserting in lieu thereof "subsections (c) and (e) of section 4041", and

(B) by striking out "section 4081" in paragraph (2) and inserting in lieu thereof "section 4081(a)".

(c) REPAYMENTS FOR GASOLINE USED ON FARMS, ETC.—

(1) GASOLINE USED ON FARMS.—Subsection (h) of section 6420 of such Code (relating to termination) is amended by striking out "This section" and inserting in lieu thereof "Except with respect to taxes imposed by section 4081(b), this section".

(2) GASOLINE USED FOR CERTAIN NONHIGHWAY PURPOSES OR BY LOCAL TRANSIT SYSTEMS.—Subsection (h) of section 6421 of such Code (relating to effective date) is amended by striking out "This section" and inserting in lieu thereof "Except with respect to taxes imposed by section 4081(b), this section".

(3) FUELS USED FOR NONTAXABLE PURPOSES.—

(A) Subsection (m) of section 6427 of such Code (relating to termination) is amended by striking out "Subsections" and inserting in lieu thereof "Except with respect to taxes imposed by sections 4041(d) and 4081(b), subsections".

(B) Section 6427 of such Code is amended by redesignating subsection (n) as subsection (o) and by inserting after subsection (m) the following new subsection:

"(n) PAYMENTS FOR TAXES IMPOSED BY SECTION 4041(d).—For purposes of subsections (a), (b), and (c), the taxes imposed by section 4041(d) shall be treated as imposed by section 4041(a)."

(C) Paragraph (1) of section 6427(f) of such Code (relating to gasoline used to

produce certain alcohol fuels) is amended by striking out "section 4081" and inserting in lieu thereof "section 4081(a)".

(d) CONTINUATION OF CERTAIN EXEMPTIONS FROM ADDITIONAL TAXES.—

(1) Subsection (b) of section 4041 of such Code (relating to exemption for off-highway business use; exemption for qualified methanol and ethanol fuel) is amended by adding at the end thereof the following new paragraph:

"(3) COORDINATION WITH TAXES IMPOSED BY SUBSECTION (d).—

"(A) IN GENERAL.—Except as provided in subparagraph (B), rules similar to the rules of paragraphs (1) and (2) shall apply with respect to the taxes imposed by subsection (d).

"(B) TERMINATION NOT TO APPLY.—Subparagraph (C) of paragraph (2) shall not apply with respect to the taxes imposed by subsection (d)."

(2) Paragraph (3) of section 4041(f) of such Code (relating to exemption for farm use) is amended by striking out "On and after" and inserting in lieu thereof "Except with respect to the taxes imposed by subsection (d), on and after".

(3) The last sentence of section 4041(g) of such Code (relating to other exemptions) is amended by striking out "Paragraphs" and inserting in lieu thereof "Except with respect to the taxes imposed by subsection (d), paragraphs".

(4) The last sentence of section 4221(a) of such Code (relating to certain tax-free sales) is amended by striking out "4081" and inserting in lieu thereof "4081(a)".

(e) EFFECTIVE DATE.—The amendments made by this section shall take effect on November 1, 1985.

SEC. 422. LEAKING UNDERGROUND STORAGE TANK TRUST FUND.

(a) IN GENERAL.—Subchapter A of chapter 98 of the Internal Revenue Code of 1954 (relating to establishment of trust funds) is amended by adding after section 9505 the following new section:

"SEC. 9506. LEAKING UNDERGROUND STORAGE TANK TRUST FUND.

"(a) CREATION OF TRUST FUND.—There is established in the Treasury of the United States a trust fund to be known as the 'Leaking Underground Storage Tank Trust Fund', consisting of such amounts as may be appropriated or credited to such Trust Fund as provided in this section or section 9602(b).

"(b) TRANSFERS TO TRUST FUND.—There are hereby appropriated to the Leaking Underground Storage Tank Trust Fund amounts equivalent to—

"(1) taxes received in the Treasury under sections 4041(d) and 4081(b) (relating to additional taxes on motor fuels and gasoline), and

"(2) amounts collected under section 9003(h)(3) of the Solid Waste Disposal Act.

"(c) EXPENDITURES.—

"(1) IN GENERAL.—Except as provided in paragraph (2), amounts in the Leaking Underground Storage Tank Trust Fund shall be available, as provided in appropriation Acts, only for purposes of making expenditures to carry out section 9003(h) of the Solid Waste Disposal Act as in effect on the date of the enactment of the Superfund Amendments of 1985.

"(2) TRANSFERS FROM TRUST FUND FOR CERTAIN REPAYMENTS AND CREDITS.—

"(A) IN GENERAL.—The Secretary shall pay from time to time from the Leaking Underground Storage Tank Trust Fund into the general fund of the Treasury amounts equivalent to—

"(i) amounts under—

"(I) section 6420 (relating to amounts paid in respect of gasoline used on farms),

"(II) section 6421 (relating to amounts paid in respect of gasoline used for certain nonhighway purposes or by local transit systems), and

"(III) section 6427 (relating to fuels not used for taxable purposes), and

"(ii) credits allowed under section 34, with respect to the taxes imposed by sections 4041(d) and 4081(b).

"(B) TRANSFERS BASED ON ESTIMATES.—Transfers under subparagraph (A) shall be made on the basis of estimates by the Secretary, and proper adjustments shall be made in amounts subsequently transferred to the extent prior estimates were in excess of or less than the amounts required to be transferred.

"(d) LIABILITY OF THE UNITED STATES LIMITED TO AMOUNT IN TRUST FUND.—

"(1) GENERAL RULE.—Any claim filed against the Leaking Underground Storage Tank Trust Fund may be paid only out of such Trust Fund.

"(2) COORDINATION WITH OTHER PROVISIONS.—Nothing in the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 or the Superfund Amendments of 1985 (or in any amendment made by either of such Acts) shall authorize the payment by the United States Government of any amount with respect to any such claim out of any source other than the Leaking Underground Storage Tank Trust Fund.

"(3) ORDER IN WHICH UNPAID CLAIMS ARE TO BE PAID.—If at any time the Leaking Underground Storage Tank Trust Fund has insufficient funds to pay all of the claims out of such Trust Fund at such time, such claims shall, to the extent permitted under paragraph (1), be paid in full in the order in which they were finally determined."

"(b) CLERICAL AMENDMENT.—The table of sections for subchapter A of chapter 98 of such Code is amended by adding after the item relating to section 9505 the following new item:

"SEC. 9506. Leaking Underground Storage Tank Trust Fund."

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on November 1, 1985.

PART III—OIL SPILL LIABILITY TRUST FUND AND ITS REVENUE SOURCES

SEC. 431. INCREASE IN ENVIRONMENTAL TAX ON PETROLEUM.

(a) IN GENERAL.—Subsections (a) and (b) of section 4611 of the Internal Revenue Code of 1954 (relating to environmental tax on petroleum), as amended by section 411 of this Act, are each amended by striking out "of 3.85 cents a barrel" and inserting in lieu thereof "at the rate specified in subsection (c)".

(b) INCREASE IN TAX.—Section 4611 of such Code is amended by redesignating subsections (c) and (d) as subsections (d) and (e), respectively, and by inserting after subsection (b) the following new subsection:

"(c) RATE OF TAX.—

"(1) IN GENERAL.—The rate of the taxes imposed by this section is the sum of—

"(A) the Hazardous Substance Superfund financing rate, and

"(B) the Oil Spill Liability Trust Fund financing rate.

"(2) RATES.—For purposes of paragraph (1)—

"(A) the Hazardous Substance Superfund financing rate is 4 cents (4.6 cents for 1989 and 1990) a barrel, and

"(B) the Oil Spill Liability Trust Fund financing rate is 1.3 cents a barrel."

(c) CONFORMING AMENDMENTS.—

(1) Subsection (e) of section 4611 of such Code (relating to application of taxes), as redesignated by subsection (b), is amended to read as follows:

"(e) APPLICATION OF TAXES.—

"(1) SUPERFUND RATE.—The Hazardous Substance Superfund financing rate under subsection (c) shall apply after October 31, 1985, and before October 1, 1990.

"(2) OIL SPILL RATE.—The Oil Spill Liability Trust Fund financing rate under subsection (c) shall apply after December 31, 1985, and before October 1, 1990."

(2) Subsection (d) of section 4661 of such Code (relating to termination of tax on certain chemicals) is amended to read as follows:

"(d) APPLICATION OF TAXES.—The tax imposed by this section shall apply after October 31, 1985, and before October 1, 1990."

(3) Subsection (b) of section 9505 of such Code (relating to transfers to Superfund) is amended by adding at the end thereof the following:

"In the case of the tax imposed by section 4611, paragraph (1) shall apply only to so much of such tax as is attributable to the Superfund financing rate under section 4611(c)."

(d) EFFECTIVE DATE.—The amendments made by this section shall take effect on January 1, 1986.

SEC. 432. OIL SPILL LIABILITY TRUST FUND.

(a) IN GENERAL.—Subchapter A of chapter 98 of the Internal Revenue Code of 1954 (relating to establishment of trust funds) is amended by adding after section 9506 the following new section:

"SEC. 9507. OIL SPILL LIABILITY TRUST FUND.

"(a) CREATION OF TRUST FUND.—There is established in the Treasury of the United States a trust fund to be known as the 'Oil Spill Liability Trust Fund', consisting of such amounts as may be appropriated or credited to such Trust Fund as provided in this section or section 9602(b).

"(b) TRANSFERS TO TRUST FUND.—There are hereby appropriated to the Oil Spill Liability Trust Fund amounts equivalent to—

"(1) taxes received in the Treasury under section 4611 (relating to environmental tax on petroleum) to the extent attributable to the Oil Spill Liability Trust Fund financing rate under section 4611(c),

"(2) amounts recovered, collected, or received under title I of the Comprehensive Oil Pollution Liability and Compensation Act,

"(3) amounts remaining on the date of the enactment of this section in the Deep Water Port Liability Fund established by section 18(f) of the Deep Water Port Act of 1974, and

"(4) amounts remaining on the date of the enactment of this section in the Offshore Oil Pollution Compensation Fund established under section 302 of the Outer Continental Shelf Lands Act Amendments of 1978.

"(c) EXPENDITURES.—

"(1) IN GENERAL.—Amounts in the Oil Spill Liability Trust Fund shall be available, as provided in appropriation Acts, only for purposes of making expenditures for—

"(A) the payment of removal costs described in section 101(24)(A) of the Comprehensive Oil Pollution Liability and Compen-

sation Act, as in effect on the date of the enactment of this section,

"(B) the payment of contributions to the International Fund under section 404 of such Act,

"(C) the payment of removal costs for which the Deep Water Port Liability Fund is liable under the Deep Water Port Act of 1974,

"(D) the payment of removal costs for which the Offshore Oil Pollution Compensation Fund is liable under title III of the Outer Continental Shelf Lands Act Amendments of 1978, and

"(E) the payment of all expenses of administration incurred by the Federal Government under the Comprehensive Oil Pollution Liability and Compensation Act. Under regulations prescribed by the Secretary, amounts shall be available under subparagraph (B) with respect to any contribution to the International Fund only in proportion to the portion of the International Fund used for the payment of response costs.

"(2) LIMITATIONS ON EXPENDITURES.—

"(A) $200,000,000 PER INCIDENT.—The maximum amount which may be paid from the Oil Spill Liability Trust Fund with respect to any single incident shall not exceed $200,000,000.

"(B) $30,000,000 MINIMUM BALANCE.—Except in the case of payments described in paragraph (1)(A), a payment may be made from such Trust Fund only if the amount in such Trust Fund after such payment will not be less than $30,000,000.

"(d) AUTHORITY TO BORROW.—

"(1) IN GENERAL.—There are authorized to be appropriated to the Oil Spill Liability Trust Fund, as repayable advances, such sums as may be necessary to carry out the purposes of such Trust Fund.

"(2) LIMITATION ON AMOUNT OUTSTANDING.—The maximum aggregate amount of repayable advances to the Oil Spill Liability Trust Fund which is outstanding at any one time shall not exceed $300,000,000.

"(3) REPAYMENT OF ADVANCES.—Rules similar to the rules of paragraph (2) of section 9505(d) shall apply for purposes of this subsection.

"(e) LIABILITY OF THE UNITED STATES LIMITED TO AMOUNT IN TRUST FUND.—

"(1) GENERAL RULE.—Any claim filed against the Oil Spill Liability Trust Fund may be paid only out of such Trust Fund.

"(2) COORDINATION WITH OTHER PROVISIONS.—Nothing in the Comprehensive Oil Pollution Liability and Compensation Act or the Superfund Amendments of 1985 (or in any amendment made by either of such Acts) shall authorize the payment by the United States Government of any amount with respect to any such claim out of any source other than the Oil Spill Liability Trust Fund.

"(f) ORDER IN WHICH UNPAID CLAIMS ARE TO BE PAID.—If at any time the Oil Spill Liability Trust Fund has insufficient funds (or is unable by reason of subsection (c)(2)) to pay all of the claims out of such Trust Fund at such time, such claims shall, to the extent permitted under such subsections, be paid in full in the order in which they were finally determined."

(b) CLERICAL AMENDMENT.—The table of sections for subchapter A of chapter 98 of such Code is amended by adding after the item relating to section 9506 the following new item:

"Sec. 9507. Oil Spill Liability Trust Fund."

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on January 1, 1986.

PART IV—STUDIES

SEC. 441. STUDY OF IMPACT OF WASTE MANAGEMENT TAX ON DOMESTIC MANUFACTURERS.

(a) GENERAL RULE.—The Secretary of the Treasury or his delegate shall conduct a study on the effects of the tax imposed by section 4671 of the Internal Revenue Code of 1954 on the ability of domestic manufacturers to compete in international trade.

(b) REPORT.—Not later than July 1, 1986, the Secretary of the Treasury shall submit to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate a report on the study conducted under subsection (a). Such report shall include recommendations to minimize the trade impact of such tax and there shall be considered, in making such recommendations, a waste management tax export credit, an import equalization fee, and a maximum amount of tax with respect to hazardous waste generated by economically distressed industries.

SEC. 442. STUDY OF LEAD POISONING.

(a) IN GENERAL.—The Administrator of the Agency for Toxic Substances and Disease Registry shall, in consultation with the Administrator of the Environmental Protection Agency and other officials as appropriate, not later than March 1, 1986, submit to the Committee on Environment and Public Works, and the Committee on Finance, of the Senate and the Committee on Energy and Commerce, and the Committee on Ways and Means, of the House of Representatives, a report on the nature and extent of lead poisoning in children from environmental sources. Such report shall include, at a minimum, the following information:

(1) an estimate of the total number of children, arrayed according to Standard Metropolitan Statistical Area or other appropriate geographic unit, exposed to environmental sources of lead at concentrations sufficient to cause adverse health effects;

(2) an estimate of the total number of children exposed to environmental sources of lead arrayed according to source or source types;

(3) a statement of the long term consequences for public health of unabated exposures to environmental sources of lead, including (but not limited to) diminution in intelligence and increases in morbidity and mortality; and

(4) methods and alternatives available for reducing exposures of children to environmental sources of lead.

(D) EVALUATION OF SPECIFIC SITES.—Such report shall also score and evaluate specific sites at which children are known to be exposed to environmental sources of lead due to releases, utilizing the Hazard Ranking system of the National Priorities List.

(c) AUTHORIZATION FROM SUPERFUND.—There are authorized to be appropriated from the Hazardous Sustenance Superfund such sums as may be necessary to prepare and submit the report required by this section.

PART V—COORDINATION WITH OTHER PROVISIONS OF THIS ACT

SEC. 451. COORDINATION.

Notwithstanding any provision of this Act not contained in this title, any provision of this Act (not contained in this title) which—

(1) imposes any tax, premium, or fee,

(2) establishes any trust fund, or

(3) authorizes amounts to be expended from any trust fund which are not also authorized by this title,

shall have no force of effect.

H.R. 3128

By Mr. BUSTAMANTE:

—On page 114, amend line 22, Sec. 214 (a) (2) to read as follows: "For the arrival of a commercial truck, $5, but no fee shall be charged for the arrival of a commercial truck during any calendar year after a total of $100 in fees has been paid to the Secretary of the Treasury for the provision of customs services for all arrivals of such commercial trucks during such calendar year."

By Mr. ROSTENKOWSKI:

—Page 162, after line 14 add the following new title:

TITLE VI—AMENDMENTS RELATING TO SINGLE EMPLOYER PLANS

SEC. 601. EXCISE TAX ON UNPAID LIABILITY TO PENSION PLAN AT PLAN TERMINATION.

(a) IN GENERAL.—Chapter 43 of the Internal Revenue Code of 1954 (relating to qualified pension, etc., plans) is amended by adding at the end thereof the following new section:

"SEC. 4979. TAX ON UNPAID EMPLOYER LIABILITY TO PENSION PLAN AT PLAN TERMINATION.

"(a) INITIAL TAX.—

"(1) IN GENERAL.—In the case of an employer who maintains a plan to which section 4062 of the Employee Retirement Income Security Act of 1974 applies, there is hereby imposed a tax equal to 5 percent of the portion of any required payment which is not paid on the date such payment is required.

"(2) REQUIRED PAYMENT.—For purposes of this section, the term 'required payment' means, with respect to any date, the portion of the termination liability of the employer which is required to be paid on such date pursuant to section 4062 of the Employee Retirement Income Security Act of 1974 plus interest on such portion at the adjusted rate applicable under section 6621(b).

"(b) ADDITIONAL TAX WHERE LIABILITY REMAINS UNPAID.—

"(1) IN GENERAL.—If any required payment remains unpaid as of the close of the 90-day period beginning on the date such payment is required, the tax imposed by subsection (a) shall be increased by—

"(A) 5 percent of the portion of such payment which is unpaid as of the close of such 90-day period, and

"(B) an additional 5 percent of the portion of such payment which is unpaid as of the close of each 30-day period thereafter.

"(2) LIMITATION ON ADDITIONAL TAX.—The amount of the additional tax imposed by reason of this subsection with respect to any required payment shall not exceed the portion of such payment which is not paid before the close of the 90-day period beginning on the date such payment is required.

"(c) TERMINATION LIABILITY.—For purposes of this section—

"(1) IN GENERAL.—The term 'termination liability' means the excess of—

"(A) the current value of the plan's benefits guaranteed under title IV of the Employee Retirement Income Security Act of 1974 on the date of termination, over

"(B) the current value of the plan's assets allocable to such benefits on the date of termination.

For purposes of subparagraph (B), the current value of the plan's assets shall be determined without regard to any receivable which is attributable to any accumulated funding deficiency.

"(2) LIMITATION ON LIABILITY WHERE EMPLOYER CEASES TO EXIST.—

"(A) IN GENERAL.—In the case of an employer which ceases to exist (and with respect to which no other person is liable under section 4062 of the Employee Retirement Income Security Act of 1974 for the liability under such section of such employer), the excess of—

"(i) the amount of the termination liability under paragraph (1) (determined without regard to this paragraph), over

"(ii) the accumulated funding deficiency (if any) as of the date of termination,

shall not exceed 30 percent of the net worth of the employer.

"(B) DETERMINATION OF NET WORTH.—For purposes of subparagraph (A), the determination of the net worth of the employer shall be made—

"(i) as of a day, chosen by the Pension Benefit Guaranty Corporation but not more than 120 days before the date of termination, and

"(ii) without regard to any liability under section 4062 of the Employee Retirement Income Security Act of 1974.

"(3) RULES RELATING TO ACCUMULATED FUNDING DEFICIENCY.—For purposes of this subsection—

"(A) WAIVED FUNDING DEFICIENCY INCLUDED IN ACCUMULATED FUNDING DEFICIENCY.—The accumulated funding deficiency of an employer shall include the amount of any waived funding deficiency (as defined in section 412(d)(3)) of such employer.

"(B) ACCUMULATED FUNDING DEFICIENCY.—The term 'accumulated funding deficiency' has the meaning given such term by the last 2 sentences of section 412(a).

"(4) COORDINATION WITH DETERMINATION OF LIABILITY UNDER SECTION 4062 OF ERISA.—Subtitle D of title IV of the Employee Retirement Income Security Act of 1974 shall apply for purposes of determining termination liability under this subsection.

"(d) CREDIT AGAINST ADDITIONAL TAX.—There shall be allowed as a credit against the tax imposed by this section with respect to any termination liability an amount equal to the lesser of—

"(1) the amount paid, not later than 2 years after the date of final determination, to the Pension Benefit Guaranty Corporation with respect to such liability, or

"(2) the amount of the tax imposed by reason of subsection (b).

"(e) SPECIAL RULES.—For purposes of this section—

"(1) LIABILITY ONLY AFTER FINAL DETERMINATION.—The tax imposed by this section shall apply to any termination liability only after a final determination of the amount of such liability.

"(2) LIABILITY OF CONTROLLED GROUP.—

"(A) IN GENERAL.—Any liability under this section of any member of a controlled group shall be a joint and several liability of all members of such group.

"(B) CONTROLLED GROUP.—For purposes of subparagraph (A), the term 'controlled group' means all persons who are treated as a single employer under subsection (b), (c), (m), or (o) of section 414.

"(3) TITLE 11 AND SIMILAR CASES.—In the case of an employer which is in a title 11 or similar case (as defined in section 368(a)(3)(A))—

"(A) the date such case begins shall be treated as the date of the final determination, and

"(B) the period of the pendency of such case shall be substituted for the 2-year period described in subsection (d)(1).

"(4) REFERENCES TO ERISA.—For purposes of this section—

"(A) except as provided in subparagraph (B), any reference to a provision of the Employee Retirement Income Security Act of 1974 shall be treated as a reference to such provision as in effect on the date of the enactment of this section, and

"(B) for purposes of subsection (a), section 4062 of such Act shall be treated as applying to a plan if such section would have applied to such plan as such section was in effect on such date of enactment."

(b) LIABILITY UNDER SECTION 4062 OF ERISA TO BE JOINT AND SEVERAL AMONG MEMBERS OF CONTROLLED GROUP.—

(1) IN GENERAL.—Section 4062 of the Employee Retirement Income Security Act of 1974 (relating to liability of employer) is amended by adding at the end thereof the following new subsection:

"(f)(1) Any liability under subsection (a) of any member of a controlled group shall be a joint and several liability of all members of such group.

"(2) For purposes of paragraph (1), the term 'controlled group' means all persons who are treated as a single employer under subsection (b), (c), (m), or (o) of section 414 of the Internal Revenue Code of 1954."

(2) TECHNICAL AMENDMENT.—Paragraph (2) of section 404(g) of the Internal Revenue Code of 1954 (relating to certain employer liability payments considered as contributions) is amended by striking out "subsection (b) or (c)" and inserting in lieu thereof "subsection (b), (c), (m), or (o)".

(c) NET WORTH LIMITATION ON LIABILITY OF EMPLOYER TO APPLY ONLY WHERE EMPLOYER GOES OUT OF BUSINESS.—Subsection (b) of section 4062 of the Employee Retirement Income Security Act of 1974 is amended to read as follows:

"(b)(1) Any employer to which this section applies shall be liable to the corporation in an amount equal to the excess of—

"(A) the current value of the plan's benefits guaranteed under this title on the date of termination, over

"(B) the current value of the plan's assets allocable to such benefits on the date of termination.

For purposes of subparagraph (B), the current value of the plan's assets shall be determined without regard to any receivable which is attributable to any accumulated funding deficiency.

"(2)(A) In the case of an employer which ceases to exist (and with respect to whose liability under this section no other person is liable) the excess of—

"(i) the amount of the liability under paragraph (1) (determined without regard to this paragraph), over

"(ii) the accumulated funding deficiency (if any) as of the date of termination,

shall not exceed 30 percent of the net worth of the employer.

"(B) For purposes of subparagraph (A), the determination of the net worth of the employer shall be made—

"(i) as of a day, chosen by the corporation but not more than 120 days before the date of termination, and

"(ii) without regard to any liability under this section.

"(3) For purposes of this subsection—

"(A) the accumulated funding deficiency of an employer shall include the amount of any waived funding deficiency (as defined in section 412(d)(3) of the Internal Revenue Code of 1954) of such employer, and

"(B) the term 'accumulated funding deficiency' has the meaning given such term by the last 2 sentences of section 412(a) of such Code."

(d) PBGC MUST OFFER OPTIONS TO PAY LIABILITY OVER 5 AND 15 YEARS.—Section 4067 of the Employee Retirement Income Security Act of 1974 is amended—

(1) by inserting "(a)" before "The corporation", and

(2) by adding at the end thereof the following:

"(b) Among the options offered by the corporation shall be—

"(1) a 5-year amortization of the liability, and

"(2) a 15-year amortization of the liability.

If the employer has not ceased business and if the corporation deems that to do so will not jeopardize the collection of the liability, no security shall be required in the case of the 5-year amortization of the liability.

"(c) In any deferred payment arrangement under this section, interest from the date of termination shall be charged at the adjusted rate applicable under section 6621(b) of the Internal Revenue Code of 1954."

(e) DEDUCTION FOR EMPLOYER LIABILITY PAYMENTS TO PBGC.—Subsection (g) of section 404 of the Internal Revenue Code of 1954 (relating to certain employer liability payments considered as contributions) is amended by inserting "(as such sections and part were in effect on the date of the enactment of this parenthetical material)" after "1974".

(f) CLERICAL AMENDMENT.—The table of sections for chapter 43 of such Code is amended by adding at the end thereof the following new item:

"SEC. 4979. TAX ON UNPAID EMPLOYER LIABILITY TO PENSION PLAN AT PLAN TERMINATION.

(g) EFFECTIVE DATES.—

(1) IN GENERAL.—Except as provided in paragraph (2), the amendments made by this section shall apply to terminations with respect to which notification is filed with the Pension Benefit Guaranty Corporation after the date of the enactment of this Act.

(2) DEDUCTION FOR EMPLOYER PAYMENTS.—The amendment made by subsection (e) shall apply to taxable years ending after the date of the enactment of this Act.

SEC. 602. SECURITY FOR WAIVERS OF MINIMUM FUNDING STANDARD AND EXTENSIONS OF AMORTIZATION PERIOD.

(a) AMENDMENTS TO THE EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974.—

(1) IN GENERAL.—Part 3 of subtitle B of title I of the Employee Retirement Income Security Act of 1974 is amended—

(A) by redesignating section 306 (29 U.S.C. 1086) as section 307; and

(B) by inserting after section 305 (29 U.S.C. 1085) the following new section:

"SECURITY FOR WAIVERS OF MINIMUM FUNDING STANDARD AND EXTENSIONS OF AMORTIZATION PERIOD

"SEC. 306. (a) IN GENERAL.—Except as provided in subsection (c), the Secretary of the Treasury may require security to a single-employer plan as a condition for granting or modifying a waiver of the minimum funding standard with respect to such plan under section 303 of this Act or section 412(d) of

the Internal Revenue Code of 1954 or an extension of an amortization period with respect to such plan under section 304 of this Act or section 412(e) of such Code. The providing of such security to the plan in accordance with this section shall not be considered an extension of credit for purposes of part 4 of this subtitle or section 4975 of such Code. Such security may be perfected and enforced only by the Pension Benefit Guaranty Corporation or by the employer acting at the direction of the Corporation.

"(b) CONSULTATION WITH THE PENSION BENEFIT GUARANTY CORPORATION.—Except as provided in subsection (c), before granting or modifying a waiver of the minimum funding standard with respect to a single-employer plan under section 303 of this Act or section 412(d) of the Internal Revenue Code of 1954 or an extension of the amortization period with respect to such plan under section 304 of this Act or section 412(e) of such Code, the Secretary of the Treasury shall provide the Pension Benefit Guaranty Corporation notice of the proposed waiver, modification, or extension and 15 days to comment with respect to such waiver, modification, or extension and shall consider any comments of such Corporation relating to such waiver, modification, or extension which are provided to such Secretary during such period.

"(c) EXCEPTION.—The requirements of subsections (a) and (b) shall not apply in the case of any waiver, modification, or extension referred to in such subsections with respect to a plan if the sum of—

"(1) the outstanding balance of the accumulated funding deficiencies (within the meaning of section 302(a)(2) of this Act and section 412(a) of the Internal Revenue Code of 1954) of the plan (which, for purposes of this paragraph, shall include the amount of any increase in such accumulated funding deficiencies of the plan which would result if all applications for waivers and modifications of the minimum funding standard under section 303 of this Act or 412(d) of such Code and for extensions of the amortization period under such section 304 of this Act or 412(e) of such Code which are pending with respect to such plan were denied),

"(2) the outstanding balance of the amount of waived funding deficiencies of the plan waived under section 303 of this Act or section 412(d) of such Code, and

"(3) the outstanding balance of the amount of decreases in the minimum funding standard allowed under section 304 of this Act or section 412(e) of such Code,

is less than $1,000,000."

(2) CLERICAL AMENDMENT.—The table of sections in section 1 of such act is amended by striking out the item relating to section 306 and inserting in lieu thereof the following new items:

"Sec. 306. Security for waivers of minimum funding standard and extensions of amortization period.
"Sec. 307. Effective dates."

(b) AMENDMENTS TO THE INTERNAL REVENUE CODE OF 1954.—Subsection (f) of section 412 of the Internal Revenue Code of 1954 (relating to requirement that benefits may not be increased during waiver or extension period) is amended—

(1) by striking out "BENEFITS MAY NOT BE INCREASED DURING WAIVER OR EXTENSION PERIOD.—" and inserting in lieu thereof "REQUIREMENTS RELATING TO WAIVERS AND EXTENSIONS.—";

(2) in paragraph (1), by striking out "IN GENERAL.—" and inserting in lieu thereof "BENEFITS MAY NOT BE INCREASED DURING WAIVER OR EXTENSION PERIOD.—"; and

(3) by adding at the end thereof the following new paragraph:

"(3) SECURITY FOR WAIVERS AND EXTENSIONS.—

"(A) IN GENERAL.—Except as provided in subparagraph (C), the Secretary may require security to a single-employer plan as a condition for granting or modifying a waiver of the minimum funding standard with respect to such plan under subsection (d) or an extension of an amortization period with respect to such plan under subsection (e). The providing of such security to the plan in accordance with this paragraph shall not be considered an extension of credit for purposes of section 4975 or part 4 of subtitle B of title I of the Employee Retirement Income Security Act of 1974. Such security may be perfected and enforced only by the Pension Benefit Guaranty Corporation or by the employer acting at the direction of the Corporation.

"(B) CONSULTATION WITH THE PENSION BENEFIT GUARANTY CORPORATION.—Except as provided in subparagraph (C), before granting or modifying a waiver of the minimum funding standard with respect to a single-employer plan under subsection (d) or an extension of the amortization period with respect to such plan under subsection (e), the Secretary shall provide the Pension Benefit Guaranty Corporation notice of the proposed waiver, modification, or extension and 15 days to comment with respect to such waiver, modification, or extension and shall consider any comments of such Corporation relating to such waiver, modification, or extension which are provided to the Secretary during such period.

"(C) EXCEPTION. —The requirements of subparagraphs (A) and (B) shall not apply in the case of any waiver, modification, or extension referred to in such subparagraphs with respect to a plan if the sum of—

"(i) the outstanding balance of the accumulated funding deficiencies (within the meaning of subsection (a)) of the plan (which, for purposes of this clause, shall include the amount of any increase in such accumulated funding deficiencies of the plan which would result if all applications for waivers and modifications of the minimum funding standard under subsection (d) and for extensions of the amortization period under subsection (e) which are pending with respect to such plan were denied),

"(ii) the outstanding balance of the amount of waived funding deficiencies of the plan waived under subsection (d), and

"(iii) the outstanding balance of the amount of decreases in the minimum funding standard allowed under subsection (e), is less than $1,000,000.

(c) EFFECTIVE DATES.—The amendments made by this section shall apply with respect to applications filed after the date of the enactment of this Act.

SEC. 603. TREATMENT OF TRANSACTIONS TO EVADE LIABILITY.

(a) IN GENERAL.—Subtitle D of title IV of the Employee Retirement Income Security Act of 1974 is amended by adding at the end thereof the following new section:

"TREATMENT OF TRANSACTIONS TO EVADE LIABILITY

"SEC. 4069. If, within 10 years before the date of termination, a person undertakes a transaction a principal purpose of which is to fraudulently evade any liability to the corporation, such transaction shall not be treated as transferring such liability (or any portion thereof) away from such person or any member of a controlled group which included such person."

(b) CLERICAL AMENDMENT.—The table of sections in section 1 of such Act is amended by adding after the item relating to section 4068 the following new item:

"Sec. 4069. Treatment of transactions to evade liability."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to transactions after the date of the enactment of this Act.

SEC. 604. STUDY OF RISK RELATED PREMIUM.

The Secretary of the Treasury shall conduct a study on the feasibility of imposing a risk related premium under title IV of the Employee Retirement Income Security Act of 1974 which is based on the different risk exposures imposed on the Pension Benefit Guaranty Corporation by employers with different histories and in different circumstances. The results of such study shall be submitted, not later than 2 years after the date of the enactment of this Act, to the Committee on Ways and Means and the Committee on Education and Labor of the House of Representatives and the Committees on Finance and Labor and Human Resources of the Senate.

Strike out section 8093 (page 82, line 10 through page 84, line 22) and insert in lieu thereof the following:

SEC. 8093. (a) CONDITIONS ON SPENDING FY86 FUNDS FOR BINARY CHEMICAL MUNITIONS.—Funds appropriated in this Act may not be used—

(1) for procurement or assembly of binary chemical munitions (or components of such munitions); or

(2) for establishment of production facilities necessary for procurement or assembly of binary chemical munitions (or components of such munitions),

except in accordance with subsections (b) and (c).

(b) NATO CONSULTATION.—Subject to subsection (c), funds referred to in subsection (a) may be used for procurement or assembly of binary chemical munitions or for the establishment of production facilities necessary for the procurement or assembly of binary chemical munitions (or components of such munitions) if the President certifies to Congress that the United States—

(1) has developed a plan under which United States binary chemical munitions can be deployed under appropriate contingency plans to deter chemical weapons attacks against the United States and its allies; and

(2) has consulted with other member nations of the North Atlantic Treaty Organization (NATO) on that plan.

A plan under clause (1) shall be developed in cooperation with the Supreme Allied Commander, Europe.

(c) CONDITIONS FOR FINAL ASSEMBLY.—Funds referred to in subsection (a) may not be used for the final assembly of complete binary chemical munitions before October 1, 1987, and may only be used for such purpose on or after that date if—

(1) a mutually verifiable international agreement concerning binary and other similar chemical munitions has not been entered into by the United States by that date;

(2) the President, after that date, transmits to Congress a certification that—

(A) final assembly of such complete munitions is necessitated by national security interests of the United States and the interests of other NATO member nations;

(B) performance specifications and handling and storage safety specifications established by the Department of Defense with respect to such munitions will be met or exceeded;

(C) applicable Federal safety requirements will be met or exceeded in the handling, storage, and other use of such munitions; and

(D) the plan of the Secretary of Defense for destruction of existing United States chemical warfare stocks developed pursuant to section 1412 of the Department of Defense Authorization Act, 1986 (which shall, if not sooner transmitted to Congress, accompany such certification), is ready to be implemented;

(3) final assembly is carried out only after the end of the 60-day period beginning on the date such certification is received by the Congress;

(4) the plan of the Secretary of Defense for landbased storage of such munitions within the United States during peacetime provides that the two components that constitute a binary chemical munition are to be stored in separate States; and

(5) the plan of the Secretary of Defense for the transportation of such munitions within the United States during peacetime provides that the two components that constitute a binary munition are transported separately.

(d) SENSE OF CONGRESS.—It is the sense of Congress that existing unitary chemical munitions currently stored in the United States and in European member nations of NATO should be replaced by modern, safer binary chemical munitions.

(e) REPORT.—Not later than October 1, 1986, the President shall submit to Congress a report describing the results of consultations among NATO member nations concerning the organization's chemical deterrent posture. The report shall include descriptions of any consultations concerning—

(1) efforts to provide key civilian workers at military support facilities in Europe—

(A) with personal and collective equipment to protect against the use of chemical munitions; and

(B) with the training required for the use of such equipment;

(2) efforts to upgrade the chemical reconnaissance, decontamination, and protective capabilities of the military forces of each NATO member nation to a level adequate to meet the chemical threat identified in NATO intelligence estimates;

(3) efforts to initiate a NATO-wide study of measures required to protect ports, airfields, logistics centers, and command and control facilities in European member nations of NATO against chemical attack; and

(4) efforts to initiate a NATO-wide study of equitable and efficient sharing among NATO member nations of responsibilities with regard to deterring the use of chemical munitions in Europe.

SENATE—*Tuesday, October 29, 1985*

(Legislative day of Monday, October 28, 1985)

The Senate met at 9 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

God of perfect knowledge, understanding, and wisdom, may the light of Thy truth permeate this place and this people. Like the quest for an elusive treasure through the centuries, the question, "What is truth?" has haunted the finest minds and the sincerest souls. In the words of President Lyndon Johnson, "Doing what is right is one thing; the problem is knowing what is right to do." May Senators never relax this pursuit as they wrestle with complex issues; and may they never knowingly trade truth for expediency. Grant to them the wisdom and the will to do what is obvious—knowing and doing right cannot be wrong—what is right for the Nation cannot be wrong for politicians or political parties. Lead them to the right and give them the courage to do it, whatever personal risk may be involved. Gracious God, give them grace to follow truth wherever it leads. In the name of Him Who is truth. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished, able majority leader is recognized.

Mr. DOLE. I thank the Presiding Officer, the President pro tempore.

SCHEDULE

Mr. DOLE. Mr. President, under the standing order the leaders have 10 minutes each, followed by a special order in favor of the Senator from Wisconsin [Mr. PROXMIRE] for not to exceed 15 minutes, and routine morning business not to extend beyond the hour of 9:30 a.m. Then we will return to consideration of the farm bill, S. 1714. I can assure Members that votes will occur throughout the day and possibly one before noon, depending on what amendment may be offered.

I am advised by the managers that they have disposed of a dozen or more so-called minor amendments. We are getting into the major amendments and hopefully they will move rather quickly so we can complete action on the farm bill this week. I urge my colleagues with major amendments to be ready to present their amendments.

We also still have the reconciliation problem. We have a little conflict there because the key players in that effort, Senators DOMENICI and CHILES, are also conferees on the debt ceiling. So their efforts to figure out what we might do on reconciliation may have to be delayed, through no fault of theirs.

We also hope that we can resolve the issue on the State, Justice, and Commerce Departments appropriations bill. I am advised by Senator RUDMAN, the manager on this side, that he hopes to have something resolved, so we could complete action on that bill tomorrow. But, again, that may be doubtful.

We will be in this evening, I am not certain, probably not too late this evening, but after 7 p.m., I would assume, and come back tomorrow morning again at this same hour.

We will, of course, have the usual recess from 12 to 2 p.m. today for the Tuesday policy luncheons of both parties.

Mr. President, I reserve the balance of my time.

RECOGNITION OF THE MINORITY LEADER

The PRESIDENT pro tempore. The distinguished, able Democratic leader is recognized.

Mr. BYRD. Mr. President, I thank the Chair.

Mr. President, I ask unanimous consent that I may reserve my time for use throughout the day.

The PRESIDING OFFICER (Mr. MCCONNELL). Without objection, it is so ordered.

Mr. BYRD. Mr. President, I yield the floor.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin [Mr. PROXMIRE], is recognized for not to exceed 15 minutes.

The distinguished Senator from Wisconsin.

WEINBERGER SHOULD MAKE ARMS CONTROL WORK OR QUIT

Mr. PROXMIRE. Mr. President, when the Secretary of Defense in any administration seriously questions the value of arms control in this nuclear age, we are in trouble. Secretary Weinberger has questioned the value of arms control and, believe me, we are in trouble. After all, the Secretary of Defense is the President's top leader on national security. In every American administration since the dawn of the nuclear age, the Secretary of Defense has been, as he should be, the Nation's prime expert and No. 1 supporter of arms control.

Oh, sure, the Secretary of State also has a great interest and an importance with respect to arms control. Arms control is vital to our foreign policy.

But peace is the objective of the Secretary of Defense every bit as much as it is the prime objective of the Secretary of State. And the Secretary of Defense brings to arms control the practical understanding, as well as the prime responsibility, for defending our country and mustering the military strength to maintain the peace.

This country cannot wisely negotiate an arms control treaty without the most detailed advice and direction by our outstanding military experts. A successful arms control treaty requires a knowledge of how the reduction of specific weapons or a limitation on the further production of specific weapons will affect the U.S. ability to deter war. The Secretary of Defense can provide the most expert advice to the President and the Congress on the verifiability of arms control agreements.

Successful arms control unfortunately is not a matter of good will. It is not the automatic product of an intense yearning for peace. Arms control only succeeds when it is, first, the product of the most painstaking, careful and thorough assessment of military weapons. Second, it only succeeds when it develops a verification process that detects violations. Third, successful arms control requires the ability to act swiftly on such violations. When the President makes the crucial decisions in negotiating an arms control agreement, he should have his Secretary of Defense right at his elbow.

What does all this mean, Mr. President? It means that when an administration has a Secretary of Defense who does not believe in arms control, the country will not have a successful arms control policy. Of course, the President may reject or ignore the advice of the Secretary of Defense. The President may proceed to negotiate a treaty that the Secretary of Defense opposes. In that event, the President would indeed be achieving a suc-

cess in getting an arms control treaty, but that treaty would be almost certainly seriously flawed because, as I say, the President needs the kind of expert military understanding that could both protect the country and advance the cause of peace.

Now, with all this in mind, Mr. President, let us consider precisely what Secretary Weinberger has said on arms control. On Tuesday, October 22, in a speech that the Secretary delivered here in Washington before the Ethics and Public Policy Center, here is part of what he said, according to a report in the Washington Post, and I quote verbatim:

Weinberger in yesterday's speech offered a generally dark view of Soviet arms-control intentions, citing alleged violations by Moscow of the SALT I and Anti-Ballistic Missile (ABM) treaties.

"Recent history shows that arms control has hardly been a raving success," he said.

"Given the failure of previous arms-control agreements to reduce nuclear weapons," he said, "it is difficult to argue that the only moral course of action open to the United States is more of the same."

"There is nothing moral about a situation in which the strength of the democratic nations is slowly eroded," he added.

Now, Mr. President, the Secretary of Defense is much too intelligent a man to make a frontal attack on arms control. The Secretary would appear to be saying that arms control just does not work with the Soviet Union because we cannot trust them. They will cheat. What is wrong with that observation? Answer: An arms control treaty is not necessary between the United States and Canada, or the United States and Israel, or the United States and the United Kingdom. Similarly we have no need for an arms control treaty with Costa Rica or Iceland. Those democracies share our values. We can trust them. They represent no threat to our country. With what country do we need an arms control treaty? Not with Grenada. We need an arms control treaty, and we need it urgently only with a country that could be our adversary. The bigger and more militarily powerful the country the more we need arms control with it. And we need arms control with a country that has a high hostile potential. That means an arms control treaty is not based on mutual affection. It is not based on respect, and it is not based on a mutual, moral value system. So with whom do we need an arms control treaty? With Russia—with Russia—that is who. We need a treaty with a Russian Government whose system most Americans despise, and whose moral values we distrust and reject. Why? Here is why. We should make treaties with the Soviet Union for the plain simple reason that if we do not find a way to live in peace with the U.S.S.R., both countries will cease to live at all. We need an arms control treaty with the Soviet Union because we now live in the nuclear age. We now live in a world that has two nuclear weapons superpowers. We are one. The Soviet Union is the other. Morality has nothing to do with it. Trust has nothing to do with it. The iron necessity of survival has everything to do with it.

Secretary Weinberger should not be wasting his time and ours telling us what villany and treachery the Soviet leaders perpetrate. We know that. He should be working to convince the President that we need an arms control treaty with the Soviet Union that will give us and the Soviet Union the best possible chance to stop the nuclear arms race. Both countries know that in a superpower nuclear war both would perish. Both countries would literally cease to exist. So both have the same motivation. We want to survive. So what do we need? We need a treaty that will stop the nuclear arms race with the toughest kind of verification our great American technology can devise. We need to make sure that the treaty achieves the fullest possible compliance. We need strong enforcement machinery to challenge any Soviet violations. We need the capacity to renounce the treaty and resume the arms race if the Soviet Union significantly—I repeat significantly; that is, with military significance—violates the treaty. What should the Secretary of Defense do if he cannot provide advice to the President on how to achieve these objectives? What should the Secretary do if he cannot design a way to make arms control with the Soviet Union work? Simple. He should resign. Then the President should appoint an arms control Secretary who can help him develop an arms control treaty that will work. After all that is the Secretary's job. No one in Government has a more important job.

THE GENOCIDE CONVENTION BOTH ALLOWS FREE SPEECH AND WOULD ALLOW US TO SPEAK OUT

Mr. PROXMIRE. Mr. President, some critics of the Genocide Convention have warned that the convention defines as punishable too many shadowy acts. While these critics declare their readiness to punish genocide, they charge that the American right of free speech would be threatened by the convention's provision to punish "direct and public incitement to commit genocide." Because of this concern, these critics say that while they support stopping genocide, they cannot support the convention.

Well, these critics should not worry. This provision of the Genocide Convention is wholly consistent with U.S. law. Several Federal statutes define "incitement" as a crime, and the Supreme Court also has determined that incitement is not protected by the first amendment. Perhaps the most conservative member of the Supreme Court is William Rehnquist. William Rehnquist strongly supported the argument I am making here when he was serving as Assistant Attorney General in the Nixon administration. He testified that free speech "could not be * * * and would not be affected in any way by the Genocide Convention."

Some early drafts of the convention in the 1940's might have posed problems for U.S. citizens. The early drafts failed to distinguish between public and private incitement. The American delegation got the definition narrowed to exclude private or indirect incitement as both of these types were too vague and would have raised conflicts with the U.S. Constitution. But these problems were removed from the convention long ago and the provision as it now stands completely protects American free speech.

Therefore, Mr. President, these critics can rest easy. They have argued that they support efforts to halt genocide but simply cannot support the convention because of the threat it would pose to the American right of free speech. But the Genocide Convention poses no threat to that American right. All Senators should support ratification of the Genocide Convention because it both contains adequate protection for the American right of free speech and would allow all Americans to speak out against the crime of genocide.

HOW CONGRESS WILL WIMP OUT ON THE OUTRAGEOUS FEDERAL DEFICITS

Mr. PROXMIRE. Mr. President, I have a statement in which I call attention to the fact that it might not be nearly as easy as many Members of the House and Senate have argued that it will be to meet the 1986 target of the Gramm-Rudman-Hollings amendment; that is, to get the deficit down to $191 billion for fiscal 1986. People say, "Oh, that is easy. This is an incumbents' protection bill." Well, Mr. President, the fact is, it might be very difficult. It might not be. We cannot predict what will happen with the economy. If the economy slows down, and there are many indications that it will, then it is going to be difficult for the Senate and the House to get the deficit below $191 billion.

After all, the predictions were in 1984 that the fiscal year that ended September 30 would have a budget below the deficit that we had in 1984. Was it below it? No. It was far above. It was about $28 billion above it. We now know that we have to cut the deficit by $10 billion—that sounds easy—for 1986. But, Mr. President, that is likely to be very, very difficult if the

economy slips back, particularly in view of the votes cast by Members of this body last week on four appropriation bills when they again and again and again—seven times—turned down proposals that were made to cut the spending by literally billions of dollars.

Mr. President, the final, fatal figures on the fiscal 1985 budget deficit are now in. In the fiscal year that ended last September 30, the deficit again broke all records with a disgraceful $202.8 billion deficit. That record $202.8 billion deficit would swell to about $211.8 billion if we included the more than $9 billion in spending and lending by the Federal Government that are excluded from the budget. Also, this Congress has expressed its determination to exclude Social Security from the budget in the future. Why? Because the Social Security System constitutes a self-financed, self-contained operation. That is correct. So we will take Social Security out of the budget in the near future. What effect will that have? Well, suppose we had excluded Social Security this past year. What would that have done to the deficit? The Social Security Program now shows a surplus of more than $17 billion. It is already segregated and insulated by law from the rest of Government operations. The Federal Government can borrow from the Social Security fund. That borrowing, however, carries the same obligation as borrowing from a private bank. It must be repaid. So it is logical to subtract the Social Security surplus revenue from other Government revenue. If we do that, the final complete deficit would swell to a fat $230 billion in fiscal 1985.

Now what does the $202.8 billion official fiscal 1985 deficit mean for the prospect of achieving what almost everyone calls the fat and easy first year requirement of the Gramm-Rudman-Hollings? This requires the budget for fiscal 1986 to come in at $191 billion. That means the 1986 deficit must be about $12 billion below the 1985 deficit.

Mr. President, this will surprise a lot of Members of Congress but it means that what seemed to be a cinch—a pushover fiscal target for this fiscal year—may be much tougher than most Members of Congress appreciated. Some critics of Gramm-Rudman-Hollings have dubbed it an "incumbent's special," on the grounds that Members running for reelection in 1986 can vote to comply with its easy 1986 target while avoiding cuts in popular spending measures and any tax increase.

But will it be that easy to reduce the deficit by the $12 billion necessary to reach the 1986 target of $191 billion? Those Senators who scoffed at the $191 billion proposed limit on the deficit in 1986 as a nothing-to-it cinch argued that the OMB and CBO had estimated that the fiscal 1986 deficit would be $170 billion. So a deficit of $191 billion looked like an incumbent's happy dream. How sweet it is. The Members of the Congress should vote for the balanced budget promised by Gramm-Rudman-Hollings in 1991 and at the same time keep all the easy spending and no tax increase policy moving right up until the election.

Of course, those who count on easily meeting the $191 billion deficit ceiling in 1986 may luck out. The deficit in the 1986 fiscal year that ends next September 30 just may come in under $191 billion without any sequestering of funds by President Reagan and without any tax increase or further spending cuts. That could happen if the economy continues to bounce merrily along at a better than 3 percent growth rate as it did in the quarter that ended September 30. No one can predict the course of this massive and complex economy of ours. But there is a strong prospect that economic activity may slow down. After all, business in America has breezed along for the past 3 years primarily driven by consumer borrowing and spending.

Why should not that continue? For a very solid reason. American consumers have now pushed themselves more deeply in debt in relation to their income than they have ever been in hock before. Consumer installment debt alone now exceeds 20 percent of personal income, an all-time record. At the same time, the savings of our people has dropped to a pathetic 2 percent of income. Meanwhile, personal income is not rising significantly and is not expected to rise. Also, corporate debt has shot up to a record $3 trillion. That's $3 trillion—not $3 billion. So American business is not in a position to borrow and spend. And the other great source of economic stimulation—the Federal Government—is fumbling around, very unlikely to provide additional stimulus, and, in fact, trying to hold down spending. So it would not be a big surprise if the economy slowed from its present brisk walk to a pokey, ambling saunter. If that happens, the "easy," incumbents' "pushover," the $191 billion budget deficit ceiling, could easily slip out of reach. And, Mr. President, what a fiasco that would be.

Imagine the humiliation for the Congress if the very first year after we had adopted restrictions on the budget with a cinch of a first-year target, we were not even able to make that lead-pipe cinch. It could happen. We would have to go the Presidential sequester route then right off the bat. Unfortunately, this is a real possibility. Last week, the Senate had eight opportunities to cut spending significantly on the four appropriations bills that came before it. Seven times it failed. In the one time it voted for a reduction, it reduced spending by 3 percent—about one-thirtieth of what it could have cut if it had voted for all the proposed reductions. On this record, no one should count on Congress to make the tough decisions on spending.

As I have said, the Senate may luck out in the current fiscal year. Thanks to continued good economic conditions, the Congress may meet the $191 billion ceiling for 1986. But does any cockeyed optimist really believe that Congress will then cut the deficit the necessary $36 billion in the 1987 fiscal year to meet the $145 billion deficit ceiling target the Senate has set by a 75-to-24 vote? Oh, yes, the Congress can do it if it has the will. That will take some very sharp and painful cuts and a substantial tax increase, plus continued onward and upward growth for the American economy. Will all this happen? Maybe. After all, you can invest $1 dollar and win $1 million in a lottery, too.

MYTH OF THE DAY

Mr. PROXMIRE. Mr. President, the myth is that going cold turkey to reduce the debt is unrealistic. As the Senate has debated the merits and liabilities of the Gramm-Hollings-Rudman budget reform package several Senators, including the senior Senator from Wisconsin, have argued that the best way to solve our national debt crisis is to go cold turkey—that is, put our Federal budget on a pay-as-you-go approach. Why wait until 1991 to balance the budget? Why postpone the inevitable? Why not take strong action now?

The answer to these questions has always been—the cold turkey approach is impractical, unfeasible, and unworkable. Well, Mr. President, I am here today to say that this conclusion is a myth. We have evidence that the cold turkey approach will work and work dramatically.

Where is the evidence? We need only look as far as the example of the economic reforms in Argentina.

A year ago Argentina suffered from one of the highest inflation rates in the world—as high as 1,000 percent annually according to some estimates. The local economy was in shambles. Labor unrest was extremely high. Strikes were common—often paralyzing the nation.

Then President Raul Alfonsin was elected and immediately imposed a strict package of economic reforms, the heart of which was a pay-as-you-go approach to budgeting.

What has happened since then? The economic reform has succeeded beyond anyone's expectations. Inflation has been cut to a rate of 3.2 percent in August. The price inspection organizations responsible for holding down increases in retail costs have

been extremely effective. The Government is keeping its pledge to not print money beyond its reserves.

Argentina still has a long way to go. Unemployment is up slightly to about 6.2 percent or 1.5 percent higher than before the reforms. Real wages are down by about 25 percent in the first 7 months of 1985.

But even given these costs, the Argentine population has continued to support the cold turkey approach to solving their economic problems and President Alfonsin retains a high degree of public support.

So, Mr. President, it can be done. It would hurt. There would be costs. There would be dislocations in the economy. But the long-term effects would be positive.

We should not be afraid to dispel this myth and take the necessary action to cut the deficit and place our Government on a pay-as-you-go basis.

Mr. President, I yield the floor.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business for not to extend beyond the hour of 9:30 a.m. with statements therein limited to 5 minutes each.

AMERICAN AID TO MEXICO FOLLOWING EARTHQUAKE

Mr. THURMOND. Mr. President, I rise today to bring to the attention of my colleagues a letter received from His Excellency Jorge Espinosa de los Reyes, Ambassador to the United States from Mexico. In his letter, the Ambassador expresses the appreciation of the Mexican people to Congress for the passage of House Joint Resolution 394, which reaffirmed our historic solidarity with the people of Mexico following the devastating earthquake of September 19, 1985.

Mr. President, I, therefore, ask unanimous consent that the text of the Ambassador's letter be included in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

WASHINGTON, DC,
September 30, 1985.

Hon. STROM THURMOND,
President Pro Tempore of the Senate, Senate Russell Office Building, Washington, DC.

DEAR SENATOR THURMOND: I want to refer to the Joint Resolution adopted by the United States Senate and the House of Representatives on September 20th, regarding the earthquake that recently struck Mexico.

This important document is an indication of the historic solidarity which must guide our bilateral relations as neighbors and is also a proof of our peoples' friendship. However, this is primarily a generous and timely decision by way of which both Houses of the United States Congress have enriched the bonds betweeen the two countries at a time when tragedy puts Mexico into mourning.

The people and the Government of Mexico sincerely appreciate this warm expression of brotherhood and human solidarity that strengthens the friendship between our two nations.

Sincerly yours,
JORGE ESPINOSA DE LOS REYES,
Ambassador.

INTEGRAL VISTAS

Mr. HATCH. Mr. President, one of the most important programs in government is the effort to contain and decrease the pollution of our atmosphere. Note that I didn't say "Federal" Government, because our national air quality effort is being carried out at all levels of government.

In the late 1960's, the case for Federal involvement in air pollution control became apparent. The problem was so pervasive and so needful of regional and national cooperation that the Clean Air Act was designed as a two-step effort with the States carrying out the regulatory program with advice and funding from Washington.

As the program "fleshed-out," an important off-shoot grew out of the need to protect certain special areas of the country. These so-called "class I" areas comprised national parks, wilderness, and similarly sensitive areas. The law required that the States protect these areas, even to the point of preventing pollutants caused elsewhere from drifting over the protected areas.

The Clean Air Act generally focuses on specific pollutants like carbon dioxide, sulfuric acid and photochemical oxidants, but it also must contend with dust and haze. In the case of "integral vistas," the problem is pollutants that obscure the views of some of America's visual treasures.

When Americans visit national parks, they avail themselves of certain potential experiences. They may experience a kinship with nature, greater knowledge about a former President or an appreciation of the courage and sacrifice shown on a battlefield. They also might avail themselves of one or more of the stunning panoramas that can be found in our national parks.

One of the most intriguing things about some of our splendid natural vistas is that so many of them—Grand Canyon, Yosemite, Yellowstone—are recognized by Americans and others who may never have stepped foot in a national park.

Several years ago, the Environmental Protection Agency issued a regulation authorizing the Department of the Interior's National Park Service to identify "integral vistas" that the States might want to consider protecting because of their cultural, historical and environmental values. The procedure was ostensibly advisory. The States didn't have to take the advice and the Secretary of the Interior didn't have to give it.

Earlier this week, Secretary of the Interior Don Hodel decided against issuing a listing of "integral vistas" for consideration by the States. It was a difficult decision, but it was a wise one. States already have the authority to regulate industrial and agricultural activities that pose any threat to the air quality of a nearby class I area. They are not bashful about enforcing it.

The proposal to have the Federal Government formally give advice to various States about the areas they should be especially keen to protect looked an awful lot like the proverbial Federal camel's nose in the tent. No one intended such an outcome, but the Code of Federal Regulations is replete with examples of little initiatives that grew uncontrollably. The States love our scenic treasures just as much as we do. They can be trusted to protect the parks, and to work with the Federal land managers who are charged with doing just that.

It is entirely reasonable to worry that this venture onto uncharted regulatory water might have triggered unanticipated confrontations and litigation.

It isn't every day that a Cabinet officer gets to solve a problem by deciding not to do something. Last Friday belongs to Don Hodel.

DEDICATION OF VIETNAM VETERANS MEMORIAL IN AUGUSTA, ME

Mr. COHEN, Mr. President, I recently had the honor of participating in a very moving ceremony in Augusta, ME—the dedication of a memorial to Vietnam veterans from my State.

The ceremony was filled with the same mix of celebration and elegy which characterized ceremonies at the Vietnam Memorial here in Washington, but it had a very special meaning to the hundreds of friends and families of Vietnam veterans from Maine who gathered in Augusta to pay tribute to the Maine soldiers who served their country.

Of all the speeches given that day, two stood out. Both were given by Vietnam veterans from Maine who knew all too well of the pain and needless waste of Vietnam. Because of the power and crisp articulation of these two speeches, I ask that they be included in the RECORD for the benefit of my colleagues.

The speeches, by Phil Vampatella and John Fitzsimmons, follow:

There being no objection, the speeches were ordered to be printed in the RECORD, as follows:

JOHN FITZSIMMONS, CHAIRMAN, BOARD OF DIRECTORS, VIETNAM VETERANS LEADERSHIP PROGRAM

Governor Brennan, Senator Cohen, Senator Mitchell, Congresswoman Snowe, Distinguished Guests, Family and Friends of Maine's Vietnam Veterans; Thank you for coming.

To the honored guests of this day, Maine's Vietnam Veterans, this Memorial and this day are for you.

Let me talk for a moment to the people who were too young to participate in the era of Vietnam. The anger and confusion that still exists about the Vietnam War must be perplexing. In your history books there are clear reasons on why America entered into other wars and why the public rallied around those causes:

Why would Vietnam Veterans not be treated like other war veterans?

Why was the Nation so bitter over its involvement in the War?

How could a nation with the greatest fire power on earth, lose a war to a country that transported its war material on bicycles down the Ho Chi Minh trail.

Why has it taken 10 years after the war before Vietnam Veterans would receive their homecoming?

Who were these people who served in Vietnam,

The answers to these questions are really multiple choice. For the choice depends upon your experiences and time frame. Even within the Vietnam Veterans Community we see the war very differently. There are several reasons contributing to why Vietnam Veterans have such different perspectives on the war. Unlike soldiers of other wars in which men trained in units and went to war in units. The Vietnam Veterans joined the services alone, went to Vietnam alone and came home alone. The length of the war contributed to the different perspectives. The Marines, who landed in Danang in 1963, may have had the same training at Parris Island as the Marines who withdrew from Danang in 1973, but their perspectives on Vietnam would be completely different. The average age of the Vietnam Veteran was 19 as compared to 26 for WWII. Because we were so young, we weren't prepared to handle the negative reception many of us found at home, so we disappeared and faded into the crowd. In the absence of a collective voice, others have been speaking for us.

In America's need to understand the Vietnam Veteran, it has developed labels to fit the fashionable notion of who those Vietnam Veterans really are. As you know, movies of the times are mere extensions or mirrors of how people perceive life. The movies of the sixties and seventies portrayed the Vietnam Veterans as druggies and losers and now in the 80's we have Chuck and Sylvester reaking havoc across Vietnam as super human fighting machines. Neither portrait reality, for the truth lies somewhere in between.

I'll tell you who we were: we were citizen soldiers. Nurtured by tradition and belief in our country. As people look back at the Vietnam War it is easy, in hindsight, to articulate the reasons why we shouldn't have gotten involved. The Vietnam Veterans generation, like the present generation, are not clairvoyant. We could not foresee the future, we cannot predict what course will always be the right course. We do feel it is important as you look back at Vietnam that you also look at what experiences and influences brought that generation of citizen soldiers to that point in history that led us to serve in Vietnam.

I can remember in the late 50s when I was in elementary school—that we had air raid drills and hid under our desks and my parents' friends built bomb shelters because they feared Russia would attack.

On a cold January in 1961 a young man gave a speech that I can still hear today. In part of his speech, he said these words:

"Let every nation know, whether it wishes us well or ill, that we shall pay any price, bear any burden, meet any hardship, support any friend, oppose any foe to assure the survival and success of liberty."

and he went on to say—

"And so my fellow Americans, "Ask not what your Country can do for You—But what You can do for your Country."

Then the Berlin Wall went up. I remember thinking how bad communism must be if it must lock its people behind walls.

Then the Cuban Missile Crisis. They were going to put nuclear missiles ninety (90) miles off our coast. The whole nation was frozen in time until Russia agreed to dismantle and withdraw its missiles.

It was against this backdrop that President Kennedy announced that he was increasing our troops strength in Vietnam. To help that little country defend itself against the communist aggressors.

Now the torch was passed—

For my Grandfather fought in World War I—

My Father in World War II—

My Uncle in Korea.

Now It was my turn . . . for if it wasn't for the men and women, who served their Country before us, we would not have the land of freedom we have.

It was this base of experiences and beliefs that we entered a new chapter in the history of this Country, called the War in Southeast Asia and before it was over, it showed the best and worst of America.

How, in the only War America ever lost, that lasted fourteen (14) years and cost 189 billion dollars and killed over 58,000 Americans could we ever expect that there could only be one viewpoint from the soldiers who fought.

—Some of us have put Vietnam behind us and wish the whole experience would just fade away.

—Some of us feel we did what our Country asked and are completely dismayed by our government's lack of support and recognition of the effects of Post Traumatic Stress Disorders and Agent Orange.

—Some of us feel that Vietnam was an important lesson for this Country. That it is not our Country Right or Wrong, but rather our Country Right or Change.

—Some of us were frustrated at the politicians for not allowing us to fight the war. We never lost a single major battle in Vietnam, yet the war was lost.

—Some of us believe that our cause was right and would sign up tomorrow to go back and finish the job.

—For we see the fall of Laos and Cambodia and Thailand being threatened and we see the domino theory in action.

—Some of us saw the horrors and hypocrisy of Vietnam and came back and joined groups to try to end the war.

—Some of us still are not sure about the whole Vietnam experience . . . for we don't see Vietnam in black and white . . . but rather gray.

Although we see the war differently, we do have a common bond that ties all together. We remember the faces of the people we left behind—for friends may touch each other's hearts, but men in combat touch each other's souls.

I also want to answer the question of why would 18 Vietnam Veterans come together to give a year and a half of their time and energies in order to build a Memorial here in Maine.

We want the Memorial to remember:

That Vietnam has never ended for some of its soldiers and it is still taking its toll long after the war. Right here in Maine we have soldiers who are suffering from physical problems and Post Traumatic Stress disorders. Because we ask them to pay such a high price for their Country, then it is the Country's moral and financial obligation to make the best psychological and physiological services available for them.

We want the Memorial to remember:

The family members who waited at home and watched the nightly news and tried to live normal lives while their loved ones served in Vietnam.

I want to give an example of the Courage and Fear that some of the people at home had to live through.

Put yourself in this person's place. Your husband is a Navy Pilot and you hear over the news that two planes from his ship have been shot down. And as is the custom, all the Pilot's wives of that ship gather in one place and wait for official confirmation. Can you imagine the tension in the room all day . . . and finally joy when its not your husband, but sorrow when its your friends. Killed, POW or MIA.

That scene was played out over and over again throughout the war. We want the Memorial to remember:

That in the wave of anti-military sentiment that we failed to recognize that our soldiers served gallantly and distinguished themselves.

I am proud to say I'm a friend of:

John Cashwell of Calais, winner of two silver stars and two purple hearts; Bob Norris of Bangor, winner of a silver star; Jon Guay of Lewiston, winner of a Bronze Star; Steve Bentley of Portland winner of the Army Commendation Medal; Our own Executive Director Phil Vampatella of Gray-New Glouster, winner of the Navy Cross, the second highest medal you can win in combat.

And to tell the men and women of Maine who sat on the plane heading to Vietnam, not sure if they would ever return.

I am proud to be a member of that fraternity.

We want the Memorial to remember our POWs and MIAs.

We want the publicity surrounding our Memorial to spark additional interest and bring pressure on the governments of Laos, Cambodia and Vietnam to provide conclusive information of their status

We want the Memorial to remember:

Richard Goggins of Famingdale.

Let me tell you about Rick. Rick was a graduate of Hall-Dale High School in 1965. At Hall Dale, he played football, basketball and football. In fact, he was the captain of the football team. He was the President of the Key Club at Hall Dale. After high school, Rick enrolled at the University of Maine at Augusta and completed its 2-year program. In September 1969, he enlisted in the Army and the following September, he was sent to Vietnam.

Here are some excerpts from a letter Rick sent home while in Vietnam:

MARCH 19, 1971.

MOM: Received your letter containing the application for admittance to the University of Maine. As yet I haven't made up my mind just what I'm going to do. Please be informed I'm receiving the K.J. (Kennebec Journal) keep them coming.

The picture you thought was a snake is probably one of an earthworm. As you see they get quite big here. Some are over three feet long. Thank god its not a leech I would have been gone long ago. The salt does them a job.

However, I don't have to worry about them anymore because I have seen my last days in the field. I now have a rear job as NCOIC. A branch of the Army that works with civilian affairs. It's one of the better jobs available. The officer in charge just happens to be my old hearts playing platoon leader, who left the field 1½ ago. Guess he missed getting beat at "hearts" either that, or he's going to try and win back the money I cleaned him out of while he was in the field. Say hello to all residents of the household for me.

RICK.

P.S. 175 days.

Here are some excerpts from a letter Rick's mother sent to him:

APRIL 17, 1971.

DEAR RICK: Well I think it's about time I wrote you again. Tomorrow is your birthday and I can't remember if I sent you a card or not. I did send a small package and I'll send another on soon. Remember how you used to go swimming on your birthday? If you were here this year, I don't think you would make it. We had another snowstorm last night and the trees and ground are covered with snow. There is still two feet of snow on the brook out back. We have had a lots of that white stuff this year. Weather report just said more snow today.

Thanks for the stamps you sent in Dad's letter. Can you get to a post office to buy some now?

Have you been able to pick up another camera. I kind of miss the pictures you were sending. I show them to the women at work too.

Chet seems to like it where he is. He is doing pretty good in his training. He is getting good in his grades on tests. He is thinking of signing up for another 2 years to get some extra but I forget what it is.

Don't remember if I told you that Ken is sick with mono. He has missed six weeks of school already. This is vacation week and we won't know until Friday if he can go the following week. He'll have a hard time to make up all that work.

Joey is walking all over the place now. He sure keeps us busy chasing him to keep him out of things.

Well, I guess I will have close now, I can't think of anything else of interest.

See you in 146 days.

Love,

MOM, DONNA, KEN and JOEY.

Rick never read that letter. On April 26, 1971, he died in Vietnam.

Rick was awarded the Bronze star.

I could read Rick's citation, but the best citation of Rick's life was captured in a poem written by his brother, Ken, who was still in high school when Rick died.

Here is the second half of the poem Ken wrote, entitled "Rick":

Your things came back,
Your boots, your hat,
I love you, Rick,
I can do that.
Now you're gone,
Only memories remain,
It's lonely now,
I'm going insane.
I wake up at night,
I know you're in the room.
I'm alone now,
And in my gloom.
You were my power of strength,
You were my every being.
When they took that,
They took everything.

We want this Memorial to remember Rick and Allen Hutchinson of Auburn and Charles Sullivan of Bangor, whose names, along with 340 other Mainers, are etched on that long black wall in Washington. For they may have been Sergeants, Captains and Privates for that short time, they were and will always be sons and brothers, whose lives can never be replaced.

We want the Memorial to remember:

Our children and to be remembered by our children's children. That there is honor in serving your Country. But that war should not be glamorized. Don't make War bigger than Life for it is not bigger than Death. For at the end of a bullet there is someone's son dying.

And finally we want the Memorial to remember:

The 16,000 men and women from Maine who served in Vietman, that we respect their service to their Country and have compassion for those who are still feeling the effects of the war.

On behalf of Maine's Vietnam Veterans, I want to thank you from the bottom of my heart for this beautiful Memorial and this day of "Homecoming."

God bless you.

DEDICATION DAY SPEECH BY PHIL VAMPATELLA, EXECUTIVE DIRECTOR, VIETNAM VETERANS LEADERSHIP PROGRAM OF MAINE, INC.

To Governor Brennan, to Senators Cohen and Mitchell, to Representative Snowe, to Roger Richmond and Teresa Getchell, to all the extraordinary people of Maine who have helped to build this magnificent memorial, I welcome you to its dedication. I hope you all forgive me, but I want to take this unique opportunity to speak to my fellow Vietnam veterans.

To all of you . . . to the sailors who served in the South China Sea or on the Mekong River . . . to the marines who fought so gallantly at Khe San . . . to the soldiers who served under the most hellish of conditions . . . to the engineers, the clerks, the cooks . . . to the medics to whom many people in this audience owe their very lives . . . to my fellow airmen . . . to PUFF, the helicopter and B-52 crews . . . to the Red River Rats . . . to all those others in countless jobs too numerous to mention . . . I salute you all and stand proudly before you to tell you that we have done it! This is the day we've been waiting for!

When the Vietnam Veterans Leadership Program was formed, nearly 2 years ago, our prime objective was to do something positive about the image of Vietnam veterans, both in regard to the way we are viewed by others and, more importantly, in the way we view ourselves. We found that, while our organization was making small steps in the right direction, the limited time and resources available to us made it unlikely that we would be able to make a substantial impact on solving the problems we faced.

And we found other things. We found that when we talked about the failures of the war, whether they be military failures, political, economic or social failures, that these failures centered around the fact that the one thing that was missing in all cases was a cause around which the people could rally. There was no battle cry . . . no "Remember the Alamo" . . . no "Remember Pearl Harbor." We did not march off to victory and come home to glory. We went off in ones and twos to fight an enemy we could not even identify and returned alone. We left the nightmare of war for an even greater nightmare that awaited us at home. We were scorned . . . scorned by liberals because we fought the war . . . scorned by conservatives because we lost the war. We were, in fact, a lost generation of servicemen.

Roger Richmond's magnificent memorial, which you will see unveiled today, represents Maine's battle cry. It was conceived by 18 Vietnam veterans. The funds for its construction were raised by Vietnam veterans. Its selection and construction were overseen by Vietnam veterans. Its dedication is being presented to you by Vietnam veterans. Yet it was built in the most cooperative effort I have ever seen.

It represents all those things that were missing during the war. For example, it has been said that we had no clearcut mission in Vietnam . . . the mission here was crystal clear . . . build a memorial and establish a scholarship fund. It has been said that we had no support at home during the war . . . the support that we received during this project not only allowed us to build the memorial . . . it allowed us to establish a scholarship fund for our children and grandchildren and to start that fund with over $35,000. It has been said that the news coverage at home was a negative factor that actually helped to lose the war . . . I'd like to tell you that without the solid support of Maine's news media, we might have lost this memorial. And it has been said that our Government and the people of America let us down during the war . . . while that may be true, it is also true that the Government and the people of Maine were solidly behind us on this project . . . from start to finish.

Now, this memorial is not a panacea. It will never cure post traumatic stress disorder. It will never take away the frustrations of the war or the feelings of betrayal. It will not make the nightmares go away. It cannot lift us from our wheelchairs or replace lost limbs. Most regrettably, it cannot enable us to once again touch the faces of brave young men who never returned.

But is has brought us together and given us a good feeling about ourselves . . . let us enjoy that feeling. Let us revel in the renewed camaraderie that only men in battle can ever know. It is a recognition of our service under the most trying conditions . . . let us accept that recognition with gratitude, and with joy and with dignity. It is a legacy to leave behind so that our children will remember that we served our country well . . . let us be proud of that service. It is a reminder that we must not rest until all of our missing in action are accounted for. It is a reminder to our leaders, current and future, that, while for over 200 years, Americans have been asked to fight and die for great causes, and while they no doubt will be asked to do so again in the future, that never, ever again, must they be asked to make that sacrifice lightly. It is a reminder to the families of the 340 Mainers who were

killed or are still unaccounted-for that their pain is our pain and that the memory of those men will remain, forever, indelibly etched in our minds. And finally, it is reminder for you and me and everyone else who ever views this great memorial to never, ever forget all 58,000 Americans we left behind.

This is our day . . . enjoy it . . . be proud . . . but by all that's holy, never, never forget.

Thank you.

FOREIGN SHOES ARE BAD FOR FEET

Mr. COHEN. Mr. President, as chairman of the Senate Footwear Caucus I have cataloged at length the problems facing the domestic footwear industry and why we need restrictions on the flood of imported shoes. Last week, the Senate sent an encouraging signal on an amendment to provide relief for the shoe and textile industries, and I am hopeful that more conclusive action will soon be taken.

But there is apparently yet another reason why our brows should be furrowed about foreign shoes—they are bad for our feet. According to an article in today's Wall Street Journal, a variety of podiatrists have concluded that shoemakers from foreign countries pay less attention to important points of comfort and good foot health than do shoemakers here at home.

It is bad enough that we are permitting high levels of imported shoes, levels which are closing our factories and throwing our shoeworkers out of jobs. But if it also turns out that we are importing junk food for the feet, then even the dullest eye can discern that these practices must stop.

I ask unanimous consent that the article be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Oct. 28, 1985]

CHEAP IMPORTS PUT THE SQUEEZE ON U.S. FEET

(By Teri Agins)

NEW YORK.—For Jakki Gill, a medical-record clerk, shopping for footwear has become an exasperating and ultimately painful experience.

Most of the modestly priced shoes she tries on are imported, she says, and "fit strangely." They're too tight across the toes or too wide at the heels, she explains, and make her feet and legs ache after a few hours.

Foot specialists across the country are seeing an increase in patients with similar complaints. As more Americans, especially women, buy imported shoes, they're finding it tough to get a good fit. But because of imports—which will account for 77% of all footwear sales in the U.S. this year according to Commerce Department estimates—offer a wide range of fashionable styles at low prices, consumers wear them anyway.

PAYING WITH PROBLEMS

"People are compromising more on shoe fit these days," says Jerome J. Erman, a Union, N.J., podiatrist. "And we're paying for it with more foot problems." Paul Taylor, a podiatrist in Silver Spring, Md., adds, "I see patients wearing cheap imported shoes made of hard plastics who complain they get blisters and a burning sensation on the soles of their feet."

Eugene Milosh, president of the New York-based American Association of Exporters and Importers, feels that imports aren't alone to blame. "The quality is quite high for the medium range and high-quality range from places like Italy," he says. As for cheaper models, he adds, "shoe for shoe and price range for price range," imports stack up well against domestic shoes.

Too tight or too loose, shoes can cause leg pains, backaches and the thick heel calluses that doctors call "pump bumps." Ill-fitting shoes also aggravate hereditary foot problems, such as flat feet, bunions and hammertoes. Podiatrists have even traced an outbreak of one kind of dermatitis to the dyes and glues used in some imported athletic shoes. (The 121.6 million pairs of imported athletic shoes sold in the U.S. last year represented 91.5% of the market.)

BLAME IT ON CHEAP SHOES

Shoes that cost less than $30 a pair are responsible for most of the problems, doctors say. And this end of the market is dominated by imported shoes. In the early 1970's says Buddy Katz, president of Encore Shoe Inc. in Rochester, N.H., "when women started regarding shoes as throwaway fashion items, they wanted more style at all price levels." Foreign shoemakers, who were able to meet the demand more cheaply than American companies, flooded the market with their products.

But the sizing system used for most imported shoes, foot specialists say, isn't as refined as the U.S. system. American shoes, for instance, are ordinarily available in two or three widths. Imports are typically made in one standard width, which is often too wide for the average American foot. In the countries of manufacture, where people are apt to be less ethnically diverse than in the U.S., says Nathaniel Gould, a Manchester, Vt., orthopedist, "most feet tend to fall within a limited range of sizes."

To cater to the U.S. trade, some foreign shoemakers have bought American lasts, the forms on which shoes are built. But many of the 100 to 150 hand operations required to produce a shoe can affect the fit, and some makers "don't make the shoe with accuracy," says David Sterling, president of Sterling Lasts in New York. "They make it for price. We get calls from people who have worn a model made with our lasts for years, which is now made abroad with our lasts but doesn't fit the same."

Rockport Co. in Marlboro, Mass., which imports 70% of the shoes it sells, has found European makers that will supply shoes in half sizes and three widths. Rockport is one of only two brands to have won the American Podiatric Medical Association's seal of acceptance.

But Rockport's shoes aren't considered stylish and usually retail for around $70 a pair. "We just can't make a good shoe for any less," says Jens Bang, Rockport's vice president of marketing.

Some consumers and podiatrists think retailers share the blame for misfits. Part of the reason it's harder to get a good fit from all shoes nowadays, says Donald Skorr, a Memphis podiatrist, is that "salespeople who used to fit shoes aren't around anymore."

Wayne Muller, a longtime shoe retailer in Grand Rapids, Mich., believes children are growing up with no notion of proper fit. "There's a younger generation who're being raised in sneakers, which are fairly easy to fit, and they don't understand it," he says. "They'll just cram their foot in a shoe and wear it."

DEMOCRACY IN PANAMA?

Mr. DURENBERGER. Mr. President, recent events in Panama can only cause extreme concern among Panama's friends throughout the hemisphere. Two pivotal events in the past 6 weeks, the forced resignation of President Nicolas Ardito Barletta and the brutal murder of a vocal critic of Gen. Manuel Antonio Noriega, leave one wondering whether Panama is truly on the road toward democratization.

For many years, the United States and Panama have been closely linked as a result of our mutual interest in the development and operation of the Panama Canal. At times, the bilateral relationship has been somewhat rocky due to differing national perspectives on the management and control of the Canal Zone. Many in the Senate recall the intensity of feeling that the Panama Canal Treaty and its implementing legislation, the Panama Canal Act of 1979, generated in the Congress. With the approval of the Panama Canal Act, I believe that many in Congress felt that the Panamanian-American relationship would stabilize. Moreover, there was at least the appearance of movement toward democratization in Panama over the past 6 years. During this period, the forced resignations of Presidents Aristides Royo and Ricardo de la Espriella were setbacks to this democratization process.

Following a hotly disputed election campaign, Nicolas Ardito Barletta assumed the presidency of Panama in October of 1984. President Ardito Barletta took office amidst charges of voter fraud from the Democratic Opposition Alliance [ADO] and pledged to reduce Panama's expansive public sector and to improve its international credit rating through the imposition of a wide range of austerity measures. Like nearly all countries in our hemisphere, Panama's Government has been following our sorry example in spending far more than it takes in. Ardito Barletta was pursuing the difficult and politically unpopular course of attacking his nation's $3.7 billion foreign debt, which is the world's highest on a per capita basis.

The latest chapter in Panama's crisis began with the murder of Dr. Hugo Spadafora along the Panamanian-Costa Rican border on September 14. Spadafora was clearly a controversial

figure in Panama and had attracted the enmity of General Noriega. Spadafora apparently intended to raise the issue of the defense force's involvement in corruption and drug trafficing. There have been widespread allegations of the involvement of G-2, Panama's military intelligence service, in Spadafora's murder. Costa Rica has initiated a comprehensive investigation as Spadafora was found on the Costa Rican side of the border. General Noriega, unfortunately, has been unwilling to yield to widespread demands in Panama for an independent investigatory commission. President Ardito Barletta also recognized the need for such an independent commission which was outside the control of the Panamanian Attorney General's office. President Ardito Barletta's authorship of a September 27 letter to the Attorney General for this purpose was the last significant act of his presidency. On September 28, it appears that the Panamanian Defense Forces demanded, and received, his resignation.

Perhaps President Ardito Barletta's undoing was the unpalatability of his austerity program to the majority of Panamanians; his greatest misfortune was to challenge the authority of the would-be caudillo who controls Panama's Defense Forces. Gen. Manuel Antonio Noriega and his associates in the defense forces have proven less than supportive of Panama's move toward democracy. In Panama, it appears that the state serves the military—not the reverse, as in an authentic democracy. Friends of Panama in the United States are concerned that the Spadafora murder will set an ugly precedent for Panama that is all-too-common in the rest of the Central American isthmus. Equally worrying to this Senator is the prospect that a democratic future in Panama is being sacrificed by one man's greed for money and power. I would therefore urge General Noriega to seriously consider the consequences of increasing the pressures upon such elements of the democratic opposition as La Prensa and the ADO coalition. The friendship of Panama is important to the United States; a truly democratic Panama is a much more valued ally, however.

Mr. President, I ask unanimous consent that articles on Panama by Georgie Anne Geyer and Michelle Labrut be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Times, Sept. 30, 1985]

(By Georgie Anne Geyer)

DEATH IN PANAMA

The strange destiny of Dr. Hugo Spadafora, 45-year-old Panamanian soldier of fortune and lover of revolutions, now stalks the steamy Central American isthmus he traversed like a driven man.

It is the kind of case that will haunt and very well may change Panamanian history. Yet it has barely been covered by an American press that sees the complex Central-American story only in terms of El Salvador and Nicaragua.

"Who was Hugo Spadafora?" And further, "Who killed him?" are questions that show how clearly Central America, once composed of simple banana republics, more and more resembles the Balkans.

WHAT WE KNOW

Hugo Spadafora, a medical doctor from a good Panamanian family, probably was killed Sept. 14. He was returning the day before from Costa Rica to Panama, secretly by bus—as he often did to avoid detection by the National Guard or anybody else—when his bus was stopped near the border. Men in Panamanian National Guard uniforms boarded the bus and roughly hustled him off.

All the time, Dr. Spadafora was waving his ID card to the passengers, telling them who he was and that these were "G-2," or Defense Forces Intelligence, who were taking him. When his body was found on the Costa Rican side of the border, it was discovered that he had been castrated while alive, his fingernails had been pulled out, and he had been beheaded. The head was never found.

Panama City was and is shocked and enraged. Panama can be a violent place, but this savagery was so far beyond historical norms of behavior that political analysts began wondering worriedly if Panama had not, underneath, changed in ominous ways.

WHAT WENT BEFORE

Dr. Spadafora was, by all accounts, a romantic revolutionary. He had studied in Italy; then, because he had met an African student he liked, he started his career in revolution by fighting in the early anti-colonial war in Guinea-Bissau.

From there he went with the Sandinstas; left the Sandinistas; joined former Sandinista Eden (Commandante Zero) Pastora when he formed an anti-Sandinista guerrilla group; left Mr. Pastora's group; became deputy minister of health in Panama; joined a Miskito Indian anti-Sandinista group; and then left Panama recently, reportedly to start a new "international" guerrilla brigade.

WHAT PEOPLE ARE SAYING

Dr. Spadafora, in his recent forays in and out of Panama by bus, had been regularly attacking the Defense Forces (or National Guard) chief, Gen. Manuel Noriega, for drug trafficking. In particular, he did it through the extraordinary independent paper, *La Prensa.*

Everyone seemed to know that Gen. Noriega—one of the smartest, most cunning political brokers in the hemisphere and a man who deals as well one day with Fidel Castro as the next with the democratic leaders—was not enraged with him. (The truth or untruth of the charges, at this point, is impossible to prove or disprove.)

WHAT ELSE IS GOING ON

One man's horrible death is quite enough, but a disturbing pattern has begun to develop in Panama, a country that always was just enough outside the other Central-American horrors to set it apart.

For instance, another prominent doctor, Mauro Zuniga, was also kidnapped recently, beaten, and left for dead, apparently by men also dressed in guard uniforms. He recovered; but he, like the headless corpse of the once-romantic revolutionary, had had cut on his back "F-8 terrorists."

No one knows exactly what this means, but in recent months, there was the discovery of a mysterious "seventh section" in the National Guard that was a kind of intelligence vigilante section. A few of those men left the guard and revealed some of the secrets. As well, Dr. Zuniga had been part of a professional medical group that had come out against the guard and its chosen political candidates.

The guard's initial statement on the Spadafora killing was a Borgiaesque mix of threats and suggestions warning against any "major tolerance for guerrillas," rejecting "anarchistic methods of certain political and pressure groups," and speaking darkly of "plans from outside."

WHAT IT ALL COULD MEAN

The bigger danger is that the whole agreement so meticulously hammered out between the Carter administration and Panama over the Panama Canal could be foundering on suddenly awakening local Panamanian passions that are taking as-yet-unrevealed but ominous turns.

His enemies charge that the superagent of the Americas, Gen. Noriega, wants to expand the defense forces to four times what they are now in order to take over the defense of the canal; that he wanted to get rid of Panamanian President Nicolas Ardito Barletta [who resigned Saturday, saying he did not have the military or political support to run the government]; and that there lies within Noriega an ambition that burns far beyond the walls of the military headquarters here. He denies such charges.

Whatever the horrible truth of the Spadafora murder, as one knowing Panamanian said to me by telephone just after it occurred, "Somebody wanted to see what would happen."

[From the Miami Herald, Oct. 14, 1985]

NEW PRESIDENT, OLD PROBLEMS FACE PANAMA

(By Michelle Labrut)

PANAMA.—President Eric Arturo Delvalle, installed by the military in the presidential Palace of the Herons last month, must now grapple with the same economic crisis that contributed to his predecessor's downfall.

Delvalle, 48, a sugar planter-turned politician, can probably count on more support from Panama's often cantankerous official party politicians than former President Nicolas Ardito-Barletta ever had.

But he is certain to face increased distrust from the political opposition, international lending agencies and Washington as he comes to grips with an economy wallowing in a $3.7 billion foreign debt, the world's highest on a per capita basis.

Economic Planning Minister Ricaurte Vasquez in fact sent a telegram to Panama's foreign creditors early this week vowing the DelValle government will follow the same economic austerity measures laid out by Ardito-Barletta.

HIGH HOPES

Ardito-Barletta, Panama's first elected president after 16 years of military rule, was inaugurated last Oct. 15 amid hopes he would pull the economy out of a tailspin brought on by the world recession and his country's position as the crossroads of world trade.

Last May, he and the World Bank agreed on a set of belt-tightening measures that included deep cutbacks in the government budget; dismissing 20,000 public employees; increasing corporate and other taxes by $25 million; selling off dozens of money-losing

government enterprises worth $70 million; lowering import tariffs; and relaxing labor laws to increase productivity.

The agreement led the International Monetary fund in July to approve a stand-by credit package through March 1987, which in turn allowed Panama to begin negotiations with 180 foreign banks for the rescheduling of $603 million in debt payments in 1985 and 1986.

But the austerity package angered virtually every sector—government workers, businessmen, labor unions and the ruling Revolutionary Democratic Party, heir to the high-spending populist policies of Gen. Omar Torrijos from 1968 until his death in a 1981 plane crash.

MEASURES DENOUNCED

Conservative opposition politicians vociferously denounced the measures, while privately acknowledging they were needed to jump-start the stalled economy.

Armed Forces chief Gen. Manuel A. Noriega moved on Sept. 27 against Ardito-Barletta, a former World Bank vice president and crackerjack economist whose mistake was not so much in agreeing to the austerity package but in lacking the political savvy to sell it to Panamanians.

Today, Delvalle faces the same need for slashing public spending and increasing government revenues.

"New loans and fresh money are conditioned to the austerity measures, included in the program to be approved by the IMF and World Bank" said Ruben Carles, a former banker and now a leading opposition politician.

Delvalle's lone initial advantage may be that he enjoys some support among the Revolutionary Democrats, who hope he will pay more attention than his predecessor to the negative effects the austerity measures may have on Panama.

"Delvalle will receive support. As a businessman, he understands our situation and will follow a more nationalistic line," said an executive close to the party, still considered the political arm of the powerful National Defense Forces.

LABOR IS FAVORABLE

The same give-him-a-chance mood prevails in the labor movement. Rolando Ordonez, head of the Workers' National Union, said he believes any effort to reform the labor laws, which now virtually forbid the firing of employees, "will be consulted with our organizations."

The opposition remains hardfaced, however, especially in view of Delvalle's ascension to the presidency through a coup rather than elections that would have given him a broad political base.

"Delvalle is a weak president who cannot impose the IMF and World Bank recommendations," said Carles.

Ardito-Barletta's abrupt resignation set off no perceptible panic in the country's offshore banking industry, a key source of foreign revenues. "Outflow of deposits was insignificant," said one prominent Panamanian banker.

But the same financier added that the coup against Ardito-Barletta could have other, perhaps more serious, repercussions.

Ardito-Barletta was the third civilian president ousted by the military in the past three years, the banker noted, and the coup triggered "a negative change in the U.S. banking community, and the U.S. government's attitude."

UNITED STATES DISPLEASED

The U.S. Agency for International Development underlined that displeasure immediately after the coup by cancelling a $5 million grant.

U.S. assistance to Panama burgeoned to an impressive $60 million during Ardito-Barletta's 11-month administration—a powerful factor in Panama's economic life—as Washington sought to help his country's fling with civilian rule.

Official estimates said real growth plunged in 1984 by 1.2 percent, with most sectors declining. A draft U.S. Commerce Department report dated August 1985 says 1985 performance is little better, with growth estimates ranging from "negative 2 percent to positive 1 percent."

SENATOR ROCKEFELLER ANALYZES THE CONRAIL SALE

Mr. DIXON. Mr. President, my distinguished colleague and warm friend from the State of West Virginia, JAY ROCKEFELLER, has authored an article which appears in the most recent edition of LandMarc magazine. The article, entitled "Conrail—Which Direction and How Much?" clearly and convincingly analyzes the proposed Conrail sale. It is an excellent summary of the disadvantages of selling Conrail to Norfolk Southern and of the advantages of a public offering as proposed by Morgan Stanley. I commend Senator ROCKEFELLER's article to all my colleagues. I urge all Senators to put it on their must reading list. Mr. President, I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From LandMarc Magazine, September/October 1985]

CONRAIL—WHICH DIRECTION AND HOW MUCH?

(By Senator John D. Rockefeller IV)

In Appalachia, railroads are more than just a basic means of transportation. To our coal and heavy industry, rail transportation is an indispensable lifeline—an all-important conduit for economic survival and growth.

During my brief tenure as West Virginia's junior Senator, consideration of Secretary of Transportation Elizabeth Dole's recommendation to sell Conrail to the Norfolk Southern Corporation—and what's commonly referred to as the Morgan Stanley "alternative"—has consumed much of my time and legislative energy. From the outset of the debate over "what to do" with the government-owned railroad, it has been my conviction that any proposed sale of Conrail must demonstrate that it would maintain or improve the level of service, efficiency, and competition that existed before the sale. It is also my belief that Congress has the responsibility to ensure that a sale of Conrail will neither disrupt the nation's rail service nor inflict unnecessary hardships upon rail shippers and workers.

What the Wall Street Journal has dubbed "The Great Conrail War" will decide rail transportation options in the East and Midwest for years to come. A Norfolk Southern purchase of Conrail would establish an unparalleled transportation conglomerate, disruptive to the rail system of the East and Midwest, significantly damaging to other railroads' ability to compete and, ultimately not in the best interest of shippers and consumers.

The Morgan Stanley plan provides an immediate and compelling alternative to fulfill the mandate of returning Conrail to the ranks of private enterprise. It maintains a third strong eastern railroad and prevents major disruptions to the nation's rail system.

Suppose that when Chrysler Corporation sought government assistance several years ago to avoid impending bankruptcy, that rather than a package of loans and loan guarantees, the government had assumed liability for its debts and ownership of the company until it could return to a profitable position. Would anybody have entertained the thought of returning a healthy and modernized Chrysler to Ford or General Motors?

Conrail's return to profitability, its upgraded physical plant and its innovative operating style cause this same basic question to be asked when considering the proposed sale of Conrail to the Norfolk Southern rail system.

The debate is not frivolous. It is of major concern to all shippers and especially to bulk shippers of coal, steel, grain and the like. It will affect the cost of electricity charged to customers of coal burning utilities. It will have an impact on whether and how frequently those utilities look to imported coal. It will have an impact on the price and level of coal exports.

The Consolidated Rail Corporation (Conrail) was born in the midst of crisis; a patchwork of the Penn Central and five eastern railroads which were bankrupt. A dilapidated physical plant and a rapidly changing environment for rail transportation combined to do-in once proud and legendary rail lines. The turn-around, even with the estimated $7 billion in federal assistance, has been equally momentous.

From the early going, when Conrail lost $1 million per day, to 1984's profit of $500 million ($408 million when accounting for a return to industry-wide wage rates), the changed balance-sheet since 1981 has established Conrail as a healthy and vigorous competitor, with bright prospects for continued success.

Norfolk Southern (NS) has offered $1.2 billion for the government's 85 percent share of Conrail. They would also purchase the entire 15 percent employee (ESOP) portion of Conrail. NS has further agreed to: 1) return to the government cash considered in "excess" of that needed to meet present and future obligations; 2) give up the tax benefits of prior year net operating losses and investment tax credits; 3) promise to keep $500 million cash on hand at all times during the next five years; and 4) continue an aggressive capital reinvestment plan in the railroad.

Their prize would be to consolidate some 15,000 miles of Conrail track, equipment and facilities, and assets with a book value of about $4 billion, into their existing 18,000 miles of track on the Norfolk and Western and Southern railways. Tax experts continue to debate the precise amount of tax benefit to Norfolk Southern (i.e., sheltering of income) of an acquisition of Conrail, but the Congressional Budget Office has estimated this cost to the Treasury at $400 million. Based on Conrail's estimated depreciable basis in excess of $3 billion, Morgan Stanley estimated Norfolk Southern would reap

nearly a $600 million (present value) windfall.

It should be noted that Norfolk Southern has thus far refused to make public financial projections that would allow a precise analysis of the tax benefits to their company. Suffice it to say that none of the estimates are insubstantial, and the Morgan Stanley estimate is entirely plausible.

The investment group led by Morgan Stanley bests the Norfolk Southern proposal in a number of respects. By their very nature, they propose to keep Conrail independent, with an independent Board of Directors, and to return Conrail to private ownership by way of a public stock offering in the next few years. In the meantime, this group of over 30 sophisticated, blue chip investors—none of whom will control more than 10 percent of the total—have agreed to put their own cash on the line to purchase the government's 85 percent share of Conrail.

The direct cash value of the Morgan Stanley package is $1.2 billion in cash, plus the value of one million stock purchase warrants redeemable at the government's option, plus any excess cash accumulated in the company. In addition, since an independent Conrail avoids the tax implications of a sale to Norfolk Southern, the government nets nearly $600 million additional. An independent Conrail further avoids the employment impacts predicted from a combination with Norfolk Southern, thus preserving an estimated $200 million in payments to the federal railroad retirement fund.

The one railroad investor, CSX Corporation, which has pledged approximately seven percent toward the total, will put their shares in permanent trusteeship, will not participate in management, will not be represented on the Conrail Board of Directors and will not participate in the Executive or Finance committees of the investor group. The Morgan Stanley plan also gives employees an opportunity to keep their share of the employee stock plan or to sell them all for the same $48 per share purchase price paid to the government. In addition, two representatives of employees and two from management would sit on the 15-member Board of Directors.

The Morgan Stanley investors have virtually identical commitments to the government with regard to the return of "excess" cash, maintenance of cash reserves and capital spending. In sum, the Morgan Stanley group has nailed down commitments and accomplished what many Administrations and financial community skeptics said could not be done. In addition to gaining a greater net return to the government, it has the primary benefit of preserving an independent company, and avoiding the disruptive effects of job loss, reduced competition, service uncertainties and rail traffic diversions.

Thousands of pages of documents, claims and counter-claims have sought to debate the future of Conrail and the competing Norfolk Southern and Morgan Stanley plans. Essentially the opposing sides have locked horns on two central issues: first, whether Norfolk Southern's purchase of Conrail would undermine the competitive forces that exist in the railroad business today and second, whether Morgan Stanley's plan would leave Conrail vulnerable to economic decline.

There are hundeds of miles of track where Conrail and Norfolk Southern compete head-to-head. In some cases the combination would reduce service options to one rail carrier; in others three would be reduced to two or the benefit of indirect competition from Conrail would be lost.

The practical, common-sense conclusion emerging from all the studies is that an independent Conrail provides a third strong railroad competitor for eastern and midwestern markets. A somewhat reluctant editorial in Barron's may have best summarized this pragmatic view: ". . . [W]e can't help concluding that the deal struck by DOT and Norfolk Southern is apt to lead to less competition on the nation's railroads rather than more. It would eliminate the rivalry—indirect as well as head-to-head—that currently exists between Norfolk Southern and Conrail."

Recent analyses by the staff of the Interstate Commerce Commission (ICC) have given credence to claims that Norfolk Southern's purchase of Conrail would reduce competition and cause substantial traffic diversion and job loss. One study focused on the specific issue of whether the combination of Conrail and Norfolk Southern would result in traffic diversions that would weaken and disrupt the operations of other railroads.

The other study looked at the viability of the lines that the Justice Department has said must be spun-off from a combined Norfolk Southern/Conrail system in order for head-to-head competition to be preserved.

To satisfy the terms of the sale agreement set down by the Department of Transportation, Norfolk Southern is required to cure the anticompetitive aspects of the combination of railroads that have been noted by the Department of Justice. Although many have argued that the Justice Department's requirement that Norfolk Southern divest itself of certain trackage is inadequate to preserve competition, it can be seen as the minimum necessary to protect shippers and consumers.

To satisfy this requirement, not only must the trackage be sold, but it also must be shown that the purchasers can adequately maintain and operate the lines as viable head-to-head competitors with Norfolk Southern.

Importantly, the August 30 ICC staff study presents the most complete statement to date challenging the wisdom and viability of the divestiture of rail lines to the Guilford and Pittsburgh and Lake Erie rail systems, the divestitures proposed to satisfy the Justice Department's concerns. With regard to the required divestiture to the Guilford system, the ICC staff concluded that "it does not appear that Guilford will be a financially viable carrier" with a revenue base that will inadequately cover its debt service requirements.

The ICC staff is even more pessimistic on the Pittsburgh and Lake Erie saying that it "is not now a financially viable carrier" and the addition of the divested lines "will not enable it to reverse its already precarious financial position."

In the coal business, as well as in many other businesses, competition between railroads—both direct and indirect—translates into all-important rate competition. In West Virginia, even though Conrail is not currently a major rail carrier in the state, it has had an impact. It has acted aggressively to establish more efficient rates on coal haulage and to develop new markets. A comment by Mr. Glenn Schleede, President, New England Energy Inc. demonstrates Conrail's impact:

"We now use three different rail systems to move coal from Appalachia to East Coast ports. Norfolk Southern has the highest rates. If Norfolk Southern were to apply its current rate policies to Conrail, we believe the rates we now pay on Conrail would be increased by 20–25 percent."

Conrail also serves as a major connecting carrier for a significant portion of coal traffic originated on CSX and destined for important Northeast markets. Surely, a combined Norfolk Southern/Conrail system would not turn away all of this traffic, but the long-term health and continuation of the current connection has to be questioned, when Norfolk Southern can readily turn to its Virginia originated coal to fulfill customer orders.

Indeed, the diversion of traffic from CSX to a combined Norfolk Southern/Conrail and from smaller midwestern carriers bears significantly on the debate and on the profitability of several rail lines. The August 2, 1985, ICC staff study, while noting the extreme difference of opinion by CSX and NS on the quantity of coal diversions, finds that "CSX will suffer substantial diversions of its coal and grain traffic." The ICC staff study concluded that it is "reasonable" to assure total diversions away from CSX to a combined Norfolk Southern/Conrail system would total in the range of $143 million to $174 million.

For the smaller regional carriers in the Midwest, the ICC staff adds another $145 million to the sum of potentially diverted traffic. For these smaller carriers, this represents a significant percentage of their traffic base, and could well represent the difference between profit and loss. Thus the total estimate of diverted traffic ranges between $290 million and $320 million.

In sum, the sale of Conrail to Norfolk Southern would cause precisely the type of disruption and weakening of the rail system that it should be in the public interest for Congress to protect against.

To a large degree, the benefit of the Morgan Stanley plan again becomes the fact that it avoids the problems inherent in the Norfolk Southern plan. But skeptics ask, will an independent Conrail fail to be viable and come back to the federal government for an additional handout?

Indeed, Secretary Dole has highlighted Norfolk Southern's so-called "deep pockets"—in her words, "(their) ability to leave Conrail in the strongest financial position after the sale . . . ,"—as a principal rationale for her selection. The concern expressed is that an independent Conrail could slip back into decline either from an economic recession or an erosion of traffic base. In such an instance, it is argued, only a parent company like Norfolk Southern could preserve rail service.

A growing and more convincing body of evidence shows that the exact opposite will occur. The upgrading of the physical plant in recent years, the aggressive trimming of unprofitable lines and unneeded personnel and the implementation of innovative management techniques that allow Conrail to quickly adapt to changing economic climates, positions it to stay among the top rail carriers in the country.

The first six months of 1985 are indicative of the flexibility and resourcefulness of Cornrail. Although Conrail has experienced a decline in revenue ton-miles (i.e., less traffic) and a more sluggish than expected first quarter, it was one of only two major railroads to record pretax earnings ahead of the comparable period in 1984, a record earnings year. Conrail also showed continued improvement of its operating ratio, an important measure of railroad performance.

With the improving picture of Conrail, it is no wonder that railroad valuation expert Isabel H. Benham, referred to in a recent *Forbes* interview as the "dean of U.S. railroad analysts," said that "Conrail is definitely able to be self-supporting." In the same *Forbes* interview, Ms. Benham went on to critique what appears to be Secretary Dole's guiding rationale. "The government's main argument for selling Conrail to Norfolk Southern is that NS has deep pockets, that it will be protective and protect Conrail in times of adversity. But when you're hard-pressed you don't necessarily help the weaker sister. In any case, Conrail has already demonstrated it has the ability to survive recession."

The opinion of railroad financial analysts and the assertions of Morgan Stanley have been confirmed by the United States Railway Association (USRA) in successive studies. In April, 1985, USRA reported on 1984 data and concluded that "Conrail has become a financially viable railroad efficiently serving its customers and the region."

USRA's July 29 report has further bolstered the projection for Conrail. It found as reasonable Conrail's latest five-year forecast which shows increased profitability through 1989 and said that "all available evidence supports a finding that Conrail can generate positive cash for the foreseeable future."

Perhaps most important to the Congressional action on Conrail, USRA found as reasonable Morgan Stanley's financial projections for a healthy and profitable Conrail, while continuing to maintain an aggressive capital spending plan, sustaining year-end cash balances in excess of the $500 million promised and paying projected dividends to shareholders. It is clear from these findings why ever so many money managers were encouraged to invest in Conrail's future.

As a West Virginian, I view the competition fostered by an independent Conrail as an absolute necessity to my state and the entire Appalachian and eastern region of the country. No shipper of goods, especially the hard-pressed coal producer, should doubt whether a return of Conrail to the private sector will negatively affect the rate at which a product moves. From all of the evidence, the sale of Conrail to the Norfolk Southern Corporation would jeopardize and disrupt substantial amounts of rail traffic in West Virginia and elsewhere.

I think the Congress must try to move forward to fulfill our own mandate of returning Conrail to the private sector, once it has regained its financial health. But the special circumstances that led to the formation of Conrail—and the government's trusteeship role and substantial financial participation—require extraordinary care in its return to private control.

Above all we should seek to avoid any further disruption of the rail system, service to shippers and rail employment. Conrail is not a public-works plum, to be plucked by the party with the best team of lobbyists. Rather, it is a public trust and a critical link in our nation's rail transportation network. An orderly return to private ownership should be accomplished with an eye toward preserving the success of the rebuilt Conrail and without measurably weakening any link in the existing transportation chain.

PERIODIC PRINTING OF THE CHAPLAIN'S PRAYERS

Mr. MATHIAS. Mr. President, pursuant to Senate Resolution 468 of the 98th Congress, the Senate Legal Counsel is appearing as amicus curiae in the name of the Senate in the case of Kurtz against Kennickell. The plaintiff in this litigation, which is pending in the U.S. District Court for the District of Columbia, is asserting that the printing of compilations of the Chaplain's prayers violates the establishment clause of the first amendment to the U.S. Constitution. The Senate is supporting the Department of Justice's constitutional defense of the periodic printing by the Government Printing Office of collections of the prayers of the Senate Chaplain.

As chairman of the Committee on Rules and Administration and of the Joint Committee on Printing, and also as a member of the Joint Leadership Group with responsibilities concerning the Office of Senate Legal Counsel, I have a particular interest in this lawsuit. Both by statute and by Senate rule, the Committee on Rules and Administration is responsible for reporting to the Senate resolutions to order the printing of Senate documents. Under this authority, the committee reported and the Senate approved Senate Resolutions 375 and 376 in May 1984 to order the printing of the Senate Chaplain's prayers for the 97th and 98th Congresses. These resolutions provide that copy for these documents shall be prepared under the direction of the Joint Committee on Printing.

In Marsh against Chambers, decided in 1983, the Supreme Court sustained the constitutionality of the election and compensation of legislative chaplains. The Court carefully traced the history of the legislative chaplaincies, emphasizing that the First Congress, the same Congress which proposed the Bill of Rights to the States, also provided for the election by each House of a Chaplain who would be compensated together with the other officers of the Senate and House.

The printing of the prayers of the Senate and House Chaplains is of more recent origin. Although prayers were occasionally printed in the CONGRESSIONAL RECORD prior to 1911, the RECORD generally continued the practice, with some exceptions, of noting the delivery of prayers but not printing their texts. In 1911, the House directed that all the invocations of its Chaplain be printed in the daily RECORD, and the Senate followed suit in 1914. The first reprinting of the prayers of a congressional Chaplain occurred in 1913 when the House agreed to a resolution to print a volume of its Chaplain's prayers for the 62d Congress. The Senate defeated a proposal that year to print its own Chaplain's prayers. In 1927, the House again ordered the printing of a volume of its Chaplain's prayers, and the Senate, 2 years later in 1929, for the first time ordered the printing of a volume of the Senate Chaplain's prayers. The House has not reprinted its Chaplain's prayers since 1978.

The question has arisen, in the case now pending in the district court, whether the Senate rather then the courts is the better forum for considering whether the Senate's recent practice of printing compilations of the Chaplain's prayers should be ended or modified. The plaintiff, as any other individual, has a right under the first amendment to petition the Government for a redress of grievances. The Senate in Standing Rule VII makes specific provisions for the receipt of petitions and for their referral to committees.

As chairman of the Committee on Rules and Administration, I would consider any petition on the subject of the printing of the Chaplain's prayers. There is historical precedent for plenary consideration by committees of the Congress of constitutional questions relating to the congressional chaplaincies. Between 1850 and 1854, committees in the Senate and House issued three reports in response to petitions from citizens to abolish the congressional chaplaincies. These reports concluded that the election and compensation of chaplains was a permissible practice under the Constitution, and the Supreme Court in the Marsh decision took specific note of the Congress' consideration of that issue.

Having already given the matter serious consideration, I have also concluded that I should not wait for a formal petition before expressing my personal conclusion that we should not provide for the printing of future volumes of the Chaplain's prayers. There is no standing provision for the reprinting of the Chaplain's prayers and a new resolution of the Senate is required for each order to the Public Printer for a new volume of prayers. If the Senate simply were to take no action, the recent printing practice would end. At the least, the issue should be explored fully prior to action on a subsequent printing resolution. As chairman of the committee with jurisdiction, I would act to assure that consideration if the printing question were to arise during the present Congress.

My reason for reaching this conclusion is, briefly, as follows. The foundation of the congressional chaplaincies is their historical continuity, beginning in the colonial legislative assemblies, through the Continental Congress, and from the First Congress to the present. The contemporary strength of the chaplaincies lies in their original purpose of providing a

solemn moment in which our collective thoughts are focused on the Chaplain's prayer for Divine guidance and blessing. I believe that we will best serve the historical institution of the congressional chaplaincies if we conclude that the printing of compilations of these prayers at public expense, a 20th century addition, risks detracting from the central purpose of the chaplaincies. In saying this I am not unmindful of the costs of printing. The Government Printing Office printed 2,045 copies of the compilation of prayers for the 98th Congress and estimates that the cost of that printing alone was $24,530. Of course, the daily prayers should continue to be printed in the CONGRESSIONAL RECORD where they are part of a full account of our daily proceedings.

I should emphasize that I am not questioning the constitutional right of the Senate to reprint portions of its daily proceedings. If the courts were to decide the merits of the plaintiff's challenge to the printing of Senate documents, the courts would be required to consider the delicate issue presented when a coordinate branch is asked to enjoin the printing of congressional proceedings. In response to such a lawsuit, the courts must weigh the separation of powers restraints on judicial oversight of congressional printing. Within the Senate, however, we enjoy wide latitude to examine our own practices. We are the appropriate forum for resolving these problems. It is for this reason that I have decided I should advise the Senate about the issue and about my conclusion that we should terminate this recent and costly addition to an important historical tradition which is of great significance to us.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. The time for morning business has expired.

AGRICULTURE, FOOD, TRADE, AND CONSERVATION ACT OF 1985

The PRESIDING OFFICER. The Senate will resume consideration of the pending business, which the clerk will state.

The legislative clerk read as follows:

A bill (S. 1714) to expand export markets for United States agricultural commodities, provide price and income protection for farmers, assure consumers an abundance of food and fiber at reasonable prices, continue food assistance to low-income households, and for other purposes.

The Senate resumed consideration of the bill.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, the farm bill has been up on this the third day of consideration in the Senate for about 30 minutes.

Unless my eyesight is worse than I think it is, I do not see Senators knocking the door down to come in and offer amendments, which is another way of saying that we are not going to get anywhere fast if we do not get some action on this floor. So I implore Senators who have interest in the farm bill and who do contemplate offering amendments to consider the advantage of our working in the daytime instead of late at night, but, of course, this is uniquely a judgment to be made by Senators and not by the chairman of the Agriculture Committee.

Let me mention just for the record, Mr. President, that the Agriculture Committee has scheduled hearings on the farm credit system on Thursday of this week, which happens to be Halloween, which may be appropriate considering the enormity of the credit problem out across farmlands in America.

That will present something of a problem if the Agriculture Committee is meeting and we are considering the farm bill simultaneously. I have learned a little bit in my time on this planet, but I have not learned how to be two places at one time. But we will work that out.

Mr. President, it occurs to me that this might be an appropriate time to review once more what I perceive to be a correct assessment of the farm bill as reported out by the Senate Agriculture Committee. This bill, of course, is now pending. I have said many times that I regretted that I find myself in the position that I had become the first chairman of the Senate Agriculture Committee in history to vote against reporting of a farm bill, but I could not put such an imprimatur on the bill that was reported. I say that with full respect and admiration for members of the committee who differ with me.

The farmers of America are having a rough time of it and sometimes around this place when severe problems occur we take the course of doing something even if it is wrong and that usually ends up being throwing money at the problems, which is precisely what has brought the Federal Government to a $2 trillion national debt and an annual deficit of more than $200 billion.

This Senator felt it was just time to call a halt to that, and I did insofar as my vote and my views were concerned.

Let me just capsule for the record the modifications that I believe are needed in this farm bill to make it a good bill. Let me go back just a bit. There are some 2,500 to 2,600 provisions of this farm bill. There are 20 titles in this farm bill. I have not counted the pages of this farm bill, but it ranks in length roughly the equivalent of the "Tale of Two Cities" or "War and Peace," or whatever other book you want to compare it to.

Sixteen titles of this bill range from being excellent to pretty good, and I would have no hesitancy in sending those 16 titles down to the White House for the President to sign. I believe he would. It is the four major commodity titles that are causing the trouble because it is these titles that involved the overload on spending of Federal funds, in my judgment.

So let me capsule so that Senators, if they wish, may look at it and evaluate my judgment versus theirs. I have said many times that the Lord never made me impossible of error, so I may be wrong, but I am convinced that we will do great harm to the farmers, not to mention the taxpayers, if we proceed with a spending level as encompassed in this legislation.

Point 1. The budget resolution adopted by this Senate provides for $38.8 billion over a 3-year period, $38.8 billion for programs in the Commodity Credit Corporation and the agricultural credit insurance fund.

The Congressional Budget Office estimates the cost of the committee bill, which is now before the Senate, to be $64.2 billion which, of course, is $25.4 billion over the budget.

(Mr. HATFIELD assumed the chair.)

Mr. HELMS. Now that is the CBO estimate. The USDA, the U.S. Department of Agriculture, estimates the cost of the pending legislation between $60 billion and $70 billion for Commodity Credit Corporation programs for the 3 years, $25 to $35 billion over the budget mark.

Some have said to me, "Senator, the farmers are in distress. Why not go ahead and give them this money?"

Well I think it would be bad for the farmers, because what is contemplated, in terms of spending the enormous amount of money proposed in this bill will not help the farmers, it will harm them in terms of their viability now and in the future.

The subsidies, the large subsidies, have the inevitable result of encouraging farmers to grow more surpluses, and that always, without exception, causes prices to fall for everyone and, in the process, the cost to the taxpayers soars into the stratosphere.

I have already alluded to the Federal deficit. We know what that does. That causes the dollar to be overvalued. And that makes, in turn, the United States less and less competitive

in the world market by adding to surpluses and to costs. The enormous deficits drive interest rates up, and that adds to the financial difficulties of everybody, especially the farmers who are most heavily in debt.

At this point, Mr. President, let me reiterate what has become almost a cliche, but it is nevertheless true, in my judgment. The best farm bill we could write and pass in the Senate need not have the word "farmer" or "farm" or "agriculture" in it. If we were to adopt legislation to move us toward a balanced Federal budget, that would cause interest rates to drop, that would promote our competitiveness, and that would inure to the benefit of the farmers more than anything we are going to do in a farm bill that talks about target prices and loan rates and that sort of thing.

For a long time, I have been convinced that farm programs enacted by this Congress have been targeted backward, so to speak, meaning that a substantial percentage of the Federal funds paid out in subsidies do not go to the small farmer, the family farmer, or to the farmer who is in distress. The big boys get an enormous amount of the money. By paying subsidies for each bushel or pound, this Government induces the most efficient farmers to create more surpluses, and that of course exacerbates all of the problems that are current in agriculture today.

I know it is nice to anticipate a Federal check in the form of a subsidy, but I believe it is time that we look the reality in the eye and did what was right instead of what may be politically sound.

So you say, "OK, Senator HELMS, what would you have the Senate do with these four titles, the ones containing the subsidies and the loan rates and the target price, and so forth?"

I think the smartest thing we could do for the farmers and for the taxpayers in this country would be a 1-year freeze in the target price level with reductions phased-in in subsequent years. Certainly, this Senate is going to do something about the payment limitation in this bill. There is now a payment limitation of $50,000 a year. I have proposed that the payment limitation be reduced to $25,000 a year, if we are genuine, if we are sincere in our constant declarations that we love the family farmer, that we are interested in the small farmer, and if we are interested in fairness to the taxpayers. So I think we ought to reduce the payment limitation to $25,000 per farmer instead of the $50,000 extant in the bill.

Mr. President, I think there ought to be a cap on the amount of crop loans that farmers can indiscriminately forfeit to the Government, say a $200,000 nonrecourse loan cap. We can debate the precise level, and I am sure we will. But that needs attention if, again, we are genuinely interested in the small farmer—and I am—if we are genuinely interested in the family farm and the preservation thereof—and I am—and we absolutely, Mr. President, must tighten payment limit loopholes. I think we ought to phase out payments on perpetual surplus production; that is to say, reduce the base bushels and pounds on which direct subsidies are paid. Then we ought to give serious consideration to phasing out all of these acreage reduction schemes. They are called ARP's, in the lingo of legislative consideration—A-R-P.

Here, again, I know these things sound good and they look good, but I am convinced that they do harm to the farmers in at least three ways. They do not work. That is demonstrable. You put in the ARP, the Acreage Reduction Program, and what happens? The farmers are not dumb. They know how to play that fiddle. They just intensify their cultivation with their remaining acres and production stays the same, surpluses stay the same, and all of the attendant difficulties that result therefrom.

And what happens to our competitors in the world market? The foreign farmers, they just love ARP's, because that gives them an opportunity to increase their acreage, increase their production, and dump more and more commodities on the world market. And, in the process, the American farmer is losing income and something happens along the way to the efficient operation of farms in this country.

Mr. President, I know what I have said and what I am saying is not popular. It is subject to debate. It will meet disagreement among Senators, and certainly among some farm groups and farm organizations. But I say with all the sincerity I possess that what we are dealing with in these four titles of this farm bill pending before the Senate is failed policies, policies that have not worked, are not working, and in my judgment will not work.

So I do not know whom we are kidding. Maybe ourselves, certainly a lot of the farmers. I wonder sometimes what would be the result and the reaction if somehow we could all sit down together with the farmers and say now, look, we want to help but here is the problem. I do not know where we are going on the farm bill. But we are not going very fast. Maybe that will change a little later. We have been on it for about 40 minutes on this day, the third day of consideration.

Mr. President, I thank the Chair.

Mr. MELCHER. Will the chairman yield?

Mr. HELMS. I yield the floor.

Mr. MELCHER. Mr. President, will the chairman yield for a couple of questions?

Mr. HELMS. I am glad to yield.

Mr. MELCHER. I do not think the chairman in his assessment would want to draw a false conclusion, and I feel certain that the chairman does not mean to infer that farmers want deficiency payments; that is, a check from the Federal Treasury in lieu of getting their price to cover the cost in the marketplace. Surely the chairman is not indicating that.

Mr. HELMS. I did not say any such thing. I did not imply any such thing. The Senator and I thoroughly agree on that. The higher return would be the alternative; and bringing the product to the marketplace.

Mr. MELCHER. I have a piece that I received from the chairman dated October 24. It was in my box. It is a piece written by the chairman. It says that with gross sales over $250,000 those farms have a net equity of $904,000, and with gross sales between $100,000 and $250,000 from those farmers—with gross sales that high—there was a net equity of $429,000.

Might I ask the chairman where these figures came from?

Mr. HELMS. Would the Senator repeat the question? He turned his back to the mike.

Mr. MELCHER. The piece I have from the chairman dated October 24 says that with gross sales on farms of $250,000—that is over that amount—the net equity was $904,000, and the farms with gross sales between $100,000 and $250,000 have a net equity of $429,000. I am just inquiring where the figures came from.

Mr. HELMS. We had a hearing on March 12 of this year, as I recall, which the Senator from Montana attended, and these figures were by such people as J.B. Penn, president of Economic Propectives, Inc., former economist with USDA during the Carter administration; Dr. Don Paarlberg, professor emeritus at Purdue University. I think the Senator will admit that he is recognized as the "dean" of agricultural economists. Then there was Dr. Ken Ferrell, director of the National Center for Food and Agricultural Policy of the Resources for the Future, nationally acclaimed food policy think tank.

There were many other hearings in the farm bill series covering this subject including one on March 20 of this year covering the topic of capital investment, debt, credit, and taxes in agriculture, and there were references and substantiation of the data on the distribution of wealth in the agriculture industry at other hearings. So I assure the Senator that the figures I have given are legitimate in terms of people I respect. Moreover, I would remind the Senator that we had four or five former Secretaries of Agriculture. We had Democrats and Republicans. They meet making recommenda-

tions along the lines that I have just stated in my remarks. These are people who have gone down the road with subsidies in the past. You can call them liberals, conservatives, Democrats, and Republicans, but I did not detect one iota of disagreement with the general outline of the flaws in this farm bill as I just described them.

Maybe the Senator heard them saying something that I did not hear them say. But I think there is a unanimity of opinion. Certainly the figures come from our own hearing records, at which the Senator himself was present.

Mr. MELCHER. The figures are generally based on those Department of Agriculture former employees and present employees.

Mr. HELMS. They are the figures of people who are highly regarded even by the Senator from Montana himself. Dr. Paarlberg of course was with the Agriculture Department, and others.

Mr. MELCHER. I am not even questioning the figures. I am just starting on "where" because they are unusual figures.

Mr. HELMS. I understand.

Mr. MELCHER. I do not know whether many cattle feeders have a net equity of $904,000. But it is easy to understand how you can have 1,000 head of steers in the pen and lose $250 per head, which would wipe out any $250,000 they might make some other time. You know, cattle feeding, as is agriculture in general, is such that when you lose you lose a bundle, and when you make something, when you turn a profit, it is a minimal amount.

Cattle feeders would be delighted to be ensured a $10 a head net gain after owning those cattle for a year—a profit of $10 a head on 1,000 head. That would give them $10,000. But cattle feeders this past year, on 1,000 head, have been able to lose $250 a head. Where did the chairman in this same article, October 24, get these figures? Where did these figures come from? The average net income for farmers with gross sales over $250,000 in 1984 was $96,000.

That is an absolutely startling figure. I wish that were the circumstances for 1985 or, for that matter, for 1984. Were they tobacco farmers, cattle feeders, or pig farmers? What were they?

Mr. HELMS. The Senator's question is not clear to me. If he will repeat the precise question he wants me to answer, I will be glad to answer. I thought he was talking about how bad off farmers were.

Mr. MELCHER. This says for 1984.

Mr. HELMS. As the Senator knows, the USDA is trying to relate farm characteristics by sales class for years and years. There is nothing new about that. You can dispute the figures if you wish. That is your privilege. You may be right.

If the Senator will allow me to proceed, I will continue to answer the question.

Mr. MELCHER. I am inferring from your statement that the figures are from USDA.

Mr. HELMS. You do not have to infer. Of course that is where we got the figures. This compilation of information has been made in the committee report on the farm bill and to which I have referred repeatedly. It has come also from a range of alternative data sources. In a minute I will ask that a table be put into the RECORD to make that precise.

The information, I will say to my friend, collected from these different sources have tracked one another very closely down through the years.

For instance, the data that I have used comes variously from three reports of this sort, in addition to the testimony received from the witnesses, highly respected witnesses, I will repeat, to whom I referred earlier.

The first is, as the Senator knows, a USDA farm finance survey conducted in 1979. The second source is a consensus of agriculture conducted in 1982. The third is the farm cost current survey conducted in 1984.

So they are not going back and getting figures from some year in the past. They have done this each year over a period of time and brought them up to date.

Mr. MELCHER. I can say that 1984 is an accepted figure. But I would point out that if somebody had sales of $250,000, what about all those people who sold $250,000 worth of commodities and more in the cattle field, in the hog field? A $250,000 sale out of a feedlot, even on an Iowa feedlot farm, is not a big amount. If they had $96,000 in profit, their corn from that same farm that they put through those cattle or hogs must have been worth about $88 a bushel. We would not have to monkey around with target prices and deficiency payments. Target prices, after all, are based on the cost of production. They are not meant to show a profit. The deficiency payment, by law, does not guarantee a profit to any producer, no matter how much they produce.

The chairman was just speaking about no matter how much you have, how many bushels of corn, bushels of wheat or hundredweight of rice, the deficiency payment applies to every bushel.

The deficiency payment, when it is paid, indicates that the market conditions are such that the cost of production was not even met in the marketplace.

Mr. HELMS. I have no dispute about that, nor do I have any argument with the fact that a restaurant operator, a garage operator, or whoever might not have a financial difficulty. I still say to anyone who is interested that the best farm bill we could bring would be to get the interest rates down, get the deficit under control, and stop the spiraling national debt. I am prepared to stand here all day and cite sources of information, and I stand by these sources until the Senator provides some information on the same basis that these figures are compiled.

Mr. MELCHER. But the chairman——

Mr. HELMS. If the Senator will forbear, I will say to him that the best way to prove a stick is crooked is to lay a straight one beside it. I assume that is what he is trying to do. If he is trying to tell me that people in all segments of agriculture are having difficulty, I agree with that. I prefaced my remarks with that. What we are about in the consideration of this farm bill, I will say to my dear friend from Montana, is how best to work ourselves out of this problem that the Government in large measure created.

The Senator from Montana and I agree on many things. We work together and I admire and respect him. But I cannot let him suggest that I am using illusory figures, because I am not.

The data to which I have been referring today is voluminous and is impossible to lay out in any comprehensive way under the circumstances of floor debate, but I can say that I have reviewed the sources, and stand by the data. For instance, under the "Average Equity" category, but the 1979 Farm Finance Survey and the 1984 Farm Costs and Returns Survey show that there were some 90 to 100 thousand farms that had gross sales greater than $250,000. These studies indicated that these farms had an average net worth of just over $1 million in 1979 and just under $1 million in 1984.

The data for other sized farms that I have mentioned in my remarks is similar in correlation between the studies. For instance, those farms with gross sales between $100,000 and $250,000 had $476,000 in net worth in the 1979 study, and $430,000 in the 1984 study.

Of course, both examples I have cited show that there has been backsliding in the net equity positions of both categories of farms during the last 6 years. This is because farmland values have fallen and the massive surpluses generated by our farm and fiscal policies have made the per-unit value of the bushels, bales and pounds that farmers produce fall.

But the fact remains that there is enormous wealth in the agricultural industry. And, it is indisputable that farm programs work in a way to pay the largest subsidies to the largest farmers. Further, it is indisputable that the largest farmers have the least financial difficulty as a class. It follows indisputably that the farm program payments operate in a bizarre

and perverse manner that ought to be corrected.

Dr. Emanuel Melichar, a senior economist at the Federal Reserve Board, and a witness at our farm bill hearings, has estimated that, after adjusting for inflation, the aggregate cash profits of farmers before interest expenses were slightly higher in 1984 than they were in the pre-boom years of the early 1970's. Interest rates are now higher and farmers carry more debt, but inflation-adjust cash profits after interest payments were exactly the same in 1984 as they were in 1970 and 1971. Dr. Melichar estimates that the largest of U.S. farms—the 1 percent with annual sales above $500,000—reaped an average return on assets of 18 percent in 1983 and had returns on the farmers' equity that averaged a bounteous 24 percent, according to a recent article in Fortune magazine.

Most farmers in deep trouble have sales between $40,000 and $500,000 per year. USDA estimates that about 200,000 of them are financially stressed, with about 5 percent of all U.S. farms in imminent danger of failing. Almost without statistically significant exception these are farmers who simply paid too much for land after Soviet crop failures helped send wheat and corn prices soaring in the early 1970's, and after hyper-inflation fueled a speculative boom in the late 1970's. The average price of land shot up 170 percent in Iowa from 1974 to 1980. Land prices in Nebraska rose 133 percent and nearly 100 percent in South Dakota during the same period.

In the collapse of inflation during the early 1980's, and the massive inducement to surplus production brought about by high crop subsidies, the value of farmland in Iowa is down 55 percent from its 1980 peak. But most farmers who have little debt or who rent land are able to turn profits on their crops. The real problem is with the farmers—mostly in the Midwest—who are saddled with interest on the money they borrowed to buy land at or near the peak value, while the land is generating only enough cash to support much lower values.

My point is that these financially distressed farmers are not helped by crop subsidies that induce all farmers—whether they are financially stressed or not—to produce price depressing surpluses. Indeed, the struggling farmers are the victims of such policies.

It doesn't help these struggling farmers to dispute the wealth of the general farm sector. The data is accurate for what it is represented to be. I stand by it. USDA stands by it. Private economists, university economists, and Government economists for numerous agencies stand by it.

Mr. President, I ask unanimous consent that a paper explaining the methodology of the USDA studies. A chart summarizing the data from the USDA studies, and a copy of an article by Mr. Aloysius Ehrbar, entitled, "Facts vs. the Furor Over Farm Policy," for the November 11, 1985 edition of Fortune magazine, be printed immediately following my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

FARM COSTS AND RETURNS SURVEY

Results of USDA's 1984 Farm Costs and Returns Survey (FCRS) are consistent with the 1982 Census of Agriculture and the 1979 Farm Finance Survey. (See comparisons in table below.)

The 1984 FCRS suggests there are more farms in the larger sales classes but the average sales per farm in each of the higher classes has decreased. The equity position of farmers in all but the smallest sales classes appears to have eroded since 1979.

Of the 23,386 rural residents contacted for the survey between February 15 and March 8, 1985, 72.8 percent participated. For this survey, all land operated expanded to total 1.1 billion acres with average farm size at 523.

As reported in the survey, harvested acreage of principal crops differed by only 3.2 percent from estimates developed by USDA's Crop Reporting Board.

For the survey, a farm was defined as an operation that produced or sold at least $1,000 worth of agricultural products or spent at least $1,000 for feed, supplies, equipment or other supplies to produce agricultural products on the operation.

TABLE 1.—PER FARM FINANCIAL CHARACTERISTICS OF U.S. FARMS BY SALES CLASS AS ESTIMATED FROM ALTERNATIVE DATA SOURCES

Item	Sales class			
	Greater than $250,000	$100,000 to $250,000	$20,000 to $100,000	Less than $20,000
Number of farms				
Farm finance survey (1979)[1]	89,475	186,854	631,595	1,446,301
Census of agriculture (1982)	86,468	215,912	581,576	1,355,344
Farm costs and returns survey (1984)	96,038	224,116	496,974	761,226
Average cash sales				
Census of agriculture (1982)	724,143	152,517	49,492	5,357
Farm costs and returns survey (1984)	525,513	139,639	45,974	6,029
Average equity				
Farm Finance survey (1979)[1]	1,049,080	476,322	256,152	110,947
Farm costs and returns survey (1984)	904,446	429,891	246,220	136,775

[1] The farm finance survey (1979) defined the largest sales classes to be: (1) greater than $500,000, (2) $200,000 to $500,000, and (3) $100,000 to $200,000. Data presented here were obtained by interpolation, to allow comparison with previously presented sales class categories.

FCRS is a multiframe probability-based survey. This means that the sample of farm operators consists of farmers chosen from a list of known operators and areas of rural land in which all residents are interviewed to determine if they qualify as farm operators. A sample of 23,386 rural residents was contacted by enumerators between February 15 and March 8, 1985. Of those contacted, 72.8 percent participated in the survey. For the survey, a farm was defined as an establishment producing agricultural commodities which either had actual annual sales or purchases of $1,000 or more in 1984. Since only a probablity sample of farms is taken in the survey, each respondent represents a number of other farms of a similar size and type.

The results of the 1984 Farm Costs and Returns Survey (FCRS) are consistent with both the 1982 Census of Agriculture and the 1979 Farm Finance Survey. A comparison of characteristics of farms categorized by sales class (table 1) illustrates the degree of consistency among these divergent sources.

Compared with the previous surveys, the 1984 FCRS suggests that there are more farms in the larger sales classes, but the average sales per farm in each of the higher classes has decreased. The comparison also suggests that the equity position of farmers in all but the smallest sales classes has eroded since 1979.

All land operated by survey respondents was estimated to total 1.1 billion acres. The average farm size was 523 acres. Harvested cropland per farm averaged 191 acres; the average reported by the Census of Agriculture for 1982 was 180 acres, an amount similar to that obtained in this survey.

The 1984 FCRS indication of the harvested acreage of principal crops was relatively close to the estimates developed by the Crop Reporting Board of USDA. Acreages of principal crops reported by the survey totaled 321 million acres compared with 335.6 million reported by the Department. But the departmental estimate of principal crops also includes 3.8 million acres of rye, flaxseed, dry edible beans, sweet potatoes, and sugarcane not separately listed in the survey. Excluding this acreage, the estimate of total principal crops acreage differs by only 3.2 percent.

To qualify as a farm for the FCRS survey, an operation must have produced or sold at least $1,000 worth of agricultural products or spent at least $1,000 for feed, supplies, equipment, or other supplies for the purpose of producing agricultural products on the operation. In contrast, Census of Agriculture defined a farm as any place from which $1,000 or more of agricultural products were sold or normally would have been sold during the Census year. The expanded number of U.S. farms covered by the FCRS totaled 1.7 million for 1984, compared with 2.2 million farms from the 1982 Census of Agriculture (see table 2). The Census of Agriculture included 253,147 farms with sales of less than $1,000 in its total. These farms were excluded from the FCRS estimate. Most FCRS under-counting of farm numbers is for the small sales classes, especially for farms that have less than $5,000 in sales. The survey gives a fairly close count of farms with sales over $40,000, those generally considered to be commercial-size farm units.

These comparisons suggest that the FCRS is a viable source of annual data for U.S. agriculture. This conclusion is supported by evaluation of FCRS sampling procedures and comparison of FCRS results with data obtained elsewhere by USDA.

FACTS VS. THE FUROR OVER FARM POLICY

(By Aloysius Ehrbar)

Nearly 100,000 U.S. farmers, many of them among the most efficient in the world, are about to go broke. Many are in their 30s and 40s, men who just a few years ago saw rich, prosperous lives ahead. Now confidence and pride have been replaced by defeat and soul-destroying self-doubt. The lucky ones will be left with a few of their acres or will rent their farms back from lenders who foreclosed. The rest will try to build new lives off the farm.

The devastation in agriculture—and its spillover to farm suppliers, grain elevator operators, and retailers across the Midwest—has become one of the most visible economic tragedies of the decade, so visible that it has obscured the fact that many of America's farmers are doing all right. Common sense calls for fashioning government agricultural policies in a way that minimizes the losses that farmers, their creditors, and their communities are suffering. The policies should also minimize the subsidies paid directly by taxpayers and indirectly by shoppers in the supermarket. Most important, they must restore U.S. competitiveness in the world market for food. American farmers can never truly prosper unless they sell their output profitably overseas.

Two potent forces are working against sensible solutions. One is Congress, which is bent on applying the conventional fix to farm problems. Sometime before Thanksgiving, Congress probably will enact a farm bill little changed in its essentials from the misguided policies of the past half-century. Those policies—using price supports and acreage set-asides to boost farm incomes—will only prolong the troubles and delay the adjustment to world market conditions. The other force, the fear that farm defaults might unsettle the banking system, makes an early end to the agriculture crisis doubly unlikely. Even if farmers overcome Washington's attempts to help, the mishandling of farm credit by lenders and politicans could keep them mired in a furrow of despair. Indeed, intelligent handling of the farm credit situation is likely to be the greatest challenge in agriculture over the next few years.

The discussion of farm policy has been clouded by widespread misconceptions of how badly farmers and their creditors are hurting and why. Advocates of massive government aid describe farming today as a tragedy of plenty that leaves even the best farmers operating at breakeven or worse. Recent movies like *Country* and media events like the Farm Aid concert depicted a world in which the family farm will be plowed under unless something happens quickly to boost prices and farm incomes. As for farm creditors, the economic forecasting firm of Wharton Econometrics predicts that lenders will have to absorb up to $25 billion of losses over the next few years. Some press accounts have cited estimates of up to $100 billion in losses—nearly one-half the total debts of all U.S. farmers. Farm economists warn of widespread failures by small country banks. The Federal Farm Credit System, an unusual national cooperative that accounts for one-third of all farm debt, says it may need a multibillion-dollar bailout from Congress.

The overall condition of U.S. agriculture isn't nearly so bleak as the footage of foreclosure auctions on the Nebraska plains. Lower crop prices do mean that farmers are earning considerably less than they did at the height of the ag boom in the late 1970s. But two-thirds of the 650,000 or so full-time farmers are coping. (About 60% of the nation's 2.3 million farmers till part-time, often to qualify for tax deductions, and get the bulk of their income from nonfarm employment.)

Emanuel Melichar, a senior economist at the Federal Reserve Board, estimates that, after adjusting for inflation, the aggregate cash profits of farmers before interest expenses were slightly higher in 1984 than they were in the pre-boom years of the early 1970s. Interest rates are higher and farmers carry more debt now, but inflation-adjusted cash profits after interest payments were exactly the same in 1984 as they were in 1970 and 1971. Surprising as it may seem, the 25,000 largest U.S. farms—the 1% or so with annual sales of over $500,000—look like dandy businesses. Melichar estimates that they reaped an average return on assets of 18% in 1983 and had returns on the farmers' equity that average a bounteous 24%.

Most farmers in deep trouble have sales of $40,000 to $500,000 a year. The U.S. Department of Agriculture estimates that roughly one-third, or about 200,000, are in imminent danger of failing or are "financially stressed." They are overwhelmingly concentrated among Midwest grain growers. California wine-grape growers are ailing too. The prospects for wine grapes seemed limitless in the 1970s as Americans shifted from hard liquor to so-called light alcholic beverages. Sales of California wine soared, and so did the number of farmers planting vineyards. But domestic wine sales leveled off just as many of the new vineyards matured. Imports also became much more popular as the dollar took off. Now hardly any Americans can make money in wine grapes.

In the grainbelt, many farmers simply paid too much for their land after Soviet crop failures helped to send wheat and corn prices soaring in the early 1970s. When the lean harvests continued, farmers, bankers, and even the U.S. Department of Agriculture began to behave as though bad weather had suddenly become the norm in the Soviet Union. Farmers bid Midwest land prices to heights that were justified only if crop prices continued to rise. The average price per acre of Iowa land shot up 170% from 1974 to 1980. Land prices rose 133% in Nebraska and nearly 100% in South Dakota.

By the late 1970s farmers were convinced that inflation and continued growth in exports would keep prices rising even if Soviet crop yields recovered. Lenders encouraged farmers to borrow against their appreciating land. Some borrowed to buy better tractors than their farms could justify before crop prices rose. Some put up new buildings. Some who paid dearly for land in anticipation of future increases in crop prices borrowed to cover operating losses, confident that inflation or more bad weather abroad would soon make them whole. But mostly what the farmers borrowed to buy was land.

In the early 1980s inflation collapsed, harvests came in record levels worldwide, and crop prices and land values fell. The value of Iowa farmland is down 55% from its peak in 1980 and land in Nebraska is down 53%. Farmers reawakened to the long-term reality of agriculture: world wide production is growing faster than population, and crop prices are likely to continue falling as long as technological advances keep boosting yields.

Grain prices have now dropped so low that any grain farmer with high leverage is operating near the edge or has tumbled over it. But the devil impoverishing these farmers isn't high interest rates or high leverage per se. The very large farms that generate such lush profits are, on average, the most heavily leveraged of all. Nor is the problem that crop prices are "too low." Most farmers who have little debt or who rent their land still make adequate profits on corn and wheat. The real problem is that Midwest farmers are saddled with interest on the money they borrowed to buy land at or near the peak, while the land is generating only enough cash to support much lower values.

The central role of land prices in the Midwest has resulted in a singularly capricious pattern of losses. Some of the most industrious and capable farmers have been socked hard, just because they happened to buy acreage at the wrong time (see box). Unfortunately, there isn't any practical way to help the farmers who bought at the top. They already have suffered huge capital losses, much like the hapless investors who bought Avon and Xerox just before the glamour stocks crashed in the early 1970s. What remains is to determine how those losses are recognized and distributed. The only form of farm aid that could give farmers substantial relief without enormously expensive side effects would be direct cash payments. But is that fair or desirable? Could farm-state Congressmen justify handing out moola to a businessman whose untimely investment had cut his net worth from $600,000 to $250,000? And if it is right to make farmers whole, why not the independent gas producer who sunk wells in the Anadarko basin when energy prices were hitting the heavens?

Schemes to boost crop prices are more politically palatable, but they carry the cost of insulating farmers from lower world prices. Adjustment to world prices is what farm policy should hasten, not delay, since U.S. farmers increasingly are producing more crops for export and less for sale at home. The U.S. now consumes only 75% of the output of domestic farms. More than half of certain crops—including wheat—already go to the export market in some years. With total foreign production also rising faster than population, U.S. farmers will have to hammer costs down to keep sales and profits up.

The quickest way to get costs down is to accept that the losses of the past few years are permanent and that the value of farmland has fallen. Land typically represents 75% of the assets in a farm; as the price of land goes down, a farmer can charge lower prices for his crops and still get an acceptable return on assets. Any action that artificially supports crop or land prices raises farm costs and erodes the ability of U.S. farmers to compete in world markets.

The farmers losing their land and the creditors suffering big loan losses are unmoved by the salutary effects of letting the market run its course. Lately they have raised the specter of a credit crisis as a new reason to put off accepting the reality that many farmers will have to go bankrupt if America is to compete.

The statistics on bank loans to farmers can look scary on first inspection. The number of agricultural banks with nonperforming loans—loans that no longer are accruing interest, have been renegotiated, or are more than 90 days overdue—that exceed total capital jumped from 102 last December to 167 at midyear. (The Federal Deposit Insurance Corporation defines a commercial bank as agricultural if its farm loans make up 25% or more of total loans.) Forty-six agricultural banks have failed this year, up from 29 for all of 1984, and the number on the FDIC's "watch list" of troubled institutions has risen from 340 last December to 390 recently.

Even so, the professionals who worry full-time about bank safety don't seem terribly alarmed. The Kansas City Federal Reserve district has more troubled agricultural banks than any other. But Roger Guffey, president of the Kansas City Fed, says he sees nothing looming on the horizon that could spark a regional or statewide crisis in

commercial lending. One reason regulators are sanguine is that the percentage of agricultural banks in jeopardy is quite small—the 167 with nonperforming assets in excess of capital comes to just over 3% of the 5,000 U.S. agricultural banks. Another is that agricultural banks have comparatively high capital—an average of 9.6% of assets vs. 8.6% for nonagricultural banks—and the vast majority could survive worsening conditions on the farm. Robert Craig West, an economist in the bank supervision division at the Kansas City Fed, calculates that 665 of the 1,163 agricultural banks in his district would make money this year even if they had to write off all their nonperforming loans immediately—an extremely pessimistic assumption.

Altogether, commercial banks, including agricultural banks, have $50 billion of farm loans, or nearly 25% of the total farm debt. In 1984 commercial bank losses on farm loans totaled $900 million; this year they could double. That's a huge loss rate. But the total for the two years—some $3 billion—isn't the stuff to rattle the banking system.

The biggest worries about debt concern the Farm Credit System, a string of quasi-banks set up by Congress from 1916 to 1933. The System's lending practices and bookkeeping would make a Latin American loan officer shudder. The System includes 12 regional Federal Land Banks, 12 Federal Intermediate Credit Banks, and 12 Banks for Cooperatives. A 37th bank, the Central Bank for Cooperatives, operates nationwide from Denver.

Land Banks make mortgage loans to farmers through 431 local Land Bank Associations. Intermediate Credit Banks advance funds to about 370 local Production Credit Associations, which in turn make short-term loans for seed, fertilizer, and other operating expenses. The Credit Associations also make home loans for up to ten years, and 15-year loans for the purchase of boats and other commercial fishing gear. Banks for Cooperatives lend to agricultural, aquatic, and public utility cooperatives. The Farm Credit System is the biggest farm lender, with $74 billion of loans outstanding as of June 30.

The banks aren't really banks in the sense that they don't take deposits. Most of their funds come from $70 billion of bonds and notes sold through the Federal Farm Credit Banks Funding Corporation, the fund-raising arm of the System. Investors treat the securities as government agency debt, which means the Funding Corporation can borrow at interest rates only slighly higher than the rates on Treasury securities. But the debt is backed only by the Farm Credit System's 37 banks.

The System operates autonomously, indeed, one might say anarchically. The local associations have set their own lending policies, and regional banks have devised their own accounting rules, practices that are only now beginning to change. The boss of record is Donald Wilkson, 63, the governor of the Farm Credit Administration, the federal agency that regulates the banks and associations. Wilkinson's staff routinely examines the books and lending practices of the banks and associations, but it has no authority to move against unsound banking practices by issuing a cease and desist order; all it can do is recommend a change.

Wilkinson precipitated much of the furor over farm credit when he announced in September that the Farm Credit System probably will need federal assistance in 18 to 24 months. Of its $74 billion in loans, $9.8 billion are listed as nonperforming; of the nonperformers, $2 billion are not accruing interest. Although that sounds like serious trouble, it's difficult to tell whether there's less or more to the crisis than meets the eye. The confusion arises partly because the Farm Credit System doesn't classify loans in the same way commercial banks do; some of its nonperforming loans would be performers at Citibank. Furthermore, the potential losses on the nonperformers are far less than $9.8 billion. More than half are mortgage-backed land loans. If the borrowers default, the System could sell the land and get back some of its money. And the Farm Credit System is much better capitalized than most commercial banks. It has $4.2 billion of retained earnings, $675 million in loss reserves, and $5 billion on capital paid in by borrowers—more than enough to sustain larger losses than now seem likely.

However, that assessment must be qualified because it's impossible to tell what may lie hidden in the System's convoluted books. The Price Waterhouse accounting firm performed the first outside audit of the System this year. Among other things, it discovered $6 billion of Land Bank loans that are current on interest payments, but are undercollateralized by $930 million. The $6 billion will be added to the nonperforming loans.

Two regional Intermediate Credit Banks—in Omaha and Spokane—had to be bailed out by other System banks this year. (Spokane went broke on fishing-boat loans.) Peter Carney, president of the System's Funding Corporation, estimates the System will lose $350 million to $400 million this year, its first loss ever. The General Accounting Office losses could reach $2.6 billion in the 12 months ending next June.

While it is far from certain that the Farm Credit System needs federal help, the first reaction of Congress to farm problems seems to be to do something—anything. In this case, the politicians should repress that instinct until they know help is essential. Any aid for the Farm Credit System could be exceedingly costly. Agricultural bankers, always a lobbying force to be reckoned with, view the Farm Credit System as their competition, and will insist on getting the same breaks as Wilkinson's agency.* * *.

PER FARM INCOME BY SALES CLASS, 1984 [1]

	Sales class			
	Greater than $250,000	$100,000 to $250,000	$20,000 to $100,000	Less than $20,000
Average:				
Net cash farm income	$84,595	$25,679	$3,884	−$3,742
Off-farm income	12,294	10,594	13,718	19,297
Total income	96,889	36,273	17,602	15,555
Government payments	10,947	5,675	1,781	146
Equity	904,446	429,891	246,220	136,775
Cash sales	525,513	139,639	45,974	6,029
Government payments as a percent of average:				
Net cash farm income	13.0	22.1	45.9	NA
Total income	11.3	15.7	10.1	0.9
Cash sales	2.1	4.1	3.9	2.4
Percent of total:				
Cash sales	46.2	28.7	20.9	4.2
Government payments	31.7	38.3	26.7	3.3

[1] All data are preliminary.

Mr. MELCHER. Mr. President, I thank the chairman.

Might I say that the chairman has taken the very words out of my mouth. He is more familiar with many matters than I am. He said that the figures were not illusory, there is no illusion.

Mr. President, there would not be any farm problems if the figures that are cited in this article by the chairman came anywhere near the actual situation is for the average farm and ranch producer today.

We have spoken about cattle. I can tell you that the losses after 1984 will be a no win situation. The 1984 situation for cattle producers was no profit. But the 1985 situation has been an utter disaster. It is going to wipe out cattle feeder after cattle feeder.

Mr. President, I repeat that cattle feeders cannot lock in $10 per head. If they could they would be willing to feed these cattle for an entire year, to produce desirable cattle, desired by the market. They are willing to feed 500, 600, 800 even on relatively small family-owned farm operations in Iowa. Theirs is a corn-cattle production, the same as for hog production. If the same farmers could be sure that for hog production they could get some sort of profit short of $3 a head, they are going to feed them. They are going to go from A to Z with them. They will take the baby pigs from the brood sow and bring them up to where they can start feeding them, fatten them and take them to market. If they can be sure that they will get $2 or $3 a head profit on that operation they are very satisfied and happy. They woud like to make those few more bucks a head, but if they know they have $2 or $3 per head per hog profit or $10 per head on the cattle feeding venture, that is a big difference to them.

They did not get that good a deal in 1984 and 1985. They had tremendous losses. These losses on a steer, as I mentioned before, could be such that you could own the steer all the year and still owe $250 on it when it is sold. That unfortunately has been the case in 1985. So worse than an illusion, it is misleading.

I might say that is a serious proposition when we are trying to present as factually as we can to the entire Senate and therefore the public of the United States what the situation is in this farm problem. We will be addressing the various aspects of this bill. But it makes it extremely difficult when figures are thrown out that seem to say there is no real problem out there. The problem does exist. There is no farmer or rancher who looks to the U.S. Government to finance his operation through the payment of checks by the deficiency payments out of the U.S. Treasury. They do not look for that.

Mr. HELMS. Will the Senator yield?

Mr. MELCHER. They prefer to get their price out of the marketplace. That is what we have attempted to do and have failed. The worst mess we

have ever had of Government programs in farming and ranching has occurred during the past 4 years. And this is a huge mess. Even in the 1930's, when there was world depression and the entire agricultural community of the United States was on its knees, you could not lay the blame directly for all of the mess on Government. As to the mess we are in now, if farmers and ranchers across the country have correctly surmised that the mess has been aggravated, compounded, and structured by the Government program we have had and the lack of Government participation with a sound program for good prices in the marketplace, if they have surmised that, they are exactly correct.

Mr. HELMS. Will the Senator yield for just a moment?

Mr. MELCHER. Yes, Mr. President, I yield.

Mr. HELMS. Mr. President, would the Senator like to modify his statement, which was, as I understand it, that I stated there is no distress out there. I would be glad to go back in the RECORD and see if I said that. But I did not say it, I did not imply it, and the Senator should not have inferred it.

Mr. MELCHER. Mr. President, if that is what the Senator thinks I said, I modify it. What I said was that statements such as these by the chairman are misleading. They are misleading statements. For instance, on those farms with gross sales between $150,000 and $250,000, there was a $36,000 net income—that is a misleading statement. How many farmers and ranchers across this country producing this food and fiber for us consumers in America and a lot of consumers around the world are selling at least $100,000 worth of gross profit? In wheat, with depressed prices, it would be about 35,000 bushels. Yet wheat farmers throughout the United States are finding that they are producing at a loss. Forget about income, it is how much the loss is.

In cattle feeding operations, if you had a thousand head of steers this past year and sold another couple of thousand dollars worth of hogs or anything else off the farm, a farm that engages in a feed lot, you would have a pretty small deal. But if they are going to have gross sales of $100,000, they will probably have a loss of something like $30,000 or $40,000 rather than an income of $36,000.

Hog farmers are the same way. They sell their hogs and sell them at a loss. The more you have, the more you have lost. So this inference that somehow these figures sort of speak to the situation is entirely misleading. I am saddened by that because we have to talk about the real world. We have to talk about the situation where the farmers are losing despite the fact that we have tried to keep a safety net under them at the same level it has been for these basic commodities—wheat, feed grains, rice, and cotton—because we think that is the only thing we can do. So we are going to face some pretty staggering losses out of the Treasury too, for deficiency payments.

Why do we have to do that? Because we have to keep this basic economy, this basic industry of the United States alive to survive for better days. The better days should come because we are dealing from the strength of having cost-effective production from these farmers and ranchers of America. When you have that and have the food supplies that are needed by others around the world—not just our own consumers but by others around the world who need these food supplies—we are dealing from strength. So I think better days will come. But it is for us to recognize that the safety net must be there in order for those producers to survive. Until the better days come, it is for us here, in the Senate and in the House, to reverse the policy of this present administration which allows the Department of State to interfere with unworkable conditions for sales of American commodities abroad. We have willing buyers, but we find our State Department is not a willing seller. We have to reverse that policy. That is part of our duty.

There will be no simple answer. The facts that are based on this type of information that has been presented in this article by the chairman are entirely misleading.

Mr. President, the situation is simply this: If we do not contrive to permit our agricultural production to become available to those who would purchase it in foreign countries, purchase the surplus from us, then we are indeed failing in our responsibilities. There are recent examples of State Department meddling that have come to light and which perhaps identify the true situation with setting conditions on sales of American agricultural commodities.

Earlier on this floor, I mentioned that the Department of State in the last 2 years or more has set a number of conditions which countries must meet if they are going to purchase American wheat—Kenya, Mozambique, Guinea, Nigeria, and several other countries in Africa. The conditions were set by the Department of State that sales of American wheat, rice, or cotton could not be approved and could not be permitted until certain conditions were met. Those conditions, while perhaps desirable from the standpoint of the Department of State and desirable from the standpoint of anybody who likes to see private enterprise be utilized to gain efficiency in any developing country, certainly in the abstract, would have to be found to be admirable. But we have to be practical. That the Department of State has not been able to be. They were told by Kenya,

> There is the condition you are setting on the requirement that the wheat be purchased by private enterprise. We have to point out that there is no private enterprise in our country to make such a purchase and warehouse it and furthermore, since none exists, we think the opportunity for making the purchase should be honored, accepted, and remove the condition so we can get on with the sale.

The same was true in the situation with several of the other countries I mentioned. Mozambique, luckily, got the State Department to back off, but the situation was this: The State Department conditions of having the purchases made by private enterprise and handled and distributed by private enterprise were rejected by the Government of Mozambique, and they were practical enough to ask for intervention from Mel Laird, the former Secretary of Defense, to come and review the situation in Mozambique and see if they were not correct in pointing out there was no private enterprise with capital to purchase the grain, there was no private enterprise with warehouses to store the grain. There simply was not the private enterprise structure to meet the conditions the State Department required.

Mel Laird went to Mozambique, found that to be the case, returned to Washington, had a meeting with Secretary Shultz, and convinced Secretary Shultz that that was the situation. So Secretary Shultz told his underlings at the State Department,

> Back off: you're wrong. Those people need this food. There is starvation in Mozambique. Before it gets worse, ship the food. Remove the condition. Allow the sale to be made.

And it was made.

However, this was not the prompt decisionmaking process that was followed in Kenya, Guinea, and Liberia. That was not the case at all. Their sales were delayed. In Sierra Leone, the same was the case, and in Senegal also. The results were that the State Department finally removed their conditions, reduced the amounts that could be purchased, and delayed the sale.

Two sides lose when that occurs. American producers, of course, lose because they lose part of the sale, and the delay itself causes a loss in consumption of the products that are desired by these foreign countries.

The other side that loses is the people in the foreign countries who have been waiting for the food, desire the food, and need the food. When two sides lose, what is in it for us? Not a thing. That is the situation we are facing.

The most recent set of conditions had a different outcome in the Philip-

pines. The State Department insisted that private enterprise purchase and control the wheat. They insisted that those conditions be met before they would approve the sale of wheat to the government. The government objected to it, but they backed down and the conditions were met. The situation developed after that. Mr. Cojuangco, a wealthy Filipino conglomerate operator with capital in the Philippines created a purchasing entity with the Filipino Bakers Association, went into the world market and purchased wheat. He met the conditions that were set down. Cojuangco has immense capital and his operations are private and enterprising. So perhaps the stigma of Cojuangco's private coconut-palm oil monopoly and the charges that have been leveled at Mr. Cojuangco for cronyism with the Marcos government have worn off now and he fills the bill for the State Department objectives. If that is all right with the State Department, there are conceivably only two groups that will be at a disadvantage under this State Department contrived scheme of privatizing the sales of American wheat or wheat products to the Philippines. That will be the American wheat producers, because for 8 to 9 years prior to this time all wheat that was imported into the Philippines was from the United States. They looked to only one source, a sole source, the United States. American wheat producers appreciated that. The results of the forcing the National Food Authority out of the picture are these: People like Cojuangco are on the world market purchasing wheat. His last purchase was from a private company in Hamburg, Germany. So we lost part of the sale to the Philippines to an enterprising group in Hamburg, Germany.

Mr. President, when you have a country that likes so well to buy from the United States and they do not buy anywhere else, we appreciate that. There is a worldwide system for purchasing wheat where any country can buy from wherever they want. But one group that has lost out on this arrangement by the State Department in the Philippines has been the American wheat producer.

What we are so concerned about is that this is only the tip of the iceberg, and that slowly viewed we will find many other countries other than the ones I have named where the State Department has interfered, set conditions, and lost sales for the United States. It is a very serious problem.

But the other group that is apparently going to lose out from this arrangement made by the State Department is the consumers, the Filipino people, because their consumption of wheat for 1985 is going to drop to 50 percent of what it was in 1981.

So both sides lose. This policy must be reversed. Part of our duty in passing this bill is to make certain that it is reversed.

Mr. President, I yield the floor.

AMENDMENT NO. 914

(Purpose: To establish shipment requirements for exports sponsored by the Department of Agriculture)

Mr. STEVENS. Mr. President, I have an amendment which I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Alaska [Mr. STEVENS] proposes an amendment numbered 914.

Mr. STEVENS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 31, beginning with line 16, strike out all through and including line 10 on page 66 and insert in lieu thereof the following:

GRANTS FOR INTERNATIONAL TRADE DEVELOPMENT CENTERS

SEC. 113. (a)(1) The Secretary of Agriculture (hereafter in this section referred to as the "Secretary") may establish and carry out a program to make grants to States for the purpose of paying the costs of construction, employing personnel, acquiring equipment, and taking other action relating to the establishment and operation of international trade development centers, or the expansion of existing international trade development centers, in the United States to enhance the exportation of United States agricultural products and related products.

(2) Such grants shall be based on a matching formula of 50 percent Federal and 50 percent non-Federal funding.

(b) In making grants under subsection (a), the Secretary shall give preference to States that intend to utilize as sites for international trade development centers land-grant colleges and universities (as defined in section 1404(10) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3103(10)) that—

(1) operate agricultural programs;

(2) have existing international trade programs that use an interdisciplinary approach and are operated jointly with State and Federal agencies to address international trade problems; and

(3) have a communications system that can be used on an international basis to conduct conferences or trade negotiations.

(c) Such centers may—

(1) through research, establish a permanent data base to address the problems faced by potential exporters, including language barriers, interaction with representatives of foreign governments, transportation of goods and products, insurance and financing within foreign countries, and collecting international marketing data;

(2) be used to locate permanent or temporary exhibits that will stimulate and educate trade delegations from foreign countries with respect to United States agricultural products and related products;

(3) be made available for use by State and regional entities for exhibits, trade seminars, and negotiations involving such products; and

(4) carry out such other activities relating to the exportation of such products, as the Secretary may approve.

(d) There are authorized to be appropriated such sums as are necessary to carry out this section.

Subtitle B—Public Law 480 and Related Programs

AGRICULTURAL TRADE POLICY

SEC. 120. (a) The first sentence of section 2 of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1691) is amended by inserting "to use foreign currencies accruing under this Act to foster and encourage the development of private enterprise in developing countries; to enhance food security in developing countries through local food production;" after "agricultural production;"

(b) Congress finds that additional steps should be taken to use the agricultural abundance produced by American farmers—

(1) to relieve hunger and promote long-term food security and economic development in developing countries in accordance with the development assistance policy established under section 102 of the Foreign Assistance Act of 1961 (22 U.S.C. 2151-1); and

(2) to promote United States agricultural trade interests.

SALES FOR FOREIGN CURRENCIES

SEC. 121. (a) Section 101 of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1701) is amended to read as follows:

"SEC. 101. (a) In order to carry out the policies and accomplish the objectives set forth in section 2, the President is authorized to negotiate and carry out agreements with friendly countries to provide for the sale of agricultural commodities—

"(1) for dollars on credit terms;

"(2) to the extent that sales for dollars under the terms applicable to such sales are not possible, for foreign currencies on credit terms and on terms the permit conversion to dollars at the exchange rate applicable to the sales agreement; or

"(3) for foreign currencies for use under section 108 on terms that permit conversion to dollars.

"(b)(1) Except as provided in paragraph (2), for the fiscal year ending September 30, 1986, and each fiscal year thereafter, sales for foreign currencies for use under section 108 under agreements entered into under this title shall be made at an annual level of—

"(A) not less than the higher of—

"(i) 25 percent of the aggregate value of all sales of agricultural commodities made under this title; or

"(ii) 500,000 metric tons; and

"(B) not more than 50 percent of the aggregate value of all such sales.

"(2)(A) For each of the fiscal years ending September 30, 1986, September 30, 1987, and September 30, 1988, except as provided in subparagraph (B), the President may reduce the minimum level of sales for foreign currencies prescribed under paragraph (1)(A) if—

"(i) there is an insufficient number of approved financial intermediaries that have entered into agreements with the Secretary of Agriculture to carry out the program provided for in section 108;

"(ii) there are insufficient requests made by such intermediaries for loan funds to uti-

lize the foreign currencies generated by such sales; or

"(iii) the Secretary requires additional time to implement such program.

"(B) The President may not reduce the minimum level of sales for foreign currencies under subparagraph (A) below an annual level of less than—

"(i) for the fiscal year ending September 30, 1986, 5 percent of the aggregate value of all sales of agricultural commodities made under this title during such fiscal year;

"(ii) for the fiscal year ending September 30, 1987, 10 percent of the aggregate value of all sales of agricultural commodities made under this title during such fiscal year; and

"(iii) for the fiscal year ending September 30, 1988, 15 percent of the aggregate value of all sales of agricultural commodities made under this title during such fiscal year.

"(c) Agreements for sales for foreign currency in a developing country for use under section 108 may not be entered into to the extent that such agreements would generate currency in amounts that cannot be productively used and absorbed in the private sector of such country.

"(d) Sales for foreign currencies for use under section 108 under agreements entered into under this title shall be made on such terms and conditions as are specified in such agreements.".

(b) Section 103 of such Act (7 U.S.C. 1703) is amended—

(1) by inserting ", in section 108," after "section 104" in subsection (b);

(2) by striking out "dollar on credit terms" in the last sentence of subsection (d);

(3) in subsection (m)—

(A) by inserting "except as provided in section 108," after the subsection designation;

(B) by striking out the semicolon and inserting in lieu thereof a period; and

(C) by adding at the end thereof the following: "In carrying out this subsection, the President shall require that foreign currencies to be used under section 108 that are acquired under an agreement for the sale of commodities be converted to dollars during the period beginning 10 years after the date of the last delivery of such commodities and ending 30 years after the date of such delivery. Such agreement for sale shall establish a schedule for such conversion but need not specify the exchange for such conversion;";

(4) by striking out "for dollars on credit terms" and "for cash dollars" in subsection (n);

(5) by striking out "Take" in subsection (o) inserting in lieu thereof "take";

(6) by striking out "Assure convertibility" in subsection (p) and inserting in lieu thereof "except as provided in section 108, assure convertibility"; and

(7) by striking out "Assure convertibility" in subsection (q) and inserting in lieu thereof "except as provided in section 108, assure convertibility".

(c) The first sentence of section 105 of such Act (7 U.S.C. 1705) is amended by striking out "section 104" and inserting in lieu thereof "sections 104 and 108".

(d) Section 106(a) of such Act (7 U.S.C. 1706(a)) is amended by adding at the end thereof the following new paragraph:

"(3) Payment for sales made for foreign currencies that are to be used under section 108 under an agreement entered into under this title shall be made on such terms as are specified in such agreement.".

(e) Such Act is amended by inserting after section 107 (7 U.S.C. 1707) the following new section:

"SEC. 108. Notwithstanding any other provision of law:

"(a) As used in this section:

"(1) The term 'developing country' means a country that is eligible to participate in a sales agreement entered into under this title.

"(2) The term 'financial intermediary' means a bank, financial institution, cooperative, nonprofit voluntary agency, or other organization or entity, as determined by the Secretary, that has the capability of making and servicing a loan in accordance with this section.

"(3) The Term 'Secretary' means the Secretary of Agriculture.

"(b) In order to foster and encourage the development of private enterprise institutions and infrastructure as the base for the expansion, promotion, and improvement of the production of food and other related goods and services within a developing country and pursuant to an agreement for the sale of agricultural commodities entered into under this title, the Secretary may enter into an agreement with a financial intermediary located or operating in such country under which the Secretary shall lend to such financial intermediary foreign currency that accrues as a result of commodity sales to such country under a sales agreement entered into under this title after the date of enactment of the Agriculture, Food, Trade, and Conservation Act of 1985.

"(c) To be eligible to obtain foreign currency under this section, a financial intermediary must enter into an agreement with the Secretary under which the intermediary agrees to use such currency to make loans to private individuals, cooperatives, corporations, or other entities within a developing country, at reasonable rates of interest, for the purpose of financing—

"(1) productive, private enterprise investment within such country, including such investment in projects carried out by cooperatives, nonprofit voluntary organizations, and other entities found to be qualified by the Secretary;

"(2) private enterprise facilities for aiding the utilization and distribution, and increasing the consumption of and markets for, United States agricultural commodities and the products thereof; or

"(3) private enterprise support of self-help measures and projects.

"(d) An agreement entered into under this section shall specify the terms and conditions under which the foreign currency shall be used and subsequently repaid to the Secretary, including the following terms and conditions:

"(1) A financial intermediary shall, to the maximum extent feasible, give preference to the financing of agricultural related private enterprise with the funds provided under this section.

"(2)(A) A financial intermediary shall repay a loan made by the Secretary under this section, plus accrued interest, at such times and in such manner as will permit the Secretary to convert such foreign currency to dollars in accordance with the schedule for such conversion.

"(B) A financial intermediary may repay a loan made under this section prior to the repayment date specified in such agreement.

"(3) To be eligible to receive financing from a financial intermediary under this section, an entity or venture must—

"(A) be owned, directly or indirectly, by citizens of the developing country, except that up to 25 percent of such ownership interest may be held by citizens of the United States; and

"(B) not be owned or controlled, in whole or in part, by the government or any governmental subdivision of the developing country.

"(4)(A) The rate of interest charged on funds loaned by the Secretary to a financial intermediary under this section shall be such rate as is determined by the Secretary and the intermediary.

"(B) In the case of a cooperative or nonprofit voluntary agency that is acting as a financial intermediary, the Secretary may charge a lower rate of interest on funds loaned to such intermediary under this section than is charged to other types of intermediaries to defray the startup costs of becoming a financial intermediary.

"(5) No currency made available under this section may be used to promote the production of agricultural commodities or the products thereof that will compete, as determined by the Secretary, in world markets with similar agricultural commodities or the products thereof produced in the United States.

"(6) The Secretary may not require a developing country to guarantee the repayment of a loan made to a financial intermediary under this section as a condition of receipt of such loan.

"(e)(1) All currencies repaid by financial intermediaries under agreements entered into under this section shall be deposited and accounted for in accordance with section 105.

"(2) Currencies repaid by financial intermediaries shall, as determined by the Secretary—

"(A) be used to finance additional productive, private enterprise investment under agreements with financial intermediaries entered into under this section;

"(B) be used for the development of new markets for United States agricultural commodities;

"(C) be used for the payment of United States obligations (including obligations entered into pursuant to other laws of the United States); or

"(D) be converted to dollars.

"(3) Section 1306 of title 31, United States Code, shall apply to currencies used for the purpose specified in paragraph (2)(C).

"(f)(1) Any agreement entered into under this section shall be subject to periodic audit by the Secretary to determine whether the terms and conditions of the agreement are being fulfilled.

"(2) Not later than 180 days after the close of each fiscal year, the Secretary shall report to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate on the activities carried out under this section during the preceding fiscal year, including an evaluation of the impact of investment under this section on the development of agricultural related private enterprise in each participating country.

"(g) The Secretary may provide agricultural technical assistance to further the purposes of this section, including the funding of market development activities. To the maximum extent practicable, the Secretary shall use at least 5 percent of the foreign currencies obtained for use under this section from sales of agricultural commodities made under agreements entered into under

this title after the date of enactment of the Agriculture, Food, Trade, and Conservation Act of 1985 to carry out such assistance.".

MINIMUM QUANTITY OF AGRICULTURAL COMMODITIES DISTRIBUTED UNDER TITLE II

SEC. 122. Section 201(b) of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1721(b)) is amended by striking out clauses (1) through (3) and inserting in lieu thereof the following new clauses:

"(1) for each of the fiscal years ending September 30, 1986, and September 30, 1987, shall be 1,900,000 metric tons, of which not less than 1,425,000 metric tons for nonemergency programs shall be distributed through nonprofit voluntary agencies, cooperatives, and the World Food Program; and

"(2) for the fiscal year ending September 30, 1988, and each fiscal year thereafter, shall be 1,700,000 metric tons, of which not less than 1,275,000 metric tons for nonemergency programs shall be distributed through nonprofit voluntary agencies, cooperatives, and the World Food Program;".

VALUE-ADDED, PROCESSED, AND PROTEIN-FORTIFIED PRODUCTS

SEC. 123. Section 201 of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1721) is amended by adding at the end thereof the following new subsection:

"(c) In distributing agricultural commodities under this title, the President shall—

"(1) consider—

"(A) the nutritional assistance to recipients and benefits to the United States that would result from distributing such commodities in the form of processed and protein-fortified products, including processed milk, plant protein products, and fruit, nut, and vegetable products;

"(B) the nutritional needs of the proposed recipients of the commodities;

"(C) the cost effectiveness of providing such commodities, for purposes of selecting commodities for distribution under nonemergency programs; and

"(D) the purposes of this title; and

"(2) ensure that at least 75 percent of the quantity of agricultural commodities required to be distributed each fiscal year under subsection (b) for nonemergency programs be in the form of processed or fortified products or bagged commodities.".

FOOD ASSISTANCE PROGRAMS OF VOLUNTARY AGENCIES

SEC. 124. (a) Title II of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1721 et seq.) is amended by adding at the end thereof the following new sections:

"SEC. 207. (a)(1) If requested by a nonprofit voluntary agency or cooperative, an agreement with the agency or cooperative for nonemergency assistance under this title may provide for the use by the agency or cooperative of foreign currency proceeds, generated from the sale of commodities made available under the agreement, for purposes specified in subsection (b).

"(2) Such agreements shall provide, in the aggregate for each fiscal year, for the use of foreign currency proceeds under this subsection in an amount that is not less than 5 percent of the aggregate value of the commodities distributed under nonemergency programs under this title for such fiscal year.

"(3) Section 103(c) shall apply to sales of agricultural commodities to generate foreign currencies under this subsection, unless the Secretary of Agriculture, in consultation with the Administrator of the Agency for International Development, waives the application of this paragraph.

"(b)(1)(A) Foreign currency proceeds generated under subsection (a) shall be used by a nonprofit voluntary agency or cooperative for activities carried out by the agency or cooperative that will enhance the effectiveness of the food assistance program carried out pursuant to the agreement.

"(B) Such activities may include food for work programs, local program management, local agricultural and cooperative development projects, and outreach projects to provide food to people with the greatest nutritional need, if such activities are directly related to the food assistance program of the agency or cooperative.

"(2) Foreign currency proceeds under subsection (a) may not be used—

"(A) to defray personnel or administrative costs incurred by a United States cooperating sponsor, distributing agency, or recipient agency, other than a local cooperative;

"(B) to defray the costs of construction or maintenance of an edifice owned or operated by a church or any other edifice used for sectarian purposes; or

"(C) to replace resources otherwise available to a nonprofit voluntary agency or cooperative, as determined by the President.

"SEC. 208. (a) In the case of an agreement with a nonprofit voluntary agency for nonemergency assistance under this title, subject to subsection (b), the President is encouraged to approve multiyear agreements to make agricultural commodities available for distribution by the agency, if the agency requests a multiyear agreement.

"(b)(1) Such agreements shall be subject to the availability each fiscal year of the necessary appropriations and agricultural commodities.

"(2) Subsection (a) shall not apply to an agreement that the President determines should be limited to a single year because of the past performance of the nonprofit voluntary agency or because the agreement involves a new program of assistance.

"(c) In carrying out a multiyear agreement pursuant to this section, a nonprofit voluntary agency may not be required to obtain annual approval from the United States Government in order to continue its assistance program pursuant to this agreement, unless the President determines that exceptional and unforeseen circumstances have occurred that require such approval.

"SEC. 209. (a) Agreements with nonprofit voluntary agencies under this title may authorize such agencies to establish local food reserves.

"(b) If authorized to establish a local food reserve pursuant to subsection (a), a nonprofit voluntary agency may deposit in such reserve agricultural commodities made available under this title—

"(1) for later use in providing immediate food assistance in case of a famine or other food shortage emergency; or

"(2) if the nonprofit voluntary agency determines that the immediate use of the agricultural commodities for food assistance purposes would be a disincentive to local agricultural production and that the commodities should be held for use at a later time.

"SEC. 210. (a) A nonprofit voluntary agency requesting a nonemergency food assistance agreement under this title shall include in such request a description of the intended uses of any foreign currency proceeds that would be generated with the commodities provided under the agreement.".

"(b)(1) It is the sense of Congress that the President is encouraged to invite representatives of nonprofit voluntary agencies participating in programs under the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1691 et seq.) and other concerned nonprofit voluntary agencies, and to designate appropriate executive branch officials to participate in a task force to study the means of providing food assistance under such Act to people with the greatest nutritional need in the recipient countries.

"(2) If a task force is established under paragraph (1), the task force should report to Congress by February 15, 1986, on further steps that could be taken to provide food under such Act to such people.

"(c)(1) Sections 207, 208, and 209 of the Agricultural Trade Development and Assistance Act of 1954 (as added by subsection (a)) shall apply with respect to agreements entered into after September 30, 1985.

"(2) Section 210 of the Agricultural Trade Development and Assistance Act of 1954 (as added by subsection (a)) shall apply with respect to agreements entered into after December 31, 1985.

FOOD FOR DEVELOPMENT PROGRAM

SEC. 125. Section 302(c)(1)(C) of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1727a(c)(1)(C)) is amended by striking out "15" and inserting in lieu thereof "10".

EXTENSION OF PROGRAM

SEC. 126. Section 409 of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1736c) is amended—

(1) by striking out "1985" in the first sentence and inserting in lieu thereof "1989"; and

(2) by striking out "Agriculture and Food Act of 1981" in the second sentence and inserting in lieu thereof "Agriculture, Food, Trade, and Conservation Act of 1985".

COMMODITY DONATIONS ABROAD

SEC. 127. (a) Subsection (b) of section 416 of the Agricultural Act of 1949 (7 U.S.C. 1431(b)) is amended to read as follows:

"(b)(1) As used in this subsection, the term 'eligible commodities' means agricultural commodities and the products thereof acquired by the Commodity Credit Corporation through price support operations that the Secretary determines meet the criteria specified in subsection (a).

"(2) The Secretary may furnish eligible commodities for carrying out title II of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1721 et seq.), as approved by the Secretary and for such purposes as are approved by the Secretary.

"(3)(A) Commodities may not be made available for disposition under this subsection in quantities that will reduce the quantities of commodities that traditionally are made available through donations to domestic feeding programs or agencies.

"(B) Subject to paragraph (9)(B)(v), sections 103(c) and 401(b) of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1703(c) and 1731(b)) shall apply with respect to commodities furnished under this subsection.

"(C) The requirement for safeguarding usual marketings of the United States shall not be used to prevent the furnishing under this subsection of any eligible commodity for use in countries that—

"(i) have not traditionally purchased the commodity from the United States; or

"(ii) do not have adequate financial resources to acquire the commodity from the United States through commercial sources or through concessional sales arrangements.

"(4) Section 203 of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1723) shall apply to commodities furnished under this subsection.

"(5) Agreements may be entered into under this subsection to provide eligible commodities in installments over an extended period of time.

"(6) As soon as possible after the beginning of each fiscal year, the Secretary shall estimate and announce the types of eligible commodities, and the amounts thereof, that the Secretary anticipates will become available for distribution under this subsection during such fiscal year.

"(7) To the maximum extent practicable, expedited procedures shall be used in implementing this subsection.

"(8) The cost of commodities furnished under this subsection, and expenses incurred under section 203 of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1723) in connection with such commodities, shall be in addition to the level of assistance programmed under such Act and may not be considered expenditures for international affairs and finance.

"(9)(A) Eligible commodities furnished under this subsection may be sold or bartered with the approval of the Secretary solely as follows:

"(i) Sales and barter that are incidental to the donation of the commodities.

"(ii) Sales and barter, the proceeds of which are used to finance the distribution, handling, and processing costs of the donated commodities in the importing country or other activities in the importing country that are consistent with providing food assistance to needy people.

"(iii) Sales and barter of commodities donated to intergovernmental organizations, insofar as they are consistent with normal programming procedures in the distribution of commodities by such organizations.

"(iv) Sales and barter of commodities used for payments pursuant to paragraph (4).

"(B)(i) If requested by a nonprofit voluntary agency or cooperative, an agreement with the agency or cooperative for commodities made available under this subsection may provide for the use by the agency or cooperative of foreign currency proceeds, generated from the sale of commodities made available under the agreement, for the purposes specified in clause (iii).

"(ii) The Secretary shall ensure, to the extent practicable, that such agreements provide, in the aggregate for each fiscal year, for the use of foreign currency proceeds under this subsection an amount that is not less than 5 percent of the aggregate value of the eligible commodities furnished to such agencies and cooperatives under this subsection for such fiscal year.

"(iii)(I) Foreign currency generated under this subparagraph shall be used by a nonprofit voluntary agency or cooperative for activities carried out by the agency or cooperative that will enhance the effectiveness of the food assistance program being carried out pursuant to the agreement.

"(II) Such activities may include food for work programs, local program management, local agricultural and cooperative development projects, and outreach projects designed to provide food to people with the greatest nutritional need, if such activities are directly related to the food assistance program of the nonprofit voluntary agency or cooperative.

"(iv) All foreign currency proceeds generated pursuant to an agreement under this subparagraph shall be expended within 1 year after the end of the period of the agreement.

"(v) Section 103(c) of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1703(c)) shall apply to sales of agricultural commodities made to generate foreign currencies under this subparagraph, unless the Secretary of Agriculture, in consultation with the Administrator of the Agency for International Development, waives the application of this subparagraph.

"(vi) Foreign currency proceeds generated under this subsection may not be used—

"(I) to defray personnel or administrative costs incurred by a United States cooperating sponsor, distributing agency, or recipient agency, other than a local cooperative;

"(II) to defray the costs of construction or maintenance of an edifice owned or operated by a church or any other edifice used for sectarian purposes; or

"(III) to replace resources otherwise available to a nonprofit voluntary agency or cooperative, as determined by the President.

"(10)(A) In carrying out this subsection, during each fiscal year, the Secretary shall furnish to nonprofit voluntary agencies, cooperatives, and the World Food Program for distribution in developing countries not less than 400,000 metric tons of eligible commodities that are available for distribution under this subsection.

"(B) Subparagraph (A) shall not apply in any fiscal year to the extent that the Secretary determines and reports to Congress (together with the reasons therefor) that—

"(i) there have not been sufficient requests made by nonprofit voluntary agencies, cooperatives, and the World Food Program for commodities under this subsection for uses that would effectively carry out the purposes of title II of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1721 et seq.); or

"(ii) a limitation in paragraph (3) prevents the use of commodities pursuant to this paragraph.

"(C) If the quantity of eligible commodities available for distribution under subparagraph (A) for a fiscal year is less than 400,000 metric tons, such subparagraph shall not require the Secretary to purchase additional commodities to satisfy such subparagraph.".

"(b) Section 416(b)(9)(A) of the Agricultural Act of 1949 (as added by subsection (a)) shall become effective on October 1, 1985.

FOOD FOR PROGRESS

SEC. 128. (a) Section 416 of the Agricultural Act of 1949 (7 U.S.C. 1431) is amended by adding at the end thereof the following new subsection:

"(d) Notwithstanding any other provision of law:

"(1)(A) In order to use the food resource of the United States more effectively in support of countries that have made commitments to introduce or expand free enterprise elements in their agricultural economics through changes in commodity pricing, marketing, input availability, distribution, and private sector involvement, commodities and the products thereof acquired by the Commodity Credit Corporation that the Secretary determines meet the criteria specified in subsection (a), may be furnished by the Secretary to carry out agreements entered into by the President under paragraph (2).

"(B) Not more than 500,000 metric tons of commodities may be furnished under this subsection in each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, and September 30, 1989.

"(C) The Commodity Credit Corporation may purchase agricultural commodities and the products thereof for use under this subsection if—

"(i) the Commodity Credit Corporation does not hold stocks of such commodities and the products thereof; or

"(ii) the Commodity Credit Corporation stocks are insufficient to satisfy commitments made in agreements entered into under this subsection and such commodities and the products thereof are needed to fulfill such commitments.

"(D) No funds of the Commodity Credit Corporation in excess of $30,000,000 (exclusive of the cost of commodities) may be used to carry out this subsection unless authorized in advance in appropriation Acts.

"(2)(A)(i) The President may enter into agreements with developing countries to furnish commodities and the products thereof made available under paragraph (1) to such countries to promote the implementation of private, free enterprise agricultural policies for long-term agricultural development.

"(ii)(I) Such commodities shall be furnished under this subsection on such terms and conditions as the President considers are in the public interest and will promote the objectives of this subsection.

"(II) Agreements may provide for commodities to be furnished on a multiyear basis.

"(B) In determining whether to enter into agreements with countries for the furnishing of commodities under this subsection, the President shall consider whether a potential recipient country—

"(i) is carrying out, or is committed to carry out, policies that promote economic freedom, private, domestic production of food commodities for domestic consumption, and the creation and expansion of efficient domestic markets for the purchase and sale of such commodities, including policies that may provide for—

"(I) access, on the part of farmers in such country, to private, competitive markets for their products;

"(II) market pricing of commodities to foster adequate private sector incentives to individual farmers to produce food on a regular basis for the domestic needs of the country;

"(III) establishment of market-determined foreign exchange rates;

"(IV) timely availability of production inputs, such as seed, fertilizer, or pesticides, to farmers;

"(V) access to technologies appropriate to the level of agricultural development in the country; and

"(VI) construction of facilities and distribution systems necessary to handle perishable products; and

"(ii) is able to use the quantity of commodities being considered for donation without disruption of the internal market of the country for domestically produced agricultural commodities and the products thereof.

"(3) An agreement entered into under this subsection shall prohibit the resale or transshipment of the donated agricultural commodities to other countries.

"(4) In entering into agreements with countries for the donation of agricultural commodities and the products thereof under this subsection, the President shall take reasonable precautions to avoid displacement of any sales of United States agricultural commodities and the products

thereof that would otherwise be made to such countries.

"(5)(A) Section 203 of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1723) shall apply to agricultural commodities furnished under this subsection.

"(B) The cost of the commodities furnished under this subsection, and the expenses incurred in connection with furnishing such commodities, shall be in addition to the level of assistance programmed under the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1691 et seq.) and may not be considered expenditures for international affairs and finance.

"(6)(A) The President shall carry out the duties imposed on the President under this subsection through the National Security Advisor in the Executive Office of the President.

"(B) The National Security Advisor, with the approval of the Secretary, may use personnel of the Department of Agriculture in carrying out this subsection.

"(8) Within 120 days after the close of each fiscal year in which an agreement entered into with a country under this subsection is in effect, the President shall report to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate on the status of such agreement and the progress being made to implement private, free enterprise agricultural policies for long-term agricultural development in such country.".

(b) The amendment made by this section shall be effective during the period beginning October 1, 1985, and ending September 30, 1989.

SPECIAL ASSISTANT FOR AGRICULTURAL TRADE AND FOOD AID

SEC. 129. (a)(1) The President shall appoint, by and with the advice and consent of the Senate, a Special Assistant to the President for Agricultural Trade and Food Aid (hereinafter in this section referred to as the "Special Assistant").

(2) The Special Assistant shall serve in the Executive Office of the President.

(3) As an exercise of the rulemaking power of the Senate, any nomination to the position of Special Assistant shall be—

(A) submitted to the Senate for confirmation; and

(B) referred to the Committee on Agriculture, Nutrition, and Forestry.

(4) The Special Assistant shall—

(A) serve at the pleasure of the President;

(B) be entitled to receive the same allowances as a chief of mission; and

(C) have the rank of Ambassador Extraordinary and Plenipotentiary.

(b) The Special Assistant shall—

(1) assist and advise the President in order to improve and enhance food assistance programs carried out in the United States and foreign countries;

(2) coordinate and streamline the manner in which food assistance programs are carried out by the Department of Agriculture and the Agency for International Development, in order to improve their overall effectiveness;

(3) make recommendations to the President on measures to be taken to increase use of United States agricultural commodities and the products thereof through food assistance programs;

(4) advise the President on agricultural trade;

(5) serve as a member of the Development Coordination Committee;

(6) serve as Chairman of the Food Aid Subcommittee of such Committee; and

(7) issue to departments and agencies of the Federal Government policy guidelines on basic issues of food assistance policy, to the extent necessary to assure the coordination of food assistance programs, consistent with law, and with the advice of such Subcommittee.

(c) The Special Assistant may—

(1) solicit information and advice from private and governmental sources and recommend a plan to the President and Congress on measures that should be taken—

(A) to promote the export of United States agricultural commodities and the products thereof; and

(B) to expand export markets for United States agricultural commodities and the products thereof;

(2) develop and recommend to the President national agricultural policies to foster and promote the United States agricultural industry and to maintain and increase the strength of this vitally important sector of the United States economy; and

(3)(A) appraise the various programs and activities of the Federal Government, as they affect the United States agricultural industry, for the purpose of determining the extent to which such programs and activities are contributing or not contributing to such industry; and

(B) make recommendations to the President and Congress with respect to the effectiveness of such programs and activities in contributing to such industry.

(d) Section 5312 of title 5, United States Code, is amended by adding at the end thereof the following new item:

"Special Assistant for Agricultural Trade and Food Aid.".

Subtitle C—Export Transportation of Agricultural Commodities

FINDINGS AND DECLARATIONS

SEC. 131. (a) The Congress finds and declares—

(1) that a productive and healthy agricultural industry and a strong and active United States maritime industry are vitally important to the economic well-being and national security objectives of our Nation;

(2) that both industries must compete in international markets increasingly dominated by foreign trade barriers and the subsidization practices of foreign governments;

(3) that increased agricultural exports and the utilization of the United States merchant vessels contribute positively to the United States balance of trade and generate employment opportunities in the United States.

(b) It is therefore declared to be the purpose and policy of the Congress in this subtitle—

(1) to enable the Department of Agriculture to plan its export programs effectively, by clarifying the ocean transportation requirements applicable to such programs;

(2) to take immediate and positive steps to promote the growth of the cargo carrying capacity of the United States merchant marine;

(3) to expand international trade in United States agricultural commodities and products and to develop, maintain, and expand markets for United States agricultural exports;

(4) to improve the efficiency of administration of both the commodity purchasing and selling and the ocean transportation activities associated with export programs sponsored by the Department of Agriculture; and

(5) to stimulate and promote both the agricultural and maritime industries of the United States and encourage cooperative efforts by both industries to address their common problems.

EXEMPTION OF CERTAIN AGRICULTURAL EXPORTS FROM THE REQUIREMENTS OF THE CARGO PREFERENCE LAWS

SEC. 132. The requirements of section 901(b)(1) of the Merchant Marine Act, 1936 (46 U.S.C. 1241(b)(1)), and the Joint Resolution of March 26, 1934 (46 U.S.C. 1241-1) shall not apply to any export activities of the Secretary of Agriculture or the Commodity Credit Corporation—

(1) under which agricultural commodities or the products thereof acquired by the Commodity Credit Corporation are made available to United States exporters, users, processors, or foreign purchasers for the purpose of developing, maintaining, or expanding export markets for United States agricultural commodities or the products thereof at prevailing world market prices;

(2) under which payments are made available to United States exporters, users, or processors or, except as provided in section 133(b)(6), cash grants are made available to foreign purchasers, for the purpose described in clause (1);

(3) under which commercial credit guarantees are blended with direct credits from the Commodity Credit Corporation to reduce the effective rate of interest on export sales of United States agricultural commodities or the products thereof;

(4) under which credit or credit guarantees for not to exceed 3 years are extended by the Commodity Credit Corporation to finance or guarantee export sales of United States agricultural commodities or the products thereof; or

(5) under which agricultural commodities or the products thereof owned or controlled by or under loan from the Commodity Credit Corporation are exchanged or bartered for materials, goods, equipment, or services, but only if such materials, goods, equipment, or services are of a value at least equivalent to the value of the agricultural commodities or products exchanged or bartered therefor (determined on the basis of prevailing world market prices at the time of the exchange or barter), but nothing in this subsection shall be construed to exempt from the cargo preference provisions referred to in section 132 any requirement otherwise applicable to the materials, goods, equipment, or services imported under any such transaction.

SHIPMENT REQUIREMENTS FOR CERTAIN EXPORTS SPONSORED BY THE DEPARTMENT OF AGRICULTURE

SEC. 133. (a)(1) In addition to the requirement for United States-flag carriage of a percentage of gross tonnage imposed by section 901(b)(1) of the Merchant Marine Act, 1936, was amended (46 U.S.C. 1241(b)(1)), 25 per centum of the gross tonnage of agricultural commodities or the products thereof shipped under the agricultural export programs subject to such section and specified in subsection (b) shall be transported on United States-flag commercial vessels.

(2) In order to achieve an orderly and efficient implementation of the requirement of paragraph (1)—

(A) an additional quantity equal to 10 percent of the gross tonnage referred to in paragraph (1) shall be transported in United States-flag vessels in calendar year 1986;

(B) an additional quantity equal to 20 percent of the gross tonnage shall be transported in such vessels in calendar year 1987; and

(C) an additional quantity equal to 25 percent of the gross tonnage shall be transported in such vessels in calendar year 1988 and in each calendar year thereafter.

(3) In implementing the requirements of paragraph (1), the Secretary of Transportation shall give due consideration to the availability of United States-flag vessels to transport the commodities referred to in such paragraph.

(b) This section shall apply to any export activity of the Commodity Credit Corporation or the Secretary of Agriculture—

(1) carried out under the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1691 et seq.);

(2) carried out under section 416 of the Agricultural Act of 1949 (7 U.S.C. 1431);

(3) carried out under the Food Security Wheat Reserve Act of 1980 (7 U.S.C. 1736f-1);

(4) under which agricultural commodities or the products thereof are—

(A) donated through foreign governments or agencies, private or public, including intergovernmental organizations; or

(B) sold for foreign currencies or for dollars on credit terms of more than ten years;

(5) under which agricultural commodities or the products thereof are made available for emergency food relief at less than prevailing world market prices;

(6) under which cash grants are made available to foreign purchasers for the purpose of enabling such purchasers to acquire United States agricultural commodities or the products thereof if the cash grants are in amounts that result in the purchaser (after receipt of such grants) paying less than the prevailing world market price for such commodities; or

(7) under which agricultural commodities owned or controlled by or under loan from the Commodity Credit Corporation are exchanged or bartered for materials, goods, equipment, or services produced in foreign countries, other than export activities described in section 132(5).

(c)(1) The requirement for United States-flag transportation imposed by subsection (a) shall be subject to the same terms and conditions as provided in section 901(b) of the Merchant Marine Act, 1936 (46 U.S.C. 1241(b)).

(2)(A) In order to carry out effectively the requirements of this subtitle, the Secretary of Transportation shall, to the maximum extent practicable within the requirements of this section and section 901(b) of the Merchant Marine Act, 1936, administer this subtitle and section 901(b) of the Merchant Marine Act, 1936, in a flexible manner, giving due consideration to historical trading patterns and to divisions in United States international shipping trades between bulk and liner service to particular geographic areas.

(B) The Secretary of Transportation shall also administer this subtitle and section 901(b) of the Merchant Marine Act, 1936, in a manner which preserves to the greatest extent practicable the mean historical port range share of cargoes subject to United States-flag transportation requirements under this section exported from the Atlantic, Gulf, Pacific, and Great Lakes port ranges.

(d) As used in subsection (b), the term "export activity", shall not include inspection or weighing activities, other activities carried out for health or safety purposes, or technical assistance provided in the handling of commercial transactions.

(e)(1) The prevailing world market price as to agricultural commodities or the products thereof shall be determined under this subtitle in accordance with procedures established by the Secretary of Agriculture. The Secretary shall prescribe such procedures by regulation, with notice and opportunity for public comment, pursuant to section 553 of title 5, United States Code.

(2) In the event that a determination of the prevailing world market price of any other type of materials, goods, equipment, or service is required in order to determine whether a barter or exchange transaction is subject to subsection (b)(6) or (b)(7), such determination shall be made by the Secretary of Agriculture in consultation with the heads of other appropriate Federal agencies.

MINIMUM TONNAGE

SEC. 134. (a)(1) For fiscal year 1986 and each fiscal year thereafter, the minimum quantity of agricultural commodities that may be exported under programs subject to section 133 shall be the average of the tonnage exported under such programs during the base period defined in subsection (b), discarding the high and low years.

(2) The President may waive the minimum quantity for any fiscal year required under paragraph (1) if he determines and reports to the Congress, together with his reasons, that such quantity cannot be effectively used for the purposes of such programs or, based on a certification by the Secretary of Agriculture, that the commodities are not available for reasons which include the unavailability of funds.

(b) The base period utilized for computing the minimum tonnage quantity referred to in subsection (a) for any fiscal year shall be the five fiscal years beginning with the sixth fiscal year preceding such fiscal year and ending with the second fiscal year preceding such fiscal year.

FINANCING OF SHIPMENT OF AGRICULTURAL COMMODITIES IN UNITED STATES-FLAG VESSELS

SEC. 135. (a) The Secretary of Transportation shall finance any increased ocean freight charges incurred in any fiscal year which result from the application of section 133(a). The amount to be financed by the Secretary shall be an amount of the total freight charges incurred from the application of such section in such fiscal year equal to a fraction of the total ocean freight differential incurred in connection with the export activities specified in such section in such fiscal year, the numerator of such fraction to be equal to the percentage in excess of 50 of the tonnage of agricultural commodities or the products thereof that are shipped on United States-flag vessels, and the denominator of such fraction to be equal to the total percentage of such tonnage so shipped.

(b)(1) If in any fiscal year the total cost of ocean freight and ocean freight differential for which obligations are incurred by the Department of Agriculture and the Commodity Credit Corporation on exports of agricultural commodities and products thereof under the agricultural export programs specified in section 133(b) exceeds 20 percent of the value of such commodities and products and the cost of such ocean freight and ocean freight differential on which obligations are incurred by such Department and Corporation during such year, the Secretary of Transportation shall reimburse the Department of Agriculture and the Commodity Credit Corporation for the amount of such excess. For the purpose of this subsection, commodities shipped from the inventory of the Commodity Credit Corporation shall be valued as provided in section 403(b) of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1733(b)).

(2)(A) The National Advisory Commission on Agricultural Export Transportation Policy established under section 136 shall include in its final report to the President and the Congress recommendations for any changes in the provisions of paragraph (1) that would help assure that the cost of ocean freight and ocean freight differential incurred by the Department of Agriculture and the Commodity Credit Corporation on the agricultural export programs specified in section 133(b), is not increased above historical levels as a result of the extra demand for United States-flag vessels caused by this subtitle.

(B) After taking into consideration the recommendations of the Commission referred to in subparagraph (A), the President may, by proclamation, provide requirements for the assumption by the Department of Transportation of a portion of the cost of ocean freight and ocean freight differential that would otherwise be incurred by the Department of Agriculture and the Commodity Credit Corporation on a different basis than that set forth in paragraph (1) in order to accomplish the objectives of subparagraph (A). The provisions of paragraph (1) shall be inapplicable on and after the effective date of the proclamation.

(c) For the purpose of meeting those expenses required to be assumed under subsections (a) and (b), the Secretary of Transportation shall issue to the Secretary of the Treasury such obligations in such forms and denominations, bearing such maturities and subject to such terms and conditions, as may be prescribed by the Secretary of Transportation with the approval of the Secretary of the Treasury. Such obligations shall be at a rate of interest as determined by the Secretary of the Treasury, taking into consideration the average market yield on outstanding marketable obligations of the United States with remaining periods of maturity comparable to the average maturities of such obligations during the month preceding the issuance of such obligations of the Secretary of Transportation. The Secretary of Treasury shall purchase any obligations of the Secretary of Transportation issued under this subsection and, for the purpose of purchasing such obligations, the Secretary of the Treasury may use as a public debt transaction the proceeds from the sale of any securities issued under chapter 31 of title 31, United States Code, after the date of the enactment of this Act and the purposes for which securities may be issued under such chapter are extended to include any purchases of the obligations of the Secretary of Transportation under this subsection. All redemptions and purchases by the Secretary of the Treasury of the obligations of the Secretary of Transportation shall be treated as public-debt transactions of the United States.

(d) There is authorized to be appropriated annually for each fiscal year, commencing with the fiscal year beginning October 1, 1986, an amount sufficient to reimburse the Secretary of Transportation for the costs, including administrative expenses and the principal and interest due on the obligations to the Secretary of the Treasury incurred under this section. Reimbursement of any

such costs shall be made with appropriated funds, as provided in this section, rather than through cancellation of notes.

(e) Notwithstanding the provisions of this section, in the event that the Secretary of Transportation is unable to obtain the funds necessary to finance the increased ocean freight charges resulting from the requirements of subsections (a) and (b) and section 133(a), the Secretary of Transportation shall so notify the Congress within 10 working days of the discovery of such insufficiency.

NATIONAL ADVISORY COMMISSION ON AGRICULTURAL EXPORT TRANSPORTATION POLICY

SEC. 136. (a) There is hereby established an advisory commission to be known as the National Advisory Commission on Agricultural Export Transportation Policy (hereafter in this subtitle referred to as the "Commission").

(b)(1) The Commission shall be composed of 24 members.

(2) Sixteen members of the Commission shall be appointed by the President.

(3) The chairman and ranking minority members of the Senate Committee on Agriculture, Nutrition, and Forestry, of the Subcommittee on Merchant Marine of the Senate Committee on Commerce, Science, and Transportation, of the House Committee on Agriculture, and of the House Committee on Merchant Marine and Fisheries shall serve as members of the Commission.

(4)(A) Eight of the members appointed by the President shall be representatives of agricultural producers, cooperatives, merchandisers, and processors of agricultural commodities.

(B) The remaining eight members appointed by the President shall be representatives of the United States-flag maritime industry, four of whom shall represent labor and four of whom shall represent management.

(c)(1) The members of the Commission shall elect a Chairman from among its members.

(2) Any vacancy in the Commission shall not affect its powers but shall be filled in the same manner in which the original appointment was made.

DUTIES OF THE COMMISSION

SEC. 137. (a) It shall be the duty of the Commission to conduct a comprehensive study and review of the ocean transportation of agricultural exports subject to the cargo preference laws referred to in section 132 and to make recommendations to the President and the Congress for improving the efficiency of such transportation on United States-flag vessels in order to reduce the costs incurred by the United States in connection with such transportation. In carrying out such study and review, the Commission shall consider the extent to which any unfair or discriminatory practices of foreign governments increase the cost to the United States of transporting agricultural commodities subject to such cargo preference laws.

(b)(1) The Commission shall submit an interim report to the President and the Congress not later than one year after the date of the enactment of this subtitle and such other interim reports as the Commission considers advisable.

(2) The Commission shall submit a final report containing its findings and recommendations to the President and the Congress not later than two years after the date of the enactment of this subtitle.

(3) Sixty days after the submission of the final report, the Commission shall cease to exist.

(c) The Commission shall include in its reports submitted pursuant to subsection (b) recommendations concerning the feasibility and desirability of achieving the following goals with respect to the ocean transportation of agricultural commodities subject to the cargo preference laws referred to in section 132:

(1) Ensuring that the timing of commodity purchase agreements entered into by the United States in connection with the export of such commodities, and the methods of implementing such agreements, are such as to minimize cost to the United States.

(2) Ensuring that shipments of such commodities are made on the most modern and efficient United States-flag vessels available.

(3) Ensuring that shipments of such commodities are made under the most advantageous terms available, including—

(A) charters for full shipload;

(B) charters for intermediate or long term;

(C) charters for consecutive voyages and contracts of affreightment; and

(D) adjustment of rates in the event that vessels used for shipments of such commodities also carry cargoes on return voyages.

(4) Reduction and elimination of impediments, including delays in port, to the efficient loading and operation of the vessels employed for shipment of such commodities.

(5) Utilization of open and competitive bidding for the ocean transportation of such commodities.

INFORMATION AND ASSISTANCE TO BE FURNISHED TO THE COMMISSION

SEC. 138. (a) Each department, agency, and instrumentality of the United States, including independent agencies, shall furnish to the Commission, upon request made by the Chairman, such statistical data, reports, and other information as the Commission considers necessary to carry out its functions under this subtitle.

(b) The Secretary of Agriculture and the Secretary of Transportation shall make available to the Commission such staff, personnel, and administrative services as may reasonably be required to carry out the Commission's duties.

COMPENSATION AND TRAVEL AND SUBSISTENCE EXPENSES OF COMMISSION MEMBERS

SEC. 139. Members of the Commission shall serve without compensation in addition to compensation they may otherwise be entitled to receive as employees of the United States or as Members of Congress, but shall be reimbursed for travel, subsistence, and other necessary expenses incurred in the performance of duties vested in the Commission.

AUTHORIZATION OF APPROPRIATIONS

SEC. 140. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this subtitle.

TERMINATION OF SUBTITLE

SEC. 141. The operation of this subtitle shall terminate 90 days after the date on which a notification is made pursuant to section 135(e), except with respect to shipments of agricultural commodities and products subject to contracts entered into before the expiration of such 90-day period, unless within such 90-day period the Secretary of Transportation proclaims that funds are available to finance increased freight charges resulting from the requirements of sections 133(a) and 135 (a) and (b).

EFFECT ON OTHER LAWS

SEC. 142. This Act shall not be construed as modifying in any manner the provisions of section 4(b) (8) of the Food for Peace Act of 1966 (7 U.S.C. 1707a(b)(8)) or chapter 5 of title 5, United States Code.

AMENDMENT NO. 915

(Purpose: To establish shipment requirements for exports sponsored by the Department of Agriculture)

Mr. COCHRAN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Mississippi [Mr. COCHRAN] proposes an amendment numbered 915 to amendment 914.

Mr. COCHRAN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Beginning on page 35 of the amendment strike line 9 through the end of the amendment and insert the following in lieu thereof:

SEC. 131. (a) The Congress finds and declares—

(1) that a productive and healthy agricultural industry and a strong and active United States maritime industry are vitally important to the economic well-being and national security objectives of our Nation;

(2) that both industries must compete in international markets increasingly dominated by foreign trade barriers and the subsidization practices of foreign governments;

(3) that increased agricultural exports and the utilization of United States merchant vessels contribute positively to the United States balance of trade and generate employment opportunities in the United States.

(b) It is therefore declared to be the purpose and policy of the Congress in this subtitle—

(1) to enable the Department of Agriculture to plan its export programs effectively, by clarifying the ocean transportation requirements applicable to such programs;

(2) to take immediate and positive steps to promote the growth of the cargo carrying capacity of the United States merchant marine;

(3) to expand international trade in United States agricultural commodities and products and to develop, maintain, and expand markets for United States agricultural exports;

(4) to improve the efficiency of administration of both the commodity purchasing and selling and the ocean transportation activities associated with export programs sponsored by the Department of Agriculture; and

(5) to stimulate and promote both the agricultural and maritime industries of the United States and encourage cooperative efforts by both industries to address their common problems.

EXEMPTION OF CERTAIN AGRICULTURAL EXPORTS FROM THE REQUIREMENTS OF THE CARGO PREFERENCE LAWS

SEC. 132. The requirements of section 901(b)(1) of the Merchant Marine Act, 1936

(46 U.S.C. 1241(b)(1)), and the Joint Resolution of March 26, 1934 (46 U.S.C. 1241-1), shall not apply to any export activities of the Secretary of Agriculture or the Commodity Credit Corporation—

(1) under which agricultural commodities or the products thereof acquired by the Commodity Credit Corporation are made available to United States exporters, users, processors, or foreign purchasers for the purpose of developing, maintaining, or expanding export markets for United States agricultural commodities or the products thereof at prevailing world market prices;

(2) under which payments are made available to United States exporters, users, or processors or, except as provided in section 133(b)(6), cash grants are made available to foreign purchasers, for the purpose described in clause (1);

(3) under which commercial credit guarantees are blended with direct credits from the Commodity Credit Corporation to reduce the effective rate of interest on export sales of United States agricultural commodities or the products thereof;

(4) under which credit or credit guarantees for not to exceed 3 years are extended by the Commodity Credit Corporation to finance or guarantee export sales of United States agricultural commodities or the products thereof; or

(5) under which agricultural commodities or the products thereof owned or controlled by or under loan from the Commodity Credit Corporation are exchanged or bartered for materials, goods, equipment, or services, but only if such materials, goods, equipment, or services are of a value at least equivalent to the value of the agricultural commodities or products exchanged or bartered therefor (determined on the basis of prevailing world market prices at the time of the exchange or barter), but nothing in this subsection shall be construed to exempt from the cargo preference provisions referred to in section 132 any requirement otherwise applicable to the materials, goods, equipment, or services imported under any such transaction.

SHIPMENT REQUIREMENTS FOR CERTAIN EXPORTS SPONSORED BY THE DEPARTMENT OF AGRICULTURE

SEC. 133. (a)(1) In addition to the requirement for United States-flag carriage of a percentage of gross tonnage imposed by section 901(b)(1) of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1241(b)(1)), 25 per centum of the gross tonnage of agricultural commodities or the products thereof shipped under the agricultural export programs subject to such section and specified in subsection (b) shall be transported on United States-flag commercial vessels.

(2) In order to achieve an orderly and efficient implementation of the requirement of paragraph (1)—

(A) an additional quantity equal to 10 percent of the gross tonnage referred to in paragraph (1) shall be transported in United States-flag vessels in calendar year 1986;

(B) an additional quantity equal to 20 percent of the gross tonnage shall be transported in such vessels in calendar year 1987; and

(C) an additional quantity equal to 25 percent of the gross tonnage shall be transported in such vessels in calendar year 1988 and in each calendar year thereafter.

(3) In implementing the requirements of paragraph (1), the Secretary of Transportation shall give due consideration to the availability of United States-flag vessels to transport the commodities referred to in such paragraph.

(b) This section shall apply to any export activity of the Commodity Credit Corporation or the Secretary of Agriculture—

(1) carried out under the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1691 et seq.);

(2) carried out under section 416 of the Agricultural Act of 1949 (7 U.S.C. 1431);

(3) carried out under the Food Security Wheat Reserve Act of 1980 (7 U.S.C. 1736f-1);

(4) under which agricultural commodities or the products thereof are—

(A) donated through foreign governments or agencies, private or public, including intergovernmental organizations; or

(B) sold for foreign currencies or for dollars on credit terms of more than ten years;

(5) under which agricultural commodities or the products thereof are made available for emergency food relief at less than prevailing world market prices;

(6) under which cash grants are made available to foreign purchasers for the purpose of enabling such purchasers to acquire United States agricultural commodities or the products thereof if the cash grants are in amounts that result in the purchaser (after receipt of such grants) paying less than the prevailing world market price for such commodities; or

(7) under which agricultural commodities owned or controlled by or under loan from the Commodity Credit Corporation are exchanged or bartered for materials, goods, equipment, or services produced in foreign countries, other than export activities described in section 132(5).

(c)(1) The requirement for United States-flag transportation imposed by subsection (a) shall be subject to the same terms and conditions as provided in section 901(b) of the Merchant Marine Act, 1936 (46 U.S.C. 1241(b)).

(2)(A) In order to carry out effectively the requirements of this subtitle, the Secretary of Transportation shall, to the maximum extent practicable within the requirements of this section and section 901(b) of the Merchant Marine Act, 1936, administer this subtitle and section 901(b) of the Merchant Marine Act, 1936, in a flexible manner, giving due consideration to historical trading patterns and to divisions in United States international shipping trades between bulk and liner service to particular geographic areas.

(B) The Secretary of Transportation shall also administer this subtitle and section 901(b) of the Merchant Marine Act, 1936, in a manner which preserves to the greatest extent practicable the mean historical port range share of cargoes subject to United States-flag transportation requirements under this section exported from the Atlantic, Gulf, Pacific, and Great Lakes port ranges.

(d) As used in subsection (b), the term "export activity", shall not include inspection or weighing activities, other activities carried out for health or safety purposes, or technical assistance provided in the handling of commercial transactions.

(e)(1) The prevailing world market price as to agricultural commodities or the products thereof shall be determined under this subtitle in accordance with procedures established by the Secretary of Agriculture. The Secretary shall prescribe such procedures by regulation, with notice and opportunity for public comment, pursuant to section 553 of title 5, United States Code.

(2) In the event that a determination of the prevailing world market price of any other type of materials, goods, equipment, or service is required in order to determine whether a barter or exchange transaction is subject to subsection (b)(6) or (b)(7), such determination shall be made by the Secretary of Agriculture in consultation with the heads of other appropriate Federal agencies.

MINIMUM TONNAGE

SEC. 134. (a)(1) For fiscal year 1986 and each fiscal year thereafter, the minimum quantity of agricultural commodities that may be exported under programs subject to section 133 shall be the average of the tonnage exported under such programs during the base period defined in subsection (b), discarding the high and low years.

(2) The President may waive the minimum quantity for any fiscal year required under paragraph (1) if he determines and reports to the Congress, together with his reasons, that such quantity cannot be effectively used for the purposes of such programs or, based on a certification by the Secretary of Agriculture, that the commodities are not available for reasons which include the unavailability of funds.

(b) The base period utilized for computing the minimum tonnage quantity referred to in subsection (a) for any fiscal year shall be the five fiscal years beginning with the sixth fiscal year preceding such fiscal year and ending with the second fiscal year preceding such fiscal year.

FINANCING OF SHIPMENT OF AGRICULTURAL COMMODITIES IN UNITED STATES-FLAG VESSELS

SEC. 135. (a) The Secretary of Transportation shall finance any increased ocean freight charges incurred in any fiscal year which result from the application of section 133(a). The amount to be financed by the Secretary shall be an amount of the total freight charges incurred from the application of such section in such fiscal year equal to a fraction of the total ocean freight differential incurred in connection with the export activities specified in such section in such fiscal year, the numerator of such fraction to be equal to the percentage in excess of 50 of the tonnage of agricultural commodities or the products thereof that are shipped on United States-flag vessels, and the denominator of such fraction to be equal to the total percentage of such tonnage so shipped.

(b)(1) If in any fiscal year the total cost of ocean freight and ocean freight differential for which obligations are incurred by the Department of Agriculture and the Commodity Credit Corporation on exports of agricultural commodities and products thereof under the agricultural export programs specified in section 133(b) exceeds 20 percent of the value of such commodities and products and the cost of such ocean freight and ocean freight differential on which obligations are incurred by such Department and Corporation during such year, the Secretary of Transportation shall reimburse the Department of Agriculture and the Commodity Credit Corporation for the amount of such excess. For the purpose of this subsection, commodities shipped from the inventory of the Commodity Credit Corporation shall be valued as provided in section 403(b) of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1733(b)).

(2)(A) The National Advisory Commission on Agricultural Export Transportation Policy established under section 136 shall include in its final report to the President and the Congress recommendations for any

changes in the provisions of paragraph (1) that would help assure that the cost of ocean freight and ocean freight differential incurred by the Department of Agriculture and the Commodity Credit Corporation on the agricultural export programs specified in section 133(b), is not increased above historical levels as a result of the extra demand for United States-flag vessels caused by this subtitle.

(B) After taking into consideration the recommendations of the Commission referred to in subparagraph (A), the President may, by proclamation, provide requirements for the assumption by the Department of Transportation of a portion of the cost of ocean freight and ocean freight differential that would otherwise be incurred by the Department of Agriculture and the Commodity Credit Corporation on a different basis than that set forth in paragraph (1) in order to accomplish the objectives of subparagraph (A). The provisions of paragraph (1) shall be inapplicable on and after the effective date of the proclamation.

(c) For the purpose of meeting those expenses required to be assumed under subsections (a) and (b), the Secretary of Transportation shall issue to the Secretary of the Treasury such obligations in such forms and denominations, bearing such maturities and subject to such terms and conditions, as may be prescribed by the Secretary of Transportation with the approval of the Secretary of the Treasury. Such obligations shall be at a rate of interest as determined by the Secretary of the Treasury, taking into consideration the average market yield on outstanding marketable obligations of the United States with remaining periods of maturity comparable to the average maturities of such obligations during the month preceding the issuance of such obligations of the Secretary of Transportation. The Secretary of Treasury shall purchase any obligations of the Secretary of Transportation issued under this subsection and, for the purpose of purchasing such obligations, the Secretary of the Treasury may use as a public debt transaction the proceeds from the sale of any securities issued under chapter 31 of title 31, United States Code, after the date of the enactment of this Act and the purposes for which securities may be issued under such chapter are extended to include any purchases of the obligations of the Secretary of Transportation under this subsection. All redemptions and purchases by the Secretary of the Treasury of the obligations of the Secretary of Transportation shall be treated as public-debt transactions of the United States.

(d) There is authorized to be appropriated annually for each fiscal year, commencing with the fiscal year beginning October 1, 1986, an amount sufficient to reimburse the Secretary of Transportation for the costs, including administrative expenses and the principal and interest due on the obligations to the Secretary of the Treasury incurred under this section. Reimbursement of any such costs shall be made with appropriated funds, as provided in this section, rather than through cancellation of notes.

(e) Notwithstanding the provisions of this section, in the event that the Secretary of Transportation is unable to obtain the funds necessary to finance the increased ocean freight charges resulting from the requirements of subsections (a) and (b) and section 133(a), the Secretary of Transportation shall so notify the Congress within 10 working days of the discovery of such insufficiency.

NATIONAL ADVISORY COMMISSION ON AGRICULTURAL EXPORT TRANSPORTATION POLICY

SEC. 136. (a) There is hereby established an advisory commission to be known as the National Advisory Commission on Agricultural Export Transportation Policy (hereafter in this subtitle referred to as the "Commission").

(b)(1) The Commission shall be composed of 16 members.

(2) Eight members of the Commission shall be appointed by the President.

(3) The chairman and ranking minority members of the Senate Committee on Agriculture, Nutrition, and Forestry, of the Subcommittee on Merchant Marine of the Senate Committee on Commerce, Science, and Transportation, of the House Committee on Agriculture, and of the House Committee on Merchant Marine and Fisheries shall serve as members of the Commission.

(4)(A) Four of the members appointed by the President shall be representatives of agricultural producers, cooperatives, merchandisers, and processors of agricultural commodities.

(B) The remaining four members appointed by the President shall be representatives of the United States-flag maritime industry, two of whom shall represent labor and two of whom shall represent management.

(c)(1) The members of the Commission shall elect a Chairman from among its members.

(2) Any vacancy in the Commission shall not affect its powers but shall be filled in the same manner in which the original appointment was made.

DUTIES OF THE COMMISSION

SEC. 137. (a) It shall be the duty of the Commission to conduct a comprehensive study and review of the ocean transportation of agricultural exports subject to the cargo preference laws referred to in section 132 and to make recommendations to the President and the Congress for improving the efficiency of such transportation on United States-flag vessels in order to reduce the costs incurred by the United States in connection with such transportation. In carrying out such study and review, the Commission shall consider the extent to which any unfair or discriminatory practices of foreign governments increase the cost to the United States of transporting agricultural commodities subject to such cargo preference laws.

(b)(1) The Commission shall submit an interim report to the President and the Congress not later than one year after the date of the enactment of this subtitle and such other interim reports as the Commission considers advisable.

(2) The Commission shall submit a final report containing its findings and recommendations to the President and the Congress not later than two years after the date of the enactment of this subtitle.

(3) Sixty days after the submission of the final report, the Commission shall cease to exist.

(c) The Commission shall include in its reports submitted pursuant to subsection (b) recommendations concerning the feasibility and desirability of achieving the following goals with respect to the ocean transportation of agricultural commodities subject to the cargo preference laws referred to in section 132:

(1) Ensuring that the timing of commodity purchase agreements entered into by the United States in connection with the export of such commodities, and the methods of implementing such agreements, are such as to minimize cost to the United States.

(2) Ensuring that shipments of such commodities are made on the most modern and efficient United States-flag vessels available.

(3) Ensuring that shipments of such commodities are made under the most advantageous terms available, including—

(A) charters for full shiploads;

(B) charters for intermediate or long term;

(C) charters for consecutive voyages and contracts of affreightment; and

(D) adjustment of rates in the event that vessels used for shipments of such commodities also carry cargoes on return voyages.

(4) Reduction and elimination of impediments, including delays in port, to the efficient loading and operation of the vessels employed for shipment of such commodities.

(5) Utilization of open and competitive bidding for the ocean transportation of such commodities.

INFORMATION AND ASSISTANCE TO BE FURNISHED TO THE COMMISSION

SEC. 138. (a) Each department, agency, and instrumentality of the United States, including independent agencies, shall furnish to the Commission, upon request made by the Chairman, such statistical data, reports, and other information as the Commission considers necessary to carry out its functions under this subtitle.

(b) The Secretary of Agriculture and the Secretary of Transportation shall make available to the Commission such staff, personnel, and administrative services as may reasonably be required to carry out the Commission's duties.

COMPENSATION AND TRAVEL AND SUBSISTENCE EXPENSES OF COMMISSION MEMBERS

SEC. 139. Members of the Commission shall serve without compensation in addition to compensation they may otherwise be entitled to receive as employees of the United States or as Members of Congress, but shall be reimbursed for travel, subsistence, and other necessary expenses incurred in the performance of duties vested in the Commission.

AUTHORIZATION OF APPROPRIATIONS

SEC. 140. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this subtitle.

TERMINATION OF SUBTITLE

SEC. 141. The operation of this subtitle shall terminate 90 days after the date on which a notification is made pursuant to section 135(e), except with respect to shipments of agricultural commodities and products subject to contracts entered into before the expiration of such 90-day period, unless within such 90-day period the Secretary of Transportation proclaims that funds are available to finance increased freight charges resulting from the requirements of sections 133(a) and 135 (a) and (b).

EFFECT ON OTHER LAWS

SEC. 142. This Act shall not be construed as modifying in any manner the provisions of section 4(b)(8) of the Food for Peace Act of 1966 (7 U.S.C. 1707a(b)(8)) or chapter 5 of title 5, United States Code.

AMENDMENT NO. 916

(Purpose: To establish shipment requirements for exports sponsored by the Department of Agriculture)

Mr. INOUYE. Mr. President, I send to the desk a perfecting amendment to

the part to be stricken and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Hawaii [Mr. INOUYE] proposes an amendment to the language proposed to be stricken from the bill

Mr. INOUYE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

On page 31, beginning with line 15, strike all through and including line 11 on page 33 and insert in lieu thereof the following:

"SEC. 131. (a) The Congress finds and declares—

(1) that a productive and healthy agricultural industry and a strong and active United States maritime industry are vitally important to the economic well-being and national security objectives of our Nation;

(2) that both industries must compete in international markets increasingly dominated by foreign trade barriers and the subsidization practices of foreign governments;

(3) that increased agricultural exports and the utilization of United States merchant vessels contribute positively to the United States balance of trade and generate employment opportunities in the United States.

(b) It is therefore declared to be the purpose and policy of the Congress in this subtitle—

(1) to enable the Department of Agriculture to plan its export programs effectively, by clarifying the ocean transportation requirements applicable to such programs;

(2) to take immediate and positive steps to promote the growth of the cargo carrying capacity of the United States merchant marine;

(3) to expand international trade in United States agricultural commodities and products and to develop, maintain, and expand markets for United States agricultural exports;

(4) to improve the efficiency of administration of both the commodity purchasing and selling and the ocean transportation activities associated with export programs sponsored by the Department of Agriculture; and

(5) to stimulate and promote both the agricultural and maritime industries of the United States and encourage cooperative efforts by both industries to address their common problems.

EXEMPTION OF CERTAIN AGRICULTURAL EXPORTS FROM THE REQUIREMENTS OF THE CARGO PREFERENCE LAWS

SEC. 132. The requirements of section 901(b)(1) of the Merchant Marine Act, 1936 (46 U.S.C. 1241(b)(1)), and the Joint Resolution of March 26, 1934 (46 U.S.C. 1241-1), shall not apply to any export activities of the Secretary of Agriculture or the Commodity Credit Corporation—

(1) under which agricultural commodities or the products thereof acquired by the Commodity Credit Corporation are made available to United States exporters, users, processors, or foreign purchasers for the purpose of developing, maintaining, or expanding export markets for United States agricultural commodities or the products thereof at prevailing world market prices;

(2) under which payments are made available to United States exporters, users, or processors or, except as provided in section 133(b)(6), cash grants are made available to foreign purchasers, for the purpose described in clause (1);

(3) under which commercial credit guarantees are blended with direct credits from the Commodity Credit Corporation to reduce the effective rate of interest on export sales of United States agricultural commodities or the products thereof;

(4) under which credit or credit guarantees for not to exceed 3 years are extended by the Commodity Credit Corporation to finance or guarantee export sales of United States agricultural commodities or the products thereof; or

(5) under which agricultural commodities or the products thereof owned or controlled by or under loan from the Commodity Credit Corporation are exchanged or bartered for materials, goods, equipment, or services, but only if such materials, goods, equipment, or services are of a value at least equivalent to the value of the agricultural commodities or products exchanged or bartered therefor (determined on the basis of prevailing world market prices at the time of the exchange or barter), but nothing in this subsection shall be construed to exempt from the cargo preference provisions referred to in section 132 any requirement otherwise applicable to the materials, goods, equipment, or services imported under any such transaction.

SHIPMENT REQUIREMENTS FOR CERTAIN EXPORTS SPONSORED BY THE DEPARTMENT OF AGRICULTURE

SEC. 133. (a)(1) In addition to the requirement for United States-flag carriage of a percentage of gross tonnage imposed by section 901(b)(1) of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1241(b)(1)), 25 per centum of the gross tonnage of agricultural commodities or the products thereof shipped under the agricultural export programs subject to such section and specified in subsection (b) shall be transported on United States-flag commercial vessels.

(2) In order to achieve an orderly and efficient implementation of the requirement of paragraph (1)—

(A) an additional quantity equal to 10 percent of the gross tonnage referred to in paragraph (1) shall be transported in United States-flag vessels in calendar year 1986;

(B) an additional quantity equal to 20 percent of the gross tonnage shall be transported in such vessels in calendar year 1987; and

(C) an additional quantity equal to 25 percent of the gross tonnage shall be transported in such vessels in calendar year 1988 and in each calendar year thereafter.

(3) In implementing the requirements of paragraph (1), the Secretary of Transportation shall give due consideration to the availability of United States-flag vessels to transport the commodities referred to in such paragraph.

(b) This section shall apply to any export activity of the Commodity Credit Corporation or the Secretary of Agriculture—

(1) carried out under the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1691 et seq.);

(2) carried out under section 416 of the Agricultural Act of 1949 (7 U.S.C. 1431);

(3) carried out under the Food Security Wheat Reserve Act of 1980 (7 U.S.C. 1736f-1);

(4) under which agricultural commodities or the products thereof are—

(A) donated through foreign governments or agencies, private or public, including intergovernmental organizations; or

(B) sold for foreign currencies or for dollars on credit terms of more than ten years;

(5) under which agricultural commodities or the products thereof are made available for emergency food relief at less than prevailing world market prices;

(6) under which cash grants are made available to foreign purchasers for the purpose of enabling such purchasers to acquire United States agricultural commodities or the products thereof if the cash grants are in amounts that result in the purchaser (after receipt of such grants) paying less than the prevailing world market price for such commodities; or

(7) under which agricultural commodities owned or controlled by or under loan from the Commodity Credit Corporation are exchanged or bartered for materials, goods, equipment, or services produced in foreign countries, other than export activities described in section 132(5).

(c)(1) The requirement for United States-flag transportation imposed by subsection (a) shall be subject to the same terms and conditions as provided in section 901(b) of the Merchant Marine Act, 1936 (46 U.S.C. 1241(b)).

(2)(A) In order to carry out effectively the requirements of this subtitle, the Secretary of Transportation shall, to the maximum extent practicable within the requirements of this section and section 901(b) of the Merchant Marine Act, 1936, administer this subtitle and section 901(b) of the Merchant Marine Act, 1936, in a flexible manner, giving due consideration to historical trading patterns and to divisions in United States international shipping trades between bulk and liner service to particular geographic areas.

(B) The Secretary of Transportation shall also administer this subtitle and section 901(b) of the Merchant Marine Act, 1936, in a manner which preserves to the greatest extent practicable the mean historical port range share of cargoes subject to United States-flag transportation requirements under this section exported from the Atlantic, Gulf, Pacific, and Great Lakes port ranges.

(d) As used in subsection (b), the term "export activity", shall not include inspection or weighing activities, other activities carried out for health or safety purposes, or technical assistance provided in the handling of commercial transactions.

(e)(1) The prevailing world market price as to agricultural commodities or the products thereof shall be determined under this subtitle in accordance with procedures established by the Secretary of Agriculture. The Secretary shall prescribe such procedures by regulation, with notice and opportunity for public comment, pursuant to section 553 of title 5, United States Code.

(2) In the event that a determination of the prevailing world market price of any other type of materials, goods, equipment, or service is required in order to determine whether a barter or exchange transaction is subject to subsection (b)(6) or (b)(7), such determination shall be made by the Secretary of Agriculture in consultation with the heads of other appropriate Federal agencies.

MINIMUM TONNAGE

SEC. 134. (a)(1) For fiscal year 1986 and each fiscal year thereafter, the minimum quantity of agricultural commodities that

may be exported under programs subject to section 133 shall be the average of the tonnage exported under such programs during the base period defined in subsection (b), discarding the high and low years.

(2) The President may waive the minimum quantity for any fiscal year required under paragraph (1) if he determines and reports to the Congress, together with his reasons, that such quantity cannot be effectively used for the purposes of such programs or, based on a certification by the Secretary of Agriculture, that the commodities are not available for reasons which include the unavailability of funds.

(b) The base period utilized for computing the minimum tonnage quantity referred to in subsection (a) for any fiscal year shall be the five fiscal years beginning with the sixth fiscal year preceding such fiscal year and ending with the second fiscal year preceding such fiscal year.

FINANCING OF SHIPMENT OF AGRICULTURAL COMMODITIES IN UNITED STATES-FLAG VESSELS

SEC. 135. (a) The Secretary of Transportation shall finance any increased ocean freight charges incurred in any fiscal year which result from the application of section 133(a). The amount to be financed by the Secretary shall be an amount of the total freight charges incurred from the application of such section in such fiscal year equal to a fraction of the total ocean freight differential incurred in connection with the export activities specified in such section in such fiscal year, the numerator of such fraction to be equal to the percentage in excess of 50 of the tonnage of agricultural commodities or the products thereof that are shipped on United States-flag vessels, and the denominator of such fraction to be equal to the total percentage of such tonnage so shipped.

(b)(1) If in any fiscal year the total cost of ocean freight and ocean freight differential for which obligations are incurred by the Department of Agriculture and the Commodity Credit Corporation on exports of agricultural commodities and products thereof under the agricultural export programs specified in section 133(b) exceeds 20 percent of the value of such commodities and products and the cost of such ocean freight and ocean freight differential on which obligations are incurred by such Department and Corporation during such year, the Secretary of Transportation shall reimburse the Department of Agriculture and the Commodity Credit Corporation for the amount of such excess. For the purpose of this subsection, commodities shipped from the inventory of the Commodity Credit Corporation shall be valued as provided in section 403(b) of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1733(b)).

(2)(A) The National Advisory Commission on Agricultural Export Transportation Policy established under section 136 shall include in its final report to the President and the Congress recommendations for any changes in the provisions of paragraph (1) that would help assure that the cost of ocean freight and ocean freight differential incurred by the Department of Agriculture and the Commodity Credit Corporation on the agricultural export programs specified in section 133(b), is not increased above historical levels as a result of the extra demand for United States-flag vessels caused by this subtitle.

(B) After taking into consideration the recommendations of the Commission referred to in subparagraph (A), the President may, by proclamation, provide requirements for the assumption by the Department of Transportation of a portion of the cost of ocean freight and ocean freight differential that would otherwise be incurred by the Department of Agriculture and the Commodity Credit Corporation on a different basis than that set forth in paragraph (1) in order to accomplish the objectives of subparagraph (A). The provisions of paragraph (1) shall be inapplicable on and after the effective date of the proclamation.

(c) For the purpose of meeting those expenses required to be assumed under subsections (a) and (b), the Secretary of Transportation shall issue to the Secretary of the Treasury such obligations in such forms and denominations, bearing such maturities and subject to such terms and conditions, as may be prescribed by the Secretary of Transportation with the approval of the Secretary of the Treasury. Such obligations shall be at a rate of interest as determined by the Secretary of the Treasury, taking into consideration the average market yield on outstanding marketable obligations of the United States with remaining periods of maturity comparable to the average maturities of such obligations during the month preceding the issuance of such obligations of the Secretary of Transportation. The Secretary of Treasury shall purchase any obligations of the Secretary of Transportation issued under this subsection and, for the purpose of purchasing such obligations, the Secretary of the Treasury may use as a public debt transaction the proceeds from the sale of any securities issued under chapter 31 of title 31, United States Code, after the date of the enactment of this Act and the purposes for which securities may be issued under such chapter are extended to include any purchases of the obligations of the Secretary of Transportation under this subsection. All redemptions and purchases by the Secretary of the Treasury of the obligations of the Secretary of Transportation shall be treated as public-debt transactions of the United States.

(d) There is authorized to be appropriated annually for each fiscal year, commencing with the fiscal year beginning October 1, 1986, an amount sufficient to reimburse the Secretary of Transportation for the costs, including administrative expenses and the principal and interest due on the obligations to the Secretary of the Treasury incurred under this section. Reimbursement of any such costs shall be made with appropriated funds, as provided in this section, rather than through cancellation of notes.

(e) Notwithstanding the provisions of this section, in the event that the Secretary of Transportation is unable to obtain the funds necessary to finance the increased ocean freight charges resulting from the requirements of subsections (a) and (b) and section 133(a), the Secretary of Transportation shall so notify the Congress within 10 working days of the discovery of such insufficiency.

NATIONAL ADVISORY COMMISSION ON AGRICULTURAL EXPORT TRANSPORTATION POLICY

SEC. 136. (a) There is hereby established an advisory commission to be known as the National Advisory Commission on Agricultural Export Transportation Policy (hereafter in this subtitle referred to as the "Commission").

(b)(1) The Commission shall be composed of 24 members.

(2) Sixteen members of the Commission shall be appointed by the President.

(3) The chairman and ranking minority members of the Senate Committee on Agriculture, Nutrition, and Forestry, of the Subcommittee on Merchant Marine of the Senate Committee on Commerce, Science, and Transportation, of the House Committee on Agriculture, and of the House Committee on Merchant Marine and Fisheries shall serve as members of the Commission.

(4)(A) Eight of the members appointed by the President shall be representatives of agricultural producers, cooperatives, merchandisers, and processors of agricultural commodities.

(B) The remaining eight members appointed by the President shall be representatives of the United States-flag maritime industry, four of whom shall represent labor and four of whom shall represent management.

(c)(1) The members of the Commission shall elect a Chairman from among its members.

(2) Any vacancy in the Commission shall not affect its powers but shall be filled in the same manner in which the original appointment was made.

DUTIES OF THE COMMISSION

SEC. 137. (a) It shall be the duty of the Commission to conduct a comprehensive study and review of the ocean transportation of agricultural exports subject to the cargo preference laws referred to in section 132 and to make recommendations to the President and the Congress for improving the efficiency of such transportation on United States-flag vessels in order to reduce the costs incurred by the United States in connection with such transportation. In carrying out such study and review, the Commission shall consider the extent to which any unfair or discriminatory practices of foreign governments increase the cost to the United States of transporting agricultural commodities subject to such cargo preference laws.

(b)(1) The Commission shall submit an interim report to the President and the Congress not later than one year after the date of the enactment of this subtitle and such other interim reports as the Commission considers advisable.

(2) The Commission shall submit a final report containing its findings and recommendations to the President and the Congress not later than two years after the date of the enactment of this subtitle.

(3) Sixty days after the submission of the final report, the Commission shall cease to exist.

(c) The Commission shall include in its reports submitted pursuant to subsection (b) recommendations concerning the feasibility and desirability of achieving the following goals with respect to the ocean transportation of agricultural commodities subject to the cargo preference laws referred to in section 132:

(1) Ensuring that the timing of commodity purchase agreements entered into by the United States in connection with the export of such commodities, and the methods of implementing such agreements, are such as to minimize cost to the United States.

(2) Ensuring that shipments of such commodities are made on the most modern and efficient United States-flag vessels available.

(3) Ensuring that shipments of such commodities are made under the most advantageous terms available, including—

(A) charters for full shiploads;

(B) charters for intermediate or long term;

(C) charters for consecutive voyages and contracts of affreightment; and

(D) adjustment of rates in the event that vessels used for shipments of such commodities also carry cargoes on return voyages.

(4) Reduction and elimination of impediments, including delays in port, to the efficient loading and operation of the vessels employed for shipment of such commodities.

(5) Utilization of open and competitive bidding for the ocean transportation of such commodities.

INFORMATION AND ASSISTANCE TO BE FURNISHED TO THE COMMISSION

SEC. 138. (a) Each department, agency, and instrumentality of the United States, including independent agencies, shall furnish to the Commission, upon request made by the Chairman, such statistical data, reports, and other information as the Commission considers necessary to carry out its functions under this subtitle.

(b) The Secretary of Agriculture and the Secretary of Transportation shall make available to the Commission such staff, personnel, and administrative services as may reasonably be required to carry out the Commission's duties.

COMPENSATION AND TRAVEL AND SUBSISTENCE EXPENSES OF COMMISSION MEMBERS

SEC. 139. Members of the Commission shall serve without compensation in addition to compensation they may otherwise be entitled to receive as employees of the United States or as Members of Congress, but shall be reimbursed for travel, subsistence, and other necessary expenses incurred in the performance of duties vested in the Commission.

AUTHORIZATION OF APPROPRIATIONS

SEC. 140. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this subtitle.

TERMINATION OF SUBTITLE

SEC. 141. The operation of this subtitle shall terminate 90 days after the date on which a notification is made pursuant to section 135(e), except with respect to shipments of agricultural commodities and products subject to contracts entered into before the expiration of such 90-day period, unless within such 90-day period the Secretary of Transportation proclaims that funds are available to finance increased freight charges resulting from the requirements of sections 133(a) and 135 (a) and (b).

EFFECT ON OTHER LAWS

SEC. 142. This Act shall not be construed as modifying in any manner the provisions of section 4(b)(8) of the Food for Peace Act of 1966 (7 U.S.C. 1707a(b)(8)) or chapter 5 of title 5, United States Code."

AMENDMENT NO. 917

(Purpose: To establish shipment requirements for exports sponsored by the Department of Agriculture)

Mr. STEVENS. Mr. President, I send to the desk an amendment to the Inouye amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Alaska [Mr. STEVENS] proposes an amendment numbered 917 to amendment 916.

Mr. STEVENS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 1, of the amendment, beginning with line 10, strike all through the end and insert in lieu thereof the following:

"SEC. 131. (a) The Congress finds and declares—

(1) that a productive and healthy agricultural industry and a strong and active United States maritime industry are vitally important to the economic well-being and national security objectives of our Nation;

(2) that both industries must compete in international markets increasingly dominated by foreign trade barriers and the subsidization practices of foreign governments;

(3) that increased agricultural exports and the utilization of United States merchant vessels contribute positively to the United States balance of trade and generate employment opportunities in the United States.

(b) It is therefore declared to be the purpose and policy of the Congress in this subtitle—

(1) to enable the Department of Agriculture to plan its export programs effectively, by clarifying the ocean transportation requirements applicable to such programs;

(2) to take immediate and positive steps to promote the growth of the cargo carrying capacity of the United States merchant marine;

(3) to expand international trade in United States agricultural commodities and products and to develop, maintain, and expand markets for United States agricultural exports;

(4) to improve the efficiency of administration of both the commodity purchasing and selling and the ocean transportation activities associated with export programs sponsored by the Department of Agriculture; and

(5) to stimulate and promote both the agricultural and maritime industries of the United States and encourage cooperative efforts by both industries to address their common problems.

EXEMPTION OF CERTAIN AGRICULTURAL EXPORTS FROM THE REQUIREMENTS OF THE CARGO PREFERENCE LAWS

SEC. 132. The requirements of section 901(b)(1) of the Merchant Marine Act, 1936 (46 U.S.C. 1241(b)(1)), and the Joint Resolution of March 26, 1934 (46 U.S.C. 1241-1), shall not apply to any export activities of the Secretary of Agriculture or the Commodity Credit Corporation—

(1) under which agricultural commodities or the products thereof acquired by the Commodity Credit Corporation are made available to United States exporters, users, processors, or foreign purchasers for the purpose of developing, maintaining, or expanding export markets for United States agricultural commodities or the products thereof at prevailing world market prices;

(2) under which payments are made available to United States exporters, users, or processors or, except as provided in section 133(b)(6), cash grants are made available to foreign purchasers, for the purpose described in clause (1);

(3) under which commercial credit guarantees are blended with direct credits from the Commodity Credit Corporation to reduce the effective rate of interest on export sales of United States agricultural commodities or the products thereof;

(4) under which credit or credit guarantees for not to exceed 3 years are extended by the Commodity Credit Corporation to finance or guarantee export sales of United States agricultural commodities or the products thereof; or

(5) under which agricultural commodities or the products thereof owned or controlled by or under loan from the Commodity Credit Corporation are exchanged or bartered for materials, goods, equipment, or services, but only if such materials, goods, equipment, or services are of a value at least equivalent to the value of the agricultural commodities or products exchanged or bartered therefor (determined on the basis of prevailing world market prices at the time of the exchange or barter), but nothing in this subsection shall be construed to exempt from the cargo preference provisions referred to in section 132 any requirement otherwise applicable to the materials, goods, equipment, or services imported under any such transaction.

SHIPMENT REQUIREMENTS FOR CERTAIN EXPORTS SPONSORED BY THE DEPARTMENT OF AGRICULTURE

SEC. 133. (a)(1) In addition to the requirement for United States-flag carriage of a percentage of gross tonnage imposed by section 901(b)(1) of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1241(b)(1)), 25 per centum of the gross tonnage of agricultural commodities or the products thereof shipped under the agricultural export programs subject to such section and specified in subsection (b) shall be transported on United States-flag commercial vessels.

(2) In order to achieve an orderly and efficient implementation of the requirement of paragraph (1)—

(A) an additional quantity equal to 10 percent of the gross tonnage referred to in paragraph (1) shall be transported in United States-flag vessels in calendar year 1986;

(B) an additional quantity equal to 20 percent of the gross tonnage shall be transported in such vessels in calendar year 1987; and

(C) an additional quantity equal to 25 percent of the gross tonnage shall be transported in such vessels in calendar year 1988 and in each calendar year thereafter.

(3) In implementing the requirements of paragraph (1), the Secretary of Transportation shall give due consideration to the availability of United States-flag vessels to transport the commodities referred to in such paragraph.

(b) This section shall apply to any export activity of the Commodity Credit Corporation or the Secretary of Agriculture—

(1) carried out under the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1691 et seq.);

(2) carried out under section 416 of the Agricultural Act of 1949 (7 U.S.C. 1431);

(3) carried out under the Food Security Wheat Reserve Act of 1980 (7 U.S.C. 1736f-1);

(4) under which agricultural commodities or the products thereof are—

(A) donated through foreign governments or agencies, private or public, including intergovernmental organizations; or

(B) sold for foreign currencies or for dollars on credit terms of more than ten years;

(5) under which agricultural commodities or the products thereof are made available for emergency food relief at less than prevailing world market prices;

(6) under which cash grants are made available to foreign purchasers for the purpose of enabling such purchasers to acquire

United States agricultural commodities or the products thereof if the cash grants are in amounts that result in the purchaser (after receipt of such grants) paying less than the prevailing world market price for such commodities; or

(7) under which agricultural commodities owned or controlled by or under loan from the Commodity Credit Corporation are exchanged or bartered for materials, goods, equipment, or services produced in foreign countries, other than export activities described in section 132(5).

(c)(1) The requirement for United States-flag transportation imposed by subsection (a) shall be subject to the same terms and conditions as provided in section 901(b) of the Merchant Marine Act, 1936 (46 U.S.C. 1241(b)).

(2)(A) In order to carry out effectively the requirements of this subtitle, the Secretary of Transportation shall, to the maximum extent practicable within the requirements of this section and section 901(b) of the Merchant Marine Act, 1936, administer this subtitle and section 901(b) of the Merchant Marine Act, 1936, in a flexible manner, giving due consideration to historical trading patterns and to divisions in United States international shipping trades between bulk and liner service to particular geographic areas.

(B) The Secretary of Transportation shall also administer this subtitle and section 901(b) of the Merchant Marine Act, 1936, in a manner which preserves to the greatest extent practicable the mean historical port range share of cargoes subject to United States-flag transportation requirements under this section exported from the Atlantic, Gulf, Pacific, and Great Lakes port ranges.

(d) As used in subsection (b), the term "export activity", shall not include inspection or weighing activities, other activities carried out for health or safety purposes, or technical assistance provided in the handling of commercial transactions.

(e)(1) The prevailing world market price as to agricultural commodities or the products thereof shall be determined under this subtitle in accordance with procedures established by the Secretary of Agriculture. The Secretary shall prescribe such procedures by regulation, with notice and opportunity for public comment, pursuant to section 553 of title 5, United States Code.

(2) In the event that a determination of the prevailing world market price of any other type of materials, goods, equipment, or service is required in order to determine whether a barter or exchange transaction is subject to subsection (b)(6) or (b)(7), such determination shall be made by the Secretary of Agriculture in consultation with the heads of other appropriate Federal agencies.

MINIMUM TONNAGE

SEC. 134. (a)(1) For fiscal year 1986 and each fiscal year thereafter, the minimum quantity of agricultural commodities that may be exported under programs subject to section 133 shall be the average of the tonnage exported under such programs during the base period defined in subsection (b), discarding the high and low years.

(2) The President may waive the minimum quantity for any fiscal year required under paragraph (1) if he determines and reports to the Congress, together with his reasons, that such quantity cannot be effectively used for the purposes of such programs or, based on a certification by the Secretary of Agriculture, that the commodities are not available for reasons which include the unavailability of funds.

(b) The base period utilized for computing the minimum tonnage quantity referred to in subsection (a) for any fiscal year shall be the five fiscal years beginning with the sixth fiscal year preceding such fiscal year and ending with the second fiscal year preceding such fiscal year.

FINANCING OF SHIPMENT OF AGRICULTURAL COMMODITIES IN UNITED STATES-FLAG VESSELS

SEC. 135. (a) The Secretary of Transportation shall finance any increased ocean freight charges incurred in any fiscal year which result from the application of section 133(a). The amount to be financed by the Secretary shall be an amount of the total freight charges incurred from the application of such section in such fiscal year equal to a fraction of the total ocean freight differential incurred in connection with the export activities specified in such section in such fiscal year, the numerator of such fraction to be equal to the percentage in excess of 50 of the tonnage of agricultural commodities or the products thereof that are shipped on United States-flag vessels, and the denominator of such fraction to be equal to the total percentage of such tonnage so shipped.

(b)(1) If in any fiscal year the total cost of ocean freight and ocean freight differential for which obligations are incurred by the Department of Agriculture and the Commodity Credit Corporation on exports of agricultural commodities and products thereof under the agricultural export programs specified in section 133(b) exceeds 20 percent of the value of such commodities and products and the cost of such ocean freight and ocean freight differential on which obligations are incurred by such Department and Corporation during such year, the Secretary of Transportation shall reimburse the Department of Agriculture and the Commodity Credit Corporation for the amount of such excess. For the purpose of this subsection, commodities shipped from the inventory of the Commodity Credit Corporation shall be valued as provided in section 403(b) of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1733(b)).

(2)(A) The National Advisory Commission on Agricultural Export Transportation Policy established under section 136 shall include in its final report to the President and the Congress recommendations for any changes in the provisions of paragraph (1) that would help assure that the cost of ocean freight and ocean freight differential incurred by the Department of Agriculture and the Commodity Credit Corporation on the agricultural export programs specified in section 133(b), is not increased above historical levels as a result of the extra demand for United States-flag vessels caused by this subtitle.

(B) After taking into consideration the recommendations of the Commission referred to in subparagraph (A), the President may, by proclamation, provide requirements for the assumption by the Department of Transportation of a portion of the cost of ocean freight and ocean freight differential that would otherwise be incurred by the Department of Agriculture and the Commodity Credit Corporation on a different basis than that set forth in paragraph (1) in order to accomplish the objectives of subparagraph (A). The provisions of paragraph (1) shall be inapplicable on and after the effective date of the proclamation.

(c) For the purpose of meeting those expenses required to be assumed under subsections (a) and (b), the Secretary of Transportation shall issue to the Secretary of the Treasury such obligations in such forms and denominations, bearing such maturities and subject to such terms and conditions, as may be prescribed by the Secretary of Transportation with the approval of the Secretary of the Treasury. Such obligations shall be at a rate of interest as determined by the Secretary of the Treasury, taking into consideration the average market yield on outstanding marketable obligations of the United States with remaining periods of maturity comparable to the average maturities of such obligations during the month preceding the issuance of such obligations of the Secretary of Transportation. The Secretary of Treasury shall purchase any obligations of the Secretary of Transportation issued under this subsection and, for the purpose of purchasing such obligations, the Secretary of the Treasury may use as a public debt transaction the proceeds from the sale of any securities issued under chapter 31 of title 31, United States Code, after the date of the enactment of this Act and the purposes for which securities may be issued under such chapter are extended to include any purchases of the obligations of the Secretary of Transportation under this subsection. All redemptions and purchases by the Secretary of the Treasury of the obligations of the Secretary of Transportation shall be treated as public-debt transactions of the United States.

(d) There is authorized to be appropriated annually for each fiscal year, commencing with the fiscal year beginning October 1, 1986, an amount sufficient to reimburse the Secretary of Transportation for the costs, including administrative expenses and the principal and interest due on the obligations to the Secretary of the Treasury incurred under this section. Reimbursement of any such costs shall be made with appropriated funds, as provided in this section, rather than through cancellation of notes.

(e) Notwithstanding the provisions of this section, in the event that the Secretary of Transportation is unable to obtain the funds necessary to finance the increased ocean freight charges resulting from the requirements of subsections (a) and (b) and section 133(a), the Secretary of Transportation shall so notify the Congress within 10 working days of the discovery of such insufficiency.

NATIONAL ADVISORY COMMISSION ON AGRICULTURAL EXPORT TRANSPORTATION POLICY

SEC. 136. (a) There is hereby established an advisory commission to be known as the National Advisory Commission on Agricultural Export Transportation Policy (hereafter in this subtitle referred to as the "Commission").

(b)(1) The Commission shall be composed of 16 members.

(2) Eight members of the Commission shall be appointed by the President.

(3) The chairman and ranking minority members of the Senate Committee on Agriculture, Nutrition, and Forestry, of the Subcommittee on Merchant Marine of the Senate Committee on Commerce, Science, and Transportation, of the House Committee on Agriculture, and of the House Committee on Merchant Marine and Fisheries shall serve as members of the Commission.

(4)(A) Four of the members appointed by the President shall be representatives of agricultural producers, cooperatives, merchan-

disers, and processors of agricultural commodities.

(B) The remaining four members appointed by the President shall be representatives of the United States-flag maritime industry, two of whom shall represent labor and two of whom shall represent management.

(c)(1) The members of the Commission shall elect a Chairman from among its members.

(2) Any vacancy in the Commission shall not affect its powers but shall be filled in the same manner in which the original appointment was made.

DUTIES OF THE COMMISSION

SEC. 137. (a) It shall be the duty of the Commission to conduct a comprehensive study and review of the ocean transportation of agricultural exports subject to the cargo preference laws referred to in section 132 and to make recommendations to the President and the Congress for improving the efficiency of such transportation on United States-flag vessels in order to reduce the costs incurred by the United States in connection with such transportation. In carrying out such study and review, the Commission shall consider the extent to which any unfair or discriminatory practices of foreign governments increase the cost to the United States of transporting agricultural commodities subject to such cargo preference laws.

(b)(1) The Commission shall submit an interim report to the President and the Congress not later than one year after the date of the enactment of this subtitle and such other interim reports as the Commission considers advisable.

(2) The Commission shall submit a final report containing its findings and recommendations to the President and the Congress not later than two years after the date of the enactment of this subtitle.

(3) Sixty days after the submission of the final report, the Commission shall cease to exist.

(c) The Commission shall include in its reports submitted pursuant to subsection (b) recommendations concerning the feasibility and desirability of achieving the following goals with respect to the ocean transportation of agricultural commodities subject to the cargo preference laws referred to in section 132:

(1) Ensuring that the timing of commodity purchase agreements entered into by the United States in connection with the export of such commodities, and the methods of implementing such agreements, are such as to minimize cost to the United States.

(2) Ensuring that shipments of such commodities are made on the most modern and efficient United States-flag vessels available.

(3) Ensuring that shipments of such commodities are made under the most advantageous terms available, including—

(A) charters for full shiploads;

(B) charters for intermediate or long term;

(C) charters for consecutive voyages and contracts of affreightment; and

(D) adjustment of rates in the event that vessels used for shipments of such commodities also carry cargoes on return voyages.

(4) Reduction and elimination of impediments, including delays in port, to the efficient loading and operation of the vessels employed for shipment of such commodities.

(5) Utilization of open and competitive bidding for the ocean transportation of such commodities.

INFORMATION AND ASSISTANCE TO BE FURNISHED TO THE COMMISSION

SEC. 138. (a) Each department, agency, and instrumentality of the United States, including independent agencies, shall furnish to the Commission, upon request made by the Chairman, such statistical data, reports, and other information as the Commission considers necessary to carry out its functions under this subtitle.

(b) The Secretary of Agriculture and the Secretary of Transportation shall make available to the Commission such staff, personnel, and administrative services as may reasonably be required to carry out the Commission's duties.

COMPENSATION AND TRAVEL AND SUBSISTENCE EXPENSES OF COMMISSION MEMBERS

SEC. 139. Members of the Commission shall serve without compensation in addition to compensation they may otherwise be entitled to receive as employees of the United States or as Members of Congress, but shall be reimbursed for travel, subsistence, and other necessary expenses incurred in the performance of duties vested in the Commission.

AUTHORIZATION OF APPROPRIATIONS

SEC. 140. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this subtitle.

TERMINATION OF SUBTITLE

SEC. 141. The operation of this subtitle shall terminate 90 days after the date on which a notification is made pursuant to section 135(e), except with respect to shipments of agricultural commodities and products subject to contracts entered into before the expiration of such 90-day period, unless within such 90-day period the Secretary of Transportation proclaims that funds are available to finance increased freight charges resulting from the requirements of sections 133(a) and 135 (a) and (b).

EFFECT ON OTHER LAWS

SEC. 142. This Act shall not be construed as modifying in any manner the provisions of section 4(b)(8) of the Food for Peace Act of 1966 (7 U.S.C. 1707a(b)(8)) or chapter 5 of title 5, United States Code."

CARGO PREFERENCE

Mr. COCHRAN. Mr. President, for a number of years, America's agriculture and maritime industries have disagreed sharply over the application of U.S.-flag shipping cargo preference requirements to Government-generated agricultural export programs. The Cargo Preference Act of 1954 mandates that 50 percent of the cargoes owned, financed or donated by the U.S. Government must be transported on U.S.-flag vessels to the extent such vessels are available at fair and reasonable rates.

This act reflects recognition by Congress that a strong U.S. merchant marine and a privately owned maritime industry are vital components of our national security.

As important as the maritime industry is to our economic and national security interests, so also is America's agricultural industry. Our Nation's farmers are the backbone of our economy and our standard of living, and literally serve as the leading supplier of agricultural commodities to the world's hungry. They also are a vital component of our international export capability.

It has become all too apparent that these two vitally important industries suffer many of the same problems. Both try to compete against heavily subsidized foreign competition, restrictive foreign trade policies, and nontariff barriers—while handicapped by an overvalued dollar.

As one Member who believes that both industries are essential and worthy of support, I believe it is time to resolve the highly charged, controversial issue of cargo preference in a manner that benefits both industries and in a manner that is fair to both sides. It is time to clarify the scope of cargo preference and to make its application more efficient.

To that end, I have offered this amendment to the farm bill, which embodies the long-term compromise worked out by representatives of the maritime and agriculture industries. These two groups worked for more than 2 months to reach an agreement which I believe will help promote American agricultural exports and strengthen the capability of the U.S. merchant marine.

Mr. President, I have a list of cosponsors of this amendment, and I ask unanimous consent that the list be printed in the RECORD.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

LIST OF COSPONSORS

Senators Thad Cochran, Lloyd Bentsen, Ted Stevens, Daniel Inouye, David Pryor, Howell Heflin, Mack Mattingly, Gary Hart, Russell Long, Bob Packwood, Slade Gorton, Ernest Hollings, Alan Cranston, Paul Trible, Tom Eagleton, Edward Kennedy, and Quentin Burdick.

Senators Claiborne Pell, Paul Sarbanes, Frank Murkowski, Alfonse D'Amato, Bennett Johnston, William Cohen, John Kerry, Frank Lautenberg, Paul Laxalt, Jeff Bingaman, Christopher Dodd, John Rockefeller, Daniel Moynihan, Mark Hatfield, John Heinz, Joseph Biden, Charles McC. Mathias, Spark Matsunaga, Chic Hecht, and Daniel Evans.

Mr. COCHRAN. Mr. President, among those who are cosponsoring this compromise are Senators who represent agriculture areas as well as States with major seaports. This indicates clearly to everyone that this is a compromise that has support in both the agriculture sector and from those who have traditionally supported those who are interested in maintaining a strong merchant marine in this country. There are 37 Senators who have asked that their names be included as cosponsors of the bill.

The key elements of this compromise are as follows:

The requirements of the Cargo Preference Act of 1954 will not apply to commercial-type export programs of

the Secretary of Agriculture, such as "Blended Credit," "Export PIK," "BICEP," or future similar programs.

Cargo preference requirements over concessional-type programs—such as Public Law 480—of the Department of Agriculture will be increased by 25 percent. This increase will be phased in over a 3-year period beginning in 1986, with a 10-percentage point increase in 1986, a further 10-percentage point increase in 1987, and a final 5-percentage point increase in 1988.

The Secretary of Transportation shall administer the cargo preference requirements in such a manner as to preserve to the fullest extent possible the historical port range share of cargoes exported from each of the four seacoasts.

Funding for the increased share in cargo preference requirements will be through the establishment of a borrowing authority within the Department of Transportation.

The total cost to the Commodity Credit Corporation of ocean freight and the ocean freight differential will not exceed 20 percent of the total cost of the export programs covered by cargo preference. Any cost in excess of 20 percent in any fiscal year will also be funded by the Department of Transportation.

A 16-member Commission on Agricultural Export Transportation Policy will be created to recommend ways to improve the efficiency of transporting agricultural exports subject to U.S.-flag cargo preference.

This compromise will not just benefit two industries. It will benefit the Nation as a whole by focusing the full attention of these industries and our Government on the real challenge—foreign competition—not on a divisive and unproductive battle between these two industries.

It will provide flexibility for the Secretary of Agriculture to design new agricultural export promotion programs and respond to changing international conditions. It will remove these export promotion programs from the restrictions of the recent U.S. district court decision while avoiding future lengthy legal challenges that could hamstring these programs.

It will provide certainty, so that agriculture and maritime as well will know when cargo preference applies and when it does not.

It will increase efficiency in planning and implementation of agricultural export promotion programs as well as those subject to cargo preference. It will provide for clear and timely recommendations to the President and Congress to reduce the cost of transportation of U.S. agricultural preference cargoes.

It will provide cargoes for the American merchant fleet while making certain that existing longstanding agricultural cargo preference allocations are maintained, thus creating a new potential demand for vessels constructed in American shipyards.

This amendment—and the compromise it embodies—has the full support of the maritime industry and major elements of our Nation's farming community.

Mr. President, I ask unanimous consent to have printed in the RECORD a list of the agriculture and maritime industry groups which support this compromise.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

ORGANIZATIONS SPONSORING CARGO PREFERENCE COMPROMISE

AGRICULTURAL GROUPS

Five State Rice Producers Legislative Group.
National Association of Wheat Growers.
National Corn Growers Association.
National Cotton Council of America.
National Council of Farmer Cooperatives.
National Farmers Organization.
National Farmers Union.
National Grange.
Rice Millers' Association.

MARITIME INDUSTRY

Joint Maritime Congress.
MIRAID.
Transportation Institute.

Mr. COCHRAN. Mr. President, after the district court ruling relating to the scope of cargo preference was handed down, Congress considered whether or not it was appropriate to amend the cargo preference law or speak out to clarify congressional intent on this subject.

The House, as Members may know, considered this issue, and after a vote of 245 to 179, supported, through an amendment to the farm bill, the extension of cargo preference to commercial export programs such blended credit.

I think in view of that House vote and the fact that the Agriculture Committee here in the Senate approved an amendment to the farm bill and the legislation was in committee, a compromise is in order. This compromise, although I know not totally acceptable to everyone, does contain two of the most important objectives of any of the farm groups who are interested in a resolution of this issue.

If there are other critical issues, of course, we will try to discuss those and hopefully resolve them. But I think, Mr. President, that this is a compromise that can be supported by agriculture as well as the maritime industries.

I thank at this time the distinguished Senators from Alaska and Hawaii, Mr. STEVENS and Mr. INOUYE, along with the distinguished Senator from Texas, Mr. BENTSEN, for serving as the principal and original cosponsors of this compromise.

I also point out, Mr. President, that it was at the urging of the majority leader, Senator DOLE, that these industries came together through representatives to begin talking about a way to resolve the continuing controversy surrounding cargo preference, and it was because of the urging and pressures that resulted from that initial request by the majority leader that a compromise was finally worked out.

I hope that Senators will support this compromise and that we can put this issue to rest and resolve it through the adoption to this amendment.

Mr. President, I yield the floor.

Mr. NICKLES. Mr. President, will the Senator from Mississippi answer a question, please?

Mr. COCHRAN. I am happy to try to answer a question.

Mr. NICKLES. I see several of his colleagues also on the same side of the issue, and possibly they may have answers.

Does the Senator have an estimate on what the cost of subsidies under cargo preference would be in 1985, 1986, 1987, and 1988?

Mr. COCHRAN, Mr. President, the estimates that we have heard are this will result in an increase from $40 to $60 million per year.

Mr. NICKLES. Am I correct in stating the cost of the program in 1984 was $109 million and is estimated to be $150 million or more in 1985? Is that close to being right?

Mr. COCHRAN. That is approximately a $50 million increase, if I am adding and subtracting correctly. That is consistent with the estimate that we have had.

Mr. NICKLES. I want to make sure that we get these figures down. I appreciate the Senator's remarks. I did not hear him make that statement in his opening comments. Maybe he did say it. But I think we need to be talking about how much this is costing. We have had some difficult votes and I will make my remarks later.

Does the Senator yield for one other question?

Mr. COCHRAN. I yield the floor.

So I and others will be happy to respond to questions that the Senator may have.

Mr. NICKLES. Am I correct that the estimated cost of the program would be about $150 million for 1985?

Mr. COCHRAN. The estimate that we have is that the increased cost would be from $40 to $60 million per year.

Mr. NICKLES. That would be beginning in 1986?

Mr. COCHRAN. Beginning in 1986.

Mr. NICKLES. I thank the Senator.

Mr. COCHRAN. The percentage increase is phased in over a 3-year period for Public Law 480 programs.

What the Senator needs to do, though, in stating the cost of this program is to compare that with the cost of applying cargo preference to all commercial programs, commercial-

type sales programs administered by the Secretary of Agriculture or participated in by the Commodity Credit Corporation. Those costs could go into the hundreds of millions of dollars per year, depending upon the kind of lending credit or export PIK or BICEP or other kinds of promotional or concessional sales programs that could be administered through CCC or the Department of Agriculture.

The fact of the matter is there are going to be increases in cost whether this amendment is adopted or not. There will be less increase in cost if this amendment is adopted than if it is not.

So the Senator should not confuse the issue by saying this amendment is going to cost $40 to $50 million a year and suggest that if you vote for it you are voting for increased cost. There are going to be substantial increased costs under the Court decisions, under the amendment adopted in the other body, and that could run into the hundreds of millions of dollars.

Mr. NICKLES. One final question on the cost. Would the cost of the amendment of the Senator from Mississippi be $40 or $60 million more than the language that is currently in the Senate committee bill?

Mr. COCHRAN. That would be fair. That is correct.

Mr. NICKLES. I thank the Senator.

The PRESIDING OFFICER. The Senator from Hawaii.

Mr. INOUYE. Mr. President, I rise in support of the amendment just submitted by my distinguished friend from Mississippi.

Mr. President, today many are asking if the U.S. Merchant Marine—our fourth arm of defense—is on its death bed. Those who suggest as much cite the following statistics:

In December 1951, there were almost 2,000 active ships in the U.S.-flag fleet, and they offered about 100,000 billets.

As of June 1, 1985, there were only 409 active ships in the fleet, and they provided less than 16,000 billets for U.S. seafarers.

I would just like to repeat that number. In 1951 there were over 2,000 ships with 100,000 jobs; in 1985 there are 409 ships with less than 16,000 jobs.

In 1984, only 4.4 percent of our international waterborne trade moved on U.S. bottoms.

At this juncture, I think it is important to note that at the end of World War II, we controlled the seven seas and if anyone wanted to ship anything across the oceans, those were only American ships; and yet today only 4.4 percent of our international waterborne trade is moved on American ships.

Today there are only 23 commercial shipyards in our active shipbuilding base. This is four less than in 1980. Today no U.S. shipyard is building a deepwater vessel for our foreign trades.

Clearly, the health of the U.S. merchant marine has been declining steadily in the post-World War II era. So, even if it is not on its death bed, anyone would be hard pressed to deny that it is gravely ill.

For several years many of us have been saying that if our merchant marine is to be revitalized, a change of attitude by our Government is essential. Our Government must do whatever is necessary to ensure what every other government does—make certain that its flag-vessels have that extra edge in competing for cargo in its own trades.

Mr. President, events since then have only reinforced my conviction.

Last month, a report of the Congressional Office of Technology Assessment found that:

> There is still no generally accepted U.S. cargo policy, but foreign governments have adopted such policies, which increased the disadvantages of U.S. shipping interests.

The report went on to say that:

> Historically, all maritime nations have protected their trade and shipping interests through some form of cargo policy. Generally, this has been done by reserving some or all of the transport of certain commodities for a nation's own national carriers.
>
> The United States is no exception, although it appears to have done the little it has done without much enthusiasm.

What are some of the reasons underlying the report's conclusion that our Government has no enthusiasm for cargo reservation, even though it is the law of the land.

Just a few years ago, the Urban Mass Transportation Authority was responsible for the purchase of 400 buses constructed in Germany. Many of these buses were being delivered to the United States aboard Soviet-flag vessels until Congress raised the issue of our cargo preference laws.

Then there was the case of the sale of surplus butter to New Zealand through the Commodity Credit Corporation. The Department of Agriculture disagreed with MarAd, and refused to acknowledge that our cargo preference laws applied.

After that, GSA arranged for the purchase of 1.6 million tons of bauxite from Jamaica. Although our cargo preference laws applied, and two U.S.-flag vessels tendered offers to carry the cargo, both were summarily rejected by GSA because of the unique and questionable delivery requirements imposed by that agency. All of that cargo was carried on foreign bottoms.

Then the Department of Agriculture entered into an agreement with Egypt whereby flour was purchased by Egypt from U.S. millers at $155 a ton. The U.S. Government in turn provided the millers with grain in sufficient volume for them to make the sale at that price, including a profit.

The Department of Agriculture said our cargo preference laws did not apply; the Department of Transportation said they did. And there the matter stood. The administration finally ruled that 50 percent of the wheat must go on U.S. ships, but it stopped short of saying the cargo preference laws applied. We saw the Department of Transportation take the position that because the Jones Act applied to the shipment of oil from Alaska to the strategic petroleum reserve [SPR], such shipments may not be counted toward the 50-percent U.S.-flag cargo preference share required of the importaton of foreign oil for the SPR Program. The Department of Justice resolved that dispute in favor of the Department of Energy, and against cargo preference.

In 1983, every one of the title I and title II Public Law 480 programs, and section 416 Dairy Donation Program failed to comply with our cargo preference laws, even though it was beyond dispute that those laws applied.

The administration has not only failed to insist that various Federal agencies comply with the cargo preference laws, it is attempting to overturn a recent Federal court ruling which declared that the 50 percent U.S.-flag carriage requirement in the Cargo Preference Act of 1954 was applicable to cargoes generated by the U.S. Department of Agriculture's Blended Credit Program.

The administration has consistently opposed legislation which would require that the U.S. Postal Service ship overseas mail on American-flag vessels, when they are available. In 1983, for example, the Postal Service granted 37 out of 45 contracts to foreign shipping lines, including one from a Soviet bloc country—Polish Ocean Lines—for the carriage of U.S. mail to overseas destinations. As of last January, the score was 33 out of 44 contracts.

The Military Transport Act of 1904 requires that 100 percent of the supplies shipped for the use of the U.S. Armed Forces must move on U.S. flags. That requirement is clear enough, but let's take a look at how it was applied recently where the carriage of military cargoes between the United States and Iceland was involved.

In 1984, a new U.S.-flag company, Rainbow Navigation Co., chartered a small vessel from the Maritime Administration to enter this trade. Iceland's Government objected to our State Department, because service on this route was being provided exclusively by Icelandic shipping lines. The Government of Iceland went on to point out that Iceland's economy and security depended upon the welfare of its shipping lines.

Would Members be surprised to know that late last summer the Department of Navy found a loophole in the 1904 law, and opened up the carriage of military cargo in that trade to foreign-flag vessels? That essentially means Iceland.

The U.S.-flag company appealed the Department of Navy's decision to the U.S. district court; and, as in the case of the Blended Credit Program, the court ordered the Government to comply with the 1904 military cargo preference law. But once again, the Government is trying to overturn the court's ruling.

It wasn't too many years ago, of course, that the Departments of State and Justice filed amicus curiae briefs in support of a Soviet-flag, and in opposition to the Federal Maritime Commission, in an effort by that agency to enforce our laws against predatory rate practices by State controlled shipping lines.

Mr. President, in case any Member should think I am belaboring the point, a few statistics will, I believe, illustrate just what cargo reservation means to the U.S. merchant marine.

In 1980, U.S.-flag vessels only carried 4.7 percent of the cargo that moved in our international trades; 30 to 40 percent of that meager amount was carried because of our cargo preference laws.

In 1983, U.S.-flag vessels carried 5.8 percent of the cargo that moved in our international trades.

Over 50 percent of that meager amount was carried because of our cargo preference laws.

Clearly, cargo reservation is a necessary element of any successful maritime policy. Seemingly every trading nation but the United States recognizes this fact of life.

Recently, in response to my inquiry, the Department of Agriculture said that none of the 2 million tons of cargo shipped under its Blended Credit Program moved on U.S.-flags, but it was quite possible some moved on Soviet-bloc vessels.

Can Members imagine any Soviet commodities bound for Africa moving on U.S. flags? My question becomes even more absurd if I were to ask if Members could imagine the Soviets using U.S. flags and excluding their own. And yet, the U.S. Department of Agriculture appears to be quite willing to discriminate against U.S.-flag vessels to this extent.

Mr. President, as the statistics I have cited indicate, cargo reservation is essential for the survival of our fourth arm of defense; and its cost is a miniscule amount of what we will spend on our farm income stabilization this year, because cargo preference will cost less than eight-tenths of 1 percent of the $18.4 billion the Government expects to spend on farm income stabilization.

Despite the clear necessity for cargo preference if our fourth arm of defense is to survive, and despite the relatively small amount of Federal funds involved, this absolutely essential program is once again threatened.

The measure the Senate is considering today, S. 1714, the farm bill, contains provisions which would substantially narrow the application of Public Law 664—cargo preference—without any off-setting benefit to the U.S. merchant marine. Moreover, it would do so despite the adverse report of the committee which has jurisdiction over maritime matters under the rules of the Senate. The Commerce Committee obtained sequential referral of the farm bill, and reported an amendment to delete those provisions limiting application of the cargo preference laws.

Mr. President, in my view, for the Senate to pass the farm bill with these antimaritime measures intact, would be ill-advised for the procedural and substantive reasons I have discussed.

I believe the existing cargo preference laws properly and adequately take into account the national interest in strong agricultural and maritime industries. The only difficulty is that the agencies of Government don't want to comply with them. This is really a case of the tail wagging the dog. I have often expressed my own preference for a solution to this problem. Simply centralize the authority for determining when the cargo preference laws apply in the Department with responsibility for maritime affairs—DOT—and make the Secretary's decision in each case final. Under existing law, DOT now has responsibility for administering Public Law 664.

I am enough of a realist, however, to know that the remedy I have proposed is not in the political cards at this time.

Politics, we are told, is the art of compromise, and the art of the possible. In this spirit therefore I urge the Senate to accept the amendment being offered by the junior Senator from Mississippi, which is in the nature of a substitute for the Commerce Committee's amendment to delete the provisions limiting cargo preference. The amendment of the Senator from Mississippi has been agreed to by all of the maritime interests, several agricultural interests, and has the support of several Senators.

Mr. President, I will not take the Senate's time to discuss the technicalities of the Senator's compromise amendment, but I believe it will be helpful to summarize how the architects of the compromise it embodies believe it will help promote American agricultural exports and strengthen the capability of the U.S. merchant marine:

It will provide flexibility for the Secretary of Agriculture to design new agricultural export promotion programs and respond to changing international conditions. It will remove these export promotion programs from the restrictions of the recent U.S. district court decision while avoiding future lengthy legal challenges that could hamstring these programs.

It will provide certainty, so that agriculture and maritime will know when cargo preference applies and when it does not.

It will increase efficiency in planning and implementation of agricultural export promotion programs as well as those subject to cargo preference. It will provide for clear and timely recommendations to the President and the Congress to reduce the cost of transportation of U.S. agricultural preference cargoes.

It will provide cargoes for the American merchant fleet while making certain that existing longstanding agricultural cargo preference allocations are maintained, thus creating a new potential demand for vessels constructed in American shipyards.

I believe exiting law, if enforced, adequately and fairly reflects the national interest in promoting our agricultural export programs, and strengthening the capability of the U.S. merchant marine. Nevertheless, I recognize that my view is not realistic in the present circumstances. I therefore urge the Senate to adopt the amendment of the Senator from Mississippi.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. Mr. President, I am pleased to join the Senator from Hawaii in commending our good friend, Senator COCHRAN, from Mississippi, on his successful effort to bring about this compromise on the application of the cargo preference requirements to Government sponsored exports of agricultural products.

The cargo preference issue has divided the farming and maritime industries for some time, to their mutual disadvantage, I might add.

I am happy to support this compromise which should end this destructive conflict and allow both industries to focus their energies on common problems, namely foreign competition and the high dollar.

I hasten to add, Mr. President, that none of the farmers in my State receive any support from this farm bill, not one. None of the people who will receive any of the assistance from the maritime portion of this bill are from my State or serve my State.

My interest in this matter is one that comes from having served on the Commerce Committee and being chairman of the Merchant Marine Subcommittee, and I have voted for the farm bills time after time.

I find now that it is time for us to look very carefully at the future rela-

tionship of the subsidy programs of this Government.

The farm bill is a subsidy program and this maritime assistance program is a subsidy program. Both, in my judgment, warrant taxpayers' support. I commend the Senator from Mississippi for having brought about this compromise.

I want to remind the Senate that in February of this year a U.S. district court held that the cargo preference requirements applied to the Department of Agriculture's Blended Credit Program. Dicta in the case implied that the cargo preference laws may apply to other U.S. Department of Agriculture export programs, such as the program called GSM-102.

And I emphasize this: Under existing law, the programs that are covered by this agriculture program will require the application of cargo preference. This compromise is a modification of those existing laws.

In this compromise legislation, the maritime interests have effectively relinquished their right to pursue further legal action in the courts on the cargo preference issue, in return for an increase in the amount of the cargo subject to cargo preference under the so-called concessional programs. The farm interests received export program exemptions from cargo preference which are substantially the same as those contained in S. 721, or the farm bill, as reported by the Agriculture Committee. The result is the establishment of a "bright line" with respect to which agricultural export programs are covered and which are not.

This legislation contains several safeguards against excessive cost increases attributable to the increase in cargo preference requirements. The Department of Agriculture is completely insulated from any increases in cargo preference costs under this compromise. Any increase must be funded through the Department of Transportation. The borrowing authority established under this legislation for the Department of Transportation is similar to the authority presently used in the Commodity Credit Corporation.

In addition to shifting the funding mechanism for any increase in costs to the Department of Transportation, this legislation contains another safeguard. If Congress fails to appropriate funds for cargo preference costs funded through the Department of Transportation within 90 days of the Secretary's notification that funds are unavailable, the provisions of this legislation would expire.

Any cost increases under this legislation for cargo preference would be minor, compared to the costs that would have been incurred by the Government if the cargo preference laws were applied to a greater number of agriculture export programs. It is estimated this compromise could save up to $250 million a year in ocean freight differential costs.

I support this compromise because it presents a reasonable solution to a most controversial problem. Both sides in this issue are gaining something; both sides are losing something. Both sides have been criticized at different times for "giving up" too much. And, in my judgment, the result of this amendment will save the taxpayers money.

I urge my colleagues to vote in favor of the amendment. I believe a vote in favor of the Cochran amendment is a vote in favor of the farmer and of the sailor. Anyone who opposes this amendment, in my judgment, will be supporting neither.

In answer to the Senator from Oklahoma, I might say I am informed that the U.S. flag revenues from cargo preference are approximately $461 million. The 1984 cost differential related to agriculture shipments was $96.3 million. The 1985 cargo preference costs for Public Law 480 equals approximately $109 million for titles I and III and about $20 million for title II. It is our judgment that the enactment of this amendment will require an increase from $40 to $60 million, assuming the expansion of agricultural exports in substantial quantities beyond the existing levels.

Mr. NICKLES. Will the Senator yield for a question?

Mr. STEVENS. Yes, I am happy to do that.

Mr. NICKLES. What are the total subsidies all together? I heard the $109 million figure and the Senator added another $20 million. Those are 1984 figures, is that correct?

Mr. STEVENS. We are talking about Public Law 480. Those are Public Law 480 payments for titles I and III, $109 million, and title II, approximately $20 million. So it is $129 million under Public Law 480.

Mr. NICKLES. Is that all the subsidies that they received or are there other titles?

Mr. STEVENS. There are others. As I said, the total U.S.-flag revenues, from my information, from cargo preference is $461 million.

Mr. NICKLES. That is for the year 1984?

Mr. STEVENS. Yes.

Mr. NICKLES. I thank the Senator.

Mr. STEVENS. I hope that the Senator and others who might disagree with this will realize that the alternative to this amendment, the Cochran amendment, is a period of delay and confusion in the agriculture area. The courts have ruled in favor of cargo preference. This cargo preference amendment represents a substantial concession on the part of those who support cargo preference. It represents very little concession on the part of those who oppose it because, as I stated, if the moneys are not available to the Secretary of Transportation in a manner similar to that made available to the Commodity Credit Corporation, made available by the Congress, then this compromise falls and the exports are not subject to the cargo preference requirement.

That does not mean that those of us who support cargo preference would be quiet at that time, I might add. I would expect that future Department of Agriculture authorization and appropriations bills would have substantial problems. But I would hope that all concerned will recognize that this is a compromise and a substantial compromise in terms of the maritime interests—maritime interests which, as I say, do not originate in my State but which I feel a responsibility for because of the committee on which I serve with the distinguished Senator from Hawaii, Mr. INOUYE.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, some things are absurd on their face. Cargo preference fits in this category.

The idea that an industry can be helped by guaranteeing customers flies in the face of the free enterprise system that has served our country so well.

The fact is that cargo preference has not fostered a modern, efficient U.S.-flag fleet as was promised by enactment of the Merchant Marine Act of 1954. The exact opposite has been the case—especially with the bulk fleet.

American farm products now forced to move on rusty old U.S.-flag bulkers sometimes never reach their destination. Lives are lost and cargoes wasted. Many times even if the cargo reaches the destination, the old ship makes one last stop at a port to be junked—and we pay for the trip.

This is not to mention the price taxpayers must pay to make sure these U.S. companies and crews have business. Rates this past year have soared to two and three times normal commercial rates because of demand created by our shipment of food to Africa.

This absurdity may only be paralleled by some of our farm subsidy schemes. The critical difference is that most of our farm subsidies are aimed at reigning in the farmers capacity to produce. Maritime subsidies, on the other hand, are aimed at proping up an inefficient industry.

Shipping subsidies for agricultural products moving under Public Law 480

and other food aid programs have always been subject to cargo preference. A few other commodity sales such as a recent flour sale to Egypt have been administratively subjected to cargo preference.

The debate over what programs are and are not covered by cargo preference has been long standing. A recent Federal district court decision making the USDA blended credit program subject to cargo preference resulted in costs that outweighed the benefit of using the program.

The blended credit program was made available through use of the Helms funds provided in the Omnibus Reconciliation Act of 1981. Its suspension has heightened the level of debate over cargo preference applicability.

The first action of the Senate Committee on Agriculture, Nutrition and Forestry in this Congress was to unanimously adopted legislation clarifying the application of cargo preference laws. That language was reported as S. 721 and is included in S. 1714—the farm bill.

Today an amendment—substitute—has been offered by my good friend and fellow committee member, Senator COCHRAN, from Mississippi to—for—committee language.

I know that many weeks of hard negotiation have transpired in order to construct this so-called compromise and I commend those who helped search for an answer to this tough problem.

However, I am afraid that the provision is simply an expansion of cargo preference at the expense of taxpayers, farmers, and those in need of food aid.

Farmers win in the respect that the blended credit program is no longer hostage to cargo preference. They lose in that less dollars will be available for Public Law 480 exports.

U.S. shipping companies and labor unions win because they get a bigger share of Public Law 480 shipments.

Taxpayers lose because they have to pay an estimated $200 million more for shipping subsidies.

Hungry people lose because there is less money available for food—it will all be going for transportation costs.

All in all Mr. President, I count more losers than winners.

Mr. President, I ask unanimous consent to have printed in the RECORD a letter signed by a substantial number of organizations with reference to this amendment.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

OCTOBER 15, 1985.

DEAR SENATOR: The application of cargo preference to agriculture shipments is an issue which has prompted a large amount of discussion and controversy in this year of disastrous declines in U.S. agriculture exports.

Notwithstanding the views of various agriculture organizations over the last several months on the overall cargo preference issue, the agricultural organizations listed below are totally united in their feeling that the application of cargo preference to competitive, commercial USDA export programs is an unprecedented and unacceptable expansion of the Cargo Preference Act.

The undersigned associations and corporations therefore encourage your support for the cargo preference language contained in S. 1714 as reported out by the Senate Agriculture Committee.

The exemption of commercial agriculture programs from 50 percent U.S. flag requirements does not cost a single pound of cargo to the U.S. merchant marine since these programs have never been subject to cargo preference in the past. On the other hand, application of cargo preference has already destroyed one commercial program, blended credit, and currently threatens others. The very application of cargo preference to these relatively cost effective programs renders them too expensive to continue.

Simply put, agriculture's desperate state is far too fragile to saddle the USDA budget and farm exports with the costs and burdens of cargo preference expansion. If increased maritime support is warranted, we encourage Congress to devise a different type of support mechanism. Commercial agriculture exports are the backbone of American agriculture. They must be allowed to increase without the hindrance of cargo preference if agriculture is once again to become competitive in world markets.

Sincerely,

American Soybean Association; ConAgra, Inc.; Millers' National Federation; Cargill, Inc.; Port of Toledo; Toledo Board of Trade; Mid-States Terminals; National Grain Trade Council; The Fertilizer Institute; Bunge Corporation.

Omaha Grain Exchange; Lincoln Grain Exchange; National Grain and Feed Assoc.; Garnac Grain Co., Inc.; Tidewater Grain Company; Lincoln Grain, Inc.; Enid Board of Trade; Denver Grain Exchange; The Early and Daniel Company; American Farm Bureau Federation.

National Association of Wheat Growers; U.S. Chamber of Commerce; Seaway Port Authority of Duluth; Union Equity Co-Operative Exchange; Oklahoma Grain and Feed Assoc.; Continental Grain Company; National Soybean Processors Association; North American Export Grain Assoc.; Western Great Lakes Maritime Assoc.; The Andersons.

AgProcessing, Inc.; The Grange; Sioux City Grain Exchange; Minneapolis Grain Exchange; Terminal Grain Corporation; Commercial Exchange of Philadelphia; Merchants Exchange of St. Louis; Terminal Elevator Grain Merchants Assoc.

Mr. HELMS. I thank the Chair.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. NICKLES. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NICKLES. Mr. President, I rise in opposition to the amendment of my good friend from Mississippi, and others—the so-called compromise on cargo preference. I appreciate their initiative, and they have been very forthright, I guess, in fighting for the groups that are in support of this amendment. I rise in opposition to it basically because I am a taxpayer. I see this as being a major ripoff for taxpayers. Subsidies that have been going out to this industry have been increasing dramatically. Just talking about titles I and III of Public Law 480, in 1980, the cost of the subsidy was $63 million; in 1981, it was $65 million; in 1982, it was $97 million; in 1983, it was $100 million; in 1984, it was $109 million.

If you add title II to that, it makes the 1984 figure $129 million. If you add up all the subsidies that the Senator from Alaska just mentioned, last year it was $461 million. My good friend, the Senator from Hawaii, says now there are only 409 active ships left. That is over $1 million per ship. If that is not enough, we are talking about increasing it—increasing the load from 50 percent of the Public Law 480 up to 75 percent of Public Law 480, at an additional cost to the taxpayers of $40 million to $60 million per year.

Look how rapidly those payments have increased to a relatively very few numbers of people, and a very few numbers of ships. We are talking about enormous increases. I thought we were talking about getting serious about cutting Federal spending. I thought we were going to make some difficult decisions. We have already had one budget resolution up here. We said, yes, we are going to make some cuts. We passed a reconciliation package. We are working on one that says we are going to make some reductions. Gramm-Rudman, I do not know how many speeches were made on the floor of the Senate saying, "yes, we are going to get serious about cutting Federal spending." If we cannot do it, we are going to set up an automatic mechanism that will do it for us. Here we are a week later saying increase this subsidy. The merchant marine only gets subsidies on 50 percent of Public Law 480. Let us make it 75 percent. That is not very cost efficient. That is not a very good deal for the taxpayers. Right now the subsidies are over $100 million per ship. Then we are going to increase the requirements to go from 50 percent of Public Law 480 to 75 percent of Public Law 480. You would just be adding millions of dollars again on those ships for those companies.

I was kind of shocked when I started looking and found out that according to USDA we had companies in 1984 which received $9.3 million due to cargo preference on Public Law 480—

one company. In subsidies from titles I and III of Public Law 480 one company received almost $10 million; another company almost $9 million; another one, $7.5 million; another one, $7.4 million another one, $5.3 million. Yet we are just talking about shoveling out another $40 million, or $60 million to these few companies.

I do not find it very responsible. It kind of bothers me. This year alone we are going to have an estimated increase of shipments under Public Law 480 of about 30-some-odd percent. The merchant fleet is automatically going to get half of that anyway. So that means their subsidy is increasing just because we are increasing the volume. You do not have to increase the percentage. They are going to get half of an increase anyway. So if the shipments under Public Law 480 are going up 34 percent, that is that many more millions of dollars going to those few companies.

So as I stated before, we do not have to increase the percentage. Their subsidies have increased from $63 million to last year $129 million; this year it is estimated that the volumes will go up 30-some-odd percent. So it would be up probably at around $150 million in 1985 alone. Now we are talking about increasing and saying, well, 50 percent is not enough. So let us go to 75 percent. So we will make that well over $200 million a year. I do not find that to be a very good deal for the taxpayers. I think it hinders our credibility as far as being serious about getting our Federal budget under control.

Mr. STEVENS. Will the Senator yield on that point?

Mr. NICKLES. I am happy to yield.

Mr. STEVENS. I am sure the Senator supports, as I do, defense preparedness for our country. I wonder if the Senator is aware of the fact that the vessels that we have in ready storage, ready reserve for the merchant marine, costs us $100 million just to keep them tied at the dock—$100 million a year.

Each one of those vessels the Senator is talking about costs us $1 million approximately a year to subsidize them, to keep them operating. In other words, the cost to the taxpayers is less if we support operating commercial interests that have crew and management ready, and we have really a merchant marine that is still flying the U.S. flag available to us in time of emergency. If they are not subsidized in their operations, they are tied up at the docks. There is no crew on them. There is no management for them, and the ones that are in that category, as I said, cost us $100 million a year.

I am chairman of the Defense Appropriations Subcommittee also.

Mr. President, I want you to know that in my judgment, this program of supporting cargo preference is the most cost-effective means of maintaining a sealift for this country that we can possibly have. That is my main reason for being involved. I urge the Senator to look at the costs if we do not do this. We learned in Grenada, we learned at the time of the oil embargo that we cannot rely upon vessels that serve this country that are flying foreign flags. We either take some reasonable actions to maintain a merchant marine or we submit ourselves to real peril in time of emergency.

I have been one who has never voted against a farm bill in my life, although my farmers, as I said, do not get one penny out of it. Not one penny goes to the farmers in Alaska.

I want my colleagues to know, and I hope we do not get into the position that the Members of the other body did in terms of getting into rhetoric, which I think was most unfriendly and unfair, I say that I know of no better expenditure of taxpayers' money in the interest of the United States, both from the point of view of preserving a merchant marine for peacetime and wartime, than cargo preference. I urge my colleague to think of the cost if somehow or other cargo preference were removed, the cost to us in terms of being unable to be prepared except for acquiring more vessels, tying them up to docks, hiring someone to keep them clean and run up their motors. Think of it in terms of who is going to man them, who is going to manage them, and who is going to be there in event of emergency.

Mr. NICKLES. Mr. President, I appreciate the Senator's comments. He is involved with military operations. Possibly, we should consider, if the Senator is saying having cargo preference is a valuable asset to our national defense in order to keep these 409 ships afloat. Is that the Senator's point?

Mr. STEVENS. I cannot make that point too strongly.

Mr. NICKLES. Could I ask the Senator then would he agree with me—is that the reason we pay this $400 million now and now it is going to be $500 million-plus a year of maritime subsidy? Is that to help our national defense?

Mr. STEVENS. It is one of the reasons. I think there is also a reason totally apart from national defense, for maintaining an ability to withstand economic blackmail, to maintain the ability to move our cargoes abroad in the event that there is some disruption as far as our foreign policy compared to the foreign policy of the countries whose flags the ships carrying our cargo fly.

The impact of what I am saying, Mr. President, is this: We saw that during the oil embargo. We lost control over tankers that were carrying oil destined for our shores. We have lost control over vessels that otherwise would have been calling on our ports to pick up our exports. And they could well include agricultural exports in the future because of disagreements in foreign policy. So it is not totally a defense policy it is a total policy of the United States, I think, that ought to be in favor of maintaining a viable merchant marine.

We maintain the farm economy at considerable cost, I say to my friend from Oklahoma. I remember the PIK days. I just asked over here and was told that in the time of the PIK Program, the cost of the farm program went up to $83 billion one year. This program, I am told, is estimated to be somewhere around——

Mr. BOSCHWITZ. Mr. President, how much?

Mr. STEVENS. Do not ask me. I got that figure right over here.

Mr. COCHRAN. Mr. President, will the Senator yield?

Mr. STEVENS. Yes.

Mr. COCHRAN. I think our staff may have misspoken or been misunderstood. It was $18 billion, not 80.

Mr. STEVENS. Even then, $18 billion for one program is not bad.

I had a visit from the Secretary of Agriculture. He wants me to oppose this bill. I understand there is a letter running around here asking some to oppose the Cochran amendment. Fair is fair, but I want my colleague to know, in terms of cost and preserving a vital part of the American industrial base, the merchant marine, this cost is not great compared to other subsidy programs which we impose on the taxpayers.

Mr. NICKLES. Will the Senator yield?

Mr. STEVENS. Yes.

Mr. NICKLES. I appreciate his comments in response to my question, but let me make a statement. I see others on the floor who wish to speak.

I think this charade of saying the proposed increase is for national defense is hogwash. If it is not—if that is a credible argument, if that is the reason we are going to go out and spend $461 million last year and increase it another $61 million—if that is the case, I think we ought to have the Secretary of Defense certify they need XYZ ships and say this is an integral part of our national defense instead of being just a big subsidy.

One final point that I think is important to make. The Senator mentioned the PIK Program and that the cost of the PIK Program ballooned up to $18 billion. One problem in the PIK Program is that we did not have a limitation. I regret that we were not able to put language in that would put a limitation on what anybody could receive under PIK. We should have had a limitation of $50,000. We had some who receive millions of dollars. That is the same thing we have with cargo preference. We have a handful of the companies that makes $7, $8, $9, $10

million a year in cargo preference subsidies today and if this amendment goes through, you can increase those numbers substantially. Perhaps we ought to have a perfecting amendment and if this amendment passes, perhaps we should look at some limitations on individual companies, possibly limitations on what they might be able to receive from Uncle Sam.

Mr. President, I yield the floor.

Mr. INOUYE addressed the Chair.

The PRESIDING OFFICER. The Senator from Hawaii.

Mr. INOUYE. Mr. President, with regard to the remarks by my distinguished colleague from Alaska, I would like to point out that the cost of this program is less than 1 percent of the $18.4 billion the Government expects to spend on farm income stabilization in 1985.

Second, at the present time, 50 percent of the Public Law 480 Food for Peace is being carried on American ships, and attempts have been made to either reduce it 50 percent or cut it out completely.

I might point out, Mr. President, that all other nations with merchant fleets have had cargo preference laws long before we even thought about it.

I wish to point out, Mr. President, in case my colleagues are not aware of this, that the United States has a policy to put our overseas mail out on bid. What are the consequences of this policy? In 1983, for example, the Postal Service granted 37 out of 45 contracts to foreign shipping lines, including one from a Soviet bloc country—Polish Ocean Lines—for the carriage of U.S. mail to overseas destinations. As of last January, the score was 33 out of 44 contracts.

Mr. President, imagine the situation in some African country, Ethiopia, for example, where we are now shipping tons of grain. But because of the present laws, only half must be carried on American ships. The rest is carried on foreign bottoms that have been accepted by the bid system. So, you see the stevedores in Ethiopia looking at the ships and saying, "Thank you, Soviet Union." Our grain is being carried on Soviet ships, on Polish ships, grain that we have been paying for.

Mr. President, Hawaii is an agricultural State. I am part of the farm bloc. I have voted for every farm program—peanuts, tobacco, wheat, corn. It is about time these farmers support shipping programs.

I remind my colleagues that less than 4.4 percent of international cargo that goes in and out of the United States is now being carried on American ships. We should recall the end of World War II we carried all the cargo.

It might also be of some interest to my colleagues that in the Falkland war the British, for that little war on that little island, had to employ 75 percent of their merchant fleet. It may also interest my colleagues to know that today we have less ships sailing than we had sunk in World War II. As my colleague from Alaska has indicated time and time again, how can we provide the fleet that may become necessary in the event of some emergency if we continue to destroy our merchant fleet? It is about time we stood up and changed the course that we have been taking for all these many years. I hope my colleagues will support the Cochran amendment.

Mr. NICKLES. Will the Senator from Hawaii yield to a question?

Mr. INOUYE. I will be very happy to yield.

Mr. NICKLES. I appreciate my good friend yielding and I appreciate his expertise in shipping and certainly understand with his State's location how important the shipping industry is to his State. He is fighting for that industry. I am looking at some rates that were given to me by the American Soybean Association. They mention that the rate from the United States Gulf to Sudan under a Korean-flag vessel was $20.35 per metric ton, on a United States vessel it was $63, about three times as high, and different differentials for different places, but in many cases the United States rates are two or three times as high as foreign competition regardless. The Senator mentioned Polish competition. Could he explain this and why he thinks United States freight rates are so noncompetitive?

Mr. INOUYE. Title II cargo moves primarily on regularly scheduled liner vessels. Traditionally, liner rates are set by the steamship conferences to which these vessels belong, and there is no difference between U.S.- and foreign-flag rates. As long as this is the case, shipping on U.S.-flags costs the Government no more.

When circumstances change, however, shipping on U.S.-flags can cost more.

If, as has been the case for some time, the shipping market is depressed, there is a downward pressure on the rates historically charged by conference members for cargoes moving out of the United States. This, in turn, attracts a number of foreign-flag independent—of conference—carriers. These carriers are able to undercut significantly the standard rates offered by U.S.- and foreign-flag lines which belong to steamship conferences.

Unless we are willing to insist that one segment of our economy work at rates below what would be necessary to give Americans a reasonble, comfortable lifestyle, I think it would be unfair and unrealistic to insist that our sailors work at Korean rates or at Turkish rates or at Japanese rates.

Mr. President, even the Koreans subsidize their shipping industry. All of the other countries subsidize their shipping industries. The United States, I think, has the least subsidized merchant fleet.

What we are trying to do is to give our merchant fleet not an edge but just an even playing field. I do not think that is asking for too much.

An important point was made by my colleague from Alaska, and this must be kept in mind whenever we discuss the merchant fleet of the United States, the possibility of economic blackmail. At the present time we carry 4.4 percent of our international trade. While it is going down each year, other nations increase their share of the American trade. The time may come—and I am not trying to be a demagog in this case—when the Russians and other socialist countries will indicate to the United States that they will direct their ships not to stop at American ports, and then we will have problems.

Mr. NICKLES. Will the Senator yield for one final comment? Was he finished with his point?

Mr. INOUYE. I would be happy to yield.

Mr. NICKLES. This is a different question. The Senator mentioned one of the reasons for the difference in rates was a living wage or the wage scale is considerably higher in the United States. What does an average seaman make, say, on a U.S. crew? Does the Senator happen to have that figure available?

Mr. INOUYE. I do not have it here but obviously it is going to be much more than the Korean sailor.

Mr. NICKLES. Just for the Senator's information, from these figures that we have been able to acquire, in 1983 for a 26-man crew that would work 7 or 8 months, having 1 master, 5 engineers, and 20 seamen, the average annual salary would be $36,000.

Mr. INOUYE. The trend in the U.S. merchant is downward. Newer vessels are manned with 21 members. Second, these shipping companies and these unions have to abide by the laws and administrative rules we have adopted, safety rules where we require certain types of ships to be manned by a certain number of men. These are the laws that we have made.

Mr. ABDNOR. Mr. President, I have been following this debate with a great deal of interest, and I might say concern, concern for the farmers of this country, for agriculture in general. In these days of deficit reduction talk, expanding budgets going on at the same time, it is imperative that those who are receiving the funds justify them. What disturbs me more than any other point in this debate is that farmers are expected to justify $109 million in their budget for something they have no concern about. We all know that if American vessels were not available there would still be other

vessels and they would be better off because of it.

Now, if the point is that we need our own ships in this country, that we have to protect them for strategic purposes, whatever purposes they might be, I will not argue that point. But I will say why do they have to come to the agricultural budget to get it? Why do they not go to OMB? Why do they not go to the proper committee and say, "Look, we need these vessels for this country. It is vital to America. We need your help."

Mr. STEVENS. Will the Senator yield?

Mr. ABDNOR. Yes.

Mr. STEVENS. I call the Senator's attention to the fact that under the amendment of the Senator from Mississippi, that will happen. There will be a new mechanism in the Department of Transportation very similar to the Commodity Credit Corporation. These funds will not come from the agriculture sector. They will come from the Department of Transportation. If the funds are not available under that mechanism, not provided by Congress and not borrowed, the provisions will not apply. In other words, it will not be payments coming out of the agriculture bill anymore. They will come out of the provision that has wisely been put together by the Senator from Mississippi and, I think, those of us working on the merchant marine. We have listened to the Senator's objections in the past about taking this money out of the agriculture bill. The Senator from South Dakota knows my great love and fondness for him but let me tell him, he lost a program, the new program for cargo exports because of the court decision. The court decision was based upon President Eisenhower's decision in the early 1950's that such a promotional program was in fact subject to cargo preference. But the farmers lost some $500 million in exports because there was not any willingness to put up the $50 million for cargo preference. I tell the Senator that we are looking at a program, the overall cost of which is 1 percent of the farm program. I would hope my friend recognizes we have heard his complaints in the past and now the cargo preference moneys will not come out of the agricultural sector.

Mr. ABDNOR. How will this be handled? That means that we take the dollars out of the budget the same as most people think.

Mr. STEVENS. Wait a minute. Those dollars were in the budget because they were in fact for cargo preference payments to the merchant marine.

Mr. ABDNOR. There was certainly a movement afoot to try to eliminate cargo preference from the budget.

Mr. STEVENS. There is a move afoot to eliminate a lot of farm subsidies, too.

Mr. ABDNOR. I cannot believe the image being projected by writers and columnists in this Nation of the farmers of this country. Last Friday I picked up the Washington Times and read an article by Robert Walter. What a brilliant article this gentleman wrote. He was complaining about what subsidies do to the cost of government and particularly to the poor consumers of this Nation, making them pay more for their food. In the same paper was an article on the CPI, the Consumer Price Index, pointing out the 3.1 factor that would be used; that the computation of entitlements was going to be 3.1 percent, the lowest in many, many years. If you read through the article, the biggest contributing factor to this lower index figure was the price of food. People think it is the farmers who are reaping the benefits. I would say if anybody is reaping the great benefits it is in cargo preference. I do not care were it appears. It makes it more competitive and more difficult in the trading business.

I hope we can get this story told. It would be more than $9 billion.

I ask the Senator from Mississippi how much more——

Mr. COCHRAN. Mr. President, I would like to answer the question and discuss the bill, but I think we are out of time. Under the previous order, we are to recess at 12 noon. We will come back to this after the recess, and I will be glad to discuss the bill at that time with the distinguished Senator.

RECESS UNTIL 2 P.M.

The PRESIDING OFFICER. Under the previous order, the Senate will stand in recess until 2 p.m.

Thereupon at 12:01 p.m., the Senate recessed until 2 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. COHEN).

The PRESIDING OFFICER. The Senator from Washington is recognized.

Mr. GORTON. Mr. President, I am pleased to support the amendment of my distinguished friend and colleague from Mississippi and his cosponsors. As we all know, cargo preference has been a deeply divisive issue, pitting the agricultural community against the maritime community at a time at which both are literally fighting for their lives. As a Senator who represents both interests, this has been a particularly troubling issue for me. It is gratifying to find that the two industries have been able to come together from very divergent positions to reach an agreement with which both can live. The agreement embodied in this amendment represents a true exercise in compromise and conciliation.

The controversy over cargo preference stems from two great national priorities: Developing foreign markets for American agricultural products and maintaining an American merchant marine. Because of the dramatic decline of farm income in the United States, spurred by the rising value of the dollar and high interest rates, government programs are needed to assist our farmers in developing overseas markets for agricultural exports. If the American farmer is to be able to compete in the world market with the heavily subsidized farmers of the European Community and other nations, commodity programs such as blended credit and the export PIK Program are essential.

The case of the U.S. maritime industry is just as clear: The substantially lower and subsidized costs of foreign shipping make it difficult for the American maritime industry to compete in the world market. The Government has, therefore, attempted to develop policies to assist the U.S. merchant marine. Cargo preference is one of those policies.

Conflicts have arisen between the maritime industry and agriculture because cargo preference expenses are tied to the Government's agricultural export programs, and, as a result, the costs of cargo preference appear to consume part of the budget appropriated for agriculture market development. Farmers insist that the Department of Agriculture should not be in the business of subsidizing the merchant marine; maritime interests argue that cargo preference costs are justified because they constitute a minuscule portion of the Federal subsidy provided to agriculture. The result has been stalemate.

The Blended Credit Program has been a casualty of this stalemate. This program provides an interest rate for exports at approximately 2 percent below prevailing U.S. market rates. In February, the Department of Agriculture suspended the program on the heels of a U.S. district court ruling that directed the Department of Agriculture to comply with Federal cargo preference requirements when administering the program. The Secretary of Agriculture, John Block, argued that the application of cargo preference would raise the costs of the Blended Credit Program and negate the 2 percent interest rate reduction that the program produces.

In fact, the Secretary was incorrect in his assessment of the impact that cargo preference would have on the program. The differential cost between foreign ships and U.S. ships is borne by the Federal Treasury; neither the American farmer, exporters, nor the importing nation pay this cost. Consequently, the favorable interest rate produced by the Blended Credit

Program would remain unchanged if cargo preference were applied. In spite of this fact, the Secretary went ahead with his decision and suspended $536 million of wheat sales to Egypt, Morocco, Tunisia, and Iraq.

I believe that the Secretary's decision was unfortunate and unnecessary. It hurt American agriculture at a time when farmers could least afford the loss of an important export program. It also gave credibility to the notion that the interests of the American farmer and the merchant seaman are at odds. I am convinced that this is not the case.

Since last summer, representatives of the agriculture and maritime industries have met in Washington, DC, to negotiate a long-term solution to the cargo preference dilemma. The result of the discussions is a proposal which would free all Government sponsored commercial sales from cargo preference requirements while increasing the U.S. shipping requirements on concessional sales. This proposal, which is embodied in the Cochran amendment, would increase the cargo preference requirements on the Public Law 480 Program to 75 percent from the current 50 percent requirement and exempt the blended credit, export PIK, and BICEP programs from any cargo preference requirements whatsoever.

I believe that this approach will lend some predictability and coherence to the Government's application of the cargo preference laws. It makes economic sense to consider a compromise which applies cargo preference in greater percentages to Government give-away programs and in smaller percentages to export promotion programs.

By its nature a Federal give-away program is a direct subsidy, providing a government-to-government transfer of commodities. On the other hand, an export promotion program, like blended credit, creates interest advantages by providing Government guarantees to exporters, but direct outlays of Federal funds are relatively small. It is reasonable to expect that direct subsidy programs should pick up a larger portion of the cargo preference subsidy, while allowing less expensive, less direct, subsidy programs the freedom to operate unencumbered by cargo preference.

I am pleased that a final agreement has been reached that has the support of the agriculture and maritime communities in the United States. Having said that, I must add that the most important and most obvious course of action that can be taken to reduce the costs of cargo preference is to improve the competitiveness and efficiency of our merchant marine. Progress has been made in recent years toward achieving this goal and I am convinced that greater improvements can and must be made.

It makes sense for agriculture and maritime interests to work together to find a long-term solution to their differences, rather than to rely on Congress to dictate one-sided solutions which would certainly be subject to constant challenge and acrimony. The problems faced by America's farmers and America's merchant marine are only compounded when Government policies put the two industries at odds. I hope that we can now lay this issue to rest and that these two industries that contribute so greatly to the American economy can begin to work together.

Mr. President, I congratulate the distinguished Senator from Mississippi and his cosponsors for their imagination and diligence in reaching this answer.

Mr. LEVIN. Mr. President, I will vote against the "compromise" amendment on cargo preference offered by Senator COCHRAN, even though I have supported the Public Law 480 Cargo Preference Program in the past. I generally favor the program because I recognize the importance of maintaining a healthy U.S. merchant marine. However, as a Senator who represents one of the Great Lakes States, I simply cannot support a compromise which will harm the Great Lakes ports.

As the Senator from Illinois has so forcefully stated, the Great Lakes ports already operate at a disadvantage because of the way the U.S. Department of Agriculture has applied the cargo preference requirements under the Food for Peace Program. Currently, the law requires that at least 50 percent of the food for peace cargo move on American ships. Unfortunately, the Great Lakes ports are rarely served by U.S.-flag ships. Additionally, our shipping season is short because the St. Lawrence Seaway is closed during the winter months. As a result, in order to get our equitable share of Public Law 480 shipped out of Great Lakes ports, we need to have a higher percentage of the 50 percent which is permitted to be shipped on foreign flags move from Great Lakes port.

Under the current law, the Great Lakes ports have already suffered as a result of USDA diversion of Public Law 480 cargo. Millions of pounds of grain grown in the Midwest which is distributed under the Food for Peace Program and which logically should be shipped from Great Lakes ports, has been diverted to ports in other regions of the country at a higher cost to the U.S. taxpayer. A Wall Street Journal article dated May 15, 1984, further explains the inequity in the administration of the cargo preference requirements and the importance of Food for Peace shipments to the Great Lakes ports. According to the article:

Last year, for the first time in the 29-year history of the Food for Peace Program, the total shipments fell short of the 50 percent bench mark. When the cargo tonnage was tallied at year end, only 48.5 percent had moved in U.S.-flag freighters. This modest violation of the cargo-preference law set off bells at the Agriculture Department. To ensure that it doesn't happen again, officials decided to enforce the 50-percent rule each month, rather than waiting until late in the year to adjust any imbalance.

So in late March, when the department made its first 1984 monthly food shipment assignments affecting Great Lakes ports (because of ice, the St. Lawrence Seaway, which connects the Great Lakes and the Atlantic Ocean, is closed to shipping from roughly mid-December to April 1) the Government modified its "cheapest possible transportation" rule.

Lacking enough U.S. registered vessels in the Great Lakes in April, the department looked elsewhere for ships. The result: 20,000 tons of processed grain for India and Peru were sent to Mississippi River ports and 12,000 tons of corn for Somalia were directed to docks on the gulf coast. An Agriculture Department official admits costs were higher than if Great Lakes ports had been used.

The article goes on to state,

. . . the port of Duluth, MN, says about two-thirds of the 62,000 hours worked by port personnel last year were devoted to humanitarian food cargo. Admiral Hoffman says Food for Peace cargo was the "basic inducement" for 56 of the 62 freighter that called at Milwaukee in 1983.

Mr. President, between 1980 and 1983, approximately 25 percent of the Public Law 480 cargo was shipped from Great Lakes ports. In 1984, Great Lakes shipments dropped to approximately 16 percent. If the compromise increasing the U.S.-flag requirement to 75 percent is approved, the Great Lakes ports will see their fair share of the cargo eroded even further.

Mr. President, I had hoped that the compromise could be amended to protect the interests of the Great Lakes ports by ensuring equitable distribution of Public Law 480 cargoes. Unfortunately, the sponsors of the compromise decided to preclude the opportunity to offer such an amendment by parliamentary maneuvering. As a result, I must reluctantly vote against it.

Mr. KASTEN. Mr. President, I rise in strong opposition to the Cochran amendment.

There are several things at issue here, but the most important is jobs—jobs at ports in Wisconsin, in other Great Lakes States, and at other ports not served by U.S.-flag vessels.

Mr. President, the debate we are having today is the culmination of a long and discouraging sequence of events that began last February with the court ruling that exports made possible by the Blended Credit Program were subject to cargo preference.

After that decision, Secretary Block suspended the Blended Credit Pro-

gram. Other USDA-assisted export programs were brought under a cloud, at a time when America's farmers could least afford it.

And, finally, the well-publicized controversy over cargo diversions from the Great Lakes made it painfully clear that the American-flag merchant marine is barely able to carry 50 percent of Public Law 480 shipments, and then only at exorbitant cost to the Government and to ports on the Great Lakes.

To make a long story short, the maritime industry and certain agricultural groups worked out what they call a compromise. This arrangement would exempt all non-concessional sales from cargo preference, but would raise the preference requirement on Public Law 480 shipments to 75 percent over 3 years.

This is, to say the least, a major change in our maritime policy, one that should not be made without hearings in the Commerce Committee. The chairman of that committee has made this point, and it is one we should not take lightly.

But my paramount concern is the Great Lakes, and the thousands of jobs at stake in Wisconsin ports.

The Wisconsin Department of Transportation estimates that almost 4,000 people work at the ports of Milwaukee, Green Bay, Kenosha, and Superior. A full 90 percent of the cargo shipped out of the port of Milwaukee is made up of Public Law 480 shipments.

There is very little U.S.-flag service into the Great Lakes. That means that this so-called compromise would be a death warrant for the port of Milwaukee, and could throw many people at other Wisconsin ports out of work.

I am not prepared to accept this.

Mr. President, I make these arguments with great reluctance. I think I have been as strong a supporter of the maritime industry, and even of cargo preference, as any Member of this body. I believe in the need for a strong merchant marine. We need it; it is in our national interest.

But I also believe it is in our interest to have strong, vigorous ports in the Great Lakes. It is in our interest to have jobs in Wisconsin.

The time has come to call a halt to the effort to attach increases in maritime subsidies to the farm bill. Let us stick with the Agriculture Committee's language, which would return us to the status quo before the Green decision. Let us bring the whole maritime problem to the Commerce Committee for hearings next year; as a member of that committee, I pledge to do all I can to see that the congressional commitment to a strong merchant marine is maintained.

Mr. President, I urge all my colleagues to join me in rejecting the Cochran amendment.

Mr. THURMOND. Mr. President, today I rise in opposition to the pending amendment. The amendment would change language in the 1985 farm bill—S. 1714—clarifying the cargo preference laws. The farm bill, as reported by the Senate Agriculture Committee, would exempt all agricultural goods exported under programs such as the Blended Credit Program from the cargo preference laws. Particularly in light of the currently depressed farm prices, these laws constitute an unreasonable, costly burden on our agricultural economy. Weighing the various competing interests, I believe that a sounder public policy would be to allow shippers and purchasers of our agricultural products to choose the most efficient provider of ocean transportation.

At present, cargo preference laws require that one-half of all goods exported under a Government-generated program be shipped on U.S. flagships. As determined by the Attorney General in 1963, these cargo preference laws apply to sales of surplus agricultural commodities by the Commodity Credit Corporation [CCC], if such sales involve some substantial element of U.S. Government subsidy, such as concessional sales and humanitarian food donations. In February of this year, however, the U.S. District Court for the District of Columbia broadened the scope of the Cargo Preference Act when it ruled the statute applicable to the Blended Credit Program. This USDA program loans money to foreign countries so that they may purchase American agricultural commodities. In response to the court decision, the USDA suspended the Blended Credit Program.

Clearly, Mr. President, this recent court decision indicates ambiguity in the law which Congress should clarify. Detailed hearings have been held on this issue in order to determine whether the cargo preference laws should be continued and, if so, their desired scope.

Mr. President, I am not insensitive to the concerns of the U.S. merchant marine industry. However, we must recognize that a statutory requirement for the use of U.S. flagships interferes with the competitive bid system normally used for shipping contracts. This means higher shipping costs and, therefore, less money available for the pruchase of agricultural products under USDA generated purchases.

Mr. President, considering our enormous trade deficit and the declining U.S. share of the world agricultural market, it certainly is not wise for the cargo preference laws to be broadened in scope by the courts or by Congress, as such action would further burden our farmers. Agricultural producers are suffering enough already without the additional restriction of cargo preference laws.

Mr. President, I believe it would be more beneficial to the agricultural economy to repeal the cargo preference law entirely. However, if that cannot be achieved at this time, I certainly hope that the language relating to cargo preference laws in the farm bill can be preserved to limit their application to shipments involving direct subsidies from the U.S. Government. I urge my colleagues to vote against the pending amendment.

Mr. GRASSLEY. Mr. President, I am happy that the Senate is considering the cargo preference issue today. This issue underscores my feeling that the problem with exports, with agriculture, and low farm income is not only the result of farm programs, but many other policies as well. Not until Congress and the executive branch decide to bite the bullet and change some of these other barriers to agricultural prosperity, will we truly have a progressive comprehensive agricultural policy.

Cargo preference is one of those very important issues that have limited the farmers access to international markets. Without our competitors raising one finger, we have given them a significant advantage. If I were a member of the EC or from Canada, Argentina, Brazil, or any of the other countries that are the true beneficiaries of this policy, I would be down here today lobbying Congress to vote for cargo preference. All cargo preference does is give other exporters a competitive edge over U.S. farmers.

Just look at what cargo preference does to our exports. By applying cargo preference to our Blended Credit Program, we increased our landed costs of U.S. grain by 15 to 30 percent. This more than offsets the 2-percent interest buy-down provided under the Blended Credit Program. Shortly after the Judge Green court decision applying cargo preference, we lost over a half a billion dollars in sales, affecting 3.6 million metric tons in grain exports. This 15- to 30-percent increase in costs as a result of cargo preference is in addition to the overvalued dollar which increases the price of our agricultural products by over 35 percent. How can we expect our farmers to compete against these kinds of odds?

Cargo preference is a free trade issue, an economic issue, and most of all, a fairness issue. If we are going to have policies that "stack the deck" against our farmers and for our competitors, we should ask these foreign countries to pay for part of these programs and not the American farmers through the U.S. Department of Agriculture. I recognize that this is not possible, but we can shift the burden of payment from the USDA to the Maritime Administration or the Department of Defense, where it truly belongs. As it stands now, over $100

million in funding appears to be supporting the export of agricultural products when in reality it is going to the merchant marine industry. This policy pours salt in the wound of the American farmer. At a time when agriculture is in crisis, we not only tell the farmer he is receiving too much help from the Government and implement policies that adversely affect him, but we ask him to pay for these misguided policies. This just adds insult to injury as far as the American farmer is concerned.

I am not in favor of cargo preference applying to anything. According to the Agency for International Development, the costs of shipping on U.S.-flag vessels under Public Law 480 alone, was $77.6 million in 1983; $97.5 million in 1984; and are estimated to run more than $118 million this year. This is money that could be going towards food aid for the needy and helping our exports. The ocean freight differential for shipping on U.S.-flag vessels this year will run anywhere from $30 to $80 per ton. Under a best case scenario this adds 80 cents per bushel of wheat, 76 cents per bushel of feed grains, and 80 cents per bushel of soybeans. In reality, the costs will probably be even higher. How can we keep blaming the farmers and farm programs for the drop in exports when we allow these kind of policies to continue?

I understand the concerns of those who feel cargo preference is necessary, but I am not willing to vote for this compromise.

If Members of this body are serious about cutting the deficit, increasing our exports, fighting for free trade and increasing farm income, they should vote against cargo preference. We need to show the American farmer that we have the courage to stand up for him. If we do not vote against cargo preference, how can we justify cuts in the agriculture budget and in farm programs. We preach to the farmers day in and day out, "You need to sacrifice, you need to tighten your belt a little tighter, and you have been receiving too much help." How can we tell the American Farmer he is receiving too much help when an industry that only supports 1,668 seamen—which is the total number of seamen involved in the shipment of agricultural exports—receives close to $100 million in just USDA/FAS subsidies. If you take into consideration the total amount subsidies given to the maritime industry from all agencies, it would have amounted to over $174 million in 1982. When broken down, this amounts to more than $100,000 per seaman.

I am tired of the American farmer being the whipping boy for all our other failures in international, domestic, monetary, and fiscal policy. I suggest that this is our chance to turn the tide. We must start down the road to a real agricultural recovery and not just policies that benefit others, domestic and foreign, at the expense of our farmers. Therefore, I encourage my colleagues to vote against cargo preference and start us on the right road to recovery.

OPPOSING COCHRAN'S CARGO PREFERENCE AMENDMENT

Mr. McCONNELL. Mr. President, there are very few clear issues in this year's farm bill. However, we have certainly got one here in the form of an amendment to strip the farm bill of one of its most important provisions—exemption from cargo preference provisions for USDA export-enhancing programs. Mr. President, I strongly oppose this amendment.

During a time when the volume of farm exports has declined by over 25 percent in the last 4 years, the last thing we need to do is severely restrict our own ability to compete in the overseas grain market. That is exactly what a U.S. district court ruling with respect to cargo preference has done to agricultural exports and since this misguided February court ruling, U.S. grain exports are running 10 percent below projected levels. The backbone of the USDA export credit initiatives is a blended credit program which has been shelved until this issue is resolved. Now is the time to resolve it.

The blended credit program gives the American farmer the tools to fight subsidized foreign exports and, since its enactment in 1982, has become an integral part of the USDA efforts to make U.S. farm exports competitive. At the time of enactment, Congress intended for money appropriated for blended credit programs to help farmers. Instead, the U.S. court ruling I mentioned earlier mandated that a certain percentage of all exports shipped under blended credit programs must be shipped by American-bottomed ships, whose costs are sometimes 3 or 4 times higher than some foreign shippers. Hence, USDA blended credit money is used to subsidize the American merchant marine, the costs of the commodities being shipped are higher and we're no longer able to compete with foreign countries. The American farmer loses a market, and the real paradox of this mess is that the merchant marine loses volume simply because we can't sell our overpriced commodities. So the American farmer again comes up a loser through no fault of his own.

We can address this inequity, Mr. President, by returning to the status quo. Until this unnecessary court ruling, cargo preference requirements applied to 50 percent of all food aid shipments through programs such as section 416 and Public Law 480. Title I of the 1985 farm bill contains provisions which will expand these and other food donation programs and will provide greater shipping opportunities for our merchant marine without destroying the competitiveness of American agriculture. Until U.S. farmers are lifted from the curse from unfair trading practices, they need all the marketing tools they can get.

Cargo preference limitations on all U.S. farm exports is seriously crippling our ability to compete with our highly subsidized competitors. I urge my colleagues to reject this attempt to hand another defeat to the American farmer.

Mr. McCLURE. Mr. President, I rise in support of the Senator from North Carolina to exempt blended credit and other programs legislated by Congress from cargo preference.

To apply cargo preference to commercial agricultural export programs, such as the blended credit and intermediate credit programs, may have very significant repercussions in this Nation's ability to maintain its world trade in agricultural products.

I would like to cite several examples which show how cargo preference, applied to the agriculture community, has significantly affected the agricultural industry in a negative way.

On recent, 1985, shipments of wheat, grown in the United States and shipped to Sudan, the freight differential for United States flag vessels was $42.65—that's more than twice what the cost was on a Korean-flag vessel, shipped at approximately the same time.

Another example of the freight differential in shipments of corn from the United States to Egypt this fall, documents a $34.90 difference in the rate of the United States vessel compared to a Liberian ship. In this case, U.S. taxpayers paid an additional $1,849,700 to send corn on the American-flag ship. In the former example of the wheat shipments, the U.S. taxpayer paid on additional $2,798,906 to send the wheat on the American-flag ship.

U.S.-flag ships charged an average of $69.50 more per ton, in 1984, than did foreign flag vessels to carry exported commodities. As an example, a ship carrying 30,000 metric tons of commodities received a subsidy from the U.S. Treasury averaging $2.08 million for a one time, one way, crossing.

A Congressional Research Service report documents that for the period 1954–84, over $24.5 billion in surplus agricultural commodities was exported through the Food-for-Peace Program. As a result of cargo preference requirements, these exports provided approximately $1.6 billion to the profits of a U.S.-flag shippers over that period.

The USDA estimates that in fiscal year 1985, the Commodity Credit Corporation will have to pay $109 million in freight for the differential charges

on $997 million worth of commodities which will be shipped under the Food-for-Peace Program. This comes to approximately 11 percent—the premium the taxpayer must pay.

The cargo preference program is placing increasing and unreasonable burdens upon the American taxpayer for shipment of agricultural products. A GAO report, which came out in 1984, calculated that between $71 and $79 million, in the form of additional freight, was paid by USDA and the Agency for International Development in 1980 due to cargo preference requirements.

The cargo preference program has not only a negative effect but an unreasonable effect on the Food-for-Feace Program. If cargo preference was not applied to food aid, $155 million would be available to provide food for hungry people throughout the world. This is the purpose for which the program and the appropriation was intended.

Cargo preference requirements on commercial agricultural export programs also has major effects on Idaho. Idaho is among the largest grain suppliers in the Nation. Three of our counties, Bingham, Cassia and Power, have each produced over 6.9 million bushels of wheat in 1983 and 1984. These and 40 other counties, which provided over 32 million bushels in 1983 and 1984, need a market situation which is expanding and aggressive, not restrictive.

A September 30, 1985, report from the Committee on Agriculture, Nutrition, and Forestry-U.S. Senate, concluded that the recent judicial expansion of the applicability of cargo preference places an undue burden on agricultural producers to support the U.S. merchant marine and is contrary to the intent of Congress regarding the reach of cargo preference laws.

Mr. President, if the cargo preference is applied to the blended credit program, the intermediate credit program, or any other of these programs, they most likely will be terminated since their cost would increase so greatly that it would make these programs cost-ineffective. The USDA estimates that cargo preference costs would add $45 million in Government outlays. The total cost of blended credit shipments would rise from a net cost of $23 million to $68 million. That's an increase of three times without the cargo preference costs. Idaho and its great agricultural industry would suffer. The Nation's agricultural industry would suffer.

The Nation cannot stand to lose these valuable programs. Idaho farmers, all American farmers, cannot stand this loss. We cannot allow a sharp rise in USDA outlays and a further increase in the Federal deficit which is caused by increased costs due to cargo preference requirements. It is time for Congress to recognize the need to stand firm for agriculture. It is time to stand for the farmers.

I ask my colleagues, and I lend my support, to pass the committee-approved exemptions from cargo preference for commercial export programs.

Mr. BENTSEN. Mr. President, I am pleased to join with my distinguished colleague the Senator from Mississippi [Mr. COCHRAN] and a number of others in offering this amendment. This amendment is a compromise on the thorny issue of cargo preference. It was painstakingly worked out over a period of several months between two coalitions representing major agricultural and maritime groups. Passage of this amendment will allow us to unsnarl the current mess in key USDA export programs and get those programs to working once again.

The Cargo Preference Act of 1954 was enacted with the objective of assuring that the United States would have a U.S.-flag merchant fleet available in times of war. This law requires that 50 percent of all concessional sales of U.S. agricultural products be shipped in U.S. vessels. Programs under various other Government agencies, such as Defense, Treasury, and the Agency for International Development, are also subject to cargo preference requirements.

Historically cargo preference requirements have been applied only to Public Law 480 and section 416 food aid shipments. However, in February of 1985 a U.S. district court ruled that cargo preference applied to USDA's Blended Credit Program. This program uses a combination of GSM-102 loan guarantees and GSM-5 direct loans at below-market interest to provide an interest-rate subsidy for U.S. agricultural exports. It is a major tool for responding to foreign interest rate subsidies which are displacing U.S. exports.

The court further stated that, if asked, it would rule that cargo preference would also apply to the GSM-102 export credit guarantee program, which is the mainstay of our export credit programs. In 1984 about 10 percent of all U.S. farm exports were sold under blended credit or GSM-102.

In response, the USDA shut down the Blended Credit Program. In May Secretary Block ignored a request from 53 Senators, including myself, to go ahead and complete the blended credit sales that had been announced for this year. We lost those markets to foreign competition.

There were several months of intense negotiations between agricultural and maritime groups this summer, culminating in this compromise proposal. It has been agreed to by all of the major maritime groups. It has been agreed to by most of the major farm groups, including the National Cotton Council, the National Association of Wheat Growers, the National Council of Farmer Cooperatives, the Five State Rice Producers Legislative Group, the National Corn Growers Association, the Farmers Union, the Grange, and the Rice Millers Association.

The bill reported from the Senate Agriculture Committee contains a cargo preference provision which would overturn the court decision and apply blended credit only to the traditional food aid programs. Similar language was approved by the House Agriculture Committee but was rejected on the House floor by a vote of 245 to 179. The House vote is a clear signal to all who care to look. It shows that such language cannot be enacted into law.

However, failure to enact a change in the cargo preference law will keep the Blended Credit Program shut down. Not only that, but it will probably also lead to the shutting down of the other USDA export programs as well.

We cannot afford such a stalemate. Neither U.S. merchant seamen nor U.S. farmers want it. Neither of them can afford it. As a letter from the agricultural coalition in support of this compromise says:

> Without such legislation, we believe the result will be to maintain the February U.S. district court decision and the potential loss of billions of dollars in U.S. agriculture export sales.

This compromise amendment will break that stalemate. It will exempt all USDA export credit programs, including blended credit, from cargo preference requirements. It will exempt all current and future USDA export subsidy programs, such as using surplus commodities to subsidize export sales as would be required by other sections of this farm bill. It would restrict cargo preference to the traditional food aid programs. It would increase the cargo preference requirements under the food aid programs from 50 percent to 75 percent, phased in over 3 years. Any additional cost under these provisions would be paid by the Department of Transportation instead of by the Department of Agriculture.

This is a workable compromise. No one got everything they wanted. Everyone gave up something. But everyone got something they needed.

I urge my colleagues to pass this amendment and join together in the real fight—the fight against foreign competition, the fight for American jobs and American agricultural exports.

Mr. PROXMIRE. Mr. President, I want to put the Senate on notice that the so-called Public Law 480 cargo preference compromise offered by Senator COCHRAN devastates Great Lakes shipping.

Unlike other U.S. coastal ranges, few U.S. carriers serve our fourth coast. While our ports provide efficient, very low cost services for Public Law 480 title II bagged and processed cargoes, we can't even bid for 50 percent of them under existing law.

Why make this situation worse. A boost to 75 percent for Public Law 480 preference cargo adds to the deficit, deprives starving people of food and denies low cost, efficient ports like Milwaukee the business they deserve and would get under any other rational system of cargo allocation.

Even worse, under the existing already flawed system, cargoes bid on and won by our ports and foreign-flag carriers are often diverted at the last minute onto much, much more expensive U.S.-flag vessels located in other coastal ranges greatly increasing costs to the U.S. taxpayer.

Just this week the city of Milwaukee, joined by Superior, Duluth, Kenosha, Green Bay, Burns Harbor, six International Longshoremen's Association locals and numerous Great Lakes shipping interests filed suit against the Secretary of Agriculture charging violations of Federal law and regulations in applying an overly rigid, mistaken interpretation of cargo preference rules.

According to Milwaukee's brief:

These illegal diversions have caused significant damage to our Great Lakes economy, employment opportunities, and economic development potential.

The suit charges that the Department of Agriculture and other Federal agencies have illegally diverted millions of pounds of cargo to the east, west and gulf coasts that could have been shipped out, more cheaply, from the Great Lakes. The brief states further that diversions deprive our ports of the "base cargo" they need to stay in business and violate the principle of lowest landed costs in selecting carriers.

Mr. President, the Great Lakes ports suffer from many natural disadvantages such as an ice-shortened season, high St. Lawrence Seaway tolls, and system bottlenecks and breakdowns. But the effect of this amendment is worse than anything nature dishes out—it kicks us right in the teeth.

Under current 50-50 preference requirements, last year the Great Lakes got 18 percent of all the Public Law 480 cargo. But if only 25 percent of Public Law 480 can go on foreign flag ships, as in the Cochran amendment, Great Lakes ports like Milwaukee, Green Bay, or Superior would lose business and perhaps even have to shut down. Fully 90 percent of all Milwaukee cargo business comes from Public Law 480, title II.

Mr. President, unlike other ports in the United States, the Great Lakes ports have paid their own way in the form of seaway tolls. Every time tolls go up, we lose business. We lose business, too, because of our shortened season which requires shippers to substitute alternative forms of transportation in the winter months. In fact, total Great Lakes cargo shipments are down 20 percent from last year alone. We can't take much more bad news.

Mr. President, while this amendment devastates Great Lakes ports, we are not alone in our opposition. Groups as diverse as CARE, Bread for the World, U.S. Chamber of Commerce, the Grange, American Farm Bureau Federation, National Soybean Processors Association all oppose this change in cargo preference.

Secretary Block also opposes the change and CBO has estimated that it will add $100 million more a year to the program.

Mr. President, I ask my colleagues to oppose this compromise which costs too much and savages an entire region of the United States.

Mr. DURENBERGER. Mr. President, it is with some reluctance that I rise in opposition to the proposal offered by the Senator from Mississippi. I do so reluctantly not because of the merits of the amendment but because it is a rare occasion when the Senator and I find each other on different sides of the fence on any issue. But I must oppose this amendment, and believe it is so fatally flawed that it must be regarded as a great fraud on the American public and the millions of starving people who depend on Public Law 480 shipments for their life.

This amendment has been called a compromise by its proponents and, judging by its list of supporters, that statement might have some validity. But not much, because anyone who has taken the time to analyze this amendment can see that this compromise is a cop out. The bottom line on this amendment is that in return for the maritime industry's support for the exemption of nonfood aid commercial export expansion programs from the cargo preference requirement, the Washington based representatives of the Wheat Growers, Corn Growers, Farmers Union, NFO and a few other farm groups gave the maritime industry a blank check on the amount of humanitarian assistance subject to the cargo preference requirements. And, while the Washington lobbyists for the farm groups I just mentioned may think this is a good compromise, my corn growers, my wheat growers, and my farmers think this is a horrible way to resolve the impasse which exists on this issue. My farmers believe that the exemption for nonfood aid commercial export expansion programs from the cargo preference requirements contained in the bill reported out of committee is the best policy which can be reached on this issue. And, they think their Washington representatives sold them out.

To outline some of my concerns, let me first indicate what this amendment will do to the port of Duluth, MN. For those colleagues who have not studied geography since grade school, you might be surprised to find that Duluth, MN, lies west of St. Louis, MO, but relies on a 2,342-mile channel through the Great Lakes-St. Lawrence Seaway system, to gain access to the Atlantic Ocean and the international marketplace. Unfortunately, very few U.S.-flag vessels call at the Port of Duluth, or the Great Lakes for that matter. In fact, over the last 6 years, only seven U.S.-flag ships called at the port, handling only 38,000 metric tons of cargo, or 0.39 percent of all cargo handled by the port. Mr. President, I ask unanimous consent that a chart illustrating these shipments be inserted into the RECORD at this point.

There being no objection, the chart was ordered to be printed in the RECORD, as follows:

U.S. FLAG VESSEL CALLS TO PORT OF DULUTH-SUPERIOR 1980 TO 1985

Year and name of vessel	Ship type	Commodity	Tonnage (metric ton)	Percent of total tons	Percent of ocean ships
1980: M/V Marjorie Lykes	Conventional	Public Law 480 bags	5,453	0.05 percent (9,203,619 metric tons)	0.3 percent (272 ships).
		Granite	34		
Total	do		5,487		
1981 M/V Marjorie Lykes	do	Bulk durum wheat—Public Law 480	5,252	0.06 percent (8,351,732 metric tons)	0.3 percent (258 ships).
1982: M/V Ashley Lykes	do	Public Law 480 bags	2,235	0.03 percent (6,438,832 metric tons)	0.4 percent (233 ships).
1983					
1984:					
M/V Ashley Lykes	Conventional	Public Law 480 bags	4,412		
Do	do	Public Law 480 bags	989		
M/V Thoroughbred Topper	Tug/barge	Bulk spring wheat—Public Law 480	19,600		
Total			25,001	0.39 percent (6,770,677 metric tons)	1.2 percent (250 ships).

U.S. FLAG VESSEL CALLS TO PORT OF DULUTH-SUPERIOR 1980 TO 1985—Continued

Year and name of vessel	Ship type	Commodity	Tonnage (metric ton)	Percent of total tons	Percent of ocean ships
Through June 1, 1985: R.W. Sessler USL 501	Tug/barge	Bulk spring wheat—Public Law 480	13,000	NA	NA (38 ships to June 1)

Mr. President, expansion of cargo preference requirements for Public Law 480 shipments would further diminish the all ready limited amount of traffic moving through the lakes, and represent another attack on the economic viability of Great Lakes ports. As a letter from the Western Great Lake Maritime Association makes perfectly clear, this amendment will inflict losses on the Great Lakes region in excess of any benefits which might accrue to the U.S. maritime industry.

Mr. President, I ask unanimous consent that a copy of that letter be inserted in the RECORD.

Mr. President, the cargo preference requirements are not the only impediment to restoring the economic health of the lakes, but they are a major one. And in the final analysis, this Senator can't help but come to the conclusion that this amendment will only make matters worse for the lakes. There have been no hearings held on the amendment, there has been no economic impact analysis performed on the amendment, and there is no information available which would support the thrust of the amendment. As I said earlier, the bottom line on this compromise is that a group of farm lobbyists sat down with some maritime lobbyists and cut a deal which took care of their own concerns at the expense of Great Lakes ports, recipients of humanitarian assistance and the integrity of our Government. It demeans this Senate and the legislative process for this body to get itself involved in such horsetrading. This Senator will have no part of it.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

WESTERN GREAT LAKES
MARITIME ASSOCIATION, INC.,
Arlington, VA, June 17, 1985.

Hon. JOHN C. DANFORTH,
Chairman, Committee on Commerce, Science, and Transportation, U.S. Senate, Dirksen Senate Office Building, Washington, DC.

DEAR MR. CHAIRMAN: We are writing to you concerning the application of Cargo Preference legislation to Public Law 480 programs.

It is our understanding that during your Committee's markup of S. 721 on June 19th, a proposal may be introduced which would impose increased U.S. flag requirements on P.L. 480 shipments. Our Association and many other Great Lakes interests are unalterably opposed to any such provision.

At this time, Great Lakes ports, stevedoring, commodity, and shipping interests participate in P.L. 480 under the current 50 percent Cargo Preference requirement. We do this with difficulty and under the constant threat of cargo being taken away from our coastal range in order to find U.S. flag service. We have only one regularly scheduled U.S. flag shipping line in the Great Lakes. Any effort to increase the requirement for cargo movement on U.S. flag vessels would almost certainly result in massive transfers of cargo from the Great Lakes coastal range to other areas.

Mr. Chairman, the current cargo preference legislation does not help the economic interests of the Great Lakes region. Nevertheless, it is the law and we do our best to operate within its 50/50 provisions. If the 50 percent U.S. flag requirement were increased, the law would impose a severe negative impact in terms of lost jobs, decreased personal income, less business and a general weakening of the economy of the Great Lakes/St. Lawrence Seaway area.

If there is a need to provide further funds and support for U.S. flag maritime interests, then please do not do it in a way that causes more harm than good. The gains that might accrue to U.S. flag interests under this proposal would be more than offset by the losses in our region.

Sincerely,

DANIEL E. SHAUGHNESSY,
President.

Mr. RIEGLE. Mr. President, I am voting the compromise cargo preference amendment because I am troubled by the provisions as they relate to the Great Lakes. I have long supported the concept of cargo preference, and have indicated my support both on this floor and in the Senate Commerce Committee. I am deeply concerned about the current state of our maritime industry, where our entire dry bulk fleet consists of less than 25 ships. This is cause for alarm, given our heritage as a maritime nation, and the dependence of all our industries on a sealift capacity. As we have heard, World War II was won because we had a superior ability to transport enormous quantities of materiel to distant fronts. Today, Mr. President, there is a real doubt that we could muster the same capability, and with less than 25 ships, I don't think there really is much doubt.

Beyond that, Mr. President, the concept of cargo preference is sound. No other nation in the world gives so much of its own cargoes to ships of other nations. The cost of cargo preference is small in relation to the overall agriculture budget, and I do feel that it serves a national purpose.

I am voting against this amendment for the reason that it is unfair to the Great Lakes. The Great Lakes are the fourth seacoast of the United States. The Great Lakes ports are closer to European destinations. There is very little justification for the decline of cargoes in the Great Lakes, and much of this decline can be traced directly to the administration of the cargo preference program.

For several years, I have been working with other Great Lakes Senators to fashion a compromise that would address the problem of cargo diversions. We have attempted to obtain administrative relief, Presidential assistance and legislative compromise to no avail. In fact, just last summer, a government agricultural cargo was literally on the dock in Milwaukee when, due to cargo preference requirements as interpreted by USDA or some other agency, the cargo was diverted to the west coast. Mr. President, it happens all too often, and it seems that the Great Lakes suffer a disproportionate share of diversions from our ports to the gulf coast, or in some cases the west coast.

Clearly, this is not a desirable situation, and the efforts of Senator DIXON have been to ensure that the Great Lakes receive their reasonable share of all Government-generated cargoes. We attempted to negotiate alternative language concerning the Great Lakes, language that would have solidified the share of cargoes for the Great Lakes at their historical range of 20 to 25 percent. We were unsuccessful in that effort, so I face no other choice than to oppose the Cochran compromise and urge all of the parties at interest to continue the efforts to reach a compromise which is fair to all of the port ranges of this Nation, including the Great Lakes.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Missouri is recognized.

Mr. DANFORTH. Mr. President, it is ironic and discouraging that at a time of crisis for American agriculture, at a time when we are trying to revitalize farm exports, supporters of the U.S. merchant marine should return to the issue of cargo preference. They do so promoting what they call "compromise" but it is not compromise at all.

It is hard to imagine a more repugnant Federal program than one that siphons off funds for the starving children of Africa in order to serve the inefficient and noncompetitive domestic maritime industry.

Cargo preference is special interest legislation at its worst. It requires that 50 percent of all food aid shipments under the Food for Peace Program travel on U.S.-flag vessels. The result of that policy in 1985 was a subsidy of $150 million for the U.S. merchant marine—$150 million that otherwise would have been spent on American farm products, for shipment to the

hungry and malnourished people of the world. This is a policy that takes from the truly needy and gives to the merchant marine industry.

The compromise that has been proposed seeks to expand cargo preference requirements even beyond their historic scope, entailing additional giveaways to maritime interests. It is of no consequence that some of these payments are to be channeled through the Maritime Administration. If Congress wants to maintain shipments under the Food for Peace Program at this year's levels, it will have to increase its subsidy to the maritime industry by 50 percent. At a time of famine in Africa, at a time of financial crisis in American farming, at a time of $200 billion deficits, what kind of compromise is that?

As reported, S. 1714 already raises minimum authorization levels for concessionary and humanitarian programs. These increases, like the increases of the past year, mean that the merchant marine will increase its take from cargo preference under existing law. This, to me, is a sufficient compromise.

Mr. President, national defense and military preparedness are not at stake today. If at a time of fiscal austerity it is thought desirable to subsidize a domestic merchant fleet, then we should do so directly. I doubt that we would choose the vessels that currently benefit from cargo preference. But the worst of all possible approaches is to increase these benefits and spray them around indiscriminately, with the costs shouldered not only by the taxpayers but also by our farmers and the hungry of the world. We should defeat the proposed amendment.

Mr. ABDNOR. Mr. President, I was on the floor at the time the 12 o'clock hour approached and did not complete my comments or some questions I would like to ask.

When I left the floor, I had the understanding that the entire dollar figure for the cargo preference would be transferred to the Transportation Department. I ask the manager of the bill if that is correct, or is it only that portion of the additional dollars that would come about through this amendment?

Mr. COCHRAN. I am not sure I heard the entire question.

Mr. ABDNOR. I thought the Senator from Alaska was saying that the entire dollar figure for carrying out the Cargo Preference Program would not be directed by and under the transportation budget, no longer under the agriculture budget. Yet, I have been told by others that the only proportion that would go under transportation is the additional 25 percent by which the Senator wants to increase cargo preference percentages.

Mr. COCHRAN. The funding for cargo preference is going to be made available to pay for this additional percentage through an appropriation under the Department of Transportation's budget.

Mr. ABDNOR. Then, the $106 million that has been in the budget heretofore and will be in the 1986 budget for that portion of the cargo preference will still remain in the agricultural budget. Is that correct?

Mr. COCHRAN. My understanding is that we will not shift the entire program funding to the Department but simply the increased costs of these additional percentages which are phased in over a 3-year period will go to the Department of Transportation under a new funding mechanism.

Mr. ABDNOR. I guess that is the way it is.

I think there was a misunderstanding. I think the point we want to make here is that the agricultural budget is still being charged $109 million to carry on this Cargo Preference Program through 1986.

I point out that 5 years ago, in 1980, the cargo preference share of the Public Law 480 budget was less than 7 percent. Since 1980, funds spent on Public Law 480 commodities have increased less than 18 percent, while the funds spent on Public Law 480 cargo preference subsidies have skyrocketed 73 percent. I think it is one more example where the farmer is taking a back seat to other interests.

There is another question I would like to ask.

We are talking about shipping rates, and I admit this letter was sent to me by an interested group of people, but they say that a U.S. shipment from the U.S. gulf to the Sudan on Korean ships would cost $20.35 a ton, and on an American flagship it would cost $63 per metric ton.

I ask the sponsor of this amendment another question: Do many of the American vessels that carry this grain to other countries under Public Law 480 come back empty because they are unable to pick up cargo at that rate? How are they able to compete on the other end? We have to conclude that most of those ships must come back empty. Is that correct?

Mr. STEVENS. Mr. President, if the Senator will yield, I say to the Senator that I think Senator COCHRAN has done yeoman service by putting his name on this as a principal sponsor of this compromise. It is a compromise, and those of us ready to defend the maritime interests will be ready to answer those questions.

The difference in cargo rate is the difference between a government subsidy and a limited government subsidy. Korea totally subsidizes those shipping lines and it does not require the things we do in terms of Coast Guard standards, safety standards, health standards, the maintenance of crew limits in terms of having a doctor, as has been mentioned. When you put them together, it costs more money to run a U.S.-flag ship. That is all there is to it.

If you are trying to compare costs, you can compare them in other places—for example, the packing of a can of tuna in Korea and in California. You will find the same differential exists. I do not think this is something relative only to the shipping industry. It is relative to the fact that we are maintaining our national defense, the payment of taxes, the support of a system of environmental controls, health controls, health services, and they are not.

You cannot compare apples and oranges so far as this is concerned. Those ships compete on the same basis as any other part of our economy with the Korean economy. You will find the same with agricultural products.

Mr. ABDNOR. The Senator is right. All I am asking now is this: Does that high a rate force our American vessels to return to this country empty? Are they able to pick up any kind of shipments overseas? We are getting plenty of imports into this country. I think we call it a backload in the trucking industry. Maybe it is an unfair question.

Mr. STEVENS. When they come back with cargo, it reduces preference costs. The cost of shipping at the rate the Senator is mentioning is going over and coming back empty. If they bring back a load of cargo, it reduces the cost to the Government. It depends on whether there is cargo available, whether it can be arranged. We do everything we can through the Maritime Administration to arrange those cargoes on the return trip, because they do reduce the cost of cargo preference.

Mr. ABDNOR. But some must have to come back empty.

Mr. STEVENS. And if they do, that is what you pay for in terms of the $60. I hope the Senator realizes that.

Mr. ABDNOR. I do. This 25 percent increase we are allowing for Public Law 480 to come under cargo preference is a 50-percent increase. That is probably the biggest single jump we will have in the budget this year. I wonder what is going to happen when you go to conference on this basis. The House has an even larger one. We will probably have to put the whole thing under Public Law 480 to have an agreement with the House.

I am concerned about dollars. Public Law 480 is for a great purpose. It reduces the amount of money under Public Law 480 for feeding people.

Mr. STEVENS. This is the third time I have heard on the floor that, somehow or other, cargo preference reduces the amount available for exporting food products.

When the Congress of the United States prepares the budget for Public Law 480, if that budget is submitted by the administration the cost of the cargo preference. It does not come out of the amount that is there to purchase the surplus products to be shipped overseas.

If you assume total repeal of the program, then you take out that increment that is currently paying for cargo preference, unless you assume Congress would then increase the amount to be paid for agriculture products if the cargo preference were eliminated.

Mr. BOSCHWITZ. Mr. President, will the Senator yield?

Mr. ABDNOR. I yield.

Mr. BOSCHWITZ. Is the Senator from Alaska saying that the amount of cargo preference is a demarcation of some type in the appropriations bill?

Mr. STEVENS. There is a clear understanding at the time these are submitted as to what the cost will be at any level of exports.

Mr. BOSCHWITZ. Clearly, there is no demarcation in the appropriations bill that says so much is to go for cargo preference. There is certainly a good deal of despair on the Agriculture Committee with respect to the amount that goes into Public Law 480, the recognition that less food is going to go because of the cargo rule.

Mr. STEVENS. I say to my friend from Minnesota, there are no deliberations as to how much it would cost to ship it by railroad to the port, either. Does the Senator suggest we take out the money it costs to send the farmers' food to the port? The current situation is involved in the same bill. The railroad costs come out of that.

Mr. BOSCHWITZ. I was just responding to the Senator's statement that you seem to be making that there is a certain demarcation in the appropriations that says it will be in it, when we decide how much money is going to go into Public Law 480, that we take into account the fact that we have to give so much for freight because of the cargo preference rules. That is not the case.

Mr. STEVENS. I beg the Senator's pardon. We do——

Mr. BOSCHWITZ. I do not yield to the Senator.

Mr. STEVENS. The Senator asked me to yield for a question.

Mr. BOSCHWITZ. Regular order.

The PRESIDING OFFICER. The Senator from South Dakota has the floor.

Mr. BOSCHWITZ. The Senator from South Dakota has the floor.

Mr. STEVENS. That is correct. I was responding to him and you asked me to yield to you for a question or for a comment.

Mr. BOSCHWITZ. I asked the Senator from South Dakota to yield.

Mr. ABDNOR. Mr. President, I yield to the Senator from Alaska.

Mr. STEVENS. I am just trying to make the point that, as we reveiw this in the Appropriations Committee, as the Senator knows, the requests for agricultural exports and the coverage of the program, there is, in fact, in that amount, an estimated figure for a cost of exports at any particular level. It is easy to determine. It is not a line item. If that is what the Senator from Minnesota is saying, Mr. President, I agree. There is no line item for cargo preference cost. But it is included in the overall cost of the agricultural bill and the amount of it is available to any Member of the Senate if he or she wants to ask for it.

Mr. ABDNOR. Mr. President, I wish to continue for a second here. I was doing a little figuring over the noon hour trying to see what this really means, and to put it in the right perspective.

I think if you look at the efforts that have been yielded from the life-aid concerts, $75 million worth of food will go to the starving in Ethiopia. I would just like to ask how many Ethiopians can we feed for 1 month with $75 million? I think you find out that it amounts to 25 million people if you use cargo preference on the U.S.-flag ships, and there are 34 million if you do not. I think that is something to think about. I think with all of the hunger that is going on in this world and the plentiful amount of grain that we have, we could be doing more of this. Budget restraints keep us from doing that.

So here we come along and talk about adding a 50-percent increase to what we are already asking in the way of a cargo preference to help out our merchant marine.

Let me give you a few other figures here. We are talking about subsidies all the time. I was able to ascertain that in 1985, the average payment to the average dairy farmer was $22,800. That was average. Rice, it was $14,300; cotton, it was $8,900; corn, it was $4,700; and wheat, it was $4,400.

Now, for comparison, let us look at the maritime subsidy for hauling agricultural commodities. There were about 25 ships, averaging about 25 crewmen per ship, or about 650 seamen altogether. The figure that was given was that the total cost for Public Law 480 cargo in 1984 was $129 million. If you divide $129 million by 650 seamen, you get a cost of $198,000 per crew member.

Maybe I am way off. Lord, I could be off by half. But when we talk about a subsidy to a farmer, let us look where the subsidies are really going. There has to be a better way. I have not come up with the answer. But I do not think by increasing, at this time, our cargo preference by a 50-percent increase, that we could hardly justify doing so in the light of the fact that our No. 1 purpose for Public Law 480 was to get food in the hands of starving people and try to dispose of some of the surplus we have in this country.

Mr. DIXON. Mr. President, I rise in opposition to this so-called compromise. I hope that those on the floor from the Great Lakes States and near it and those in their offices who are concerned about the Great Lakes will pay close attention to what I say. Because while this may be a compromise that satisfies some of the disparate groups that are concerned about this issue, this compromise, believe it or not, in my view, makes the cargo preference law even worse, may I say to my friend from Minnesota, even worse for the Great Lakes States than the law now is.

Let me just say this to you. First of all, some of us from the Great Lakes area—and that is the breadbasket of America—would have liked to have offered an amendment to this so-called compromise in the course of the major discussion between the major players—the distinguished Senator from Alaska, the distinguished Senator from Mississippi, and others. However, I want the people on the floor and in their offices to know that by the use of parliamentary devices and other methods, the distinguished sponsors of this so-called compromise have filled the tree so that further consideration of amendments is blocked out on this so-called compromise. And once the compromise becomes a fait accompli by this amendment passing, those of us from the Great Lakes States, the great breadbasket of America, who are concerned about the fact that commercial traffic on the Great Lakes is being destroyed by cargo preference policies, we are not going to be able to prevail on the later amendment. We are going to be stuck with this compromise that, in effect, changes the figure from 50 percent to 75 percent, thus, absolutely, positively, completely destroying transportation on the Great Lakes of America.

The Cargo Preference Act directs that it shall be implemented "in such a manner that will insure a fair and reasonable participation of the United States flag commercial vessels in such cargoes by geographic areas."

I am forced to conclude, however, that this has never been the case. In an effort to meet its 50-percent U.S.-flag mandate, the Department of Agriculture allocated only 18 percent of all national title II Public Law 480 cargoes to the Great Lakes in 1984.

Now, may I say to my friends from the Great Lakes States, like my friend from Minnesota, that are under a 50-percent rule. Under a 50-percent rule, the Great Lakes got 18 percent. But we are going to go to a 75-percent rule, I say to my friend from Minnesota. I

say to my friends from the Great Lakes States and the breadbasket of America—if we can only get 18 percent under a 50-percent rule, what are we going to get under a 75-percent rule?

Indeed, this year's shipping on the Great Lakes is running even lower than this slim percentage, approximately 16 percent through September.

Now, I want my friends from the Great Lakes States and the breadbasket of America to listen to this. In the last several months, the U.S. Department of Agriculture has actually diverted two relief shipments, originally allocated to the Great Lakes, to the Port of Seattle. The cost of just one of these diversions to the U.S. taxpayers amounted to $200,000.

In fact, the U.S. Department of Agriculture recently diverted a shipment which had already reached the Port of Milwaukee, WI. This grain was put on a train and it was shipped on a train from Milwaukee, WI, to Seattle. I repeat, Mr. President, the title II Public Law 480 cargo had already reached the Port of Milwaukee when it was suddenly diverted to the Port of Seattle at the expense of the Milwaukee port, the entire Great Lakes system, and the taxpayers of the United States of America.

These diversions of cargo fly in the face of the agreement made last year between the Department of Agriculture and the Agency for International Development on the question of cargo allocation.

We understood the agreement to be that cargo would not be diverted from the Great Lakes port to another coast in order to satisfy the 50-percent requirement. Let me say that was only a 50-percent requirement. This one is going to be 75 percent. However, I have learned from the Department of Agriculture's Agricultural Stabilization and Conservation Service that the Department does not take cargo preference requirements into account when accepting bids for the shipments of grain. One must then assume that due to the administrative burdens this type of diversion will continue unless steps are taken now.

This diversion of cargoes out of the lakes has been absolutely disastrous for the economies of the Northeast and Midwest. This amendment, this so-called compromise—I guess the votes are here for it—makes matters worse and comes at a time when shipping on the lakes is at the lowest ebb in modern times, when it is dying. Figures recently released by the Lake Carriers Association indicate that the shipments of grain, iron ore, and coal are down 23 percent to 13,265,558 net tons—down—from last August. For the entire shipping season, bulk movements on the lakes are down 20 percent from last year, from last year only—to 67,896,478 net tons.

Listen to this, may I say to my friend from Minnesota. In August, grain shipments—and my friend from Iowa is not on the lake but is closer to the lake than to either coast—fell 56 percent at a time when we face the most tremendous surplus in the history of our country.

I want to say this: If this is a compromise, I hope we do not make many more such compromises on this bill, because this compromise is absolutely and 100 percent utterly destructive to the interests of the Farm Belt of America, to the Great Lakes States, and to shipping on the fourth sea coast of this country. I would like to suggest in conclusion that there are many policy arguments that have been made on this floor by other distinguished Members, my friend from Missouri and others. There are over 30 organizations in the United States of America that do not think much of this compromise, including the American Farm Bureau, the Chamber of Commerce, every major port in the Great Lakes, and some of the major economic interests in the country. If this is being represented on this floor as a compromise to seek a solution to the problems inherent in what has happened in a recent court case and the problems caused by cargo preference laws in this country, then I think it is a poor compromise and one not in the interest of the taxpayers of the country, the farmers of the country, or the economy of the Midwest for sure.

Mr. BOSCHWITZ. Will the Senator yield, Mr. President?

Mr. DIXON. I yield.

The PRESIDING OFFICER. The Senator from Minnesota.

Mr. BOSCHWITZ. I want to rise and agree with my colleague from Illinois. This is not our compromise. None of us, as the Senator pointed out, were involved in this so-called compromise. One of the reasons that we were not is it really causes difficulty on the Great Lakes ports. As the Senator from Illinois pointed out, our share of the shipments will certainly decrease. Our share of the shipments is not now the cargo preference portion. Fifty percent of the Public Law 480 shipments have to go to cargo preference and American bottoms, and 50 percent can go on foreign bottoms. As the Senator from South Dakota pointed out, indeed, there is a difference of freight rates of three and four times. On the Great Lakes we get the 50 percent that goes on foreign bottoms. They come into our ports. There is no really American flagship that comes into the Great Lakes or certainly not in large enough numbers to carry much of that freight. So by reducing the amount that could be carried by foreign flag from 50 percent to 25 percent, we on the Great Lakes will suffer. The Port of Green Bay says it will have to close. The Port of Duluth—and perhaps they are exaggerating a little bit, I do not know—says it will also be very seriously injured.

They talked about closing at least that portion of the port that would deal with these matters. We get mostly the liner vessels. We get mostly the freight that is bad, and not the freight that goes into the bulk cargo. The liners come. That, of course, is in the way of better freight to handle because it has to be loaded with considerably more labor involved. But we point out, and I join my friend from Illinois, in saying that we were getting 18 percent of the whole before. Now we simply cannot continue getting 18 percent when only 25 percent is available. That means that the Great Lakes, the breadbasket of the Nation, as the Senator from Illinois points out, is going to be very, very seriously injured.

I point out, too, to my colleagues that while this is called a compromise, not all of us were allowed to participate in the process to compromise. I tried to join the compromise on a couple of occasions and was denied access to negotiations. Indeed, I would have liked to because of the interests of the Great Lakes needed to be protected. Mr. President, does the Senator from Illinois wish to comment?

Mr. DIXON. Mr. President, I wonder if my friend from Minnesota—who I think has interests common to Illinois—will yield for a question on this?

Mr. BOSCHWITZ. Yes.

Mr. DIXON. I am at the mercy of the Parliamentarian about the correctness of this question. But I am advised, may I say to my friend from Minnesota, that we might still be able to divide this issue by asking for the yeas and nays on the Stevens amendment which has not been discussed and, thus forcing a question before this Senate on the pure Stevens amendment?

I think we separate the men from the boys by that process more readily. I wonder whether my colleague who now has the floor might want to ask for the yeas and nays on the Stevens amendment dividing that issue from the rest of this. We would then shear some of the foliage off of the trees, and we might set to a Great Lakes amendment that has been blocked by the process presently under consideration. If I am not correct about that, I would join with my colleague from Minnesota in asking for the yeas and nays on the Stevens amendment.

Mr. COCHRAN. Mr. President, point of order.

The PRESIDING OFFICER. The Senator from Mississippi.

Mr. COCHRAN. Parliamentary inquiry. Before the yeas and nays can be ordered on the Stevens amendment,

would it not be in order only to order the yeas and nays on the pending amendment? The pending amendment, incidentially, is a Stevens amendment but it is not the Stevens amendment referred to by the distinguished Senator from Illinois.

The PRESIDING OFFICER. The Chair is advised there are two Stevens amendments pending. It is unclear from the nonparliamentary inquiry of the Senator from Illinois as to which Stevens amendment he is addressing.

Mr. DIXON. Is the last Stevens amendment amendment No. 917, may I ask the Chair?

The PRESIDING OFFICER. The Senator is correct.

Mr. BUMPERS. Mr. President, the pending parliamentary inquiry still exists, I think. If the Chair answered it, I did not understand it. The answer to the parliamentary inquiry of the Senator from Mississippi was, is it in order to ask for the yeas and nays now while the present Stevens amendment is pending, and the yeas and nays have not been ordered on it? Is that a correct statement?

The PRESIDING OFFICER. The yeas and nays are only in order on Amendment 917.

Mr. BUMPERS. Is that the pending amendment?

The PRESIDING OFFICER. That is correct.

Mr. BOSCHWITZ. Mr. President, may I ask the Chair in that case. The yeas and nays are therefore ordered on the Stevens amendment, as the Senator from Illinois is seeking?

The PRESIDING OFFICER. As of this point, they have not been ordered on any amendment. They are in order. They have not been ordered.

Mr. DIXON. I might say that I think what my colleague from Minnesota and others here like myself might be concerned about is whether my requesting the yeas and nays on the last Stevens amendment—which I understand the clerk is saying is 917 and the one that would first be considered on a request for the yeas and nays—might open this whole process once again for consideration of a further amendment by the distinguished Senator from Minnesota, and others of us like-minded who might want to put an amendment on here to protect the interests of the Great Lake States that are otherwise blocked by filling the tree, as they say here, under the process employed at this point in time.

The PRESIDING OFFICER. The ordering of the yeas and nays would not permit additional amendments. It would only ensure that a recorded vote be taken on the yeas and nays on the stated amendment.

Mr. BOSCHWITZ. Mr. President, while my colleague from Illinois determines what the procedural aspects of this should be, some of us may indeed have some other amendments that we will offer in any event to the agriculture bill with respect to cargo preference dealing with fair and reasonable rates that are perhaps making ships that are built abroad qualify for the American plan. We might hope that the distinguished Senator from Mississippi and others would allow that to happen, because cargo preference rates indeed have come down a little bit because, for a short period of time, it was permitted to put the American flag on ships that were built abroad. They did not have to be built in this country. As a result, American-flag ships have been more competitive and their rates have indeed come back. It is interesting to note that this is not a compromise that we were involved in, that it was a compromise among like-minded persons.

As my friend from Mississippi has pointed out, there are indeed some farm organizations that support his position; there are some that do not, on the other hand. They are many and include the Farm Bureau Federation, the Grange, and the American Soybean Association, and other members of the agricultural community that are interested in this endeavor.

I might also point out that because of the abuses that the Senator from Illinois has pointed out with respect to the Port of Milwaukee, a large Great Lakes group has brought a lawsuit. I believe it was brought yesterday against the Federal Government on the basis that it is violating the cargo preference laws by failing to account for the unavailability of U.S.-flag vessels in the Great Lakes. The cargo preference laws generally require that 50 percent of Government cargo be placed on U.S.-flag vessels where those vessels are available.

Unfortunately, they are not available in the Great Lakes. That is why we would be so heavily penalized in the event that 75 percent—not 50 percent but 75 percent—of the shipments would have to be made by cargo preference.

It is interesting that the CBO has estimated that the cost of the cargo preference provisions would double, even though the cargo preference would only go in 50 percent of Public Law 480 cargo to 75 percent, an increase of 50 percent. Yet the cost of cargo preference would double because of the unavailability of American ships. The result would be that American ships would feel they would be able to charge more and they probably could charge more and they will charge more, for all of the additional 50 percent; the rates would go up and the cost of foodstuffs that we would ship would of necessity go down because the cargo preference rules would be so confiscatory.

Over the years, cargo preference has cost over $100 million. Under this new provision, it would be $200 million, perhap even more.

Mr. President, it is perhaps important that my colleagues note that this is not a compromise, that many of us are not involved in the process of compromising despite our best efforts to be so involved, that the cargo preference rules which now penalize many ports, particularly in the Middle West, would become even more confiscatory, and ports in our neck of the woods are even talking about closing.

Mr. ZORINSKY. Mr. President, I would like to ask the sponsor of the amendment (Mr. COCHRAN) a question concerning the intent of this so-called compromise.

Are any additional moneys required as a result of this compromise if they are advanced from the Department of Agriculture? Is there any discretionary ability for the Department of Transportation not to repay the Department of Agriculture?

Mr. COCHRAN. Mr. President, it is the intention of the sponsors of the amendment, according to my understanding, that the additional costs attendant on this program would be paid for by funds appropriated to the Department of Transportation. It is stated in a description which has been included in a letter sent to all Senators that if funding for cargo preference is not available within the Department of Transportation and is not obtained within 90 days of certifying unavailable, the compromise will terminate. What that means, as I understand it, is that the maritime industry would feel free then to pursue its effort to enlarge the scope of cargo preference to not only the concessionary sales programs such as Public Law 480 but also blended credit, PIK, BICEP and these other programs that are either financed or arranged by the Department of Transportation or the Commodity Credit Corporation.

Mr. ZORINSKY. Is the Senator indicating that will leave the Government free to do what it can do right now, even if this compromise were not to pass? Is that correct?

Mr. COCHRAN. That is my understanding. The compromise would not be effective because the Government would not have kept its part of the bargain. The administration would not have fulfilled its responsbility to provide the funding for these additional percentages. We want to be sure that this additional cost does not come out of funds appropriated to buy food and grain that would be shipped under Public Law 480.

Mr. ZORINSKY. But any additional costs incurred as a result of this compromise will in no way be borne by the Department of Agriculture budgetary allotment?

Mr. COCHRAN. That is the intent of the sponsors and that is my understanding.

Mr. ZORINSKY. I thank the Senator from Mississippi.

Mr. President, I am concerned about increased cost borne by the taxpayers of this country. I am concerned about the cost of subsidies to the maritime unions and maritime industry. Yet, by the same token, I am cognizant of what happens during an emergency when we might not have the ability to transport U.S. goods via vessels of our own Nation.

Yes, we are paying a subsidy to the maritime industry, but, in order to retain the capability for this Nation to transmit via oceans and waterways, without requiring foreign-flag ships at a time of emergency or war to dictate to this country—in some instances tantamount to blackmail—the terms of our own survival or continuance, of our own existence.

I know many of my colleagues have said, "Fine, we will agree to that. Put martime subsidies in the defense budget if that is where you believe they belong." But let me point out to my colleagues that we do subsidize agriculture, to a degree. We do subsidize Amtrak to a degree. We do subsidize the Interstate Highway System of this Nation to a degree. We do subsidize, to a degree, the airline transportation system of this country. We subsidize many other aspects of our economy that we look at as a system to serve the citizens of our country. I view maritime subsidies in that way. If these subsidies do not adversely affect the farmers of our country and our ability to sell food to the rest of the world, I support them.

Now, the Public Law 480 program is a meritorious program, a good program, and we will undoubtedly have some amendments offered to increase the scope of that program. But our priorities sometimes get lost in this Chamber. Let me ask this question of the Senator from Mississippi. The additional cost of this program will be an additional $50 to $60 million; is that correct?

Mr. COCHRAN. If the Senator will yield, once the program is phased in over a 3-year period, it is estimated that the cost will be from $40 to $60 million a year.

Mr. ZORINSKY. I thank the Senator. Now, let me put this in perspective, Mr. President. This year the U.S. taxpayers, in all their wisdom, get to build a $10 million pavillion in Brisbane, Australia for the Australian world's fair. Now, that is really neat. While we are arguing about a subsidy of $50 million to maintain the capability to deliver goods to our own troops in time of war or in an emergency, we are spending $10 million on a world's fair in Australia. I think our perspectives are out of order.

I have a letter here that is being disseminated by the Department of Agriculture. John Block signed the letter. He indicates that this provision is costly, it is going to increase the cost of programs. Somebody brought up in the debate a few minutes ago the fact that we had a PIK Program that cost $18 billion. John Block was not forced by the Senate or the Congress to spend $18 billion on a PIK Program. But now he is telling us that $50 million may be a tad too much to spend. My mother tought me a long time ago that $18 billion is a lot more money than $50 million. I would submit to you, Mr. President, if this administration without congressional mandate can spend $18 billion of the taxpayers' money, how can Secretary Block tell us that $50 million is too much to spend for a program of this type? We spent over $90 billion in NATO last year. Now, to get to NATO I understand you have to cross an ocean. There is something called the Atlantic between our country and 380,000 American troops stationed over there.

I think it would be incumbent upon each and every one of us to want to be able to provide those troops some backup if, in effect, we needed to use the sealanes to deliver some of that support.

The current provisions of S. 1714 would exempt from cargo preference laws the export activities that the Commodity Credit Corporation carries out under its charter act and the export promotion activities that the Secretary of Agriculture and the CCC may carry out under other laws. The exemption in the bill, however, would not extend to exports under the Agricultural Trade Development and Assistance Act of 1954—which is commonly referred to as Public Law 480—and section 416 of the Agricultural Act of 1949.

The cargo preference provisions in the bill are the same as those in S. 721, which was reported by the Agriculture Committee and sequentially referred to the Commerce Committee. The Commerce Committee issued an unfavorable report on the bill in which it cited, among other things, the need to provide assistance to both U.S. agriculture and its merchant marine.

The amendment offered by Senator COCHRAN is intended to meet the concerns of the Commerce Committe and is supported by numerous agricultural and maritime organizations.

As a result of some of the hysterics displayed on the floor of this Senate as recently as 2 or 3 hours ago, I checked with the corn growers in Nebraska and the wheat growers and they support this compromise, so when somebody says the agricultural organizations are unanimous in opposition to this, I think that is an erroneous statement. At best, I think they are probably divided on the support of this compromise.

I commend Senator COCHRAN, Senator STEVENS, and Senator INOUYE for their efforts in working to develop an amendment to resolve this controversial issue.

The cargo preference laws of the United States are intended to help maintain a strong merchant marine and are in the best interest of the country. However, a recent Federal district court decision has created a serious problem in the area of the shipment of agricultural commodities under certain government programs.

The court held that the cargo preference laws of the United States apply to the Commodity Credit Corporation's blended credit program. Because of this decision, the Department of Agriculture suspended approval of financing under the program of export sales of grain to Egypt, Iraq, Morocco, and Tunisia, totaling 3.6 million metric tons, and has not reinstituted the program to date.

Prior to the court decision, the Department of Agriculture had been abiding by an Attorney General's opinion that held that ocean shipments of commodities financed by the Commodity Credit Corporation under its direct credit, blended credit, or loan guarantee programs were not subject to the 50 percent U.S.-flag vessel rule of the cargo preference laws.

The blended credit program was developed to promote the expansion of agricultural exports. The Commodity Credit Corporation created the blended credit program by combining the export loan guarantee program—for loans made by private lenders at commercial interest rates—and the program for direct interest free loans.

By combining these programs, the interest rate was effectively lowered by about one-fifth. This resulted in an effective price discount of about 3.4 percent to foreign countries that purchased our agricultural commodities. Such a price discount clearly provides incentives for other nations to buy U.S. agricultural commodities.

The provisions of S. 1714 would set out clear criteria under which the cargo preference requirements would be applicable to agricultural exports and would remove any question as to their inapplicability to the Department's Blended Credit Program.

The amendment offered by Senator COCHRAN will essentially maintain the provisions in S. 1714 that exempt shipments under the Blended Credit Program and other programs carried out by the CCC and the Secretary that enhance commercial export sales of U.S. agricultural commodities.

The amendment also would continue the application of the cargo preference requirements to shipments under Public Law 480 and section 416 of the

Agricultural Act of 1949, as well as other foreign donation or concessional sales programs carried out by the CCC and the Secretary. In addition, the amendment would require that an additional 25 percent of the gross tonnage of commodities shipped under such programs be shipped on U.S.-flag vessels and would require that a minimum tonnage of commodities be shipped under such programs each year. The expansion of cargo preference would be phased in over the next 3 calendar years.

Under the amendment, the increased ocean freight charges resulting from the expansion of the cargo preference requirements would be financed by the Secretary of Transportation. The Secretary of Transportation would also reimburse USDA and the CCC for any amount of the cost of ocean freight and freight differential charges on exports under these programs that exceed 20 percent of the total cost of the programs in any fiscal year. The funding by the Secretary of Transportation of such cost would be through new borrowing authority from the Treasury.

Quite frankly, Mr. President, I would have preferred that the Senate agree to the language on cargo preference in the committee reported bill.

I am greatly concerned that the increased expenditures required under the amendment may complicate the administration of the export programs carried out by the Secretary of Agriculture and the Commodity Credit Corporation. Too, I find it disturbing that the amendment contains a provision under which cargo preference would revert to the status quo if the additional funds are not available.

However, in the spirit of compromise and with the hope that the Senate can enact a farm bill that will be meaningful to our Nation's agricultural producers, I support the Cochran amendment and urge my colleagues to join me in voting for it. The amendment is intended to help promote the export of U.S. agricultural commodities and strengthen this Nation's merchant marine.

Mr. President, I do not think it is excellent policy to subsidize any industries, but I believe we should have ships with American flags flying over them.

Just the other day I read that we are seriously considering, because of the jam we are in in the Philippines, spending $1.2 billion to beef up the defenses around Subic Bay and Clark Air Force Base. We should. But let me point out that the expenditure is for defensive reasons. It is in the best interests of this country to spend those funds. Likewise, it is in the best interests of this country to be able to retain a merchant marine fleet that is capable of doing things for themselves.

The problem with this country and the attitude of a lot of people is getting somebody else to do it for you. Once we get other ships to do it for us, we will find out that the only capability we have left is to beg other countries for the use of their equipment, regardless of what it costs, $50 million then will look like a tremendous bargain to us.

Mr. HARKIN. Mr. President, will the Senator yield for a question?

Mr. ZORINSKY. I yield for a question to the Senator from Iowa.

Mr. HARKIN. I thank the Senator from Nebraska for yielding on that point.

I see from the proposed amendment that the wording is that the increased share in cargo preference requirements will be through the establishment of a borrowing authority within the Department of Transportation. If I understand correctly, right now there is over $100 million a year that goes out of the Department of Agriculture's budget for cargo preference.

I understand that my friend from Nebraska spoke about the need for a domestic maritime industry, for a strong merchant fleet. I support that, too. I have been swayed by the arguments that this country needs a strong merchant marine fleet.

For the life of me, I do not understand why this money comes from the Department of Agriculture. Why should not this money come from the Department of Defense? We are talking about the defense of this country.

Is my friend from Nebraska contemplating an amendment? I am. I guess the amendment tree is closed for now, but assuming that this amendment is adopted, I have an amendment ready that would shift all cargo preference funding from the Department of Agriculture to the Department of Defense.

Mr. ZORINSKY. In reply to the Senator from Iowa, I say that my support of this compromise is based on my original support of the amendment that we initially had in committee. As the Senator knows, S. 1714 is a bill drafted by a fragile coalition. I supported the retention of cargo preference but not the expansion of the cost to agriculture. This compromise does not expand cargo preference at the expense of agriculture.

I agree with the Senator, however, that cargo preference should be a responsibility and an expense of the Defense Department. Cargo preference is very germane to the defense and the security of this Nation. Maybe this compromise will set a format and announce that enough is enough to agriculture. Let us put the costs where they belong, and that is in a different department of Government. I agree with my friend; and if he offers an amendment of that nature, I would be happy to cosponsor it.

Mr. HARKIN. I thank the Senator.

Mr. ZORINSKY. I yield the floor.

Mr. DIXON addressed the Chair.

The PRESIDING OFFICER (Mr. CHAFEE). The Senator from Illinois.

Mr. DIXON. Mr. President, I am perfectly aware of the fact that the votes apparently are here for this so-called compromise.

I have been in the Senate long enough to know that, unlike other deliberative bodies, speeches do not make much difference here with respect to the result. So I do not know what I hope to accomplish by saying more things.

However, although I have been in the Senate only about 5 years, I have been in the legislative process about a quarter of a century and in public life for 35 years. In that time, I have been involved in a lot of accommodations. I have been a party to a lot of compromises. I recognize that compromise is the lifeblood of the legislative process, and not much gets done without compromise. But I want to say that this is the most peculiar compromise I have ever looked at. Let us talk about the compromise from the standpoint of what a compromise is.

If you are the taxpayers of America, how do you like this compromise? Before, as taxpayers, you paid at least $100 million through the Department of Agriculture for cargo preference. I may be off by a few million dollars, but $100 million is still not chicken-feed. That is what you paid for cargo preference before we had the compromise. With the compromise, you get to pay more. You get to pay 50 percent more.

I appreciate the view of my friend from Nebraska, who says it is not out of the Department of Agriculture. No, this time it is out of the Department of Transportation. I suspect that the American taxpayer, who has to pay for it, will be hurt just as badly.

So from the standpoint of cost, how is this a compromise? The compromise is a honey. It costs you 50 percent more than it cost you before. What a delightful compromise.

Mr. BOSCHWITZ. Mr. President, will the Senator yield for a moment?

Mr. DIXON. I yield.

Mr. BOSCHWITZ. Let me say that it may be paid by the Department of Transportation——

Mr. DIXON. I am going to get to that.

Mr. BOSCHWITZ. In a rather convoluted way, by the issuance of bonds and appropriations to pay the bonds, and whether or not all that takes place is a different matter. So the Department of Transportation may not end up paying for anything.

Mr. DIXON. May I say to my colleague from Minnesota that another part of this compromise is that if none of that takes place or all of it does not take place and the Department of

Transportation does not carry the load, then the bottom line on this dynamite compromise is that the law as it now exists, plus the court decision that makes it worse, goes into effect.

If you do not have to pay 50 percent more as taxpayers, you are still going to be worse off because the decision of the court impacted upon the law before will spring into effect and it is still going to cost you more. That is a second part of the compromise.

Mr. BOSCHWITZ. Mr. President, will the Senator yield for a comment?

Mr. DIXON. I am glad to yield.

Mr. BOSCHWITZ. In other words, it is not a total expectation that the Department of Transportation will ultimately pay its portion.

Mr. DIXON. No. That is correct.

May I say to my friend from Minnesota, the amendment further provides that if funding for cargo preference is not available within the Department of Transportation or they cannot create some steam to raise it and it is not obtained within 90 days, then these provisions all go out the window and the law goes into effect as it is on the books, plus the court decision that we vitiated in the Agriculture Committee.

I hope everyone here is following this compromise because this is the only compromise where the taxpayer, American agriculture, Great Lakes shipping, all the ports on the Great Lakes and every Midwest breadbasket State gets hurt every time in the steps of the proceeding. It is a peculiar compromise and I am trying to figure out where we got a piece of the action here.

Mr. BOSCHWITZ. If the Senator will yield once again, it is indicative that none of us from our part of the country were allowed to participate in this so-called compromise.

Mr. COCHRAN. Mr. President, will the Senator yield for a response to that suggestion?

Mr. DIXON. Yes.

Mr. COCHRAN. Let me point out, Mr. President, in response that Senators did not negotiate this compromise. This compromise was negotiated by representatives of the two industries at the request of the Senate majority leader who felt that it was important that the cargo preference controversy be resolved, if it could be, by the industries involved. Representatives of those industries came together and for months met and went over the options to try to work out a compromise that could be supported by those representatives. So neither the Senator from Minnesota nor this Senator, nor any other Senator that I know anything about, was directly involved with industry groups in developing the compromise.

A proposal was suggested and then Senators began to review it to decide whether or not it should be offered as an amendment.

Mr. DIXON. Mr. President, will my friend, who I yielded to for that statement, mind very much?

May I say that I hope that my friend from Mississippi understands that nothing in this discussion diminishes in any way my high regard for him, my affection for him or my sense of complete confidence in everything that the Senator does. It is only a disagreement over an issue on this floor. I hope my colleague and friend understands that.

But who are the two industries that crafted this compromise?

Mr. COCHRAN. If the Senator will yield, I appreciate his comments and I thank him for his generous statements.

Let me say that the maritime industry as represented by many individual entities was represented—I do not know the names of all the representatives who were there. The agriculture industry which, as my good friend knows, includes many groups and organizations throughout the country, all regions, were represented. I can say that the entire maritime industry has signed off in support of this proposal as represented by the Joint Maritime Congress, MIRAID, Transportation Institute. This represents shipbuilders, maritime unions, those who are employed aboard ships, as merchant mariners. They all support it.

Among the agriculture groups who support the provision——

Mr. BOSCHWITZ. Mr. President, will the Senator from Mississippi yield for a question?

Mr. COCHRAN. I am trying to respond to the Senator from Illinois and I am sure he will yield to the Senator for a question.

Mr. BOSCHWITZ. The Senator said all the maritime interests. Did the Great Lakes maritime interests agree?

Mr. COCHRAN. I am listing those who have agreed and I am told that this represents the maritime industry of the United States. I am sure the Senator may know of some who do not support it.

Mr. BOSCHWITZ. Yes, there are Great Lakes maritime interests who do not support this.

Mr. COCHRAN. Among the agricultural groups who do support the compromise are the Five State Rice Producers Legislative Group, National Association of Wheat Growers, National Corn Growers Association, National Cotton Council of America, National Council of Farmer Cooperatives, National Farmers Union, National Grange, and Rice Millers' Association.

Mr. DIXON. I say to my distinguished colleague from Mississippi——

Mr. BOSCHWITZ. Will the Senator yield for a question?

Mr. COCHRAN. I yield.

Mr. BOSCHWITZ. I also want to read the list of those who do not agree with the compromise. It is interesting to note that our good friend from Mississippi for whom I have the same high regard, as the Sentor from Illinois does, noted that this is not a compromise forged here by Senators but this is a compromise that has been forged by the disparate parts of the industry.

Here is a list of organizations that are agricultural related organizations, or interested in sending food throughout the world who are against this: American Farm Bureau Federation, American Soybean Association, Bread for the World, CARE, Interfaith Action for Economic Justice, Millers' National Federation, National Grain Trade Council, National Grain and Feed Association, National Soybean Processors Association, North American Export Grain Association, Port of Duluth, Port of Milwaukee, Port of Toledo, the Fertilizer Institute.

I have the Grange on my list as well. They are perhaps on both sides of this issue. That sometimes happens in these matters. In addition, the Toledo Board of Trade, the U.S. Chamber of Commerce, and the Western Great Lakes Maritime Association, which is the one that I referred to a little bit earlier, as well as the administration, also oppose the Cochran proposal. Let me repeat, the Reagan administration does not favor this so-called compromise.

Mr. DIXON. I thank my friend from Minnesota and my friend from Mississippi, both of whom contribute so much here on the floor and in the Agriculture Committee to everything we do.

I will just pursue my course a moment further by saying I do not have any problem with compromises. But this is the strangest compromise I ever saw. It may very well be that agriculture and the maritime industry talked but nobody in agriculture or the maritime industry from the great Midwest, which is the breadbasket of America, apparently was allowed in the room or participated in the conversations.

I want to repeat again you have a compromise here that is going to cost the American taxpayers—I see my good friend from Oklahoma over there who shares my concern about those sorts of things—going to cost the American taxpayers 50 percent more than it used to cost. Thus, in a time of budget deficits, in a time when this year we are cutting back the farm bill dramatically, at a time when American agriculture is devastated, at a time when the farmers are crying out in pain, we have a deal here that is going to increase cost to the taxpayers and to the economic community of our country at least 50 percent. It is not

going to reduce charges to agriculture. It is going to be just as much. Everything over is going to go to the Department of Transportation.

Probably that might not work. That will put us back in the state of law that exists on the books today with the opinion of the district court impacted upon it.

I am told—may I say—that when they close the Great Lakes in the winter-time the cost of shipments go up about $40 a ton. This bill is just as good as icing over the Great Lakes. When you pass this bill, you have a 12-month winter in the Midwest. You have iced the lakes. You have iced the seaway. That is what this bill does. I want to predict this on the floor today because it is going to happen. This bill is going to drive up the costs all over America and all over the world of the cost of shipping American goods dramatically.

And so in this compromise we have apparently achieved a piece of legislation that will hurt the taxpayers, will hurt the price of all our products, will destroy the Great Lakes shipping industry, will kill all the ports on the Great Lakes, strike a body blow against the Midwest and against the breadbasket of America, and otherwise does unbelievable mischief, and it is the most remarkable compromise from that standpoint that I have ever seen.

In most compromises everybody walks away and says "I do not like it all but I got part of what I wanted." I meant where were we, may I say to my friend from Minnesota, when this compromise was made? We got killed.

Mr. BOSCHWITZ. If the Senator will yield, I think the majority leader is very shortly going to address that question of where we were during this compromise process, but the Senator has brought out a most interesting point, that, when the Great Lakes close for the winter, all shipping rates on all the coasts go up.

Mr. DIXON. That is right.

Mr. BOSCHWITZ. So if you increase cargo preference to 75 percent and effectively take out the competition of the Great Lakes, all the rates on all the cargo preference cargo are going to go up. That is why the CBO estimates that the cost of this amendment is equal to the cost of the first 50 percent. This is because the rates on 75 percent of the shipments will go up.

Mr. President, I know that my friend from Nebraska said that he wants to have a good maritime service, and so do I. But if you look at a list of the ships—and I must say that that list is becoming somewhat more modern—that American-flag vessels are certainly not in as bad condition as they were a few years ago—but by and large it is a list of elderly ships, 15, 20, 30, even 40 years old. These are not ships that could be realistically used in the event of hostilities.

It is also important to note, as the Senator from Illinois pointed out, that whether or not this cost is ever assessed to the Department of Transportation is indeed questionable. First, the USDA has to make payments for the additional freight during the course of the year. Then there is kind of an accounting with the Department of Transportation at the end of each fiscal year. At that point, the Department of Transportation would issue bonds in order to pay back the Department of Agriculture and hopefully at some later date there is an appropriation to pay back the bonds that are used to pay back the Department of Agriculture. It may well be that for the first 2 years the moneys simply come out of the agricultural fund.

I might also say that if in this bill we are successful in making our loan rates competitive on world markets, we may indeed achieve things that some of the USDA Credit Programs have been unable to achieve and thus they may become less important.

So saying that Judge Green's decision does not apply to those programs, hopefully, will become academic because we will be able to again be competitive on world markets.

I also agree with my friend from Illinois that this is the doggonedest compromise that I have ever allegedly been involved in, although in fact I was not involved in it. I yield the floor.

Mr. BUMPERS. Mr. President, I rise in support of this compromise amendment to relieve agriculture of a substantial share of the burdens imposed by cargo preference requirements. It is not all that I would have hoped for, but given the political realities, I think it is the most that agriculture can hope to achieve, and thus it has my support. Certainly, half a loaf is better than nothing, and without compromise I am convinced that we will get nothing.

I want to set out some of the recent history of the development of this issue for the edification of my colleagues. On February 21 of this year, the U.S. district court in Washington, DC, ruled that cargo preference requirements applied to the Blended Credit Program. On February 26 of this year, the Secretary of Agriculture pursuant to the court's decision declared that he was suspending approval of all registrations for Blended Credit Programs for countries of Egypt, Iraq, Morocco, and Tunisia, and that he was effectively negating some of the half a billion dollars' worth of grain exports. The USDA made this decision because it believed that it was abiding by a 1963 Justice Department opinion, which exempted direct credit, blended credit and other credit guarantee programs from the requirements of cargo preference. The recent court ruling not only refutes this, but states that cargo preference probably extends beyond just applying to blended credit and is also applicable to the GSM102 Program, which is a Credit Guarantee Program and one of the components of blended credit.

The extension of cargo preference was a disaster for our farmers and agricultural export interests in the United States. For this reason, I cosponsored S. 721 offered by Senator BOREN which would limit the expansion of cargo preference. Under S. 721, the applicability of cargo preference to such historical programs as Public Law 480 was not affected. The applicability of cargo preference even under the Public Law 480 titles has been a burden on agricultural exports. Payments for cargo preference have been borne by the Department of Agriculture and the additional costs of shipping on U.S.-flag vessels under Public Law 480 were $77.6 million in 1983, $97.5 million in 1984, and are estimated to run nearly $120 million in 1985. The extension of cargo preference to the Blended Credit Program will probably cost another $70 million out of the USDA budget. If the GSM102 Program is later found to be subject to cargo preference, $125 million will be needed for additional shipping costs.

For the survivability of the Blended Credit Program, it is necessary that cargo preference requirements be excluded. If cargo preference was applied to blended credit, the landed cost of U.S. grain would increase 15 to 30 percent and this would far exceed the benefits derived by a 2-percent interest buy-down provided to buyers through the Blended Credit Program. Since the rendering of this decision and the halting of the Blended Credit Program by the USDA, U.S. grain interests have already lost half a billion dollars' worth of sales in 1985. Without question, the costs associated with cargo preference subsidies are also reflected in lower farmer income, high farmer program costs, and lost income to export associated industries. It has been estimated that the additional cost of shipping on U.S.-flag vessels as required under the cargo preference requirements translates into $0.80 per bushel for wheat, $0.76 per bushel for feed grains, and $0.80 per bushel for soybeans.

Mr. President, those of us who have great concerns about cargo preference requirements must be realists. Clearly, the farmers in my State would like to see us go further in relieving the cargo preference burden, but I think they also understand that none of the cargo preference burden will be lifted without compromise. Therefore, in the interest of reaching an effective compromise that will be a benefit to the American farmer, I am supporting the compromise position on cargo preference. It is imperative that we get the Export Program, most particularly the

Blended Credit Program, off the ground again. And this cargo preference compromise will allow the Blended Credit Program to proceed without the requirements of cargo preference. Also, the threat to the GSM102 Program will be eliminated. Although I do not believe that this compromise is the best solution, I believe it is the best possible compromise that Agriculture could receive. Under the compromise, increases in concessional type program costs will be borne by the Department of Transportation, and in an important provision for Agriculture, the total cost to the Commodity Credit Corporation of ocean freight and the ocean freight differential will not exceed 20 percent of the total cost of the export programs covered by cargo preference. Any costs in excess of this 20 percent in any fiscal year will have to be funded by the Department of Transportation. Most importantly, under the terms of the compromise, the requirements of the Cargo Preference Act of 1954 will not apply to the USDA's commercial type export programs, in particular the Blended Credit Program, the export PIK or BICEP Program, or future similar programs.

Mr. President, I hope that the Senate will adopt this compromise. I think it is the best that Agriculture can hope to achieve, and for this reason it deserves our full support.

Mr. President, as a former trial lawyer—and the Senator from Illinois is a former trial lawyer and we used to settle a lot of lawsuits—you settle lawsuits on two bases. One, you do not get as much as you think you are entitled to and, second, you get more than you are afraid you are going to get if you go to trial.

Now, if we are going to get into a contest here on who loves farmers more by saying this is not perfect for farmers, or if you happen to be on the other side of the issue and for the maritime people, then, of course, you can just say no. You can vote no for a whole host of reasons.

But it seems to me that a no vote in this case is contrary to one's intent to show that you either love the maritime unions or the maritime forces of this country or you love the farmers. It seems to me you are contradicting yourself because if this is defeated, certainly grain export programs are going to be threatened. We have already lost a half billion dollars in sales because the Secretary has suspended all blended credit sales.

The cost of shipping U.S. grain will increase under the Blended Credit Program, if we do nothing, by 15 to 30 percent. And that far exceeds the benefits derived by a 2 to 4 percent interest buydown provided buyers through the Blended Credit Program.

Now, I do not like it all, either. I have never favored cargo preference because it places an unfair burden on our farmers. Extending cargo preference to commercial credit sales only increases the burden.

But here is a program that has been carefully crafted and it ought to be accepted. It is not perfect. It is not what everybody wants. But if you are interested in the farmers it is the best game in town because it has been estimated that the additional cost of shipping on U.S.-flag vessels, as required under the cargo preference requirements, translates into 80 cents per bushel for wheat, 70 cents per bushel for feed grains, and 80 cents a bushel for soybeans. So do not vote no on this and then go home and tell your farmers how much you love them.

It seems to me that it is not perfect from anybody's viewpoint, but it is the best that can be accomplished. So Mr. President, with some of the same reluctance that has already been expressed here on both sides and with certain reservations, I intend to support the compromise because I think it is a very legitimate effort that serves the interests of all parties.

If we do nothing, the district court decision is going to dictate to us. How many of you have made speeches back home attacking Federal court decisions? I daresay there are not many Senators here who have not made those speeches. And to vote no on this is to say that the district court decision, which most of us disagree with, is going to stand and the farmers are going to suffer as a result.

Mr. NICKLES. Will the Senator yield?

Mr. BUMPERS. Yes.

Mr. NICKLES. I wholeheartedly agree with the Senator's statement that we need to overturn the court's decision. But is the Senator aware of the fact that in the committee bill we have language that does exactly that, that we overturn that judge's decision? Basically, what we do in the committee bill I believe is very much a compromise position, very much a middle-of-the-road position. It lets us keep half of Public Law 480 under cargo preference and not have all the Blended Credit Programs and everything else thrown under cargo preference. So that is already provided for in the committee report language.

Most of us that are arguing on this side in opposition to the amendment of the Senator from Mississippi basically are trying to keep exactly to the language that is in the committee bill, which does overturn the court's decision.

Mr. BUMPERS. I support that position. But the Senator from Oklahoma knows that position is not going to prevail.

Mr. DIXON. Will my friend from Oklahoma yield?

Mr. NICKLES. I believe the Senator from Arkansas has the floor.

Mr. BUMPERS. That is all I will say. The Senator asked if I would yield for a statement and I am appreciative. The Senator from Oklahoma and I have both voted the same way on cargo preference many times in the last few years.

But the realities are that the Agriculture Committee's position is not going to be upheld here. I believe the Senator from Mississippi recognizes that, along with some of his colleagues who have crafted this compromise.

However, if this compromise goes down and the bill is left in its present state as to cargo preference, I will be very pleased. But as an old trial lawyer who used to settle lawsuits, this is the best compromise you are going to get. It is a half loaf, but it is better than no loaf at all.

Mr. DIXON. Will my friend from Oklahoma yield?

Mr. NICKLES. I am happy to yield.

Mr. BUMPERS. I have the floor.

I yield the floor.

Mr. DIXON. I apologize to my friend from Arkansas.

Mr. DIXON addressed the Chair.

The PRESIDING OFFICER. The Senator from Illinois has the floor.

Mr. DIXON. Does my friend from Oklahoma know what happened in the Agriculture Committee concerning this important issue? I recognize he is not a member of that committee.

Mr. NICKLES. I am not. I compliment my friends, the Senator from Illinois, the Senator from Mississippi, and the Senator from North Carolina, because I think you came up with an outstanding resolution to this complicated issue in the Agriculture Committee.

Mr. DIXON. May I say to my friend from Oklahoma—and I wish to be corrected by my distinguished chairman of the committee, the manager of this bill—my recollection is—it was unanimously done in committee. Am I correct; may I ask the chairman of the Agriculture Committee if that is not a fact?

Mr. HELMS. For once we were unanimous.

Mr. DIXON. May I say to the chairman of the Agriculture Committee, there was not more than one or two issues that I can recall in 6 long, arduous months of hard work and hundreds of hours of discussion that we agreed upon. But I wish to say to my friend from Arkansas, the one thing that was done unanimously in the committee was, we settled this problem in the committee. So I wish to say again to my trial lawyer associate, this again is an example of what kind of a compromise this is.

We settled the issue by 17 to zip in the committee, and now we have a compromise. I wonder why. It was not 9 to 8. It was 17 to zip.

Now, I agree with my friend from Arkansas, I have tried a lot of lawsuits in my time. But when you have the law and the facts and everything else going for you, I do not know why you settle later. This issue was resolved. It was resolved satisfactorily. There was nothing the matter with the resolution of the problem in the committee.

It is in the bill now, I say to my friend, the manager of the bill, in the proper form.

Mr. ZORINSKY addressed the Chair.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. ZORINSKY. Mr. President, I agree with my colleague from Illinois. It is in the bill. S. 1714 is a very large bill. It has a lot of pages in it, and I hope everybody has read it from cover to cover. [Laughter.] It took us 4 months to arrive at this bill. The Senator is absolutely right. The cargo preference provision is in this bill. Many other good things are in this bill. But the only way this bill was able to be reported, making it possible for us to debate this particular amendment, is because there was a coalition of many interests formed. I think this is a good bill.

I think we ought to go to third reading, final passage and pass it. I think we can go to conference, where this is ultimately going to be resolved anyhow. It will save the taxpayers time and money. But that being as it may, the Senator from Illinois and I and many others in this Chamber know that this bill will not remain unmodified. A fragile condition brought the bill to the floor.

I am aware the Senator from Illinois voted for this bill. There are many items in here that he is opposed to. Likewise, I am opposed to some of the provisions. Some are good. But as the Senator from Arkansas so ably pointed out, sometimes you have to vote 60 percent, yes; 40 percent, no. You cannot do that on this floor. Therefore, you have to be realistic and do what can be done. I think right now there is a big debate going on concering provisions of the Gramm-Rudman-Hollings budget amendment. But you know, you have to do what is doable and not what is wishable.

Mr. DIXON. May I say, Mr. President, to my friend from Nebraska——

The PRESIDING OFFICER. The Senator from Illinois has the floor.

Mr. DIXON. I am holding the same bill. This amendment is trying to change this bill that the Senator and I have both embraced with so much emotion. So the Senator is trying to damage this bill. The Senator is trying to increase the costs on this bill when the one thing that we are still vulnerable on is that the cost is too high, and we have to bring it down. So I want to know how this compromise is helping in that regard. It looks to me as if it is another nail in the coffin.

Mr. ZORINSKY. Mr. President, let me ask the Senator from Illinois. Did the Senator or did the Senator not tell me he would oppose the referendum for wheat in the bill?

Mr. DIXON. I told the Senator I would vote against the referendum with wheat.

Mr. ZORINSKY. It is in the bill. If it is such a good bill, let's vote for each other's bill. But all I am saying is as a U.S. Senator, the Senator has to do what is doable, not what the Senator wants me to do for him or the Senator to do for me.

Mr. DIXON. I say to my friend, I will vote for the bill if wheat is still in there. Do not worry. The Senator is not helping this bill. The Senator is hurting this bill. The Senator is doing this bill damage. The Senator is putting more costs in this bill.

The Senator is crafting a compromise that is not a compromise. The Senator is taking the same bill that we considered this issue in committee for a long, long time. Every one of us, including those of us on this side who took some heat for it, voted to change the thing, put the cargo preference law back in the old position that it was in, as my friend, the chairman knows. We took some heat for that. It is in here. Now the Senator is putting a compromise on this that is worse than the law used to be. That is not a compromise.

That is a destructive act that does immeasurable damage to this piece of legislation. If I were the President of the United States looking at this legislation with some concern, and I found out that the Senator did this, that it is going to cost the taxpayers more money, going to close ports in the Great Lakes, going to increase the price of the crops, and otherwise do immeasurable harm to the bill, I would not be too hopeful with what we are doing to this bill. If we are doing the same things on the votes, we are doing a pretty poor job of helping this bill along. I do not want help like this.

Mr. ZORINSKY. Let me point out to the distinguished Senator from Illinois that this amendment is the least of the President's concerns. The Senator knows what they are. A bill cost that may be a few billion dollars over budget is one of the President's concerns. The wheat referendum is a separate concern. The Senator and I know what the administration's concerns are about this bill. All the rhetoric on this floor as to what is weakening this bill or not weakening the bill may be good for headlines for the news media, but those that really know the issues at stake realize that this is one of the lesser concerns that the President has concerning the 1985 farm bill.

Mr. HELMS addressed the Chair.

Mr. ZORINSKY. I yield the floor.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. I am tempted to inquire of my two friends if they had any words before they fell out. But I will not do that.

[Laughter.]

Much as I admire the eloquence, certainly the enlightenment, I wonder if it is possible to consider a time to vote on this amendment. I doubt that any votes are going to be changed by prolonged debate. We need to move along. Therefore, with the understanding of the distinguished majority leader, how about 4:15 for a vote? I ask unanimous consent that a vote on the amendment occur——

Mr. ZORINSKY. I object, Mr. President, to the unanimous-consent request.

The PRESIDING OFFICER. Objection is heard.

Mr. DIXON. There are four amendments here, not one. I object.

Mr. HELMS. Look. I am on the side of the Senator.

Mr. DIXON. I know my friend is.

Mr. HELMS. How about 4:30.

Mr. DIXON. Mr. President, may I say to my friend, the distinguished chairman of the committee, there are four amendments here. I object to the unanimous consent that is required to vote on all four of them in one package.

Mr. HELMS. Very well.

I yield the floor.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. DOLE. Mr. President, I thank the distinguished chairman and others. We are now on the third day of the farm bill. I hope we can start voting this afternoon. Once we start that, I think other Members with amendments will be prepared to come to the floor. Let us not get hung up on this first amendment that is going to require a rollcall vote.

I do not support the compromise even though I helped to get the groups together to talk about the compromise. The compromise may finally become the law. I think that would be too bad. But those who put together the compromise were certainly in good faith and they had a problem of trying to get exports moving again.

It seemed to many of the farm organizations as well as those in the maritime industry that maybe they could work out something. They finally did. But the element missing was the administration never agreed to anything. Maybe that is the administration's fault. But it did not happen. Therefore, I have concluded that I will have to vote against the good efforts of the distinguished Senator from Mississippi, Senator COCHRAN, and others, who believe that if we are going to do anything we will have to move very quick-

ly, and resolve this issue. Whatever happens we ought to vote quickly. I think everybody understands the positions of the leading advocates on this issue. Then we can go on to other issues.

The last time I inquired I was informed there were only about 60 amendments left. These are major amendments. Many are going to take a couple of days. I have also been asked by a number of Members about plans for the holidays. It could be that we will still be on the farm bill for another couple weeks. So I commend the distinguished managers for trying to move it along.

Mr. HELMS. Mr. President, I am a little confused by a statement made by the Senator from Illinois about voting on all four amendments at one time. I think the Senator mentioned a unanimous consent. I would inquire of the Chair if there is any such unanimous consent.

The PRESIDING OFFICER. No request was made for four votes to become as one.

Mr. HELMS. With that, we are talking just about the first vote, I say to my friend from Illinois, and if the Senator will permit, to ask unanimous consent that the first vote occur no later than 4:15.

The PRESIDING OFFICER. Is there objection?

Mr. DIXON. Reserving the right to object, and I do not expect to object, Mr. President, do I then understand that the distinguished chairman is prepared to have four separate votes on the four separate amendments that are part of this tree, and his unanimous-consent request is that we proceed to the vote on the first amendment at 4:15?

Mr. HELMS. That would be the normal parliamentary sequence, I say to the Senator.

The PRESIDING OFFICER. Is there objection?

Mr. MURKOWSKI. Reserving the right to object.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. MURKOWSKI. Mr. President, there are at least two Members of this body who are going to be at the White House at 4 o'clock for about 7 minutes. Not knowing just what the traffic time is, I wonder if there is any possibility of making that vote at, say, 4:25?

Mr. HELMS. I shall vote by any time that anybody can agree to.

Mr. MURKOWSKI. I do not want to delay the Senate's deliberation, but 4:15 really hits us right in the middle of trying to get back. It is a very short signing ceremony that is taking place down there at 4 o'clock. I shall defer to the leader.

Mr. HELMS. I shall inquire of the distinguished majority leader. I was not elected majority leader and I am so glad about that.

Mr. DOLE. Mr. President, if you vote right now, you can make it. I do not see any reason to wait until 4:15. It seems to me we have been on this all day. This is only one of several amendments.

Mr. HELMS. That is right. I said no later than 4:15. But I will take it 4:25 or 4:30, just to get the train moving.

Mr. MURKOWSKI. I would vote right now.

Mr. DOLE. Mr. President, I do not know if anybody would object to voting right now. I would vote right now. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

The PRESIDING OFFICER [Mr. PRESSLER.] Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 70, nays 30, as follows:

[Rollcall Vote No. 259 Leg.]

YEAS—70

Andrews	Goldwater	Metzenbaum
Baucus	Gore	Mitchell
Bentsen	Gorton	Moynihan
Biden	Harkin	Murkowski
Bingaman	Hart	Nunn
Bradley	Hatch	Packwood
Bumpers	Hatfield	Pell
Burdick	Hawkins	Pryor
Byrd	Hecht	Rockefeller
Chiles	Heflin	Rudman
Cochran	Heinz	Sarbanes
Cohen	Hollings	Sasser
Cranston	Inouye	Simon
D'Amato	Johnston	Specter
DeConcini	Kennedy	Stafford
Denton	Kerry	Stennis
Dodd	Lautenberg	Stevens
Domenici	Laxalt	Trible
Eagleton	Leahy	Warner
Evans	Long	Weicker
Exon	Mathias	Wilson
Ford	Matsunaga	Zorinsky
Garn	Mattingly	
Glenn	Melcher	

NAYS—30

Abdnor	Gramm	Nickles
Armstrong	Grassley	Pressler
Boren	Helms	Proxmire
Boschwitz	Humphrey	Quayle
Chafee	Kassebaum	Riegle
Danforth	Kasten	Roth
Dixon	Levin	Simpson
Dole	Lugar	Symms
Durenberger	McClure	Thurmond
East	McConnell	Wallop

So the amendment (No. 917) was agreed to.

Mr. COCHRAN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HELMS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Several Senators addressed the Chair.

Mr. HELMS. Mr. President, I cannot hear anything. May we have order?

The PRESIDING OFFICER. The Senate will be in order.

The Senator from North Carolina.

Mr. HELMS. Mr. President, in the first place, just for the edification of the Senate, will the Chair repeat the vote?

The PRESIDING OFFICER. Seventy yeas and thirty nays.

Mr. HELMS. Seventy to thirty?

The PRESIDING OFFICER. That is correct.

Mr. HELMS. Mr. President, I inquire, does the question now recur on amendment No. 916?

The PRESIDING OFFICER. That is correct.

Mr. HELMS. I thank the Chair.

Mr. STENNIS. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

The Senator from North Carolina.

Mr. HELMS. I yield the floor.

AMENDMENT NO. 921

(Purpose: To specify criteria for the determination of fair and reasonable rates to be charged by United States flag commercial vessels for purposes of the cargo preference laws.)

Mr. BOSCHWITZ. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Minnesota [Mr. BOSCHWITZ], for himself, Mr. NICKLES, Mr. DANFORTH, and Mr. DURENBERGER, proposes an amendment numbered 921 to amendment numbered 916.

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of amendment No. 916, insert the following:

"FAIR AND REASONABLE RATE

"SEC. . Section 901 of the Merchant Marine Act, 1936 (46 U.S.C. 1241) is amended by inserting the following after the first sentence in subsection (b):

"The rate charged by a United States flag-commercial vessel for transporting cargoes subject to this section and the Joint Resolution of March 26, 1934 (48 Stat. 500, 46 U.S.C. 1241-1) shall be deemed to be fair and reasonable only if such rate—

"(A) for the fiscal year ending September 30, 1986, is no greater than 175 per centum of the rate charged for transporting the same cargo on a foreign-flag commercial vessel;

"(B) for the fiscal year ending September 30, 1987, is no greater than 160 per centum of the rate charged for transporting the same cargo on a foreign-flag commercial vessel, and

"(C) for the fiscal year ending September 30, 1988, and each fiscal year thereafter, is no greater than 140 per centum of the rate charged for transporting the same cargo on a foreign-flag commercial vessel.

Mr. BOSCHWITZ. Mr. President, under the cargo preference rules, 50 percent of all shipments generated by

the U.S. Government must be shipped on American-flag vessels, and the rates that the American-flag vessels can charge must be "fair and reasonable."

"Fair and reasonable" has often been defined by the Maritime Administration to be 300 percent or 400 percent of the international rate. This amendment would change that and say that "fair and reasonable" would be defined as 175 percent of the rate charged for transporting the same cargo on foreign-flag vessels in the fiscal year ended September 30, 1986.

In the next fiscal year, "fair and reasonable" will be defined as 160 percent of the rate charged for transporting the same cargo on foreign-flag commercial vessels.

In the following fiscal year, it would be 140 percent.
